SIXTY-FOURTH CONGRESS,
FIRST SESSION.

VOLUME LIII, PART 9.

(PAGES 8291 TO 9386.)

Congressional Record.

PROCEEDINGS AND DEBATES OF THE SIXTY-FOURTH CONGRESS, FIRST SESSION.

SENATE.

FRIDAY, *May 19, 1916.*

(Legislative day of Thursday, May 18, 1916.)

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

TEXAS BICENTENNIAL AND PAN AMERICAN EXPOSITION.

Mr. SHEPPARD. Mr. President, with the permission of the Senator from Arkansas [Mr. CLARKE], I wish to ask unanimous consent for the passage of the joint resolution (S. J. Res. 72) to provide for holding the Texas Bicentennial and Pan American Exposition at San Antonio in 1918. If it leads to any debate, I shall withdraw it.

Mr. CLARKE of Arkansas. That may be done by unanimous consent without displacing the river and harbor bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which had been reported from the Committee on Industrial Expositions by Mr. MARTINE of New Jersey without amendment.

Mr. SHEPPARD. There are certain amendments to be added. I send them to the desk.

Mr. KENYON. I should like to make an inquiry of the Senator from Texas. I understand the joint resolution does not carry an appropriation.

Mr. SHEPPARD. It carries no appropriation.

Mr. SMOOT (to Mr. SHEPPARD). Has the Senator offered the amendments?

Mr. SHEPPARD. I have offered several amendments, among which are those suggested to me by the Senator from Utah.

The VICE PRESIDENT. The amendments will be stated.

The amendments were, on page 1, line 6, to strike out "San Antonio" and insert "Texas Bicentennial"; on page 1, line 7, strike out the word "Bicentennial" and insert the words "and Pan American"; on page 2, line 2, strike out the word "January" and insert "November"; on page 2, line 5, strike out the word "respectfully"; on page 2, line 6, strike out the words "by proclamation, or in such manner as he may deem proper"; and on page 2, line 7, insert the words "Spain and" between the word "invite" and the word "all," so as to make the joint resolution read:

Resolved, etc., That whenever it shall be shown to the satisfaction of the President of the United States that a suitable site has been selected and that adequate provision has been made for buildings and grounds that will enable the Texas Bicentennial and Pan American Exposition to inaugurate, carry forward, and hold an exposition at the city of San Antonio, Tex., on or about the 1st day of November, 1918, to celebrate the two hundredth anniversary of the settlement of San Antonio, the President of the United States be, and he hereby is, authorized and requested to invite Spain and all the Pan American countries and nations to such proposed exposition, with a request that they participate therein.

The amendments were agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. SMOOT. I should like to ask the Senator from Texas if he desires the "whereases" to be inserted in the joint resolution?

Mr. SHEPPARD. Not necessarily.

Mr. SMOOT. They are not necessary, and I should like to have them go out.

Mr. SHEPPARD. Very well; let the preamble be stricken out.

The VICE PRESIDENT. Without objection, the preamble is stricken out.

The title was amended so as to read: "A joint resolution to provide for holding the Texas Bicentennial and Pan American Exposition in 1918."

RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The VICE PRESIDENT. The Secretary will continue the reading of the bill.

The SECRETARY. On page 22——

Mr. KENYON. Mr. President, I think we should have a quorum here before we commence with the bill. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll and the following Senators answered to their names:

Ashurst	Gallinger	Myers	Smith, Md.
Bankhead	Gore	Nelson	Smith, S. C.
Beckham	Gronna	Norris	Smoot
Brady	Hardwick	O'Gorman	Sterling
Catron	Husting	Oliver	Swanson
Chamberlain	Johnson, S. Dak.	Overman	Thomas
Chilton	Jones	Page	Thompson
Clarke, Ark.	Kenyon	Ransdell	Wadsworth
Culberson	La Follette	Sheppard	Warren
Curtis	Lea, Tenn.	Sherman	Williams
Dillingham	Martin, Va.	Simmons	Works
du Pont	Martine, N. J.	Smith, Ga.	

Mr. CHILTON. I wish to announce for the day that the senior Senator from Indiana [Mr. KERN] and the junior Senator from Indiana [Mr. TAGGART] are unavoidably absent, and also that my colleague [Mr. GOFF] is absent on account of illness.

Mr. CURTIS. I was requested to announce the absence of the Senator from Maine [Mr. BURLEIGH] on account of illness.

The VICE PRESIDENT. Forty-seven Senators have answered to the roll call. There is not a quorum present. The Secretary will call the roll of the absentees.

Mr. CLARKE of Arkansas. I move that the Sergeant at Arms be directed to notify the absentees to attend. Let the clerks at the desk furnish him with a list of the absentees.

The motion was agreed to.

The VICE PRESIDENT. The Sergeant at Arms will carry out the instructions of the Senate.

The Secretary called the names of the absent Senators.

Mr. LODGE, Mr. STONE, and Mr. HITCHCOCK entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present.

Mr. CLARKE of Arkansas. I move that further proceedings under the call be vacated.

The motion was agreed to.

Mr. WORKS. Mr. President, ever since I have been in the Senate the river and harbor bill has been a matter of contention and criticism. Last year a filibuster was resorted to in order to defeat its passage. At the present session the junior Senator from Iowa [Mr. KENYON] has pointed out in a very able speech some of its weaknesses, defects, and vices. There is no doubt that the river and harbor bill has been a source of a great deal of unnecessary and inexcusable expenditure of public money. I think we all realize that fact.

The remedy for all this, it seems to me, is perfectly simple, yet it has never been resorted to, and probably never will be. If the Congress of the United States should do its duty, it would take up each one of the items contained in this bill, determine it upon its merits, and enact or defeat it as the interest of the Government required.

It has been very generally known that the river and harbor bill has been used for the purpose of aiding men to secure favor and votes at home. That is an evil that should be condemned by everybody, but nothing has been done so far to prevent it, and we have here again precisely the same old question that we have had ever since I have had any connection with the Senate and, I presume, for many years previously.

Mr. REED. Mr. President——

The VICE PRESIDENT. Does the Senator from California yield to the Senator from Missouri?

Mr. WORKS. I yield.

Mr. REED. The statement as just made by the Senator from California has been frequently made in the past, and I do not care to discuss it with the Senator or to interrupt him as to the question of whether the river and harbor bills have not at some time in the past contained items which were put into those bills for the purpose of aiding some Member of Congress; but I call his attention to the fact that there are certain great propositions which have been approved by the proper heads of departments and have been adopted permanently. I want to ask him now if it is not a fact that, with the exception——

Mr. KENYON. I rise to a parliamentary inquiry, Mr. President.

The VICE PRESIDENT. The Senator from Iowa will state his parliamentary inquiry.

Mr. KENYON. I desire to make a parliamentary inquiry, because the Senator from Arkansas [Mr. CLARKE] yesterday, when the Senator from Missouri [Mr. REED] was not present, I think, stated that he would object to any interruption of any of the speeches during the day. I am not myself raising any objection, but if the Senator from California is going to lose the floor by submitting to an interruption, I think——

Mr. REED. I have not the slightest idea of taking the Senator from California from the floor. I merely made a little preliminary statement, in order to make my question plain, and I was going simply to ask a question.

Mr. WORKS. Mr. President, I am very glad to have the Senator from Missouri ask any question which he desires to ask.

Mr. REED. Now, to resume, is it not a fact that, with the exception of a very few items, the present bill simply carries on those great projects which were approved by previous Congresses, and some of them approved by many previous Congresses? Is not that the situation which confronts us to-day in the consideration of the present bill?

Mr. WORKS. Undoubtedly. I think the Senator from Missouri was not present when I began what I have to say, in which I stated that the right thing to do in this matter was to test each one of these proposed appropriations upon its merits. I am not contending that there are not a great many items in the appropriations contained in the bill that ought to be made. I think we all realize that.

Mr. REED. I, of course, did not object to that statement; I did not take any exception to it; but the language employed by the Senator from California, to the effect that such bills had been used for the purpose of aiding particular Members of Congress, seemed to me to imply that that charge could be justly brought against the pending bill; and I do not think that so fair a man as the Senator from California is known to be would really want to have that statement, made in that way, to go to the country without the further statement which I have taken the liberty of making, that this bill almost entirely is confined to those various projects which have had the approval of previous Congresses, the approval of the departments, and which have been adopted as a part of the settled policy of internal improvement.

Mr. WORKS. Yes; I think that is undoubtedly true, Mr. President, but it is not at all true that a great many of these projects that have been long since adopted and have been carried on from time to time are now justified. This Congress ought to have the courage to put an end to those appropriations, no matter who has authorized them beforehand, if Congress believes that they are not just charges to be made against the Government. I do not believe that this Congress can justify itself in carrying on these continuous appropriations by reason of the simple fact that some other Congress in previous years has started us on that road; and I insist upon what I said in the beginning, I will say to the Senator from Missouri, that these different items of appropriation in this bill should be tested separately, and whatever of them are just and right should be allowed, of course. There are many of them in this bill that are not only justfied and should, under the circumstances, be made, but there are others here that have been pointed out which I think are vicious and ought not to be allowed to remain in the bill.

My broad statement that the rivers and harbors bill was used for the purpose of securing votes did not imply that there were not a great many of these appropriations which were just and which should be made—and as to those there can be no fair criticism—but, taken as a whole—and this has always been so—there are items in this bill which are undoubtedly used for the purpose of gaining favor or credit by Members of Congress at home. We all know that, and there is no use trying to blink the fact. One of the difficulties about presenting this matter fairly and receiving an honest vote upon it is that one Member who desires to get through his appropriation, and one that may be perfectly fair and just, hesitates to oppose an appropriation offered in the interest of somebody else lest he lose the vote of that particular Member of Congress. That is one of the unfortunate features of legislation of this kind which I should like to see corrected.

But, Mr. President, what are we going to substitute in place of this means of making appropriations? That is the important question to me. I remember when Senator Burton last year was discussing this subject I asked him the question whether he had anything to offer as a substitute for this means of making appropriations, and he admitted that he had not. The Senator from Iowa [Mr. KENYON], who has given this matter the most careful and conscientious study, has, so far as I know—and I have heard a great part of his discussions of the question—offered no substitute for what we have already.

Mr. KENYON. Mr. President, I simply want to say to the Senator that I have offered an amendment, and shall present it at the proper time, for a national waterway commission to handle the question. I hope the Senator will examine that amendment.

Mr. WORKS. Very well. If I remember correctly, the Senator criticized the method that is in vogue now of submitting these matters to a board of Army engineers for the reason that Members of Congress control the action of that board; that they went before it and discussed and presented these items, and that the influence that Members of Congress were able to bear upon the board made it inefficient and resulted in the recommendation of appropriations that ought never to be made. If the Senator substitutes some other body, such as he suggests, the same condition will exist. Members of Congress are going to look after the appropriations for their own States and districts, whether the items go before a commission or not; and, after all, we have to come down to the one single and simple remedy, that is, to test these different items of appropriation upon their merits, and until we can do that no substitute can be devised that will get us out of this situation.

Mr. President, I am not going to discuss the rivers and harbors bill at any length. I want to talk about something else which has grown out of the discussion, particularly by the interesting address delivered by the Senator from Colorado [Mr. THOMAS] yesterday. I have no doubt the Senator was greatly delighted to be able to expose the fact that very large appropriations had been asked for by different Members of the Senate on this side of the Chamber. I can appreciate that fact. I think, perhaps, the Senator was a little bit unkind toward me because I had insisted in the beginning of this debate that we ought not to make it a political question. It is not a question of what Democrats or Republicans have been doing with respect to it; it does not make any difference whether these appropriations which are offered come from the Democratic side or from the Republican side of the Chamber. The Senator from Iowa very justly commented upon the fact that the Democratic Party had declared in favor of greater economy and that it was not living up to that pledge; but such pledges have been made by both the political parties that have controlled the Senate in the past; and, after all, it does not make very much difference whether a man is a Democrat or a Republican if he wants an appropriation for his State or district. However, what the Senator has said with reference to appropriations for which I have asked has given me an opportunity, of which I am going to take advantage, with the consent of the Senate, to point out some of the things that I have sought to bring about in asking for these appropriations, and to call the attention of the Senate to some of the things that I think ought to be taken up and acted upon, and that without delay, in justice to Congress and the country.

Now, let me take up a few of them and call the attention of the Senate to the appropriations for which I have asked and the objects sought to be accomplished by them. The first of them is an appropriation of $18,000 to pay the salaries of three members of a commission. That is asked for in the bill introduced by me to take out of the hands of the Members of Congress the disagreeable duty, if it is a duty, of recommending and selecting officers and employees of the Government; in other words, to take out of the hands of Congress political patronage and all that belongs to it, which, I think, is one of the greatest evils that afflicts this country and Congress to-day.

The provisions of the bill, in a brief way, were that at the incoming of any elected President he should, at the beginning of his term, appoint a commission of three to receive the recommendations for appointment to office or appointment as employees of the Government, and determine, upon full hearing, who was the most meritorious of those submitted for any particular office, and select and report that person to the President for his appointment. It is a singular thing to me that a Member of the Senate should object to a provision of that kind.

I should suppose that there was not a Member of this body who would not only be willing but glad to get rid of patronage and the burden that rests upon him of determining who shall be appointed to office from his State.

The bill provided further that upon making this recommendation to the President he might appoint or might not; and, if he was not satisfied with the selection, the matter was referred back to the commission to select some one else who should be satisfactory to the President. It was further provided that no Member of Congress and no member of the Cabinet should make any recommendations of anybody for appointment to office or as employees of the Government in any position whatever, taking it absolutely out of the hands of the Congress of the United States to deal with this question of patronage and turning it over to a commission that would aid the President in determining just who should be appointed to office. It involves, as I have said, an appropriation of $18,000 for the purpose of paying the commission. A Democratic committee dealing with the question at the last session of Congress reported the bill adversely. I reintroduced it at the present session of Congress, but it has not been acted upon at all and probably will not be.

The second appropriation asked for by me is $90,000 to pay the salaries of a tariff commission. That bill was offered at the last session of Congress. At that time the Democratic Party was not in favor of a nonpartisan tariff commission and the bill received no attention whatever. Since that time there has been a change in sentiment on the part of the administration and of the Democratic Party, as I assume, and now they are attempting to bring about just what I attempted to do by the bill to which I have called attention. That was another of the appropriations of which the Senator complains.

Then there is a proposed appropriation of $800,000 to provide a home for the Confederate veterans. It seemed to me that the time had come in the history of this country when, as a matter of benevolence and good will, Congress might very well extend this favor to the veterans of the Confederacy. Certainly there is nothing selfish about that proposed appropriation. It was intended principally as an act of good will toward the people of the South that would tend to remove any of the ill feeling that might still remain as between the two sections of the country growing out of the Civil War. Much to my surprise, that bill has also died in committee. At least it has not been reported upon or received any attention, as far as I know. Some of the soldiers' homes are now only partially occupied and soon they will not all be needed by the Federal veterans. It would be a commendable and a graceful thing to give them over to the few remaining Confederate veterans of the Civil War.

Then I have asked for an appropriation of $400,000 to buy lands for an aviation school at San Diego, Cal. That was recommended by the Secretary of War, who wrote me a letter upon the subject approving action of that kind. The bill was introduced, but never was passed. In place of it provision was made for an examination of the whole question by a committee to be appointed by the Secretary of War, or officers to be appointed for that purpose, and that was done. What has finally been done about it I do not know. The bill was again introduced at this session.

Then there was another small appropriation asked for of $10,000 for the purpose of putting up signposts in the deserts, where lives were sacrificed year after year by reason of the fact that persons passing over the deserts had lost their way and were unable to reach water. This bill simply provided for the establishment of signposts and the discovery of springs along the way, and was a purely beneficent act for the purpose of protecting human lives.

Then, Mr. President, I introduced a bill that has brought about some discussion here—one providing for a constructive industrial reserve military force. That bill provided, in substance, for the setting aside by the Government of the United States of small tracts of land upon which persons who enlisted in this reserve force might find homes for themselves and their families. The appropriation was for the purpose of buying these lands. I insist, Mr. President, that that should have been done by this Congress, and I think it will be done later on. It was an appropriation that has appealed to me very strongly as one means of providing for this Government a reserve force that could be used on occasions when it was necessary in time of war, if that should ever happen, and at the same time the men enlisted could be used as a reserve force to work upon the public works of the Government and help settle the public lands of the country that are now vacant and unimproved and improve them to an extent that will be of vast benefit to the whole country. That appropriation involved the sum of $50,000,000, and was the largest of the entire number that has been commented upon.

Then I come to another that has appealed to me very strongly, but seems to have appealed to very few other Senators. That is the appropriation of $600,000 for the purchase of what is known as Snow Court, one of the worst slums in Washington, and to erect upon it model houses for the housing of the poor. I offered that measure as an amendment to one of the bills that was pending here in the Senate. I have taken occasion, as I said then, to investigate these conditions, and they are horrible to think about. What can be done in a case of that kind? Even Senators will not stop to listen to information as to what the conditions are. You can not secure their support, because they seem to be indifferent to those conditions; and the same condition exists, so far as the people of the city of Washington are concerned. This city is filled up during the winter season in great part by the idle and profligate rich, who spend their time here without benefit to the city or the country, spending their surplus money in high society and extravagant living. One of these fine ladies, dressed in her silks and satins, could step into her $10,000 automobile in front of her $100,000 mansion on one of the great thoroughfares of this city and in three minutes drive into a section of this city that should shock her sensibilities and excite her sympathy for the people who are compelled to reside in those places. She is not a bad woman. She does not realize what those conditions are. She does not know anything about them. There are thousands of people right here in the city of Washington who have no knowledge of those conditions. I believe there are very few of the Senators of the United States who have looked into those conditions and know what they are.

It seemed to me, Mr. President, that it is a solemn duty resting upon the Congress of the United States, which has absolute control and jurisdiction over the District of Columbia, to see that these conditions are corrected. If Congress is not willing to appropriate the money of the Government for that purpose, there are rich people in the city of Washington who should see to it themselves that these conditions are removed. But there have been corporations organized here in the city, partly charitable and partly for the purpose of making money, organized for the very purpose of doing what is contemplated by this proposed appropriation—constructing and building model sanitary buildings to be occupied by the poor people of the city. But what has been the result of it? One of these organizations has been able to make the full amount of profit that was allowed by the act organizing the company. Therefore it is not a matter of charity; it is a matter of making money, and still the slums remain practically untouched. Another effort was made to remedy this evil by an act that was passed in memory of a good and charitable woman, providing for the organization of another just such partly charitable and partly profit-making corporation for the purpose of doing in part what is sought by this appropriation. There have been some donations, if they may be so called, to that corporation. There is some hope that something may be accomplished by it, but very little; and I am satisfied that this thing will never be accomplished until it is taken hold of by the Government, brought to a direct issue, and the slum districts destroyed and comfortable sanitary homes provided for the poor and unfortunate, to be supervised and kept sanitary by the Government.

Then another of the appropriations commented upon by the Senator is one that was offered as an amendment to a bill pending to appropriate $100,000,000 for the purpose of purchasing the lands on Pennsylvania Avenue, to be occupied by Government buildings. As was explained at the time, that was an arbitrary amount that was fixed, and it was for the purpose of purchasing land for the use of the Government, and an act of economy rather than the extravagant expenditure of money.

Then there was a general bill offered, that was included in this estimate by the Senator from Colorado, of $10,000,000 for the purpose of purchasing and cleaning out all these slums in the city of Washington. This is just what should be done. The work should not be done by piecemeal.

Mr. President, there is just one in all this list that may be regarded as a selfish one of advantage to my own State, and that is an amendment that I have offered to the bill that is now pending carrying an appropriation of $1,080,000 for the construction of a diverting dam to protect the Los Angeles and Long Beach Harbors from filling up by the silt that comes down from the mountains. That appropriation was very thoroughly and carefully examined by the Board of Engineers and recommended by it. It has been presented to the Committee on Commerce, and in that way has gone into the bill.

Then, in addition to that, to make up the amount of these appropriations, I have offered a number of bills embodying claims against the Government. I hope the time has not come when a Senator should be criticized for attempting to induce

the Government to pay its honest debts. One of those is quite a large appropriation of five hundred and twenty-six thousand and odd dollars for one of the Indian depredation claims. The others are small in amount.

Then follows the list of pensions that have been applied for. Usually these pension bills have not been criticized by anyone, and a great many of them are offered that are rejected because the proof is not sufficient or the circumstances are not such as to warrant the granting of the pension. Six of these have already been granted. They make up the sum of $6.036.

So these, Mr. President, are some of the appropriations that I have asked for. I have not said this about it in the way of apology for introducing these bills. I think they need no apology from me. I have not said what I have about it for the purpose of explaining these bills, with the object of justifying myself in introducing them in the Senate. I have only felt it proper to call them to the attention of the Senate because I think most of them should be taken up and dealt with by Congress and not hidden away in the committees.

Mr. President, my continued service in the Senate of the United States will be very brief. My term of office will soon expire. I expect, when it does, to retire to the peace and quiet of private life. When I look back over the more than five years that I have rendered service here I sometimes wonder what I am here for and what I have accomplished that is of good to the country or to humanity. I have made a few speeches—not very good ones, I am willing to concede. Maybe they will be looked upon as a fair average of the speeches that are made in the United States Senate. Few people read them—especially Senators. Very few of the Members of the Senate have heard them. I have tried to say some helpful things. I have condemned some of the evils that I think exist and should be remedied. But when any Senator looks back over the six years of his service he will, if he desires to accomplish anything of good, be sadly disappointed at the result. The fact that Senators will not stop to listen to something that is intended for the benefit of the public makes it seem almost hopeless to attempt to accomplish anything in that direction.

Under these conditions, Mr. President, I shall retire to private life with a great deal of satisfaction and relief. I have tried to do my part here. There is only one particular thing that I can look back to and say that I feel some pride in having accomplished at least that one thing for the help of others. I was partly instrumental in closing up something like 250 of the saloons in the District of Columbia and banishing them all from the residence districts of the city. But there are 300 of them yet open and sending out their poisons all over this city, and they probably will remain open until I have left the Senate.

One of the things that has appealed to me as most unfortunate in the work that I have tried to do here is the fact that these very attempts that I have made in behalf of humanity, unselfish in their object, seeking to relieve the poor and unfortunate who need our help more than anybody else, have seemed to receive the least attention from the lawmaking power of the Government. We discuss politics. We talk about money. We look after the selfish interests of our constituents at home. We all do that. There is almost no question that can come before this body that does not, somehow or somewhere, involve politics or some selfish interest that is calculated to bias the minds of men dealing with public affairs. I am not saying this in criticism of the Senators with whom I have worked for the past five years and more. One of the things that I prize most of all in my work here is the association with the Members of this body, who have treated me with the utmost kindness and consideration at all times. So I have no criticism to make of them. It is the condition into which we have fallen—the fact that men are not considering these things that go for the benefit of humanity. They are thinking about the material things, about politics and the advancement of their own interests and the interests of their constituents in a material way; and these things that seem to me to be vastly more important in the interest of humanity are laid aside and forgotten.

I think it will be seen that, in the main, these appropriations for which I have asked have been for the purpose of advancing the things that seem to me most important, and not for the purpose of aiding my constituents, except as they are a part of this great country of ours, and should be interested in these great moral questions that affect us all so closely.

Now, Mr. President, I have wandered away from the subject. I must confess to the Senate that some of these things that I have advanced have come very close to my heart. I have been greatly disappointed that some of them have not attracted the attention and the help of Senators in carrying them out. That is the way of things here. Nobody is particularly to blame or to be criticized respecting it, but I do wish Senators of the United States would think more about these great questions and that at some time some of these things that I have been talking about, especially those here in the Capital of the Nation, will be looked to and that at some time—not, perhaps, while I am here, but after I am gone—they will be corrected.

Mr. NORRIS. Mr. President, yesterday the Senator from Colorado [Mr. THOMAS] came to the relief of this bill. With one exception, as far as I know, no one else has undertaken to defend it. I have wondered during several days of this debate under the critical analysis of the bill that was made by the junior Senator from Iowa [Mr. KENYON] why some of its defenders did not take the floor and justify the various appropriations contained in the bill; but yesterday the defense was made. It was not a direct defense, it is true. The Senator from Colorado did not even profess to defend the bill directly, but he contented himself with making a partisan attack upon those who are opposed to it.

Personally I do not believe that the bill ought to be discussed on a partisan basis. As far as I am concerned, I do not believe any bill ought to be discussed here on a partisan basis. Such a basis is frequently artificial, made often for the purpose of concealing the real intent and aligning men on one side or the other, according to the partisan bias or prejudice that we all possess more or less, while the people and the country suffer for the want of good legislation or on account of bad legislation.

Instead of defending the bill directly the Senator from Colorado called attention to various bills that have been introduced by Republican Senators asking for appropriations, and then said that people who live in glass houses must not throw stones. It is the province of the Senator from Colorado or any other Senator to discuss the public record of any Member of this body, to take up all the bills that he has introduced, to show what they are, and comment on their extravagance if he believes them to be extravagant. That is perfectly legitimate; but, Mr. President, he ought to tell the whole truth and not stop at a part of it. To do as he did yesterday, taking a list of Senators, in the first place, it is not fair to divide them along political lines; but waiving that for the moment, to take up various Senators and then read the amounts contained in the various bills that they have introduced asking for the expenditure of public funds and then stop is, in my humble judgment, unfair, unjust, and unworthy of the Senator from Colorado. Coming from some sources, I would not think anything of it and would pay no attention to it, but coming from the Senator from Colorado, with his discriminating and analyzing mind, his judicial temperament, it seems to me that it can not be passed by unnoticed.

Mr. President, when a witness goes into court and holds up his hand he swears to tell the truth, the whole truth, and nothing but the truth; and there are men now serving in penitentiaries who have been convicted of perjury because they did not tell the whole truth and covered something up. The political boss and the political machine and the yellow newspapers seeking for sensation jump at the opportunity to tell a part of the truth about public men. The organized band that goes to rob a bank always places a sentinel on the outside to keep people off while the looters are inside cracking the safe, and the pedestrian who comes along the street with honest intent trying to do his duty is warned to stand back.

While this bill, which, in my judgment, is a pork-barrel proposition, contains a great many items that ought to be excluded, that ought to be condemned, and that have no place in any bill that should be passed by Congress, is being put through, the Senator from Colorado goes down the street and says to men who are trying to make the bill better, who are trying to protect the Treasury of the United States, "Stand back; I will expose your record and show that you yourself are extravagant in trying to take the public money of the United States"; and then he shows the amounts contained in the various bills that have been introduced by Republican Senators where they asked either for an appropriation or an authorization of the expenditure of public funds.

If he had been fair, as fair as he usually is, as fair as we have a right to expect him to be from his past work and his upright character, when he undertook to make that analysis and that comparison he would have gone into detail in every case sufficiently far to show what the amount was, what the appropriation asked for undertook to do, and then, if he thought it was extravagant, condemned it in any parliamentary way that he saw fit.

I can discuss some of the items included in the bills introduced by the Senator from California [Mr. WORKS]. I would not have discussed them if he had not already done so himself. He has explained them. The amount as shown in the RECORD, or as it will be shown in the RECORD I presume—the Senator

from Colorado has not yet published his speech, I am speaking of it entirely from memory—but the amount charged up against the Senator from California will be very large, running into the millions, and while we might disagree with the Senator from California as to whether any of these propositions which he has introduced in the shape of bills ought to become laws, no man can question his fidelity, his patriotism, or his honesty when he has asked for them. Personally I believe in a great many of them, and when I have had an opportunity for some of them at least I voted; and yet if the Senator from California were running for reelection this morning's yellow Democratic journals in California would contain flaming headlines something like this: "The attempt of the Senator from California to rob the Treasury of the United States is exposed on the floor of the Senate by the Senator from Colorado."

Then they would have gone no further in holding the Senator from California up to ridicule before the people than the Senator from Colorado went in what he said yesterday. They would have told part of the truth, not all. In other words, it would be getting into it a partisanship, it would excite the partisan newspaper, the partisan machine, the man who wanted to get some advantage of the Senator from California, and give him an opportunity and a text to scatter before the people a misrepresentation.

We all know, all of us, how those things occur. We all know how anxious men and newspapers and machines and political leaders in all parties are willing and ready to resort to a plan of that kind which will throw discredit upon the public official seeking the suffrages of his people. It is an illustration of partisanship and the unfair method that can be taken where such a record is made.

Mr. President, what is the effect of it? When the bill comes before the Senate that a Member of the Senate believes to be wrong, he may be wrong himself, but he conscientiously believes that the appropriations contained in it are, many of them, wicked, what is his duty? There is only one answer. But if he undertakes to expose it, if he undertakes to defend what he believes to be right in reference to it, he is going to be met with a proposition as an answer to it that as a matter of fact is no answer. "You yourself have been guilty of extravagance; you asked for fifty or sixty million dollars from the Treasury of the United States," and then stop. That is a sufficient text for a partisan machine, for a partisan newspaper, or a partisan leader to carry the deception to the voters, and at least put the honest legislator on the defense and compel him to explain; and often, very often, Mr. President, it is that the man who has had to make the explanation does not have the money to follow up the deception, and it travels many miles and goes into thousands of places, because those who want to circulate such things in a political campaign are always possessed of unlimited funds and means to do it.

That is one of the things that often keeps honest men out of public life. Men do not want to subject themselves to such an unfair and unjust yet wicked criticism as that may be, and when it is made, feeling compelled to defend it, they exhaust the last dollar in making such defense when no defense ever ought to have been required.

Mr. President, I want to illustrate that. At the risk of criticism I am going to illustrate it by something that happened in my own life. I was a Member of the House of Representatives during a Republican administration when we passed the Panama Canal act. I believed then, as I do now, that there ought not to be an exemption to American ships passing through that canal. I am not going to discuss that question, but for argument's sake you can assume that I am wrong if you want to. But I believe they should not be exempt. When that bill was before the House of Representatives I voted in favor of an amendment to the bill that provided that American ships should be compelled to pay toll the same as any other ships. The amendment was defeated. The bill went through the House, passed the Senate, and was signed by President Taft, and became a law.

The Democratic platform, you remember, at Baltimore contained a provision in which they said they were in favor of free American ships; that there should be no toll on American ships going through the canal. The then candidate for President, Mr. Wilson, made a speech in which he made particular reference to that plank to the farmers of New Jersey, commending it and favoring it. I am not criticizing him. He had a perfect right to do it. But the Democratic Party was successful on that record and thereby fairly bound to uphold the contention in their platform particularly approved by Mr. Wilson.

Then President Wilson changed his mind, and after he changed his mind the Democratic Party changed its mind, and we passed a bill through Congress which provided that American ships should pay toll. After the time that that bill passed the House in its original form I was elected to the Senate, and when I came to the Senate I supported that bill. I voted for the proposition then the same as I did in the House. During my campaign for the Senate I made a speech one evening in one of the towns in my State. Some man from the audience got up and asked me a question. The question was in regard to the free passage of American ships and whether I favored it. I told him I did not; that I had voted for an amendment providing for the payment of tolls by American ships. I said I voted for the proposition in the House of Representatives and still favored it. I discussed it somewhat briefly.

There were in that town two newspapers, one of them a Republican paper and the other a Democratic paper. The Republican paper was standing by President Taft and the action of the Republican Party as it existed in the House and in the Senate, and in the next issue criticized me for what I said rather bitterly. The Democratic paper also criticized me and called attention to the fact that nobody was in favor of charging tolls but the railroads, and that I was a railroad candidate, and would be a railroad Senator if I was elected to the Senate of the United States. Then it said, "The Democratic Party is on the other side of this proposition"; and it cited the plank of the Democratic Party. Then it said, "President Wilson, the Democratic candidate, has made a speech in which he has affirmed that particular proposition in the Democratic platform, and Mr. NORRIS's opponent is standing on that platform. If he is elected, he will be opposed to charging tolls to American ships. Therefore we say to the voters it is a choice between a railroad Senator and one who stands for the people." That was the substance of the editorial. So I was hit on both sides.

I remember the Democratic editorial said one thing further. It said, "There are a great many Republicans who are opposed to this railroad Senator because he has incurred the displeasure of some of the leaders of his party. All we have got to do is to stand together, in order to get a Democratic Senator, and at the same time defeat a railroad candidate."

Well, you all know what happened. In due time President Wilson delivered his message to Congress, in which he asked that we pass a law providing for a repeal of the free-of-tolls clause of that act, in effect compelling American ships to pay tolls the same as others; in other words, approving what was my position from the beginning.

I might digress here to say that I know this Democratic editor well. He is one of the best men of his community. He is an able man; he is honorable; and in everything but politics you can trust him to the limit. His word is good and his note is good, but he would skin his own father if he were running on the Republican ticket. So when President Wilson came forward and took the other stand, what did this editor do? Why, he did as most of the Democrats of the Senate and of the House did; he flopped over just as quickly as the President did; and he had this kind of an editorial in his paper: He commented at considerable length on the message in general, and then took it up in detail and said, "The President has strongly advocated the repeal of the free-of-tolls provision of the Panama Canal act," and he added, "Of course, everybody knows that that free-of-tolls plank, which went into the Baltimore platform, was never anything but a joke; that it got in there by manipulation; nobody knew anything about it; and nobody wants freedom of tolls except the Shipping Trust, and it can not be repealed too quickly."

Well, in due time it was repealed, as Senators know. Then there was another editorial in the newspaper which stated that "A tardy and recreant Congress had at last obeyed the mandate of the President, and had repealed the free-of-tolls provisions of the Panama Canal act, as it ought to have done long ago." It further stated, "We are glad to say that the Democratic Senator from Nebraska was with the President on that proposition and voted for it," and, as a sort of a postscript to the editorial, it said, "Mr. NORRIS also voted in that way; but he had already voted the same way in the House of Representatives, and he therefore was entitled to no credit for being right." [Laughter.]

That is an illustration of the partisanship—rank partisanship—that is going to be given and has been given a great boost by the Senator from Colorado, when he said, "Men who are fighting this bill, if they be Republicans, must desist, or I will expose to the country their record of extravagance."

Mr. President, I want to give just a little further illustration in regard to these things which have been alluded to, and I am going to refer to my own case. I do that, not because it is of any particular importance—for it is not—but because I should like to illustrate the point, and I can discuss my own case, of

course, without criticism and with perfect freedom, while I do not feel at liberty to discuss so freely the position of other Senators.

The Senator from Colorado, in showing up my wonderful extravagance, stated that I had introduced bills providing for the appropriation or authorization of the expenditure of public money amounting to something over $17,000,000. I am speaking from memory, because, as I have said, the Senator has withheld his speech from the RECORD, and so I have not been able to read it. With that statement regarding me, the Senator stopped, just as he did as to other Senators. Well, I want to take up just two bills that are included in my list. One was a bill providing for an authorization—not an appropriation, for it did not appropriate a dollar; but, of course, appropriations would have come, but they would have been spread out over the length of time that it would take to construct the improvement for which the bill provided. It provided for the development of water power out here, west of the city of Washington, at Great Falls. There the Potomac River is rolling down over rocks and precipices every day, and has been during all the ages, with enough power going to waste to turn every wheel in the city of Washington, to pull every car, to light every home, and to furnish all the electrical power that all the citizens of this Capital City could utilize. To my mind, it is a sin; to my mind, we are not doing our duty when we do not provide for the development of that power.

So I introduced a bill instructing the Secretary of War to take the necessary steps that would bring about this development. I did that in pursuance of an investigation which Congress had authorized by law, in which $20,000 of public funds were expended to make the investigation. It was one of the most complete investigations that has ever been made. I put in the bill the amount that the engineers of the Government said it would take. That was something over $15,000,000.

Who is opposed to that bill? A great many good, honest men, because they do not understand it, and some when they do understand it. I criticize no man who opposes the bill. The Senator from Colorado would have had a right and would have been perfectly justifiable, if he thought that was extravagance, to say, "One of those bills appropriates $15,000,000 to develop water power at Great Falls for the city of Washington and for the Government of the United States"; and then he could have used any language he saw fit that was parliamentary to condemn it and to show that it was unfair and that I was extravagant, but he did not do so.

Who is opposed to the bill? The bitterest opposition on earth that comes to legislation of that kind comes from the interests that are making money out of the people—the poor people of the city of Washington—in charging them exorbitant rates for electric light; and the effect of the attitude of the Senator from Colorado—and I know he does not intend to stand in that light—is to say to any man who dares stand between the people and this exorbitant expenditure, "Stand back, sir, or I will expose your record of extravagance to the people of the United States and of your State." The Potomac Electric Power Co. never counted the Senator from Colorado as one of its defenders; but, innocently, he has put himself in that class by saying, in effect, "You who undertake to provide for the development of that power I am going to put on the defensive, at least in your own States, and give the newspapers of a yellow streak an opportunity to show how extravagant you are in the use of Government funds."

Then there was another one of my bills containing an item, to which the Senator referred, of $2,000,000. When you add those two items together you have disposed of 99 per cent—more than that, probably—of the appropriations for which I have asked in the bills which I have introduced. That $2,000,000 was proposed to be appropriated; and, again, it related to a question concerning which there were two sides. Any man has a right to take the other side, and the Senator from Colorado had a perfect right to say, "This $2,000,000 is for the purpose of enabling the Federal Government to assist the States, particularly the States of the West and the Southwest, in the care of indigent persons afflicted with tuberculosis"; and then he could have said, "That is wrong; that is extravagant"; or he could have said anything else he desired; but that is what the bill provided for.

Every year there go from all the Eastern and Northern States into Colorado, into California, into New Mexico, into Arizona, and perhaps into some other States, an army of men, women, and children afflicted with tuberculosis. A majority of them are poor. They are clinging to life, as all men and women do cling to life, grasping perhaps at a straw, willing to take any chance to save their lives; their fathers, their wives, their husbands, their sons, their brothers, their sisters sacrificing the last dollar to carry the loved one into the State of Colorado, represented so ably on this floor by the Senator from that State. These afflicted people are often mistaken. It is often true that they are beyond the help of humanity; but they go out into these States and then become stranded. They are unable to secure admittance to the sanitariums; they do not have the money to secure proper treatment, and their cases have developed to such an extent that the climate, as beneficent and healthful as it is in some stages of that disease, is not able to save their lives. Hence, they drift into second-class boarding houses.

Why, Senators, you ought to read the testimony before the committee of the men who have been working for years and years along these lines to realize the fact that thousands and thousands of men have spent their last dollar to get into Colorado or California or New Mexico or Arizona, only to find when they get there that it is all too late. They do not have money enough to come back home to die; they do not have money enough to employ proper medical attendance; they do not have money enough to enter the sanitoria—and sanitoria, however much they may be inclined in that direction, do not have the money to provide free treatment for these poor people.

The bill to which I have referred provided that in cases of that kind, where the afflicted persons who had left their homes and gone into the Western States could not pay their way and could not provide for their own care, they should be cared for jointly by the State and by the General Government, each paying one-half; and it appropriated $2,000,000 for that purpose.

It seemed to me to be fair, although I may be wrong, that the remainder of the United States, sending this great army of persons afflicted with tuberculosis into the West and Southwest, ought to bear a portion of the expense involved. Not only that, but it seemed to me that it was an act of mercy that persons in the condition which I have described should be provided for in a proper and in a scientific way. I thought the bill had the necessary safeguards; in fact, it had the approval, and has the approval, of the Public Health Service of the United States and of the leading physicians of the United States who have devoted their lives to the study of tuberculosis. However, I may be wrong. A man can oppose that measure on the ground that it is not a proper use of public funds of the Federal Treasury; he has a right to do that, and I criticize no man for doing that; but I contend that no man, if he wants to be fair with me, has the right to say, "You live in your glass house; you are extravagant; you have asked the United States to pay out of its Treasury $2,000,000," and then not say what it was proposed to appropriate the $2,000,000 for, thereby laying the foundation for some political machine or some yellow sheet in glowing terms or in striking cartoons to "show me up" as just sneaking around the corner stealing $2,000,000 from the taxpayers of the country.

Mr. President, as I remember, when the Senator from Colorado looked up the bills which had been introduced by the junior Senator from Iowa he found that that Senator had introduced but very few bills asking for appropriations and that the amount carried by them was comparatively insignificant, and yet it may be that before this bill is disposed of he may offer a substitute cutting the appropriation down one-half or one-third, or some other figure. If he shall do that, even then the measure will carry a large appropriation of public funds; but if the Senator from Iowa had introduced that kind of a substitute before the speech of the Senator from Colorado, that Senator would have used that proposed amendment as an item to show the extravagance of the Senator from Iowa and his desire to get money out of the Public Treasury of the United States, when, as a matter of fact, if an analysis were made, it would be found that on its very face it was a saving instead of an expenditure of money.

Mr. President, the Senator from Colorado referred only to Republican Members. It has been true that in the last session and in the session preceding, when the river and harbor bill was before the Senate, the amount was materially reduced on account of the activities of certain Republican Senators. In the last two sessions this opposition to the "pork-barrel" bill was led by the then Senator from Ohio, Mr. Burton, and now the fight is led by the junior Senator from Iowa [Mr. KENYON]; so that, as a matter of fact, it happens that the real opposition, the real fight which has been made against this extravagance comes from this side of the Chamber, and therefore a Senator who wants to prevent opposition to this great measure and who would get it in such shape that there could be a partisan advantage taken of it, makes an attack, so far as extravagance is concerned, only on the Republicans.

Just the other day the Senator from North Carolina [Mr. SIMMONS], while this bill was before the Senate, made a statement here—and it was true—that in the last two Congresses

the Democratic Party had passed river and harbor bills carrying less appropriations than the Republicans had before them. That is true. And I suppose that when this is over, if you carry on the partisanship as the Senator from Colorado has so well begun it, if the fight led by the junior Senator from Iowa results in economy, the campaign speakers and the yellow journals of Democratic persuasion will go before the country and say: "Look at this! Here is a river and harbor bill that is 50 per cent less than a river and harbor bill when the Republicans were in power." They will not say anything about an attempt to hold back Republican opposition by citing things that might and will be used in a partisan way to injure the men who made the fight, the result of which they are going to claim credit for in the coming campaign.

Why, Mr. President, if the Senator had been as unfair to the Democrats as he was to the Republicans, he would have found some astounding results. I have not examined the figures; I do not intend to; but I venture the assertion that I can name three men on the Democratic side whose combined bills asking for authorizations and appropriations will amount to more than the total that was given yesterday by the Senator from Colorado as coming from the entire Republican side. But, Mr. President, it would not be a fair argument, it would not be justice, unless I went into the details and explained what the items were; and I concede then that a large part of it would vanish into thin air. It would be the same kind of an argument, however, that was made yesterday by the Senator from Colorado.

Instead of going out and warning Republicans to cease opposing pork-barrel bills and appropriations, the Senator from Colorado ought to be here united with them, leading the fight, if necessary, to bring about a bill here that would agree even with the ideas of economy of the Senator himself. Instead of taking the position he does and warning Republicans not to prevent this loot, he ought to raise his voice with them, or raise his voice and they would be glad to follow him, in an attack upon this bill, which I believe to be unjust and unfair. He ought to help the men who are protesting instead of trying to scare them away from the fight.

Mr. President, from the very beginning of time civilization has advanced because men had the courage to expose what was wrong. But you just undertake, under the political conditions that exist in this country, to expose what is wrong and you will find that political bosses and machines will search your life back to the time when you left the cradle; and whenever they find anything that is wrong—and when you are hunting for something wrong you can always find it—they will expose it. They will not tell what the real objection to you is, but they will unearth something; and if they tell all the truth, and that will not answer, then they will tell half the truth and put you on the defensive.

We would be in a condition of barbarism to-day if it were not for the men who through history have dared to face criticism, to face condemnation in exposing wrong. The man who has it presented to him as we do here, or if he believes it is presented to him—I want to put it in that way—and does not expose it, is not doing his duty to himself, to his God, or to his country. "To sin by silence when we should protest makes cowards out of men. The world has climbed on protest. If no voice had been raised against ignorance and lust, superstition yet would rule the law, and guillotines decide our least disputes. The few who dare must speak, and speak again, to right the wrongs of many."

I say this, Mr. President, without any criticism upon any man's action. He can take the course even that the Senator from Colorado has taken if he wants to. As I said at the beginning, if many men I know had taken that position I would only have laughed at it and said nothing. But when I saw the Senator from Colorado take it—a man in whose patriotism and whose wisdom and whose judgment and whose fairness I had almost unlimited faith—it seemed to me that I could not, in justice to my own conscience, permit it to pass unnoticed.

Men may favor every item in this bill if they want to, and I will not condemn them. I myself can not see how all of the items can be defended. It may be due to my ignorance, my lack of wisdom and lack of ability; but as far as my wisdom does go, I am going to follow it. And so, I think, those over here and over there who are opposed to this bill are going to do likewise, regardless of the unfair or unjust criticisms that may be made by any man or any set of men.

I am not opposed, Mr. President, to large appropriations. I am not opposed to river and harbor development. On the other hand, I am in favor of that kind of development; and I want to go just as far as honesty and good judgment will bid us go, regardless of what it costs. But I am just as anxious to prevent the use of Federal funds for the unjust development of localities as I am anxious to have good things accomplished if they can be accomplished with benefit to the people.

I believe the bill is wrong in its method. As long as we pursue this way of legislating for rivers and harbors we will always have, I believe, a pork-barrel proposition. I anticipate—in fact, I know—that the junior Senator from Iowa will have some remedies to suggest and offer. Personally, I believe Congress is not prepared or equipped to say whether there should be $40,000 or $10,000 or nothing expended on some creek in Florida or New Jersey or North Carolina or elsewhere. We ought to have, I believe, a nonpartisan permanent board of experts that would carry out a system of development the outlines of which Congress could very appropriately provide for.

There are in this bill items in regard to little creeks and little bayous that have been in the river and harbor bills for 10 or 15 years and are still uncompleted. No man would do that way with his own business or with his own property. If a certain river and its tributaries, for instance, ought to be developed, and can be developed for the improvement of navigation, it ought to be taken as a whole, and ought to be developed as speedily as possible, as speedily as economy and good judgment could provide and advance the work. Instead of that, we appropriate a few thousand dollars this year in a hundred or a hundred and fifty different localities, knowing that next year we are going to do the same, and next year the same, and so on, with the intent of completing the work in perhaps ten or a dozen years. It is not systematic; it is not economy. In the first place, an unbiased judgment would cut out hundreds of them entirely, and then would develop them as a system; and Congress ought to appropriate the money so that that can be carried on to advantage.

There would be no opposition, in my humble judgment, here or elsewhere, to a proper and honest system of development of our rivers and harbors, and there would be no particular criticism as to the amount if it could be justified. But this haphazard way, while it always gets votes in Congress and gets local support in the various localities where the money is expended, brings no return to the taxpayers of the United States.

It seems to me that not only ought we to defeat this bill but we ought to defeat the system. There might often be cases, probably, where it would be a close question as to whether or not a development ought to take place. I would not pretend to offer my judgment, at least, unless I had opportunities to make a close inspection and a complete investigation, and had the necessary qualifications of a technical nature to do that intelligently. So that I am willing to abide by the judgment of intelligent, honest men if a system is provided for, and, as far as I am concerned, give them the money to go ahead with the development.

There are a great many things we ought to do. There is not much use in developing harbors and rivers unless we make by law some provision that will prevent the railroads from putting out of business the men who go into the navigation business on the rivers and the lakes. It seems to me that that could be easily done. We ought to provide also that they should not be allowed to monopolize the harbors of the country. That, I think, could be easily done. Then we ought to provide by law for some tribunal within whose power and whose judgment it would be to investigate, and after investigation, if they thought the project was worthy of development, to develop it, and then have money enough to do it systematically, as a business man would do it in his own business. That kind of river and harbor improvement I would welcome.

We have been just as far from it as we possibly could be. It seems to me that it is unworthy of Congress year after year to sink the public funds of the taxpayers of this country in dry creeks and mudholes where never, under any conceivable conditions, will there be any navigation. This bill is full of such propositions. I expect later on to offer some amendments. I have not had time to give the matter the attention that other Senators have given it, particularly the junior Senator from Iowa [Mr. KENYON], in whose judgment I have great confidence after he has had an opportunity to make and has made an investigation of any proposition. But he is not trying to prevent river and harbor development. He is not trying to prevent the legitimate development of the internal resources of our country. He is not objecting to large appropriations, if he knows they are going to be used for legitimate and honest purposes. But he and those who are his lieutenants, with whom he advises and who follow him mostly in this fight, are not going to be diverted from the course that they believe to be right simply because somebody says, "We are going to expose your extravagant record to the people of the country."

Mr. THOMAS. Mr. President, I shall detain the Senate but a moment in again referring to some features of my discussion of yesterday. I do not know that I should do so, however, for I am not entirely sure of the standpoint to which any criticism or refutation of mine might be directed.

Some of my Republican associates, and particularly the junior Senator from Wyoming [Mr. WARREN], expressed their thanks and gratification that I had drawn attention to the bills calling for appropriations by Republican Senators. Among other things, the Senator from Wyoming expressed a sense of duty only partly performed in that he had introduced so few of them. Other Senators—not, perhaps, so candidly, but indirectly—have expressed some amusement and offered friendly suggestions with regard to some of the bills included in the list to which I had the honor of calling the attention of the Senate yesterday.

I shall not attempt, Mr. President, to reiterate the purpose for which I caused the tabulation to be made, for I have heretofore stated and restated what that purpose was. The Senator from California [Mr. WORKS] this morning expressed regret, and very properly so, that the matter to which these tabulations referred should have been considered as a political subject. If there is any partisanship in the performance, it did not have its origin with me, because if it be partisan or political, then surely the many criticisms and reminders concerning our expenditures which have proceeded from the other side of the Chamber and which prompted me to do that which I have done must have been inspired by a political or a partisan purpose, and if that be true then my rejoinder, if it is at all tinctured with partisanship, is due to the attitude of those who provoked the discussion.

I regret very much, Mr. President, that anything which I have done has caused any pain or given rise to any feeling on the part of the junior Senator from Nebraska [Mr. NORRIS]. He is evidently much concerned because of the inclusion in my list of certain bills which he introduced, and because of the political use which he thinks can be made of the list by what he calls politicians and yellow journals.

If it be true, Mr. President, that the political fortunes of a Member of this body can be injured or minimized by such a statement as I have submitted to the Senate, then the evil, if it be an evil, and I have not declared it to be one, of introducing bills for these appropriations is more far-reaching and deadly than I supposed.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER (Mr. HUSTING in the chair). Does the Senator from Colorado yield to the Senator from California?

Mr. THOMAS. In just a moment. I gather that if it be so the abundant material which I have been informed can be provided by this side of the Chamber and in the same direction will be promptly and frequently utilized in the next five or six months and for the purpose to which the Senator referred.

I yield to the Senator from California.

Mr. WORKS. Mr. President, I should not want the Senator from Colorado to think that I was induced to say what I did about this matter out of any sense of injury on my part or any sense of pain or any feeling that the Senator from Colorado had been or intended to be unjust to me. I think the kindly and generous disposition of the Senator from Colorado would prevent him from doing anything unjust or malicious. As I have said, it gave me an opportunity to express some views respecting these appropriations that I was glad to take advantage of. That was about all. I was not thinking about myself, politically or otherwise. What might have been said by the Senator from Colorado, that is for the Senator. I have no feeling of resentment myself at anything he has said on the subject as it relates to me.

Mr. THOMAS. Mr. President, the few reflections which I have just uttered were based entirely upon the comments and the evident feeling exhibited by the junior Senator from Nebraska. Let me assure the Senator from California that I listened with a great deal of interest and pleasure and with sadness as well to remarks submitted to the Senate by him this morning. I have never even in thought attributed to any action of the Senator from California the notion of extravagance or improper motive, either as to political conviction or as to public expenditure. I know no man in this body who has been a Member of it during the short period of my service for whose convictions, candor, uprightness of purpose, and spotless integrity I have a greater regard.

It was with infinite sadness, Mr. President, that I heard the announcement by the Senator that he did not intend to seek a return to this body. When he leaves the Senate of the United States his retirement will be a distinct loss not only to this body but to the United States of America. He has been an agency here for good, for uprightness of purpose, for riveting attention upon those sinister and fundamental social and political conditions which, if not corrected, must sooner or later lead to national disaster. He has done his work here and done it well, and the people, when he retires, will follow him in his retirement with their constant and never-failing gratitude.

So, Mr. President, I could not under any circumstances have taken even seeming exception to anything which the Senator from California said this morning nor do I take very serious exception to those criticisms which the Senator from Nebraska has just submitted for our consideration.

I regret extremely that he should feel so sensitive upon this subject and the more so that in the proceedings of yesterday I seem to have lowered myself somewhat in his personal estimation. But I regard what I did as entirely fair, as entirely legitimate, and as entirely appropriate under the circumstances. Nothing which the Senator has so far said convinces me even in the slightest degree to the contrary. Hence while regretting that the Senator has taken the subject so seriously I see nothing that occurred which needs further comment or elaboration.

The PRESIDING OFFICER. The next amendment of the committee will be stated.

The SECRETARY. On page 24, after line 5, insert:

Sabine-Neches Canal, Tex.: Continuing improvement, $70,000: *Provided*, That so much of this amount as may be necessary may be expended for making a cut-off at Smiths Bluff, on Neches River.

Mr. KENYON. I think that amendment was given no consideration by the committee and before voting on it I should like to know what the circumstances are in regard to it.

Mr. CLARKE of Arkansas. The Senator from Texas is not in his seat at this moment, but I call the attention of the Senator from Iowa to the fact that we agreed to take up the East River item at this time. I ask that the amendment just read be passed over and that we proceed to the consideration of the amendment to strike out, which appears on the top of page 6 of the bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none and the item will be passed over. The amendment at the top of page 6 will be stated.

The SECRETARY. At the top of page 6 strike out from line 1 to line 15 in the following words:

East River, N. Y.: For improvement with a view to providing a channel 35 feet deep from deep water in New York Harbor to the Brooklyn Navy Yard in accordance with so much of the report published in House Document No. 188, Sixty-third Congress, first session, as applies to the channel west of the navy yard, $200,000: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials and work as may be necessary to prosecute the said project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $500,000, exclusive of the amount herein and heretofore appropriated: *Provided further*, That nothing herein contained shall be construed as adopting the said project beyond the work to the extent and in the manner specified.

Mr. FLETCHER. Mr. President, not for the purpose of discussing this amendment, but just at this point I should like to take a few minutes to present to the Senate the matters which have already been passed which affect particularly those items relative to Florida mentioned in the bill. The Senator from Iowa [Mr. KENYON] challenged some explanation regarding certain of those items, and the Senator from Nebraska [Mr. NORRIS] indicated this morning that no explanations were forthcoming and there had been no presentation of the reasons justifying some of the improvements which have been objected to. For that reason I should like to have the indulgence of the Senate for a very few minutes in order to place in the RECORD the facts regarding the few projects located in Florida that were mentioned by the Senator from Iowa as not being satisfactory to him.

One of those projects was the Choctawhatchee River. The facts regarding that river are that it is in length about 200 miles. The section now under improvement extends from Newton, Ala., downstream 140 miles to the mouth. It is quite a considerable river. The pending bill provides for the maintenance of a navigable channel at low water from the mouth to Newton, Ala., including Cypress Top Outlet.

The river and harbor act of July 5, 1884, provided for the project. There was another act, the act of June 13, 1902, which added the improvement of Cypress Top Outlet, one of the mouths of the stream, but no provision was made for maintenance in either of these acts.

The present appropriation provided in this bill is to cover the operations for the next year, and the work will consist of maintenance by dredging and snagging and some construction work and making surveys where necessary.

"The funds now available," the report of the committee shows, and that is based on the report of the Chief of Engineers

of 1915, "will be expended by March 31, 1916." It is proposed to expend the funds requested for maintenance work as follows: Operating snag boats for one year, $30,000.

The original project has been completed. The river is in good condition, the reports show, from the mouth 27½ miles to the mouth of Holmes River, and from that point to Geneva, 96 miles above the mouth, the worst obstructions have been removed, but the river is yet in a bad condition.

The effect of the improvement on freight rates was beneficial as long as the improvement was maintained in good condition. At present, in connection with the Holmes River, it affords transportation to a large section of Florida that is without other means. Its restoration to a good condition will probably result in lowering the freight rates by rail to Geneva.

There has been, as the Senator from Iowa, I think, mentioned, some decrease of commerce in the last year, but the report shows that the reason for that was the temporary cessation of naval stores and the lumber industry. It may be stated that the effect of the European war was decidedly injurious to the naval stores and lumber industries, especially naval stores. Nearly two-thirds, perhaps four-fifths, of the naval stores were disposed of in foreign countries. Germany was a large buyer, and other countries involved in the war afforded a demand for naval stores. That industry, of course, suffered in consequence of the discontinuance of transportation and the loss of shipping facilities as well as the market. It is gradually coming back. The demand has increased and the price of naval stores has gone to a point where operators are able to continue the industry. All that commerce will come back to the river.

At present the commerce consists principally of naval stores, general merchandise, cotton, fertilizers, provisions, and hardware, and it amounted in 1912 in value to $1,732,000.

I submit, Mr. President, that heretofore no provision having been made for maintenance in the prosecution of the improvement the estimate of $30,000 for maintenance and for work on this river, as indicated in the report, for a distance of 140 miles is not an excessive amount to expend. It is a stream that, as the report shows, affords the transportation means of getting to markets for a large section of the State which has no railroad lines or any other means of transportation.

It will be noted that there is no large sum to be expended here in further improvement on the river. This is an estimate for maintenance work. This would put it in a condition where it can be of additional use and benefit, especially that portion of the river which has been neglected, because the other bills have carried no appropriation for maintenance in the past.

The Withlacoochee River is mentioned on page 170 of the committee report. The project there is about 85 per cent completed. The item in the bill is for maintenance, not for any additional work nor any new work nor any further improvement. It is for the operation of the dredge *Sarasota*, "for maintenance, $5,000." There is a river on which private individuals, the Dunnellon Phosphate Co., spent $200,000 of its own money. The incomplete improvement of the upper river from Port Inglis north does not affect commerce to any great advantage, because it is incomplete. but on the river from Dunnellon to the Gulf phosphate has moved in enormous quantities in the past, and that has been one of the chief articles of commerce. That portion of the river is the portion upon which private enterprise spent $200,000, and the report states to what extent the improvement from Port Inglis to the Gulf, partly by Federal and partly by private funds, reduced freight rates. Port Inglis is between Dunnellon and the Gulf, just within the river entrance. The report says:

> The improvement from Port Inglis to the Gulf, partly by Federal and partly by private funds, reduced freight rates on phosphate from this territory fully 50 per cent and has opened an outlet for a large tonnage in this commodity.

Mr. NORRIS. What is the name of the private company that spent $200,000?

Mr. FLETCHER. The Dunnellon Phosphate Co.

Mr. NORRIS. What is their business?

Mr. FLETCHER. The mining and shipping of phosphate.

Mr. NORRIS. They are shipping phosphate out?

Mr. FLETCHER. Out of this river. Of course there are other articles of commerce moving on the river.

Mr. NORRIS. What other commerce is there on that river?

Mr. FLETCHER. The water-borne commerce on the river amounted in 1914 to 95,778 tons, valued at $832,045, of which amount 3,700 tons, chiefly citrus fruits and cypress blocks, were carried on the river, and the remainder, consisting of fish and oysters, groceries, iron pyrites, lumber, and phosphate rock, was handled between Port Inglis and the mouth.

Mr. NORRIS. Where is that phosphate rock shipped to?

Mr. FLETCHER. The phosphate rock has been shipped to foreign markets; largely to Germany.

Mr. NORRIS. Must it be reloaded after it is shipped?

Mr. FLETCHER. No; the depth of water is sufficient at Port Inglis to accommodate the vessels which load there and take the phosphate abroad.

Mr. NORRIS. Do the people who have paid this money own the territory where the phosphate rock is located?

Mr. FLETCHER. They own the mines and the land upon which the rock is mined, I take it.

Mr. NORRIS. I suppose their expenditure was made because in their judgment it was a good business proposition and would be of financial assistance to them?

Mr. FLETCHER. Undoubtedly it did help them, but the report says—and this is the fact about it:

> This work, while primarily for the benefit of the company, to enable it to ship the product of its mines, was also of general benefit to navigation, and the channel dug now forms part of the adopted project.

Mr. NORRIS. What are the facts in relation to towns located along the navigable portion of the river? For instance, is there any passenger traffic?

Mr. FLETCHER. I take it that that is rather limited. There is not a great deal of passenger traffic.

Mr. NORRIS. Is it in the northern part of the State?

Mr. FLETCHER. No; it is in the peninsular portion of the State, on the western side. Port Inglis is at the mouth of the river, which flows into the Gulf of Mexico.

Mr. NORRIS. Is the country pretty well settled up and developed along there?

Mr. FLETCHER. The river extends quite a considerable distance farther into the interior. It reaches from large lakes, which are near the center of the peninsular portion of the State. That portion of it has not been improved which extends above Dunnellon. Its total length is about 120 miles.

Mr. NORRIS. Are there railroads on the stream or in any reasonable proximity to it?

Mr. FLETCHER. There are railroads crossing the river, but none leading down to the Gulf along or near the river.

Mr. NORRIS. Where is the outlet of the river? It flows into the Gulf?

Mr. FLETCHER. It flows into the Gulf of Mexico, running from the center of the peninsular portion of the State southwestward to the Gulf.

Mr. NORRIS. How many miles long is the navigable part?

Mr. FLETCHER. Twenty-four and one-half miles. Dunnellon is 24½ miles from the mouth of the river. This principal improvement is in that stretch of the river. The section on which the work has been done mainly is a little over 4 miles in length at the entrance to the river.

Mr. NORRIS. What is the depth of the water? What kind of boats can go up there?

Mr. FLETCHER. It is a channel of 10 feet at low water in depth and 100 feet wide.

Mr. NORRIS. Do boats drawing only 10 feet cross the ocean.

Mr. FLETCHER. Oh, no; the rock is transferred to ships crossing the ocean.

The Senator made the point, I believe, that there has been a falling off of commerce. That is true for the reason that there has been no movement of phosphate on account of the European war. Phosphate was largely shipped to Germany, and we brought back potash. That was largely the market for this hard rock phosphate.

Mr. NORRIS. As a matter of fact, it was shipped over in that form to a great extent and shipped back in the manufactured form, was it not?

Mr. FLETCHER. I am not so sure. It came back probably to some extent in manufactured form. We usually brought back German potash. Phosphate, potash, and nitrogen are the three necessary elements for plant food. Florida furnishes about 70 per cent of all the phosphate mined in this country, and the domestic market is oversupplied. Foreign countries heretofore took the larger portion of our output.

Mr. NORRIS. In regard to the decline of traffic, I have not looked at this river particularly; but from the examination I have made on a large number of them there has been a decline for a good many years in traffic. How was the traffic on that river prior to the war? Was it increasing or decreasing?

Mr. FLETCHER. It was increasing. The report shows the value of commerce in 1912 was $1,394,742; in 1913, $1,516,482. Then came the war, and the phosphate shipments were practically discontinued. The commerce fell off to such an extent that in 1914 it was $832,045.

This item is only $5,000, and it is for maintenance, to maintain that waterway, and it is a very important waterway. The

business of that industry alone would be almost destroyed if they were not able to use this waterway.

Mr. NORRIS. In what does the maintenance consist mostly? What is the work?

Mr. FLETCHER. The operation of the dredge *Sarasota.*

Mr. NORRIS. They have to dredge it somewhat in some places?

Mr. FLETCHER. That is all that is done—to dredge it.

The Senator from Iowa, I believe, mentioned the Anclote River, Fla. I will say in reference to that item that the only provision in the bill is for "maintenance, to operate the dredge *Sarasota* two months, $3,000." The effect of the improvement, as stated in the report, has resulted in making Tarpon Springs the headquarters for the sponging fleet on the west coast, and the most important sponge market in the United States. Freight rates have been reduced approximately 20 per cent by reason of that improvement. The commercial statistics show that the water-borne commerce for the calendar year 1914 amounted to 14,095 tons, valued at $1,551,250, consisting of fertilizers, fish, oysters, logs, lumber, ship chandlery, and general merchandise.

At times there may be some falling off of shipments on these rivers in the way of logs or lumber or phosphate or naval stores, or products of that kind, which move to foreign markets largely. When the foreign market is cut off, necessarily the commerce decreases for the time, but the products are there, and the commerce is bound to increase in the future rather than decrease as soon as normal conditions are reached.

The only item in this case, as I said, is a small provision for the maintenance of that channel.

I will not take further time in discussing that item. It seems to me the objection can not reasonably be urged to the maintenance of these improvements, which have been adopted by Congress, and where the work has been in many instances completed or largely completed. It is simply a question of preserving what has been accomplished by former appropriations.

Some reference was made to the Oklawaha River.

Mr. SMOOT. Before the Senator leaves Anclote River I wish to call his attention to the fact that July 1, 1915, there was an unexpended balance of $5,000. Can the Senator tell us why that appropriation has not been expended? In the appropriation act for the fiscal year ending June 30, 1915, there was appropriated for this river for maintenance $5,073.50, and we find on July 1, 1915, an unexpended balance of $5,000. The department recommends $3,000 for the river for 1917 for maintenance.

Mr. FLETCHER. Yes. The funds "now available"—that is, when the report was made in 1915—the department holds will be sufficient for necessary maintenance work during the fiscal year ending June 30, 1916. The additional funds asked for are to maintain the improvements during the fiscal year ending June 30, 1917.

Mr. SMOOT. That is the $3,000?

Mr. FLETCHER. That is the $3,000.

Mr. SMOOT. But what did they do for the fiscal year 1916?

Mr. FLETCHER. This report was made up to June 30, 1915. From then until now that $5,000 has been consumed in maintenance work, and there is further need of this $3,000 to carry the maintenance until 1917.

Mr. SMOOT. I see that the traffic on the river, if it may be called traffic, has decreased from 1912. In that year there were transported 35,100 tons, and in 1914 it had fallen off until there were 14,095 tons. I ask the Senator if that is going to continue to decrease, and is it on account of any lack of appropriation that it is so decreasing?

Mr. FLETCHER. It has decreased because of the inability to move lumber in the quantities in which we were able to move it previously, shipping conditions having been such that it has been impossible to get the lumber shipped.

Mr. SMOOT. Is phosphate rock a part of the shipments made upon the river?

Mr. FLETCHER. Not upon this river. There were no phosphates carried on this river. The commerce consists of fertilizer, fish and oysters, logs and lumber, ship chandlery, and general merchandise. There is no phosphate moved on this river.

Mr. SMOOT. I see the report claims that the decrease over the tonnage of 1913 is due to the falling off of the shipments of logs and lumber.

Mr. FLETCHER. Of logs and lumber. That is because the lumber shippers can not put the lumber into the market without paying such enormous freight rates that they are practically prohibitory at present. That condition, however, we expect will not obtain for many more months or years. The lumber is there; there will be a demand for it; it can be moved and will be moved on this river. It is partially because of the falling off of the shipments; but the value of the commerce for 1914, the Senator will observe, was greater than in 1912, although the tonnage seems to have been less. The value was $1,051,250 for 1914. As I say, the item is simply to provide for the maintenance for the coming year, until June, 1917.

Mr. SMOOT. Is there not fall enough in the river, so that they could float those logs instead of transporting them on barges?

Mr. FLETCHER. There is no difficulty about floating the logs, I take it.

Mr. SMOOT. That is the most of the tonnage, I should judge from this report.

Mr. FLETCHER. Yes; but the amount of logs and lumber depends on getting them beyond the point where the river reaches; and from that point the rates are so high that that movement for the present has been discontinued very largely. I do not think it has been entirely discontinued.

Mr. KENYON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Iowa?

Mr. FLETCHER. I do.

Mr. KENYON. Of the tonnage cited by the Senator from Utah [Mr. SMOOT] logs seem to constitute 10,500 tons and pine lumber 1,125 tons out of the 14,095 short tons. I note in the Engineer's report that they say:

> Number of regular steamers in the trade, one launch.

I will ask the Senator if it is correct that there are no steamers there but one launch?

Mr. FLETCHER. Of course, I am not prepared to say with reference to that. I should be controlled by the Engineer's report as to the number of steamers; but the commerce on the river is not passenger business at all. There is no need of steamers. Barges and other boats can take care of the commerce without steamers.

Mr. KENYON. I suppose the lumber floats in rafts, does it not?

Mr. FLETCHER. The logs float in rafts and the lumber is transported in barges usually, though it may move some distance in rafts under some conditions.

Mr. KENYON. There seem to be no barges at all, according to the engineers' report, but there are some rafts.

Mr. FLETCHER. It is probable that, for comparatively short distances, they can float lumber also in rafts. I am not sure whether or not it moves in that way, but ordinarily I should say it is moved on barges. The logs, of course, are rafted.

Mr. KENYON. Mr. President, on page 2474 of the Army Engineer's report, volume 2, it is stated that the average distance carried of the different kinds of freight traffic set forth is eighty-five one-hundredths of a mile, as to fertilizer and as to general merchandise. Then, as to the other articles, there is the figure "1," which refers to the bottom of the page, and is marked "local." What does that mean; that the transportation is merely local?

Mr. FLETCHER. That it is to and from points on the river. The total length of the river is 20 miles.

Mr. KENYON. Not this project. It is about 3½ miles.

Mr. FLETCHER. This improvement covers a distance of 3½ miles, but the river is about 20 miles in length.

> This river rises in the western part of Florida and flows northwestwardly, emptying into the Gulf of Mexico about 38 miles north of the entrance to Tampa Bay. Its total length is about 20 miles. The section under improvement extends from the mouth to the county bridge at Tarpon Springs, a distance of 3.6 miles.

It is quite a considerable river, and there is a good deal of local business on it.

Now, as to the Oklawaha River:

> The section under improvement extends from the mouth to Leesburg, at the head of Lake Griffin, a distance of 94 miles.
>
> * * * * * * *
>
> The project is believed to be about 70 per cent completed.
>
> * * * * * * *
>
> Available funds will probably be exhausted before March 1, 1916. To keep the river open annual maintenance work is necessary, and for this purpose the following estimate is submitted.

Then follows an estimate for dredging, and so forth, a total of $10,000.

> The tonnage shows an increase over last year, due to the resumption of logging.
>
> * * * * * * *
>
> The water-borne commerce on the river for the calendar year 1914 amounted to 34,430 tons, valued at $248,991, consisting of citrus fruits, hay and grain, logs, naval stores, vegetables, and general merchandise.

There has been considerable local cooperation, as shown by the fact that—

> The city of Leesburg has dug a canal 2,500 feet long, 100 feet wide, and 5 feet deep from Lake Griffin to a point within easy reach of the business portion of the city, and a similar canal 2,200 feet long, 100

feet wide, and 6 feet deep from Lake Harris, with the object of enabling boats to land near the mercantile and shipping section.

This waterway connects St. Johns River with these important lakes and the interior of the peninsula portion of Florida. It is a river that ought to be improved very much more extensively than is contemplated in this report. I will not go into that now, but the proposal here is to keep the river open, and for its maintenance, at a cost of $10,000 for the year. It is a river 94 miles long and a very important waterway. I can not see, Mr. President, that there can be any reasonable objection to an expenditure of a small sum like that on a waterway of that kind.

I should like to have inserted in the RECORD that portion of the report which deals with the Oklawaha River.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

OKLAWAHA RIVER, FLA.

[Eng. Rept., 1915, p. 643; H. Doc. 514, 63d Cong.]

Location: This river has its source in the central part of Florida and flows in a general northerly direction, then eastwardly, emptying into the St. Johns River 22 miles above Palatka. Its length from the mouth to Lake Griffin is 86 miles. The extreme head of the system may be taken as Lake Apopka, 120 miles above the mouth of the river. The section under improvement extends from the mouth to Leesburg, at the head of Lake Griffin, a distance of 94 miles.

Present project: The improvement under the present project was inaugurated by Congress in the river and harbor act of September 19, 1890. It provided for clearing the channel from Lake Griffin to the mouth by removing snags, overhanging trees, and floating obstructions, with a view to obtaining a navigable depth of about 4 feet at low stages. The cost of the proposed work was estimated in 1892 at $26,000, with $1,000 annually for maintenance. The project was modified by Congress in the river and harbor act of March 2, 1907, to provide for removing obstructions and deepening the channel to 6 feet at mean low water from the mouth to and including Silver Springs Run, a distance of 62 miles, at an estimated additional cost of $15,000, and $600 annually for maintenance. By the river and harbor acts of June 25, 1910, and July 25, 1912, the project was further modified to provide for the maintenance of the levels in the lakes at the head of the river.

Condition at the end of fiscal year: The project is believed to be about 70 per cent completed. There is now a fairly well cleared channel approximately 6 feet deep for the first 32 miles above the mouth and a practicable channel from 5 to 5½ feet deep to the head of Silver Springs Run. The channel between Silver Springs Run and Leesburg has shoaled and become obstructed with water plants, and not more than 2 to 2½ feet can be carried over this part of the river. The total expenditure under the present project to June 30, 1915, has been $74,157.24, of which $33,531.32 was for original work and $40,625.92 was for maintenance

Local cooperation: None is required by the appropriation acts. The city of Leesburg has dug a canal 2,500 feet long, 100 feet wide, and 5 feet deep from Lake Griffin to a point within easy reach of the business portion of the city, and a similar canal 2,200 feet long, 100 feet wide, and 6 feet deep from Lake Harris, with the object of enabling boats to land near the mercantile and shipping section. Lake Dora has been connected with Lake Eustis by a canal 1¼ miles long, 25 feet wide, and 3 feet deep, dug by private enterprise at a cost of about $15,000. This canal enables small boats to pass from Lake Eustis to Lake Dora. In 1911 the owners of a basin of muck land along the river between Heather Island (60 miles above the mouth) and Moss Bluff (72 miles above the mouth) dug a channel 4.6 miles long and about 6 feet deep and 26 feet wide near the higher land on the east side of the basin and diverted the river into the new channel, cutting off about 6½ miles of the old river. The work was done with the object of facilitating the drainage of the basin, but incidentally it has proved, on the whole, of benefit to navigation.

Effect of improvement: No effect on freight rates has been observed.

Proposed operations: Available funds will probably be exhausted before March 1, 1916. To keep the river open annual maintenance work is necessary, and for this purpose the following estimate is submitted:

Dredging in continuation of improvement and for maintenance, with hired plant, 3 months, at $2,250	$6,750
Operation of snagging party, 4 months, at $750	3,000
Contingencies	250
	10,000

Commercial statistics: The water-borne commerce on the river for the calendar year 1914 amounted to 34,430 tons, valued at $248,991, consisting of citrous fruits, hay and grain, logs, naval stores, vegetables, and general merchandise. The tonnage shows an increase over last year, due to the resumption of logging, which under present conditions forms the bulk of the tonnage.

Comparative statement.

Year.	Tons.	Value.
1912	102,206	$1,055,464
1913	14,622	546,045
1914	34,420	248,991

Financial summary.

Amount expended on all projects to June 30, 1915:	
New work	$37,443.27
Maintenance	40,625.92
Total	78,069.19
July 1, 1915, balance unexpended	4,552.76
Amount recommended by department for maintenance for 1917	10,000.00

Mr. FLETCHER. Mr. President, I believe that covers the items which have been mentioned with reference to Florida; and I do not care to take up the time of the Senate in any general discussion of this bill. The bill has one fault, and only one, in my judgment, and that is that it is confined to projects which are already under way and does not take care of projects that have passed examination by the engineers and have the indorsement and approval of the Board of Engineers for Rivers and Harbors, the Chief of Engineers, and the Secretary of War, as reported to Congress.

We can not continue very much longer, Mr. President, with merely taking care of old projects which Congress has approved years ago, which are partially completed and already under construction. We must provide for those projects which have been approved by the district engineer, approved by the Board of Engineers, approved by the Chief of Engineers, and reported to Congress favorably by the Secretary of War as being worthy of improvement after all the study and investigation which these responsible officials have given the subject.

We have no business to talk about spending money for preparedness or any other purpose if we must neglect internal improvements, the duty of taking care of which rests upon Congress. These are navigable streams. No individual can exercise any control of them or can undertake even to improve one of them without first getting the permission of the Board of Engineers. No individual can go into a harbor on the coast anywhere and spend his money to deepen that harbor without asking permission of the Government, through the War Department, to do so. He can not expend his own money to deepen and widen a river without asking permission to do it. Congress has jurisdiction over these navigable waterways, and it is incumbent upon Congress to take care of the waterways just as well as to take care of the harbors of the country; and we are neglecting our duty, we are shirking our responsibility, we are short-sighted, and guilty of inexcusable neglect of the public interest, in my judgment, when we fail to go on with the care, maintenance, and improvements of the highways of commerce—the rivers and the harbors of this country—which have been recommended for improvement because of their commercial justification and because of the merit in them by the boards charged with the duty of examining and studying and reporting upon them.

It has been mentioned here that there is a sentiment against the present system inaugurated for the improvement of the waterways, the rivers and harbors of this country. If so it is created by the cry of "pork barrel," and that sort of thing, for purposes which I do not care to characterize, but not in all instances in good faith, in my judgment. That sentiment has been manufactured; it has been created; it is not the judgment of the people of this country that we ought to neglect these waterways or fail to take care of them or to make the improvements for which the Federal Government is responsible. There is no better system, it seems to me, which can be devised than the present system.

A survey, when ordered by Congress, is referred to the district engineer. He is a responsible official; he is under nobody's control or influence; he is not elected in any district or by the people of any State; he is in office during good behavior; he is trained; he knows his business; he feels his responsibility; he is faithful to his trust; and he makes the examination and reports that the project is worthy of improvement or that it is not worthy of improvement; that its cost will be so much, and that Congress would not be justified in appropriating that amount of money for that improvement, or, otherwise, that Congress would be justified. That report comes to another responsible body, the Board of Engineers for Rivers and Harbors. The members of that board are not dependent on any county, State, or community for their positions. They are entirely independent, faithful, competent, honorable men of the highest integrity and of the very best capacity. Those men consider these reports, and, if that is desired, hearings are had before this board, and the Board of Engineers passes on the subject. Then the Board of Engineers reports to the Chief of Engineers, and the Chief of Engineers reports to the Secretary of War, and the Secretary of War to Congress. I can conceive of no safer or better way of safeguarding the public expenditures and of conducting these great public enterprises than the present plan provides, and I think all this talk about "pork barrel" and about favoritism and about influence, local or otherwise, is uncalled for, unwarranted, and that any sort of criticism that suggests nothing better is simply destructive criticism and gets nowhere. No plan has been proposed to change that system which in any way commends itself to Congress.

The proposal of the Senator from Iowa [Mr. KENYON] to make a lump-sum appropriation as a substitute for this bill is, in my

judgment, unsound. So far as I am concerned, I would rather see the bill go down in defeat than to see that amendment adopted. If Senators want to take the responsibility of stopping the improvement of the public waterways of the country, those which are under the jurisdiction of Congress because of their navigability, if Senators want to take the responsibility of saying "we will not spend another dollar on the rivers and harbors of the country," let them take it; and they would take that responsibility in effect if they should appropriate a lump sum in this bill, as they have done in the last two bills, because it would mean an absolute abandonment of the present system and plan of carrying on these improvements. It would mean that Congress was unwilling to be guided by the judgment and the opinion of the experts who are qualified to pass on these questions; that Congress discredits the reports made to it by the Chief of Engineers, by the Board of Engineers, and by the district engineers as to the merits of the various projects which have been undertaken in the past and which have already been reported for action to Congress. It would mean to say that we have no faith in the worthiness or the merit of any project now under way or heretofore reported on. I do not propose to put myself in that attitude under any consideration, because it would not only be contrary to my judgment and convictions, but it would be absolutely absurd, without any justification whatever, and unwise from the standpoint of the public interest.

So, Mr. President, I say that this bill ought to be passed as reported by the committee, and that, if it can not be passed in that form, I would rather have it defeated than to have the substitute proposed by the Senator from Iowa adopted. We have done that thing for the last two years. The last two river and harbor bills have provided lump-sum appropriations. If we did that thing again, it would mean clearly that that was the policy intended to be pursued by Congress; it would mean the tearing down and destruction of what Congress has heretofore done, a complete reversal of its position on this important question; and the consequence would be that when the time came again for taking care of the rivers and harbors there would be no appropriation at all provided. It would mean a complete abandonment of these great public works.

Mr. O'GORMAN obtained the floor.

Mr. WADSWORTH. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to his colleague?

Mr. O'GORMAN. I yield.

Mr. WADSWORTH. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from New York suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gronna	Martine, N. J.	Smith, Ariz.
Bankhead	Hardwick	Myers	Smith, Mich.
Borah	Hitchcock	Nelson	Smoot
Brandegee	Hollis	Newlands	Sterling
Broussard	Hughes	Norris	Stone
Chamberlain	Husting	O'Gorman	Thomas
Clapp	Johnson, S. Dak.	Oliver	Tillman
Clark, Wyo.	Jones	Page	Vardaman
Clarke, Ark.	Kenyon	Pittman	Wadsworth
Curtis	La Follette	Poindexter	Warren
Dillingham	Lane	Ransdell	Williams
Fall	Lea, Tenn.	Shafroth	Works
Fletcher	Lewis	Sheppard	
Gallinger	Lippitt	Sherman	
Gore	Lodge	Simmons	

Mr. SMITH of Michigan. I desire again to announce the unavoidable absence of my colleague [Mr. TOWNSEND] on account of sickness in his family. I desire also to state that he is paired with the junior Senator from Florida [Mr. BRYAN]. I wish this announcement to stand for the day.

The PRESIDING OFFICER. Fifty-seven Senators having answered to their names, a quorum is present.

Mr. O'GORMAN. Mr. President, on page 6 of the bill before the Senate is an amendment proposed by the Senate Commerce Committee, striking out what I regard as perhaps the most important provision in the entire bill. The expense involved can not be the excuse for this action by the committee, because it provides for an appropriation of only $200,000, while making an authorization for $500,000. It contemplates an improvement regarded by the President and the Navy Department as absolutely imperative. It relates to one of the most important rivers of the country. It is not one of the streams that have figured frequently, and doubtless figure now in this bill, which in the dry season practically dry up and are incapable of navigation, and never will be fit for navigation, notwithstanding the vast sums of money taken out of the Public Treasury to waste upon those improvements.

In 1914 the commerce on the East River amounted to 46,000,000 short tons, valued at $1,500,000,000. It carried more than 22,000,000 passengers. Yet this committee, for some reason—perhaps not stated before the Senate—has seen fit to strike out this proposed appropriation, which was incorporated in the House bill after careful consideration of its merits and in response to a personal appeal by the President of the United States and the Secretary of the Navy. The immediate appropriation is $200,000 with an authorization for $500,000 more.

In the East River, which runs for a length of 16 miles north of New York Harbor, there are only two points where the depth is less than 35 feet. Diamond Reef is one of those points, in close proximity to the most important navy yard in the United States—the Brooklyn Navy Yard. They are now launching dreadnoughts from time to time with a draft of 30 to 31 feet, while the depth of water over this reef is but 26 feet. In order to avoid this menace to safe navigation, our great battleships can enter the navy yard only once a day, and at high tide. Not only can it be said in favor of the proposition that it is a commercial necessity, but from the standpoint of preparedness it is indispensable; and yet, if the Senate is to act with the committee, notwithstanding all these urgent reasons, this absolutely essential improvement is going to be eliminated.

A great deal can be said, I think, in criticism of the judgment of the Senate with respect to this provision. I am reluctant at this time to say more than that this is a just provision, it is a necessary provision, and in some respects it is vital in any broad scheme of national preparedness. I should prefer to withhold further comment until the Senate may be advised as to the reasons that animated the committee in taking this action. I should be very glad to hear from the distinguished chairman of the committee what reasons led him and his distinguished associates to take this most extraordinary action.

I pause for the information, if the Senator is disposed to give it.

Mr. CLARKE of Arkansas. Mr. President, it is my purpose to make a few remarks about the action of the committee on this particular item at some appropriate time before it is submitted to a vote, but I would not care to intrude upon the Senator while he is speaking.

Mr. O'GORMAN. It will not be an intrusion. I shall yield the floor now to the chairman of the committee, reserving the privilege of asking the attention of the Senate at another time.

Mr. CLARKE of Arkansas. The junior Senator from New York [Mr. WADSWORTH], I understand, desires to address the Senate, and I thought it was due him to afford him that opportunity now, if he cares to exercise it. If not, I have no objection to presenting the reasons that actuated the committee.

I think there is some force in what the senior Senator from New York has said. The improvement of New York Harbor is a matter always of vital concern in the development of the water transportation facilities of this country. The fact is New York is a favorite of national action, and ought to be. It is the very heart of the commerce and life of the Republic; and there is nothing that is proper and fairly within the means of the National Government that ought not to be done at that point, because it not only contributes to national pride but it promotes the national interest. The committee was not actuated by any spirit of hostility to New York nor to this particular enterprise.

In the first place, the committee found that the engineers were not agreed as to the proper channel to improve at that point. It seems that two investigations were made for the purpose of determining the most eligible point at which a deeper channel could be provided to the Brooklyn Navy Yard. One of the examinations and surveys was made under the direction of Col. Black, now the Chief of Engineers; another by Col. Roessler, a very eminent officer in the Engineer Corps. They reached different conclusions. Col. Roessler reported in favor of what is known as the Buttermilk Channel, and his report passed through the several stages necessary to make it an approved project, and the Board of Engineers decided that that particular channel should be improved in preference to this one. Subsequently Col. Black's report was submitted, providing for the channel mentioned in this particular bill.

The report submitted by Col. Black was for a more comprehensive project, known as Document No. 188, Sixty-third Congress, first session, and providing for the channel through the East River just as is described in the bill which the Commerce Committee has recommended for rejection. That particular part of the work is only a single unit in the larger program, and the program itself will be a failure if the several units that constitute it are not brought into harmony; the main fea-

ture being that a depth of 35 feet should be furnished for all the shipping facilities that are grouped at that point. The project of which the pending amendment is a part, and which received the second approval of the Board of Engineers, calls for an expenditure of $29,659,561. The project itself consists of five or six different units, the one under consideration now being only one of these.

I should say that it would not tend to a proper development of the shipping facilities at that point to improve one of the reaches of the harbor upon a basis of 35 feet without providing a similar depth for all of those that are associated in the shipping activities that concentrate there.

Leaving out any question, therefore, of a choice between these particular routes, it became a matter of importance to the committee to take time to determine whether or not the present necessity of providing for this particular item was of sufficient importance to practically commit the Government to the expenditure of the remaining $29,000,000. The Buttermilk Channel contemplates no such expensive outlay, and if the purpose be simply to provide for a 35-foot depth to the navy yard it can be much more readily and cheaply accomplished by improving that particular channel.

That is, in a way, the right of subsequent investigation that the committee saw proper to reserve to itself so far as the merits of the project itself are concerned. Then there entered into its consideration a matter of policy. It was given out authoritatively that this bill was to contain no new projects. That matter was submitted to the House of Representatives, and by a yea-and-nay vote that policy was declared to be the one that should govern in the preparation of this bill. An exception was made in favor of this particular item because of the insistence of the President, in a letter addressed to some one officially connected with the matter, wherein he based his recommendation upon the necessities that grow out of the military situation. He associated it with the so-called preparedness program. It was not insisted upon as a matter that would immediately promote the commercial interests of that particular port.

The committee felt that as long as they were confronted by that policy of a coordinate branch of the legislative part of our Government, it was well for us to determine whether or not the Senate would also take that view of it. We added 15 or 20 amendments. Some of them we deemed to be quite as meritorious as this particular item. We felt that we ought to enter the conference which will take place in the event the two Houses disagree on that policy upon a footing of absolute equality, and have an opportunity to compare the merits of this particular project with those that were inserted in the Senate bill. If we were confronted by a cast-iron instruction that would withdraw from the House conferees the right to consider any proposition simply because it was new, overlooking its merits entirely, then it would be a matter for further consideration to determine whether or not, if the policy was to be carried out at all, it was to be carried out in its entirety. We thought, too, that we might present the merits of the so-called Buttermilk Channel—a project that will cost very much less, and will accomplish much more readily and immediately the purposes that are in view.

It has been said that we struck out the item for trading purposes. Well, every one selects his own terms in which to express his own ideas. In a way, that element might be said to enter into it; but we can justify our action by a little more conservative and justifiable statement than that. We felt that we were entitled to put it upon the Democratic footing of "special privileges to none and equal rights to all"; that if the projects added by the Senate were to be subjected to scrutiny it was nothing more than right that this particular project, which stood upon identically the same claim of merit, should be considered surrounded by the same circumstances and conditions. In that sense it was a trade, but the trade did not partake of any corrupt or secret agreement. It was a public declaration of a policy to consider in cooperation with those who had a right to be consulted as to whether or not that policy should be applied at this time in its strictness and do justice to the country.

It was said that the present condition of the public revenues would not permit the Senate to exercise an absolute legislative discretion in making up this bill. In addition to the items contained in the bill, those included in the House bill as well as those added by the Senate, there are about $150,000,000 of projects that have been approved in the regular way by the Board of Engineers and forwarded to Congress for such action as it sees proper to take. So, out of that $150,000,000 of approved projects, located all over the country, the committee saw proper to select those that will cost in the aggregate about $3,000,000. For instance, a project in Connecticut appealed to us very strongly as one of necessity and of justice as well. An additional project was added for the State of New York, to join the great canal system with the rivers in connection with which the canals are intended to be operated. We thought that the harbors in California at San Diego and at Los Angeles were worthy of improvement; and we thought well of other projects that had been certified to us by the executive officers of the Government. Nearly any one of these four can be considered in connection with this particular item without suffering any on its merits; and we felt that if we were to enter a conference where those matters were to come into competition, or where principles were observed that would include one and exclude the other, we ought to enter that negotiation upon a footing of absolute equality and independence.

The action of the committee, therefore, had its justification in the fact that this was not the only project to accomplish the same purpose that was submitted to us. There was fair room for doubt as between the two; and if expense was to be considered, and this particular project alone was to be considered, the Buttermilk Channel was the better one. If, however, it was the purpose of the Congress to select the larger project, involving an expenditure of $29,000,000, and it was deemed wise to pick out one unit in that larger plan and begin work upon it at this time, then, of course, the preference would go in favor of the East River route.

That is just exactly, briefly, the reason that lay at the foundation of the committee's action. It is submitted to the Senate for what it is worth, and whatever the Senate does about it is just exactly what we want done about it. The committee had no particular preference about its action except as it represented the Senate; and it intended that its action should be submitted to the Senate frankly and openly, so that whatever action was taken would represent the policy of the Senate in this connection.

Of course, if the Senate expresses a preference for that particular item and takes away from the Senate conferees the right to insist upon a comparative consideration of the question, it carries with it a certain implication that the Senate conferees do not have behind them the sentiment of the Senate that they ought to insist upon their items as vigorously as they might if they were in a position where they could insist that the other House should accord to the Senate the right to make meritorious exceptions to the rule, just as the House had exercised its right to do.

That is all there is in it. The matter is submitted to the Senate for whatever action it may see proper to take.

Mr. NELSON. Mr. President, will the Senator from Arkansas yield to me for a minute?

Mr. CLARKE of Arkansas. I shall be glad to do so.

Mr. NELSON. Is it not a fact that for the sake of preserving two important items from the State of New York that we inserted in the bill—to wit, the Lake Champlain item and the Buffalo item—we thought it was good policy to leave the other out, so that we could perhaps secure all three?

Mr. CLARKE of Arkansas. We could at least consider all three upon a footing of equality.

Mr. NELSON. If the Senate does not sustain us on this East River item we may have to give way on the other two items in conference. We might as well talk very plainly on this subject.

Mr. CLARKE of Arkansas. Oh, I have no disposition to conceal anything.

Mr. NELSON. The bill came over from the House with the understanding that we were not to put in any new provision at all, except the one solitary item they put in. We broke over that rule and put in a few new items.

Mr. CLARKE of Arkansas. We had to do it, to do justice, as we understood our duty.

Mr. NELSON. Yes. Especially three of those items I regarded as very important. We will have to fight for those items in conference, and I hope the Senate will leave us in position to make a good fight to retain them.

Mr. CLARKE of Arkansas. I am very glad the Senator agrees with me.

Mr. O'GORMAN. Mr. President, the very illuminating remarks of the Senator from Arkansas, together with those offered by the Senator from Minnesota, almost persuade me to take the position advocated by the junior Senator from Iowa [Mr. KENYON] and the senior Senator from Colorado [Mr. THOMAS]. If a proposition on its merits is of such doubtful propriety that the members of the committee candidly avow that legislation can not be accomplished without throwing out some inducement here and there, giving every locality its price

for the support of the measure, then it is clear that the proposal is not in the public interest, and should be defeated.

Mr. CLARKE of Arkansas. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Arkansas?

Mr. O'GORMAN. I do.

Mr. CLARKE of Arkansas. Does the Senator know an item in this bill of that character which the committee has recommended for adoption?

Mr. O'GORMAN. I know what has been stated here several times by the Senator from Iowa and by the Senator from Colorado. If it be avowed, as has been stated in the last few minutes, that an appropriation is dropped out to permit the committee in conference to have a basis of negotiation and trading and conceding this or that, it leads me to the conclusion that the entire proposition can not be defended upon its merits and lends much support to the criticism of this class of legislation.

Mr. President, a moment ago when I was referring to the importance of the commerce of the East River I am not sure whether I correctly stated the amount of tonnage passing through that river; but in 1914 it amounted to 46,000,000 tons, valued at $1,500,000,000. It does seem to me, and I think it should seem to every impartial observer, that a river of national importance, carrying that amount of trade and commerce, should not be denied the comparatively small appropriation provided for in the House bill.

We are told that among other considerations that influenced the committee they were in doubt as to whether they might not be committing themselves to a twenty-million or a thirty-million project. The fact is, this immediate proposition is absolutely divorced from any project. You are not passing on any proposition other than the simple one: "Are you prepared to devote $200,000 of the public money for a vital improvement close to the greatest navy yard we have in the country? Are you going to take the counsel of your Executive and of the head of your Navy Department, both of whom state that this is absolutely essential?"

Mr. NORRIS. Mr. President, will the Senator yield?

Mr. O'GORMAN. Yes.

Mr. NORRIS. I want to say to the Senator that I am moved to ask the question I expect to propound solely with the object of bringing out the facts surrounding this proposition.

I want to ask the Senator what his judgment is in regard to what I understood the Senator from Arkansas to claim—that the expenditure of the money provided for in this item would necessarily lead to the expenditure of $29,000,000, I think it was?

Mr. O'GORMAN. No; I think the Senator from Arkansas, if he desired to be so understood, was mistaken, because the House provision expressly declares:

That nothing herein contained shall be construed as adopting the said project—

And "the said project" refers to one of those alluded to by the chairman of the committee—

beyond the work to the extent and in the manner specified.

I should like to direct the thought of the Senate to this immediate proposition. This Diamond Reef obstruction is in the direct course of navigation leading into the navy yard, and the water at that point is less than 35 feet deep. These large battleships now being built there and that have been built and that pass in and out now draw 30 and 31 feet of water; and, as has been testified by one of the admirals before the House committee, he never passes through that section of the East River without the gravest anxiety as to a possible injury to his ship for which we are expending in these days from fifteen to eighteen million dollars.

Mr. NORRIS. The question I really wanted the Senator to answer was whether or not, in his judgment, the expenditure of the money provided for in this item would, in order to make it useful, necessitate the expenditure of the additional sum mentioned by the Senator from Arkansas?

Mr. O'GORMAN. No; I do not think so. I do not think it would follow at all. My impression is that this immediate appropriation would go very far toward reducing the Diamond Reef and removing it as an obstruction.

Mr. NORRIS. What is the proposition that is going to cost $29,000,000 to which the Senator from Arkansas refers?

Mr. O'GORMAN. There are two propositions, rather comprehensive, but not necessarily affecting this immediate improvement that we are asking now. As I have said, that is apparent from the circumstance that in the House provision there is an express declaration that this appropriation is not to be regarded as an adoption of any project.

Mr. NORRIS. No; but, of course, a declaration in the law does not necessarily mean that it would not follow that such a thing might be necessary. I wanted to know what the facts were. Would this expenditure be useless if we did not go further and expend the additional money?

Mr. O'GORMAN. I think not. Indeed, I am sure it would not.

Mr. NORRIS. I should like to ask the Senator to discuss, at some time when he has the floor, the proposition—and I ask this question with the same motives—of what is known as the Buttermilk Channel, as I believe it is called.

Mr. O'GORMAN. That is one of the propositions, but that is not before this body.

Mr. NORRIS. Does this mean that that improvement would be rejected if we adopted this? Is this connected with that proposition in any way?

Mr. O'GORMAN. This does not adopt any project. It is a simple, concrete proposition. It is necessary to expend $200,000 to make a needed improvement in the East River in close proximity to the navy yard. The question is, Will the Senate of the United States refuse it—refuse it to a State that is contributing 25 per cent of every dollar paid out of the Federal Treasury for public improvements in every part of the Union? I do not think it is fair that such a disposition should be manifested.

Mr. NORRIS. Mr. President, I do not want the Senator to get the idea that I am propounding these questions in any spirit of hostility but without knowing all the facts I feel inclined to vote to retain this item in the bill, and the Senator has presented certain propositions that I think are worthy of consideration. I am trying to get information so as to vote intelligently.

Mr. O'GORMAN. The Senator referred to two propositions not before us. Both of them are found in House or Senate documents, which, of course, are accessible to any Senator who cares to read them. Mr. President, I believe on the merits that this proposition should be favored; it should have the approval of the Senate. I am not without appreciation of the other reasons offered by the chairman of the committee. He is a Senator of great experience. He knows better than a good many of us how to secure legislation. He knows the best methods to be employed, and I have no doubt from his viewpoint he is pursuing the very best course looking ultimately to the welfare of the country.

But I prefer not to be involved in those collateral considerations. I base my contention as to the propriety of this appropriation on its merits, divorced from all other propositions that came before the committee or that may come before the Senate. It is not to be supposed that this is of no more importance than the 15 or 20 other projects alluded to by the Senator from Arkansas. The President of the United States, at a time when he is endeavoring with the aid of Congress to formulate a preparedness program, advises us that he believes it essential to have this appropriation and to have this improvement. If his judgment is good in this respect I think the Senate ought to reinstate the House provision, and I think in reinstating it the plans the Senator from Arkansas has with regard to these other meritorious provisions will not necessarily suffer. With his powerful capacity for persuading, I have no doubt when he goes into a meeting with the House conferees he will be able to satisfy them that the best interests of the country will be served by yielding to every proposition he makes with respect to these public improvements.

Mr. OLIVER. Mr. President, when this bill was reported from the committee, I as a member of the committee reserved the right, while favoring the report, to vote in opposition to certain items of the bill of which I did not approve. The rejection of the East River proposition was one of the items that I had in mind. I do not think, and I so expressed it to the committee, that a matter vitally affecting the importance of the greatest harbor in the country and one of the greatest in the word should be made a trading point between the two Houses of Congress. It is no secret that this proposition on its merits met with favor on the part of a majority of the committee.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Pennsylvania yield to the Senator from Ohio?

Mr. OLIVER. I yield.

Mr. POMERENE. May I ask the Senator was there any difference of opinion as to the real merits of the proposition?

Mr. OLIVER. Not so far as I can remember. I do not remember that a single member of the committee expressed himself in opposition to this proposition.

Mr. POMERENE. May I ask a further question? Was there any different opinion expressed by any witness who came before the committee on the subject?

Mr. OLIVER. I do not think there was any hearing on this item.

Mr. CLARKE of Arkansas. There were no witnesses.

Mr. OLIVER. There was no hearing at all. The discussion was confined entirely to the members of the committee sitting in executive session. I will say, however, that in rejecting this proposition a very respectable minority of the committee voted in favor of retaining it.

For this reason, Mr. President, I feel constrained to differ from my associates on the committee, and I think that on the merits of the proposition it is undeniable that we ought to retain it and let the amendments reported by the committee which relate to new projects stand upon their own merits when the bill comes into conference.

Mr. WADSWORTH. Mr. President, while the utterances made thus far in the discussion of this item have been highly entertaining, particularly the statement of the chairman of the committee, fortified by the statement of the Senator from Minnesota with respect to at least one exceedingly important motive for the rejection of this item by the Senate Committee on Commerce, that motive has become so clear to the Senate, and it is so thoroughly understood by every Member of the body that I shall not make any further observations in connection with it. I do, however, desire to bring to the attention of the Senate some phases of this matter which I think are of importance by way of supplementing the remarks of my colleague, the senior Senator from New York.

I hope it will not be considered that the State of New York is asking for this item as a State, that the city of New York is here asking the Federal Government to expend $200,000 this year and $500,000 next year for the completion of this particular piece of work.

I need not say that the expenditure under Government contract of $700,000 and the subsequent expenditure of that sum by a contractor, in the space of two years, in the work of improving a portion of the harbor of New York is of very little importance, comparatively, to the people of that city in their capacity as citizens of that city or in their capacity as citizens of the State of New York. Neither my colleague nor myself ask this for the State of New York or for the city, but we do ask the Senate to take into consideration a condition of affairs which can not be ignored.

By an accident of geography and by the remarkable facilities afforded by nature at the mouth of the Hudson River the city of New York has become the metropolis of the United States. It has become the metropolis not only by the efforts of its inhabitants or by the efforts of the inhabitants of the State of New York, but it has become a metropolis as a result of the prosperity and the wealth and the enterprise of the entire Union, and as such it is the property of the United States. It is the pride of this country, just as Berlin is the pride of Germany, Paris of France, and London of Great Britain. Nothing that Congress can do or say can change the economic laws which make the city of New York the metropolis of the Nation and make the harbor of New York the greatest port of entry on this continent. If we place our discussion upon that plane and view the situation from that standpoint, I think we can approach it with clearer minds.

Now, it so happens that the progress of shipbuilding in recent years—particularly in the last 10 or 15 years—has resulted in this, that ships, instead of drawing 24 to 26 feet as a maximum, are now drawing 30 to 31 feet as a maximum.

That applies not only to merchant vessels, which, as my colleague has said, carry 46,000,000 tons in and out of New York every year, but also applies to battleships and armored cruisers.

Prior to this very significant increase in size and draft of ships the harbor of New York required very little improvement either at the hands of the Federal Government or of the local authorities. As a result of that situation existing prior to the increase in the size of ships, out of $850,000,000, in round figures, which has been appropriated by the Federal Government for the improvement of the rivers and harbors of the country since those appropriations were first started, just about 3 per cent of that sum has been spent in the harbor of New York.

Now, the situation has commenced to change. Ships have increased in size. Every great port in the world is being seriously affected by this change in the size of ships, and every Government in the world worthy of being called a great Government has been exceedingly industrious in recent years in improving the harbors of their great seaports. This has been done in Antwerp; it has been done in Rotterdam; it has been done on the Thames; it has been done in Liverpool. Eventually it must be done in the principal harbors of the United States; otherwise large vessels can not come to this country as they should come.

The Senator from Nebraska [Mr. NORRIS] has inquired whether or not this particular item will necessarily and inevitably lead to the expenditure of $29,000,000. The wording of the item expressly forbids any such construction being placed upon it. My colleague has read the language. The project to which he refers and to which the Senator from Arkansas [Mr. CLARKE] refers, as I understand it, is one which has been recommended a couple or three years ago by the Army engineers for a comprehensive improvement of all New York Harbor or all those portions of the harbor which need improvement in order to enable 30-foot draft vessels to reach the docks in both the North River and the East River and to reach the docks on the Jersey side at Hoboken and Jersey City. Much of the harbor, in fact a great portion of it now, will not only carry a 30-foot draft vessel but will carry a 35-foot draft vessel, and the main channel coming in from Sandy Hook through the lower bay, known as Ambrose Channel, already contains a 40-foot depth of water.

The proposal made by the engineers, and which has not yet been adopted by Congress, and which could not be adopted under the language of this item, is that an average depth in the usable waters of the harbor of 35 feet be eventually attained, at an estimated cost, as I understand it, of about $29,000,000.

The Senator from Nebraska has asked a question about the Buttermilk Channel and its relation to this particular improvement. At the risk of boring the Senate, but perhaps for the benefit of the Senator from Nebraska, I beg leave to point out on a map of the harbor the particular points of interest with respect to this bill.

Every Senator, I assume, of course, is familiar with Manhattan Island and the lower end of the island known as the Battery. To a ship coming in from the Atlantic and coming up the Ambrose Channel into the upper bay, we will say a battleship bound for the Brooklyn Navy Yard, which I have here indicated in solid blue [indicating], two entrances into the East River, which separates the borough of Brooklyn from Manhattan, are available.

The two entrances in the East River are separated from each other by Governors Island, which is here indicated in solid blue, and which is well known as an Army post and the headquarters of the Department of the East.

The channel at the south of Governors Island, separating Governors Island from the Brooklyn shore, is the Buttermilk Channel. The channel north of the island separating Governors Island from the Battery on Manhattan Island is the channel which is to be improved under this item.

The Senator from Arkansas has stated that two Army engineers have disagreed as to which of those two channels should be improved in order to allow a battleship to reach the Brooklyn Navy Yard with entire safety, and he has stated that the improvement of the channel between the Battery and Governors Island will cost a great deal more money than the improvement of the Buttermilk Channel south of the island.

However I call the attention of the Senate to the hearings held before the House committee, a copy of which I hold in my hand. On page 26 we have the testimony of Col. Black, of the Army Engineers, who says that to improve Buttermilk Channel to its full width, or to a width equal to the improvement now asked for the northern channel on the other side of Governors Island, would cost $1,950,000.

Further on in his testimony he states that the initial expenditure would not be sufficient for all time, because the bottom of that channel is composed largely of mud and clay and gravel, and consequently there will always be an annual maintenance charge to keep it clear. He states that the initial expenditure will be $1,950,000, and he estimates that the other channel, the one that is to be improved under this item, is to cost only a total of $700,000.

So I think, with all due deference to the Senator from Arkansas, he must be mistaken as to the comparative cost of the improvement of the respective channels.

Furthermore, Col. Black says in his testimony that when Diamond Reef is blasted out of the channel between Governors Island and the Battery there will be no cost of maintenance, because it is solid rock and does not fill in again by the drifting of silt. In that respect this improvement is exceptional. Once done it is permanent.

Now, what is the situation with respect to the East River? My colleague has stated the tremendous interest of the Navy Department in having this improvement made. He has not overstated that interest. Both these channels—the one north of Governors Island contemplated for improvement and Buttermilk Channel to the south of Governors Island—to-day carry about the same depth of water, from 30 to 32 feet, 32 feet being

the maximum depth at the top of the highest tide when the wind is right. With the wind blowing in a certain direction, Admiral Benson testified before the House committee, the water is backed out of both those channels, and as a result even at the highest tide there is sometimes a reduction of 2 feet in depth due to wind action alone. Sometimes that condition continues from 24 to 48 hours, and during such a condition no battleship built or launched or used by the United States during the last 8 or 10 years can reach the Brooklyn Navy Yard, and if it is in the yard at such a time it can not get out.

Mr. POMERENE. Mr. President——

Mr. WADSWORTH. I yield to the Senator from Ohio.

Mr. POMERENE. Can the Senator state how many merchant vessels now enter New York Harbor requiring a draft of 35 feet?

Mr. WADSWORTH. I can not state the total number, in response to the question of the Senator from Ohio, but I will say that the North River can carry a 30-foot vessel. Improvements have been made along the North River docks, and North River, be it remembered, is the Hudson River lying between the Jersey shore and Manhattan Island. The North River now can carry a 30-foot vessel to the docks in Hoboken. The Hamburg-American Line and the North German Lloyd Line, as I remember—and my colleague will correct me if I am wrong—have their docks on the Hoboken side. The *Olympic* and the *Vaterland*, the greatest ships in the world, one White Star liner and one a German liner, can reach their Hoboken or Manhattan docks and discharge their passengers and freight. Therefore, so far as that is concerned, the west side of New York Harbor, the west fork, as it were, which presents itself to the ship coming north from Sandy Hook, can be used now by the largest boat in existence.

There are certain reaches of the river above the docks at Hoboken and Jersey City to which the ships can not go. It is the idea of the Government engineers, as I understand it, to make some further improvements in the North River, so that ships of any size can go farther north.

The same is not true of the East River. The reef between Governors Island and the Battery, which my colleague has described as Diamond Reef, and another reef just beyond it, known as Coenties Reef, limit the ships to 30-feet draft at a maximum under the most favorable conditions, so that none of the great ocean liners come into East River. They can not get into East River from Long Island Sound coming from the north on account of similar obstructions at Hell Gate, and it is the plan of the Army engineers eventually, with the consent, of course, of Congress, to blast out the reefs at Hell Gate and a few pinnacle rocks here and there in East River, so that both ends of the river will carry the largest vessel.

Two battleships have already touched bottom in this spot which it is desired to be improved, and when a battleship of 15,000 or 20,000 to 30,000 tons hits a rocky obstacle on the bottom of a stream it is an exceedingly serious matter. The momentum of a ship of that sort striking against a resisting material causes an enormous damage, and that is what gives rise to the nervousness of the navigating officers of our ships.

Furthermore, the channel between Governors Island and the Battery, which it is sought to be improved, such as it is, is not a straight channel, and the ships have to make two exceedingly sharp angle turns in a very restricted area of water. One of the turns is guided by a point on the roof of a hotel in the city of Brooklyn, situated on higher land. By ranging the roof of that hotel with a certain point down on the Brooklyn shore, the navigating officer knows he is following the turn in the channel; but Admiral Benson testified that if there was any fog on the river the shore-line point is obscured and he can not range it with the point higher up on the roof of the hotel. He has even had to back a great battleship out of the way of a tow of barges in that particularly narrow place.

The Brooklyn Navy Yard has been in existence for 100 years. The Government has spent millions and millions of dollars upon it. We build dreadnaughts there. A ship is being built there now. It is on the ways. Another battleship, having been completed so far as its hull is concerned, is being outfitted there. It is well to remember that the Brooklyn Navy Yard is the one navy yard above all others in the United States which is used for the outfitting of battleships, the placing of guns on board, the movable equipment. It has been the custom of the Navy Department to base, as it is called, four or five or six battleships on the New York Navy Yard. When a new ship is built and added to the Navy, they take the oldest of the battleships which have been based on the New York Navy Yard and base them on the Philadelphia or Norfolk or some other yard, always leaving four or five or six battleships based upon New York.

The situation is an exceedingly serious one. We have embarked on building these big ships, and we must continue it if we are to maintain our own in competition with others, even if we do not intend to compete with them to the limit. It strikes me, as it must strike every Senator who takes this matter seriously, that for us to leave a situation of that sort which at some time may lock up two or three battleships in the Brooklyn Navy Yard without their being able to get out or at any moment may prevent two or three battleships getting in is a matter of far greater importance to this country than the mere matter of hampering the legislative independence of the Senate in its dealings with the House.

Mr. POMERENE. May I ask the Senator further how many battleships we have now with a draft of 35 feet?

Mr. WADSWORTH. We have no battleships of more than 30-foot draft. But all harbor work in these modern days is being done on a basis of 35 feet depth of water. The Senator from Michigan [Mr. SMITH] reminds me. Ships like the *Utah*, the *Wyoming*, the *Arkansas*, the *Arizona*, the *California*, and *No. 43* and *No. 44*, now building, draw 30 feet and can not get in and out of that channel unless the conditions are absolutely normal in every respect, and then they have only a few inches to spare under their bottoms.

May I call the attention of the Senate to a very possible contingency? If one of our battleships in time of war should suffer an injury below the water line, which resulted in filling with water some of the water-tight compartments, she could not get to the Brooklyn Navy Yard dry dock to be repaired, and that is one of the few dry docks which will contain a modern dreadnaught. An injury below the water line, as is well known, will settle a battleship by the head or by the stern 18 inches or 2 feet. She can be kept afloat indefinitely by keeping the water-tight compartments closed and the pumps going; but she is disabled in her fighting capacity. If that should happen in time of war outside of New York Harbor in some contest between an American fleet and a foreign fleet, the injured American battleship could not be repaired, for she could not get into the Brooklyn Navy Yard.

Mr. President, I have attempted to point out, in a somewhat rambling way, what I believe is the national importance of this improvement, and for one, with all due deference to my colleagues, and particularly to the members of this committee, I must utter a protest against placing this item in the category already described in this debate. It is too important; it should not be trifled with; it is just as important to the people of the Middle West and of the Pacific coast as it is to the people of New York. That contention has, in effect, been made by the President of the United States, when he said it is of national importance, affecting our self-defense; it has been made by the Secretary of the Navy in a communication to the House committee; and it strikes me that the Senate would not be true to its traditions as a deliberative body, having in mind the good of the country—not merely the needs of New York—it seems to me that the Senate would not be true to its functions as the upper House of Congress if it did not correct what I believe to be an error on the part of this committee in striking out this item. For, Mr. President, while we have obtained some assurances with respect to the striking out of this item, and some intimation is made that it may go back in conference, I for one, as a Senator, am not willing to approach this project on that basis. I have not entire confidence in what the House of Representatives, through its conferees, will do upon this item. The House has passed it; it now comes before the Senate, just as it should come before the Senate, on its merits. Mr. President, I hope that the Senate will not agree to the amendment of the committee which strikes out this item.

Mr. KENYON. Mr. President, as a member of the Commerce Committee, I feel deeply hurt by the reflection of the distinguished Senator from New York [Mr. WADSWORTH] as to the consideration or lack of consideration of this matter by that committee. I think probably the Committee on Commerce gave nearly five minutes' attention to this important item. Some of us on the committee who tried to find out the reasons for striking out this item, heard the suggestion, as the distinguished Senator from Minnesota [Mr. NELSON] has here stated, in the frank and honest way that he always states the truth, that this was eliminated for trading purposes. When you say that you state the vice of this whole system that some of us have been fighting.

These propositions ought to stand upon their merit, or they ought to go down upon their demerits, as great national propositions of commerce or navigation or of preparedness, and not on their merit as trading propositions. I voted for this item in the committee; I shall vote for it on the floor, and hope it

may be restored to the bill, because it is a meritorious proposition.

While I have as great respect for the chairman of this committee as any man could have for another man, I do not believe that the chairman of the committee needs this for trading purposes. We know him well enough to know that if he can not persuade the conferees he can very quickly overrule any objection which they may make. He can swing the big stick very effectively.

Mr. CLARKE of Arkansas. Mr. President, would it not be a fairer way for the Senator from Iowa to state it, to say that we are not at liberty, under present understandings of the rules, to consider the merits of the different propositions with reference to this bill; that we are confronted by a prohibition against including any new items in it?

Mr. KENYON. We have included new items in it.

Mr. CLARKE of Arkansas. We are insisting that if any new items go into the bill they ought all to be considered on the same footing, so that their comparative merits might be considered at the same time on an equal footing. The Senator may call that "trading" if he wants to.

Mr. KENYON. And every other proposition in this bill we have been insisting ought to be considered on its merits. If Congress has reached the point that great questions of this character, entering into the question of preparedness, are to be considered as trading propositions, the sooner the country finds it out the better. And when it does find it out the rebuke will be quick.

I do not think this is a proposition merely for New York, as the Senator from New York has well said. It is a proposition in which the whole country is interested; it is a proposition in which the people of the West, of the Middle West, and of the South are interested; it is a proposition that the President of the United States considered so important that he asked the House committee to insert it in the bill.

I am one of those who glory in the progress of New York—of the city of New York and of the State of New York. We of the Middle West are proud of New York. Their progress is our progress; their pride is our pride. The fact that New York is a great, rich, prosperous city is a matter in which we all rejoice. Sometimes it seems as if they had almost a surplus of good things; even now they have three candidates for President. I wish they might eliminate some of them.

The Senator from Florida [Mr. FLETCHER], however, has told us this afternoon that we need not talk about any preparedness if we are to neglect the streams in this country. New York is for preparedness. Of course the people of New York are, perhaps, not apprehensive; but this is not for their particular benefit; it is for the benefit of the entire country. They must realize, however, that if trouble comes, if war comes, if they are attacked by foreign foes, they can, perhaps, get away and go down along the Anclote, and some of them take the one launch that goes up the Anclote, or perhaps grasp the trees that twine above the Orange or the Oklawaha Rivers, and thus evade hostile submarines. This is not a New York proposition entirely; it is for the whole country, and certainly is a meritorious one.

Mr. President, I do not understand why we can not as a Senate, as a Congress, be broad enough and fair enough to take up each proposition and decide it on its merits; cut out the bad propositions and keep the good ones, and stop this legislative trading. Believing this to be one of the good and meritorious ones, I shall vote for it when the opportunity to do so arrives.

Mr. LODGE. Mr. President, if this were a local improvement, I should say nothing about it, as I have kept silent on the many interesting local improvements of which this bill is full. I should be more than content to leave it in the very able and competent hands of the two Senators from New York; but, to my mind, it is in no sense a local improvement. To the people of the city of New York, vast as it is, and the great population of the State of New York, the expenditure of $200,000 on this channel in the next year is a matter of very little moment. The great majority of them will never know it is being done. This, however, is a wholly national question, as I look at it.

New York is the great gateway through which pour the bulk of the exports and the imports of the United States. It is to the interest of everybody in the United States that that gateway should be made as commodious as possible. Everyone throughout the United States benefits directly or indirectly by the condition of the harbor of New York. That is the commercial reason; but in this case with the commercial reason is associated the military reason or the naval reason. It is the site of one of our great navy yards—our greatest navy yard—and it is of immense importance to the defense of this country to have it readily open for our battleships, which are constantly growing in size and draft. It is now dangerous to take them there. Their approach to the yard and their departure from it ought to be made as safe as possible, so that our ships may pass in and out at all stages of water. It seems to me perfectly clear that this is perhaps the most important item nationally in the bill.

I want to say, in conclusion, a single word about the rule or law which has come into being about putting no new project in the bill. If this is a new project, it must have got into the bill in the other House, despite the law; but I am informed that what is called the "rule against new projects" is established by vote of the House. Mr. President, I am not one of those who are prepared as yet to accept the proposition that we have not an equal right with the other House to decide on any bill or on what shall be in any bill. The fact that the other House adopts a rule about new projects does not seem to me to have any bearing as to the action of the Senate of the United States.

Projects ought to go into this bill on their merits, and there is no use in holding up the bugbear of losing the bill because we put into it this or any other new project. As a matter of fact, this project was put in by the other House, and all we are asked to do is to keep it in.

Let me say to the Senate that, whatever else may happen, nothing will persuade the House of Representatives to allow this bill to fail. This bill is in no danger of failure. No river and harbor bill that I have ever seen ever was in danger of failure in conference. I have seen one or two river and harbor bills perish on the floor of the Senate, but never in conference. I think we may dismiss from our minds any apprehension of that kind. Judging this item, as the House put it in originally on its merits—and we have no other way to judge it here—judging it on its merits, there could not be a more meritorious proposition than this, for it is of great national importance. It affects us commercially and in a military way, and it affects not the port of New York alone, not the people of New York alone, but the commerce and the naval protection of the entire country.

Mr. NORRIS. Mr. President, I am only going to detain the Senate for a few moments. I shall do that for fear my attitude may be misunderstood. The questions I have propounded to the senior Senator from New York [Mr. O'GORMAN], which were also referred to by the junior Senator from New York [Mr. WADSWORTH], might have created the impression that because I am hostile to the bill itself, and have expressed myself to-day at some length upon it, I would be opposed to putting any items into the bill which I could be instrumental in any way in keeping out; but, Mr. President, I am just as anxious to get good items in this bill as I am anxious to get bad items out.

I have not the expert knowledge to enable me to say that I understand all of the items contained in the bill, meritorious and otherwise; but, so far as my limited knowledge goes, I believe this is the most important of any of the items contained in this bill. I think it is national in its character, and I believe every other item ought to be, to a great extent, a national item.

We are all interested in every one of our great ports and we are all interested, although in a lesser degree, in the smaller ports. We ought to be interested in anything that tends to build up the commerce of the country, regardless of location. I would not draw—and I hope I do not draw—in my consideration of the questions involved, any State line. The harbor of New York ought to be improved.

I wanted to say these few words for another reason, because, aside from its commercial possibilities and its commercial importance, the improvement covered by the amendment under consideration is a military necessity, and I wanted to make my position plain, because I have so often been quoted as one who was opposed to any consideration being given to anything along military lines, when, as a matter of fact, I have felt the same way about that question as I have about the river and harbor bill. While I do not agree with many great men, some of them being amongst my best friends, that there is a great necessity for extreme military development at the present time, I am anxious that any matter relating to military preparedness which, in my judgment, is reasonable and fair should be looked after and attended to properly.

It goes without saying that when we have a navy yard—if we were going to locate it now, it might be a different proposition—but when we have already located in the harbor of New York, and have maintained there for about 100 years, the greatest of all navy yards in this country, and when, on account of the increasing size of vessels which we have been building and are building for the Navy, it is practically an impossi-

bility for our ships to get in or get out, I think, as a military proposition, this improvement ought to be made. I am therefore in favor of it under almost any considerations; but there is another reason why I am in favor of it.

It has been said that the item was put in the bill for trading purposes, and the Senator from Massachusetts [Mr. LODGE] intimated that some one had claimed that if we left this item stand the bill might fail. To my mind that is a very good reason why we ought to leave it in. If this bill, at least in its present form, can be made to fail by including any item, I would be glad to put it in the bill, and thus kill the bill, and then vote for a provision such as is contained in the amendment under discussion as a separate and independent matter. It is bad legislation, as I look at it, to put anything in a bill or to strike anything out of any bill for trading purposes.

There are other new items which have been incorporated in this bill by the Senate committee. I have not examined in detail all of them, but, for the purpose of the argument, I want to assume that at least some of them are meritorious and ought to be included in the bill. As I understand, however, the committee fears that the House will not agree to them unless the Senate conferees are able to say "We will keep the New York item out if you do not let these others in." If our committee have anything "up their sleeve" which is not meritorious, we ought not to give them that leverage, and if they have inserted some new item which is meritorious and which ought to be included in the bill, and it shall pass the Senate, then they do not need any leverage. It will stand on its own merits. If it is desired to add some other new and meritorious item, and if there is such a rule as that to which reference has been made, that nothing new shall be done under the sun, the House having violated that rule by putting in this meritorious item, there is no reason why the Senate should not also violate it. The pot could not call the kettle black in that instance, because the other body has already violated that rule, if there is such a rule; and if there is such a rule, it is not of any consequence, anyway, for there is no reason, if we want to legislate for the benefit of the entire country and we find a proposition that is meritorious—one that is going to be beneficial to the people of the country—why it should not be put in the bill, whether it is a child or whether it is hoary and gray haired and baldheaded with age. If it has merit, we ought to provide for it; and if it has not merit, it ought to be kept out.

So it seems to me, from any viewpoint, that this item ought to stay in the bill. It is of just as much interest to the people of the West as it is to the people of the East. They are just as anxious to protect the battleships which we have as are the people of New York. They are just as anxious that our battleships should have a harbor of safety as are the people of the cities of the Atlantic coast, and that, too, without regard to whether they believe that we ought to build a hundred battleships in the next six months and bankrupt the country by the expenditure of all the money which we can borrow everywhere to build battleships and provide armies, or whether they believe that there is not any demand or necessity for any increase of any kind. No matter what extreme you take, here is a proposition, it seems to me, that should appeal to all patriotic citizens, regardless of their belief upon that question, because no one wants to take a battleship now under our flag and prevent it from getting into a navy yard already established if, by the expenditure of a reasonable amount of money, we can make provision that the ship may have access to and egress from such yard.

I am glad of an opportunity to support this item, Mr. President. I wish that every other item in the bill had behind it the broad, patriotic reasons which, it seems to me, are behind this item.

Mr. JONES. Mr. President, as a member of the Committee on Commerce, I also reserved the right to vote for or against any item that might be in the bill and concerning which there might be controversy in the Senate. I think every member of the committee has that right, whether he expressly reserved it or not. I am not going to discuss the general features of the bill, except simply to say that I concur with all those who say that every item ought to be considered on its merits. I do not suppose there is a Senator here who will deny that.

Mr. President, with reference to this particular item, I have really been amused at the solemnity and earnestness with which the able Senators from New York have come to the defense of New York, and have so vigorously assured us that it is a great city. I really thought that it was before I heard this discussion. I think that the country generally recognizes that it is a great city. I think that everybody recognizes that the harbor of New York is more than a local harbor; that it is of national importance; that its development is of great benefit to all the country; and I am not surprised that there is such a strong sentiment in favor of this amendment. Of course, whenever the Senator from New York reads that the commerce in a certain channel is 46,000,000 tons a year and that they want additional sums to further improve the harbor, it very strongly appeals not only to the Senate but to the whole country.

The worst thing about this item is the way it got into the bill. My friend from Iowa [Mr. KENYON] talks about these items being considered on their merits. This item was not put in this bill on its merits at all. The merits of the item, as a matter of fact, had nothing to do with getting it in the bill. As I understand the senior Senator from New York, he said that this item was included in this bill by the unanimous vote of the House. I should like to ask the Senator whether I was mistaken in that?

Mr. O'GORMAN. Mr. President, the matter was taken up by the committee on the President's suggestion, and the hearings ordered by unanimous consent of the House. It is only to that extent that I meant to be understood.

Mr. JONES. Well, Mr. President, the House does not direct hearings before the River and Harbor Committee; the River and Harbor Committee had its hearings. That is true; but, Mr. President, this is the only item in this bill that led to a minority report on the bill signed by every member of the minority on that committee.

I want simply to call attention to these facts. I am going to vote for this item, so far as that is concerned—I will say that now—but I do say the method and manner in which the item was incorporated in this bill is most reprehensible.

Mr. O'GORMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from New York?

Mr. JONES. I do.

Mr. O'GORMAN. I know the Senator would be glad to have his facts stated accurately. All the minority members did not vote against this provision, but only five out of eight voted that way. That is my information.

Mr. JONES. Well, I have the record here, I will say to the Senator, and I will point out to the Senator wherein he is mistaken. I have here the minority report of the committee submitted to the House of Representatives. It speaks for itself, and it is signed by six members.

Mr. O'GORMAN. There are eight members altogether of the minority on the committee.

Mr. JONES. Then I am mistaken in that. There are eight members of the committee, and there were six who signed the minority report. I thank the Senator for making that correction. The minority was not unanimous, but six constitutes a large part of the minority; but that does not make any difference anyhow. It does not make any difference if there had been only one member of the minority who signed the report. I want to call attention to how this item got in this bill.

The Committee on Rivers and Harbors in the House of Representatives adopted a rule that it would not insert any new items in the bill which it was going to frame. It did that, according to this minority report, not only because of the views of the committee itself but at the request of the President of the United States. This is what the minority report says:

> The committee voted that owing to the condition of the National Treasury and in compliance with the wishes of the President no new project should be carried in the bill.

I have nothing to say as to the wisdom of that rule; but, nevertheless, the committee adopted it and said, "That is the rule we are going to follow," and the House of Representatives indorsed the committee in that rule in every respect. They did not include in the bill any new projects except this one; and they adopted that rule not only because of their views as to what ought to be done but at the request of the President of the United States.

Mr. HUGHES. Mr. President, will the Senator permit me to interrupt him?

Mr. JONES. Certainly.

Mr. HUGHES. Does the Senator say the committee passed a rule in the language which he has just read?

Mr. JONES. This is what the minority say in their minority report, and I think we have a right to assume that it is so. It is common knowledge that that is so; that they did pass a rule of that character and absolutely adhered to it.

Mr. HUGHES. It is common knowledge that it is not true, and that is the reason I wanted to correct the Senator. It is common knowledge——

Mr. JONES. The Senator can not correct me in that way.

Mr. HUGHES. It is common knowledge that it is not true, and that the committee never passed any such rule.

Mr. JONES. Mr. President, I do not yield to the Senator for that purpose. I have my opinion and he has his. There is no question, so far as that is concerned, but that the committee did adopt that rule. They may not have written it out, but they adopted that rule, and they have followed that rule all the way through except on this one item.

Mr. KENYON. Mr. President, does the Senator say they adopted that rule at the request of the President?

Mr. JONES. I read from the minority report. I am not a member of the committee over there and I was not in its deliberations. Every one of the members signed that statement.

Mr. KENYON. If they adopted the rule at the request of the President, then why would not they adopt the exception at the request of the President?

Mr. JONES. That is exactly what they did, and that is what I am going to show in a minute. That is exactly what they did, and that is what I object to. That is the objectionable feature about this item. The Senator does not approve of that way of getting items in the bill?

Mr. KENYON. No; Mr. President, but I am willing to take the judgment of the President of the United States.

Mr. JONES. Oh, yes. Let me show what he based his judgment on, however, and then I will ask the Senator whether he is willing to take his judgment.

Mr. LODGE. Mr. President, will the Senator allow me to ask him a question?

Mr. JONES. Yes.

Mr. LODGE. What on earth has a rule of the House Committee on Rivers and Harbors to do with our action? How does it concern us?

Mr. JONES. Oh, well, it has not anything to do with our action, except that it does have something to do with how we shall treat items put in the bill by the House and how we shall govern ourselves in the way we think is best with reference to our bill. As I stated a moment ago, I expect to vote for this item; but while certain Senators are denouncing this measure, I do want to show how some of these items that are really meritorious get in here. That is what I want to show. It shows that there are objectionable features outside of those that have been pointed out with reference to the making up of these bills.

As I say, the House committee followed this rule, and they refused to put this item in the bill because of this rule; and then a letter was sent to the President by a Member of the House in which he said to the President what I am about to read. Here are the reasons why he said this item should be put in. He did not talk about its commercial importance. He did not talk about the really great importance and the essential need of it from a preparedness standpoint; but he said this:

> The Representatives from New York will be placed in an impossible position if they support revenue measures which will largely increase the burdens of their constituents while failing to obtain legislation deemed essential for the security of the metropolis of the Nation.

That is nothing more nor less than a hold-up proposition. That is all it is. It is a notification to the President that "if you do not help us get this item in this bill, you can not command our support on your revenue legislation."

Now, some may draw other inferences from that language, but it seems to me that it is perfectly plain. They wanted the President to help them out, and that is the reason they give for it. They do not point out the great commerce carried in this channel. They do not point out these obstructions that are in it. They do not say anything about the navy yard or anything of that sort; but they insist upon his helping them, or else his revenue propositions are not meritorious, are not deserving of support. That is what it means.

There were some references in the debate awhile ago to items put in this bill that have been put in to help Congressmen. Why, that is exactly the reason why this item is put in here. That is perfectly plain. It was put in here for the purpose of helping Representatives. That is true regardless of its merits. It ought to have stood on its merits, but it did not. It was not put in here on its merits.

They say that the President says it is essential to national preparedness, and they say we ought to take the President's judgment. He never sent any message down to us. He never sent any message to Congress pointing out the importance of the improvement of this great channel for the great city of New York, which belongs to the Nation and not to the people of New York. What did he say in answer to this letter? Why, apparently he did not consider it of sufficient importance to sign a letter himself, but he directed his secretary to address a letter to the chairman of the committee, and this is what he said:

> THE WHITE HOUSE,
> *Washington, February 11, 1916.*
>
> MY DEAR MR. SPARKMAN: The President directs me to say to you that he is strongly of the opinion that the pending river and harbor bill should carry an appropriation for the immediate improvement of the East River adjacent to the Brooklyn Navy Yard. He fully appreciates the fact that this would be—

I want to call this to the attention of the Senator from New Jersey [Mr. HUGHES]. Listen to what the President says in this letter, through his secretary—

> He fully appreciates the fact that this would be contrary to the rule of the committee not to recommend appropriations for new projects at this time, but he feels that the importance of the matter in its relation to the question of national preparedness fully justifies an exception to the rule.
>
> The President understands that Secretary Daniels has fully explained this matter to the committee.
>
> Sincerely, yours,
> J. P. TUMULTY,
> *Secretary to the President.*

Mr. KENYON. What are the dates of those letters?

Mr. JONES. This letter is dated February 11, 1916. The date of the letter from the Congressman is not given here, but I suppose it is in the hearing.

The President, through his Secretary, does not give any special facts or special reasons why this item should be taken out of the rule adopted by the committee. If it is so important from a preparedness standpoint, he ought to submit to Congress a statement of the need for it.

Practically all the argument that has been presented on this floor to-day has been from the standpoint of the necessity of this improvement for the navy yard. Grant it; grant that it is necessary in order to get battleships up to the navy yard, and grant that we ought to get the battleships up there, and that we ought to have the channel. That could very properly, under the rules of the Senate and under the practices of the Senate, be taken care of in the naval appropriation bill, where it ought to be taken care of.

Mr. STONE. Mr. President, will the Senator permit me?

Mr. JONES. Certainly.

Mr. STONE. The Senator, as I understood, expressed himself as being in favor of this item.

Mr. JONES. Yes.

Mr. STONE. And yet he is making a very vigorous speech in opposition to it.

Mr. JONES. Oh, no.

Mr. STONE. I do not quite understand the attitude of the Senator.

Mr. JONES. Why, my attitude is very plain. I am opposed to the methods by which it got into the bill. The item is all right, but it did not get in here right.

Mr. STONE. Ought it to go out on that account?

Mr. JONES. No; it ought not; and I am not going to vote to have it go out; but I am going to call attention to how it got in, in the hope that in the future other items will not get in in the same way.

Mr. LODGE. Mr. President, on the matter of appropriating on naval bills, I have been on the Naval Committees in both Houses, and I have been for a good many years on the Naval Committee of the Senate. We could not put any such item as this in the naval bill.

Mr. JONES. Why not?

Mr. LODGE. Because it has nothing immediately to do with the navy yard. It is the approach to the navy yard. If the naval bill could be used in that way, you would have harbor improvements all over this country in the naval bill.

Mr. JONES. Yes, Mr. President; and if every river and harbor bill can be used in this way, you will have appropriations for all the navy yards in the country made in this same way.

Mr. LODGE. This is part of the general harbor of New York. It is some distance from the actual yard, and it is useful for commercial as well as military purposes. We never put such items as this in the naval bill.

Mr. JONES. Mr. President, I am going to touch on that matter, and I will do it right now. Why, the very language of this item shows that it is not put in here for commercial purposes. It is not a commercial item, and the Senators from New York have expressly said that it is not the beginning of any project; but the language of the item itself excludes that. It is solely for the purpose of getting up to the navy yard; and I venture to say that there is not any rule of the Senate or of any committee that would prevent the inclusion in the naval bill of any item necessary in order to secure an approach to any navy yard in the country. If there were any such rule, it would soon be done away with.

Mr. LODGE. Mr. President, there is not any question of the commercial value of this—none whatever. A very large commerce goes by there, and it is very essential to commerce. I will say that out of my own knowledge.

Mr. JONES. Why, Mr. President, according to the report they have a channel 26 feet deep all through this stretch of water—I do not know just what they call it—through which the great commerce that the Senator from New York has pointed out, 46,000,000 tons, is already going. There is not anything here that will show that there will be a through channel for commercial vessels drawing 35 feet—not a bit of it. There are other obstructions outside of the approach to the navy yard.

Mr. WADSWORTH. Mr. President——

Mr. JONES. If you take this from a commercial standpoint—and I wish the Senator from Nebraska were here—I want to call his attention to the fact that if you take it on that theory it is the beginning of a $13,000,000 project, and possible a $32,000,000 project.

I now yield to the Senator from New York.

Mr. WADSWORTH. Mr. President, with respect to the statement just made by the Senator from Washington, to the effect that the removal of this reef will not accomplish anything for commerce——

Mr. JONES. Oh, I did not say it would not accomplish anything; practically nothing, though, for the great through commerce going through there.

Mr. WADSWORTH. May I remind the Senator from Washington that this particular reef is the only obstacle at the mouth of the East River which prevents vessels of 35 feet draft from sailing up and into the East River to the Manhattan and Brooklyn docks. They can not get out of the East River at the northern end on account of similar reefs at Hell Gate; but commercial vessels may use all of the East River if this reef is removed.

Mr. JONES. Does the Senator say that they will use that channel to any very great extent if no further improvement is made?

Mr. WADSWORTH. Why, certainly.

Mr. JONES. Then, why did they put this limitation in here?

Mr. WADSWORTH. Mr. President, I did not draft the item. It was drafted in the House.

Mr. JONES. No; I judge not. We have to judge this item largely by its language. This is specifically put upon the ground of getting it in for the navy yard. Of course, the real purpose of it is set out in the letter from the Congressman.

With reference to this project, I want to call attention to the report of the engineers. The district officer recommended a project that would cost $32,000,000 and over. The total cost would be $32,533,501. The Board of Engineers did not think that the commerce, even of the great city of New York, warranted that increased expenditure, and they said so, and they modified that proposition in the recommendation of the local engineer, and they recommended a project like this for the East River:

The board reports that in its opinion it is not advisable for the United States to undertake any further improvement at this time of Little Hell Gate, New York, but it is advisable for the United States to undertake additional improvement of East River, N. Y., as follows:

Then they give one item that will cost $8,616,780. The $700,000 provided in this bill will not do that, and they say that is necessary. This item will not do that. Then there is another item to give access to the wharves that would cost $2,129,458. This will not do that. Then there is the east channel, which will cost in round numbers $13,400,000. Then they say:

The work should be prosecuted—

I call the attention of the Senator from Iowa to this proposition, as bearing upon some of the general criticisms he is making with reference to these bills. They recommend as follows:

The work should be prosecuted at such a rate as appropriations will permit, it being desirable to have at least $500,000 provided annually for this purpose, the application of the funds supplied being left to the discretion of the Chief of Engineers, so that the work may be carried on at such points and in such order as may best serve the interests of navigation.

According to that, they have a project to cost over $13,000,000. At the rate of $500,000 a year, it would be 26 years before they would get it done. That is what we are starting on, if we take the view that this is a commercial proposition. We are starting on a thirteen million dollar project that they do not expect to have finished for 26 years.

I should like to see the Senators from New York, if they stand on this as a commercial proposition, urging that we appropriate enough money to begin the work and authorize contracts to finish it and get it done. That is the great wasteful feature in the river and harbor work that we have done heretofore. I agree with the Senator from Iowa that we have been dribbling along in these projects for years and years and quarters of centuries, and we have wasted more money than would be necessary to finish the projects if we had appropriated all of it or made it available so that they could carry out the projects.

That is what this is the beginning of, if it is taken as a commercial proposition. I do not say it is not advisable to take it up as a commercial proposition. I think it is. I agree with the Senators from New York that the harbor of New York can not be made too good, and that it ought to be made so that it will accommodate the largest possible ships that are going to be constructed in the years to come, so as to accommodate this great commerce, which is the commerce of the country, and not simply the commerce of the city of New York.

Mr. President, I simply wanted to call attention to the manner in which this item got in here. As I said at the beginning, that is the worst objection to it—the manner of it getting in. Of course, we need not be controlled by the action of the House; and yet this is urged on the ground of preparedness, and the Senator from Massachusetts [Mr. LODGE] urges it on the ground of preparedness. If it is necessary for preparedness, that is all right; but that, again, is another argument why it should be in the naval bill. The river and harbor bill is not a military preparedness measure. It is an industrial preparedness measure, if you want to put it on that ground. Of course, everything that anybody wants now is put on the ground of preparedness, and that seems to be a sufficient argument to present for a great many of these things. This river and harbor bill and the different items in it are not being pressed and have not been pressed, however, on the ground even of industrial preparedness, although that is the line of work that should be carried on by this bill. But if this is an item of military or war preparedness, it certainly should be very properly in one of the war bills—either the naval bill or the military bill—whichever you want to put it in.

Of course, if you connect it up with a commercial proposition, why, all right; but when you connect it up with a commercial proposition I want you to understand what you are doing. You are connecting it up with a $13,000,000 proposition, and possibly a $30,000,000 proposition, that may take, and with the dribbling policy suggested in this report will take, from 26 to 30 years; and if you take the $32,000,000 proposition that would be 64 years. If we are going to take it up as a commercial proposition, we ought to take it up earnestly and do what is necessary to be done to complete it in the proper time.

As I said, I am going to vote for this item because it is needed both as a commercial proposition and as a naval proposition, but I am not voting to put it on because it really is entitled to be put on here on the basis of a naval proposition. It ought to have been put on the naval bill. That is where it ought to go. The main thing I wanted to call attention to was the methods used to put it on, which, in my judgment, are just as reprehensible, if not more reprehensible, than to put an improper item in the bill in the proper way.

Mr. CLARKE of Arkansas. Mr. President, the Committee on Commerce has fully accomplished the purpose it had in view in presenting this item by eliciting the discussion which has followed. I want to advise the Senate that the committee rested under no delusion about what it was doing and what will be done in this matter. Those of the members of the committee who informed themselves, as all members of the committees should, as to what they were doing knew exactly what was involved in this matter and acted with a perfect understanding of that fact. It is a deliberate attempt to capitalize the clamor in the country in favor of this so-called preparedness policy by the usual plan of first taking the most attractive and the most defensible item in a larger project and adopting it.

This particular East River project has been recommended for the last three years. The first report, the one recommending the Buttermilk Channel, was filed with Congress on May 3, 1913. There is a full discussion in that report of the relative merits of the two channels, and the then Chief of Engineers recommended the Buttermilk Channel in competition with this East River Channel as being not only the better one of the two but the cheaper. The report is accompanied by an approving report from the General Board of Naval Advisers headed by Admiral Dewey, in which the opinion is expressed that for the purpose of reaching the Brooklyn Navy Yard the Buttermilk Channel is the proper one. This report, recommending the larger project, was made by another division engineer and approved by another board of engineers a short time thereafter.

The project reported in the larger and more comprehensive report, known as Document No. 188, Sixty-third Congress, first session, was filed on the 7th of August, 1913. On its merits neither of these propositions commended itself sufficiently to the River and Harbor Committee of the House or the Senate Committee on Commerce to justify its being included in any one of the three

bills that have been prepared during the time that has intervened. It was not in either of the bills that failed during the last two sessions of Congress. Just at this time it seems to take on a new significance, and a misleading nominal appropriation is provided for it. The scope of the project is cut in two, and the proposition is coolly made to make one end of it 35 feet deep, under the safe assumption that hereafter an argument will thereby be furnished in favor of extending the whole system.

So far as I am concerned, I am not opposed to adopting the entire project, with the $29,000,000 in it, if it is necessary to do so; but I do not care to have it adopted by this process of indirection.

In recommending the rejection of the item we were not dealing with the item primarily. We were dealing with the policy as to whether or not other new items should go into this bill. The Senate Committee on Commerce felt that the Senate was an independent part of the legislative branch of this Government and had a right to exercise its judgment about what should be included in matters of legislation to which its assent is required; and in the exercise of that judgment it included some 15 or 20 items, aggregating an outlay of some $3,000,000 as against about $40,000,000 included in the bill by the House before it came to us. We thought that as there was so much dispute among professional men with reference to a choice between these two channels, we were well within our rights when we submitted that matter again to legislative inquiry. When we come to be confronted with an arbitrary, cast-iron rule when we go into conference we thought we were still within our rights when we could say, "If that is the rule for one item it should be the rule for another of equal merits."

I say to you that this proposition has no merit that is in excess of the merits of any one of three or four propositions that we included in the bill. If it goes in, others ought to go in. If others have to wait, it can wait; and I do not have to go outside of the testimony of engineers to reach that conclusion.

I am not opposed to the item going in the bill if, upon fair consideration of the whole project, it seems to us that it should go in and that others just as good should go in. It may be that I should be compelled to consent to others being thrown out; but I do not want to have my hands tied to start with when we come to consider the general question, because legislation, under our system, is not perfected until the two Houses have adopted the conference report.

I am not going into any very elaborate statement about these two projects—that is to say, the Butermilk Channel and the so-called East River Channel. This colloquy occurred before the Committee on Rivers and Harbors on the 12th of February, 1916, between Mr. BOOHER, a Member of Congress from Missouri, and Col. Black, now the Chief of Engineers:

Mr. BOOHER. Colonel, I want to ask you a question as to Document No. 44, Sixty-third Congress, first session, relative to the improvement of Buttermilk Channel. Now, you say that the other is better. Why the change?

Col. BLACK. There is no change. You will find that both projects are printed in the House documents of the Sixty-third Congress, first session. The Buttermilk Channel report is in Document No. 44, the East River report in Document No. 188. Both are important and much-used entrances to the East River. They were considered as such, reported on by different people. Both are worthy of improvement. At sometime both will be improved and it is simply a question which will be improved first.

Mr. BOOHER. Let me read you a section:

Reading now from report No. 44, in favor of the Buttermilk Channel—

"On account of the great cost of suitably enlarging the channel passing between Governors Island and the Battery—

That is, the East River project—

"and the difficulties attending the prosecution of the work in this congested part of the harbor, the district officer does not favor the enlargement of this channel, but recommends instead the improvement of the Buttermilk Channel to a depth of 40 feet at mean low water and width of 1,000 feet, believing that this route will adequately meet the needs of the Navy and be of future benefit to general commerce and navigation."

Who was the district officer that made this report?

Col. BLACK. Col. Roessler. I never did understand why that channel was given to Col. Roessler to report on and why the other was given to me to report on. There was a slip up in the chief's office. The clerk got the wrong man. Now, we two independent officers made two independent investigations. Col. Roessler got his in first and said this about the East River, but as a matter of fact, the other is cheaper.

Mr. BOOHER. Now, what caused the change from Buttermilk Channel over to the other?

Col. BLACK. Never was any change. Two independent officers make independent investigations as to which is the better, and the one comes to one conclusion and the other comes to another conclusion. Now, it is a question of your paying your money and taking your choice. Both will eventually be needed. Both will eventually be improved.

That was the only way left for him to get out of it.

Now, if those eminent engineers, in dealing with that question, differed, and the best answer that Col. Black could give to the question as to how he was going to reconcile that conflict was to say: "You pay your money and you take your choice," since we are called upon to pay the money I think we ought to have some voice in taking the choice.

I want the Senate to act independently on this matter. The Committee on Commerce has no pride of opinion about it. We have laid the cards on the table. That is what we have done about it. I shall not feel offended if every member of the committee votes for the retention of this item. This bill has been conducted in the open. There has not been a single item in it that we do not understand everything about that it is necessary to understand. There were very complete hearings in the House of Representatives. Printed copies—bound copies—of those hearings were laid upon the desk of every member of the committee, and if each did his duty he familiarized himself with what is contained therein. There is no guesswork about it. We know what we are doing. I think the item ought to be left out, but I shall not be offended at anybody who takes a different view of it.

Mr. SHERMAN. Mr. President, before any action is taken upon this item I wish to say that I shall vote to keep it in the bill. Of course, we are met instantly by the criticisms of the supporters of other items. We who believe in striking out certain items that are neither meritorious nor national in character are at once accused of inconsistency. I very much prefer to be accused of many things whether they be justly or unjustly founded than to interfere with the improvement of a harbor which leads to one of the navy yards of the country, and is at the greatest port in the New World. For that reason, if for none other, I shall support this item. I think it was stricken out without any proper foundation, and the more I have heard it discussed here the less good reason I have heard for leaving it out of the bill.

If there is any political argument advanced for omitting this improvement it would not appeal to me. It does not make any difference to me, Mr. President, whether the Chief Executive approves or disapproves. That of itself is not controlling, but the reason of his approval or disapproval ought to appeal to Senators on a matter of this kind, in which no political argument ought to control. While I admit that even a Democratic President may inadvertently be right sometimes, the mere fact that he recommended this item would not destroy its usefulness if it rested upon any sufficient foundation, and this does.

It is said in the minority report presented by the House committee that the improvement would not be undertaken before one year. I trust we will be at peace for at least one year, and even if it is indefinite, there are a great many improvements we might be compelled to make under the stress of a great emergency. If the appropriation be here allowed, at least within the year, steps will be taken for making this improvement.

New York and its harbors and all the approaches, whether on salt or fresh water, are a part of my country as much as it is of the gentlemen who reside in New York City. I feel just as much interest in any improvement there as if it were a few miles from my door. I believe the character of this improvement, its great importance in war as well as peace, the very great volume of commerce, both in merchandise and in passengers, that will have to enter this harbor annually, make it a first consideration to this body to see that all adequate appropriations are provided.

To my mind, the principal thing is stated by both Senators from New York. At this time if a portion of the Navy could not reach the Brooklyn Navy Yard because of water inadequate in depth, if in time of trouble they could neither obtain ingress nor egress or reach a dry dock for repairs, that, to my mind, answers all other objections, even those of a political character.

Whatever rule may have been passed, if we are to hamper ourselves by House rules and Senate rules that override an emergency of this kind, then it were better that no rules were made. Those rules are not made in the interest of economy. They are made solely for the purpose of cutting off appropriations in an easier way than to meet the ordinary appeals that are made by communities who desire additional expenditures. It is the easiest thing in the world when a rule of this kind has been adopted to say that we can not take up any new project under the rule.

I know how difficult it is to withstand those appeals. I know some of the difficulties that the chairman of the committee, who is primarily charged with a great responsibility in the handling of such bills as this, meets.

On every side of my State there are waterways. On the north and east is one of the Great Lakes, on the east and south there are the Wabash and Ohio Rivers, and along the entire western border of the State runs the Mississippi River,

Since I have opposed certain items in this bill, Mr. President, I have been deluged with telegrams that wish me to take even the bad in order that the good may be saved.

I had an idea once that the Senate was a proper body to make discriminating cuts; that we do not have to take the rotten with the sound in order to save the sound portions of a bill. If it has reached that bad eminence, and if parliamentary government has reached such a level that we are obliged to vote for every project, wise or unwise, that presents itself, without regard to its merits, then I am ready to vote against everything in such a bill. If economy, if proper restrictions, can not be made in any way save that meritorious projects be killed, then let the slaughter proceed, so far as I have a voice in the matter.

Sometimes it takes killing to do good. I do not think the Treasury is of more account than human life, and still military operations constantly kill so that by the destruction of human life ultimate good may come. So, if the Treasury must be protected by the killing of meritorious projects that appear from time to time, then let it be done. I must answer those appeals to me from my own country in that way.

This, however, calling for an immediate expenditure of $200,000, is of a high type of improvement that is not local in its character. It is national in its scope. If New York Harbor should have an insufficient depth of water, if suddenly war were to be our portion, I am vitally interested in seeing that access is obtained to the navy yard, that repairs may be made, new vessels launched, and that prompt action may be had in taking out such battleships or cruisers as are necessary. It is a national question.

Of course, the criticism will be made at once, "Why are you against some other item in the bill?" Those items that have not that opposition in every instance are purely local in their operation. Some of them, it is true, are old measures; they are old in sin and expenses and little result. Most of them show that supposed improvements were instituted but the volume of commerce has fallen off. In some instances it has fallen off 75 per cent or more. So the more the improvements are the less the commerce for the community. These in every instance are local in their character, and if they were obliterated entirely from this bill, and if such improvements were to be ended, they could not affect the national welfare in the least.

The improvements of this character in tidewater rest upon an entirely different basis. I am perfectly willing to be accused of the inconsistency of being unduly susceptible to a large center, where commerce legitimately ebbs and flows, than to add my vote to keep this item out of the bill. For that reason I shall vote to restore it.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

Mr. WADSWORTH. I ask for the yeas and nays.

Mr. O'GORMAN. I hope my colleague will withdraw the request.

Mr. WADSWORTH. I withdraw the request.

The VICE PRESIDENT. The question is on agreeing to the amendment. [Putting the question.] The Chair is unable to decide by the sound.

Mr. KENYON. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). I have a general pair with the senior Senator from Maryland [Mr. SMITH], who is necessarily absent. For that reason I withhold my vote.

Mr. SMITH of Michigan (when his name was called). I have a pair with the junior Senator from Missouri [Mr. REED] and withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER]. I transfer that pair to the Senator from California [Mr. PHELAN] and vote "nay."

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Tennessee [Mr. SHIELDS] and vote "nay."

The roll call was concluded.

Mr. GRONNA. May I inquire if the senior Senator from Maine [Mr. JOHNSON] has voted?

The VICE PRESIDENT. He has not.

Mr. GRONNA. I transfer my pair with the senior Senator from Maine [Mr. JOHNSON] to the senior Senator from Iowa [Mr. CUMMINS] and vote "nay."

Mr. MYERS. Has the Senator from Connecticut [Mr. MCLEAN] voted?

The VICE PRESIDENT. He has not.

Mr. MYERS. I have a pair with that Senator. I transfer the pair to the Senator from Indiana [Mr. TAGGART] and vote "yea."

Mr. BECKHAM. I have a general pair with the Senator from Delaware [Mr. DU PONT], but I understand he would vote as I do, and I therefore vote. I vote "nay."

Mr. WEEKS (after having voted in the negative). I have a general pair with the senior Senator from Kentucky [Mr. JAMES]. I understand he has not voted. I transfer that pair to the senior Senator from Idaho [Mr. BORAH] and allow my vote to stand.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Maine [Mr. BURLEIGH] with the Senator from Arkansas [Mr. ROBINSON];

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Florida [Mr. BRYAN];

The Senator from Pennsylvania [Mr. PENROSE] with the Senator from Mississippi [Mr. WILLIAMS]; and

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY].

Mr. CATRON (after having voted in the negative). I wish to inquire if the Senator from Oklahoma [Mr. OWEN] has voted?

The VICE PRESIDENT. He has not.

Mr. CATRON. I have a general pair with that Senator and withdraw my vote.

Mr. OLIVER (after having voted in the negative). I inquire if the senior Senator from Oregon [Mr. CHAMBERLAIN] has voted?

The VICE PRESIDENT. He has not.

Mr. OLIVER. I have a pair with that Senator which I transfer to the senior Senator from Delaware [Mr. DU PONT] and allow my vote to stand.

The result was announced—yeas 14, nays 48, as follows:

YEAS—14.

Bankhead	Martin, Va.	Shafroth	Swanson
Broussard	Myers	Sheppard	Vardaman
Clarke, Ark.	Nelson	Simmons	
Fletcher	Ransdell	Stone	

NAYS—48.

Ashurst	Hardwick	Martine, N. J.	Smith, Ga.
Beckham	Hitchcock	Norris	Smoot
Brady	Hughes	O'Gorman	Sterling
Brandegee	Husting	Oliver	Thomas
Chilton	Jones	Overman	Thompson
Clapp	Kenyon	Page	Tillman
Clark, Wyo.	La Follette	Pittman	Underwood
Curtis	Lane	Poindexter	Wadsworth
Fall	Lee, Md.	Pomerene	Walsh
Gallinger	Lewis	Reed	Warren
Gronna	Lippitt	Sherman	Weeks
Harding	Lodge	Smith, Ariz.	Works

NOT VOTING—34.

Borah	du Pont	McCumber	Smith, Md.
Bryan	Goff	McLean	Smith, Mich.
Burleigh	Gore	Newlands	Smith, S. C.
Catron	Hollis	Owen	Sutherland
Chamberlain	James	Penrose	Taggart
Colt	Johnson, Me.	Phelan	Townsend
Culberson	Johnson, S. Dak.	Robinson	Williams
Cummins	Kern	Saulsbury	
Dillingham	Lea, Tenn.	Shields	

So the amendment of the committee was rejected.

Mr. CLARKE of Arkansas. I now ask to go back to the amendment appearing on line 25, page 22, authorizing an increase of the appropriation from $25,000 to $50,000, that was passed over in order that we might supply a letter from the Chief of Engineers.

Mr. SMOOT. That amendment is in reference to the channel at Port Bolivar, is it not?

Mr. CLARKE of Arkansas. It involves the channel at Port Bolivar, Tex.

The VICE PRESIDENT. The amendment referred to by the Senator from Arkansas will be stated.

The SECRETARY. On page 22, line 23, it is proposed to strike out the figures "$25,000" and to insert "$50,000," so as to read:

Channel to Port Bolivar, Tex.: For maintenance, $50,000.

Mr. CLARKE of Arkansas. I now present the letter in reference to that amendment, and I desire the Secretary to be good enough to read it.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, May 2, 1916.

Hon. MORRIS SHEPPARD,
United States Senate.

SIR: In reply to your inquiry relative to the amount needed for the maintenance of Bolivar Channel, Tex., I have the honor to inform

you that immediately upon the passage of the pending river and harbor bill by the House of Representatives copies of this bill were sent to all district officers, with request for information as to whether the bill sufficiently met the needs of the works in their districts until about April 1, 1917. In reply to this letter the district officer at Galveston reported that no additional funds were needed for Bolivar Channel; but this morning I am in receipt of a telegram from him, stating that emergency dredging in this channel since March 9 has exhausted all available funds, and that $25,000 in addition to the amount carried in the pending bill, or a total of $50,000 altogether, will be required if the full channel depths and dimensions are to be maintained until April 1, 1917.

Very respectfully,

H. TAYLOR,
Colonel, Corps of Engineers,
Acting Chief of Engineers, United States Army.

Mr. SMOOT. Mr. President, I should like to ask the Senator from Texas if he knows what class of work had been done before March 12, which necessitated the additional appropriation of $25,000? Why was the work undertaken? The letter does not make any explanation as to the reason for doing the work. I should like to be informed, if the Senator knows, why the work was done?

Mr. SHEPPARD. An unusual shoaling was caused by the storm of a few months ago.

Mr. SMOOT. That is, the Senator means by the wash from the watershed into the river?

Mr. SHEPPARD. It is not a river, but it is a channel in the bay near Galveston. It is one of the main channels composing the greater Galveston Harbor, the channel leading from Bolivar Roads to Port Bolivar.

Mr. SMOOT. What has been the usual annual appropriation for maintenance of the channel to Port Bolivar?

Mr. SHEPPARD. My impression is that it has been something like $25,000 or $30,000.

Mr. SMOOT. I thought I had the report in reference to the matter, but I have it not before me; and I therefore can not turn to it at present. It seems to me, however, that the letter which has been read at the desk is very indefinite. There is nothing particular in it. The letter states that the necessity for the increase in the appropriation is simply on account of work that has been done there, and that for that reason they want this extra $25,000. There is no explanation as to what was the character of the work or the necessity for it. It seems to me that information ought to have been supplied by the engineers before the increase should have been made.

Mr. SHEPPARD. I will state for the information of the Senator from Utah that I shall later have the full data in reference to the storm and the effects of the storm on that channel. The necessity for this appropriation is due to the unusual storm which took place there a short time ago; but I repeat that I shall have the data as to the effect of that storm and put it in the RECORD as soon as I can get it.

Mr. CLARKE of Arkansas. I hardly think it is necessary to further pass that item over. It is a maintenance item.

Mr. SMOOT. I am not going to ask that it be passed over, I will say to the Senator.

Mr. CLARKE of Arkansas. In consequence of a storm on the coast, the channel is filled up and must be dredged out, in order that boats may get in and out. It is one of the current expenses of maintaining the channel. About all that can be said is now said in the communication from the Chief of Engineers, which has just been filed. We added some $300,000 or $400,000 for a similar purpose at the mouth of the Mississippi River, at the Head of the Passes.

Mr. SMOOT. Mr. President, I do not ask that the item be passed over. I simply wanted to get some kind of explanation as to the necessity for the proposed increase, because the letter does not specifically state what was the necessity for the extra work that had been done.

Mr. CLARKE of Arkansas. I think it does state that the extra expense is rendered necessary by reason of the storm.

Mr. SMOOT. If that was stated, I did not hear it. There was so much confusion in the Chamber that I could not distinctly hear the reading, but I shall not further object to this item.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CLARKE of Arkansas. The next item passed over is on page 24, in lines 6, 7, 8, and 9.

The VICE PRESIDENT. The amendment referred to by the Senator from Arkansas will be stated.

The SECRETARY. On page 24, after line 5, the committee reported to insert:

Sabine-Neches Canal, Tex.: Continuing improvement, $70,000: *Provided*, That so much of this amount as may be necessary may be expended for making a cut-off at Smiths Bluff, on Neches River.

Mr. KENYON. Mr. President, can we have some explanation of the necessity for that amendment, I ask the Senator from Texas?

Mr. SHEPPARD. It represents part of a project which was adopted by Congress and recommended by the engineers. The statement in reference to it is found on page 18 of House Document No. 1290, Sixty-first Congress, third session, and is included under the heading "Estimate for 25-foot channel." The project carries an estimate for "Cut-off, 70 feet bottom width." This is the cut-off authorized by the project as originally outlined, and was included in the Senate bill two years ago, but the bill failed on the floor of the Senate, as the Senator from Iowa will remember.

Mr. KENYON. Does the Senator know why the other House did not include this item?

Mr. SHEPPARD. I do not. I know that the Senate committee examined the item thoroughly two years ago; that it decided it was part of the original project; and that we followed that action of the committee at this time.

Mr. KENYON. Does this complete the project, I should like to ask the Senator?

Mr. SHEPPARD. It will complete the project as originally outlined by the special board of engineers, except as to maintenance.

Mr. SMOOT. Has this item been recommended by the Board of Engineers for this year's appropriation?

Mr. SHEPPARD. It is a part of the original project.

Mr. SMOOT. And for this amount?

Mr. SHEPPARD. This is the estimate of the engineers as to the cost of making the cut-off.

Mr. SMOOT. I have been trying to see whether there were any hearings upon the matter in the House, but I do not think there were. If there were any hearings, copies have not been sent to me. The Senator says that this $70,000 will complete the project?

Mr. SHEPPARD. It completes the project as outlined in the report of the special board.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 24, line 20, after the word "maintenance," to insert "and repair of levees destroyed by overflows in 1915 and 1916," and in line 22, after the words "Washita River, Tex.," to strike out "$25,000" and insert "$50,000," so as to make the clause read:

Red River, Ark. and Tex.: Continuing improvement and for maintenance and repair of levees destroyed by overflows in 1915 and 1916 between Fulton, Ark., and Washita River, Tex., $50,000.

Mr. KENYON. Mr. President, that amendment also makes an increase from $25,000 to $50,000. This is one of the items on which I want to ask a vote of the Senate. I hesitate to find fault with the Red River on account of its being in the vicinity of the home of the chairman of the committee, but I want to call the attention of the Senate particularly to some of the facts, and then, so far as I am concerned, will submit the item to a vote.

I do not know as to the third branch of the amendment, the one relating to the repair of the levees. I think we had no evidence before the committee on that subject, but the word of the chairman, of course, would be persuasive. I want to place in the RECORD an extract from the Report of the Chief of Engineers, commencing on page 947, volume 1, as to the Red River from Fulton, Ark., to the mouth of the Washita. We have appropriated for that part of the river——

Mr. CLARKE of Arkansas. Mr. President, I might say to the Senator that this item has nothing to do with that part of the river south of Fulton.

Mr. KENYON. It refers to the river below Fulton?

Mr. CLARKE of Arkansas. To the river north of Fulton.

Mr. KENYON. The item is for the Red River between Fulton and the mouth of the Washita, is it not?

Mr. CLARKE of Arkansas. North or west of Fulton.

Mr. KENYON. I want to ask the Senator, then, relative to geography. We have two items in this bill for the Red River?

Mr. CLARKE of Arkansas. Yes, sir.

Mr. KENYON. One from Fulton to the mouth of the Washita. That is this item, is it not?

Mr. CLARKE of Arkansas. The amended item on page 24, lines 19 to 23, covering the Red River in Arkansas and Texas, relates to the northern division, which is in the Dallas district, while that part of the river south of Fulton is in the Vicksburg district.

Mr. KENYON. That is the item that is treated in the Army Engineer's report on pages 947 to 950, volume 1, I think.

Mr. CLARKE of Arkansas. I doubt whether it is.

Mr. KENYON. The other part of the river, below Fulton, is treated on pages 953 to 956.

Mr. CLARKE of Arkansas. I should like the Senator to direct his attention to the particular item with which we are now dealing.

Mr. KENYON. That is what I am trying to do. There are two items, one involving the Red River from Fulton to the mouth of the Washita and the other below Fulton. Now, this is the one from Fulton to the mouth of the Washita, is it not?

Mr. CLARKE of Arkansas. No, sir; it is northwest from Fulton; it is what is called the upper reach of the river.

Mr. SHEPPARD. Mr. President, let me say to the chairman of the committee that the Washita River referred to there is in Oklahoma. It has the same name as the river which empties into the Red River in Louisiana; but the Red River from Fulton to the Washita is the upper section. The river which empties into the Red River in Louisiana is spelled differently; it is the Ouachita; that is all.

Mr. SMOOT. Then, this is the item referred to in the report made by the Chief of Engineers, in part 2, page 866, "Red River between Fulton, Ark., and the mouth of the Washita River in Oklahoma"?

Mr. SHEPPARD. Exactly; and it will be found there that the engineers estimate that $50,000 will be necessary for the next fiscal year.

Mr. KENYON. Let us settle, first, whether or not that is the item. The Army Engineer's reports speak of the Red River from Fulton, Ark., to the mouth of the Washita River in Oklahoma. This item on page 24 refers to the Red River between Fulton, Ark., and the Washita River, Tex. Is there any difference?

Mr. SHEPPARD. It should be the Washita River, Okla.

Mr. KENYON. So, then, I am correct, I think, in my statement. On the part of the Red River from Fulton to the mouth of the Washita River we have expended, as appears on page 950, volume 1, of the Report of the Chief of Engineers, $444,783.53. On page 949 the report refers to commercial statistics, and says:

> Navigation on the Red River above Fulton has practically ceased. No steamboats are now in operation, and the rafting of logs has been reduced to an almost negligible quantity.

On the Red River below Fulton, which this item, it is true, does not treat of, that section of the river being provided for in another part of the bill, we have expended, according to the Report of the Chief of Engineers, volume 1, page 955, $2,763,896.40, with a commerce on the river of 47,351 short tons.

Mr. SHEPPARD. Will the Senator state the value of the 47,351 tons?

Mr. KENYON. They had a value of $2,939,073. That traffic consists of lumber and logs, farm products, and general merchandise.

Now, as to the nature of that traffic, I have the minority report filed by Senator Burton in 1914, in which he discusses this improvement. I read from page 9:

> On the Red River below Fulton, covering a distance of 475.4 miles, there was in the year 1912 a total tonnage of 44,967 tons—

It was slightly more the next year—

> Of this amount 42,640 tons were saw logs, of which the average haul was 131 miles, and lumber 1,100 tons. Of the balance of the freight, including lumber, amounting to 2,327 tons, part was carried 45 and part 80 miles. The total amount appropriated to date for this stream is $2,768,377—

Which includes, of course, the river above as well as below Fulton—

> The expense per ton to the United States Government for carrying this freight, including the lumber, can be approximately obtained if an allowance of 4 per cent is made on the amount appropriated to date and the prospective appropriation in the pending bill is added. This interest on the investment would amount to $110,735.08, and adding the $100,000 appropriated, would make a total of $210,735.08. The cost per ton would be $4.68, or if the saw logs are excluded, the cost per ton would be $90.56, and the cost per ton-mile, $1.53.

I refer to these items to show that, so far as commerce is concerned, as to the particular item in question, there is no commerce, for, according to the Report of the Chief of Engineers—

> Navigation on the Red River above Fulton has practically ceased. No steamboats are now in operation, and the rafting of logs has been reduced to an almost negligible quantity.

I simply raise the question, Mr. President, whether, on that kind of a showing, we are justified in increasing this appropriation. If we are going to appropriate for flood control in this bill, there may be some justification for it, but a flood-control bill, carrying some $50,000,000, has now passed the House and is in the Senate for action before the committee. The flood-control matters ought to be separated from questions of navigation. I do not care to further discuss this matter, but I did desire to put the facts in the RECORD.

Mr. CLARKE of Arkansas. Mr. President, the amount carried by the amendment is the amount recommended by the engineers for the present year, as appears on page 281 of the report which accompanies this bill.

As to the matter of navigation, that part of the river has fallen somewhat into disuse. Under the general authorization for resurveys, contained in the last river and harbor bill, a new survey of the river was made during last summer, and a recommendation not altogether favorable to its very extensive improvement was made; but the engineers did recommend that the project was worthy of an appropriation of $50,000 for the purpose of keeping it in a navigable condition, or of keeping its natural navigable condition in such order that it might be used when necessary; and it is used during the so-called cotton seasons of the year. Many of the plantations in that locality can not be reached otherwise. It has lost some of its significance because of the construction of railroads running east and west from Texarkana, but it is still a river, and a navigable river, and under the jurisdiction of the Congress of the United States. After having dealt with it, I think as strictly as could reasonably be done under the modern and reform policy now prevalent in the Engineer's office, there was enough merit left in the proposition to justify the expenditure of $50,000.

Maj. Slattery, of the Corps of Engineers, in a communication on the subject, says, "only such snagging operations, such participation in levee building, and such levee and revetment work to prevent cut-offs as Congress may authorize" is warranted.

A very extensive scheme of improvement was originally adopted; but the policy now is to leave the river more in its natural condition, making such repairs as are necessary to prevent cut-offs. There have been three or four overflows on that river in the past two years, disastrous overflows, that practically devastated that section of the country and ruined every farmer in the Red River bottoms. They have lost their crops, and, in consequence of the breaking of the levees which protected what is called the regimen of the stream, cut-offs at various points are threatened.

I am sure the Senator from Iowa would not apply the rule so strictly as to preclude this improvement, if it is to be the policy of the Government to keep the rivers in their natural condition. There is some use for the river as a navigation proposition. There is much justification for preventing the river from doing additional damage to the farmers in the locality. They have put themselves to considerable expense—hundreds of thousands of dollars—to build those levees. They have broken in numerous places. The water has run through them and threatened cut-offs at various points. It is largely in the interest of the Government, I think, to make this very modest appropriation, and I hope it will be done.

Mr. KENYON. Mr. President, I should like to ask the chairman of the committee if there is any prospect of placing the Red River and the Arkansas River in the flood-control bill?

Mr. CLARKE of Arkansas. No, sir; I should say not. They are hardly propositions of sufficient magnitude to justify such separate treatment.

Mr. SHEPPARD. Mr. President, the statement of the Senator from Iowa as to the tonnage on the lower Red River ought not to go unchallenged. It is unfair to the river to select one particular year when the tonnage was unusually low and endeavor to analyze the river from that standpoint.

I have here a statement based on the tonnage transported on the river for the last 36 years. The statement shows that there was a total tonnage from 1878 to 1889 of the value of $72,000,000, in round numbers; from 1890 to 1907 a tonnage of $78,000,000; and from 1908 to 1913 a tonnage of about $1,500,000, making the average value of the tonnage for the last 36 years, or from 1878 to 1913, $4,220,000. In fact, the average yearly tonnage is much larger, when the traffic on the lower section of the lower Red is included, the section between the mouth of the Black in the lower Red and the mouth of the lower Red itself in the Mississippi. The fact that the tonnage increased in 1914 in the ratio of probably 50 per cent over 1913 shows that it varies from year to year.

Mr. KENYON. Mr. President, I will suggest to the Senator that the engineers state, on page 955 of volume 1, that "the apparent increase"—and there seems to be an increase for the year 1915—"was caused by an error in reporting the commerce for the fiscal years 1913 and 1914." So, apparently, they account for the increase for the year 1915, which does not seem to be large, by an error in the computations for 1913 and 1914.

Mr. SHEPPARD. Be that as it may, Mr. President, it does not alter the general fact that there has been a relatively large

tonnage, on the average, during the last 30 or 40 years on that river.

Mr. SMOOT. The trouble about it is that for the last few years it is decreasing rather than increasing. The Senator from Iowa was perfectly fair in quoting the figures that he did for the year 1915, because the tonnage for 1915 is nearly double what it was in 1914, and it is larger than it was in 1913. The value for 1913 was only $354,715, and the value for 1914 was only $310,333, whereas the value for 1915 was $2,939,073. In other words, there is some statement here that the increase for the year 1915, as reported by the engineers, was to correct the record that was made for the years 1913 and 1914, thus showing that the volume of commerce upon the river is not increasing, but is steadily decreasing. I think the Senator from Iowa was perfectly justified, and not only justified but was more than fair, in quoting the higher figures that he did to show the commerce upon that river.

Mr. SHEPPARD. But the average for three years is not a fair statement.

Mr. SMOOT. No, Mr. President; but the average for 40 years is not a fair statement, either, particularly when the heavy traffic upon the river was when we were not appropriating for it. Now that Congress is appropriating money for the river, the commerce is decreasing instead of increasing. I think it is that class of rivers that we should eliminate from our river and harbor bills, and spend the Government's money upon rivers where there is a chance of increasing the commerce on them and benefiting the people by the increase.

Mr. SHEPPARD. The Senator is mistaken about that. The river has been improved by the Government since 1828. In 1828 the sum of $500,000 was expended to remove a great raft.

Mr. SMOOT. That was the original amount. I am speaking now of the appropriations that have been made for the maintenance of the river.

Mr. SHEPPARD. But the Senator says that this tonnage was carried when we were making no appropriations for the river.

Mr. SMOOT. I spoke of relatively no appropriations.

Mr. SHEPPARD. One of the largest appropriations was made in 1828.

Mr. SMOOT. Yes; because that was the original appropriation that was made. There is not any question but that that was what they thought then would put the river in navigable shape; but we are appropriating $50,000 this year for the maintenance of the river when the original appropriation was $25,000. The House made an appropriation of $25,000. The Senate has increased it, and added an amendment, and I suppose the amendment gives the reason why the increase is made—that is, to take care of the levees that were destroyed by floods during the years 1915 and 1916. Evidently out of the appropriation that was made for the fiscal years 1915 and 1916 in a lump sum the engineers would not allow any part of the $20,000,000 or the $30,000,000 that was appropriated during those years, respectively, to be applied to this river; and therefore I take it for granted that there has been nothing spent there, even in the maintenance of the river, during those two years. I will ask the Senator whether I am correct with reference to that?

Mr. SHEPPARD. That there has been nothing spent for the maintenance of the river?

Mr. SMOOT. That is, for the fiscal years 1915 and 1916.

Mr. SHEPPARD. Oh, yes; they have continued to improve the river during these years.

Mr. SMOOT. How much did they allow out of the lump-sum appropriation for rivers and harbors, we will say for the fiscal year 1914, for the maintenance of the Red River?

Mr. SHEPPARD. Fifty or seventy-five thousand dollars for the lower river and something like $25,000 for the upper river.

Mr. SMOOT. It does not so appear in the report. That is all I know. It may be so, but it is not in the report.

Mr. SHEPPARD. I have seen the Government snag boats in operation on the river, and I know that the improvement has continued. But, Mr. President, the Board of Engineers recommended that $55,000 be appropriated for the lower river for the next three years to test out the question as to whether the commerce is really going to continue to decline. There has been a decline of commerce on the river during the last three or four years. Up to that time, however, the tonnage had averaged four or five million dollars a year in value for the last 30 or 40 years.

Mr. SMOOT. Can the Senator say why the tonnage is decreasing rather than increasing?

Mr. SHEPPARD. The machinations of the railroads have resulted in putting off the boats.

Mr. SMOOT. Just the same as they have in nearly every country in the world?

Mr. SHEPPARD. The people of Shreveport, the principal city on the river, have lately organized a barge line and subscribed fifty or a hundred thousand dollars in capital. The citizens laid this fact before the Board of Engineers when they made their special examination, and the Engineers decided to make this further recommendation and give the people a chance to continue the navigation of the river, to see if they could revive it and put it on the old basis.

Mr. CLARKE of Arkansas. Mr. President, the remarks made by the Senator from Texas are directed to that part of the river south of Fulton. The item that is now before the Senate relates to the part north of Fulton.

Mr. SHEPPARD. That is very true; but I will say to the Senator from Arkansas that the Senator from Iowa has taken up the question of navigation on the lower river, and I was making answer to that. As to the upper river, the project has really never been given a chance. In 1909 the Engineers recommended that it be improved by snagging and dredging and jettying. Congress, however, appropriated only for snagging, and it was not until last year that the dredge boat was put on the river, and no jettying has yet been done. As a matter of fact, the project authorized by the Government has never had a fair trial on the upper river.

Mr. KENYON. We have appropriated over $500,000, have we not?

Mr. SHEPPARD. That is true.

Mr. KENYON. Why has it not had a fair trial? What has become of the money?

Mr. SHEPPARD. It has been expended in snagging work.

Mr. KENYON. I do not know whether I gave the commerce for the last year. According to page 2690 of volume 2, it was 1,318 tons, of which 840 tons were lumber and 473 tons saw logs.

Mr. SHEPPARD. No one claims that there can be any extensive navigation on the upper section until this project is tried out. The project included dredging and jettying as well as snagging. It is not the fault of the upper section of the river that only snagging work has been done. It is rather the fault of Congress in not carrying out the project in its entirety.

Mr. KENYON. If we have spent $519,000 since 1902, how does the Senator account for the fact that there is practically no commerce?

Mr. SHEPPARD. I have tried to explain it to the Senator. Those expenditures have been confined to only one part of the recommended project; that is, snagging. The other two elements are just as necessary, and have not been supplied as yet by Congress.

Mr. RANSDELL. Mr. President, I wish to say that I understand we are taking up the upper Red River now. The Senator from Iowa attempted to discuss the lower Red River. I understood that he would move, at the proper time, to strike out the appropriation for the lower Red River. I wish to have something to say when that part of the river is taken up. I do not understand that it is under consideration now.

Mr. KENYON. I will say to the Senator that I was discussing them both, and I put in the RECORD from the engineer's report the appropriations for both projects and the commerce for both projects for those years.

Mr. RANSDELL. Do I understand from the Senator that he will discuss the lower Red River and move to strike out that item?

Mr. KENYON. I think so, at the proper time; yes.

Mr. RANSDELL. I simply wanted a chance to discuss that item when the Senator reached it. I have nothing further to say at this time.

The VICE PRESIDENT. The question is on the amendment of the committee.

Mr. SMOOT. Upon that amendment I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CATRON (when his name was called). I am paired with the senior Senator from Oklahoma [Mr. OWEN]. As he is absent, I withhold my vote.

Mr. CLARKE of Arkansas (when his name was called). Mr. President, what are we doing? Is the roll being called to ascertain the presence of a quorum, or are we voting on something?

The VICE PRESIDENT. We are voting on the amendment of the committee.

Mr. SMOOT. Mr. President, I do not know whether, under the rule, I can ask to withdraw the request or not. As this item is on the upper Red River and does not apply to the lower Red River——

Mr. THOMAS. The roll call has been ordered. Let us have it.

The VICE PRESIDENT. The Secretary will proceed with the calling of the roll.

Mr. CLARKE of Arkansas. Mr. President, the Senator from Utah wanted to make the statement that he was laboring under a misapprehension as to the item on which he called for a yea-and-nay vote. He desires to make a statement to the Chair with reference to it. I think he is entitled to do so.

Mr. THOMAS. I do not understand that after the roll call has begun any further statements can be made.

Mr. CLARKE of Arkansas. I think a statement for one purpose is permissible where it can not be made for another.

Mr. THOMAS. If the Senator from Utah withdraws the request, I shall renew it.

The VICE PRESIDENT. The Secretary will continue the calling of the roll.

The Secretary resumed the calling of the roll.

Mr. FLETCHER (when his name was called). May I ask to have the question stated?

The VICE PRESIDENT. The Secretary will state the question.

The SECRETARY. On page 24, line 20, after the word "maintenanme," it is proposed to insert "and repair of levees destroyed by overflows in 1915 and 1916."

Mr. FLETCHER. Is that a committee amendment?

The VICE PRESIDENT. It is.

Mr. FLETCHER. I vote "yea."

Mr. OVERMAN (when his name was called). I have a general pair with the junior Senator from Wyoming [Mr. WARREN]. As he is absent, I withhold my vote.

Mr. THOMAS (when his name was called). I make the same announcement as on the previous roll calls, and the same transfer, and vote "nay."

Mr. WEEKS (when his name was called). I have a pair with the senior Senator from Kentucky [Mr. JAMES]. As he is absent, I withhold my vote.

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the senior Senator from Indiana [Mr. KERN], and vote "yea."

The roll call was concluded.

Mr. BECKHAM. I have a general pair with the senior Senator from Delaware [Mr. DU PONT]. As he is absent, I withhold my vote.

Mr. GRONNA. Has the senior Senator from Maine [Mr. JOHNSON] voted?

The VICE PRESIDENT. He has not.

Mr. GRONNA. I have a pair with that Senator, and therefore withhold my vote.

Mr. MYERS. Has the junior Senator from Connecticut [Mr. MCLEAN] voted?

The VICE PRESIDENT. He has not.

Mr. MYERS. I have a pair with that Senator, which I transfer to the junior Senator from Indiana [Mr. TAGGART], and will vote. I vote "yea."

Mr. SIMMONS (after having voted in the affirmative). I wish to inquire if the junior Senator from Minnesota [Mr. CLAPP] has voted?

The VICE PRESIDENT. He has not.

Mr. SIMMONS. I see he is in the Chamber, and I will allow my vote to stand.

The result was announced—yeas 41, nays 10—as follows:

YEAS—41.

Ashurst	Jones	Oliver	Smith, S. C.
Bankhead	La Follette	Page	Sterling
Brandegee	Lane	Pittman	Swanson
Chamberlain	Lee, Md.	Poindexter	Thompson
Chilton	Lewis	Pomerene	Vardaman
Clarke, Ark.	Lippitt	Ransdell	Wadsworth
Curtis	Lodge	Shafroth	Walsh
Fletcher	Martin, Va.	Sheppard	Williams
Hardwick	Martine, N. J.	Simmons	
Hitchcock	Myers	Smith, Ariz.	
Hollis	Nelson	Smith, Mich.	

NAYS—10.

Borah	Husting	Sherman	Works
Clark, Wyo.	Kenyon	Smoot	
Fall	Norris	Thomas	

NOT VOTING—45

Beckham	Gallinger	McLean	Smith, Md.
Brady	Goff	Newlands	Stone
Broussard	Gore	O'Gorman	Sutherland
Bryan	Gronna	Overman	Taggart
Burleigh	Harding	Owen	Tillman
Catron	Hughes	Penrose	Townsend
Clapp	James	Phelan	Underwood
Colt	Johnson, Me.	Reed	Warren
Culberson	Johnson, S. Dak.	Robinson	Weeks
Cummins	Kern	Saulsbury	
Dillingham	Lea, Tenn.	Shields	
du Pont	McCumber	Smith, Ga.	

So the amendment of the committee was agreed to.

REVOLT IN IRELAND.

Mr. CLARKE of Arkansas. Mr. President, we have been here now for six hours, and I move that the Senate take a recess until 11 o'clock to-morrow.

Mr. MARTINE of New Jersey. May I ask, before that motion is put, the attention of the Senate for a few moments? I read a little story to-day that impressed me intensely. It affected me to the quick; and, with the permission of the Senate, I desire to occupy a few moments.

Mr. CLARKE of Arkansas. I withdraw the motion temporarily.

Mr. MARTINE of New Jersey. Mr. President, I have no thought or desire to interfere with foreign Governments in the management of their domestic affairs, yet I feel that England in her effort to quell a local disturbance in the city of Dublin, Ireland, has gone rank mad and is both blind and deaf to all thoughts of humanity and civilization.

In the steps to quell a local disturbance the Government of Great Britain has descended to sheer butchery in dealing with this question.

Mr. President, we have listened for a long time to Great Britain's profuse professions of humanity, but her recent action bids me say that cant and hypocrisy still prevail there. Has it come to this, that proud and boastful England should brace up against a wall a poor, wounded cripple and then at order to riddle the helpless mortal with bullets? Shame! Shame! Yes, thrice shame!

Mr. President, I do not desire to commit my country, nor do I desire to commit any Senator, but for myself I want to be placed on record as standing aghast at this recent act of barbarism on the part of Great Britain. It seems to me humanity will rebel the world over at this recent act upon the part of this brutal and tyrannous power.

PETITIONS AND MEMORIALS.

Mr. GRONNA presented the memorial of Hubert Harrington, president of the North Dakota Retail Hardware Association, remonstrating against the creation of a national chamber of agriculture, which was referred to the Committee on Agriculture and Forestry.

Mr. WADSWORTH presented petitions of sundry citizens of Clinton, N. Y., praying for the enactment of legislation to prohibit the exportation of intoxicating liquors to Africa, which were referred to the Committee on the Judiciary.

He also presented a memorial of sundry citizens of Long Island City, N. Y., remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

Mr. JONES presented a memorial of sundry citizens of Seattle, Wash., remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

REPORTS OF COMMITTEES.

Mr. SMITH of Maryland, from the Committee on the District of Columbia, to which was referred the bill (S. 5525) to provide for the abandonment of Piney Branch Road between Allison Street and Buchanan Street NW., in the District of Columbia, reported it with an amendment and submitted a report (No. 461) thereon.

He also, from the same committee, to which was referred the bill (S. 5976) to amend an act approved May 29, 1908, entitled "An act to amend an act to authorize the Baltimore & Washington Transit Co., of Maryland, to enter the District of Columbia," approved June 8, 1896, reported it without amendment and submitted a report (No. 460) thereon.

Mr. SMOOT, from the Committee on Public Lands, to which was referred the bill (S. 5539) to consolidate national forest lands, reported it with an amendment and submitted a report (No. 462) thereon.

Mr. MYERS, from the Committee on Military Affairs, to which was referred the bill (S. 2701) for the relief of William Walters, alias Joshua Brown, reported it without amendment and submitted a report (No. 463) thereon.

He also, from the same committee, to which were referred the following bills, reported them each with an amendment and submitted reports thereon:

S. 453. A bill to place Lieut. Col. Junius L. Powell on the retired list of the Army with the rank of brigadier general (Rept. No. 465); and

S. 2222. A bill for the relief of the heirs of Antoine Bayard (Rept. No. 464).

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WARREN:

A bill (S. 6070) granting a pension to Florence V. Handbury (with accompanying papers); to the Committee on Pensions.

By Mr. BANKHEAD:
A bill (S. 6071) for the relief of the Episcopal Church of Selma, Ala.; to the Committee on Claims.
By Mr. FLETCHER:
A bill (S. 6072) to enable the Secretary of Agriculture to investigate the diseases and insects affecting cigar leaf tobacco; to the Committee on Agriculture and Forestry.
By Mr. LEWIS:
A bill (S. 6073) granting the consent of Congress to George Fabyan to construct a bridge across the Fox River; to the Committee on Commerce.
A bill (S. 6074) to authorize the United States Government to build a certain number of merchant-marine vessels and own the same and launch the same upon seas for interstate and international trade, and lease the same to corporations, associations, or persons upon such terms as may be equitable and just, applying the proceeds of the said lease to the payment of the obligations issued for the money to be expended in the building of the ships, and to reserve to the United States the right to convert the ships to national defense at any time when, in the opinion of the President and Secretary of the Navy, such shall be necessary; to the Committee on Interstate Commerce.
By Mr. THOMPSON:
A bill (S. 6075) granting a pension to John F. Roberson (with accompanying papers); to the Committee on Pensions.
By Mr. GORE:
A bill (S. 6076) to amend an act entitled "An act to authorize condemnation of land for sites of public buildings, and for other purposes," approved August 1, 1888, and for other purposes; to the Committee on the Judiciary.
A bill (S. 6077) to authorize the Secretary of Agriculture to establish uniform standards of classification for cotton; to provide for the application, enforcement, and use of such standards in transactions in interstate and foreign commerce; to prevent deception therein; and for other purposes; to the Committee on Agriculture and Forestry.
By Mr. STONE:
A joint resolution (S. J. Res. 133) to authorize the President of the United States to convey the acknowledgments of the Government and people of the United States to various foreign Governments of the world who have participated in the Panama-Pacific International Exposition to celebrate the completion and opening of the Panama Canal, and also the four hundredth anniversary of the discovery of the Pacific Ocean; to the Committee on Foreign Relations.

INSPECTORS OF STEAM VESSELS.

Mr. MARTINE of New Jersey (by request) submitted an amendment intended to be proposed by him to the bill (S. 5349) to amend section 4414 of the Revised Statutes of the United States, relating to the appointment of local and assistant inspectors of steam vessels, which was referred to the Committee on Commerce and ordered to be printed.

RECESS.

Mr. CLARKE of Arkansas. I move that the Senate take a recess until 11 o'clock to-morrow.
The motion was agreed to; and (at 5 o'clock and 3 minutes p. m. Friday, May, 19, 1916) the Senate took a recess until to-morrow, Saturday, May 20, 1916, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

FRIDAY, *May 19, 1916.*

The House met at 11 o'clock a. m.
The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:
O Lord our God and our Father, whose tender mercies and loving kindness have been over us from the beginning, shaping and guiding our destiny as individuals and as a people, continue, we beseech Thee, Thy care over us; give us plenteously of Thy grace that we may do justly, love mercy, and walk humbly before Thee, and so hallow Thy name in all our doings, in the spirit of the Lord Jesus Christ. Amen.
The Journal of the proceedings of yesterday was read and approved.

ORDER OF BUSINESS.

Mr. RUSSELL of Missouri. Mr. Speaker, I call up the conference report on the bill S. 4856.
Mr. MANN. I make the point of order, Mr. Speaker, that it is not in order to call up the conference report under the rule.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:
S. 5841. An act to authorize the Perdido Bay Bridge & Ferry Co., a corporation existing under the laws of the State of Alabama, to construct a bridge over and across Perdido Bay from Lillian, Baldwin County, Ala., to Cummings Point, Escambia County, Fla.
The message also announced that the Vice President had appointed Mr. MARTINE of New Jersey and Mr. JONES members of the joint select committee on the part of the Senate, as provided for in the act of February 16, 1889, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments," for the disposition of useless papers in the Department of Labor.
The message also announced that the President had approved and signed bills and joint resolution of the following titles:
On May 15, 1916:
S. 4432. An act to amend section 8 of an act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914; and
H. R. 3575. An act to amend section 5234 of the Revised Statutes of the United States so as to permit the Comptroller of the Currency to deposit upon interest the assets of insolvent national banks in other national banks of the same or of an adjacent city or town.
On May 16, 1916:
H. R. 6099. An act to amend section 72 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.
On May 18, 1916:
H. R. 759. An act to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof;
H. R. 562. An act to amend the act approved June 25, 1910, authorizing the postal-savings system, and for other purposes;
H. R. 10385. An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917;
S. 4603. An act to authorize the Jackson Highway Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Tombigbee River at Princes Lower Landing, near Jackson, Ala.;
S. 4726. An act to permit issue by the supply departments of the Army to certain military schools and colleges; and
S. J. Res. 119. Joint resolution to permit the issuance of medical and other supplies to the American National Red Cross for a temporary period.

SENATE BILLS REFERRED.

Under clause 2 Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:
S. 3257. An act for the relief of Johnston-McCubbins Investment Co.; to the Committee on Claims.
S. 5841. An act to authorize the Perdido Bay Bridge & Ferry Co., a corporation existing under the laws of the State of Alabama, to construct a bridge over and across Perdido Bay from Lillian, Baldwin County, Ala., to Cummings Point, Escambia County, Fla.; to the Committee on Interstate and Foreign Commerce.
S. 746. An act to remove the charge of desertion from the military record of Capt. Daniel H. Powers; to the Committee on Military Affairs.

UNITED STATES SHIPPING BOARD.

The SPEAKER. The conference report is not in order under the rule. The House automatically resolves itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15455, the shipping bill, with the gentleman from Tennessee, Mr. GARRETT, in the chair.
The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the bill of which the Clerk will read the title.
The Clerk read as follows:
A bill (H. R. 15455) to establish a United States shipping board for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve and a merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries; to regulate carriers by water engaged in the foreign and interstate commerce of the United States; and for other purposes.

Mr. HUMPHREY of Washington. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amend, page 4, line 17, by striking out "ten thousand" and inserting "seven thousand five hundred."

Mr. HUMPHREY of Washington. Mr. Chairman, I have offered this amendment reducing the salary of the members of the shipping board from $10,000 to $7,500. When the rural-credits bill was under consideration a few days ago we reduced the salary from $10,000 to $7,500. I have been somewhat surprised that my farmer friends on the other side of the aisle have not offered an amendment before this. It can not be possible that the great friends of the farmers on that side think that a man on the shipping board is worth more than an expert on rural credits, who has to handle millions of dollars, and they only get $7,500.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. GREEN of Iowa. Does the gentleman realize the extreme difficulty that the shipping board is going to have to make the bill work? Will it not need high-salaried men to carry out the intention of the bill?

Mr. HUMPHREY of Washington. The same is true about the rural-credit bill. If you are going to base it on that proposition, the compensation which the President of the United States receives would be small. But, seriously speaking, I think $7,500 is sufficient compensation. The members of the board have no expenses; they have their secretaries; they have an office provided; and some of the greatest men in the United States—and I know everybody in the House will agree with me—are serving their country for $7,500 a year and paying campaign expenses every two years. [Laughter.]

Mr. MADDEN. Paying them every day.

Mr. HUMPHREY of Washington. Yes; paying them every day, as a matter of fact. I hope, Mr. Chairman, that the distinguished chairman of the committee will accept the amendment.

Mr. SLOAN. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. SLOAN. Would it not be preferable to have the campaign expenses come round only once in six years. [Laughter.]

Mr. HUMPHREY of Washington. Yes; I have decided opinions upon that point myself.

Mr. ALEXANDER. Does the gentleman from Washington think that the salaries of members of this board should be $7,500?

Mr. HUMPHREY of Washington. I do. I think that is a sufficient compensation to get the highest character of men.

Mr. ALEXANDER. What salaries do the members of the Interstate Commerce Commission get?

Mr. HUMPHREY of Washington. My recollection is $10,000.

Mr. ALEXANDER. And what salary do the members of the Federal Trade Commission get?

Mr. HUMPHREY of Washington. I do not know. The gentleman need not cross-examine me about what other people get. If you put it on the ground of ability and service rendered the country, I can put my hand on a gentleman who is rendering more valuable and distinguished service to the country at this time than any other man in it, and he only draws a salary of $7,500 a year. I refer to the distinguished leader of the minority. [Applause.]

Mr. ALEXANDER. The committee considered this question, and all the members of the committee, without exception, I think, were of the opinion that the minimum salary that should be provided for the class of men of the qualification necessary to efficiently discharge the duties of this board should be $10,000, and I think that is a reasonable opinion.

This Federal shipping board will become, in my judgment, a permanent institution. We want to make it a success. The sentiment of the country is in favor of the creation of the board. There is no division of sentiment, so far as I know, on that score.

The gentlemen who appeared before the committee, and particularly those from the East and representing the Chamber of Commerce of New York, expressed a doubt as to our ability to get men possessing the qualifications called for in this bill at $10,000 a year. That has been the only doubt expressed before the committee. For that reason the committee were a unit in fixing $10,000 a year as the salary men should receive possessed of the qualifications necessary for the proper discharge of the duties imposed on this board.

As I say, all members of the committee, Republicans as well as Democrats, agreed that the sum named should be the minimum salary. There is no reason why the salary should be less than that of the Interstate Commerce Commission, and certainly there is no reason why the salary should be less than that of the Federal Trade Commission. The bill establishing the Federal Trade Commission went through this House almost by unanimous consent. I do not know any better way to destroy the provision for the establishment of this board than to provide a salary that is insufficient to secure the service of men of the right kind. The bill provides that they shall not engage in any other business while sitting on the board.

Mr. MADDEN. Mr. Chairman, I think that where a man has been successful in life under the protection of his Government that he ought to be willing to give some of his time to his Government to pay the obligation that he owes. If this board should be created there will be an opportunity for patriotic men who have been protected in their road to success under the flag who will be glad to serve. Lots of men all over America are waiting for an opportunity to pay off the debt that they owe the Government in some way or other, and they would rather pay it by service than to be taxed out of existence.

There are men in this House who are serving for just that reason. They think they owe the Government of the United States something, and they are serving here at a great sacrifice from a financial point of view because they believe they ought to do something for their Government. It makes no difference whether you pay a man $7,500 or $500, if he has the qualifications to serve, if he is patriotic enough he will serve.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. MADDEN. I will.

Mr. GREEN of Iowa. Just for a suggestion of what the gentleman is doubtless aware, that in England there are many men serving on royal commissions of the highest importance without any compensation.

Mr. MADDEN. Why, we have men all over the United States serving local communities without any compensation whatever, and they are glad to do it. Members of great school boards of the great cities of America, having charge of all the expenditures of the moneys that are necessary for the education of the future citizens of America, not only serve free of charge but spend their own money to help build up the community and establish principles upon which we can base a citizenship of which we will in the future be proud. Seven thousand five hundred dollars is enough; it is plenty. If $7,500 is considered adequate compensation for men serving in the House and Senate, where the best brains of the country can be found and where those men are willing not only to serve for $7,500 but to spend all they get for the purpose of serving their people, twice as much more, for anybody knows that men serving in this House are serving at a sacrifice—and I would be sorry to think they were not; I would be sorry to think that we had men here for the purpose of making money—if men are serving in this House at a great loss for the good of the country, if we can find men, 500 of them, serving in the Congress of the United States, at great personal and financial sacrifice, we ought to be able to find men who will serve on this shipping board, in case it is organized——

Mr. COX. Mr. Chairman——

Mr. MADDEN. I will yield.

Mr. COX. I thought the gentleman had concluded.

Mr. MADDEN. No. I would like to get to another phase of the question.

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. MADDEN. I will.

Mr. HUMPHREY of Washington. I was just going to ask the gentleman if he had done himself the pleasure of reading a certain political document which was adopted over in Baltimore in reference to increase of salaries?

Mr. MADDEN. Yes; I have a very vivid recollection of that document, but I am not going to refer to it now.

Mr. FESS. It is out of order.

Mr. MADDEN. I would like to say that there are very many serious objections to the bill which is pending before the committee, and one of those objections is that it puts the Government of the United States into the Government ownership business of the transportation of the commodities of the country. It puts the Government into competition with the men who have invested their money in the most hazardous enterprise that is known to investment, the carrying of goods across the seas; and it takes $50,000,000 out of the Treasury at once and it opens the doors of the Treasury, that is already empty, to $500,000,000 more. Will anybody deny that? Nobody will deny it. Everybody knows if we start out on this enterprise, managed by the Government, controlled by the shipping board, which will be a Government instrumentality, that we are going to carry goods to ports all over the world at a loss; and everybody knows more than that, that when we make the loss we have driven the private citizen, whose capital is invested in

this line of endeavor, off the seas and we put our hands into the Treasury to take out the loss. The gentlemen on the other side of the House are opposed to a ship subsidy and so am I, but in addition to that I am opposed to Government ownership. But here you have Government ownership and ship subsidy combined. Here you pretend to be in favor of the enactment of a law that will admit the purchase of ships that can not be purchased or the right to build ships that can not be built. You will have to admit that you can not build any ships in American yards now, and that you can not build them for two or two and a half years.

Mr. HARDY. Will the gentleman yield?

Mr. MADDEN. The emergency which you say is on will be passed before the bill can become effective. I maintain there is no emergency calling for this legislation.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. Mr. Chairman, I ask unanimous consent that I may proceed for five minutes more.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that he may proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. MADDEN. I yield to the gentleman from Texas.

Mr. HARDY. Mr. Chairman, the gentleman is now speaking of the difficulty of getting ships of which others have spoken. Does not the gentleman realize that even now private capital is having ships built and more are going to be built than ever before, and is it not possible to increase our shipbuilding output?

Mr. MADDEN. The gentleman will not be able to get ships built in American shipyards for the next two and a half years.

Mr. HARDY. Is there any reason why the Government can not get ships as rapidly as private individuals who are now having ships built?

Mr. MADDEN. Private individuals can not get them for the next two and a half years—except those already on the stocks.

Mr. HARDY. This is to help the situation and cause shipyards to increase their capacity, and be prepared to furnish them as rapidly as possible.

Mr. MADDEN. I assume we are passing this bill because there is said to be an emergency. Now, the emergency is likely to pass long before this bill can become effective. They are building about all the ships in the American yards they can to-day and this bill provides for the building of 600,000 tons, and when you put that 600,000 tons of ships in the market and offer them to carry the commerce of the world in competition with our own citizens, you drive our citizens out of business.

Mr. HARDY. Will the gentleman yield for just another question? Does the gentleman conceive it is impossible for us to be building more ships than we are now, or rather will not our shipbuilding increase and will not this law help it to increase?

Mr. MADDEN. Well, I do not know whether it will or not. Of course you can establish Government shipyards, and that might take another bill and more money out of a Treasury that is empty.

Mr. HARDY. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. HARDY. Does not the gentleman feel that the private shipyards would be at least awakened to the necessity of increasing their facilities if they had a chance to secure the building of these ships for the Government?

Mr. MADDEN. Of course if the Government of the United States engages private shipyards to build 600,000 tons of ships, the shipyards will then have no business for private citizens of the United States, because the very moment we pass this bill and undertake to build ships every citizen who has heretofore been willing to put his money into merchant ships will quit and he will not build any more ships to go into competition with the Government.

Mr. FESS. Will the gentleman yield?

Mr. MADDEN. I yield to the gentleman from Ohio.

Mr. FESS. When the war ceases and the European shipyards again are utilized, what will be the demand upon us for the superfluity of ships we are trying to build?

Mr. MADDEN. We have all the ships now that we need in which to ship our products everywhere. Nobody complains.

Mr. ALEXANDER. Is the gentleman serious in that assertion?

Mr. MADDEN. I am.

Mr. ALEXANDER. It is contrary to all the facts of which I have knowledge. What I want to ask the gentleman is, You say if this bill becomes a law shipbuilding will stop by private parties?

Mr. MADDEN. Of course.

Mr. ALEXANDER. Even if this is a menace, yet within the last six months contracts have been let for more ships than at any other period since the Civil War.

Mr. MADDEN. I think the people of the United States who are willing to invest their money in the construction of merchant ships had a right to believe that Congress would have too much sense to pass a bill like this and that they might be willing to let them go on their way rejoicing and attend to their own business without Government interference.

Mr. ALEXANDER. The gentleman from Ohio [Mr. FESS] put in the RECORD yesterday a statement of the National Foreign Trade Council, composed of distinguished gentlemen, of which James A. Farrell, of the United States Steel Corporation, is president, in which they say we need six to ten million tons of shipping under the American flag. Do you think that the construction of 600,000 tons would be a menace to private capital?

Mr. MADDEN. Yes.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

Mr. MADDEN. Mr. Chairman, I ask unanimous consent that I may have five minutes more to finish what I have to say.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MADDEN. I will say to the gentleman from Missouri that my experience in business leads me to this conclusion, that it does not make any difference how big your concern is, how large a percentage of the business of your line you are able to do, if some man with a small corporation goes into competition with you, even though you may have $100,000.000 invested in your business, he can make the price, and he makes it, and you have to meet that price. And so the argument that 600.000 tons of shipping will not affect the rates as against 10,000,000 tons of shipping does not hold good. It is not a good argument. The Government can make a low rate and can afford to do it because it has the Treasury of the United States behind it to make up the loss.

There is one more thing that I want to speak about. This bill proposes to regulate the rate. It gives the power to the shipping board to regulate the rates. But you can not regulate the rates on anything except the liners, and two-thirds of all the tonnage carried all over the world is carried by the tramp steamer, and the tramp steamer fixes the rate. And if you fix a rate higher than the tramp steamer, why you put your people out of business.

Mr. HARDY. Will the gentleman yield right there?

Mr. MADDEN. Yes, sir.

Mr. HARDY. Is it not a fact that the tramp steamer practically always carries freight for less than the liner?

Mr. MADDEN. I do not know. I can not say as to that.

Mr. HARDY. Well, it is a fact.

Mr. MADDEN. I am only speaking from general principles.

Mr. HARDY. That being the fact, if you regulate the liners, and the tramp steamers run with a less rate than the liners, would you not benefit the whole people?

Mr. MADDEN. If you can make a rate so low that an American citizen who has his money invested in shipping must conduct his business at a loss, and you have to call on the Treasury of the United States to make up the loss of these ships, then you are a menace to the country. You are taxing the innocent citizen to make up the losses caused by Government operation of merchant ships.

Mr. HARDY. Do you think that the shipping board would fix the rate so low that there would be no profit in shipping?

Mr. MADDEN. I claim that you can not regulate the rate at all without doing injustice, because the tramp steamer regulates the rate.

Mr. HARDY. Does the gentleman think that there ought to be no power under the sun to prevent a thousandfold excessive rate or powerful combinations robbing the people?

Mr. MADDEN. I maintain you can not regulate the rates unless you regulate all the rates. If two-thirds of the rates are beyond your power to regulate, the rest amounts to nothing.

Mr. HARDY. If the liner always fixes a higher rate than the tramp, and you regulate the liner, does not that necessarily bring down the tramp?

Mr. MADDEN. No; it does not necessarily bring down the tramp at all.

Mr. SAUNDERS. Will the gentleman yield?

Mr. MADDEN. I will.

Mr. SAUNDERS. You refer to the rate in foreign commerce?

Mr. MADDEN. That is, the commerce in which we engage.

Mr. SAUNDERS. We do not undertake to regulate that?

Mr. MADDEN. Not at all.

Mr. SAUNDERS. We provide in respect to foreign rates that we shall not be guilty of certain discrimination and unfair practices. We do not undertake to do anything whatever with fixing rates. There is no power to fix an establishment of foreign rates whatever.

Mr. MADDEN. If this bill becomes a law, you will drive every citizen who is now engaged in shipping out of business.

Mr. SAUNDERS. Mr. Chairman, will the gentleman yield?

Mr. MADDEN. And you will draw on the Treasury of the United States for all deficiencies, and you will be paying subsidies, although you pretend to be against subsidies.

Mr. SAUNDERS. I admit that under the terms of this bill there are subsidies in it. I would not deny that; but will the gentleman point out where this board can in any way regulate the rates of carriers of foreign commerce?

Mr. MADDEN. It is in the bill, but I would not undertake to point out just where now.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. ALEXANDER. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Missouri [Mr. ALEXANDER] asks unanimous consent that all debate on this section and all amendments thereto close in five minutes. Is there objection?

Mr. MANN. I would like to have a little time.

Mr. CULLOP. Reserving the right to object, Mr. Chairman, I would like to have five minutes.

Mr. BENNET. I would like to have a little time. I have three amendments to offer to the section.

Mr. HUMPHREY of Washington. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HUMPHREY of Washington. Has the debate on the amendment which I offered already expired?

The CHAIRMAN. Yes. That debate has expired.

Mr. ALEXANDER. Mr. Chairman, I modify my request and ask unanimous consent that all debate on this section and all amendments thereto close in 20 minutes, 10 minutes to be controlled by the gentleman from Massachusetts [Mr. GREENE] and 10 minutes by myself.

Mr. MANN. Make it 15 minutes on a side.

Mr. ALEXANDER. Let it be 15 minutes on the other side, to be controlled by the gentleman from Massachusetts [Mr. GREENE], and 10 minutes on this side, to be controlled by myself.

The CHAIRMAN. The gentleman from Missouri modifies his request and asks that the debate on the pending section and all amendments thereto close in 25 minutes, 15 minutes to be controlled by the gentleman from Massachusetts and 10 minutes by himself. Is there objection?

There was no objection.

Mr. GREENE of Massachusetts. I yield to the gentleman from Illinois [Mr. MANN] five minutes.

The CHAIRMAN. The Chair will first recognize the gentleman from Missouri [Mr. ALEXANDER], if he desires to yield time at this time.

Mr. ALEXANDER. No.

The CHAIRMAN. The gentleman from Massachusetts [Mr. GREENE] yields five minutes to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Chairman, I want to call the attention of the committee to a matter not involved in this section. If my recollection is correct, I reported in the act to amend the interstate commerce act, in 1910, a pooling provision relating to railroads. It was stricken out in the House. The matter has been put before the House several times again. It never has been enacted into law. The House has never been in favor of it.

Section 16 of this act contains a pooling provision, exempting all provisions which are approved by this board from the provisions of the Sherman antitrust law. I presume gentlemen will defend that proposition, and I am not sure but that it is defensible.

For instance, here is a railroad that has through connections on the Great Lakes with a steamer, and they make through rates. Those rates are controlled by the Interstate Commerce Commission. They can not be pooled, either as to rates or as to quantity of freight to be carried. But if the same freight is shipped merely from Chicago to Buffalo by water they can pool the freight, although it may be destined from Iowa to Boston or New York. That is an unfair discrimination against the through rates, and an unfair discrimination against the railroads which make through rates.

Section 16 provides that every common carrier subject to this act shall file with the board every agreement which is made, which agreement may be approved, modified, or canceled by the board. In other words, they can approve the agreement. Then the section further provides that these agreements are excepted from the provisions of the Sherman antitrust law. That permits the freight that may be broken at Chicago—and I only use Chicago as an illustration—and which may be shipped by water to Buffalo, so that it comes under the terms of this act, to be pooled. But if you ship it on a through rate from Chicago to New York, the Interstate Commerce Commission has control of that, and that can not be pooled.

There can be no justification, in my opinion, for this discrimination as to whether you can pool your freight as between through rates and through routes and broken routes and broken rates. Gentlemen, I think, can not deny that result. I can see no object in making this discrimination.

When we tried to give to the railroad companies—I tried in a way—the authority not to pool the rates, because they are usually uniform, but to make pooling arrangements so as to prevent railroad wars, leaving the control of the rates to the Interstate Commerce Commission, the House decidedly struck it out of the bill. But if it is to be given to those whose agreements come under the control of this board in direct competition with the agreements which come under the Interstate Commerce Commission, it is an unjust and unfair discrimination. [Applause on the Republican side.]

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. ALEXANDER. Mr. Chairman, I yield five minutes to the gentleman from Indiana [Mr. CULLOP].

The CHAIRMAN. The gentleman from Indiana [Mr. CULLOP] is recognized for five minutes.

Mr. CULLOP. Mr. Chairman, I am in favor of the amendment of the gentleman from Washington. Seventy-five hundred dollars a year for these men is an adequate compensation compared with the compensation of other public service just as important, where the duties involved require just as much talent. It is very rare that such positions are declined because of the inadequacy of compensation, and $7,500 salary for the period of appointment will get just as good talent as would be secured at $10,000 a year. [Applause on the Republican side.] I believe when the compensation was fixed at $10,000 a year in the Federal reserve law it was fixed $2,500 a year higher than it ought to have been. I believe in all cases "the laborer is worthy of his hire"; that reasonable compensation should be paid in all employments; but I do not believe salaries for public service should be out of proportion with other employments. The amendment fixes a reasonable sum and not out of proportion with other services just as important.

Now, this is an important measure. Its enactment will bring relief to all the people of the country and supply transportation to carry our products to the markets of the world.

Mr. RAGSDALE. Mr. Chairman, will the gentleman permit an interruption?

Mr. CULLOP. I regret I have not time now. The gentleman from Illinois [Mr. MADDEN] said it would be infringing on the opportunities of the men who own the ship lines; it will reduce their earnings, their extortionate charges for ocean shipments, and improve our foreign commerce. I will say to the gentleman from Illinois that their numbers are few compared with the thousands and millions of people who will be benefited by the reduction in the rate charged for ocean transportation at this time and in the future. This condition, this monopoly, has been demanding our consideration for more than two years, because of the excessive charges exacted for this service. It affects every branch of industry in this country, and has reduced the profits of every business we have engaged in foreign commerce, and it is essential that it be regulated, its grip broken, in order that trade may be accommodated and industry properly rewarded.

Every wharf along the Atlantic Ocean to-day is congested with goods for transportation, sold in foreign markets at good prices, but the cost of transportation is reducing the profits to every producer in the United States and preventing their speedy transportation.

The men who produce products ought to have the profits, not the shipowners that transport the products to foreign markets; but because of this monopoly of a few shipowners the producers are prevented from enjoying the profits and the shipowners absorb them.

Mr. MEEKER rose.

Mr. CULLOP. I have not the time to yield now. I believe in benefiting the many by legislation. This Government-ownership bugaboo is no longer scaring many people in this country. It formerly terrorized them, but it has been made do overtime, until now the people consider it harmless. Whenever anything becomes a monopoly so powerful that it can oppress the people,

limit business opportunities, just as this monopoly has been doing, it is proper for the Government to take a hand, and, if it requires Government ownership, furnish the relief the people require, as appears necessary in this matter, and break the grip of the monopoly. By this measure it is proposed to liberate business from this restraint and let the producers enjoy the profits they are able to earn and would be earning if it were not for the extortionate rates this giant monopoly is charging for ocean transportation. It is enabled to charge these rates because of the want of ample shipping facilities. This will supply this want, regulate prices by competition, and enable producers to realize the profits which now they pay to shipowners. The same argument was used here when we passed the Federal maritime insurance law. They said that the Government was going into business and competing with private capital; but the Government went into that business, and the prophecies of those same gentlemen that we would bankrupt the Government did not materialize and we did not drive a single company out of business. We regulated the rates and inspired business. On the contrary, the Government has paid every obligation under that law and has cleared more than $1,200,000, which has been put into the Public Treasury. It reduced the rates of insurance not to a starvation figure but with ample profit, as the results of this law have shown. It accelerated prosperity, encouraged business, and inspired confidence. So if this bill is passed, putting ships upon the ocean to carry the people's products to foreign markets on reasonable terms when they have sale for them in foreign ports to foreign purchasers, the producers will get the profits, and not the ship monopoly in this country. So that the enactment of this law is to the advantage of the many, the people who deserve to have the profits, instead of to the advantage of the men who control the ocean transportation, and who, on account of the scarcity of ships and the number of shippers, are able to raise the rates until they are almost prohibitive, and who thereby injure the producer, the wage earner, the manufacturer, the farmer, and the merchant in this country. For this reason there is a great public demand for the enactment of this law, in order that relief may be furnished to the producers and the wage earners of the country and to furnish opportunity to the men who produce the products to send them to market and realize the profits which legitimately belong to them, instead of permitting a few shipowners to absorb them.

Another feature I want to discuss for a moment. For years our shipbuilding interests have been dwindling down until it has become almost a business of the past, but this will encourage that great industry, revive it, and make it once more a thriving business in this country. Activity in that industry through the hope of the enactment of this law is appearing, and with the passage of this law it will again take its place among the great industries of the country. It will regain its lost prestige and will employ men and capital. It will add thrift to the great enterprise. It will restore the American flag on the seas, where it will float over American built and owned argosies carrying American goods to foreign markets, swelling American commerce. It will employ American wage earners at good wages and extend American industry. We will pay the money expended for this service to American people instead of paying it to foreigners, keeping it home to increase the welfare of our country and better the condition of our people. [Applause.]

Mr. GREENE of Massachusetts. I yield to the gentleman from New York [Mr. BENNET] five minutes.

Mr. BENNET. Mr. Chairman, I move as a substitute for the amendment of the gentleman from Washington to strike out $7,500 and insert $15,000.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend the amendment by striking out "$7,500" and inserting "$15,000."

Mr. BENNET. Mr. Chairman, I agree with the distinguished gentleman from Missouri that they ought to get good men for this board, and the figure that I propose is the amount that is paid the public-service commissioners in the city of New York, who have not a tithe of the work to do that this board will have to do.

The gentleman from Indiana [Mr. CULLOP] says that this board will discourage monopoly. I will tell you what the reports are that come to me. Our great objective is the South American trade. Now, what is being formed in the city of New York to-day because of this bill? I will tell the gentleman. There is a great bank, with practically unlimited capital. There is a shipping company that has nearly 50 vessels. There is an export house that has many branches in South America. They have combined. Why? Because if this bill goes into operation all other ships, being common carriers, will come under the regulations and provisions of this law. The combination's ships will not be common carriers, because, as freight is carried on with South America, the manufacturers, like my colleague [Mr. SNYDER], who manufactures bicycles, sell their products f. o. b. New York, and this tremendous combination will transport simply its own freight to South America. If this combination is perfected, no independent shippers will go into the South American trade if the regulations prescribed in this bill become law.

None of the ships under the jurisdiction of this shipping board can go into competition, because they are so bound and tied by the provisions of sections 7, 8, 9, 10, and 12 that they can not compete, and this combination, with seventy or eighty million dollars to start with, can, for as long as it is necessary, put the business on so low a rate that no man dare start in South America, because the ships of this combination do not come under the provisions of this act, that if they reduce the freight they must keep it reduced until they raise it for some other reason than the removal of competition. We ought to have good men to fight a condition like that; and while good men do volunteer, and good men like the gentlemen from Illinois, Mr. CANNON, Mr. MANN, and Mr. MADDEN, and good men like the gentleman from Missouri [Mr. ALEXANDER] do come to this House for $7,500 a year, there is no reason why men should be drafted from private life for such public service as this at less compensation than they are receiving in other public capacities.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. BENNET. Yes.

Mr. TOWNER. Does the gentleman really think that many of the Members of this House have been drafted to serve?

Mr. BENNET. I did not use that word in connection with Members of the House. I used it in connection with these proposed commissioners, for this reason, that I regard elective service as a Member of the House of Representatives of the United States as one of the highest honors that can be conferred upon a man, and not at all to be compared with an appointive position on a board.

Mr. TOWNER. I agree with the gentleman; but does he really think there will be any difficulty in obtaining deserving Democrats to fill these places at $7,500 a year?

Mr. BENNET. I am not going to make a political speech. You can get $7,500 men; but this important board ought to have the best men in the country, regardless of politics, especially in connection with section 13, under which they are to conduct investigations.

I have told this House frankly of the combination that is being formed in New York City at this very minute. I hold in my hand a report, as they call it, from the Nautical Gazette, received this morning, I presume, by every Member of the House, in which they call attention to this combination that has bought 500 acres of land alongside of the Standard Oil plant and the Baltimore & Ohio at Bayonne.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BENNET. I wish I had more time.

Mr. GREENE of Massachusetts. I yield to the gentleman five minutes more.

Mr. BENNET. I hope the House will give these men $15,000 and enable us to get the best men.

Mr. SLAYDEN. Will the gentleman yield?

Mr. BENNET. Certainly.

Mr. SLAYDEN. I am interested in the statement the gentleman made; and, because unfortunately I was detained and did not hear his opening remarks, I wish to ask him, Is this combination that the gentleman speaks of one that proposes to develop trade between Latin America and this country? Is that their purpose, or are they to be shipowners or bankers or merchants or what?

Mr. BENNET. This combination is to develop trade between this country and South America for its own benefit.

Mr. SLAYDEN. Of course. That is the object of all trade development.

Mr. BENNET. They have 50 ships. They will not charge a dollar of freight. Here is what they said to a man in the export trade. They asked him to go into the combination, so it has been reported to me by a Government official, and he said he did not desire to go into the combination because he did not think they were on a sound economic basis. They said to him: "Sound economic basis! Why, we are going to control the whole thing, and we can fix our own rates." He said, "I prefer to stay out and do business on conservative lines that I have for years." They said to him, "All right, you stay out; but if you stay out of this combination there won't be any

way that you can ship your goods to South America." They start in with 50 ships and with the power in their own hands to keep every other man in the United States that has not a hundred million dollars to risk from putting one single ship on the ocean. And yet we proceed with regulations in which we tie the people up tighter and tighter and with a board so limited in its powers that it can not charter a single ship in the South American trade.

Mr. McKELLAR. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. McKELLAR. Is not the formation of such an organization a pretty good reason why this bill ought to pass?

Mr. BENNET. Not at all; not this bill, with the restrictions put on charters, because, as I said frankly, as long as the bill is to pass the House we ought to give these men $15,000 apiece, so as to get the best men to carry out the provisions of section 13.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. MOORE of Pennsylvania. Suppose we form this Government shipping board and a hundred million dollar corporation gets control of that board, what will happen?

Mr. BENNET. They do not have to get control of the shipping board. They control the ships.

Mr. MOORE of Pennsylvania. Would not this be a perfect monopoly?

Mr. BENNET. I do not think that they would ever control the shipping board. I am assuming that these men are to be good men, and I want them to be good men.

Mr. REILLY. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. REILLY. What is to prevent a corporation under existing conditions doing just what you claim this corporation is doing?

Mr. BENNET. Under existing conditions they are going to do it.

Mr. REILLY. Is it not time, then, for the Government to step in and do something to counteract it?

Mr. BENNET. It seems that it might be the duty of Attorney General Gregory to do something. The gentleman from Indiana talks about trusts. Do you Democrats forget that you are in power? If there is a Shipping Trust why does not the Attorney General go after it? There has not been a prosecution commenced against the so-called trusts in two years and a half, and yet every once in a while you Democrats get up and holler about the trusts. Why do not you get after them? If there are these iniquitous trusts, why do not you skin them? You promised to do so when you were out of power.

Mr. MOORE of Pennsylvania. Does not the gentleman remember that the other day gentlemen on the other side said the power of Mr. Morgan was just as great to-day, notwithstanding the Federal Reserve Board, as it was before the board was created? Is it not possible that the Shipping Trust will continue to be as powerful, notwithstanding Government competition?

Mr. BENNET. If there is such a thing as a shipping trust, the Attorney General ought to start after it to-morrow. The Democrats are so used to being out of power and criticizing the people that they forget it once in a while. Now, Mr. Chairman, I have no disposition to take up any more of the time. I have laid the facts before the House, and I hope they will get the best men they can for this shipping board.

Mr. ALEXANDER. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. HARDY].

Mr. HARDY. Mr. Chairman, I am not going outside the question before the House to reply to the efforts on the other side to inject politics into this bill. I will say on the question before the House that the remarks of the last gentleman [Mr. BENNET], who told us about an immense combination just being organized, that if there was no other reason given the House except that statement—granting that it is true, and I have no reason to doubt it—that statement would contain absolute proof that some regulatory laws such as are embodied in this bill ought to be passed in order to prevent such combinations.

Now, on the amendment offered by the gentleman from Washington, when I watched the smile of Mephistopheles that passed over his countenance and then heard his statement and the statement of the gentleman from Illinois that they hoped to God the bill will never pass, I know the purpose is not to strengthen but to destroy the bill.

I want to say that our committee of 21 members—Democrats and Republicans—heard all the evidence as to the fixing of these salaries, and there is not one of us that does not agree to the salaries as fixed in the bill. I want to say that while $15,000 may be a little sum to men engaged in large business, this committee looked into the whole subject and has found the right between the two extremes. We neither cut down the salary to a figure which might not get the men desired and qualified for this place nor did we wish to make salaries too high. The President, by the terms of the bill, must have regard to men having the capacity to do the work. Men of big business affairs are the only ones who will understand, and have that capacity—men of broad scope and views will be the only men to meet the requirements of the legislation on the subject. Men of that character will be able to contemplate the whole field of operations and put this law on its feet and help it to become a success. If the law does what we hope it will do, and helps to reinstate the merchant marine, this board will be worth a thousand times its salary, and if it shall help to prevent oppressive discriminations against our people used in various and sundry ways, and in the interest of special favorites and in tearing down the average small business man; if this board vindicates the powers given to it, it will be the most important board outside of the Interstate Commerce Commission that there is under the Government of the United States. It will be one of the greatest importance, and will stand side by side with the Interstate Commerce Commission. It will have a useful and possibly even greater field of usefulness than that board that undertakes to regulate our railway traffic. It will help to build up our commerce where it is needed to be built up and then to prevent such combinations and shipping trusts as prevent any effort on the part of American capital to get into line and to begin competition in the shipping of the world. I want to see the American flag on the high seas; I want to see American commerce carried under the American flag, but I want to see it carried with justice, fairness, and reasonableness of service to the American people. [Applause.]

The CHAIRMAN. The question is on the substitute offered by the gentleman from New York.

The question was taken, and the substitute was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington.

Mr. MANN. Mr. Chairman, may we have that amendment again reported?

The CHAIRMAN. Without objection, the amendment will be again reported.

The amendment was again reported.

The question was taken, and the Chair announced the noes appeared to have it.

On a division (demanded by Mr. HUMPHREY of Washington) there were—ayes 52, noes 84.

So the amendment was rejected.

The Clerk read as follows:

SEC. 5. That the board, with the approval of the President, is authorized to have constructed and equipped in American shipyards and navy yards [or elsewhere, giving preference, other things being equal, to domestic yards,] or to purchase, lease, or charter, vessels suitable, as far as the commercial requirements of the marine trade of the United States may permit, for use as naval auxiliaries or Army transports, or for other naval or military purposes.

Mr. ROWE. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 5, line 21, strike out all of section 5, with notice that if this paragraph is stricken out a motion will be made to strike out sections 6 to 12, inclusive, also section 14, being all the sections relating to the ship-purchase provisions of the bill.

Mr. ALEXANDER. Mr. Chairman, in order to facilitate the consideration of the bill can we agree on time on this amendment?

Mr. MANN. What is the gentleman's request?

Mr. ALEXANDER. Can we agree on time on this amendment and all other amendments to this section?

Mr. MANN. There are some other amendments to the section, and I think we had better not agree right now on all amendments to the section. Let us agree on this amendment.

Mr. ALEXANDER. How much time would the gentleman suggest?

Mr. MANN. Let it run a little while. Mr. Chairman, I ask unanimous consent that the gentleman from New York [Mr. ROWE] may proceed for 10 minutes on his amendment.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the gentleman from New York may proceed for 10 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. ROWE. Mr. Chairman, there are two separate bills to this measure before the House. One provides for a commission to regulate commerce on the high seas; in other words, to be a regulatory commission and have charge not only of destroying the wrongs that are committed by those carrying on commerce under the United States flag and foreign flags if possible. The other appoints a commission and gives them the

authority either to purchase or construct $50,000,000 worth of ships to be leased or sold to private parties or to be transferred to a company in which the United States has the controlling interest.

Now, I claim that these two principles can not be operated together by the same commission. Let us use an illustration; for instance, the chairman of this committee and many others on the committee yesterday and to-day talked of the operation of steamers and shipping lines to South American ports. Now, the Grace Co., way back in the early times in the history of this Nation, began the operation of sailboats first to the Pacific coast of South America. They have built up a large trade there. Now there are opportunities for starting other companies in that locality.

Now, think of this commission starting a corporation in which it has the controlling interest to send ships to one or more ports on the Pacific coast and South America and at the same time having the power to regulate all of the business of the Grace Co. The thing would be almost exactly parallel if this House should vote to give to the Pennsylvania Railroad Co. the regulation of all the transportation by rail between the Atlantic and the Pacific coasts so that they could say to the New York Central, the Baltimore & Ohio, and the Erie roads what their rates were to be and how they were to do their business, and what was an unjust and a wrong practice in railroad matters.

I hold, gentlemen, that the commission to be appointed under this bill should be regulative; it should be helpful in the building up of the commerce of the United States on the high seas. It should not be competitive and destructive of our commerce.

Now, Mr. Chairman, there is no country in the world of any importance that owns its own ships. It is true that Brazil owns a line to the United States, but that line to the United States was established not because Brazil wanted the ships but because she had to take the ships for a debt, and they are still operating that line. It is a small item in the commerce of Brazil, and it has up to the beginning of this war, as the testimony shows and as you will find in our evidence, been operated at a great loss.

Mr. Chairman, it has been argued here, and it was very extensively discussed before the Merchant Marine Committee, that it is necessary to do this in order that the United States Government might have the necessary transports and auxiliaries. England has no steamships of its own, Germany has no ships of its own, France has no ships of its own, and yet England has the finest transport service and auxiliary service in this war that any nation at any time has ever had in any war. It is not necessary, gentlemen of this committee, that we should own ships in order to have transports and auxiliaries to care for our Army and our Navy.

Now, the people do not want this. We have had frequent reference from the chairman of the Merchant Marine Committee and from many others to the vote taken by the Chamber of Commerce of the United States. I would like to call attention to that vote, which contains some very interesting figures. This, by the way, is all within the minutes taken before our committee and is contained in the minutes. Take the State of New York, for instance, in the matter of Government ownership and Government operation. There is 1 vote for it and 106 votes against it. Take in the matter of Government ownership, but lease to private corporations, 1 vote for it and 108 votes against it. Take Missouri, the State of the chairman of the Merchant Marine Committee—7 votes for Government ownership and Government operation and 26 votes against it.

In Missouri, for Government ownership and lease, there were 7 votes for it and 26 votes against it. Take the State of our own President—the State of New Jersey—and in that State Government ownership and operation did not receive a single vote. And I would ask every man in this House to look at the civic bodies that voted on that matter. Not a single vote in favor of Government ownership and operation. There were 18 votes against it. And on the question of Government ownership, but leased to private parties, there was not a single vote in favor, but there were 18 votes against it.

Mr. BENNET. Will my colleague yield?

Mr. ROWE. Certainly.

Mr. BENNET. These votes were not cast by individuals but by chambers of commerce, were they not?

Mr. ROWE. They were cast by chambers of commerce and other commercial bodies.

Mr. BENNET. So that those 18 votes would represent memberships running into thousands?

Mr. ROWE. Yes; many thousands.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. ROWE. I yield.

Mr. MOORE of Pennsylvania. May I say to the gentleman that the Philadelphia Maritime Exchange, which is the leading maritime body of that great city, has voted against this and forwarded resolutions against the bill?

Mr. ROWE. Thank you.

Mr. ALEXANDER. Will the gentleman yield right at that point?

The CHAIRMAN. Will the gentleman from New York yield to the gentleman from Missouri?

Mr. ROWE. Certainly.

Mr. ALEXANDER. Is it not true that the National Bankers' Association was almost a unit against the Federal reserve act?

Mr. ROWE. I think it was.

Mr. ALEXANDER. And are they not now a unit for it?

Mr. ROWE. No.

Mr. ALEXANDER. Who are the ones that are opposed to it?

Mr. ROWE. The difference there is very great. These bodies are not shipowners. They are just organizations that are composed of the business men of the country.

Mr. REILLY. Will the gentleman yield?

Mr. ROWE. Certainly.

Mr. REILLY. Is it not a fact that that same body voted against the Glass currency bill before it was adopted?

Mr. ROWE. I think not. Anyway, it does not matter about that.

Mr. REILLY. They are against everybody.

Mr. ROWE. Now, let us consider the entire United States, and we find that there were 89 votes in favor of Government ownership and operation and 690 votes against Government ownership and operation. Now, as to the proposition of just plain Government ownership, 51 were in favor of it and 730 votes were against it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GREENE of Massachusetts. Mr. Chairman, I ask unanimous consent that the gentleman may have five minutes more.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent that the gentleman from New York may proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. ROWE. Mr. Chairman, there is another question brought up here, and it is a very serious one—the question of subsidies.

Mr. CLINE. Will the gentleman yield, so that I may ask for information? What action, if any, was taken by the United States Chamber of Commerce that met at Washington last winter on this subject? Does the gentleman know?

Mr. ROWE. They indorsed the former action of the chamber. The former president of the organization appeared before our committee and backed up this vote, and the president, who comes from South Carolina, by the way, has appeared twice before our committee and said that the organization stood absolutely for this vote.

Mr. CLINE. Was there any referendum taken in the organization with reference to that matter?

Mr. ROWE. It was a vote taken by ballot cast by the separate organizations, and is very much ahead of a meeting held here.

Mr. HARDY. Will the gentleman yield for a question?

Mr. ROWE. Certainly.

Mr. HARDY. Was it not also in evidence before us that in sending out these referendums at least some of the bodies sent them out with the recommendation that "you vote this way on this proposition and that way on that proposition"? Is there not definite testimony to that effect?

Mr. ROWE. Mr. Chairman, the gentleman is right and wrong; that is, his question might easily give a wrong impression. I think the United States organization itself in sending out the questions did not suggest in any way how the vote should be cast; and yet when it came to the local organizations they referred it in many cases to a committee, and the committee, after having passed upon it and after making up its ideas, sent it out among the individual members with the findings of the committee.

Mr. Chairman, I object to any more interruptions.

The CHAIRMAN. The gentleman declines to yield to further interruptions.

Mr. ROWE. Now, there is no need of this measure at this time. The shipyards of the United States are in business; the money of the people of the United States has gone in during the last 12 months in very great amounts—three or four times the amount we are talking of putting into the shipbuilding bill. As I said in my former address here, while there were 76 vessels building on July 1, 1915, there are now 316 building in American yards.

If the House of Representatives and the Congress of the United States will only leave the people alone or assist in this business, within 10 years we will have the greatest merchant marine in the world. [Applause on the Republican side.]

Mr. TOWNER. Mr. Chairman, as the gentleman from New York [Mr. ROWE] has said there are two propositions before the House for consideration in this bill. One to provide a commission to investigate and regulate shipping; the other to appropriate $50,000,000 to start the Government of the United States in the shipping business. As to the first proposition dissociated from the second there would be little opposition. The second proposition many of us oppose, because we believe it inexpedient, unnecessary, and dangerous.

The legislation was first presented with the idea that it would enable the Government to buy the German interned ships at reduced figures and place them at once in the over-seas trade. But that idea had to be abandoned, for one reason, because Germany would not allow them to be sold. Then, the proposition was urged as necessary to relieve the cotton situation in the South. The price of cotton was greatly depressed, and it was thought the Government ought to relieve the situation by furnishing the cotton growers cheap transportation. But while the legislation has been pending the price of cotton has gone up to a high and satisfactory figure without Government aid. Now, the proposition is advocated as a preparedness measure, as necessary to reduce transoceanic rates, and as the only possible way by which we can build up an American merchant marine.

NOT A PREPAREDNESS MEASURE.

Any proposition, weak in its appeal and indefensible on any other ground, can now be given a semblance of value if on any plausible pretext it can be urged as a preparedness measure. When this legislation was first proposed it was not thought of as a preparedness measure, and not until every other theory on which the proposition had been advocated had failed was the bill amended so that it might read, "for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve."

That part of the title of the bill is a misnomer, for the object of the bill is to create a board which shall be given $50,000,000 to buy or build ships with which the Government is to engage in the shipping business. As a reason therefor, all other reasons having failed, it is provided that in case of need the ships can be used by the Navy. The Government can take what American merchant ships it desires in any event in case of war, without buying them in advance. Besides, if the ships are intended as naval auxiliaries they should be controlled by the Navy and not by a shipping board.

It must be apparent that the use of the ships by the Navy is only an afterthought and entirely subsidiary to the main purpose.

If it were proposed to use some of the auxiliaries of the Navy in time of peace for commercial purposes, such a proposition would be worthy of consideration. The vessels to be used as auxiliaries of the Navy should be built for that purpose, and are provided for in the naval bill now pending. Some, and only some of them, could be used for commercial purposes in time of peace. But a merchant ship, built primarily for that purpose, must be reconstructed to its disadvantage as a merchant ship if it is to be used as an auxiliary ship of the Navy.

Besides, we have more than enough of that class now on hand which we acquired during the Spanish-American War. As the gentleman from Michigan [Mr. LOUD] well suggests we ought to be selling instead of buying that class of ships. We have 53 ships now in the Navy that could be used for commercial purposes. They are many of them old, and should be disposed of while prices are high. One of them, a collier, the *Justin*, we purchased during the Spanish-American War. It was second-hand then, and we bought it for $145,000. It was condemned for further use as an auxiliary a short time ago; was ordered sold, and appraised at $75,000. The Government sold it to the highest bidder a short time ago for $301,070. It is a good time to sell. I agree with the gentleman from Michigan [Mr. LOUD] that every one of these old ships should be sold now when prices are good so they can be at once placed in the carrying trade. Or we could begin the experiment of the Government operating in the shipping business by putting them in commission as merchant ships. But the majority will consider neither the selling of the old ships which have outlived their usefulness as auxiliaries nor of using them while they last in commerce.

It should be said in passing that within the last few years we have built for our Navy the best fleet of colliers in the world, 14 in number, of 10,500 and 7,500 tons capacity, with a total tonnage of 132,000.

NOT A RELIEF MEASURE.

It is asserted by the advocates of this bill that it should be passed as an emergency relief measure, to furnish needed additional ships, and by thus adding competition to reduce rates.

There is no doubt a shortage of shipping occasioned by the European war. Great Britain alone controls one-half of the world's shipping, and 57 per cent of all her ships have been withdrawn from general business on account of the war. France and Italy have requisitioned large numbers of their ships. The great German fleet has been driven from the seas. There is unquestionably a great demand for more ships at this time.

Can we relieve this situation by taking $50,000,000 from the United States Treasury and building or buying ships with it? Suppose we contemplate a building program. The Government yards will be taxed to their utmost capacity with the building of additional warships. No merchant ships can be built in them. Suppose we attempt to have them built in private American shipyards. We find that all such yards are now engaged to their utmost capacity, and can not take any additional orders for completion within two years. We find all American plants have been enlarged, abandoned plants have been revived, and new plants have been established to meet the present extraordinary demand. At the beginning of the present month there were 368 steel merchant ships in process of building in the 32 private shipyards of the United States. This is three times the number that was ever at one time under construction in the country before the war.

We can not build in our own navy yards, and all our private shipyards are working night and day to their full capacity, so that we could not secure new ships either by building or under contract in less than two years.

But it is said we can buy them abroad under the terms of this bill. That is true, so far as the terms of the bill are concerned. But we find the same conditions exist everywhere. All private yards in the world are working overtime to fill orders at high prices to meet the present world-wide demand.

There is nothing left but to buy ships. It must be apparent that the present time is not a good time to buy ships. No other thing of merchantable value is so high. I have already called attention to the sale of the *Justin* at many times its value. Another instance may illustrate conditions. The steamer *Robert Dollar* was built 10 years ago at a cost of $250,000. It was sold a few weeks ago for $1,300,000 cash. Anything that will float and carry a cargo will command an exorbitant price to-day.

To buy now would be folly when vessels sell at five times their cost. Probably within a year the European war will end. When that time comes, the thousands of merchant ships now tied up by the war will be released to engage in the world's commerce. Vessels then will sell for a song that now will bring a fortune. Rates that now are mountain high will drop to the lowest point ever reached under the immediate and intense competition. If we invest now, we will have sunk $50,000,000 in the most foolish and unbusinesslike project ever suggested.

And all to no purpose. We can not add one single ship to our American merchant fleet within two years by building, and then there will be thousands of ships begging for trade. We can not add a ship to commerce by buying those already engaged in commerce. If a ship is already engaged in American trade, it would not help American trade to buy it, whether owned by foreigners or Americans. To buy a foreign ship to transfer it to American trade would be foolish as a business proposition, and is made impracticable by the fact that nearly all the European nations—Great Britain, France, Germany, Austria, Sweden, and others—have placed an embargo forbidding the sale of all ships under their flag.

We hear much about the exorbitant rates now charged for trans-Atlantic transportation. With the warring powers willing to pay any price for quick delivery of war material, high rates are inevitable. To expect that high prices for products can be secured and maintained and low prices for transportation prevail is absurd. The southern supporters of this bill are eloquent about what an increase in the price of cotton would accrue to the growers if they could only have the low rates now that prevailed at the opening of the war. Their logic would be strained if they were required to explain why the price of cotton has risen coincident with the rise in rates. In other words, the higher the rates the higher the price of cotton has gone. The same causes, of course, operate on both, viz, the increased demand.

The extraordinary demand for shipping will cease with the war, both because there will not be such an amount of goods to ship and because there will be released for competitive commerce about one-third of the world's ships now tied up on account of the war.

AN AMERICAN MERCHANT MARINE.

Our people are united in the desire to build up an American merchant marine. We are not only materially injured, but we are humiliated by our dependence on and subjection to foreign control of our own commerce. Nine-tenths of our overseas trade is carried in foreign ships. We can not send our own products in our own vessels. We can not transport American citizens under the American flag to foreign lands. We can not even forward the United States mail in our own ships. We pay from $200,000,000 to $300,000,000 annually to foreign shipowners for carrying American passengers and products. It is not comforting to realize that as our productive capabilities increase our dependence on foreign transportation of our commerce increases. In case of a war in which we should be involved our position would be not only dishonorable, it would be dangerous. There can be no doubt we need and must obtain an American merchant marine.

The imperative necessity of taking some action that will bring our shipping under our flag makes it the more necessary that we should carefully consider the problem, that we may act wisely in the initial steps of the great undertaking.

In the earlier years of the Republic we carried 90 per cent of our foreign commerce. Under varying conditions we managed to control a preponderance of our foreign trade for more than half a century. As late as 1856 we carried 75 per cent of it. For reasons which can not now be adequately discussed, we lost control of our foreign commerce during the Civil War. We have never regained it. We now carry less than 10 per cent in value of our foreign trade.

In the meantime the over-seas commerce of the world has grown to vast proportions. The oceans, instead of being barriers, have become the great highways of commerce. It is easier and cheaper in ordinary times to transport a cargo of grain across the Atlantic than across the State of Texas. One may travel from New York to Liverpool as quickly, as cheaply, and with more comfort than he can from New York to San Francisco.

There are now over 30,000 registered vessels engaged in the over-seas trade. Great Britain alone has over 12,000 merchant ships. In 1915 the United States had 680 vessels engaged in foreign trade. Before the war Great Britain carried 54 per cent of our foreign commerce. Germany carried 12 per cent. Less than 9 per cent was carried under our own flag.

The world's ocean tonnage is about 50,000,000. Our total tonnage engaged in the foreign trade is about 1,000,000.

It costs now about $100 per ton to build freighters. It costs $200 per ton to build combined passenger and freight ships. With $50,000,000 we could build, if we could find a place to build them, 50 freighters of 10,000 tons capacity. We could build 25 freight and passenger ships.

It must be manifest that the addition of 50 ships to the world's 30,000 can have but little influence on rates. It is evident that an addition of 500,000 tons to the world's tonnage of 50,000,000 can have no appreciable effect, except to discourage individual enterprise.

To dominate our foreign commerce we should control at least 60 per cent of it, and that would require at least 600 ships of the first-class freight type and would require an investment of $600,000,000. The building of 50 ships—all that could be obtained under the present bill—would be but a weak commencement of such a program.

Of course, nobody contemplates such a program. But if we do not intend to carry out the plan, why enter upon it?

GOVERNMENT OWNERSHIP.

In this debate there have been two lines of argument offered in defense of this Government-ownership proposition. One is that everything else has been tried and has failed, and there is nothing left but Government ownership; the other is that under the terms of the bill Government ownership is to terminate within five years following the close of the war.

The launching of the Government of the United States in the shipping business is a most remarkable proposition. No other nation of the world has been so foolish as to attempt it. Germany has experimented with Government ownership of railways, France of telegraphs, England of telephones, but none of these great centralized Governments has ever ventured to attempt developing a merchant marine by Government ownership.

It is a subject of wonder why some gentlemen seem so enamored with the Government-ownership idea. The Government never has and never can engage in competitive business without disaster to the business in which it engages and loss to itself.

The Government-owned railways of Germany, where Government efficiency is carried to the highest degree, before the war paid $7.86 a week for their labor, and charged 1.42 cents per ton per mile for carrying freight.

In the United States in 1913 the railways paid $15.86 a week for their labor, and carried freight for seventy-two one-hundredths of a cent per ton per mile.

It has been stated here as an instance where Government ownership has been justified that the Government is now making its own powder cheaper than it could buy it of private producers. True, but the Government is not going into the powder business to compete with its own citizens in the open market. That is what is proposed in this bill. It is proposed that the Government shall go into the shipping business to compete openly with its own citizens for business. In the first place it desires to have its citizens invest their money in the business, and then it goes into the business to compete with them. And in this case there is not even the excuse that the Government is itself directly interested. It is not shipping grain, or cotton, or merchandise.

The effect on rates of putting 50 ships in commission operated by the Government would be little if that were the limit of the Government's interference. But the effect on further investment and the further development of an American merchant marine can not but be injurious. Just at this time when American investors are interested in this as a promising line of industrial activity, to say to those contemplating entering it that if you do you must be prepared to compete with the Government is discouraging, to say the least.

The effect of this Government entering into competition directly in the business would likely be to drive every American-owned vessel under a foreign flag. If the Government-owned ships operate at less prices than the privately owned ships, the latter would be forced to go where operations are cheapest, and that is confessedly under foreign flags.

The impression is sought to be conveyed that the Government will not go further than this bill authorizes. If that be true, the action is unwise, for the addition of merely 50 ships will not materially lessen rates or supply demands. At the same time such action will operate as a discouragement to private investment, and thus injure rather than encourage the building up of an American merchant marine.

If, however, this is but a commencement, and the Government itself is to supply an American merchant marine, then our people must contemplate the investment of from $600,000,000 to $1,000,000,000 instead of this paltry $50,000,000, for that is what will be required to furnish even 60 per cent of our foreign commerce.

All this has been considered by thoughtful Members of the majority before, and was sufficient to defeat the proposition in the last Congress. But these gentlemen it seems have been placated by the provision in the present bill that limits governmental operation to five years after the close of the present war. In view of the fact that it is perfectly clear that no temporary action of this kind can have any beneficial effect, and that the only result that can be anticipated would be to discourage rather than to build up an American merchant marine, it is difficult to see how these men can justify their present support of a bill which at this time is less needed than ever before and which still retains the fundamental defects of the other bills.

It requires only a slight consideration of the operation of shipping business under Government control to determine its utter impracticability.

It is proposed to put 50 ships belonging to the Government into operation. From what ports are they to sail? There are more than 50 ports on our seaboard. Is one ship to be assigned to each port, or are 64 per cent to be assigned to New York? Two views may be given. If the Government boats offer cheaper rates the shippers will demand them, and the private shipowners will try to prevent their competing with them. Which will prevail? What are the influences that will determine the placing of these ships? Can it be done without political favoritism? Can it be done without fraud and scandal?

And where are these ships to be sent? To Europe? If so, to the ports of what nation—England, France, or Germany? Or are they to be used to build up the trade with South America? Is it proposed to send them to China or Japan? What proportion is to be assigned to our eastern, western, and southern trade?

And what are to be the rates? Are they to be always lower than prevailing rates, or only lower when prevailing rates are too high? And on what classes of goods are preferences to be made? What particular classes are to be favored? Is cotton or corn to get the best of it?

These and numerous other like questions will have to be determined, not on their merits, but upon grounds that will, it

is believed, strengthen and sustain the administration. Political reasons, always and only these, must necessarily control this board. It is not like the Interstate Commerce Commission, a court that is to hear and determine causes impartially. The board is itself to be engaged in the business. It is itself to engage in the trade wars of the future. And the anomalous condition is to be established by this bill that the board is to engage as a competitor in the shipping business, and at the same time is given power to make rules to regulate and control its private competitors. What an encouragement is here offered to our citizens to build up an American merchant marine!

SUBSIDIES.

Granting that the administration is desirous of doing something toward building up an American merchant marine, it is improbable it would ever have indorsed the present indefensible proposition if it had not been for its terror of anything that might be labeled a subsidy. It is not the substance that is feared, but the name. The party is perfectly willing to support the essential, but it shrinks at the appellation. The administration still carries the subsidy for carrying the mail in its appropriations, and its tariff bill provided for a 10 per cent discrimination in favor of American ships, both admitted subsidies. Still the Democrats vehemently assert they are opposed to subsidies of every kind and character.

This proposition is a subsidy, pure and simple. It is, in fact, subsidy raised to the *n*th degree. It is subsidy in the superlative. Subsidy is defined as "a grant of money to a person or industrial scheme considered as beneficial to the public." It is pecuniary aid from the Government. In this case the Government takes $50,000,000 of the people's money to aid a corporation in which individuals are asked to invest, for which the Government is to furnish the credit, and to which it is to subscribe most of the capital. Or it proposes to buy ships and lease them to private parties on more favorable terms than they could otherwise be obtained. It does not require argument to show that this is subsidy in every requisite of the definition.

The Democratic Party has officially declared its purpose with regard to this matter. In 1908 the Democratic platform declared for the "upbuilding of the American merchant marine without new or additional burdens upon the people, and without bounties from the Public Treasury." The imposition of $50,000,000 is a considerable "burden upon the people." The present bill is in direct contravention of the statement that whatever was done to build up an American merchant marine it should not be done by bounties taken from the Public Treasury.

Again in 1912 the Democratic Party declared for building up a merchant marine, but declared it must be done without imposing additional burdens upon the people and without bounties or subsidies from the Public Treasury. This bill proposes to take $50,000,000 in one tremendous bounty from the Public Treasury, but its advocates declare on the floor of the House that the only advocates of subsidy in the country are Republicans.

However, at this time there is no need to discuss the policy of subsidies. At this time there is no necessity for subsidies, either of the bounty character or of the Government-ownership variety. Everything and more is being done now in building up an American merchant marine than could be secured by the most liberal subsidies. If as a result of subsidy legislation every private shipyard in the country had more than doubled its capacity; if new yards were being established almost every day; if more capital, more workmen, more energy were employed than was ever before known in the history of the Nation; if 368 new steel merchant ships had been placed on the ways, it would have been an ample vindication of the action. And yet all that and more has been accomplished without one cent of subsidy. Private enterprise has done everything that could be done without Government aid. What, then, is the necessity for this belated, unnecessary action? Why, this reckless, wicked waste of the people's money, that is needed so much for necessary things, that can not accomplish its avowed purpose, that can not add one ship to our merchant marine, not send one additional cargo from our ports?

WHAT CAN BE DONE.

While at present conditions are favorable, and while now everything is being done that can be done to upbuild American shipping, we must not shut our eyes to the fact that it is not likely such conditions will long continue. Neither should we disguise the fact that American shipping will have heavy handicaps to overcome before it can be placed in a condition successfully to compete for even the carriage of our own commerce. The present war, which occasions both a shortage of available shipping and an extraordinary demand, can not long continue. Nearly one-third of the world's ships will at its close be released to enter the contest for the world's trade. If we could enter the contest on equal terms with our competitors, no American would fear the trial; but, unfortunately, we can not do so.

In the first place it costs more to build ships in the United States than in other countries. In the construction of a merchant ship, it is computed that nine-tenths of the cost is for labor. Labor is paid more in American shipyards than in others. An official report of the Department of Commerce, issued this month, states that in the shipyards of Japan there are now employed more than 40,000 skilled laborers, and that their wages average 34.9 cents per day. In Great Britain higher wages are paid than in any other shipyards in the world except in the United States. Yet their wages are less than half those paid in American shipyards. A comparison may be of interest showing the average weekly wage in both countries before the war:

Great Britain.

Blacksmiths	$9.84
Machinists	9.67
Joiners	9.50
Carpenters	9.88

United States.

Blacksmiths	$20.88
Machinists	19.38
Joiners	21.18
Carpenters	22.14

If, then, an American contemplates entering the shipping business he must start with the realization that he must pay from twice to ten times the labor cost that his foreign competitors will be required to pay.

Nor are operating expenses on a more favorable basis. I am indebted to the gentleman from Michigan [Mr. FORDNEY] for some very illuminating figures with regard to the comparative operating expenses of shipping. The labor cost of the *Yasama Maru*, a Japanese ship, carrying 36 men, was $795 per month, or $9,540 a year. The labor cost of the *Robert Dollar*, of practically the same size, operated under the English flag, with 47 men, was $1,308 per month, or $15,696 per year. The American steamer the *Algoa*, practically the same size, carrying 49 men, pays for labor $3,270 per month, or $39,240 per year. In other words it cost $29,700 more to run an American ship than a Japanese ship of the same size and type. It costs annually $13,550 more to run a ship of this type under the American flag than under the British.

Besides this, an American ship must undergo inspection every year at a cost of about $3,000. Its measurements cost is above $5,500 each year. The cost of subsistence is much larger also under the American flag. It requires more men to man a ship under our present requirements than is required by any other nation.

Several things have been proposed and some have been tried in an attempt to equalize conditions. It was strenuously advocated by Democrats that if free trade in ships was instituted and Americans were allowed to buy their ships in the cheaper foreign markets, the entire difficulty would be overcome. Accordingly they passed a free-ship bill. Not a single ship came under the American flag by the operation of that law.

Some bills passed during this administration instead of helping have greatly injured the upbuilding of an American merchant marine. The repeal of the act granting free tolls to American vessels using the Panama Canal was discouraging. The passage of the seaman's bill, while its declared purpose was good, has operated disastrously. It drove every merchant ship flying the American flag off the Pacific Ocean.

In the tariff act of October 3, 1913, a discriminative duty of 10 per cent, in addition to the regular duties, was imposed on foreign goods imported into this country in foreign vessels. This was a good provision, and undoubtedly would have accomplished much good. But the administration nullified the law and prohibited the collection of such duties on the ground that it violated our treaties, notwithstanding the fact that the board of general appraisers decided otherwise. It is to be regretted that this endeavor to test the effect of discriminative duties should have been thus prevented.

In 1789, immediately following the institution of our Government under the Constitution, a law was enacted under which a discount of 10 per cent was given on all duties on imports brought to this country in vessels owned in the United States. On August 10, 1790, an addition of 10 per cent on the specified rates was made on imports brought in foreign vessels. This amounted to a preference of 20 per cent made in favor of American shipping. Under the operation of this law by 1810 we were carrying 90 per cent of our foreign commerce.

It is believed by many that the effect of such a law would be very beneficial in placing our commerce under the American flag. If modifications in our treaties are needed to enable us

thus to assist our own industries, notice should be given at once and such changes made.

Free tolls should be given to all American ships through the Panama Canal. If any changes in our treaty agreements are needed to secure this preference to American ships, such changes should be at once made.

We should offer bounties and prizes to such American ships as shall most efficiently and speedily carry the American mails to foreign ports. By limiting such prizes only to American ships we would encourage American enterprise, and by offering such bounties only for efficiency and expedition we would relieve such action from the taint of subsidy.

All harbor charges, pilotage dues, and other expenses of like character should be remitted to American ships. We should in every way foster and favor American shipping where legislation can aid it. We should impose no burdens upon it not necessary to secure and protect passengers, crews, and cargoes.

These things we can do if we are really desirous of building up an American merchant marine. These things are not political. They are not in any sense partisan propositions. They are American. They mean America first. They do not crook the pregnant hinges of the knee to secure foreign praise or favor. They are proposals to look after our own interests just as every other nation is looking after its own interests.

How different is it with regard to this bill. The real grounds on which it is now pressed are political not national. It is considered desirable that just now the administration should have $50,000,000 to spend as it pleases. We are on the eve of a presidential election. With this money the administration can buy ships or build ships as may be most advantageous. It can put them where they will do the most good politically. It provides places at high salaries for a large number of "deserving Democrats" who may need to be placated or satisfied. The money may be used to build up such particular ports or special industries as are most advantageous to the administration. It is a political measure pure and simple, and its passage will be a reproach and a disgrace to the party that forces its enactment.

Mr. ALEXANDER. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to proceed for 10 minutes. Is there objection?

There was no objection.

Mr. TOWNER. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

The CHAIRMAN. The gentleman from Missouri is recognized for 10 minutes.

Mr. ALEXANDER. Mr. Chairman, I esteem the gentleman from Iowa [Mr. TOWNER] very highly. There is just an imaginary line between our districts. He said it is impossible to have these ships built; that the American shipyards are being used now to their utmost capacity. Then in the next breath he says that we are proposing to take $50,000,000 out of the Treasury of the United States to build ships. Well, that is logical, I admit, with a reservation.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I do not want to yield at this point.

The CHAIRMAN. The gentleman declines to yield.

Mr. ALEXANDER. I decline at the present time.

Now, with reference to the referendum of the Chamber of Commerce of the United States, I wish to say that Benjamin J. Rosenthal, of Chicago, who is vice president of the National Business League of America, which is composed of some of the most distinguished business men in the United States, made this statement before our committee with reference to the referendum at Chicago:

> Now, I will tell you gentlemen exactly how this vote was arrived at, and to make assurance doubly sure I will mention the fact that I happened to meet Mr. Nickerson, who is a member of the association of commerce, and was one of the subcommittee of two. I met him last night at the New Willard Hotel.

This is a statement made on February 12, 1916. Mr. Rosenthal continues:

> He was here attending this conference of the United States Chamber of Commerce. I asked him, just to be sure, just how that vote was arrived at, and I will explain just exactly what he said, and that was my understanding. The request came to the executive committee; the executive committee referred it to a committee of two. Mr. Nickerson was one of that committee and Mr. Buchanan was the other. That committee of two had probably never even read the Alexander bill and did not know, perhaps, all of the provisions of it. This committee reported that they were not in favor of Government ownership, but in favor of some form of subsidy, and the executive committee indorsed this action of the committee of two, and it was sent to the National Association of Commerce, and in that way the National Association of Commerce attempts to bind an organization of 4,000 men.

That is the way the referendum was taken at Chicago. The correctness of that statement has never been challenged and I have never heard anyone question the fair reliability of Mr. Benjamin T. Rosenthal.

Now, with reference to the action of the Chamber of Commerce of the United States on two propositions in this bill, I said in my first statement that they had opposed Government ownership and operation of vessels.

On their ballot No. 2 the committee recommended the creation of a Federal shipping board to investigate and report to Congress regarding the navigation laws and to have full jurisdiction, under the law, in all matters pertaining to over-sea transportation. The vote was 639 votes in favor of the recommendation and 116 votes opposed.

On the fourth proposition the committee recommended that there should be legislation abolishing deferred rebates and providing for supervision of rates by the Federal shipping board, with requirements for filing with the board schedules of rates and all agreements among over-sea lines. There were 601 votes in favor of the recommendation and 130 votes opposed.

The Chamber of Commerce of the United States in referendum No. 9 on the ship-purchase bill accompanied that referendum with the report of the special committee of the chamber of commerce in opposition to the bill. I have no objection to that. I think that is entirely legitimate; but I say in every instance, in each referendum, these chambers of commerce had the recommendation of the special committee opposing this legislation or some features of this legislation. And it is only natural for these bodies to follow their recommendations, because that committee was composed of men of large capacity.

Yesterday I read into the RECORD a letter from Mr. William Harris Douglas, the chairman of that special committee, indorsing this bill and saying that he hoped it would become a law, and that quickly. I also read into the RECORD a letter from Thomas L. Sitt, of Chicago, another member of that special committee, indorsing this bill and saying that he was going to communicate with the officers of the national association with a view to having them officially indorse this bill.

I think the most harmful speech that could be made as affecting the upbuilding of our American merchant marine was made by the gentleman from Michigan [Mr. FORDNEY] yesterday, in which he exaggerated the difference in the cost of construction and operation of ships under the American flag as compared with ships under foreign flags. The Chamber of Commerce of New York in November last appointed a committee to consider this merchant marine question and particularly to hold an inquest on the Alexander ship-purchase bill. At the regular meeting on November 5 the president announced the appointment of this special committee: Irving T. Bush, president of the Bush Terminal Co.; William Harris Douglas, whose name I have just mentioned; George S. Dearborn, late president of the American-Hawaiian Steamship Co.; Jacob W. Miller, and J. Temple Gwathmey.

That committee made a report at a special meeting on January 14, and I want simply to call attention to some of the parts of that report referring to this difference in cost of construction, one serious handicap to the investment in merchant-marine property.

> The steamship man must obtain his capital for American ships from American investors. The American investor knows little of the value of securities of steamship companies beyond the repeated statements in the public press that it costs 40 per cent more to operate an American vessel than one owned abroad, and that, consequently, competition is impossible without a heavy subsidy.
>
> These statements are not calculated to attract American capital to vessel securities.

Again—

> At the outset it must be recognized that one of the most important parts of this problem is to satisfy the investing public that they can safely buy bonds secured by vessel property. Otherwise the steamship man is helpless, and can do little to restore our shipping, no matter what inducements may be held out to him.

This bill provides that this board shall investigate securities on vessel property with a view to making them safe. Again—

> We desire first to point out that there has been a general misunderstanding of the added cost of operating American vessels as compared with the same vessel under a foreign flag. It has been frequently stated, and generally accepted, that the operation under the American flag will cost from 40 to 50 per cent more. We believe this percentage should be applied to wages alone, for the cost of fuel, supplies, insurance, and upkeep is substantially equal for the same vessel in the same trade regardless of flag.
>
> On passenger ships, where the wage item may be a larger percentage of the total operating cost, the difference in favor of foreign vessels is somewhat greater, but with strictly freight carriers your committee is informed that the disadvantage under which American tonnage must labor is 5 and 10 per cent of the total operating cost. Even in passenger vessels of a type suitable for South American trade, the disadvantage probably does not greatly exceed 10 per cent.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ALEXANDER. I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. ALEXANDER. I wish to read further from this report:

As we have pointed out, the item of wages on vessels of this character represents a smaller percentage of the total operating cost, and the disadvantage under which American vessels labor is in the neighborhood of 5 per cent of the total operating cost. Under conditions existing in the past, even this difference would prevent the engaging in foreign trade of American tonnage, but it is the conviction of your committee that conditions will not again be normal for a number of years, and that if credit machinery be created to enable the steamship men to finance American steamship enterprise sufficient inducements will exist to assure the construction of a substantial tonnage of freight vessels without the payment of subsidy.

Now, Mr. Bush, discussing the report of the special committee on the merchant marine in the foreign trade, from which I have quoted extracts, at a meeting of the Chamber of Commerce of New York, when the report was up for consideration, had this further to say with reference to the difference of cost of operation of vessels under the American flag and under the foreign flag:

The American steamship man, if he has to operate a ship under the American flag, must get his money from the American investing public.

* * * * * * *

The American public is unacquainted with it, and if we gave a substantial subsidy to establish an American merchant marine it is questionable if any amount of capital could be interested in it, because it is stated it costs 40 per cent more to operate vessels under the American flag than under the foreign flag.

I should like to say one word on that difference of cost. It may be that some of those gentlemen who have been advocating subsidies in the past have made such a good case that, perhaps, they have created too good a case for themselves at the present time. I do not think that it differs anything like 40 per cent; I do not think it does cost anything like 40 per cent more to operate freight vessels under the American flag. In fact, I think all of the committee, with the possible exception of one gentleman, are convinced that the difference in cost is very much less. In order to get some light on this subject I asked a steamship man in this port to have taken off from his books the exact cost of operating a vessel under the English flag prior to its passing through the American registry on a certain voyage and the exact cost of operating that same vessel under the American flag. We must recognize there is a great difference in the class of voyages. In vessels en voyage to Europe, a distance of 3,000 miles, the question of wages bears a much smaller percentage to the total operating cost than it does on the longer voyage at really a midway point, to the River Plate, which, I think, takes about 22 days. I asked him to get those figures for me without in any way discussing whether there was a difference of 5 per cent, or 10 per cent, or 25 per cent. I have in my hand the figures given me on a vessel of 3,000 tons net registry, which carried 7,400 tons, weight measurement, to the River Plate, and came back with a cargo of 6,800 tons of grain. I will not attempt to read all the details. There are freight charges at both ports, coal, wages, oil, vitroline, etc., left out of this; also the question of interest on property, the question of insurance, and any question of the commissions at the ports. Curiously enough it figured out that the total cost of such a round-trip voyage, which occupied about 22 days down, the loading there, and the return back, altogether about a three-months' period, was $40,760 under the British flag and $42,800 under the American flag.

This is an exact statement of the same vessel making the same voyage under the two flags, and it was worked out really with the idea of getting at the facts. That meant in this particular class of vessel, which did not carry passengers, a difference under the American flag of just about 5 per cent. If we had included any of the cost of dry dock and repairs, the insurance, and the commissions to the brokers and the agents at each end, it would be even less than 5 per cent. I therefore think that the statement which gives 40 per cent is entirely exaggerated, and we are within very conservative lines in stating that it will not be certainly more than 10 per cent, and the average would be somewhere between 5 per cent and 10 per cent, depending on the character of the cargo and the length of the voyage.

The estimate of difference in cost of operation of vessels under the American and under foreign flags may be too great or it may be too small. There is a wide difference of opinion on the subject. The point in his statement to which I wish to give emphasis is that we do not accomplish any good purpose by exaggerating the difference, the only effect of which can be, as Mr. Bush points out so clearly, to deter American capital from investing in vessel property.

GOVERNMENT OWNERSHIP AND OPERATION OF RAILWAYS IN GERMANY V. PRIVATE OWNERSHIP AND OPERATION OF RAILWAYS IN THE UNITED STATES.

The gentleman from Michigan, Mr. FORDNEY, also presented some figures to show that the carriage of freight per ton-mile on the Government owned and operated railways in Germany is much higher than on the privately owned and operated railways in the United States, although the wage scale for railway employees here, and operating costs in general, is much higher than in Germany. The gentleman from Michigan did not produce any evidence to show that the railways in Germany are not operated with as high a degree of efficiency under Government ownership as in the United States under private ownership; or that the higher cost per ton-mile for carrying freight on German railways is the result of mismanagement and lack of skill and efficiency and economy of management. He would have us assume that the higher cost is the result of this lack of skill, efficiency, and economy, based alone on the higher cost per ton-mile to carry freight on German railways, as compared with our railroads.

I have not had occasion to investigate this subject with any great care, but my understanding is that statisticians generally have rejected the ton-mile price as a basis of comparison between transportation on American railways with their long hauls and transportation on German railways, with their comparatively short hauls.

When we take into consideration that the cost of loading and discharging and the interest on terminal investments enormously increases the per-mile cost of German transportation, the futility of any comparison made on this basis is apparent.

If the gentleman wishes to make any effective argument against Government ownership, he is unfortunate if he can not find a better illustration than the German railways.

AUTHORITY TO PURCHASE MERCHANT VESSELS "ELSEWHERE."

Stout objection is made to the following provision in section 5 of the bill: "That the board, with the approval of the President, is authorized to have constructed and equipped in American shipyards and navy yards, or elsewhere, giving preference, other things being equal, to domestic yards," and so forth. It is insisted that the board should have the vessels provided for in the bill built in American shipyards; that "elsewhere" should be struck out of the bill. It is my desire that all the vessels provided for shall be built and equipped in American shipyards, yet, I do not think it would be wise to limit the power of the board in that regard.

If the difference in cost of construction in domestic shipyards is so much greater than in foreign shipyards, as contended by some of the gentlemen on the other side, it would be manifestly unfair to the American taxpayer to so limit the power of the board.

The bill expressly provides that foreign-built vessels heretofore or hereafter admitted to American registry or enrollment and license under the act of August 18, 1914, or under this act may not engage in the coastwise trade of the United States, except that such vessels may engage in trade with Alaska, Hawaii, or Porto Rico if the board finds such trade is not being adequately served by a regular line or lines of vessels.

The Panama Canal act, which contained a provision admitting foreign-built vessels to American registry if owned by American citizens, became a law under the administration of President Taft.

The act of August 18, 1914, referred to was passed through the House under a suspension of the rules, and, as I now recall, without opposition.

It may well be claimed that it has become the settled policy of the Government to admit foreign-built vessels to American registry if their operations are limited to the foreign trade. This bill goes no further, except to provide that if the trade to Alaska, Hawaii, or Porto Rico is not being adequately served these foreign-built vessels may be employed in those trades.

As I have said, it is my wish that all these vessels may be built in American shipyards, and I believe they will be built in American shipyards. There is no good reason why it may not be done at this time and for years to come.

Wherein is the provision different in principle to the provisions of a joint resolution passed by Congress in 1906, under a Republican administration, providing for the purchase of material and equipment for use in the construction of the Panama Canal? That joint resolution is as follows:

Resolved, etc., That purchases of material and equipment for use in the construction of the Panama Canal shall be restricted to articles of domestic production and manufacture from the lowest responsible bidder, unless the President shall in any case deem the bids or tenders therefor to be extortionate or unreasonable.

FREE SHIPS.

The free-ship policy has long been pursued by Great Britain, Germany, France, the Scandinavian countries, the Netherlands, Belgium, Spain, Portugal, Greece, Japan; in fact, by nearly every country except the United States.

Mr. EDMONDS. Mr. Chairman, I would like to call the attention of the House to the fact that during the argument made here we have had quite a number of gentlemen who have used figures showing that the American trade in American vessels has been decreasing. As a matter of fact, American trade has been increasing since 1880. Gentlemen have used the figures of the value of the cargo as a basis for their figures showing that the American trade has decreased. If they had used the tonnage figures on American trade carried in American vessels, they would have found that in 1880 19 per cent of our trade was carried in American vessels. To-day 29 per cent is carried in American vessels. This increase has been noticeable

since 1900, and, in fact, has increased very rapidly in the last five or six years. In 1910 we carried 22 per cent of the foreign trade in tonnage, and in 1915 we carried 29 per cent of foreign trade in tonnage. We carried 17,000,000 tons in 1910, and in 1915 we carried 26,693,000 tons.

The trade in foreign ships has decreased equal to that percentage, and their increase in the last six years has only been 4,000,000 tons, while in our ships it has been 9,000,000 tons.

I think we are mistaken when we take the money value of cargoes and use that as a basis for saying how much we ship in American ships. As a matter of fact, the American marine is taking care of itself by increase every year, and if you look up the record of tonnage, we are doing more business every year since 1880; and therefore Government aid and Government operation at the present time would be only a detriment to those gentlemen engaged in building up the business.

Take the report of the Department of Commerce, and you will find that 26,000 tons of new ships have been entered in the last few weeks—new ships completed in 1916—and have gone into the trade in this country. You will find that during April the shipyards have taken on 51,000 tons of new tonnage, which they are ready to complete. You will find that there has been an increase in the shipbuilding facilities of this country equal to any country in the world at any time in its history. We have eight shipyards now on the Delaware River instead of three a few years ago. They are building on the Delaware as many ships as Japan can build in all of their shipyards.

I do not think, gentlemen, it is a good time now to inject any Government operation into the situation, as provided for in this bill, if we expect to keep up the increase of tonnage we are now experiencing in our merchant marine. [Applause.]

Mr. OGLESBY. Mr. Chairman and gentlemen of the committee——

Mr. MOORE of Pennsylvania. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN (Mr. ADAMSON). The gentleman will state it.

Mr. MOORE of Pennsylvania. Has the time agreed upon expired?

The CHAIRMAN. The Chair is not advised that any agreement as to time was made. Since the present occupant of the chair has been in the chair more time has been occupied on that side than on the other.

Mr. OGLESBY. Mr. Chairman, if I believed that the shipping board created in this bill would operate these vessels except as a last resort, I should not vote for the bill. I want to say, however, that I do not believe it would be wise to tie the hands of the board so that they may not operate the vessels in any contingency. We are all agreed that one of the best things that could happen in this country is the building up of a merchant marine so we can control the means by which our goods and wares can be taken to the markets of the world and at reasonable rates for its transportation. We have not that means at present. The present activity in shipbuilding is unquestionably due to the enormous rates for freight caused by the withdrawal from commerce of vessels that belong to the countries engaged in the European war.

We are all also agreed, or everybody that I have conversed with on the subject assents to the proposition, that it is practically impossible for us to build up a merchant marine except by some kind of Government aid. The question is to determine in what manner such aid should be given. The nearer we can come to devising a plan by which the Government may extend such aid as would result in the building up for us of a merchant marine ample for our requirements, and without cost to the Government or injury to private enterprise, the nearer we shall arrive at an ideal solution of the problem. The menace to private enterprise lies in the possibility of Government operation. Eliminate this—there is scarcely a possibility that the power will ever be exercised—and the plan here presented, if not ideal, will, in my opinion, come vastly nearer to a satisfactory solution of the problem than any I have ever heard proposed.

Mr. MEEKER. Will the gentleman yield?

Mr. OGLESBY. Yes.

Mr. MEEKER. Does the gentleman believe that private investors in this country lack about $50,000,000 of having enough to start the proposition if they have the proper law?

Mr. OGLESBY. Oh, no.

Mr. MEEKER. Then why do we vote the money?

Mr. OGLESBY. This is what I have in my mind to explain, and I believe the plan entirely feasible. The main items of excess expenditure required for operating vessels of American ownership and registry over that of foreign owners are wages and food. Greater initial cost has also been a handicap, but such difference is rapidly approaching, if, in fact, it has not already reached, the vanishing point. The food and labor cost on a typical ship of American registry of 5,000 gross tons' capacity is less than $50,000 per annum. Operated under an English, French, or German registry the average cost would be at least 70 per cent of the cost under American registry. So that the total difference in these main items of expense can not exceed $15,000 between such a vessel operated under our flag and under the countries named. If the difference in initial cost be practically eliminated, it would then only be required to aid the man operating under American registry to the extent of balancing this difference in cost for wages and food.

Private capital will not invest in any commercial enterprise that does not give promise of a fair investment return and in addition thereto such added sum as will be deemed adequate by way of insurance for the risk involved. In my judgment, the promise of a return approximating 8 or 9 per cent would be required to induce private capital to embark upon a commercial enterprise of this character. But we will assume a minimum rate of 7½ per cent will be demanded for private capital invested in privately owned vessels.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. OGLESBY. Mr. Chairman, I ask unanimous consent to proceed for five minutes. I have not so far taken up any time on this subject.

The CHAIRMAN. The gentleman from New York asks unanimous consent to proceed for five minutes longer. Is there objection?

There was no objection.

Mr. FESS. Will the gentleman yield?

Mr. OGLESBY. Yes.

Mr. FESS. I understood the gentleman to say that if he thought the board was to operate the ships he would not favor the bill.

Mr. OGLESBY. Yes.

Mr. FESS. If that is not the purpose, why does the bill say that the Government shall never be a minority stockholder?

Mr. OGLESBY. Oh, well, if the Government is a majority stockholder it can lease the vessels to men who will operate them, and if it is a minority stockholder it could not. The Government can build ships with money which costs not more than 2½ per cent. Private capital will demand at least 7½ per cent, so there is 5 per cent in favor of ships built with Government money.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. OGLESBY. I hope the gentleman will excuse me until I develop this. If such a vessel as I have suggested, and which is estimated to cost approximately $300,000, is built by the Government and leased to an operator at a rental sufficient to repay to the Government its interest outlay on the money required to build the vessel, say 2½ per cent plus whatever is necessary to amortize the investment, the operator of such a vessel would secure an advantage of at least 5 per cent per annum on the original cost of the vessel over the operator whose vessel has been built with private capital, to wit, $15,000, and substantially equalize the difference in cost for wages and food under American registry and that under a registry in European countries with which such operators will have to compete.

Mr. EDMONDS. That would be a subsidy, would it not?

Mr. OGLESBY. If you call it a subsidy; yes. It would be a subsidy which would not cost the Government of the United States one cent, but will place our operators here on a parity with the people owning and operating ships in foreign countries.

Mr. EDMONDS. Well, it would still be a subsidy.

Mr. OGLESBY. I suppose any Government aid to the owner or operator of a ship may be called a subsidy if you choose.

Mr. BENNET. Will my colleague yield for a question?

Mr. OGLESBY. Certainly.

Mr. BENNET. My colleague said the Government ought to go into the shipping business because it could get money at 3½ per cent.

Mr. OGLESBY. No; I did not say that.

Mr. BENNET. Well, 2½ per cent.

Mr. OGLESBY. I did not say the Government should go into the shipping business.

Mr. BENNET. That is the argument for building these ships.

Mr. OGLESBY. The gentleman misunderstood me.

Mr. BENNET. I think not. If that is so in reference to ships, why is not that so with reference to elevators which are built in the gentleman's district?

Mr. OGLESBY. Because the people who build those elevators have managed to do a very good business and amass very comfortable fortunes for themselves through their own enterprise without any Government aid; and if it were pos-

sible with private capital and with private ownership to build up a merchant marine to carry our goods to foreign ports, I would never advocate the Government extending aid for that purpose.

The CHAIRMAN. The time of the gentleman has expired.

Mr. OGLESBY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman? [After a pause.] The Chair hears none.

Mr. SMITH of Michigan. Mr. Chairman and gentlemen of the committee, I am very much in favor of an American merchant marine. If I were to name this bill, I would name it a bill to discourage American shipbuilding. There is just one way now to get a merchant marine in this country, and no other way, and that way is by doing just what other countries do, and a country never did it in any other way. You can not build a ship and compete with foreign nations where you pay 25 to 50 per cent more for building a ship in this country than you would in other countries. You can not build a ship here upon 6 or 7 per cent money on one-half its value if you can get a loan on it at all, when the English Government will furnish money at 3½ per cent and 4 per cent upon three-fourths of the value of the ship. You can not operate that ship by American seamen and pay our seamen $60 to $75 a month, where other countries pay their seamen $7, $8, $9, and $10 a month. That country will draw the commerce of the world which does it the cheapest. There is no question about that, and this is no new thing. The United States was the first country in the world, I think, to give a discriminating duty of 10 per cent on goods imported in American ships. It ran along until we had to make a treaty; I do not know but what it was all right to make that treaty. We agreed with 30 nations that we would not make any discriminating duties against them if they would not make one against us. It sounds strange to me that one after another of you gentlemen on that side stand up here and excuse yourselves from making an argument, because you say you have not the time after you voted for a gag rule to limit the time. [Applause on the Republican side.] It sounded very strange to me also, my friends, that one of the most distinguished gentlemen in this House will stand up here on the floor and say that he was steeped and saturated with a desire for a merchant marine and make nearly his whole argument upon the fact that he always fought against it tooth and nail from first to last every time it came upon the floor of this House when the Republicans were in power.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. SMITH of Michigan. I will.

Mr. MOORE of Pennsylvania. Referring to the matter of time and the inability of gentlemen to offer amendments to this bill, does the gentleman know that we must vote under the rule at 4 o'clock on this bill, in which there are 27 pages, and that we have only read to page 4?

Mr. SMITH of Michigan. I know that very well.

Mr. MOORE of Pennsylvania. Does the gentleman know that we have heard members of the committee themselves complain that they had not time here to discuss their own proposition?

Mr. SMITH of Michigan. Certainly I do.

Mr. SABATH. Was not a majority of that time taken up yesterday by the Republican side that did not do anything but filibuster to kill time?

Mr. MANN. There is no sense in that statement.

Mr. SMITH of Michigan. No; we have not filibustered a minute; we have fought for time all the time and are fighting for time yet and now and are denied it.

Mr. SABATH. That is what I say. There is no sense to it.

Mr. MOORE of Pennsylvania. Does not the gentleman know that this very paragraph involves the rights of American labor, and we have not had opportunity to discuss it?

Mr. SMITH of Michigan. Everybody knows that. I will tell you another thing about the importance of this bill. It involves an expenditure of $50,000,000 and you have not any money in the Treasury of the United States, and at this inopportune time you are going to issue obligations against the Treasury by selling Panama bonds.

Mr. COX. Is the gentleman in favor of a straight-out subsidy? Would he vote for it?

Mr. SMITH of Michigan. I do not know I would do as other countries do; but this is a straight-out subsidy. I think this is a subsidy.

Mr. JOHNSON of Washington. I want to ask the gentleman a question, at this point, as it is apparent that section 9 will never be reached for discussion.

Mr. SMITH of Michigan. I yield to the gentleman from Washington.

Mr. JOHNSON of Washington. Does the gentleman from Michigan think that the provision on page 6, in section 9, "that foreign-built vessels heretofore or hereafter admitted to American registry or enrollment and licensed under the act of August 18, 1914," and so forth, "may not engage in the coastwise trade of the United States," is going to help shipping along the coasts of the United States?

Mr. SMITH of Michigan. It can not do it in any way.

The CHAIRMAN. The gentleman's time has expired.

Mr. SMITH of Michigan. Mr. Chairman, I ask unanimous consent for two minutes more.

Mr. HARDY. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for three minutes without interruption.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MOORE of Pennsylvania. Mr. Chairman, I want to know whether the gentleman is familiar with the fact that this $50,000,000 subsidy now being voted by the Democratic Party for the purchase of foreign-built ships is contrary to the Democratic platform adopted at Baltimore in 1912?

Mr. SMITH of Michigan. Certainly. As far as I am acquainted with that platform it is. But I have noticed that the only provisions of that platform being observed by the Democratic Party are those provisions carrying large appropriations or fat salaries.

Mr. HARDY. Mr. Chairman, I asked unanimous consent that the gentleman be allowed to proceed without interruption. I thought it was granted, and I hope it will be observed.

Mr. SMITH of Michigan. Now I commence on the three minutes that the gentleman from Texas [Mr. HARDY] so kindly procured for me.

We have not any ships in this country, according to the statements of some gentlemen in favor of this bill. We are not in dire straits for ships here. And, do you know, gentlemen, on page 177 of the World's Almanac you will find that the tonnage of the English merchant navy marine is 20,874,309 tons, and the United States comes next in line, with 8,389,499 tons. The next nation that has the greatest tonnage in the world is Germany, with 5,516,088 tons. The Norwegian tonnage is 2,474,165. France comes next, with 2,294,623 tons; Japan, 1,866,319 tons; Italy, 1,559,707, and so on.

I want to make this statement while I have the floor now, and you gentlemen or any gentlemen can answer it now or answer it later.

I have heard a great deal said here to-day and at other times about the beauties of the Federal reserve act; how it has benefited our country, and how you on that side compare one measure with another and refer to it by comparison when you wish to appoint a board or commission with large salaries, including a large number of offices. And I would like an answer out of the balance of my time if there is a gentleman on that side of the House who can tell me one single thing that can be done under the Federal reserve act that could not be done by the national banks, by the Comptroller, and by the Secretary of the Treasury before that act was passed?

Mr. FITZGERALD. I will tell you one thing. It keeps the Republican plutocrats from keeping the public money free at the expense of the people of the United States.

Mr. SMITH of Michigan. I asked for any one act. Of course, our friend from New York [Mr. FITZGERALD] puts us in a pretty high class. Is there any other thing you can think of or have you named them all?

Mr. MOORE of Pennsylvania. Is it not a fact that the Federal reserve act has created three or four thousand more Democratic offices than they had heretofore?

Mr. SMITH of Michigan. Why certainly. They have the offices now, we will have them after November——

The CHAIRMAN (interrupting). The time of the gentleman has expired.

Mr. SMITH of Michigan. I am sorry. [Applause.]

Mr. SLAYDEN. Mr. Chairman, I shall ask to proceed without interruption, as this five minutes is possibly the only time I shall have in which to express my views.

Mr. LENROOT. Mr. Chairman, a parliamentary inquiry. I would like to inquire of the present status of this debate.

The CHAIRMAN (Mr. GARRETT). There is no limit.

Mr. LENROOT. Might I ask the chairman of the committee whether it is the present intention——

Mr. FITZGERALD. Mr. Chairman, I call for the regular order.

The CHAIRMAN. The gentleman from Texas is recognized.

Mr. SLAYDEN. Mr. Chairman, I shall not be able to yield, and I would like now to have permission to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. SLAYDEN. Mr. Chairman, the most eminent Member of this House and the most distinguished Democrat in the Congress of the United States—the Speaker—used these words in a brief speech which he made yesterday:

> Mr. Chairman and gentlemen, crimination and recrimination about what has happened or has not happened in the past are very unprofitable; they do not get us anywhere. I suppose in a certain sense we are all sinners. I wish sometimes I never again could hear the word "Republican" or "Democrat" mentioned on a bill in this House which is purely a business matter. If there ever was any proposition introduced here that was simply and purely business, good, bad, or indifferent, whatever it may turn out to be, this is one of them. All patriotic and wise American citizens, without regard to political or religious affiliations, want to see an American merchant marine.

And to that, if I may quote one of my colleagues, I say "Amen." We all want to see a large merchant marine developed—and along business lines.

Then, said Mr. CLARK:

> That is absolutely certain. A man that is opposed to rehabilitating the American merchant marine ought to be turned over to a board of alienists to see what is the matter with his head. [Laughter.]

Mr. Chairman, I indorse every one of those words uttered by the Speaker in his speech yesterday. I am as much in favor of the rehabilitation of the American merchant marine, not to its former magnificent proportions only, but to a degree of grandeur and importance it has never reached, as any man who lives. [Applause.] I am in favor of doing everything that is legitimate and proper to develop a merchant marine, and I will go as far as any man in that direction, except I can not be carried so far as to abandon a principle. I am opposed to the policy of Government ownership and operation of transportation lines. Such a plan does not mean a merchant marine but a Government commercial ship line which will surely operate at a loss and be an unusual tax on the people. It will be socialism [applause], and I still prefer the association of Thomas Jefferson to that of the modern socialists. [Applause.] I have been opposed as violently perhaps—I will not say as violently, but I have been as strongly opposed—to subsidies as any man who ever stood in this House.

My influence has not been so great, my tongue not so eloquent that I have been able to express my hostility to legislation of that sort in such a way as to command the attention of the country as other gentlemen have been able to do. But, Mr. Chairman, I can not conceal from myself the fact that in the general meaning of the word "subsidy" this bill, and every other Government-ownership bill, is indirectly, if not frankly, a subsidy. The inevitable deficit in the operation of such a line will be paid out of the People's Treasury, and no matter what gentlemen may call it, that is subsidy.

Sir, the Government of the United States can not operate transportation lines as cheaply as business men can do it. Deficits in the operation of lines under the Government are bound to occur. Who is going to pay them? The taxpayers. It has got to come out of the Treasury of the United States, and it goes to the benefit of a limited industry, limited compared with all the other industries, and none the less an industry because operated by the Government. And if that is not subsidy, getting away from the narrow, confined meaning of the word, or a direct application of so much of the public funds to the owners of ships, private or public, to induce them to operate their vessels, then I do not know what a subsidy is.

Mr. Chairman, it distresses me very much to have to oppose the majority of my colleagues in any way, but much as I regret to do so, sir, I shall take that road which I conceive to be the path of duty [applause on the Republican side] rather than to run counter to what I believe to be right. But, supported and sustained by the declaration of the Speaker yesterday, that the employment of the words "Democrat" or "Republican" or "politics" in connection with this bill is uncalled for and unwarranted, I feel that I am violating no obligation to my party in doing so. In my judgment, if this bill should become law, it will prevent the development of a merchant marine, a thing we all want to see done.

Mr. Speaker CLARK was right when he said in his frank, clear way that the American who is opposed to the rehabilitation of our merchant marine should have his sanity investigated. But there is no such person.

For commercial reasons and for reasons of defense we all want to see ships under the American flag traversing all the "seven seas," and the minor seas as well, peacefully distributing the produce of American farms and workshops. The question that Congress has to deal with is how shall we get the ships, not whether we want them. Politics has nothing to do with this question. It is purely a matter of business, the particular business being the determination of the method which shall be adopted by Congress for the reestablishment of the merchant marine.

The chairman of the committee, Mr. ALEXANDER, of Missouri, in his speech last Tuesday and in his report on the bill said, in substance, that "all reasonable objections" to the Government ownership and operation features of the bill that met its defeat last year had been removed from the bill of this year.

All I can say in reply to that statement of the distinguished chairman, whose high character, zeal, and earnestness I have always admired, is that the Member of Congress who voted against his bill in the Sixty-third Congress because of its Government-ownership feature and swallows the one under consideration is very easily satisfied.

The chairman does not deny that the Government-ownership feature is there, nor does my learned friend from Virginia, Mr. SAUNDERS, but they plead in extenuation that the offense is a small one and that in five years it will be ended.

Mr. Chairman, it is not a question of continuing the offense, not a question of brief or prolonged sinning. It is a question of sin, and in my opinion it is a political sin for the Government to engage in commercial transactions and particularly wicked for it to do so in competition with its own citizens. It is a matter of principle, not a mere question of policy or expediency. Five years of Government ownership is, in one sense, just as much a transgression of that principle as a hundred years.

It is intended, if this bill shall become law, to have two classes of shipowners engaged in freight carriage on the oceans. One will be private citizens, who, in an honorable endeavor to better their own fortunes and to accommodate commerce, have invested their capital in ships. If the investment should turn out to be unprofitable, these investors will withdraw from the enterprise without any avoidable delay or they will end in the court of bankruptcy.

The other class will be the Government of the United States. If its investment should not yield a profit, it will keep out of the bankrupt court by the simple process of calling on the taxpayers to meet the deficit and can go on operating a losing business. It is a matter of common knowledge, Mr. Chairman, that whatever business of a commercial nature the Government undertakes is done at a greater cost than are similar enterprises conducted by private citizens for their own account.

The reason is simple and easily understood. The Federal Government does its work by officials and hired agents, who are probably paid all they earn but who are usually less capable, less well trained, and less well paid than are the directors of great business firms or corporations in similar lines.

But this bill proposes a competitor for the citizen with whom, for the reason already mentioned, the ability to make up a deficit by the use of the taxing power he can not compete.

If you will appropriate money enough you can finally get ships, but not now; not until the European war is ended, when they will not be needed, but even then you will not have a merchant marine. It will be a Government marine and there will not be room enough on the widest ocean for a real merchant marine and the tax-supported Government substitute.

But how are the ships that the chairman and his committee want to buy to be obtained? By purchase? All are now profitably employed that can venture on the ocean and can not be had except for a price that no prudent business man would pay.

By construction? In what shipyard can they be built? Certainly in none in the United States, for all are working to capacity with orders ahead. In foreign yards? The great maritime countries of Europe are otherwise engaged, and nothing can be expected from that direction. There remains Japan, but it is a matter of common knowledge that she is building with feverish haste on orders from her own merchants and shipowners. So we can expect nothing there.

I have heard the suggestion made, but as a jest, I hope, that the only way we can get ships until long after the great European war will certainly end either from exhaustion or from decisive victory on the field of battle, is to pick a quarrel with Germany and seize her ships that sought security in our ports that they had reason to believe were neutral.

Of course that method of building up an American merchant marine is not honorable, and would be revolting to the gentleman from Missouri [Mr. ALEXANDER], and, moreover, would make them altogether too costly. It would even bring upon us the contempt of the allies, whom it would help.

Then, Mr. Chairman, it appears that there is no way of getting ships except to bid so high for them that present owners, in spite of the prevailing high rates and huge profits, will sell.

They know, even if Members of Congress do not, that the war in Europe must soon come to an end, and that when it does, and all the merchant ships now lying in neutral ports can venture on the seas again, freight rates will go down as rapidly as they advanced in 1914–15.

Mr. Chairman, there is more complaint about unfair freight rates, both on land and sea, and less reason for it than with any branch of trade with which I am familiar.

A comparison of the rates charged on American railways, both on the basis of mileage and quality of service, with those of Europe, and particularly with the State-owned roads, discloses the gratifying fact that Americans are as a rule better and more cheaply served.

As to sea-borne freight I can only say, and about this thing I speak of personal knowledge and from my own experience, that prior to the war in Europe the ordinary charges were most reasonable.

Here and there one might run into conditions where the carrying charges were controlled by monopoly or a combination. About that I have no personal knowledge; but if there are such conditions and the transactions fall within the jurisdiction of the United States, the laws against restraint of trade may be invoked.

Prior to 1914—the war period—cotton was taken from Galveston, the great Texas port, to Liverpool at a cost rarely exceeding $2 a bale of 500 pounds. For a water haul of nearly 5,000 miles $2 a bale was not an exorbitant charge. Often it was as little as $1.50 a bale.

For years cotton has been taken from interior Texas markets across the continent to San Francisco, or other Pacific ports, and thence to Japan at a cost rarely more than $6.25 to $7 a bale of 500 pounds. That was for an average rail haul of about 2,250 miles and an ocean haul of about 6,000 miles.

I doubt, sir, if it can ever be done much cheaper and yield any profit whatever to the carrier.

This will give those Members of Congress who have had no personal experience in business an idea of the competition a Government-owned ship line would meet.

Until the European war disturbed the commerce of the world and drove so many merchant ships into harbors of safety and idleness ocean freight carrying was not a very profitable business. Ships could be bought at moderate prices and only those that could be run on an economical basis were money makers. Since the war and submarines have destroyed so many vessels and rates have advanced, any old tub that can float has been making money. These are all to be reckoned with as competitors of any fleet this legislation may provide.

I have heard supporters of this bill say that they will vote for it knowing perfectly well that it will not relieve the freight congestion, for the ships can neither be built nor otherwise acquired until long after the war will be only a bloody chapter in the history of the world.

I do not think these gentlemen believe in the bill. I believe that they feel as I do, that it is a step toward socialism and a dangerous experiment in government.

There is no demand for it in any Democratic platform with which I am familiar, and if there were I could not regard it as a sacred obligation, for it would be a command to do an undemocratic thing. The party would have just as much right to command me to support a protective tariff for the sake of protection.

I append a letter recently received from the Commissioner of the Bureau of Navigation. It shows a phenomenal growth in the American shipbuilding industry. I do not believe that this condition should be disturbed by legislation such as is proposed:

DEPARTMENT OF COMMERCE,
BUREAU OF NAVIGATION,
Washington, April 20, 1916.

Hon. JAMES L. SLAYDEN,
House of Representatives, Washington, D. C.

DEAR CONGRESSMAN SLAYDEN: Replying to your inquiry of the 19th instant as to the growth of shipbuilding in this country in the last three years, that growth is probably best illustrated by a statement showing at the beginning of the past three fiscal years and at the present time the number and gross tonnage of steel merchant vessels, building or under contract to be built, in the private shipyards of the United States. That statement is as follows:

	Lakes.		Seaboard.		Total.	
	Number.	Gross tons.	Number.	Gross tons.	Number.	Gross tons.
July 1, 1913	63	40,849	71	169,580	134	210,429
July 1, 1914	17	39,337	24	104,631	41	143,968
July 1, 1915	14	15,951	62	294,138	76	310,089
Apr. 1, 1916	184	244,205	176	823,651	360	1,067,856

I inclose a copy of Daily Commerce Reports for Saturday, April 15, giving further details on the subject.

Respectfully,

E. T. CHAMBERLAIN,
Commissioner.

Mr. SAUNDERS. Mr. Chairman, what does this bill propose to do? It will be well for a brief time to confine ourselves to the actual contents of the bill, and determine its possibilities whether for good or ill. The sum of $50,000,000 derived from the sale of Panama bonds will be turned over, and made subject to the disposition of the shipping board. To what uses can the board apply this fund? On the one hand they may take the $50,000,000 and buy ships, subsequently leasing, or chartering these ships on favorable rates, to intending operators. Should it lease these ships on such favorable terms to the lessees, as will enable them to overcome the handicaps of foreign competition, then that transaction will be Government aid. You can call it a subsidy, or not. That is a mere choice of terms. At any rate it will be Government aid.

On the other hand, what may the board do? It may use the $50,000,000 in another direction. It may subscribe to the stock of corporations that may be formed under the laws of the District of Columbia. It must take at least 51 per cent of that stock. Why? In order to have a majority of stock, a controlling interest, at all times in those corporations. Then, through those corporations, it can operate ships in the foreign trade. That will be Government operation, or ownership. The board may do either one or both of these things under the terms of the bill.

All this talk about Government ownership and operation, when it is boiled down, comes to this, that the Government through corporations hereafter to be formed may possibly operate a few ships in certain selected trades, for a period not to exceed five years after the present war. The danger to private enterprise from this limited and comparatively insignificant operation, is too trifling to be seriously considered.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Illinois?

Mr. SAUNDERS. Certainly.

Mr. MANN. Under section 5 of the bill can not the board spend $50,000,000 in the construction and equipment of ships aside from subscribing to the stock of corporations to the extent of $50,000,000?

Mr. SAUNDERS. Yes. I said those ships could be leased or chartered in order to allow private enterprise to enter the merchant-marine business, and overcome the competition of foreign competitors, or at least meet that competition on equal terms. That is Government aid. Nobody denies it, or is seeking to conceal the fact that the bill makes provision for such aid. But the board can not build $50,000,000 worth of ships, and subscribe to $50,000,000 worth of stock. The amount that it can expend, is limited to $50,000,000. I ask the gentlemen on that side of the House who have criticized this bill, to tell me how, under present conditions, it is possible for private capital to enter the foreign trade without any aid, and meet the competition on the high seas of their foreign competitors? No one on the minority side of the House has attempted to answer that question. In fact the burden of their cry has simply been that it is not possible for private capital to compete in the foreign trade, without some form of aid. This bill provides a possible fleet of 50, or 60 ships, that may be used, so far as they will go, to enable private capital to overcome these handicaps.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Virginia yield to the gentleman from Missouri?

Mr. SAUNDERS. Yes.

Mr. MEEKER. The gentleman referred a moment ago to going into competition with foreign ships. What would be the effect of such a ship competing with our American privately owned ship?

Mr. SAUNDERS. Oh, I answered that question once before, but I will answer it again. As a result of securing these leases on the favorable terms contemplated, the ships leased, and the lessees thus aided, will, of course, be in competition with private shipping not receiving that help. But any scheme of limited subsidy such as has been proposed ever since I have been a Member of this body, would involve the result that the privately owned ships receiving the subsidy, would be in competition with privately owned ships not enjoying that aid. At no time in the history of Congress, has anyone ever offered a plan of subsidy sufficiently comprehensive to apply to every shipowner deserving to take advantage of it. Until you do that, everyone who enjoys the benefit of Government subsidy, aid, or subvention, will operate in competition with domestic, competitors who do not receive that help. [Applause on the Democratic side.]

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. SAUNDERS. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to proceed for five minutes. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object, Mr. Chairman, I call attention to the fact that it is now a quarter after 1 o'clock.

Mr. SHERLEY. Mr. Chairman, I ask for the regular order.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

Mr. MOORE of Pennsylvania. Reserving the right to object, Mr. Chairman——

Mr. SHERLEY. I ask for the regular order.

The CHAIRMAN. Is there objection?

Mr. JOHNSON of Washington. I object.

The CHAIRMAN. Objection is heard.

Mr. HARDY and Mr. ALEXANDER rose.

Mr. ALEXANDER. Mr. Chairman, an hour and a half ago I asked unanimous consent to limit debate on this section and all amendments thereto, and at the instance of the minority leader I withdrew the request, so that this debate has been proceeding at the instance of the gentlemen on the other side. Now, I am going to renew my request that all debate on this section and all amendments thereto close in five minutes.

Mr. LENROOT. Oh, if you do that, you will get into trouble. Of course on this amendment that does not apply.

The CHAIRMAN. Let the Chair state the question.

Mr. ALEXANDER. I make the request in this form: That all debate on this amendment close in five minutes.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent——

Mr. CANNON. One moment, if the gentleman will yield. I have listened to the remarks of the gentleman from Virginia [Mr. SAUNDERS]. He has talked to the bill, whether we agree with him or not. I make the request that he, being a member of the committee, have five minutes' extension of time, and I hope the gentleman from Missouri [Mr. ALEXANDER] will couple that with his request. It seems to me that is only fair. [Applause.]

Mr. ALEXANDER. The gentleman from Virginia yielded the floor voluntarily; but at the suggestion of the gentleman from Illinois I make the request that the time be extended to 10 minutes on this amendment—5 minutes to the gentleman from Michigan [Mr. FORDNEY] and 5 minutes to my colleague [Mr. SAUNDERS].

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that all debate upon this amendment may be concluded in 10 minutes, 5 minutes of that time to be controlled by the gentleman from Michigan [Mr. FORDNEY] and 5 minutes by the gentleman from Virginia [Mr. SAUNDERS]. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object——

Mr. SHERLEY. Mr. Chairman, I again demand the regular order. I am not going to have the time wasted in this way.

The CHAIRMAN. The regular order is demanded. The regular order is, Is there objection?

Mr. GREEN of Iowa. I object.

The CHAIRMAN. The gentleman from Iowa objects. The question is on the amendment.

Mr. HARDY. Mr. Chairman, I have listened with——

Mr. MANN. Let us have a vote on this amendment. Debate is exhausted.

The CHAIRMAN. All debate on the amendment is exhausted. The question is on the amendment offered by the gentleman from New York [Mr. ROWE].

The question was taken; and on a division (demanded by Mr. ROWE) the chairman announced that the noes appeared to have it.

Mr. MANN. I ask for a division.

The committee divided, and there were—ayes 72, noes 57.

Mr. ALEXANDER. Tellers, Mr. Chairman.

Tellers were ordered, and the chairman appointed Mr. ROWE and Mr. ALEXANDER.

The committee again divided; and the tellers reported—ayes 106, noes 90.

Accordingly the amendment was agreed to.

The announcement of the result was greeted with applause.

The Clerk read as follows:

SEC. 6. That the President may transfer to the board such vessels belonging to the War or Navy Department as are suitable for commercial uses and not required for military or naval use in time of peace, and cause to be transferred to the board vessels owned by the Panama Railroad Co. and not required in its business.

Mr. ROWE. Mr. Chairman, I move to strike out section 6.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 6, by striking out section 6.

Mr. ROWE. I ask for a vote on that amendment.

Mr. HARDY. Mr. Chairman, I wish to be heard on this motion. Of course this section hangs on the other section. The fact that a vote by tellers, in the absence of a large number of Members on this side, has prevailed so far to strike out the preceding section of course means nothing. If it was the sense of the House to strike it out, of course there would be no occasion to do anything further except to strike out the rest of the bill, leaving only this board to investigate what might be done, and thus we would linger along year after year and term after term of Congress without doing anything. It is perfectly apparent from the arguments of gentlemen on the other side that that is the purposse of the Republican part of this Congress; that is, to do nothing toward helping to build up the great American merchant marine. Yet they sing the song and pretend to be in earnest—that they want to do something. But man after man of them has said that the best plan now is to do nothing, and let the American merchant marine grow. Why, the gentleman from New York [Mr. ROWE] and the gentleman from Pennsylvania [Mr. EDMONDS] have said that since 1880 the American merchant marine has been growing and growing; and yet the general knowledge of the whole country is that during that whole period of time our American merchant marine has dwindled till it has disappeared from the seas. Not only so, but the other gentlemen on that side, like the gentleman from Michigan [Mr. FORDNEY] present the figures which demonstrate that fact. If the figures of the gentleman from Michigan [Mr. FORDNEY] are not lying, then an American can not operate an American ship unless you give him a subsidy, and the gentleman from Michigan claimed to give us the exact figures of the subsidy that would be required. He said that a 5,000-ton vessel would require $39,000 a year as a subsidy to enable it to compete with a Japanese ship, and $32,000 a year to enable it to compete with a British ship.

According to the position of the gentleman from Michigan [Mr. FORDNEY] the American merchant marine can not get along without a subsidy; but according to the position of the gentleman from New York [Mr. ROWE] and the gentleman from Pennsylvania [Mr. EDMONDS] the American merchant marine is growing now, and all we want to do is to let it alone. These gentlemen know better. The fact of the business is that the American merchant marine has not prospered and everybody knows it. I want to tell you right now that under the subsidy proposition, which is really favored by every one of you who is fighting this bill, according to the figures of the gentleman from Michigan [Mr. FORDNEY], on the 6,000,000 tons of shipping that we need to have in the American merchant marine, put back on the sea, if you gave it a subsidy proportionate to what he says is necessary, it would take over $50,000,000 every year to keep that merchant marine on the sea. It would not only be a $50,000,000 expenditure now, but it would be a $50,000,000 expenditure every year, and you know you are not going to get it. Not only that, but the gentleman from Michigan [Mr. FORDNEY] and the rest of the gentlemen who advocate a subsidy know that if they were to put up to the American people at this time the idea of paying a subsidy to ships that are charging 100, 200, 300, 500, or 1,000 per cent over normal and reasonable rates, the American people would laugh at them as fools and pay no further attention to them. Yet that is the only remedy they propose. I beg the pardon of the gentleman from Iowa [Mr. GREEN]. He has another remedy. He wants discriminating duties applied; but other Members on his own side tell us that discriminating duties have been tried in this country and found wanting, and that is true. When we had the policy of discriminating duties in force by us and all other nations, we ourselves sought the nations of the earth and asked them to remove discriminating duties, and we removed them. If we were to adopt that policy, it would mean commercial warfare and cutthroatism. Every time we imposed a 10 per cent duty on goods coming into our ports in foreign ships, they would impose 10 per cent on goods coming into their ports in our ships. The result would be they would burden our commerce and we would burden theirs, and cutthroatism would run riot in this country.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HARDY. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Texas asks unanimous consent that his time be extended five minutes. Is there objection?

Mr. JOHNSON of Washington. I object.

SEVERAL MEMBERS. Oh, no!

Mr. MANN. I ask unanimous consent that the gentleman from Texas may have five minutes.

Mr. JOHNSON of Washington. I withdraw my objection, Mr. Chairman.

The CHAIRMAN. The Chair hears no objection.

Mr. HARDY. Now, gentlemen, thanking the gentleman for that courtesy, let me go over the figures of the gentleman from Michigan [Mr. FORDNEY] coolly and calmly and deliberately. I have his own statement that the difference between the operation of an American ship of 5,000 tons and a Japanese ship of the same size would be $39,000 per year, and his assertion was that the only way to keep that American ship on the sea was to make up that difference by a subsidy. Now, it is well understood that in order to have any reasonable American merchant marine we ought to have from six to ten million tons on the sea. If you make it 6,000,000 tons, a 5,000-ton ship would go into that tonnage 1,200 times. Multiply $39,000 by 1,200 and you will find the total amount required to subsidize our merchant marine into existence. To maintain it you would have to pay over $47,000,000 every year, which is to compensate for the difference in cost of operation which he enumerated; and then he says that Japan subsidizes her ships and you would have to pay an additional amount to equal that subsidy. That supposes that the ships cost the same as foreign ships. But if we do not allow our merchants to go abroad and buy ships where they can buy them cheapest we have got, to add enough to make up the added cost of our ships and the added amount of interest, insurance, repairs, and depreciation arising from the higher cost of our vessels which we buy in this country; and if we paid 25 per cent more on a vessel, as I figure it out, these items would cost, at a reasonable estimate, another $18,000,000; so that in order to run our ships it would cost $18,000,000 plus $7,000,000, making $65,000,000 every year that we would have to pay.

Is that what you gentlemen ask the country to do? That is all that you propose. That is the only remedy you have offered and the only one you ever will offer because you are tied hand and foot, neck and ankle, body and soul to the shipbuilding monopoly and the coastwise monopoly. You never will be willing to do what other nations do; you will never be willing to let the merchants of America have a merchant marine by buying ships in the cheapest market. We have yielded to that idea in the bill further than I for one desired to. We have not put in a free-ship clause, but we have proceeded to start a merchant marine, and from this beginning we will learn wisdom, and through our board we will amend such laws as need amendment and build up our merchant marine.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. HARDY. Yes.

Mr. JOHNSON of Washington. Can the gentleman find any provision in the bill that he thinks will assist the coastwise trade?

Mr. HARDY. No. The coastwise trade has never needed any assistance because by law you confine it to American ships and will not let anything else come in. A gentleman over there said the other day that we had 8,000,000 tons of shipping against 21,000,000 tons of England, but he neglected to say that the 8,000,000 tons was nearly all in the coastwise shipping.

Mr. JOHNSON of Washington. The gentleman is not quoting me.

Mr. HARDY. No; I referred to a gentleman who made a speech over there the other day, and the gentleman from Washington has made no speech.

Mr. JOHNSON of Washington. Is there anything in the bill that will help American coastwise shipping?

Mr. HARDY. I have said to the gentleman it does not need help; it needs control. When we find the coastwise shipping in combination robbing the country by excessive freight rates we need something to control it. They have an absolute monopoly. What more help could you ask? This is not to build up a coastwise trade, but we want to see our flag on the high seas and in foreign ports so that any American abroad can sometimes look at the flag that bears the Stars and Stripes and say that stands for my land—my native land. [Applause on the Democratic side.] You gentlemen care nothing; you have done nothing and you ask for nothing except a subsidy, and you know you can not get that, and when we bring this bill in you say let us alone and let us do nothing. [Applause on the Democratic side.]

Mr. MILLER of Pennsylvania. Mr. Chairman, when a resolution was brought into the House on Tuesday to take up the bill (H. R. 15455) to develop and create a naval auxiliary and naval reserve, and a merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries, I supported and voted for it. I did this for two reasons, among others:

First. The resolution provided 14 hours in all for discussing the bill and amendments thereto. I then believed, and still believe, that this was ample time for discussion. If any Member of this House can not understand the provisions of the bill between Tuesday noon and to-day at 4 o'clock by studying the bill and report and listening to 14 hours' debate, he is hopeless. He will never comprehend it.

Second. It provides for a final vote on the bill and all amendments offered thereto by to-day.

Without the adoption of this resolution no Member could even guess, not alone predict, the day when a final vote would be taken.

The bill in some respects does not meet my approval, and I will help to amend it if possible; but if all amendments fail, then I will vote for the bill as it now is.

The United States needs a naval auxiliary and naval reserve and a merchant marine to meet the requirements of our commerce in time of peace, and that can be used, in case of war between the United States and any foreign power, as a naval auxiliary and naval reserve. It is proposed to materially enlarge our Navy by constructing dreadnaughts, battleships, armored cruisers, submarines, and so forth. But of what avail if we have no naval auxiliaries or naval reserve ships?

In my opinion, the United States will never have an ample merchant marine except by three methods—first, subsidies; second, private capital without subsidies; third, Government aid, in whole or part.

The gentleman from New York [Mr. ROWE] demonstrated clearly that a merchant marine has been in the past, and can now be, built up in the United States by subsidies. Congress never has since 1860 adopted a subsidy bill. It has often been tried in the last 50 years, and, as admitted by the gentleman from Michigan [Mr. FORDNEY], in answer to a question propounded by me during his argument against this bill on the floor, always failed. The gentleman from Missouri [Mr. CLARK] also stated on the floor in debate on this bill that no Congress in 50 years had passed a subsidy bill. It always failed either in the House or Senate.

The gentleman from New York [Mr. ROWE] and the gentleman from Michigan [Mr. FORDNEY] both demonstrated that owing to the higher cost of labor paid in American shipyards—twice as high as is paid in British shipyards, and three times as high as is paid in Japanese shipyards—owing to the higher wages paid by American shipmasters to sailors over those paid by Great Britain, Germany, Japan, and other foreign shipmasters, it was impossible to either build up a merchant marine in the United States for the foreign trade or operate the ships, if built abroad, under the American flag without a subsidy.

A Republican Congress never has passed a subsidy bill in the past; a Democratic Congress never will. I would vote for a subsidy bill, but the passage of such a bill now or in the near future seems impossible. Without discussing its merits or demerits, such a method of building up a merchant marine can be dismissed.

For 50 years private capital has not undertaken to build up a merchant marine for the United States, and for the very good reason that it preferred to invest in railroads, in manufacturing, and in innumerable other important enterprises which tended to develop our country and presented more attractive inducements. Up to the present European war the investment of American capital in ships sailing under the American flag to foreign ports has been practically nothing. It is true very many ships are being built in American shipyards, as stated by the gentleman from New York [Mr. ROWE], but when asked if they were being built for the United States coastwise trade, or for carrying commerce to foreign countries, or for foreign shipowners, he frankly answered he did not know.

Up to the date of the Civil War of 1861–1865 the merchant marine of the United States did a very large carrying trade in both domestic and foreign commerce. During the Civil War foreign nations took advantage of internal conditions and by subsidies and other government aid developed a foreign merchant marine that practically drove American ships, sailing under the American flag and carrying United States commerce to foreign countries, from the high seas.

It is true that owing to present conditions in Europe the outlook is more hopeful; but the war will be over some time, and soon after it is closed and peace is assured foreign ships sailing under the English, German, French, and other foreign flags, aided by subsidies, will again cripple and finally drive from the high seas merchant ships owned and operated by American capital and sailing under the American flag.

This has been the result in the past; it will be the result in the future.

There remains but one method of solving the question: Government aid or ownership, or both.

This bill, or something like it, presents the only present solution.

Possibly there are defects in the present bill. It would be remarkable if there were not. But these can be corrected in time, if not corrected now by amendment.

The minority of the Committee on Merchant Marine say in the minority report accompanying the bill that it is experimental in its nature. That may be, but it is only by experiment that new methods are worked out successfully.

They further say:

> The bill can afford no present relief to shippers.

That may be true if by "present" is meant immediate relief. It will at least give the shippers of the United States in the future 40 to 50 additional ships in which they can ship their domestic commerce to foreign countries and bring back foreign commerce to the United States. It will relieve our shippers from dependence on foreign-owned ships in which to transport their commerce. It will afford American shippers an essential method of extending and protecting their foreign trade, so essential and vital to the interests of all classes of our people, whether laborers, tradesmen, farmers, manufacturers—whether living in city or country.

It will provide an effective naval auxiliary, which, while it promotes our commerce in times of peace, will furnish us additional means of defense in times of danger.

The minority further say in their report:

> We can not subscribe to the proposal to expend $50,000,000 of public funds in the way contemplated. While intended to further the public interest, we are of the opinion that such expenditure would work a public injury.

It is true, Mr. Chairman, that $50,000,000 is a large sum, but this House recently passed a river and harbor bill appropriating $39,000,000 for the improvement of rivers and harbors, and Members who should know whereof they spoke said that fully $20,000,000 was waste. The bill will come back to the House in a few days from the Senate increased to $40,000,000 or more, and the House will finally accept it.

Out of $50,000,000 proposed by this bill, I believe every dollar will be wisely expended for the benefit of all the people of the United States.

To-day the world's shipping has passed almost entirely under the control of Great Britain. Her large merchant fleet is wholly under control of the British Government. It is being used as a Government weapon of commercial and naval warfare both against enemies and neutrals. It dictates ocean freight rates and discriminates in favor of British traders.

If the United States intends to free her shippers and her commerce from the servitude of Great Britain and other foreign Governments, this country should build up an American merchant marine.

This bill should never have been made a political measure. It is not political in its results. If it were a political measure pure and simple, I reckon I would be found lining up with the Members on my side of the center aisle. Believing that it is a business measure; believing that its results will benefit a great majority of our people of all political shades of belief, I shall vote for the bill.

Mr. Chairman, I believe that the House has lost sight of the main object of the bill. I read in the title of this bill that it is for the purpose of encouraging, developing, and creating a naval auxiliary and a naval reserve. This House is going to be asked in a short time to vote a large appropriation to increase the efficiency of our Navy. We have not a naval auxiliary, we have not a naval reserve, and that is the main object of this bill. It never would have been brought into the House if it had been only for the purpose of establishing a merchant marine. The whole discussion on the bill up to this time has been on the question of a merchant marine. Does not the country demand that we should have a naval auxiliary if we are to have a large Navy? Does not the country demand that we should have a naval reserve if we are to have a large Navy? And one of the ways we can get it is by this bill. [Applause on the Democratic side.]

Gentlemen ask what is the use of making great appropriations for the Navy, building it up, if we have no naval reserve and naval auxiliary. In the recent War with Spain we had neither. We had to go out and buy worthless ships at a high price in order to get naval reserves. Are we to be in the same position in the future? I hope not.

But it will also help to build up a merchant marine. Why? The ships that are proposed to be built can be used in time of peace for the merchant marine, and will help develop the foreign commerce in this country. We have none to-day. It was demonstrated by the gentleman from New York [Mr. ROWE] and the gentleman from Michigan [Mr. FORDNEY] that we could not have a merchant marine in this country without a subsidy. I would favor that. But Congress never has done that, and never will do it, if we can judge the future by the past.

A Republican Congress never did do it, although they tried it for years and years. Why did not they do it? They could not get the necessary votes. [Laughter and applause.] The Democrats never will do it. The Democrats shun a subsidy and hate it like the devil shuns and hates holy water. [Laughter.] They never will vote for it. This is an entering wedge. If we pass this bill, we can have a merchant marine in times of peace and in time of war the same ships can be used for a naval auxiliary and a naval reserve. I should rather vote for this proposition than to vote to increase the number of dreadnaughts, which contribute nothing to the country in time of peace but expense.

Mr. Chairman, 18 months ago or thereabouts I made an address in the town of Sharon, in my district, the largest iron and steel manufacturing town in the district, to an association of business and professional men and manufacturers. I said then I would support a merchant-marine bill if one was presented to Congress while I was a Member. No one present objected. Knowing me, as they did, they knew I would do so, and I am going to do it to-day. [Applause.]

Mr. Chairman, I ask leave to extend my remarks.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

The CHAIRMAN. The gentleman from New York [Mr. ROWE], a member of the committee.

Mr. LENROOT. Mr. Chairman, I have an amendment which is preferential.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

> Page 6, line 4, after the word "transfer," insert the words "either permanently or for limited periods."

Mr. LENROOT. Mr. Chairman, I think some of the time which remains should be devoted to a consideration of some of the defects of this bill as reported by the committee and an attempt, so long as the bill is evidently going to pass, to remedy those defects so far as possible. One, I think, is contained in this section now under consideration. The President is authorized to transfer to this board such vessels belonging to the War or Naval Department as are suitable for commercial uses and not required for military or naval use in time of peace. It provides for the transfer of all vessels in the control of the Army and Navy not now necessary for such use, but once transferred there is no method under this bill by which they can be retransferred to the Army and Navy when they may be required for use. And it is clear, Mr. Chairman, that if the full benefits of this bill shall be had the President should be permitted to transfer to this board, either permanently or for limited periods, such vessels as are not required for use. For instance, to-day we have transports that could have been used in this emergency for a short period of time if the law had permitted such use, but it did not. And I wish to say if this amendment is adopted and the section is not stricken out, I shall offer an amendment to the next section providing for the transfer or lease of such vessels for limited periods of time not extending beyond the period for which the transfer is made. It seems very clear it is a defect in the bill that ought to be remedied, and I trust there will not be any opposition to its adoption.

Mr. HARDY. Will the gentleman yield?

Mr. LENROOT. I do.

Mr. HARDY. I would suggest that while this provision requires or permits the transfer to the board, there is another provision in the bill that authorizes the President, whenever he sees proper, to take them away from the board.

Mr. LENROOT. No; I beg the gentleman's pardon. I have examined the bill carefully, and there is no such provision.

Mr. HARDY. To take any of these ships whenever in his judgment the emergency demands them to be used for the Government.

Mr. LENROOT. The gentleman refers to section 10?

Mr. HARDY. Yes.

Mr. LENROOT. Referring to section 10, I will say that it authorizes only the taking of such vessels as the board has already

sold, leased, or chartered, and in addition it will require the payment of the value of those vessels in the hands of those who may lease or charter, and therefore, of course, would prevent the President from transferring to the board these vessels for limited periods of time.

Mr. HARDY. The purpose of the gentleman is of course all right. I do not see where there is any objection to his suggestion, and I believe we would just as soon accept his amendment, although I believe it is already covered.

Mr. LENROOT. If the gentleman will examine again section 10 he will agree with me it is not covered.

Mr. HARDY. We will accept the amendment. I will ask that the amendment be again reported.

The amendment was again reported.

Mr. MOORE of Pennsylvania. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE of Pennsylvania. A motion was made by the gentleman from New York [Mr. ROWE] to strike out the paragraph. What is the status?

The CHAIRMAN. The amendment proposed by the gentleman from Wisconsin is preferential. It is in order to perfect the text before a motion to strike out. The question is upon the amendment.

The question was taken, and the amendment was agreed to.

Mr. LOUD. Mr. Chairman, I offer the amendment, which is already at the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 6, line 4, after the word "President," strike out all down to the last word, "and," in line 7, and insert in lieu thereof the following: "shall transfer to the board all such colliers as are over 18 years of age and all such other auxiliaries as are suitable for commercial uses and not required for military or naval use in time of peace."

Mr. LOUD. Mr. Chairman and gentlemen, I offer an amendment which I trust will be accepted by the chairman of the committee, for it only seeks to perfect the bill and make it more useful for the object to be attained. Eight years ago we did not have a single respectable collier in the United States Navy. Eight years ago we authorized for the first two modern colliers. Since that time we have built 14 magnificent colliers and fuel ships for the use of the Navy. Before that time we had a few—about 15, I think—old, insignificant, inadequate ships which we had bought in the time of the Spanish-American War, which were not adapted to our use and were expensive to operate. We expected when we gave the Navy an adequate collier fleet that they would dispose of those old ships, but that has not been done. We have given to them in the last eight years 132,000 tons of splendid, modern construction in colliers and fuel ships. Now, there are 11 of those old ships which are of no use to the Navy and which would be of some considerable use to the merchant marine and to commercial use.

Mr. SAUNDERS. May I ask my colleague a question?

Mr. LOUD. Yes.

Mr. SAUNDERS. Why does the gentleman want specially to single out these ships in his amendment when these very ships can be transferred by virtue of the authority of the section as it stands?

Mr. LOUD. They can but will not.

Mr. SAUNDERS. Why will they not?

Mr. LOUD. Because they will not give them up. The Navy will hang onto them. They will hang onto everything they have, and more if you give it to them. But we have a splendid collier service—14 modern ships adapted to the work—and we are going to appropriate for one more in the present Navy bill. When Congress has given them all they ask for, and more, too, then it is in the power of Congress to take away from the Navy the old ships which they do not need.

Mr. SAUNDERS. It is the purpose of your amendment, then, that these old ships you speak of shall be transferred without discretion?

Mr. LOUD. It will be mandatory.

Mr. SMITH of Michigan. I have been interested to know, and perhaps with your extensive information you can tell us, how many colliers are necessary for the proper use of our Navy?

Mr. LOUD. No; I can not answer that. We have a great abundance and more, too, in time of peace, and we need many more in time of war, and this bill or some other bill we hope will provide for additional ones to be taken into service when emergency requires.

Mr. PADGETT. Will the gentleman yield?

Mr. LOUD. Yes.

Mr. PADGETT. I wanted to ask how you would reconcile this recommendation that you are offering as an amendment to transfer them to the board, when at your request the Naval Committee has included that provision in the naval bill, authorizing the Secretary of the Navy to sell those old colliers that are above 18 years of age?

Mr. LOUD. I do not need to reconcile it.

Mr. PADGETT. You authorize their sale and specially request it, and upon consideration and reference to the department recommending it, we have included it.

Mr. LOUD. I do not need to reconcile it, because I will use the first opportunity, and every opportunity, to take away these old and useless ships from the Navy and put them into commercial work, where they are needed a thousand times more than they are there.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ALEXANDER. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended for five minutes.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent that the time of the gentleman from Michigan be extended five minutes. Is there objection?

Mr. KREIDER. Reserving the right to object, Mr. Chairman, if I can be recognized for five minutes I shall not object.

Mr. ALEXANDER. Mr. Chairman, I ask unanimous consent also that the gentleman from Pennsylvania have five minutes, following the gentleman from Michigan.

Mr. GREEN of Iowa. Reserving the right to object, there are several of us——

The CHAIRMAN. The gentleman from Missouri [Mr. ALEXANDER] asks unanimous consent that the time of the gentleman from Michigan [Mr. LOUD] may be extended for five minutes. Is there objection?

There was no objection.

Mr. LOUD. A little more information, gentlemen. The gentleman who preceded me said that we had no auxiliaries in our Navy. It is true that we have not enough in time of war, but we have more than enough in time of peace. We have to-day 53 auxiliary ships adapted to commercial work, and out of these 53 there are 30 of them that are over 18 years of age, and those 30 average 25.7 years, and they should be disposed of, and I want new ones built, where needed, to take their place. I do not believe that we ought to take away all the auxiliaries of the Navy, but we ought to dispose of these old ships at this time, when the price is so high that we can sell them at three times their value. We sold one, the *Justin*, a short time ago, valued at $75,000. We paid for that ship at the time of the Spanish-American War, 18 years ago, $145,000, and in the sale a few months ago we received for that ship $301,070, over double the value of the ship at the time it was bought and four times its appraised value at time of sale. That is what it means to sell those old ships now. This list indicates the colliers I would at once take from the Navy and put into commercial use:

Old colliers which should be sold immediately.	Tons.
Abarcndon	3,400
Ajax	5,000
Arethusa	3,625
Brutus	4,000
Cæsar	3,150
Hannibal	2,300
Leonidas	2,200
Nanshan	2,900
Nero	3,500
Saturn	2,500
Sterling	2,675
Eleven old colliers	35,250
Modern colliers.	Tons.
Cyclops	10,500
Jason	10,500
Jupiter	10,500
Neptune	10,500
Venus	10,500
Orion	10,500
Proteus	10,500
Ulysses	10,500
Achilles	10,500
Mars	7,500
Vulcan	7,500
Hector	7,500
Maumee	7,500
Kanawha	7,500
Total	132,000

Total tonnage of the 25 colliers, 167,250 tons.

Now, let me speak of the Army. They have 15 transports in the Army service, only 1 of which is of modern construction. Fourteen of those transports average 29 years. They are 22 to 42 years of age. Those old ships could all be disposed of, or at least a part of them, to the best advantage now and put into commercial service, where they are so badly needed, and take them away from where they are not needed.

I will yield the rest of my time, unless there is some question which some one wishes to ask.

Mr. KREIDER. Mr. Chairman, the purpose of my motion is to secure an opportunity to make a few observations upon this

bill as a whole, rather than on the particular paragraph under immediate consideration. It is evident that we are all in favor of enacting legislation that will develop a merchant marine for the United States. We all agree that we should adopt a sound national policy in regard to same. The subject is not a new one. This need has been recognized for many years, and in each succeeding Congress bills have been introduced designed to accomplish this result, but no positive policy has as yet been adopted.

It is a most deplorable fact that we have allowed the merchant marine to drift from the proud position it once occupied to its present condition, for we must admit that we have no merchant marine to-day that is worthy of the name. This fact is perhaps brought more forcibly to our notice and we more fully realize its importance because of the present European war, and we see more clearly the absolute and imperative need of a merchant marine.

It is absolutely essential, to my mind, that Congress enact legislation which will encourage the development and speedily give us an adequate merchant marine. Legislation with this object in view was first enacted on July 4, 1789; it provided that a discount of 10 per cent be allowed on all duties imposed on imports in vessels wholly the property of a citizen or citizens of the United States. Again, on August 10, 1790, further legislation was passed providing for an additional 10 per cent of the ordinary duties on imports in foreign ships, so that the inducement to import on American bottoms amounted to 20 per cent, consisting of the rebate of 10 per cent if the goods came on American bottoms and a penalty of 10 per cent if they came on foreign bottoms. This was the commencement of an effort to build up an American merchant marine.

Under this legislation marked progress was made, and in the course of a few years we were carrying 80 per cent of our own products on American bottoms; by 1810 we were carrying 90 per cent, and shortly thereafter we were not only carrying our own but a large portion of the world's commerce and led the world as a maritime nation. We then occupied the position that England now occupies. We maintained our supremacy until about 1845, and even as late as 1856 we carried from 75 to 85 per cent of our over-sea commerce.

Without going into detail, it seems that from then on a decline set in until to-day we find that we carry less than 10 per cent.

The merchant marine is not only needed for carrying our commerce in times of peace, but should we be so unfortunate as to become involved in war its need is most imperative.

During the last 30 years volumes have been written on the subject; men in public and private life, officers of the Army and officers of the Navy, Presidents of the United States have emphasized the importance and actual necessity of a merchant marine, both for safeguarding our Navy and protecting our commerce. Nothing has been done.

When President Roosevelt sent our fleet on a cruise around the world to show our naval strength and our up-to-date battleships, we were made the laughing stock of the foreign nations when they saw that we were obliged to carry our coal on foreign bottoms to keep the fleet steaming. Ex-President Roosevelt called our attention many times to this sad condition. Ex-President Taft said:

> If we were compelled to go into a war to-day, our merchant marine lacks altogether sufficient tonnage of auxiliary ships necessary to the proper operation of the Navy.

But it is useless to continue to speak of the need of a merchant marine; we all agree we need it; we must have it.

The question, however, is, What policy can we or shall we adopt so that our merchant marine will again place us in the proud position we once occupied? Will the bill now under consideration accomplish the result? Does this bill embody the policy this Government shall pursue? These are the important questions. It is necessary that we give most serious and careful consideration to the policy we adopt. I want to say that I am in thorough accord with the provisions of the bill providing for a permanent shipping board, provided this board is composed of men experienced in shipping and foreign trade. I am in favor of empowering this board to recommend to Congress the repealing of any unwise legislation that may now be on the statute books and the enacting of such legislation as may seem wise and desirable. In fact, this board must have power to adopt and enforce rules and regulations as may seem necessary and have absolute control of our over-sea commerce.

It seems that at present our shipping interests are seriously hampered by unwise and ill-considered legislation, the most notable and recent of which was the passage of the seamen's bill passed by the Sixty-third Congress. This bill has driven more ships out of business, has caused the American flag to be hauled down on more ships in less time than any legislation on the statute books. The Pacific Mail, the Robert Dollar, and the Great Northern Steamship Cos. all claim that this bill drove them from the Pacific trade. In any event, the facts are that their ships have gone, and there is not an American vessel engaged in the trans-Pacific oriental service, while the Japanese ships have increased over 50 per cent. It was indeed a sad message when Thomas W. Garlick, commander of the *Minnesota*, was forced to flash by wireless, when sailing from the Golden Gate to Europe, "the great Northern steamship *Minnesota*, the finest ship that ever sailed the sea and the largest ship flying the American flag, is now passing down by your beautiful city, bound for a foreign country, never again to return with Old Glory floating from her stern."

This bill is supposed to correct this. Will it do it? Will the provisions of this bill result in the development and upbuilding of an adequate merchant marine? It provides, without going into details, for a certain form of possible Government and private ownership, but which in its last analysis is Government ownership, because I do not see that its provisions make private investment attractive. I am opposed to Government ownership and operation, and my opposition is not of a political nature, but I am opposed to it from a business standpoint.

The Government never does and never has managed, controlled, or conducted any business proposition on an economical basis. Whenever and wherever the Government operates, it is always at a far greater expense than the same operation is carried on by private capital; and it is reasonable to assume that this will be so as long as present political methods continue, and especially if the civil service, from which we have so much to hope and expect, will continue to be sidetracked and ignored as it has been during the last three years. When the Government erects a building it is at an increased cost of from 25 per cent to 40 per cent over the cost of the same building erected by private capital. When the plans for that building are drawn it is at an increased cost of 40 per cent to 50 per cent over the cost to private concerns. In various other governmental activities the increased cost as compared with private control is from 25 per cent to 100 per cent or more. If our governmental activities were conducted on the same economical lines that private business is, I give it as my opinion from actual observation while here that a saving of hundreds of millions of dollars could be effected. If I should go into details and cite my own observations I could easily prove this by actual facts and figures. I have personally called attention to and fought these extravagances on the floor of this House, but with very little result, except in one instance we feel that we were instrumental in saving about $3,000,000 for the Government. Only recently, just a few weeks ago, we tried to save $125,000 on a little item of printing, but the party in power would not have it. Therefore, as stated, I do not favor Government operation where it possibly can be avoided.

In all matters of legislation I believe it is a safe plan to seek advice from those who are actually engaged in that line of business which the legislation is intended to affect, and on this matter of building up a merchant marine and of the desirability of enacting this bill into law we are not without advice from the great business men of the country.

Mr. HARDY. Will the gentleman yield a moment right there?

Mr. KREIDER. Yes.

Mr. HARDY. I want to say this, that the committee has heard the evidence from every shipowner in the United States by their chosen representatives, sent before them, and we have been hearing them for two years.

Mr. KREIDER. Let me reply to the gentleman by saying that you may hear them, but you discard their evidence. Let me read what the Chamber of Commerce of the United States says on this subject.

The Chamber of Commerce of the United States, of which I happen to be a member, has taken this matter up and referred it to its merchant marine committee, and on February 4, 1916, the majority report condemned Government ownership but did recommend the creation of a Federal shipping board, composed of men experienced in marine transportation, with power to investigate navigation laws and recommend to Congress necessary revisions and to have full jurisdiction under the law of all matters pertaining to over-sea transportation. I might say that the Chamber of Commerce of the United States is composed of business men over the entire United States and of organized bodies of trade associations and of the various chambers of commerce in every important city in the United States and is absolutely nonpartisan in its character.

Mr. HARDY. Mr. Chairman, will the gentleman yield just at that particular point about the Chamber of Commerce of the United States?

Mr. KREIDER. In a moment. The National Foreign Trade Council at its meeting September 23, 1915, adopted a report which condemned the Government-ownership policy in principle and considered it as a standing deterrent to investment of private capital in shipping ventures.

Mr. HARDY. Mr. Chairman, will the gentleman yield right there?

Mr. KREIDER. Yes.

Mr. HARDY. I want to say that our committee had before it William L. Douglas, representing the New York Chamber of Commerce, who talked with us about this bill, and he has written the chairman a letter favoring the bill.

Mr. KREIDER. I do not know what Mr. Douglas has done, but I think he has no special knowledge of this subject and probably knows no more about maritime shipping than I do. [Applause on the Republican side.] I am speaking of the majority report of the Chamber of Commerce of the United States of America. In that report they disapprove of Government ownership, but they approve of a provision providing for a board so that our maritime laws relating to this subject may be changed and so that objectionable laws may be taken off the statute books.

Mr. HARDY. I am not speaking of Mr. Douglas of Massachusetts. The man I refer to is a different man. I am speaking of a man who lives in New York, who is connected with the Chamber of Commerce, and who is closely allied to the shipping business.

Mr. KREIDER. I have stated to you what the Chamber of Commerce of the United States has done. Now let me refer to the action of the Chamber of Commerce of the State of New York, as you seem to desire that information. The Chamber of Commerce of the State of New York on January 28, 1915, adopted a report condemning the Government-ownership policy, and declaring that desirable modification of the navigation laws were needed, but stated that the modification of these laws would not alone be sufficient to develop the American foreign mercantile marine, because of the greater cost of operation of American vessels, due to higher American wages, which it was desirable to maintain. [Applause on the Republican side.] These opinions are the expressions of men whose opinions should be respected; they know what they are talking about, having had extensive experience in shipping, and at the same time it gives us a positive expression of the sentiment of these men; and right here I want to state that it seems that legislators, as a rule, do not follow the advice given by experts when legislation is enacted affecting a particular line of industry. It is not only true in this case, but it is nearly always true. The railroader's testimony is rejected when legislation affecting transportation is enacted, because it is contended that he is a party in interest. The banker's testimony is rejected when legislation affecting finances is enacted, because he is a party in interest. The manufacturer's testimony, in whatever line of industry he may happen to be, is rejected when legislation affecting his business is enacted, because he, too, is considered a party in interest. Our great merchants' testimony is being rejected on the same grounds. The testimony of our Army and Navy officials is discounted and rejected because they, too, are considered a party in interest.

The truth is that all the testimony that is really worth while, that has any weight, is rejected, with the result that the schoolteacher dictates the legislation affecting the prosperity of the Nation and its people, when he knows absolutely nothing of the actual operation of these activities. Is it any surprise that business is afraid to expand, when legislation emanates from such a source and is liable to come at any time, at any moment, when the Congress is asked to enact legislation, right or wrong, as it may suit the whim of the dictator? I can not recall a single piece of legislation enacted into law since Woodrow Wilson was inaugurated President of the United States that has had as its underlying principle the promotion of business. It seems that it is the popular thing to decry, hamper, and destroy business activities, and then, after all the obstacles are put in the way of business, business men are told to go after and secure foreign business, wherein they must compete with foreign competitors whose Governments are given every possible assistance and encouragement.

This is not fair, and this policy must be and will be changed. I do not want to be misunderstood. I am opposed to Government ownership and Government operation, but I am in favor of Government control, a control which will protect capital and labor. During the last decade we have passed through an age or period of inventions such as the world has never known. Business men have taken advantage of these inventions which have revolutionized methods of transportation, of communication, methods of manufacture, and so forth. All this has resulted in large business being established in certain lines and, of course, some men have become wealthy because they have taken advantage of the opportunities presented.

This has given the opportunity to the hypocritical, political demagogue to go about the country in an effort to array labor and capital against each other, whereas, as a matter of fact, their interests are identical and each should receive his proper share of prosperity which can be secured by Government control. During the political campaign we hear these demagogues denouncing the tariff, ascribing the creation of trusts, monopolies, and special interests to a protective tariff, which is not true. I defy any man on the floor of this House or elsewhere to point to a single instance where a protective tariff has created a monopoly or a trust or to point to a single instance where free trade has destroyed one.

Quite the contrary is true. The tariff has protected thousands upon thousands of small concerns and enabled them to remain in business, and free trade has driven thousands of small concerns to the wall and out of business. The reason why this is so is plain and evident. The large concern, through its decreased cost of manufacture, because of its size, is able to withstand the foreign competition, and as each small concern is forced to the wall because of competition the large concern gets that business, and it enables it to become larger by each succeeding failure of the small concern, so that the large concern, the so-called trust, is never destroyed by free trade and it is never made by protective tariff, because the small concern can find a market for its product and continue in business under an adequate protective-tariff law. This gives labor a chance to secure its just dues, because labor is not confined to the dictation of any one concern in any particular line of business.

However, I did not intend to touch on this subject; it is the policy of building up a merchant marine that we are considering, but the evidence submitted by the various organizations which I have named and a large number I have not named is against Government ownership. I shall feel compelled to vote against this measure notwithstanding the fact that I consider the development and building up of the merchant marine imperative and the failure to do so almost a crime. [Applause on the Republican side.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. WOOD of Indiana. Mr. Chairman, I believe the people of the United States are opposed to this measure for a great many vital reasons.

If section 5 of this bill, which has been stricken out, is put back again—an attempt to do which no doubt will be made—it will present this beautiful spectacle of the United States engaging not only in private business but engaging in the discouragement of the investment of private capital, and at the same time it will engage in destroying the opportunity for employment of workingmen in this country.

It has long been the boast of gentlemen on the Democratic side of this House that their party is the good friend of the laboring men. Under section 5 of this bill $50,000,000 may be employed—will be employed—in the manufacture of ships, not in the United States, because under the terms of the bill this money may be or will be employed in the manufacture of these ships in foreign countries, for the reason that the terms will not be equal. And why are they not equal? They are not equal because of the fact that men who are employed in the shipbuilding business—laborers on the other side—receive less than one-half of what the men employed in the shipyards of this country receive.

Some man may rise in his place and say that that is not exactly true now, and he might be correct, for the reason that because this war has been making great demands on the shipyards of Europe wages there have increased; but after the war is over—and we could not get these ships built until the war is over—normal conditions will be resumed and normal prices will again prevail; and if so, the $50,000,000 will be invested over there.

And how much of it is represented by labor? Ninety per cent of every dollar of that money expended in the building of ships will represent labor. Ten per cent alone of it will represent the raw material. That means that $45,000,000 of that money that should go to the employment of American workingmen will go to the employment of workingmen on the other side of the sea.

I have taken some pains to collect data and have made a tabulated statement showing the wages paid to men employed in American shipyards prior to the war in Europe and the wages in establishments engaged in the same kind of business in Scotland and England; and, without a single exception, more than twice the wage that was paid on the other side was

paid to the workmen in the shipyards in this country; and what obtained then will obtain when the war is over.

The following figures are very instructive, and I commend them for the consideration of the Democratic majority:

Comparison of average wages per week paid at 12 British shipyards and the average for same class of men at the Union Iron Works, San Francisco, converted into United States money.

	Union Iron Works.	British shipyards.

Mr. HARDY. Mr. Chairman, will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. HARDY. If we can not build ships in America because we pay a higher scale of wages than England, how can England build any ships at home when she pays a higher scale of wages than Japan or France? Is it not a fact that, although England pays a higher scale of wages than France or Japan, she not only builds her own ships, but builds ships for the rest of the world? And is it not a fact that while we pay higher wages, we can turn out cheaper iron and steel products than any other country in the world, and the same with respect to wooden products?

Mr WOOD of Indiana. Oh, the gentleman should ask his question and then sit down. The conditions that have heretofore obtained will continue to obtain. If you gentlemen on that side are the friends of labor that you profess to be, it is better that this money should be expended in our own country, even though we pay more for building ships than is paid on the other side, because thereby we are keeping the money here, which builds homes for the laboring man, and furnishes those homes, and provides for the higher education of the children, thereby bettering their condition in every way.

Mr. HARDY. How is it that Japan, with cheaper wages, does not build the ships for England?

Mr. WOOD of Indiana. It is because of the fact that England throws around her shipbuilding enterprises the same kind of protection that we should have here, and the further fact that she subsidizes her ships and gives them subventions that you have been denying on that side.

Mr. HARDY. Does not the gentleman know that England does not prohibit the building of her ships elsewhere?

Mr. WOOD of Indiaaa. England gives subsidies and subventions to the shipping companies and the owners of ships.

Mr. HARDY. Has she ever given a dollar to a shipbuilder?

Mr. WOOD of Indiana. I say she is giving subventions all the time, and the gentleman knows it.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. HARDY. Mr. Chairman, I ask unanimous consent that the gentleman be given five minutes longer. The gentleman's statement is wrong, and I want to answer him. If England ever gave a dollar of bounty to a shipbuilder, I never heard of it.

Mr. WOOD of Indiana. She gives subsidies and subventions to all.

Mr. HARDY. To the shipbuilders?

Mr. WOOD of Indiana. To the shipping companies and to those engaged in the carrying trade.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. HARDY. I ask that he be given five minutes longer, and I wish to ask him how it is that England can compete with Japan in building ships, although wages in England are so much higher than they are in Japan?

Mr. MANN. Would it be possible to make the same request that the gentleman from Texas made awhile ago, that the time be extended five minutes, not to be interrupted?

Mr. HARDY. I will admit that my question was impetuous. I ask unanimous consent that the gentleman's time be extended five minutes, and I will ask him only one question.

Mr. MANN. Can not the request be made without any "ifs" or "ands" about it?

Mr. HARDY. I withdraw the condition, and ask that the gentleman's time be extended five minutes.

Mr. MANN. I will not object, because I assume that the gentleman from Indiana [Mr. WOOD] will get at least one minute out of the five.

The CHAIRMAN. The gentleman from Texas asks unanimous consent that the time of the gentleman from Indiana may be extended five minutes. Is there objection?

There was no objection.

The CHAIRMAN. Just a moment before the gentleman proceeds. The Chair desires to make this statement now, in order that it may be understood: The Chair has promised to recognize the gentleman from Iowa [Mr. GREEN]. The Chair understands that the gentleman from South Carolina [Mr. BYRNES], a member of the committee, desires recognition. He will therefore recognize the gentleman from South Carolina next, and then recognize the gentleman from Iowa [Mr. GREEN], and then the gentleman from Illinois [Mr. CANNON]. That is the arrangement which the Chair now has. The gentleman from Indiana [Mr. WOOD] will proceed.

Mr. WOOD of Indiana. I will state, in answer to the gentleman from Texas, that the reason why the ships of England are not built in Japan, where wages are so much lower there than in England, is that the English Government will not grant a subsidy to any vessel that is not built in England or Scotland. [Applause on the Republican side.] That is the reason why. So I say we should throw the same arm of protection not only about the American who is engaged in the building of American ships for American trade, but we should also remember the men who are given employment thereby. Now, if it be true—and it is true—that we are paying to our men engaged in the shipbuilding business in this country, to the wageworkers $2 for every $1 that is paid upon the other side for the same amount of work, are we not doing the American laboring man a very great injustice when we make it possible for the United States, that ought to be the guardian of the welfare of the workingman, to become the instrument for the destruction of the welfare of the American laboring man?

Mr. HARDY. Now, if it is perfectly agreeable I will ask another question.

Mr. WOOD of Indiana. Well——

Mr. HARDY. Does not the gentleman know that England grants subsidies to only a very few of her ships? I want to know why it is that Japan does not build ships for the English trade to which no subsidy is given?

Mr. WOOD of Indiana. My understanding is that England does not give a subsidy to any ship that is not built in her own yards, and that in consequence there are very few English ships built outside. So far as Japan is concerned, I am glad that the gentleman has made the suggestion. The men who work in the shipbuilding yards of Japan work for from 40 to 60 cents a day, making it all the worse in this comparison. The United States has been trying for years and years to protect herself against the yellow race. Are we going to say that she is going to send her money across the Pacific to that country, to whose laborers she has denied admittance here, and is going to say to them, "You build our ships at from 40 to 60 cents a day while our workmen, who receive $4 and $5 a day, shall become idle or seek other employment?"

Mr. HUMPHREY of Washington. I want to say to the gentleman on that point that in our shipyards in Seattle we pay $3.50 to $5.50 a day to workmen, while workmen performing the same work in Japan receive 40 cents a day.

Mr. WOOD of Indiana. That is my information.

Mr. SAUNDERS. Did I understand the gentleman to say that ships that are built abroad can not be admitted to American registry?

Mr. WOOD of Indiana. My understanding is that there is a law now upon the statute books which provides that ships built abroad are not admitted to American registry.

Mr. SAUNDERS. The gentleman is mistaken, except as to domestic commerce. In the ocean-carrying trade you can buy a foreign ship to-day and have it admitted to American registry. Now, let me ask the gentleman another question.

Mr. WOOD of Indiana. Hurry up.

Mr. SAUNDERS. I do not want to take the gentleman's time if he thinks I am consuming it.

Mr. WOOD of Indiana. The point I want to make is that it would have been better if ample opportunity might have been had in this House to discuss all the objections that might be raised to this bill, so that the people who are vitally interested in the result of this legislation might have some chance to communicate with this Congress and to advise their Representatives concerning their best interests. I do not believe that the great army of American workingmen would be in favor of this bill if they knew or appreciated what it means to them. I do know that if the Americans who are engaged in the shipbuilding industry, and those who would like to invest their money in that industry, had confidence that the Government which ought to protect them would protect them, then they would invest their money in this character of enterprise and help to build up again that merchant marine which met the beginning of its destruction 54 years ago this week, when the *Alabama* started upon her cruise of destruction. [Applause on the Republican side.]

The CHAIRMAN. The Chair recognizes the gentleman from South Carolina [Mr. BYRNES].

Mr. BYRNES of South Carolina. I see the gentleman from Iowa [Mr. GREEN] upon his feet, and I am perfectly content to have the Chair recognize him first.

The CHAIRMAN. Then the Chair will recognize the gentleman from Iowa, and after him will recognize the gentleman from South Carolina.

Mr. GREEN of Iowa. Mr. Chairman, I am in favor of the amendment which was introduced by the gentleman from Pennsylvania [Mr. KREIDER], but I shall address myself more particularly to some remarks made by the gentleman from Texas [Mr. HARDY], in which he was kind enough to make some reference to myself.

I wish, however, in the first place, to call attention to a remark which was made by the distinguished Speaker of this House in speaking on this bill yesterday. He said with reference to it that it was a business proposition. In one sense it is a business proposition, but in a true sense it is the most unbusinesslike proposition that ever came before any legislative body. [Applause.] This is a proposal to contract for ships at a time of scarcity and to operate them at a time when there will be a surplus of ships more than anyone needs.

What kind of a business proposition is that? Let me suggest by way of example a parallel case. Here is the gentleman from Illinois [Mr. MADDEN], a man of large business experience, who learns of a great scarcity in gun stocks, owing to the war. He finds out that black walnut lumber is very high and scarce. Suppose he concludes that he will take a million dollars, contract for all the lumber that can be delivered a year from now to be made into gun stocks, and sets up a factory in order to manufacture them. What would his friends say? "Too bad, too bad. He has gone clear crazy." [Laughter.] "We must have a commission of lunacy sitting on his case in order to keep him and his family from going to the poorhouse."

Mr. HARDY. Will the gentleman yield?

Mr. GREEN of Iowa. No; I can not yield unless the gentleman will get me more time.

That is what will happen to business men who do not observe the A B C of business principles. Poor old Uncle Sam, if this business goes on, will, metaphorically speaking, have to go to the poorhouse himself.

What kind of a condition will we have? The gentleman from Texas [Mr. HARDY] said that on our side we knew certain things. Well, on your side you know this, and no man has undertaken to deny it, that during the next year you will not get a ship under this bill. The freight that you say is lying at our wharves—that is congesting our railroad traffic—will not be moved by this bill, because no shipyard has any capacity to build any more ships than it is now building. What kind of a condition will you have when you get the ships? It will be just as it was after the Boer war. First, a scarcity of ships and then at the close a surplus, only the scarcity is now greater and the surplus will be greater when the German ships are released. You contract for them to-day when they cost four or five times their normal price, owing to the extraordinary conditions produced by the war going on in Europe, the demand for ships for military purposes and carrying supplies. You will contract for them and get them some time in a year or two. At that time there will be a surplus of ships, rates will go, nobody knows where, and we will be trying to carry freights under laws that make your operating costs twice that of your competitors. That is the kind of a business operation in which we are embarking. I say that a man who would propose anything of that kind really ought to have an investigation made not as to his sanity—as some one has said—but as to his business capacity. The gentleman from Texas spoke about the plan of discriminating rates. I believe it is a practical plan, but when the committee met they never found time to consider that or any other plan but the one embodied in this bill.

They took up this plan that we have here. Why did they take it up and refuse to consider any other plan. It was because of orders coming from the other end of the Avenue that this plan and this plan alone should be put through the House, and because it is the pet project of the Secretary of the Treasury.

Mr. ALEXANDER. Will the gentleman yield?

Mr. GREEN of Iowa. I can not refuse to yield to my friend from Missouri.

Mr. ALEXANDER. Did not the Republican national platform declare for discriminating duties, and why did not the minority offer amendments to consider it?

Mr. GREEN of Iowa. I think I am disclosing no secrets of the committee. The fact is that the minority had no opportunity of proposing any other plan. This bill was introduced one day and reported the next. Not half the members on the Democratic side, if they spoke their real sentiments, would favor it. Even the distinguished gentleman from Missouri, the chairman of the committee which reported the bill, at a previous Congress introduced a bill the purpose of which was to build up our merchant marine by discriminating duties.

A similar bill which was introduced last year failed to pass because so many on the Democratic side were openly opposed to it. The speech of the distinguished gentleman from Virginia [Mr. SAUNDERS] condemned the proposition in immeasured terms. The bill has now been slightly changed, the only change of any importance being the provision that the Government should go out of the ship business at the end of five years.

But, Mr. Chairman, this will be just about the time when the scheme is fairly set in motion. It is indeed a beautiful plan. It provides for ships in the future to meet present emergencies, and practically admitting that the proposition is neither workable nor feasible as a continuing one, also provides that we should get out of it as soon as we can.

Mr. Chairman, I am not so much worried as some others with reference to the Government-ownership features of the bill. When a work can be carried on successfully by the Government for the benefit of the people, or a large portion of them, I am in favor of the Government taking hold of it.

If the purchase and construction features of the bill would help either present or future conditions, I would not oppose it merely because Government ownership was involved. Private profit must yield to the public good, but in all this debate no man has claimed, nor will anyone claim, that any relief will be obtained for present conditions, and no one has undertaken to explain how the situation in the future would be benefited by the bill. We will, of course, get some American ships in the course of time, but nobody denies that it will cost us far more to operate them than ships sailing under a foreign flag. I have been astonished to hear gentlemen say that private capital of this country would not go into the ship business under ordinary conditions. What they mean is that it will not invest in ships to be run under the American flag. Millions—far more than is provided for under this bill—have been invested in this country in operating ships under the flag of some other country. Some of these on account of the war have recently come under the American flag. The people of the Middle West would like to see the American merchant marine rehabilitated, but they are not willing to pay too high a price in order that they may indulge in the high-flown sentiments over the fact that the American flag waves over the seven seas. Can they get an American merchant marine at a reasonable price through some sensible and practical plan? I answer "yes." The Republican platform of 1908 declared in favor of discriminating duties for this purpose. Under this plan, and in the early days of the Republic,

we built up a merchant marine which in proportion to the population was the greatest on earth. With the abolishment of the discriminating duties there came a gradual decline. Of course, as long as wooden ships were used exclusively and they could be built cheaper in this country than elsewhere and with operating costs only slightly larger than that of foreign vessels, American skill and enterprise for a long time survived the abolishment of these discriminating duties through the act of 1828. To-day no man claims that a ship can be built or operated under the American flag as cheaply as it can be under the control of foreign nations. The operating cost alone is over twice or three times as much, depending upon whether comparison is made with European or Asiatic ships. Discriminating duties would not only remedy this condition but would make the foreigner instead of the American taxpayer pay in building up the American merchant marine.

It is said that discriminating duties provoke retaliation, but here we have the greatest advantage over the foreigner. Our ships never engage in the indirect trade by which they would carry freight from one foreign country to another, whereas English, German, Norwegian, and other ships carry goods not merely from their own country to us but from the United States to countries which are also foreign to them. We have the advantage in this game of retaliation if it should be undertaken. It is true that discriminating duties would not be likely to give us fast passenger ships or ships for the high-class freight which is often carried on fast boats, but this would be easily taken care of if we were not so foolish as to pay enormous sums to the foreigner for carrying our ocean mails. If we had required all our outgoing mails to be carried under the American flag and paid a reasonable price for this service, we would have long before now been supplied with this class of ships. Of course, this would be somewhat in the nature of a subsidy, but this bill is the most gigantic subsidy ever proposed in this or any other country. True, it is ingeniously covered up, but this is just what it amounts to, after all. The fifty millions expended for the benefit of some one who leases ships costs the American taxpayer just as much as fifty millions paid to people who construct the ships themselves, and if it was proposed to expend one-half this sum in direct subsidies a howl would go up that would rend the skies.

Mr. Chairman, this bill is like the other administration measures that have been put through Congress since the present occupant of the White House controlled the situation. Such beautiful promises have been made as to what these bills would accomplish, such radiant hopes were aroused as to the benefits which would accrue, that many upon both sides, fearing that the people would think, if they voted against these measures, that they did not desire to see these hopes and promises fulfilled, have been led to cast their votes for them, and some may even vote for this bill. The result has been that we are loaded down by new boards and commissions, secretaries, departments, and hordes of new officeholders, with Government expenses constantly rising higher and higher in the millions, until with an empty Treasury we are compelled to sell the Panama Canal bonds, which a Republican administration had carefully saved and set aside, and to what good or for what benefit? None that anybody has been able to discover. These hopes have been disappointed and the promises have been unfulfilled. Nothing has resulted but the ever-increasing bill of expenses and ever-increasing multitude of officeholders. The result will be the same with this bill—a new commission, practically a new department, more officeholders, more expense, and nothing else. [Applause on the Republican side.]

Mr. BYRNES of South Carolina. Mr. Chairman, I am satisfied that the statement of the gentleman from Iowa [Mr. GREEN] will not be corroborated by any member on the Merchant Marine Committee, either on this side or that side of the House. No man on our committee from the Republican side will contend that he was denied an opportunity to present any amendment to the bill while it was being considered by the committee. Certainly you will not deny that there was nothing to prevent you from urging anything you wished in the minority report.

Mr. MANN. Will the gentleman yield?

Mr. BYRNES of South Carolina. Yes.

Mr. MANN. This bill was introduced May 8 and reported May 9. Great opportunity there was to offer amendments.

Mr. BYRNES of South Carolina. Oh, before the bill was reported there was a meeting of the committee at which the minority was present, and they will not assert that they were denied an opportunity to present amendments.

Mr. MANN. But it was not in print until May 9.

Mr. BYRNES of South Carolina. The gentleman from Illinois can not fool himself in that way. This is merely a reprint of a bill that had been before the committee day after day, and no member of the committee will support the statement of the gentleman from Illinois.

Now, I remind my good friend from Indiana, who has spoken about this being such an inopportune time to build vessels, that he would have us believe that men of business ability, men of intellect, are to-day having built in American shipyards more vessels than ever before, and, yet, when it is proposed that Uncle Sam shall go into the business, you say that it is a demonstration of incapacity, when it is only proposed to have the Government do what the business men of America are doing to-day.

Another thing, the gentleman from Indiana [Mr. WOOD] spoke of his wonderful interest in behalf of American labor. He says that this provision authorizing the purchase and the construction of ships abroad if fair treatment is not accorded the board by American shipbuilders will drive American labor out of the shipyards. He says it will prevent the circulation in this country of several million dollars that ought to stay here for the benefit of American labor. But when he states that, he does not consider that last year we spent for freight that went to foreign shipowners $300,000,000 that ought to be in circulation in America. He has no desire to stop that payment to foreign shipowners. It is a wonderful inconsistency.

I might ask him again to read the remarks of that distinguished candidate for the Republican nomination for the Presidency, Ex-Senator Burton, who told you several years ago that the American flag would never float from the masthead of an American vessel until you did away with the provision which prevented the citizens of the United States from going into shipyards the world over and constructing vessels to engage in foreign commerce.

Why do they not follow him to-day——

Mr. FESS. Will the gentleman yield?

Mr. BYRNES of South Carolina. No; I can not yield right now; I want to tell you something else. The purpose of this provision is to do what? The purpose is to insure fair treatment of the United States through a shipping board. You talk as if it were something unheard of. What is the fact? The fact is every last one of you has been voting for a similar provision in the naval appropriation bill every year. Take the naval appropriation bill for 1909 and what does it provide? It says this, as to ships to be built under the bill:

> And in all their parts shall be of domestic manufacture; and the steel material shall be of domestic manufacture and of the quality and characteristics best adapted to the various purposes for which it may be used in accordance with specifications approved by the Secretary of the Navy, provided contracts for furnishing the same in a reasonable time, at a reasonable price, and of the required quality can be made with responsible parties, and of the two first-class battleships provided for in this act not more than one shall be built by one contracting party.

You say they shall be bought from domestic manufacturers, provided you can secure them in a reasonable time and at reasonable prices. That is the provision we place in this bill. What happened to this? This very provision, which was placed in the naval bill to protect domestic manufacture, was, according to the chairman of the Committee on Naval Affairs, stricken out of the bill on motion of a Republican Senator. You tell me it will have a bad effect? Let me tell you what the effect was. Here is the testimony of Mr. Grace, who testified before the Committee on Naval Affairs during the consideration of the armor-plate bill. What did he say? He said that in 1912 he submitted a bid for $490 for a 14-inch shell, and when that provision was stricken from the bill and the bill was left practically as we now propose to leave this bill the next bid that was submitted by the company represented by Mr. Grace was for $315 per shell instead of $490 per shell. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. BYRNES of South Carolina. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from South Carolina? [After a pause.] The Chair hears none.

Mr. BYRNES of South Carolina. That, my friends, was a direct saving of $175 per 14-inch shell to the American taxpayer. Did you object to it then? No; you never objected to it until this bill was brought in and the proposition is submitted to you to furnish an American merchant marine to the people of America; and when it is, because it comes in conflict with the Shipping Trust, you Republicans in this House rise in holy horror and demand that there be stricken from the bill an authority you willingly permit to be carried in the naval bill.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. BYRNES of South Carolina. No; I have finished.

Mr. MANN. Mr. Chairman, I ask unanimous consent that my colleague [Mr. CANNON] may proceed for 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois? [After a pause.] The Chair hears none.

Mr. CANNON. Mr. Chairman, I do not know that I shall use the 10 minutes, but I desire now to ask unanimous consent to extend my remarks in the RECORD.

Mr. ALEXANDER. Mr. Chairman, I make the same request.

Mr. HARDY. Mr. Chairman, I make the same request.

Mr. MOORE of Pennsylvania. I ask the same privilege.

Mr. PRICE. I make the same request.

The CHAIRMAN. Is there objection to these requests? [After a pause.] The Chair hears none.

Mr. CANNON. Mr. Chairman, I have heard this matter back and forth from one side of the aisle to the other about subsidies, about wages, about labor, about the merchant marine, for 40 years, and I had just as well be frank with the House. I succeeded, as the leader of the minority on the Post Office and Post Roads Committee, in 1877, with an overwhelming Democratic majority in the House, in turning down a ship-subsidy bill reported by the gentleman from North Carolina, I believe, now dead, Mr. Waddell. So much for that. I succeeded upon this ground which I hold now, that in this country, a new country, developing as we are—and we have greatly developed since 1877—with all the burdens that our people bear, that we can protect labor of the United States against the products of foreign labor that is paid less than our labor only in one way, and that by a tax on foreign products seeking our markets gathered at the customhouse equal to the difference in the cost of production at home and abroad. This we can do for we are supreme in our territory. [Applause on the Republican side.]

But when we seek to compete on the world's highway—all the oceans of all the world—in the carrying trade, we can not do so successfully unless we sail our ships at a cost equal to what it costs the world to sail its ships. This can only be done in two ways—one by reducing the wages of our American sailors, the other by granting aid from the United States Treasury to make up the difference we pay and which the world pays.

I listened to the speech yesterday of our honorable Speaker, for many years my political opponent but my personal friend. I do not know whether I can read in this light—but I am not going to read much—but he very strongly said, in supporting this bill:

> There is no use to beat about the bush. We spend $300,000,000 a year for ocean freights, all paid to foreigners nearly, to foreign steamship companies. I am in favor of paying that money to American ships under the American flag, giving employment to Americans on the high seas and American shipbuilders on shore.

Mr. HARDY. Will the gentleman yield for just one question?

Mr. CANNON. The House has been kind to me. I yield for a question.

Mr. HARDY. Is it not a fact that the shipowners to-day complain of the seaman's bill because we tried to make American seamen?

Mr. CANNON. The seaman's bill, I think, added another weight against operating our ships upon the seas. But I am not speaking about the seaman's bill now; I am speaking about the conditions that obtained before the seaman's bill.

Now, take Japan. It costs us double and more to compete with Japan upon the high seas, but not so much as that when we compete with Great Britain or with Germany. It only costs us 33 to 50 per cent more, or did before the war. I want to be exactly fair and not color anything one way or the other.

Now, I have great admiration for the frankness of the honorable gentleman from Virginia [Mr. SAUNDERS], a member of this committee. I do not think the word "subsidy" scares him, if he is for that principle. He says it is "aid from the Treasury." So is subsidy an aid from the Treasury; but our Democratic friends have so long been crying "subsidy," "subsidy," "subsidy," that, as our honored friend, the Speaker, said yesterday, he never had and never would vote for a subsidy.

Mr. DAVIS of Texas. Amen!

Mr. CANNON. I get an "Amen" from over on that side. It comes with reason and without reason. [Laughter.] It is the substance you want. "The letter killeth, but the spirit maketh alive."

Now, then, I must hurry along. If a bill passes bearing aid from the Treasury, is this a proper time to pass it? You provide for $50,000,000. How far will it go? Why, gentlemen, it has already been stated, I believe, although I did not hear it, that nine months ago there were 76 ships amounting to 310,000 tons in construction in our shipyards, and to-day there are 360 ships, the tonnage of which, when completed, will be 1,067,000 tons. To-day, with the price of labor that we pay—higher than it ever was before—how many ships would your $50,000,000 build? How much would it pay for? Five hundred thousand tons; that is all.

Now, you say upon that side that you have to have 60 per cent of the tonnage in our foreign trade in American ships, flying the flag if we are to control and compete on the world's highway. Well, how far will $50,000,000 go? If you are to get 60 per cent, and if the Government goes into this business it must go the whole length, because nobody under our conditions can compete with the Government. How much would it cost? You can not place orders now at $100 a ton. It would cost $1,000,000,000 at least, and I guess you could not begin to do it at that price. Are gentlemen in favor of that policy? I think not. I do not believe the gentleman from Texas [Mr. HARDY] or the gentleman from Virginia [Mr. SAUNDERS], members of this committee, would have voted for this bill if they did not have a better excuse than that which satisfies most of you. However, I will just withdraw that part of my remarks, because I do not desire to be personal and say what one man would do and what another man would not do. But you would not have voted for this bill, many of you upon that side, had it not contained the provision that after five years, when the war has closed, these ships will be disposed of either by lease or by sale, and that they must be sold or leased to an American citizen.

Well, where does that place you? Fifty million dollars; 50 ships! It does not amount to anything to speak of. You are going to sell them. They cost you $50,000,000, and that is gone. What could you get for them? Why, it would be a thing that you would apologize for until you would drop into your graves if this bill goes on the statute books and it turns out in that way. All for what? Is it sound from an economic standpoint? Nay! Nay! Is it sound from the standpoint of good, common sense? Nay! Nay! From what standpoint is it sound? I do not desire to be offensive in my remarks, but if the Secretary of the Treasury had not invented this policy and had not made speeches——

The CHAIRMAN (Mr. RIORDAN.) The time of the gentleman has expired.

Mr. SAUNDERS. Mr. Chairman——

Mr. MANN. Does the gentleman from Illinois wish to have more time?

Mr. MEEKER. Mr. Chairman, I ask unanimous consent that the gentleman have five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. CANNON. I believe the President followed the Secretary of the Treasury, but, whether he did or not, they are both occupying the same position. That is part of the policy that is put up to the Democratic side of the House to pass. Now, if I could just stand you up and swear you, and say, "All you who love that policy, all of you who in your sound judgment and in your hearts believe it is right, stand up," I believe that not half of you would stand up. But yet that is the policy of the President. Well, that is what he wants; that is what the Secretary of the Treasury wants and, willy-nilly, you will pass it if you can and trust to Providence. Well, Providence has taken care of you, my Democratic friends, a good many times——

Mr. DAVIS of Texas. Amen!

Mr. CANNON (continuing). When I thought He ought not to have taken care of you. Always wait until the full sentence comes in before you say, "Amen!" [Laughter.]

Let me tell you another reason why we can not compete upon the world's highway. But before I do that, let me say that they talk about $300,000,000 paid to foreigners. Well, I used to hear earnest people on this side who wanted subsidies talk about the same thing. You know very well that great amounts of American capital have gone into foreign ships. Why? Because the labor for operation is less. Now, I think everybody will admit that that is true. But, after all, if you get service upon the world's highway, where we can not compete and where our laws do not extend—if we get good service—is it not legitimate to take that service at the lowest price? It is different from protection, because here we are supreme within our borders. You get the distinction.

Now, they talk about capturing the South American trade. It is a wonderful thing. Why, do you know, our trade with Asia last year was one-half greater than it was with South America? Our exports to South America in 1914 were only 5 per cent of our total exports to the world.

They are competitors with us in substantially everything except nitrates, rubber, and coffee. One reason why we have not the South American trade is that they, being our competitors, do not buy greatly of us. We will get the South American

trade, gentlemen, when the time comes, and not before; only when the same amount of capital, the same amount of energy, the same amount of skill, will bring the American citizen better returns in South America than by keeping his own market. [Applause on the Republican side.]

We have just scratched the surface of this country. We have 100,000,000 people. The Speaker said the other day that the time was not far distant when we would have three hundred or four hundred or five hundred million people. When we are as fully developed as Europe is, where 300,000,000 people are fighting for the mastery, we shall support 700,000,000 people, and we have a better country to develop. Therefore, as a business proposition, I am for the Republican policy of protection at the customhouse. That is real protection. When you get out on the world's highway and undertake to sail ships on the oceans of all the world, to compete, you have to pay no more than the world pays for similar service.

Now, I think that is about all that I wanted to say. I have asked unanimous consent to extend my remarks, and they will not be very lengthy when I do extend them. I do wish you would adopt this amendment, that the Committee of the Whole should adopt it, to strike out this section and let this be an administrative measure only, because if you buy these ships at three or four times what they are worth, it will bring scandal and graft untold, that will not only make you but every American citizen bow his head in shame. [Applause on the Republican side.]

This ends my remarks in the House. However, under the leave to Members to revise and extend their remarks upon this bill, I print as an extension of my remarks, as follows:

It is said that we once had control of the sea and that our flag was known in every port of the world. That is true, but it was a time somewhat like the present. All Europe was engaged in war, and the United States, as a neutral power, was encouraged to take command of the sea. Our ships were welcomed everywhere because they were neutral and immune from attack. They could carry the commerce of the belligerent powers without attack, and they did. Americans, every ready to venture in enterprise which promised returns, built ships and engaged in international commerce. They were successful until peace returned to Europe and they again came into competition with the cheaper labor of Europe in building and in sailing ships. Then we lost because we could not compete with that cheaper labor in a field that was international, and we had opened to us better opportunities for better returns for labor and capital in developing our own country, building railroads, opening up new agricultural territory, and trying to supply our own needs by manufacturing what we consumed. We could protect our labor at home with taxes at the customhouse, and we did. Since 1850 we have doubled our wealth every 10 years, a record made nowhere else in the world in any time.

To-day Europe is again engaged in war, and there is again an opening for American ships. But need we look to the Government? Why, every shipyard is now crowded with work, and they have contracts to run for several years. Private capital has come forward to meet the opportunity and asks no aid from the Government. Why, then, should the Government at this time become a competitor of private capital in such an undertaking? It can only embarrass those who are willing to take the risk and discourage an enterprise for which we have been waiting many years for private capital to engage in.

Mr. SAUNDERS and Mr. WM. ELZA WILLIAMS rose.

The CHAIRMAN. The Chair will recognize the gentleman from Virginia [Mr. SAUNDERS].

Mr. WM. ELZA WILLIAMS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

Mr. REILLY. Mr. Chairman, I ask for the same privilege.

Mr. DICKINSON. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to these several requests?

Mr. MANN. Reserving the right to object, I just want to interject this little remark in the RECORD, so that it will be in the RECORD. Gentlemen on that side of the House having refused to consider the bill properly now want to make it appear that they have made speeches that have not been made.

The CHAIRMAN. Is there objection.

There was no objection.

Mr. LENROOT. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LENROOT. I desire to inquire the present status of the question before the House.

The CHAIRMAN. In what respect?

Mr. LENROOT. I understood the debate had been exhausted on this amendment.

The CHAIRMAN. The debate has been exhausted.

Mr. SAUNDERS. I move to strike out the last word, Mr. Chairman. I do not think that the action of the gentleman from Wisconsin was very gracious after we had extended the time for various Republican speakers, in one instance for as much as 10 minutes.

The CHAIRMAN. The gentleman from Virginia moves to strike out the last word.

Mr. SAUNDERS. Mr. Chairman, the gentleman from Illinois [Mr. CANNON] repeatedly emphasized the statement that it is impossible, under present conditions, for an American merchant marine to compete for the deep sea trade without Government aid of some sort. That is perfectly true. This bill undertakes to afford a measure of aid, and your side rejects it, on the ground that it is inadequate and insufficient, in a word that it will affect too small a proportion of the trade to be seriously considered.

Be frank with us, and tell the House that not a Member on your side has offered a single constructive proposition, either in the course of the present debate, or in the consideration of the bill before the committee, looking to aid of any sort that will enable American capital to overcome the difficulty with which it is confronted. [Applause on the Democratic side.]

Are discriminating duties the remedy, then why was no amendment to that effect submitted to the committee? The fullest opportunity was afforded to offer such an amendment, when the bill was under consideration in our committee. A like opportunity is still open. Why not avail yourselves of it?

The country will question the sincerity of your assertions, and the sufficiency of your remedy, if you delay much longer to vindicate the one, by submitting the other. Is there a gentleman on the minority side of the House, who has introduced a bill in favor of discriminating duties? What is your remedy, what do you suggest as a cure, for the conditions that thus far have made a privately owned merchant marine in foreign commerce, an impossibility?

Mr. Chairman, consider for a moment the inconsistency of the attitude of the opposition. First they say that the amount of the appropriation that this bill provides is too insignificant to accomplish anything: that the bill so far from being a serious contribution to the movement for the restoration of our merchant marine, is a colossal joke, that merits nothing but ridicule and contempt. Then another Member on that side will rise and tearing a passion to tatters, will denounce the bill on the ground that the Government aid proposed, and the possibility of operation of a few Government ships for a limited period, will paralyze the present boom in privately owned shipping, and drive all privately owned ships from the high seas, leaving that field to the foreign ships, and the wretched handful of Government-owned ships which the first speaker has denounced for their pitiful inadequacy to accomplish anything worth while toward relieving the public from the burden of the present extravagant rates. How do you reconcile the two positions? How can the shipping that this bill will provide, be so ineffective for good on the one hand, and so terrifying to, and destructive of private enterprise on the other? Again you contend that the discretion given to this board to award preference to American yards, but to build abroad, if the bids of the American yards are unreasonable, will destroy the American yards. Precisely the same provision was embodied by the Republican Party in an act with respect to the purchase of the materials required in connection with the construction of the Panama Canal. Was that provision destructive of American manufacturers? Not at all. It merely served to protect the Government against oppression and unfair combinations to secure extravagant prices for American materials. That will be the effect of the like provision in the pending bill.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. SAUNDERS. Yes.

Mr. MOORE of Pennsylvania. An effort was made to do that, but it was voted down. I offered that myself.

Mr. SAUNDERS. The gentleman is mistaken. The statute is now on the books. It was passed in 1906, and expressly provided that if the bids of American manufacturers were not reasonable the purchase of materials could be made abroad.

Mr. MOORE of Pennsylvania. If the gentleman pleases, I have made points against that provision, and on one occasion I think, helped hold the House up over night until the point was decided.

Mr. SAUNDERS. I will show the gentleman the act. I am not in the habit, Mr. Chairman, of making a positive statement unless I am supported by the facts. I will read the act itself. I read:

Joint resolution providing for the purchase of material and equipment for use in the construction of the Panama Canal.

Resolved, etc., That purchases of material and equipment for use in the construction of the Panama Canal shall be restricted to articles of domestic production and manufacture, from the lowest responsible bidder, unless the President shall, in any case, deem the bids or tenders therefor to be extortionate or unreasonable.

Approved June 25, 1906.

[Applause on the Democratic side.]

Mr. MOORE of Pennsylvania. Is the gentleman quoting from the Panama Canal government act? I am referring to that act.

Mr. SAUNDERS. I am quoting from a statute of the United States passed in 1906.

Mr. MOORE of Pennsylvania. Oh, I was not here when that act was passed, but I know Republicans have opposed those foreign purchases for American ships, and I have been one of them.

Mr. SAUNDERS. I have not referred to, or assailed the gentleman's personal record. I merely put in evidence the fact that the Republican Party enacted a law to the effect that if the bids of domestic bidders, for the materials needed in the construction of the Panama Canal, were unreasonable the authorities were authorized to buy abroad, and that this act did not destroy American industry. The law was a wise one, but a like provision in the pending bill, is the subject of bitter and unreasoning attack. In so doing our Republican friends challenge the propriety of their former attitude. Preferential consideration is given to American yards, but it is not proposed that in the construction of these ships, the Government shall be held up, as it has been held up in the matter of powder—and armor plate. If the domestic bids are unreasonable, they can be rejected and ought to be rejected. Under such circumstances the Government should have the authority to buy abroad. This authority has been conferred by the bill.

Mr. MONDELL. Mr. Chairman, I have never favored taxing the American people to pay a general subsidy to the over-seas carrying trade of the country, and I am opposed to this bill because it is the crudest, most unwise, and least defensible of all of the subsidy bills that have ever been presented to this Congress. It is a subsidy pure and simple, not to the carrying trade of the country generally, but to a certain chosen and hand-picked portion of the carrying trade to be selected by the shipping board to receive certain benefits, which benefits shall not be in anywise reflected on the general over-seas carrying trade of the country. There are certain things which as a Nation we need and need badly on the high seas. We need large, swift, regular steamship lines between our great Atlantic and Pacific ports and the great ports of South and Central America and the Orient, in the interest of our trade, our diplomacy, and our good relations with those countries. We need the naval auxiliaries that such lines would give us. But neither of these public purposes would be served by the passage of this bill, for by its very provisions the bill subordinates these public purposes to the ordinary uses of over-seas commerce, and for the benefit of a favored class and number of ships that under no circumstances or conditions could equal one-tenth of the carrying trade of the Nation.

The bill in its provisions of regulation will lay a very considerable additional burden upon all American high-seas shipping, whereas the ship purchase and operation provisions of the bill, carried out to the fullest extent, accomplishing all that anyone can hope they may accomplish, can not be of any benefit except to the very small and limited number of ships that may be provided for under the measure and the few shippers that may use them. It is an unwise, ill-advised effort to yoke together subsidy and public ownership, and to turn them loose upon the high seas in the hope that in some miraculous way that no one can understand or foresee it may accomplish some slight good. [Applause on the Republican side.]

I share in the desire to increase the merchant marine of my country. I am anxious to reduce the three hundred million we pay per annum for foreign bottoms, but I am even more anxious to reduce the two hundred million per month we are importing from foreign shores. If our Democratic friends would make an attempt to reduce the tremendous importations instead of loading a burden on the American people in a crude subsidizing of certain favored shipping they would be serving their country better.

Mr. SLOAN. I am opposed to contributing $50,000,000 from the Treasury of the United States to buy inflated priced ships for the Government. By the way, that is impossible at this time, as there is less than that sum in the Treasury of clear legal tender money. I am equally opposed to mortgaging the future by sale of Panama bonds, placing a burden upon our children of $50,000,000 for them to pay for ships to be purchased now at the highest price ships have ever brought, not only in the history of the United States but in the history of the world since Commodore Noah started out with his water craft and the scoffers of that day looked around, saw the gathering flood, and then asked him to name his price for a ship. [Laughter.]

Yet the inspiring genius of this legislation, still active in its support, no doubt will find a way to go into the market and purchase ships at whatever price necessary to obtain them, and place that burden upon our children. They probably will, God bless them, forgive us for it, but they will have a sublime contempt for our business judgment in investing at this time. The western man who bought water in a dry season to hold for use when the floods came had nothing on the financial genius who conceived this legislative enterprise.

I object to the investment for a larger reason, and that is the reason unveiled by the Speaker of the House in his address yesterday, unveiled with that frankness which compels us all to love and admire him.

Gentlemen will recall that the first bill presented in this House for this legislation, two or more years ago, stated clearly that it was to build up our South American trade. That appeared also in the committee reports to the House and Senate. But now the purpose up until yesterday and to-day was, if not veiled and concealed, was kept ably secluded. Because while I have always understood that the main purpose was to build up this South American trade, nothing in the bill, committee report, or responsible speech emphasized that fact till the Speaker declared the South American trade as the larger end to be served by passage of this bill.

I have no objection to building up trade with South America, with Europe, or with any of the continents of the earth, but I do not desire that trade shall be built up with South America at the expense of the American Treasury so as to give a special discrimination against the people whom I represent and those living in that part of the country whence I come.

The following is a portion of an editorial taken from the Wallace Farmer, one of the greatest farm journals in the world. I knew well its able and venerable founder in his lifetime. The last time I met him we discussed the adverse line of legislation begun and carried out in Congress against the men and women of the Northwest and the industries through which they were making that section the best and most useful part of the world—reciprocity, so-called farmers' free list, Underwood tariff law, and now this Government-owned shipping bill, with the South American trade as its objective:

But if we should be able to secure a large share of the South American trade, what effect will it have on the agriculture of the United States? What will it mean to the corn-belt farmer, who has been furnishing most of the corn consumed in the United States, and in some years has been exporting? What will it mean to the wheat grower in the United States? What will it mean to the live-stock grower and feeder, not only in the corn belt but in the West?

If we should establish a line of merchant vessels for the South American trade, either by Government subsidy or through Government ownership, these vessels would take down there the products of our manufacturing enterprises. What will they bring back? They must have a return loading. What will South America sell to us in return for what they buy from us? Naturally they will expect us to take their agricultural products, their corn and their small grains, their cattle, sheep, and hides. What effect will that have on the agriculture of the West? If we expect South American people to buy from us, we must be willing to buy from them and we must buy what they have to sell.

For a generation the farmers of this country sustained a high protective tariff on manufactured products, and during that period they were given a high protective tariff on agricultural products. Few of them realized that this tariff on agricultural products was absolutely worthless to them, because we had a surplus of agricultural products which we were selling at prices with which no other country could compete. When, a few years ago, prices of grain and live stock reached a point at which other countries could compete, what happened to us? The paper tariff, which had been of no value up to that time, was very promptly taken off as soon as it became worth something, and we are not likely to get it back if the efforts to establish relations with South America are successful.

The price of corn, for example, is governed very largely by the surplus which we have to sell; not necessarily the surplus which goes out of the country, but the surplus which goes out of the country in which it was grown. This amounts to not more than 20 per cent of the total crop Speaking roughly, the price is fixed by a surplus of, say, 500,000,000 bushels. The Argentine surplus of corn is in the neighborhood of 170,000,000 bushels, or about one-third of our surplus. Now, if the price is fixed by our surplus of 500,000,000 bushels, what will happen if we add to that surplus 170,000,000 bushels from Argentina? We can not say definitely, but we would estimate the effect to be a reduction of not less than 5 cents a bushel—probably more. What effect will this have on the price of our land, remembering that this 5 cents is taken out of the profit of the farmer?

Not alone the farmers but all of the citizens of the West should consider this situation. No one can foresee now just what effect this war and its termination will have upon the United States; but when we consider that the prosperity of the West depends upon the prosperity of its agriculture, it seems high time that we should take note of the probable developments that may very injuriously affect us.

It seems to us the time has come for the people of the West to consider whether they should not send to Congress men who will represent the West and its interests, rather than men who will represent this party or that party.

South America, and especially Argentina, is our greatest rival for the markets of what are now, so far as farm products

are concerned, free-trade cities of London and New York, Boston and Liverpool, Philadelphia and Birmingham, Baltimore and Manchester.

Argentina exports more beef and veal than any other nation on earth. Argentina exports more corn than all the other nations of the earth, including the United States. The United States imported 30,000,000 bushels of corn the first two years under the Underwood law and nearly 400,000,000 pounds of beef and veal in the same time, both coming largely from Argentina. Argentine land is as fertile as ours, but worth only a fraction as much on the market; its labor costs only half as much; and before the European war ocean freights to our ports from Argentina were from one-fifth to one-half as much as our rail from Nebraska to the Atlantic and Gulf ports.

The trade to be built up in South America is that trade which will compete with the products of the farmers of the Northwest. If ships are bought at fabulous prices and cargoes are carried from United States ports to South American ports, those ships, unless they be operated at a great loss, must carry cargoes back, and the cargoes carried back must be of those products of which those places in South America have a surplus. [Applause on the Republican side.] They have a surplus of wheat, corn, and grains generally, alfalfa, beef, veal, and mutton and wool, the same as we produce throughout the great Northwest. I do not think it fair to the great producing portion of this country that this Congress shall first take off every vestige of protective duty on its products as did the Underwood law; keep out of the Treasury of the United States during the last two and one-half years $120,000,000 that should have been collected on farm products at our ports, and farm products competing with our Northwest products; then, in addition, as a crowning discrimination against the farmers of the United States, go a step further and, as a special premium to stimulate that discrimination, go into the Treasury of the United States, or, rather, sell $50,000,000 of bonds in the interest of the farmers of Argentina, Chile, Uruguay, and Paraguay against the farmers of Iowa, Illinois, and Nebraska to buy ships to cheapen transportation for the Joses, Miguels, and Pedros of South America. [Applause on the Republican side.]

Mr. OLNEY. Mr. Chairman and Members of the House, I realize that debate is limited upon this shipping bill, and I intend to consume only two minutes of the valuable time of the House.

It seems to me that American prosperity has been built up upon private competition and I therefore can not favor a shipping bill, a linking of Government ownership with private capital, which, it seems to me, would strike at the very vitals of American industry. [Applause on the Republican side.] Certain Members on this side of the House have told me in confidence that they were voting for this proposition under protest. I realize that no words of mine, a new Member, will convert the Members upon this side of the House, but I ask you to vote according to your consciences and beliefs. The chances of my election next fall are in the balance, and I may be crucifying myself politically here to-day by voting against this shipping bill, but at least I shall be at peace with my conscience [applause on the Republican side]; and I believe that by voting against this bill I shall be voting for the best interests of my people in my district, Massachusetts, New England, and the Nation. Although Quincy, Mass., the home of the Fore River Shipbuilding Co., one of the most prosperous and one of the largest private shipyards in the world, is in my congressional district, I am not altogether actuated by personal motives in registering my protest of the passage of this act, but in the belief that the happiness and prosperity of our great Nation were made possible by healthy, private industry and competition. I am constrained to deplore a partnership of Government and private capital, which would throttle and discourage investment by corporate and individual capital. [Applause on the Republican side.]

Mr. HUMPHREY of Washington. Mr. Chairman, there are several amendments to this bill of great importance that I should like to have offered, but it is perfectly apparent that I will not have the opportunity, because that portion of the bill will not be reached before 4 o'clock, the time fixed by the rule for ending all debate.

Under these circumstances, Mr. Chairman, it becomes impossible for me to represent my portion of the country as should have been done and would have been done if the bill had proceeded under the ordinary rules of the House.

The purpose of this filibuster has been perfectly apparent. My good friend from Missouri intimated that the Republicans had been carrying on a filibuster, and yet he remained in his seat for hours and permitted the discussion out of order to take place on the bill. That is something very unusual for the chairman of a committee that wishes to hurry along the reading and the passage of a bill that he is in charge of.

Mr. ALEXANDER. Will the gentleman yield?

Mr. HUMPHREY of Washington. Yes.

Mr. ALEXANDER. A number of times I have tried to check debate, and the objections have come from that side of the House.

Mr. HUMPHREY of Washington. Oh, the gentleman does not have to ask unanimous consent to limit debate. The gentleman has been here long enough and is familiar enough with the practice to know that when you have five minutes on one side of an amendment and five minutes on the other, that closes debate, except by unanimous consent. The gentleman is not deceiving anybody by the filibuster that has taken place on that side of the House during the consideration of this bill. We saw the procession a little while ago through the tellers, and the way it moved one would think that all the lame, halt, and blind in the Democratic Party were passing between the tellers. [Laughter.] The reason why they do not want the bill read is because they do not want to get to the objectionable features in it. We only reached one of them, and on a vote it was stricken out. So, of course, you do not want to hurry and get to any more of those objectionable features.

Mr. SABATH. Will the gentleman yield?

Mr. HUMPHREY of Washington. Oh, yes. I should feel that I had labored in vain if I did not have at least one question from the gentleman from Illinois.

Mr. SABATH. I would like to know if the gentleman remembers how much time he took yesterday and to-day on this bill? If he does not know, I will enlighten him and tell him that he has taken up 45 minutes.

Mr. HUMPHREY of Washington. I might take up the time, but when I took it up I did not waste it, as does the gentleman from Illinois. I use it to some purpose, and not in asking absurd questions.

Now, my good friend from Texas, and also my friend from Virginia, members of the committee, seem very much grieved because the Republican Party has not done anything for the merchant marine. I have been a Member of this House for a good many years, and I am not very proud of the record my party has made on the merchant marine. While they were in power they did not do anything. That can not be said of the Democrats, because every act they have passed has been to drive what few American ships we had left off the seas. First, you had the Panama Canal act, and then you had your discriminating duties downward, a proposition which every man on that side of the House is now ashamed of. Then you passed the seamen's bill that drove the remaining American ships off the sea.

I forgot yesterday to mention the greatest achievement the Democratic Party has to its credit in regard to the merchant marine. A short time ago your party put on the statute books a law that permitted any old tub that floated the seas, wherever constructed, to come under the American flag, and in order to do this you waived the inspection laws and permitted foreign ships that would not pass an inspection; gave them privileges not granted to an American ship. You did more than that. You permitted foreign officers to go upon these vessels, although there were 300 American officers in my city alone that had served their country well, out of employment, and they saw their places taken by foreigners. Under that law you received some vessels under the American flag that belonged to great corporations, but you never received a vessel that did not belong to a corporation. These vessels are commanded by foreigners, were built abroad, and the only thing about them that is American is the flag, and colors in that under this administration are from foreign dyes and stamped upon foreign cloth. Such merchant marine certainly appeals to American patriotism. [Applause on the Republican side.]

Mr. ADAMSON. Mr. Chairman, I have not much to contribute to the gayety of the occasion, nor do I agree to contribute to the alleged filibuster on either side.

Mr. MANN. On that side.

Mr. ADAMSON. I said on either side. I am sure I do not wish to interfere with my amiable old friend, the common scold from Washington [laughter], who would be unhappy if he was not miserable in complaining about the blessed old Democratic Party. [Laughter.] I congratulate my Republican friends on the apparent success of their effort in this case, which was not to defeat the bill, but to kill the time until 4 o'clock this afternoon, so that, as provided by the rule, the rest of the bill would be read without debate and afford them the coveted opportunity of crying "gag" to the country and posing as political martyrs.

That is their game, and because the chairman of the committee in charge of the pending bill has for the last half hour permitted them to debate what they call the most important part of the bill they are endeavoring to cry tit for tat and act "the pot calling the kettle black."

Now, the only substantial argument they have been able to make against the bill is the universal and abounding prosperity of this country under the Wilson administration [applause on the Democratic side], which they say renders this bill unnecessary.

I assure them the bill provides that the moment it appears to become unnecessary in its operation it shall be automatically discontinued. There will be no trouble about that. Whenever private capital wishes to invest and furnish facilities for foreign commerce, and do it honestly and fairly, at reasonable rates, the necessity will be removed and operation under this bill will cease. [Applause.] This is an emergency measure, necessary because private capital will not serve us on fair terms.

It is true that private capital is now building and buying and operating ships at prohibitory freight rates, and that is the reason that it is necessary not so much to buy as build 100 ships but to confer the authority to do it. It will act as a yardstick, it will exert an influence far beyond the number of ships that may be engaged in its operation. [Applause on the Democratic side.] Mr. Chairman, for the last two years ships have sailed the Atlantic and charged as much for one passage as the ship itself was worth. They will get the value of the ship going one way and the value of the ship returning in freight, and then if they had it insured and if it was burned up, they would have three times the price for the ship on one round-trip cruise. Now, if we can secure by private capital enough ships to do the business and secure honest and fair rates of freight instead of having the monopoly increase the rate a hundred or a thousand per cent under the stress of emergency circumstances, then there would be no further use for this bill and the corporation would be discontinued and the Government will withdraw its support. The remarkable thing in this debate is to hear gentlemen belonging to the Republican Party, which has for the past quarter of a century illustrated the doctrine and practice of special privileges and discriminations and graft, come up here and hold up their hands in holy horror and talk about our subsidizing the commerce of the country. Whatever benefits the people benefits the Treasury. When you make the people prosperous, when you save them freight rates, when you improve their facilities for transportation and commerce you make the country rich and you make it possible to enrich the Treasury by reimbursing its deficiencies from the incomes of a prosperous people. [Applause.]

Mr. MANN. Mr. Chairman, I make the point of order that debate is exhausted on this amendment, and I ask for a vote.

The CHAIRMAN. The gentleman makes the point of order that the debate is exhausted on this amendment. The point of order is well taken.

Mr. BENNET. Mr. Chairman, I ask unanimous consent that the amendment be again reported.

The CHAIRMAN. Without objection, the amendment will be again reported.

There was no objection.

The amendment was again reported.

Mr. LENROOT. Mr. Chairman, I desire to offer an amendment to that, the same amendment that was adopted to the original section. After the word "transfer" insert "either permanently or for limited periods."

The CHAIRMAN. The Clerk will report the amendment to the amendment.

The Clerk read as follows:

Amend the amendment by inserting, after the word "transfer," the words "either permanently or for limited periods."

Mr. LOUD. Mr. Chairman, I accept the amendment.

The CHAIRMAN. The question is on the amendment to the amendment.

The question was taken, and the Chairman announced the noes appeared to have it.

Mr. MANN. Oh, I ask for a division on that.

The CHAIRMAN. Is the gentleman propounding an inquiry to the Chair?

Mr. MANN. I asked for a division.

The committee divided; and there were—ayes 113, noes 117.

So the amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan to strike out and insert.

The question was taken, and the Chairman announced the noes appeared to have it.

Mr. MANN. Mr. Chairman, I ask for tellers.

Tellers were ordered.

The committee again divided; and the tellers (Mr. LOUD and Mr. ALEXANDER) reported that there were—ayes 129, noes 156.

So the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York, striking out the section.

The question was taken, and the Chairman announced the noes appeared to have it.

Mr. ROWE. Mr. Chairman, I ask for a division—Mr. Chairman, I will withdraw the request.

The CHAIRMAN. The gentleman withdraws his request.

So the amendment was rejected.

The Clerk read as follows:

SEC. 7. That the board, upon terms and conditions prescribed by it and approved by the President, may charter, lease, or sell to any person, a citizen of the United States, any vessel so purchased, constructed, or transferred.

Mr. GOODWIN of Arkansas. Mr. Chairman, I move to strike out the last word.

Mr. LENROOT. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Arkansas moves to strike out the last word.

[Mr. GOODWIN of Arkansas addressed the committee. See Appendix.]

Mr. JOHNSON of Washington. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Washington offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 6, in line 12, after the word "a," insert "naturalized or native-born," so that the line will read: "naturalized or native-born citizen of the United States."

Mr. JOHNSON of Washington. Mr. Chairman and gentlemen, inasmuch as the distinguished Secretary of War, the Hon. Newton D. Baker, has issued an order, under date of April 24, calling for the discharge of all members of certain crews who are not citizens of the United States, and inasmuch as the Secretary of War has stated positively in that order that by citizens he means native-born citizens, it seems to be necessary to offer this amendment. The word "citizen" appears all through this ship-purchase bill, and the word means in the United States what it has always meant until the present Secretary of War issued an order making a distinction between native-born and naturalized citizens. I have shown the Secretary's remarkable order to a number of Members of the House of Representatives, all of whom at first said it was impossible that any such order could have been issued; that there had been some mistake. But there is no mistake. I have seen the order. It has resulted, to my knowledge, in the dismissal of five citizens, naturalized, if you please, but citizens of the United States nevertheless, employed as sailors on a vessel of the United States in Puget Sound doing Government work for the War Department. The first man who signs the protest to me is John W. Carlson, born in Finland. The second is Alfred Christianson, born in Denmark. The third is L. Hermansen, born in Norway. The fourth man is Carl Thomasson, born in Norway, and the fifth is William Matheon, born in Finland. All are naturalized citizens. Some have been citizens for many years.

Mr. Chairman, fifteen and one-half millions of people of the United States are foreign born. Most of them are naturalized. This order seems to discredit the loyalty of every one of them. It seems to say that their oaths of allegiance mean nothing. Twenty-seven per cent of the population of the district which I have the honor to represent here is foreign born. Nearly all of them have been naturalized and have taken the oath of allegiance to the United States, and I firmly believe that every last one of them meant that oath. Other Members of Congress will make similar affirmations concerning the naturalized citizens in their districts.

Mr. HUMPHREY of Washington. Will my colleague yield?

Mr. JOHNSON of Washington. I yield.

Mr. HUMPHREY of Washington. What is the reason given for the discharge of these people?

Mr. JOHNSON of Washington. I have been unable to get a reason. I have telephoned various branches of the War Department. I have received a letter from the Secretary of War but not an explanation. The exact situation is this: I was notified by telegraph——

Mr. TOWNER. Will the gentleman yield?

Mr. JOHNSON of Washington. Yes; I yield.

Mr. TOWNER. Did I understand the gentleman to say that this order applied to all naturalized citizens in the service?

Mr. JOHNSON of Washington. This direct order apparently does not. It is addressed to the commanders of certain vessels

and requests them to dismiss without delay all members of crews who are not citizens of the United States. Then follow the astonishing words—

by citizens is meant native-born citizens of the United States.

That is signed by Newton D. Baker and dated April 24, 1916.

Mr. TOWNER. Then it does apply to all naturalized citizens?

Mr. JOHNSON of Washington. If carried out far enough, or if other similar orders were issued for other branches of the service. We have foreign-born citizens in all branches of the United States Government and in all Government work. If they are good in one place they are good in another. They are taken into the Army on their first papers.

Mr. GREENE of Vermont. Suppose that such an order had been received by a Union commander at the time of the Civil War, would it not have obliged them to dispose of men like Siegel and Carl Schurz?

Mr. JOHNSON of Washington. Yes; but at a time like this, when we are at peace with all the world——

Mr. BENNET. If that order was issued to the Cabinet of the United States to-day, what would happen to the Cabinet?

Mr. JOHNSON of Washington. That brings up a problem. The proportion of foreign-born members of the Cabinet is about the same as the proportion in the United States. As the gentleman from Nebraska [Mr. SLOAN] remarks, such an order would exclude from the membership of the House of Representatives quite a number of members—Celtic, Teutonic, and Scandinavian, and so forth.

The CHAIRMAN. The time of the gentleman has expired.

Mr. JOHNSON of Washington. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. JOHNSON of Washington. Under the leave just granted to me I shall a little later place in the RECORD the telegraphic and other correspondence concerning this matter, including my protest against the discharge of the men named.

Mr. MOSS of West Virginia. Mr. Chairman, I desire to offer an amendment by moving to strike out the last two words.

Mr. Chairman, I do not think that my colleagues on this side of the House can accuse me of leaving them on many important measures that have come up for discussion. It is only when it is a question between conscience and party that I must decide according to my honest belief. And my honest belief, Mr. Chairman, is that although this bill may have imperfections it will be, if passed, one of the greatest measures on behalf of the American people that has ever been adopted by Congress. [Applause on the Democratic side.]

I want to say, Mr. Chairman, that it is not a partisan question. Every political party in this country has declared for the upbuilding of a merchant marine. Are we going to be content to let it stand that way and simply repeat in the platform year after year that we are for a merchant marine, and then sit here like wooden men and do nothing to build it up? [Applause on the Democratic side.]

Mr. Chairman, those who have invested money in the shipping industry in this country have had ample warning that they must supply this great need of ocean transportation. They have had ample opportunity to do something if they could, and it has been either impossible for them to do it or they have been unwilling to do it. All over this country there is a crying demand for ocean transportation of the products of the mine, the farm, and the factory.

I say that this measure will supply, to some extent, at least, this demand of the farmers of this country, the manufacturers of this country, and the laboring men of this country. They are entitled to be relieved of just such oppression as prevailed in rail shipments before the establishment of the Interstate Commerce Commission. I say they are entitled to relief.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from West Virginia yield to the gentleman from Missouri?

Mr. MOSS of West Virginia. No; I have not the time. Why, they talk about the expense of this thing. Mr. Chairman, the people of this country are losing millions of dollars. Fifty millions is nothing in comparison. Every single month in the year they are losing millions of dollars because they can not get their products transported abroad. [Applause on the Democratic side.]

Before this European war you could transport West Virginia coal to France for $5 a ton, and now shippers are charged $32 a ton, and even at that rate they can not get the ships, and the coal is piled up mountain high at the different ports. [Applause on the Democratic side.]

And yet, Mr. Chairman, I am asked, knowing that instance, knowing of numerous other instances of oppressive and almost prohibitive rates and of absolute lack of transportation facilities, to vote against a bill which I believe, even with its imperfections, will be of vast benefit to the American people. I decline to do it. [Applause on the Democratic side.]

Now, Mr. Chairman, we talk about preparedness for war. Almost everybody nowadays is in favor of it, although only a short time ago many prominent people were opposed to it. But now is the time to prepare for what is coming after the war; and, Mr. Chairman, when we contemplate the competition that will take place in foreign trade, in South America, all over the world, just as soon as this war ends; when we contemplate the fact that our Nation will be left in the lurch, as it has been left for years, simply because we have not enough ships to carry our products, I am unable to see why it is that Republicans on this side of the House should regard this as a partisan issue and should be opposed to the establishment of this service. [Applause on the Democratic side.]

Mr. Chairman, if this bill did nothing else—even though the amount appropriated is inadequate to purchase or build sufficient ships—we shall have established a board to examine into the rates that are being charged by some of these existing ship lines, to regulate those rates, to see that one shipper is not given rebates, to see that all are treated alike; and I submit that even if there is not a single ship purchased this result of regulation and fair and impartial treatment would alone justify the passage of the bill. I am, as a general proposition, opposed to Government ownership when private capital is willing and able to supply a great public demand. But as such ownership under this bill can continue only for five years and, therefore, will not constitute a precedent; and as private interests have demonstrated during the last generation that they will not, or can not, supply this vital need, for one I shall not permit a mere theory to frighten me into voting against this measure of relief, even though I must regretfully differ from my colleagues on this side of the House. [Applause on the Democratic side.]

The CHAIRMAN. The time of the gentleman from West Virginia has expired.

Mr. ROWE. Mr. Chairman, I offered an amendment. The Clerk has it at the desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from New York [Mr. ROWE].

The Clerk read as follows:

On page 6, line 10, strike out all of section 7.

The CHAIRMAN. The Chair directs the attention of the gentleman from New York to the fact that an amendment is pending to perfect the paragraph.

Mr. MANN. Let us have a vote.

The CHAIRMAN. The Chair desires now to appeal to Members of the House to please keep order. Within 15 minutes we shall have reached the point at which the reading is to proceed without interruption.

Mr. MANN. We would like to get a vote on this section.

The CHAIRMAN. There will probably be some confusion about amendments here, and the Chair desires that we should keep everything in regular order. The Chair appeals to the committee to keep order.

Mr. MANN. Mr. Chairman, I understand the debate on this amendment is exhausted.

The CHAIRMAN. There is an amendment pending, offered by the gentleman from Washington [Mr. JOHNSON], to perfect the paragraph. The gentleman from Illinois [Mr. MANN] makes the point that the debate is exhausted. The Chair sustains the point of order. The question is on agreeing to the amendment offered by the gentleman from Washington.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The gentleman from New York [Mr. ROWE] offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 6, line 10, strike out all of section 7.

Mr. LENROOT. Mr. Chairman, I have an amendment which is preferential.

Mr. MOORE of Pennsylvania. I have an amendment, Mr. Chairman.

The CHAIRMAN. The gentleman from Wisconsin [Mr. LENROOT] offers an amendment which is preferential. The Clerk will report it.

The Clerk read as follows:

Amendment by Mr. LENROOT: Page 6, line 13, after the word "or," insert the word "permanently," and after the word "transfer," insert the words "and may charter or lease to any such person any vessel transferred to it for a limited period by the President, but such lease or charter shall not be for a longer term than the period designated in such transfer."

Mr. LENROOT. Mr. Chairman, this amendment merely perfects the amendment which I proposed and which was accepted to the previous section authorizing the lease of these vessels transferred for periods, limited to the time only designated in the transfer, and I trust it will be accepted by the committee.

Mr. Chairman, a word with reference to this bill generally. Up to this afternoon I was in great doubt as to how I would vote on this bill, because, as between a ship subsidy and the principle involved in this bill, I am for the principle of the bill. I have several important amendments that I expected to discuss, and many of them I have been assured would be accepted by the committee, but under existing circumstances, with no opportunity for discussion, they will undoubtedly be voted down. If these amendments are rejected, I shall feel compelled to vote against the bill.

Mr. Chairman, the way this bill has been conducted justifies any Member upon this side of the House in voting against it. If the Democratic side of the House needed any votes from Republicans, they would not have conducted this bill as it has been conducted. It is now 10 minutes of 4 o'clock; all debate will close in 10 minutes. There are 35 sections of this bill and we have reached the consideration of the seventh section only. There will be no opportunity for consideration or discussion of the 28 sections remaining or the amendments to be proposed thereto. Nineteen sections of the bill which have not been considered relate to regulation of carriers by water, a question that has never been discussed in either House of Congress, a question of the very greatest importance, but, under the rule which has been adopted by the Democratic majority and the procedure which has taken place yesterday and to-day, these 19 sections referred to upon this new and important subject will never be discussed or considered in any way by the House. The Democratic majority not only closes the debate at 4 o'clock to-day but the committee having control of this bill have deliberately wasted the time of this House for the past two days so as to prevent consideration of the different sections of the bill upon their merits. [Applause on the Republican side.]

I have never seen nor has any other Member of Congress ever seen the consideration of a bill conducted by any committee as this bill has been conducted, especially this afternoon. In all probability, Mr. Chairman, they will say that it is this side of the House that has consumed the time. I have done everything that I could to expedite the consideration of this bill.

I have called for the regular order and have personally requested the chairman of the committee to expedite the consideration of this bill, as chairmen ordinarily expedite the consideration of any other bill. Only a little while ago the gentleman from Virginia [Mr. SAUNDERS], a Democrat, and a member of the committee, after some time had been consumed upon this side in general debate, took the floor himself and indulged in general debate. I called for the regular order, Mr. Chairman, because I wanted to expedite the consideration of this bill and have some consideration of the very obvious defects in it, but the gentleman from Virginia [Mr. SAUNDERS] then made the pro forma amendment to move to strike out the last word, and then proceeded to discuss, not the amendment that was pending before the House but the general question. Was that attempting to expedite the consideration of this bill upon the part of the Democratic side of this House? They have permitted a little less than two days for the consideration of this bill under the five-minute rule. Immediately following the conclusion of this bill the Porto Rican bill will be considered, which has the unanimous report of the committee, and as to which there is no opposition from any quarter, but upon that bill they make no attempt to limit debate whatever. Following the Porto Rican bill, the District of Columbia appropriation bill will be taken up, and I undertake to say that there will be no effort to limit debate upon that bill, and at least a week will be consumed in debating minor details of the appropriation, and yet upon this bill, involving $50,000,000 of Government money and one of the most important questions that has ever been presented to this House, they compel us to vote upon it after two days of consideration, and that consideration involving only 7 sections of the bill out of 35 sections. I say, Mr. Chairman, that the conduct of the majority members of this committee is inexcusable and indefensible in the premises. [Applause on the Republican side.]

Mr. MOORE of Pennsylvania. Mr. Chairman, I am opposed to this ship-purchase bill because of its paternalistic features. I can speak also for the Maritime Exchange, the Bourse, and the Board of Trade of Philadelphia, all of which have passed resolutions opposing the principle of Government ownership of merchant vessels. The gentleman from West Virginia [Mr. Moss], who preceded me, seems to think this bill ought to pass in order to obtain ships to carry coal abroad. I can not agree with his point of view unless we are ready to embark broadly in the Government control of public utilities in competition with private enterprise. The people generally do not yet believe in the Government ownership of railroads, nor would there be any difference in principle between taking this $50,000,000 of Federal money to buy or build a railroad to run into the coal fields of West Virginia and the taking of it to buy or build ships to carry coal across the ocean.

I can see one possible advantage in owning and controlling the railroad in this, that if we took $50,000,000 of the people's money for the railroad there would be a chance that they might get their coal cheaper in the United States than they do to-day, whereas if we used the people's money to buy and build ships we would do it more for the advantage of the foreigner than for the people of our own country. But that is not enough to justify this proposition of Government ownership.

DRIVING TOWARD PATERNALISM.

Mr. Chairman, it is to be regretted that the people themselves are not better posted on the tendency of this Congress to drive them into debt, taxes, and socialism. There is scant information for the toiling millions about the ease with which great measures fraught with serious consequences are forced through this House. In this instance you are appropriating $50,000,000 out of the Public Treasury under a rule which will require a vote upon the bill before it has been read for amendment. You are now about to come to a vote under your rule, when only 6 pages of the 27 pages of the bill have been read. With the money thus to be taken from the Treasury, you propose to buy or build ships in spite of the fact that American shipyards are working to the limit of capacity and that this vast sum of money must be used to buy foreign ships or have them built in foreign countries at war prices and in direct competition with the labor and shipbuilding interests of the United States. This $50,000,000 which you propose to take from the Treasury, which is buoyed up now by direct taxes upon the people, is, in effect, a direct tax of 50 cents upon every man, woman, and child of the 100,000,000 people in the United States. If it were levied directly upon the voters of the country it would approximate $3.50 per capita, but it is to be rushed through here regardless of the principle involved or of the burden it carries. It is going through in spite of the Democratic platform at Baltimore, which declared for the development of a merchant marine—

without imposing additional burdens upon the people and without bounties or subsides from the Public Treasury.

DEMOCRATIC DOCILITY.

But, Mr. Chairman, the breaking of its platform pledges by the present Democratic administration is not news to the Congress or the country. It has become a matter of habit. What is new and what would be news to most of the people of the country if they could get hold of the CONGRESSIONAL RECORD once in a while, is the deadly drive toward Government ownership for which this administration has been more responsible than any other. Since the falling of revenues, due to the low tariff bill now in effect, the administration has been more lavish in expenditure than any other in history, and this Congress has gone along with lamb-like obedience, in spite of the convictions and former professions of many of its Members against extravagance or the interference of the Federal overseer in matters affecting the rights of States and individuals.

COUNT ONE—$2.

First. You were compelled, in spite of your promise to relieve the people of their taxes, to impose a war tax—when there was no war—of $100,000,000, which was a tax of a dollar a head upon everybody. Then you renewed that $100,000,000 tax for another year, which was a direct tax of another dollar on everybody. That made a $2 tax against every man, woman, and child, or over $13 per capita for every voter, to save in part what you lost on the tariff. The war-tax items created many new offices the salaries for which are paid out of the common funds.

COUNT 2—ALASKA, 30 CENTS.

Second. You passed a $3,000,000 bill to buy old railroads and build new ones in Alaska. The amount provided for this purpose was equal, at the time the bill passed, to about $1,000 per head for every white person in Alaska. There may be more white persons up there now, and doubtless there are, but neither they nor the Government are extremely happy at the present time. The Government has run up against a strike, and harsh things are being said by the people most interested about Government-owned railroads in Alaska. It is a far cry to that country and the news of the Government's troubles is not extensively published in the United States, but enough is known to warrant the inference that the administration is already learning a valuable

lesson about Government ownership. It is finding out that while jobs may be provided for "deserving Democrats," and while conciliation and mediation boards may be created at the expense of the Government, harmony of operation and success in negotiating labor troubles are not more easily adjusted by a paternalistic Government than they are by private enterprise. While the railroads in the East are congested with freight and we could use a few more of them in various parts of the country to relieve the people of expensive charges, demurrage, and the like, you have provided that the Alaska experiment shall go on at the rate of 30 cents per capita for every man, woman, and child in the United States.

COUNT 3—50 CENTS.

Third. You have just passed through this House a flood-control bill granting upward of $50,000,000 for the reclamation of private lands, mostly along the valley of the lower Mississippi River. Several States will be directly benefited by this appropriation, and their population is comparatively small. You add on this account, however, an additional tax of 50 cents per head upon every man, woman, and child of the Nation.

COUNT 4—20 CENTS.

Fourth. You have passed an Army bill, which, while it proposes in part to respond to the public demand for preparedness, carries an appropriation suddenly raised from $15,000,000 to $20,000,000 for a nitrate plant, which expert opinion advises us is not necessary, but which we are informed will set the Nation up in business at Muscle Shoals on the Tennessee River to furnish fertilizer for some of the States when the plant is not needed for the production of war materials. The expenditure of $20,000,000 in any one of our States will help the locality and must necessarily provide jobs for a fine assortment of experts, scientists, and others who understand the technicalities incident to the manufacture of nitrates and fertilizers, but you should not lose sight of the fact that you are imposing an additional tax of 20 cents upon every man, woman, and child in the country for the installation of this plant.

COUNT 5—15 CENTS.

Fifth. You rushed the farm-land bank bill through the House last week, which many thoughtful men believe will require of the farmer a larger expenditure for loans than his necessities will warrant. The bill proposed to take $9,000,000 from the Treasury to set up banks which must needs employ a large number of officers, agents, investigators, etc., with salaries ranging up to $10,000 per annum, but you added to the $9,000,000 by amendment a possible $6,000,000 more, making a total of $15,000,000 of public money, which is an additional tax of 15 cents per head upon every man, woman, and child whether deriving advantage from the farm banks in the country or paying for a separate service in the cities.

COUNT 6—75 CENTS.

Sixth. The country-roads bill ought not to be overlooked. When it passed the House this bill was supposed to carry $25,000,000 for dirt roads, not city roads or highways already paid for by communities taxing themselves for the purpose, but country roads exclusively—dirt roads, so to speak. The Senate raised your modest appropriation of $25,000,000 to $75,000,000, and of course that $75,000,000 is as much the money of the people who live in the cities, who have taxed themselves heavily for their highways, as it is the money of the people in the country. But even so, the county-roads tax, which you are putting on everybody—man, woman, and child—is 75 cents a head.

COUNT 7—11 CENTS.

Seventh. The armor-plate proposition; let us not forget that. Existing companies offered to turn their books and business over to the Government. Of course that would mean a nice, new pay roll and a precarious business, but the administration says, "No; let us have an armor-plate plant of our own. Uncle Sam is rich enough and taxation is easy." The Navy bill provides for an armor-plate plant at $11,000,000. That means more admirals, captains, lieutenants, inspectors, specialists, and so forth, but do not forget that the initial tax on our 100,000,000 population for this plant is 11 cents apiece. Cost of maintenance, falling off in the demand for armor plate, and things like that may be considered later.

COUNT 8—90 CENTS.

Eighth. I had almost forgotten the income tax. Some say this is intended only for the rich, but somehow or other the poor manage to feel it just the same, even if it consists in the lopping off of charity on the one hand, or the imposition of excess profits and charges on the other, or higher rentals. At any rate, the income tax is calculated at about $90,000,000 per annum, and we shall use but one year for purpose of illustration. That is a tax of 90 cents apiece on all of us.

COUNT 9—10 CENTS.

Ninth. The postal deficit is reported to be about $10,000,000 per annum under this administration, and notwithstanding the strenuous efforts of the Postmaster General to economize we may lay a burden of 10 cents apiece on our population generally on this account.

COUNT 10—45 CENTS.

Tenth. The sugar "tax" ought not to be ignored. Democrats contend that the tariff is a tax, and for the sake of argument we will not dispute it just now, in the matter of sugar. The Democrats took down the so-called Republican "tax" on sugar, but when their revenues fell short and they were obliged to resort to war taxes to save the Treasury from bankruptcy, they made haste to restore the duty upon sugar. It amounted to about $45,000,000 per annum. Add a direct tax of 45 cents to every man, woman, and child, in consequence.

COUNT 11—$1.50.

Eleventh. It was announced this morning that the Ways and Means Committee, after consultation with the White House, had decided that new forms of taxation, not including gasoline, to the extent of $150,000,000, would be sufficient to make up the discrepancy in the Treasury, which the taxes heretofore referred to have failed to meet. This fresh burden of $150,000,000 is to be levied upon certain incomes, inheritances, and so forth, as well as upon munition makers, and, of course, will be charged back to the people in the end. That makes another $1.50 levy dead sure against every man, woman, and child. What do the people care, anyhow?

COUNT 12—3 CENTS PLUS.

Twelfth. I have not completed the list of taxes realized or possible, by any means. Every appropriation bill that has come up this session contains its "rider" or its pet appropriation to create some new commission or board of inquiry, giving the Government and its bureaus more and more power over the individual at the taxpayers' expense. It is estimated that the commissions, boards, and bureaus which have been created during this administration will require an expenditure of at least $5,000,000 next year, but the mere expenditure is not all. It is the fastening of bureaus, with their myriads of officeholders, upon the backs of the people that occasions concern. My colleague from Iowa [Mr. GOOD], a member of the Appropriations Committee, in a carefully prepared address, delivered a few days ago while the rural credits bill was under consideration, declared that this administration, which is supposed to be worrying itself to death about the war in Europe and the affront to American dignity in Mexico, had succeeded, in its first three years, in creating 30,000 new places for Government employees, while it was spending on salaries upward of $36,000,000 every year more than was ever appropriated for the same purpose by any Republican administration. No wonder the Democratic Party is not in argumentative mood on the subject of taxes. No wonder it is closing its eye to Government ownership and control. No wonder the Army and Navy are not filling up with recruits to fight the country's battles at $15 per month. No wonder the 30,000 new Federal employees are not enlisting for the service. The Government pay roll is far too attractive and the prospect of its continuance is too alluring for the faithful. They can be counted on to "stand by the President."

THE SUMMARY.

If you want to pass this ship-purchase bill on the record you have made, go ahead and do it. Some day, perhaps, the people back home will be wise to what it all means. As I figure it out roughly, your platform promise to relieve the people of their alleged, but imperceptible tariff burdens, has resulted in direct or prospective taxation exceeding $750,000,000, which is more than $7.50 for every man, woman, and child. If that $750,000,000 were put over on the voters exclusively, it would amount to approximately $50 apiece. With a record like that, and with more paternalistic propositions on the way, what will be the issue back home? Make it peace, preparedness, or pumpkins, just so long as the people can be made to forget about extravagance and taxes. [Applause on the Republican side.]

Mr. MANN. Mr. Chairman, I make the point of order that debate on this amendment is exhausted.

Mr. BYRNES of South Carolina. I move to strike out the last word.

The CHAIRMAN. The gentleman from South Carolina moves to strike out the last word.

Mr. MANN. You can do that, and let us vote on it, if you want to, instead of considering the bill.

Mr. BYRNES of South Carolina. Mr. Chairman, I am not going to ask the gentleman from Illinois what to do about this bill, because the truth is——

Mr. MANN. This is cutting off the opportunity to amend——

Mr. BYRNES of South Carolina. The truth is you have not kept yourself well informed. You deserted the House yesterday and left the conduct of the filibuster in charge of the gentleman from Pennsylvania [Mr. MOORE] and the gentleman from Washington [Mr. HUMPHREY]; and, great heavens! the gentleman from Pennsylvania talked until he has lost his voice! [Laughter.] You left it in charge of the gentleman from Pennsylvania and the gentleman from Washington [Mr. HUMPHREY] and what happened?

Mr. MANN rose.

Mr. BYRNES of South Carolina. I refuse to yield. If the gentleman could enlighten the situation, I would yield; but, as I tell him, he was absent and does not know what happened yesterday.

Mr. MANN. I will soon wind you up.

Mr. BYRNES of South Carolina. I have wound you up; that is the trouble.

Mr. MANN. I will wind you up.

Mr. BYRNES of South Carolina. Oh, I am not afraid of the gentleman's threat.

The CHAIRMAN. The committee will please be in order.

Mr. BYRNES of South Carolina. The gentleman from Illinois [Mr. MADDEN] talked here to-day about gag rule, but what happened in the Sixtieth Congress? When they brought in the ocean-pay bill—your idea of a merchant-marine bill—you were the first man to complain of the Republican rule which did not allow a single Member of this House to offer an amendment. You and every other Member were gagged then by a rule brought in by the Republican Committee on Rules——

Mr. GOOD. Mr. Chairman, I rise to a point of order. The gentleman has no right to address a Member in the second person.

Mr. BYRNES of South Carolina. Oh, I do not blame you for objecting, my friend——

The CHAIRMAN. The point of order is sustained.

Mr. BYRNES of South Carolina. What happened yesterday? You come into this House now and complain that you did not have an opportunity to offer amendments, but it was because you were not here.

Mr. GOOD. If the gentleman can not observe the rules of the House, he ought to sit down.

Mr. BYRNES of South Carolina. Will the gentleman sit down! In order to conform to the rule I will say that the gentleman from Illinois was not here, and therefore I shall tell him what happened. Yesterday, between 12 o'clock and 6 o'clock, the gentleman from New York [Mr. BENNET] occupied the floor 93 minutes.

Mr. MANN. I make the point of order that the gentleman is not talking to his amendment or to the bill.

Mr. BYRNES of South Carolina. Mr. Chairman, I am talking to the bill and am replying to the gentleman.

The CHAIRMAN. The gentleman from South Carolina will proceed in order.

Mr. ALEXANDER. Mr. Chairman, it comes with very ill grace from the gentleman from Illinois——

Mr. MANN. Oh, I do not ask the gentleman for grace——

Mr. ALEXANDER. It comes with very ill grace from the gentleman from Illinois, who has occupied the time of the House, to talk to this side of the House about filibustering.

Mr. MANN. You are carrying on a filibuster now.

Mr. BYRNES of South Carolina. May I say that this amendment is not the nineteenth amendment, because 19 amendments were offered yesterday afternoon, 13 being offered by the gentleman from New York [Mr. BENNET]. If they offered 19 amendments in one day to five pages you can calculate how long it would take the House to consider even the amendments of the gentleman from New York if the time was unlimited. The total time consumed up to 3 o'clock——

Mr. MANN. Mr. Chairman, I make the point of order, and I ask that the Chair enforce the rule.

The CHAIRMAN. The point of order is well taken, and the gentleman from South Carolina will proceed in order.

Mr. HOWARD. Mr. Chairman, can not a Member of the House proceed to discuss things incidental to his amendment? [Laughter.]

Mr. BYRNES of South Carolina. Mr. Chairman, the gentleman from Illinois has charged me along with all other gentlemen on this side of the House with filibustering, and in answering that charge I think I have the right to say that to-day from 11 o'clock up to 3 o'clock the Democratic side consumed only 1 hour and 30 minutes. I think I should have a right to say that on yesterday afternoon I did not consume any time, but one gentleman, the gentleman from New York [Mr. BENNET], consumed 1 hour and 43 minutes.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. BYRNES of South Carolina. Mr. Chairman, I withdraw the pro forma amendment, and I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to extend his remarks in the RECORD.

Mr. MANN. I object [laughter] until we get a vote on this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin.

The question was taken, and the Chair announced that the noes had it.

Mr. MANN. I demand tellers.

Mr. SAUNDERS. Mr. Chairman, I make the point of order that all time has expired.

The CHAIRMAN. Four o'clock having arrived, all time has expired, and the Clerk will proceed with the reading of the bill.

Mr. MANN. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. MANN. Under the terms of the rule, is it in order for any Member while the Clerk is reading the balance of the bill to send to the Clerk's desk and leave with him amendments to that portion of the bill which had not been read before 4 o'clock, in order to have the amendment pending?

The CHAIRMAN. It is in order; and amendments will be numbered at the Clerk's desk and will be voted upon in their order. That does not mean in the order in which they are presented. The Chair will construe the rule to mean that they will be voted upon in the order in which they would apply in the bill.

Mr. MANN. I think the Chair had better look that over, before he finally rules, as a matter of convenience.

The CHAIRMAN. The Chair stated that he did not think they should be numbered in the order in which they are sent up but in the order in which they would apply to the bill.

Mr. MANN. The gentleman who sends his amendment up can not number it?

The CHAIRMAN. No; the Clerk will do it. The Chair desires to state that already there has been sent to the Clerk's desk a number of amendments applicable to the sections of the bill that have been already read. Of course, those amendments will not be in order and will thus be laid aside. Gentlemen in sending amendments to the desk will confine them to that part of the bill which was not read prior to 4 o'clock.

Mr. MOORE of Pennsylvania. It being contrary to the rules for Members to advance to the desk, how will they get them there?

The CHAIRMAN. By a page.

Mr. LENROOT. Mr. Chairman, I desire to ask whether the amendments that were pending when 4 o'clock arrived will be considered as now pending?

The CHAIRMAN. They will.

Mr. FESS. Mr. Chairman, at what point will the question of the germaneness of an amendment be determined?

The CHAIRMAN. As they are reported at the desk.

The Clerk then began with section 8, and completed the reading of the bill.

Mr. SAUNDERS. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Virginia rise?

Mr. SAUNDERS. The amendment to be voted on will be the amendment pending when the hour of 4 o'clock arrived and then the amendments that are sent to the desk in their parliamentary order?

The CHAIRMAN. That is correct. The first is the amendment offered by the gentleman from Wisconsin [Mr. LENROOT].

The question was taken; and on a division (demanded by Mr. MANN) there were 114 ayes and 131 noes.

Mr. MANN. I demand tellers.

Tellers were ordered, and the Chair appointed as tellers the gentleman from Wisconsin [Mr. LENROOT] and the gentleman from Missouri [Mr. ALEXANDER].

The committee again divided; and the tellers reported that there were 156 ayes and 185 noes.

So the amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from New York [Mr. ROWE].

The question was being taken when Mr. MANN demanded tellers.

Tellers were ordered, and the Chair appointed as tellers the gentleman from New York [Mr. ROWE] and the gentleman from Missouri [Mr. ALEXANDER].

The committee again divided; and the tellers reported that there were 152 ayes and 181 noes.

So the amendment was lost.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 6, line 15, after the word "the," insert the words "control of."

The CHAIRMAN. The question is on the amendment.

The question was being taken when Mr. ALEXANDER demanded tellers.

Tellers were ordered, and the Chair appointed as tellers the gentleman from New York [Mr. BENNET] and the gentleman from Missouri [Mr. ALEXANDER].

The committee again divided; and the tellers reported—ayes 126, noes 169.

So the amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 6, line 18, strike out the words "or private."

The question was taken; and on a division (demanded by Mr. MANN) there were—ayes 97, noes 129.

So the amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. ROWE: Page 6, strike out all of section 8.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 6, line 20, after the word "vessel," insert a comma and the following words: "not of foreign origin."

The question was taken, and the Chair announced the noes appeared to have it.

Mr. MANN. Mr. Chairman, I ask for tellers on this amendment.

Tellers were ordered.

The committee again divided; and the tellers (Mr. MOORE of Pennsylvania and Mr. ALEXANDER) reported—ayes 115, noes 156.

So the amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 6, line 23, after the word "thereto," insert the words "so long as it remains the property of a citizen of the United States."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Washington: Page 6, line 23, after the word "thereto," strike out all the remainder of the paragraph, as follows: "*Provided*, That foreign-built vessels heretofore or hereafter admitted to American registry or enrollment and license under the act of August 18, 1914, or under this act, and vessels owned, chartered, or leased by any corporation in which the United States is a stockholder (except the Panama Railroad Co.), may not engage in the coastwise trade of the United States, except that such vessels may engage in trade with Alaska, Hawaii, or Porto Rico, whether or not en route to or from a foreign port, if the board finds such trade is not being adequately served by a regular line or lines of vessels."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. LENROOT: Page 7, line 2, after the word "by," insert the words "the United States or."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. HUMPHREY of Washington: Page 7, line 5, after the word "States," insert the words "and shall not be used to carry goods, wares, or merchandise from a port in the United States to a foreign port in contiguous territory, to be transported from such foreign port to any port or place in the United States by railroad or otherwise: *Provided*, That this provision shall not apply to the Great Lakes."

The question was taken; and on a division (demanded by Mr. MANN) there were—ayes 100, noes 146.

So the amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. KAHN: Page 7, line 5, after the word "States," strike out the remainder of line 5 and all of lines 6, 7, 8, and 9.

The question was taken; and on a division (demanded by Mr. KAHN) there were—ayes 90, noes 145.

So the amendment was rejected.

The Clerk read as follows:

Amendment by Mr. GRAHAM: Page 7, line 5, after the word "States," strike out the remainder of line 5 and all of lines 6, 7, 8, and 9.

Mr. GRAHAM. Mr. Chairman——

The CHAIRMAN (Mr. FERRIS). For what purpose does the gentleman rise?

Mr. GRAHAM. I rise to make a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GRAHAM. Mr. Chairman, I do not see how anyone can understand, and I would like to be informed, what they are voting upon, because this amendment is not read, and I do not see anyone scarcely with the bill before them, and they can not understand what they are voting on. [Cries of "Regular order!"] One man has a newspaper and another man has something else.

Mr. MANN. Mr. Chairman, I ask that the language proposed to be stricken out be read.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent——

Mr. MANN. I did not ask unanimous consent; it is a matter of right. We have a right to have it read.

The CHAIRMAN. The Chair was under the impression the amendment has been once read.

Mr. MANN. It has not.

The CHAIRMAN. The Clerk will report the language proposed to be stricken out.

The Clerk read as follows:

Page 7, line 5, after the word "State," strike out the words "except that such vessels may engage in trade with Alaska, Hawaii, or Porto Rico, whether or not en route to or from a foreign port, if the board finds such trade is not being adequately served by a regular line or lines of vessels."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment offered by Mr. HUMPHREY of Washington: Page 7, line 6, after the word "with," strike out the word "Alaska."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was rejected.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 7, lines 6 and 7, after the word "Hawaii," strike out the words "or Porto Rico."

The amendment was rejected.

The CHAIRMAN. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 7, strike out line 9.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. LENROOT: Page 7, at the end of line 9, add the following:

"*Provided*, That the board may permit, by general regulations or otherwise, such vessels to engage in the coastwise trade of the United States as incidental to the foreign trade in which they may be engaged, but only to such extent as the board shall find necessary to enable such vessels to successfully carry on foreign commerce."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. GREENE of Massachusetts: Page 7, line 9, after the word "vessels," insert:

"*And provided further*, That if the service of such regular line or lines subsequently becomes adequate in the judgment of the board such foreign-built vessels shall thereupon cease to engage in such trade."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. KENT: Insert, page 7, line 9, after the word "vessels":

"And except that such vessel, when en route to or from a foreign port or to or from a port of Alaska, Hawaii, or Porto Rico as hereinafter specified, may, by special permission of the shipping board, touch at more than one port on the coast of the United States and may be permitted to transport cargo and passengers between such ports when in the opinion of the board such action shall not interfere with an adequately supplied coastwise service."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 7, strike out lines 10 to 12, inclusive.

Mr. BENNET. Mr. Chairman, I would like to have the lines read which are proposed to be stricken out.

The CHAIRMAN. The gentleman from New York asks to have the lines read. The Clerk will read.

The Clerk read as follows:

Page 7, lines 10 to 12, inclusive: Every vessel purchased, or leased from the board shall, unless otherwise authorized by the board, be operated only upon such registry or enrollment and license.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. HUMPHREY of Washington: Page 7, line 17, after the word "therein," insert:

"That said vessels shall take as cadets or apprentices one American-born boy under 21 years for each 1,000 tons gross register and one for each majority fraction thereof, who shall be educated in the duties of seamanship, rank as petty officers, and receive such pay for their services as may be reasonable."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. LENROOT: Page 7, line 26, after the word "board," insert "and of the President."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 8, line 8, strike out "misdemeanor" and insert "crime."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. ROWE: Page 6, line 20, strike out all of section 9.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 8, line 9, after the word "President," insert "in time of war or national emergency, the existence of which is declared by his proclamation."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. LENROOT: Amend page 8, line 16, by inserting after the word "vessel" the following: "and any vessel under the control of said board belonging to the United States or any corporation created under the provisions of this act."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. LENROOT: Amend page 8, line 19, after the word "value," insert "based upon normal conditions."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. LENROOT: Amend page 8, line 21, after the word "value," insert "based upon normal conditions."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. LENROOT: Amend, page 8, line 22, by striking out the word "the" and inserting the word "such."

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. MANN. Mr. Chairman, this is a vaudeville performance that the Chair is having.

The CHAIRMAN. The gentlemen voted in the negative before the Chair had opportunity to put the question in the negative. The Chair will put the question over again. The question is on agreeing to the amendment offered by the gentleman from Wisconsin [Mr. LENROOT].

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 8, strike out lines 17 to 24, inclusive, and lines 1 and 2 on page 9.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. ROWE: Page 8, line 9, strike out all of section 10.

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. LENROOT: Page 9, at the end of line 2, insert the following:

"Every sale, lease, and charter of vessels from said board or from any corporation created under the provisions of this act shall be expressly subject to the provisions of this section, and such condition shall be included as an express provision of every bill of sale, lease, and charter made under the provisions of this act."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 9, lines 5 and 6, after the word "Columbia," on line 5, strike out the words "one or more corporations" and insert the words "one corporation"; and, on line 12, after the word "of," strike out the word "any."

The amendment was rejected.

Mr. MANN. Mr. Chairman, I do not question the result, but I will ask the Chair to state the question so that we can hear it. Nobody can hear except those sitting in the front row.

The CHAIRMAN. The Chair stated that the question was on the pending amendment.

Mr. MANN. I have no doubt the Chair stated the question, but we could not hear it.

The CHAIRMAN. The amendment was rejected. The Clerk will report the next pending amendment.

The Clerk read as follows:

Amendment offered by Mr. LENROOT: Page 9, line 17, after the word "therein" insert: "*Provided*, That said board shall not establish and operate any steamship line where a sufficient service has been established by American companies operating ships under American registry."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. LOUD: Page 9, line 3, strike out section 11 entire and insert in lieu thereof the following:

"SEC. 11. (a) Loans at 3 per cent may be made at the discretion of the board for the building or purchase of ships of domestic construction for American registry, suitable for naval or Army auxiliaries, to be used in foreign commerce, to the amount of 75 per cent or less of cost or appraised original value of such ships, less 5 per cent per annum for deterioration, the Government to be secured by the owner to the full value of the ships by a satisfactory insurance policy payable to the Government. First-mortgage liens shall be held by the Government against such ships. All ships acquired by aid of such loans shall be subject to requisition by the Government in time of need.

"(b) A construction option of 25 per cent shall be paid by the Government on ships constructed in the United States for American registry for use in foreign commerce according to plans suitable for auxiliaries for naval or Army use upon condition that such ships shall be taken over by the Government in time of need, in the discretion of the board, payment to be made at the rate of 75 per cent of cost of such ships less 5 per cent per annum for deterioration, and the further condition that such ships shall not be transferred from American registry. This section shall become operative at the close of the present European war, or at such future time as the Shipping Board may deem expedient. As paragraphs (a) and (b) conflict, if applied to the same ship, any shipowner may avail himself of one clause but not of the other; that is, he may not obtain both benefits as provided by paragraphs (a) and (b) for the same ship, but may secure either, at his option."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. LENROOT: Page 9, line 25, strike out the word "board," and insert the words "United States."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 9, lines 18 and 19 after the word "from" on line 18, strike out "the conclusion of the present European war," and insert in lieu thereof the words "the passage of this act."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 9, line 8, after the words "capital stock," insert the words "or purchasing power."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 9, lines 8 and 9, after the word "States," on line 8, strike out the words "the total capital stock thereof shall not exceed $50,000,000."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 9, lines 15 and 16, after the word "sell," on line 15, strike out the words "any or all of the."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 9, lines 18 and 19, after the word "the," on line 18, strike out the words "conclusion of the European war" and insert the words "date of this act."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 9, lines 22 and 23, after the word "dissolved," on line 22, strike out the period and the words "The date of the conclusion of the war shall be declared by proclamation of" and insert the words "upon proclamation by."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 9, line 25, after the word "board," strike out the period and the words "the board may sell, lease, or charter" and insert the following: "and the board shall, within one year after the President's proclamation of dissolution."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MANN: Page 9, line 25, after the word "board," strike out "may sell, lease, or charter such vessels as provided in section 7 and"; and strike out, on page 10, line 2, the words "other than vessels."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Pages 9 and 10, strike out all of the section after line 17 on page 9.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Pages 9 and 10, strike out all of the section after line 17 on page 9 and insert in lieu thereof the following:

"At the expiration of five years from the passage of this act the participation in any such corporation on the part of the United States shall cease. If the board on the one hand and the minority stockholders on the other can agree as to the disposition of the property, the board is authorized, with the approval of the President, to enter into such agreement on the part of the United States. If the board and the minority stockholders can not agree, then the property shall be valued after the manner provided in section 10. Either the board or the minority stockholders shall have the right to purchase at the value as so determined, but the board shall have the first right of purchase."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. ROWE: Page 9, line 3, strike out all of section 11.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. ROWE].

The question being taken, on a division (demanded by Mr. MANN) there were—ayes 74, noes 116.

Mr. MANN. I ask for tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. ROWE and Mr. ALEXANDER.

The committee again divided; and the tellers reported—ayes 116, noes 149.

Accordingly the amendment was rejected.

The CHAIRMAN. There are certain amendments to the text of this section which by inadvertence were overlooked, which should have been submitted before the motion to strike out the section.

Mr. MANN. I think that that was a very natural mistake.

The CHAIRMAN. The Clerk will report the first of these amendments.

The Clerk read as follows:

Amendment offered by Mr. MANN: Page 10, line 4, after the word "Treasury," strike out "to its credit" and insert in lieu thereof the following: "as miscellaneous receipts."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 10, line 3, after the word "proceeds," strike out the word "thereof" and insert the words "of such sales."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. MOORE of Pennsylvania: Page 10, line 1, after the word "shall," strike out the words "disposed of" and insert the word "sell."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 10, line 4, after the word "Treasury," strike out the words "to its credit" and insert the words "of the United States."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Page 10, line 9, after the word "ten," insert the following:

"The board shall cease to exist at the expiration of one year after the President's proclamation of dissolution, and all unfinished business incident to its existence shall be transferred to the Secretary of the Treasury."

The question was taken; and on a division (demanded by Mr. MOORE of Pennsylvania) there were 55 ayes and 93 noes.

So the amendment was rejected.

The Clerk read as follows:

Amendment by Mr. LENROOT: Page 10, at the end of section 11, insert the following:

"*Provided*, That if at the expiration of five years from the conclusion of the present European war any corporation created under the provisions of this section shall be engaged in the operation of vessels maintaining regular communication between the east or west coast, or both coasts, of the United States and either or both coasts of South America, and if the board shall find that the dissolution of any corporation created under the provisions of this section will result in inadequate lines of communication between the United States and South America as aforesaid, then and in that case any corporation created under the provisions of this act maintaining such lines shall continue until such time as the board shall determine such corporation is no longer necessary for such purpose."

The amendment was rejected.

The CHAIRMAN. A double amendment has been offered to strike out section 11. That has already been once voted upon.

Mr. BENNET. Mr. Chairman, I ask to withdraw that amendment.

The CHAIRMAN. Without objection, the amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

Amendment by Mr. WALSH: Amend line 20 after the word "law" by inserting:

"*Provided*, That nothing in this act shall apply to whaling or fishing vessels or ships engaged in the transportation of the products of whaling or fishing voyages."

The question was taken; and on a division (demanded by Mr. WALSH) there were 53 ayes and 90 noes.

So the amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. LOUD: Page 10, line 13, strike out the entire section 13 and insert:

"That said board shall report to Congress at its next session and each succeeding session such changes as it deems advisable in our navigation or shipping laws to remove any of the disadvantages to American ships which may be found to exist in competition with the ships of other countries. It shall further be the duty of the board, if at the close of the present European War or at such time as the shipping business has returned to normal conditions it shall be found necessary to provide a subsidy to equalize conditions in operation, owing to lower wages paid to seamen on foreign ships and other causes, to make recommendation to Congress as to the necessity of such subsidy and the extent and method by which, in their judgment, it should be applied.

"It shall, on or before the 1st day of December in each year, make a report to the Congress, which shall include its recommendations and the results of its investigations, a summary of its transactions, and a statement of all expenditures and receipts under this act, and of the operations of any corporation in which the United States is a stockholder, and the names and compensation of all persons employed by the board."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. LENROOT: Page 10, at the end of section 12, insert the following:

"All persons thus enrolled in the said reserve shall be entitled to receive retainer allowance from the United States while so enrolled, at rates to be fixed by the Secretary of the Navy, not to exceed an allowance of $5 per month for enlisted men, $10 per month for petty officers, and $15 per month for officers."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. ROWE: Strike out all of section 12.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MANN: Page 11, line 16, after the word "board," insert "or by such corporation at annual compensation."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. GRAHAM: Page 11, line 18, after the word "eleven" insert "no expenditure shall be made nor liability incurred exceeding a total of $50,000,000 and."

Mr. SAUNDERS. Mr. Chairman, may I ask who that amendment was offered by?

The CHAIRMAN. By the gentleman from Pennsylvania, Mr. GRAHAM.

Mr. SAUNDERS. May I have unanimous consent to say a word?

Mr. MANN. I do not object if you can do it under the rule.

Mr. SAUNDERS. We can do it by unanimous consent. All I want to say is that the committee accepts that amendment.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Amendment by Mr. MANN: Page 11, line 18, after the word "of," where it first occurs, strike out "section 5 and," and insert in lieu thereof the word "section."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 12, line 11, after the word "board," strike out the last of line 11 and all of line 12.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MANN: Page 12, strike out lines 7 to 12, inclusive, reading as follows:

"The proceeds of such bonds and the net proceeds of all sales, charters, and leases of vessels and of sales of stock made by the board, and all other moneys received by it from any source, shall be covered into the Treasury to the credit of the board, and are hereby permanently appropriated for the purpose of carrying out the provisions of sections 5 and 11."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. GOOD: Page 12, at end of section 14, add: "Said board shall at no time make any expenditures or incur any liability on the part of the United States in excess of the unexpended balance of any sum or sums appropriated for its use."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. ROWE: Page 11, line 17, strike out all of section 14.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. EDMONDS: Page 13, line 15, after the word "fourth," strike out balance of line 15, all of line 16, and first two words in line 17, and insert in lieu thereof the word "to."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. HUMPHREY of Washington: Page 13, line 22, insert as a separate section:

"That all goods, wares, and merchandise brought to a foreign port, in contiguous territory, by a foreign steamship line, doing or practicing any of the things or practices prohibited in this section, shall not be permitted to enter the United States on penalty of being seized and forfeited to the United States: *Provided*, That this provision shall not apply to the Great Lakes."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. HUMPHREY of Washington: Page 13, line 22, insert as a new paragraph:

"That any vessel not of the United States which is owned, operated, or controlled by any person or persons who have been adjudged by a court of the United States to be a party or parties to any combination or conspiracy in restraint of trade with foreign nations such as is prohibited by the act of July 2, 1890, entitled 'An act to protect trade and commerce against unlawful restraints and monopolies,' and which vessel is being used to carry out the unlawful purposes and objects of such combination or conspiracy, is hereby prohibited from entering at or

clearing from any port of the United States under penalty of $25,000 for each and every violation of the provisions of this section, and no vessel shall be granted clearance papers pending the determination of the question of the liability to the payment of such fine and in the event such fine is imposed while it remains unpaid, nor shall such fine be remitted or refunded: *Provided*, That clearance may be granted prior to the determination of such questions upon the deposit of a sum sufficient to cover such fine and costs, such sum to be named by the Secretary of Commerce and Labor.

"That the Postmaster General is hereby authorized and directed to cancel any contract for carrying the ocean mails pursuant to the act of March 3, 1891, entitled 'An act to provide for ocean mail service between the United States and foreign ports, and to promote commerce,' on satisfactory evidence to him that any vessel performing such a service is, at the time of performing such service, owned, operated, or controlled by any person or persons who have been adjudged by a court of the United States to be a party or parties to any combination or conspiracy in restraint of trade with foreign nations such as is prohibited by the act of July 2, 1890, entitled 'An act to protect trade and commerce against unlawful restraints and monopolies.'

"That the word 'person' or 'persons' wherever used in this act shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States or the laws of any of the Territories, the laws of any State, or the laws of any foreign country."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MANN: Page 14, line 3, after the word "copy," strike out the words "or if oral, a true and complete memorandum."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 14, line 5, after the word "act," insert "or common carrier engaged in commerce between any foreign country and any foreign territory contiguous to the United States."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MANN: Page 15, strike out lines 7 to 12, inclusive.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MANN: Page 15, strike out lines 13 to 23, inclusive, reading as follows:

"Every agreement, modification, or cancellation lawful under this section shall be excepted from the provisions of the act approved July 2, 1890, entitled 'An act to protect trade and commerce against unlawful restraints and monopolies,' and amendments and acts supplementary thereto, and the provisions of sections 73 to 77, both inclusive, of the act approved August 27, 1894, entitled 'An act to reduce taxation, to provide revenue for the Government, and for other purposes,' and amendments and acts supplementary thereto."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNETT: Page 15, after line 2, add: "The board may direct any common carrier by water in foreign commerce to make with any person in the United States as favorable agreements or contracts as it has offered under like circumstances and conditions to persons residing or doing business in foreign contiguous territory. It may direct any collector of customs to refuse clearance to any vessel for noncompliance with any such order."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 15, lines 9 and 10, strike out "before approval or."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 15, after line 12, insert "but nothing herein contained shall permit the board to approve any agreement or contract contrary to the provisions of section 1 of the act of August 1, 1882, known as the passenger act, as amended."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 13, insert as a new section after section 15:

"SEC. 15a. No ship not belonging to or operated by or as a part of a regular line shall be permitted clearance from any port of the United States if the collector at such port shall be satisfied after due examination that such ship is taking freight from such port or has brought freight to such port at less than the prevailing freight rates."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 15, after line 12, insert: "But nothing herein contained shall permit the board to approve any agreement or contract contrary to the immigration law approved February 20, 1907, or acts amendatory thereto."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 15, after line 12, insert: "But nothing herein contained shall permit the board to approve any agreement or contract contrary to the Chinese exclusion laws."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 15, after line 12, insert: "But nothing herein contained shall permit the board to approve any agreement or contract contrary to the provisions of any tariff act in force at the time when such approval is sought."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 15, after line 12, insert: "But nothing herein contained shall permit the board to approve any agreement or contract contrary to the provisions of the laws prohibiting the importation of absinthe into this country."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 15, at the bottom of the page, insert: "Any vessel known as a 'tramp,' by which is meant a vessel not operated regularly over definitely ascertained routes, but going from one port to another in search of freight or under a charter for a particular voyage which offers or accepts freight rates lower than those permitted by agreements approved by the board, shall be refused clearance from any port by the collector thereof, who shall after examination find that such lower rates are offered or accepted as aforesaid."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 15, after line 12, insert, "But nothing herein contained shall permit the board to approve any agreement or contract contrary to the national quarantine laws or the health laws of any State or municipality."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 15, after line 12, insert, "But nothing herein contained shall permit the board to approve any agreement or contract contrary to the laws permitting the prohibition of the importation of impure seed."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 15, after line 12, insert, "But nothing herein contained shall permit the board to approve any agreement or contract contrary to the laws permitting the Department of Agriculture to prevent the importation of certain domestic and wild animals."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 15, line 26, after the word "action," insert, "Nothing in this section shall be construed to refer to tug or tow boats or ferryboats running on regular routes."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 13, after line 22, insert, "Fifth. But nothing in this act contained shall prevent any common carrier by water in foreign commerce from making contracts or agreements with shippers in the United States which shall be as advantageous as contracts or agreements made with or offered to shippers residing or doing business in foreign contiguous territory."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. ROWE: Page 13, strike out lines 23, 24, and 25, and insert in lieu thereof the following:

"Any carrier who violates any provision of the first, second, or third subdivisions of this section shall be guilty of a misdemeanor, punishable by a fine of not more than $10,000 for each offense. Any carrier who violates any provision of the fourth subdivision of this section shall be guilty of a misdemeanor, punishable by a fine of not more than $5,000 for each offense."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 16, lines 1 and 2, strike out "or other person subject to this act."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNETS Page 16, lines 13, 14, and 15, strike out all after the word "carrier" in line 13.

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 16, after line 21, insert: "A violation of any of the provisions of this section shall be punished by imprisonment for not exceeding five years or by a fine not exceeding $10,000, or by both fine and imprisonment, in the discretion of the court."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 16, line 25, after the word "exporters," strike out "of" and insert "from or importers to."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 16, line 21, after the word "act," insert: "Nothing in this section shall be construed to refer to tug or tow boats or ferryboats running on regular routes."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. EDMONDS: Page 16, strike out first subdivision of section 17, being all of lines 5, 6, 7, 8, 9, and 10.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. MANN: Page 16, line 13, after the word "carrier," strike out "by means of false billing, false classification, false weighing, false report of weight, or by any other unjust or unfair device or means."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 17, after line 15, insert: "Any vessel disobeying any order made pursuant to the provisions of this section shall be refused clearance from any or all ports of the United States for such periods as the board shall direct."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 17, line 15, after the word "practice," insert "Nothing in this section shall be construed to refer to tug or towboats or ferryboats running on regular routes."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 18, after line 23, insert "But this section shall not apply to ferryboats running on regular routes, nor to tugboats, nor to vessels of less than 100 tons burden."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 20, lines 20 to 24, inclusive, strike out the sentence commencing on line 20.

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 20, lines 4 and 5, strike out "or to any officer or agent of the Government of the United States."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 20, line 9, strike out "or suspected of."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 20, lines 14 and 19, strike from each line "or other person subject to this act."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 20, line 18, insert before the word "business" the words "transportation or shipping."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 20, line 12, after the word "carriers," insert "Nothing in this section shall be construed to refer to tug or towboats or ferryboats running on regular routes."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 21, line 9, after the word "imprisonment," insert "Nothing in this section shall be construed to refer to tugboats or ferryboats running on regular routes."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 21, line 16, strike out the word "complaint" and insert in lieu thereof the word "complainant."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 21, line 17, strike out the word "it" and insert in lieu thereof the words "the complaint."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 21, line 17, strike out the word "complaint" and insert in lieu thereof the word "complainant."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 21, line 19, strike out the word "it" and insert in lieu thereof the words "the complaint."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 22, line 23, strike out the word "States."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. BENNET: Page 22, line 3, after the word "act" insert: "Nothing in this section shall be construed to refer to tugboats or ferryboats running on regular routes."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. ESCH: Page 22, line 5, after the word "after" insert "due notice and."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. ESCH: Page 22, line 9, after the word "shall" insert "take effect within such reasonable time, not less than 30 days, and."

The amendment was rejected.

The Clerk read as follows:

Amendment offered by Mr. ESCH: Page 23, line 11, after the word "documents" insert "including correspondence."

The amendment was rejected.

Mr. GOOD. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. GOOD. I ask unanimous consent that the balance of the amendments be considered en bloc.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that the balance of the amendments be considered en bloc. Is there objection?

Mr. THOMPSON of Oklahoma. I object.

The Clerk read as follows:

Page 24, line 18, strike out "of the parties."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 24, line 24, after the word "file," insert "or commence."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr ESCH: Page 24, line 4, after the word "documents," insert "including correspondence."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 26, line 7, after the word "filed," insert the words "or commenced."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 26, line 25, add "nor to the power or jurisdiction of the Department of Agriculture over Federal warehouses."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. BENNET: Page 26, line 18, strike out "misdemeanors" and insert "crimes and."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr. JOHNSON of Washington: Page 27, line 8, after the word "of," strike out $100,000" and insert in lieu thereof "$200,000."

The amendment was rejected.

The Clerk read as follows:

Amendment by Mr LOUD: Page 27, line 6, after the word "thereby," insert a new section numbered 35, as follows:

"SEC. 35. That on or after August 1, 1916, a duty or additional duty of 5 per cent ad valorem shall be imposed upon all imports from foreign countries in ships which are not of American registry."

The amendment was rejected.

Mr. ALEXANDER. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the recommendation that the amendments be agreed to and that the bill do pass.

Mr. MANN. It does not require a motion.

Mr. FOSTER. The rule says that the committee shall rise.

The CHAIRMAN. The Chair sustains the point of order on the ground that the rule previously adopted provides that after the amendments are disposed of the committee will rise and the bill be reported to the House with amendments.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CRISP, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 15455) to establish a United States shipping board for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve and a merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries; to regulate carriers by water engaged in the foreign and interstate commerce of the United States; and for other purposes, and he reported the same back to the House with sundry amendments.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. FITZGERALD. Mr. Speaker, by direction of the Committee on Appropriations I report the sundry civil appropriation bill (H. Rept. 735.)

Mr. MANN. The gentleman asks unanimous consent.

Mr. FITZGERALD. If the rule requires it, I will ask unanimous consent to report the bill.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The gentleman from New York, chairman of the Committee on Appropriations, reports the sundry civil appropriation bill, of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 15836) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1917, and for other purposes.

Mr. MANN. Mr. Speaker, I reserve all points of order on the bill.

The SPEAKER. The gentleman from Illinois reserves all points of order, and the bill will be printed and referred to the Committee of the Whole House on the state of the Union.

UNITED STATES SHIPPING BOARD.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. ALEXANDER. Mr. Speaker, I demand a separate vote on the amendment striking out section 5.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them in gross.

There was no demand for a separate vote, and the other amendments were agreed to.

The SPEAKER. The question is on the amendment striking out section 5.

Mr. MANN. Mr. Speaker, I demand the yeas and nays, and upon that I make the point that no quorum is present.

The SPEAKER. The gentleman from Illinois demands the yeas and nays, and makes the point that no quorum is present. Evidently there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 153, nays 203, answered "present" 14, not voting 64, as follows:

So the motion to strike out section 5 was rejected.

The Clerk announced the following pairs for this vote:

Mr. ROWLAND (for striking out section 5) with Mr. LIEBEL (against striking out section 5).

Mr. MARTIN (for striking out section 5) with Mr. WILSON of Louisiana (against striking out section 5).

Mr. MCLAUGHLIN (for striking out section 5) with Mr. MORRISON (against striking out section 5).

Mr. MCCRACKEN (for striking out section 5) with Mr. SCULLY (against striking out section 5).

Mr. LONGWORTH (for striking out section 5) with Mr. CARLIN (against striking out section 5).

Mr. SWIFT (for striking out section 5) with Mr. STEPHENS of Mississippi (against striking out section 5).

Mr. CHIPERFIELD (for striking out section 5) with Mr. HARRISON (against striking out section 5).

Mr. BRITT (for striking out section 5) with Mr. DOUGHTON (against striking out section 5).

Mr. OAKEY (for striking out section 5) with Mr. LEWIS (against striking out section 5).

Mr. MCFADDEN (for striking out section 5) with Mr. DEWALT (against striking out section 5).

Mr. WOOD of Indiana (for striking out section 5) with Mr. ADAIR (against striking out section 5).

Mr. BENNET (for striking out section 5) with Mr. HENRY (against striking out section 5).

Mr. GARDNER (for striking out section 5) with Mr. GODWIN of North Carolina (against striking out section 5).

Mr. SMITH of Michigan (for striking out section 5) with Mr. DOREMUS (against striking out section 5).

Mr. DYER (for striking out section 5) with Mr. WEBB (against striking out section 5).

Mr. HOLLINGSWORTH (for striking out section 5) with Mr. STEAGALL (against striking out section 5).

Mr. PETERS (for striking out section 5) with Mr. SEARS (against).

Mr. GRIEST (for) with Mr. WATKINS (against).

Mr. SANFORD (for) with Mr. ESTOPINAL (against).

Mr. GOULD (for) with Mr. TALBOTT (against).

Mr. SCOTT of Pennsylvania (for) with Mr. CASEY (against).

Mr. JOHNSON of South Dakota (for) with Mr. JACOWAY (against).

Mr. HAMILTON of Michigan (for) with Mr. MORGAN of Louisiana (against).

Mr. CHANDLER of New York (for) with Mr. MURRAY (against).

Until further notice:

Mr. MOONEY with Mr. SLAYDEN.

Mr. HINDS with Mr. DRISCOLL.

Mr. MORIN with Mr. POU.

Mr. SUTHERLAND with Mr. BORLAND.

Mr. HAYES with Mr. LOFT.

Mr. MILLER of Minnesota with Mr. FITZGERALD.

Mr. LANGLEY with Mr. CANTRILL.

Mr. MADDEN with Mr. ROUSE.

Mr. FULLER with Mr. CLARK of Florida.

Mr. PORTER with Mr. PATTEN.

Mr. PRATT with Mr. CONRY.

Mr. MADDEN. Mr. Speaker, I wish to know whether the gentleman from Kentucky, Mr. ROUSE, voted?

The SPEAKER. He did not vote.

Mr. MADDEN. I am paired with Mr. ROUSE, and I desire to withdraw my vote and answer "present."

The name of Mr. MADDEN was called, and he answered "Present."

Mr. LANGLEY. Mr. Chairman, I voted "aye." I am paired with my colleague, Mr. CANTRILL, and I desire to withdraw my vote and answer "present."

The name of Mr. LANGLEY was called, and he answered "Present."

Mr. LONGWORTH. Mr. Speaker, I would like to know how the gentleman from Virginia [Mr. CARLIN] voted, if he is recorded.

The SPEAKER. He is not recorded.

Mr. LONGWORTH. I have a pair with Mr. CARLIN and I did not hear the pair read from the Clerk's desk. If the pair is of record, I desire to withdraw my vote and answer "present."

The SPEAKER. The pair is of record.

Mr. LONGWORTH. Then I desire to withdraw my vote, and answer "present."

The name of Mr. LONGWORTH was called, and he answered "Present."

Mr. MARTIN. Mr. Speaker, I voted "aye." I am paired with Mr. WILSON of Louisiana, and I desire to withdraw that vote and answer "present."

The name of Mr. MARTIN was called, and he answered "Present."

Mr. WOOD of Indiana. Mr. Speaker, I voted "aye." I am paired with the gentleman from Indiana [Mr. ADAIR]. I desire to withdraw my vote and answer "present."

The name of Mr. WOOD of Indiana was called, and he answered "Present."

Mr. STEPHENS of Mississippi. Mr. Speaker, I voted "no." I am paired with the gentleman from New York [Mr. SMITH], and I desire to withdraw my vote and answer "present."

The name of Mr. STEPHENS of Mississippi was called, and he answered "Present."

Mr. GLASS. Mr. Speaker, when my name was called I answered "Present," thinking Mr. WINSLOW, with whom I am paired, was not present. I find that Mr. WINSLOW was present and voted and I desire to change my vote from "present" to "no."

The name of Mr. GLASS was called, and he voted "No."

Mr. DEWALT. Mr. Speaker, I voted "No." I am paired with Mr. MCFADDEN, and I desire to withdraw my vote of "no" and answer "present."

The name of Mr. DEWALT was called and he answered "Present."

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will open the doors.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time.

Mr. MANN. Mr. Speaker, I demand the reading of the engrossed bill.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

Mr. MANN. A parliamentary inquiry, Mr. Speaker. If we adjourn now, do we adjourn until 11 o'clock a. m. to-morrow?

Mr. KITCHIN. Yes; we will adjourn until 11 o'clock a. m., under the rules.

EXTENSION OF REMARKS.

Mr. GUERNSEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on this bill.

The SPEAKER. The gentleman from Maine asks unanimous consent to extend his remarks in the RECORD on this bill. Is there objection?

There was no objection.

Mr. LINTHICUM. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the bill which has just been under consideration.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that all Members of the House have the right to extend their remarks in the RECORD on this bill for five legislative days.

The SPEAKER. The gentleman from North Carolina asks that all gentlemen who desire to do so may extend their remarks on this bill for five legislative days. Is there objection?

There was no objection.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bill:

H. R. 8068. An act for the relief of E. C. Hornor.

WITHDRAWAL OF PAPERS.

Mr. CARY, by unanimous consent, was granted leave to withdraw from the files of the House, without leaving copies, the papers in the case of Veronica Werner, special pension act, Sixty-third Congress, no adverse report having been made thereon.

LEAVE OF ABSENCE.

Mr. BRITT, by unanimous consent, was granted leave of absence for two days, on account of public business.

PENSIONS.

Mr. KEY of Ohio. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 655, disagree to all of the Senate amendments, and ask for a conference.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 655) to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes.

The SPEAKER. The gentleman from Ohio asks unanimous consent to take the bill from the Speaker's table and disagree to the Senate amendments and ask for a conference. Is there objection? [After a pause.] The Chair hears none.

The SPEAKER announced the following conferees: Mr. KEY of Ohio, Mr. KEATING, and Mr. JAMES.

ADJOURNMENT.

The SPEAKER. The gentleman from North Carolina [Mr. KITCHIN] moves that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 30 minutes p. m.) the House adjourned until to-morrow, Saturday, May 20, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Tombigbee River from Demopolis, Ala., to Columbus, Miss., with a view to securing continuous navigation by means of locks and dams (H. Doc. No. 1137); to the Committee on Rivers and Harbors and ordered to be printed.

2. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of John Gerteisen *v.* The United States, which is a correct copy of said findings of fact and conclusion, in lieu of an erroneous and incorrect copy transmitted May 9, 1916, and printed as House Document No. 1098, Sixty-fourth Congress, first session (H. Doc. No. 1098, pt. 2); to the Committee on War Claims and ordered to be printed.

3. A letter from the Secretary of the Treasury, submitting estimate of appropriation, with the recommendation that the same be included in the sundry civil bill now pending, Caruthersville (Mo.) post office, $250 (H. Doc. No. 1138); to the Committee on Public Buildings and Grounds and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. ROBERTS of Nevada, from the Committee on Irrigation of Arid Lands, to which was referred the bill (S. 2519) to encourage the reclamation of certain arid lands in the State of Nevada, and for other purposes, reported the same without amendment, accompanied by a report (No. 731), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SHACKLEFORD, from the Committee on Roads, to which was referred the bill (H. R. 7617) to provide that in order to promote agriculture, afford better facilities for rural transportation and marketing farm products, and encourage the development of a general system of improved highways, the Secretary of Agriculture, on behalf of the United States, shall in certain

cases aid the States in the construction, improvement, and maintenance of roads which may be used in the transportation of interstate commerce, military supplies, or postal matter, reported the same without amendment, accompanied by a report (No. 732), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HAMLIN, from the Committee on Industrial Arts and Expositions, to which was referred the joint resolution (H. J. Res. 92) to provide for holding the San Antonio Bicentennial Exposition in 1918, reported the same with amendment, accompanied by a report (No. 733), which said joint resolution and report were referred to the House Calendar.

Mr. TIMBERLAKE, from the Committee on the Public Lands, to which was referred the bill (H. R. 15287) authorizing the addition of certain lands to the Colorado and Pike National Forests, Colo., reported the same with amendment, accompanied by a report (No. 734), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 8591) granting a pension to Charles M. Walker, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. HASTINGS: A bill (H. R. 15804) to amend paragraph 1 of section 3 of the act of May 27, 1908, and making the final rolls compiled and printed under authority conferred by the act of Congress approved June 21, 1906, conclusive evidence as to the age and quantum of Indian blood of duly enrolled members of the Five Civilized Tribes and of freedmen; to the Committee on Indian Affairs.

By Mr. LLOYD: A bill (H. R. 15805) providing for the purchase of a site and the erection thereon of a public building at Unionville, in the State of Missouri; to the Committee on Public Buildings and Grounds.

By Mr. DAVENPORT: A bill (H. R. 15806) to refer the claims of the Eastern and Western Bands of the Cherokee Indians to the Court of Claims for investigation and final judgment; to the Committee on Indian Affairs.

By Mr. GUERNSEY: A bill (H. R. 15807) to provide for holding sessions of the United States district court in the district of Maine and for dividing said district into divisions and providing for offices of the clerk and marshal of said district to be maintained in each of said divisions, and for the appointment of a field deputy marshal in the division in which the marshal does not reside; to the Committee on the Judiciary.

By Mr. FITZGERALD [from the Committee on Appropriations]: A bill (H. R. 15836) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1917, and for other purposes; to the Committee of the Whole House on the state of the Union.

By Mr. SHERWOOD: Resolution (H. Res. 242) providing for pay for the examiner detailed to the Committee on Invalid Pensions from the Pension Bureau; to the Committee on Accounts.

By Mr. LOFT: Resolution (H. Res. 243) authorizing the Speaker to appoint a select committee to investigate the tapping of private wires in New York City; to the Committee on Rules.

By Mr. GALLIVAN: Resolution (H. Res. 244) relative to the executions in Ireland; to the Committee on Foreign Affairs.

By Mr. EMERSON: Joint resolution (H. J. Res. 226) to amend the Constitution of the United States so as to limit the term of the President of the United States to a single presidential term; to the Committee on the Election of President, Vice President, and Representatives in Congress.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 15808) granting an increase of pension to Joseph Myers; to the Committee on Invalid Pensions.

By Mr. BEAKES: A bill (H. R. 15809) granting an increase of pension to Henry H. Howes; to the Committee on Invalid Pensions.

By Mr. DALE of New York: A bill (H. R. 15810) granting an increase of pension to Joseph Simonson; to the Committee on Invalid Pensions.

By Mr. DOUGHTON: A bill (H. R. 15811) granting a pension to John H. Brinkley; to the Committee on Pensions.

By Mr. DOWELL: A bill (H. R. 15812) granting an increase of pension to John F. Hitchcock; to the Committee on Invalid Pensions.

By Mr. FLYNN: A bill (H. R. 15813) granting an increase of pension to Robert B. Thomas; to the Committee on Invalid Pensions.

By Mr. FORDNEY: A bill (H. R. 15814) granting a pension to Ellen M. Smith; to the Committee on Invalid Pensions.

By Mr. GOOD: A bill (H. R. 15815) granting an increase of pension to Sarah J. Montgomery; to the Committee on Invalid Pensions.

By Mr. HENSLEY: A bill (H. R. 15816) granting an increase of pension to William A. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15817) granting an increase of pension to John Parker; to the Committee on Invalid Pensions.

By Mr. KIESS of Pennsylvania: A bill (H. R. 15818) granting an increase of pension to Daniel Robb; to the Committee on Invalid Pensions.

By Mr. LAFEAN: A bill (H. R. 15819) granting an increase of pension to Mary A. Folkenroth; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15820) granting an increase of pension to Mary E. Skinner; to the Committee on Invalid Pensions.

By Mr. LEE: A bill (H. R. 15821) granting a pension to Francis M. Westbrooks; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15822) granting a pension to James W. Ledford; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15823) granting a pension to M. Westbrooks; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15824) granting a pension to William Ledford; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15824) granting an increase of pension to Mary K. Scott; to the Committee on Pensions.

By Mr. LESHER: A bill (H. R. 15826) granting an increase of pension to William H. Freed; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15827) granting an increase of pension to Michael T. Wertz; to the Committee on Invalid Pensions.

By Mr. OAKEY: A bill (H. R. 15828) granting an increase of pension to Fairfield Dresser; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15829) granting a pension to Mary F. Starmer; to the Committee on Invalid Pensions.

By Mr. REAVIS: A bill (H. R. 15830) granting an increase of pension to Otis S. Mason; to the Committee on Invalid Pensions.

By Mr. SCOTT of Michigan: A bill (H. R. 15831) granting an increase of pension to James T. Clark; to the Committee on Invalid Pensions.

By Mr. SISSON: A bill (H. R. 15832) granting an increase in pension to Sarah E. Lafayette; to the Committee on Pensions.

By Mr. SULLOWAY: A bill (H. R. 15833) granting an increase of pension to James W. Smith; to the Committee on Pensions.

By Mr. THOMPSON: A bill (H. R. 15834) granting a pension to Joseph W. Mitcham; to the Committee on Pensions.

By Mr. TILLMAN: A bill (H. R. 15835) granting a pension to James Drake; to the Committee on Invalid Pensions.

By Mr. COADY: A bill (H. R. 15837) granting a pension to Edward G. Dalton; to the Committee on Pensions.

By Mr. WOOD of Indiana: A bill (H. R. 15838) granting an increase of pension to William H. Rees; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of American Supply & Machinery Manufacturers' Association, favoring a permanent tariff commission; to the Committee on Ways and Means.

By Mr. ASHBROOK: Papers to accompany House bill 15655, for relief of Edgar G. Speid; to the Committee on Invalid Pensions.

By Mr. BAILEY: Petition of business men of Carrolltown, Pa., favoring bill taxing mail-order houses; to the Committee on Ways and Means.

By Mr. CAREW: Petition of Southern Hardware Jobbers' Association, in re floods; to the Committee on Rivers and Harbors.

By Mr. DALE of New York: Petition of members of Congressional Union for Woman Suffrage, of Rhode Island, and Jessie M. Park, of Denver, Colo., favoring suffrage amendment; to the Committee on the Judiciary.

By Mr. EMERSON: Memorial of Convention of Mental Hygiene Societies, favoring establishing a division of mental hygiene in the United States Public Health Service; to the Committee on Interstate and Foreign Commerce.

By Mr. FITZGERALD: Memorial of members of the Fort Greene Chapter, Daughters of America, urging immediate action to prepare our Army, Navy, and coast defenses, thereby insuring the life, liberty, and the sacred honor of our beloved country; to the Committee on Military Affairs.

Also, memorial of 4,000 citizens of New Orleans, urging Congress, if diplomatic relations be severed, to use utmost endeavors to prevent a declaration of war; to the Committee on Foreign Affairs.

Also, memorial of Northeast Washington Citizens' Association, opposing the location of the proposed hospital on reservation No. 13; to the Committee on the District of Columbia.

Also, memorial of board of directors of the Irish-American Club, favoring bill introduced by the Hon. MURRAY HULBERT for the appropriation of money for the erection of a national stadium on East Capitol Park, in Washington; to the Committee on Appropriations.

Also, memorial of Southern Hardware Jobbers' Association, requesting Congress to enact such legislation as shall provide a separate and comprehensive plan for the prevention of floods; to the Committee on Flood Control.

Also, memorial of New York Board of Trade and Transportation, opposing House bill 8665, to prevent any time studies on work by Government employees; to the Committee on Labor.

Also, memorial of Central Labor Union of Brooklyn, N. Y., favoring Senate bill 3081 and House bill 6915, to retire employees in the Postal Service who may have become superannuated; to the Committee on the Post Office and Post Roads.

Also, memorial of Society of Scabbard and Blade, of Madison, Wis., recommending that the Pomerene amendment be enacted into law at the earliest possible date; to the Committee on Military Affairs.

Also, memorial of Cotton Goods Export Association of New York, disapproving the so-called Clarke amendment to the Philippine bill; to the Committee on Insular Affairs.

By Mr. FULLER: Petition of Gadsden (Ala.) Chamber of Commerce, favoring Shield water-power bill; to the Committee on Rivers and Harbors.

By Mr. HOPWOOD: Petition of 40 citizens of Fairchance, Pa., for control of liquor traffic; to the Committee on Alcoholic Liquor Traffic.

By Mr. HOWELL: Memorial of citizens of Salt Lake City, Utah, favoring suffrage amendment; to the Committee on the Judiciary.

By Mr. KEISTER: Memorials of a mass meeting held at Trafford and at Export, Pa., urging the adoption of a resolution providing for an amendment to the Federal Constitution prohibiting polygamy and polygamous cohabitation; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Memorial of Providence Central Federated Union, of Providence, R. I., in favor of House bill 8828 and Senate bill 3457; to the Committee on Appropriations.

Also, memorial of Rhode Island State Branch of the American Federation of Labor, favoring House bill 8828 and Senate bill 3457; to the Committee on Appropriations.

Also, petition of sundry citizens, on the practice of chiropody in the District of Columbia; to the Committee on the District of Columbia.

By Mr. MAPES: Petitions of citizens of Grand Haven, men's Bible classes of Grand Haven, and Sunday school teachers of Grand Haven, Mich., favoring national prohibition; to the Committee on the Judiciary.

By Mr. VARE: Memorial of New Century Club, of Philadelphia, relative to proposed Indian legislation; to the Committee on Indian Affairs.

Also, memorial of Philadelphia Chamber of Commerce, advocating the establishment of free ports at various places and congressional investigation of the subject; to the Committee on Ways and Means.

Also, memorial of Philadelphia Real Estate Board, indorsing the park commission plans for the development of Washington; to the Committee on the District of Columbia.

SENATE.

SATURDAY, *May 20, 1916.*

(Legislative day of Thursday, May 18, 1916.)

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. SMOOT. Mr. President, there are very few Senators in the Chamber. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	Myers	Simmons
Bankhead	Gallinger	Nelson	Smith, S. C.
Beckham	Gore	Norris	Smoot
Brady	Gronna	Page	Sterling
Chamberlain	Johnson, S. Dak	Pittman	Taggart
Chilton	Jones	Poindexter	Thomas
Clapp	Kenyon	Ransdell	Thompson
Clark, Wyo.	Lea, Tenn.	Shafroth	Vardaman
Clarke, Ark.	Martin, Va.	Sheppard	Wadsworth
Dillingham	Martine, N. J.	Sherman	Williams

Mr. CHILTON. I wish to announce for the day that my colleague [Mr. GOFF] is absent on account of illness, and also that the senior Senator from Indiana [Mr. KERN] is unavoidably absent.

The VICE PRESIDENT. Forty Senators have answered to the roll call. There is not a quorum present. The Secretary will call the roll of absentees.

The Secretary called the names of absent Senators.

Mr. BRANDEGEE entered the Chamber and answered to his name.

The VICE PRESIDENT. Forty-one Senators have answered to the roll call. There is not a quorum present.

Mr. CLARKE of Arkansas. I move that the Sergeant at Arms be directed to notify the absentees and request their attendance.

The motion was agreed to.

The VICE PRESIDENT. The Sergeant at Arms will carry out the instructions of the Senate.

Mr. LIPPITT, Mr. WORKS, and Mr. WALSH entered the Chamber and answered to their names.

Mr. WALSH. I was requested to announce that the Senator from Oklahoma [Mr. OWEN], the Senator from Nebraska [Mr. HITCHCOCK], the Senator from Missouri [Mr. REED], the Senator from New Hampshire [Mr. HOLLIS], and the Senator from Wisconsin [Mr. HUSTING] are detained in the Committee on Banking and Currency upon official business.

Mr. O'GORMAN, Mr. CATRON, Mr. CULBERSON, Mr. NEWLANDS, Mr. SMITH of Arizona, and Mr. TILLMAN entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present.

Mr. CLARKE of Arkansas. I move that further proceedings under the call be vacated.

The motion was agreed to.

Mr. CLARKE of Arkansas. I am informed by the clerks at the desk that while the amendment appearing on page 24, lines 20, 21, and 22, was agreed to, the amendment on line 23 was not read. I ask that the Secretary may read the change made in line 23, because it is a part of the amendment that was adopted yesterday.

The SECRETARY. On page 24, line 23, strike out "$25,000" and insert "$50,000."

The VICE PRESIDENT. Was not that considered as a part of the amendment adopted yesterday?

Mr. CLARKE of Arkansas. It was not submitted to the Senate.

The VICE PRESIDENT. The Chair hears no objection, and the amendment is agreed to.

Mr. SHEPPARD. I wish to ask the chairman of the committee if the word "Texas" should not be stricken out in line 23, on page 24, and the word "Oklahoma" inserted.

Mr. CLARKE of Arkansas. I think that might be done, properly, although it is in the text of the bill as passed by the House, and it is the language they usually employ in the Engineer's office. I do not know that it is necessary. I suggest that we just let it stay like it is.

Mr. SHEPPARD. Very well.

The VICE PRESIDENT. The reading of the bill will be continued.

The Secretary resumed the reading of the bill.

The SECRETARY. The next amendment of the Committee on Commerce is, on page 25, line 5, after the word "including," to strike out the word "works" and insert "bank protection," and——

Mr. KENYON. I wish to raise some objection to this item.

Mr. CLARKE of Arkansas. Let it be read, I suggest to the Senator from Iowa, that we may understand what it is that we are going to consider.

The VICE PRESIDENT. It will be understood that the three amendments in this paragraph constitute one amendment.

Mr. CLARKE of Arkansas. That is all. They are associated in the text for the purpose of constituting a single amendment.

Mr. KENYON. They are all to go together?

Mr. CLARKE of Arkansas. Yes.

The VICE PRESIDENT. The amendments in the item will be stated as one amendment.

The amendment was, on page 25, line 5, after the word "including," to strike out "works" and insert "bank protection"; in line 6, after the words "Pine Bluff and," to insert "Little Rock and vicinity and"; and in line 7, after the word "plant," to strike out "$200,700" and insert "$234,700," so as to make the clause read:

Arkansas River, Ark. and Okla.: For maintenance of improvement, including bank protection at Pine Bluff and Little Rock and vicinity and the operation of dredging plant, $234,700.

Mr. KENYON. I will state to the chairman of the committee that the Senator from South Carolina [Mr. TILLMAN] desires to address the Senate at this time for a few moments, but he has stepped out of the Chamber.

Mr. CLARKE of Arkansas. There is no objection to the Senator from South Carolina addressing the Senate if he wants to do so.

Mr. KENYON. I will take the time until the Senator from South Carolina comes back, and I hope the Senator will listen very earnestly.

Mr. CLARKE of Arkansas. Very well.

Mr. KENYON. We have approached an item now, Mr. President, which will put the Senate to a test; an item that is contrary to the recommendation of the district engineer, the division engineer, the Board of Engineers, and the Chief of Engineers. I notice the Senator from South Carolina has entered the Chamber; and if he desires to proceed at this time, I will resume my seat.

Mr. TILLMAN. I am much obliged to the Senator.

The VICE PRESIDENT. The Senator from South Carolina is recognized.

Mr. TILLMAN. Mr. President, much to my regret, I feel compelled to vote against this bill, if I am the only Democrat to do so. The Senator from Massachusetts the other day, with a cynical laugh, said, "This is one of the bills that was made to pass," and I have no doubt that it will pass; but, all the same, I do not think it ought to become a law. I will trespass on the time of the Senate for a few minutes to give my reasons.

In the first place, the United States is confronted by a very unusual and remarkable condition. Nothing like it has ever been seen before in the world. The war in Europe, which came like a cyclone and burst upon the world with a suddenness and fury the like of which history gives us no parallel, will soon have been in progress two years. If there is any end in sight it is out of my vision. This fearful and bloody struggle has affected our country in many ways, bringing unexampled prosperity to some sections, and not injuriously affecting any class of its citizens except the southern cotton growers. And even the South is now very prosperous, thanks to Secretary McAdoo's wise and liberal administration of the Treasury Department. Like a fire bell in the night, the war has called attention in clarion tones to the conditions of unpreparedness for self-defense in which the United States finds itself.

I shall part company with my colleagues on this river and harbor bill with great reluctance. But I really can not see things as they seem to see them, judging by the action of the Senate Commerce Committee.

Congress has appropriated hundreds of millions of dollars for the Army and Navy both; but the country feels now, I am sure, that the Army and Navy which we have are not at all adequate for the amount of money they have cost. Had the $50,000,000 appropriated by Congress when the Spanish-American War broke out in 1898 not been scandalously squandered we would not now have such a worthless and inadequate transport service. Instead of Congress having to appropriate money for a merchant marine now, we would have a very respectable lot of ships—and serviceable ones, too—already belonging to the Navy which could be utilized for that purpose.

The *Chicago* and the *Dolphin*, authorized in 1883, are still in commission and doing good service, whereas the ships purchased in 1898 have either been sold at a loss or are still on the Navy list at a heavy expense to the Government.

Secretary McAdoo, in a speech before the Chamber of Commerce of Indianapolis, October 13, 1915, said:

The Navy alone bought at that time 102 vessels as naval auxiliaries, and paid, in round numbers, the fabulous sum of $18,000,000 for them. There is no officer of the Navy who knows about these purchases who won't admit that most of these vessels were junk.

I shall insert in my speech a table compiled from official figures obtained at the Navy Department giving the cost of some of these vessels, the amount that has been spent on them for repairs, and the price obtained for those that have been sold. It will prove very instructive and interesting, and is as follows:

Ships purchased during the Spanish-American War, the price paid for each, amount spent on repairs, and price for which sold.

	Purchase price.	Repairs, changes, etc.	Selling price.
Alexander	$206,825.25	.....	$17,400.00
Cheyenne	19,639.05	.....	1,690.00
Chickasaw	15,000.00	.....	2,550.00
East Boston	57,500.00	.....	28,091.00
Gov. Russell	71,000.00	.....	25,000.00
Hector	200,000.00	.....	65,150.00
Hist	65,000.00	.....	2,421.00
Hornet	117,500.00	.....	5,100.00
Inca	35,000.00	.....	1,800.00
Justin	145,000.00	$308,208.37	101,107.00
Niagara	200,000.00	.....	75,563.00
Oneida	60,000.00	36,703.31	2,550.00
Restless	29,000.00	.....	1,008.00
Scipio	85,769.71	.....	41,550.00
Shearwater	24,000.00	.....	1,535.00
Siren	40,000.00	.....	2,352.50
Vulcan	350,000.00	.....	175,750.00
Yankee	575,000.00	.....	2,010.00
Yosemite	575,000.00	.....	11,522.43
Zafiro	87,597.00	.....	3,300.00

We have as good officers and men in both Army and Navy as any Nation can show, but when put to the test the Army has not met expectations at all. The Navy has shown up much better. We seem to have lost the art of getting a dollar's worth of Army or Navy either for a dollar.

In the Navy the armor manufacturers have been allowed to steal too much, and for some reason or other the bill which went through here for a Government armor plant seems paralyzed in the House. While the Army did not get started into Mexico as quickly as it should have done under the circumstances, and seems to have been dazed by the suddenness that it was called on to really do something except patrol the border, I have every confidence that it will prove itself worthy of the Stars and Stripes under which it goes to battle, if we ever have any fighting down there. And the way Funston and Pershing have handled the troops under them shows what we may expect should any real business be cut out for them to do. It is my belief that we ought to set about this one particular thing and confine our energies and expenditures almost entirely to these two objects.

I want us to have the very best Army for its size in the world, and the very best Navy, too. Both have made such glorious records in the past that I do not fear that either of them will discredit those records.

We Americans can imitate and ought to imitate and emulate the wonderful efficiency of the German people. The marvelous condition of preparation which Germany has shown proves beyond doubt that she was ready and had expected war a long time; while the other combatants were not expecting it nor were they prepared for it.

The inventions of Americans have cut a great figure in the story and results of the fighting. Aviation in all its forms—aeroplanes, hydroplanes, biplanes, and Zeppelins, all American inventions except the last—has proved a great factor and been of immense use.

The fight between the *Monitor* and the *Merrimac* during our Civil War revolutionized naval warfare, and made junk of all the navies then in existence. This war has revived the trench fighting first used by the Confederates and Federals in the siege of Petersburg in 1864 and 1865. The Confederates defended the ruins of Fort Sumter after it had been battered to pieces by the Federal batteries on Morris Island and made a heap of brick dust. They found sand bags to be a far more efficient defense than bricks and mortar had ever been. Just so the destruction of the fortress at Antwerp, thought impregnable, demonstrated no new thing in defensive warfare, or fortification either. Many lessons taught by this war thought to be new had been proven by our Civil War. Students of military science hereafter can very profitably study the parallels and make comparisons. European generalship proves that the campaigns of Lee and

Jackson, Grant and Sheridan, Johnston and Sherman have been profitably studied across the water.

American inventors first conquered the air and taught men to fly, but notwithstanding that we were the pioneers and discoverers of aerial navigation, every American must have blushed with mortification at the unprepared condition of our Army and the almost worthless character of our flying machines as shown by the punitive expedition into Mexico. It was anything but creditable to American genius, progressiveness, and business ability.

I do not propose to vote for any scheme of lavish expenditure along any of these lines; but I do want—and will joyously vote for—enough money to give us adequate, well-equipped, and properly built aerial squadrons for Army and Navy both. The appropriations for aviation have not been at all lavish, and perhaps they were inadequate, but I feel sure that an honest and earnest supervision and inspection of machines before they were paid for would have given us better results; and there are entirely too many excuses—and lame excuses at that—to satisfy the people. There is incompetence or rottenness somewhere, and it ought to be ferreted out and punished. If the greed of contractors for money making is not checked and killed off some way, this country is bound to suffer should we get into war, and our national debt will mount up much more rapidly than it did during the Civil War.

I will not and can not but believe that our manufacturers can do as well as or better than the Europeans, all of whom seem to have become experts in flying. I know our men are just as brave as theirs, and we have as great dare-devils as they possess. But somehow there are too many failures to satisfy me.

The submarine, too, is an American invention, and yet we have allowed the Europeans to outstrip us so far as to wholly discredit our ability to manufacture and use our own invention.

We have had a hard struggle between the two committees of the House and Senate about the size and character of our Army. I am rejoiced to feel that we have agreed on a military force on land and set in motion preparation of the necessary reserves to enable us to temporarily defend our country if war should unhappily come. What we need now, in that respect, is enough reserves of ammunition and guns of all kinds.

But the one essential and most important expenditure confronting us, and to which we should bend all the Nation's energies, is an adequate navy; and by that I mean a navy second to none except England's, both in number of ships and their armament. I want us to have the very best types of ships and armament possible to obtain—not as many ships or as powerful a navy as Great Britain's, but equaling it in individual units and, if possible, surpassing it in every essential of modern warfare. This will cost hundreds of millions of dollars; but no matter what it cost, we ought to have it—we must have it—and we ought to set about obtaining it in a hurry, because it takes time to build battleships and battle cruisers.

Battleships and battle cruisers are not the only things we need for a great Navy, but we need docks, piers, and other facilities to take care of the ships after we build them.

This bill proposes to spend $40,000,000 or more on rivers and harbors. The Committee on Commerce reported this bill to the Senate with one of the most meritorious items that the House had put in stricken out—that for East River—"Providing for a channel of deep water from New York Harbor to the navy yard," so that a battleship could go up to the navy yard without running aground at any stage of the tide. The Senate has shown itself too broad and patriotic to follow its committee, and this item was restored by an overwhelming vote yesterday. The House Committee on Rivers and Harbors refused absolutely to put in a similar item for Charleston Harbor where, for $175,000 only, deep water can be obtained by dredging, so our largest battleships can go from open sea up to the navy yard under their own steam. The House Naval Committee has incorporated this item in the appropriation bill, and I feel sure the Senate will retain it without any contest at this time.

This policy of urging a river and harbor bill of this kind is inexplicable. It is as though men were wild and crazy over local affairs, and have no broad national grasp at all. Why should we spend all this money in the face of the fact that we are compelled to greatly increase taxes to get money to run the Government this year? I shall be criticized in South Carolina for voting against it. Many of our Congressmen who have small pieces of pork in this barrel will dislike very much my opposing it, but I have always found that truth and honesty of purpose in the long run to be the very best of policy. However, I have already told the people of South Carolina that I would never be a candidate again and would retire when my term expires; therefore the political aspect has no influence on me whatever. [Laughter.]

Senators laugh and do not believe me, but I will tell you it is true. You may be that kind of politicians, but I am not. I have stated to the people of South Carolina that I would not be a candidate, and they can not make me be a candidate. If they want to elect me, they can do so, though I am so feeble and helpless.

Mr. THOMAS. I beg to assure the Senator that I did not doubt his word at all.

Mr. TILLMAN. The Senator laughed.

Mr. THOMAS. I laughed because that reminded me of certain matters. I have the highest regard for the Senator's word, and do not question it for a moment.

Mr. TILLMAN. I beg the Senator's pardon, then; I apologize.

Many a time I have confounded my enemies with the plain, blunt, and almost brutal statement of the truth, both here and elsewhere. The unvarnished truth is a new weapon in political warfare as the game is generally played, and it revolutionized the science in South Carolina. Many men found fault with and even now do not like my methods, but they were compelled to respect my motives. I knew I was honest; I believed I was right; and I have never hesitated to blurt out the truth anywhere and before any audience. The people of South Carolina have sustained me, because they believed in my integrity of purpose and honesty. When they understand what I am doing here they will applaud me for my moral courage, and I can afford to let my critics continue to howl.

I can not understand such a policy at all. I do not want to hurt anybody's feelings, or wound sensibilities, but to me this expenditure would be criminal under the circumstances which now exist. I have not the figures, or even the approximate data, and can only guess; but I would be willing to vote $300,000,000 if necessary, to begin at once—and hurriedly, as though we expected a war immediately—the construction of the necessary ships of the most improved types to give us a really first-class Navy.

I see the House Committee on Naval Affairs proposes five battle cruisers of the most approved type. When the naval appropriation bill comes over from the House, if there is no provision in it, or adequate provisions in it, for docking these monsters, I expect to have something to say in regard to how we can get the first dock large enough on the Atlantic to repair them in one year and a half. But I will not anticipate.

Let us appropriate as many millions as the Board of Army Engineers in charge of these improvements tell us on their honor are vitally important and of immediate necessity, and vote every dollar that we spend this year to putting the country in a condition to defend itself.

I am not panic-stricken nor frightened, but when I consider the possible dangers that may confront us as a people when this European war is over, I tremble at what could happen. There will be millions of trained and veteran soldiers and all the treasuries of Europe will be bankrupt. If America is then defenseless and has shown no inclination to get ready to defend itself adequately, the temptation for invading us and taking some of the wealth which has been brought across the ocean by the war will be very great indeed. No one knows what combinations might be made or what alliances come about. Japan even now has a navy far more efficient than ours in some particulars, because she has battle cruisers of the best kind; and the war has brought to Japan much money for munitions, just as it has to us.

Armies are not created in a day. It takes six months or a year to drill men and familiarize them with the use of arms, so that they may know how to fight and defend themselves. Otherwise, they can be slaughtered like so many sheep. And a navy is even of slower growth. It takes from two to three years to build modern ships of war, depending on the size; and they have become such complicated machines that it takes a long while to drill the officers and men to handle them efficiently. It is far better—even an ignoramus will admit this—to keep men from landing on our shores and doing us damage than it is to have to fight them after they do land. Therefore the American people have never been willing, and they are not willing now, for a large standing army. I believe religiously that the taxpayers of the United States are not only willing but anxious to put their hands in their pockets to create and maintain a Navy sufficient to protect us from invasion. The people of the Pacific coast are, and have been for a long while, deeply concerned because of the unprotected condition in which that coast now finds itself. I do not believe any man of any party will receive consideration at the hands of intelligent audiences who

objects to giving us a powerful Navy "second only to Great Britain." I stress this, and I should like to most have it stressed throughout the country, because to me it is important, and it ought to be drummed into the ears of the American people, just like old Cato, in every speech he made, concluded with his famous utterance, "Delenda est Carthago"—"And, fellow citizens, Carthage must be destroyed."

Returning to rivers and harbors, this was the policy which has been in vogue for a long while. Members of the House, where all revenue bills must originate under the Constitution and whose Members go before the people every two years, have always been more solicitous about such things than Senators. "You vote for my river, and I will vote for yours; I'll tickle you, if you will tickle me"; and finally the slogan became very common: "You vote for my steal, and I will vote for your steal."

The appropriations thus made were not technically stealing at all, but the river and harbor bill came to be known as the "pork barrel"; and it has had much to do with the discredit into which Congress has fallen. It was permissible and perhaps admirable for Members to wish to get back for their congressional districts and Senators for their States as nearly as possible what those States paid in taxes. When you think about that phase of it, it does not appear so great a crime. It did not elevate men in their own estimation nor in that of their constituents, however.

The protective tariff piled money up in Washington, and these expenditures, whether stealing or not, served to circulate it among the people again.

I can recall the year after I came to Washington—1897—when the first tariff bill after I entered the Senate was under discussion. The Republicans following their usual tactics were pretending to "protect" wheat and cotton and other farmers' products we exported by putting a duty on them. I asked for a duty on rice—a South Carolina product—and said:

Now, let us have a clean record on this business. I stand here myself and announce that if we are to have this stealing from the people by protected interests, I want my share for South Carolina; and I am not ashamed to say it. (CONGRESSIONAL RECORD, vol. 30, pt. 2, p. 1820.)

This utterance has been rolled under the tongues of my critics and enemies for these many years, and every once in a while it confronts me in the columns of some lying Republican newspaper—only that part of it, though, where I proclaimed I wanted "my share of the stealing." They are always careful to omit the first clause of the sentence, "if we are to have this stealing from the people by protected interests." That is always expunged, or omitted.

In 1901, when the rivers and harbors bill was before the Senate, I used these words:

The Mississippi itself has quit having any steamboats on it almost, and the whole scheme of river improvement is a humbug and a steal; but if you are going to steal, let us divide it out, and do not go to complaining. (See CONGRESSIONAL RECORD, vol. 34, pt. 4, p. 3527.)

And again, in the same debate, Senator Carter had said the "locks and dams all through Pennsylvania on the Allegheny were erected in the time of George Washington, or shortly after"; and I made this reply:

In those days the South stood back and did not claim anything for public improvements, on the ground that it was unconstitutional, and our friends up North got all the swag. We have come to think that we are entitled to our share. (CONGRESSIONAL RECORD, vol. 34, pt. 4, p. 3528.)

You see, I am taking a farewell, as it were, and this is my valedictory on the "stealing" business. I want to let everybody know just what I said, and when I said it, and why I said it, and let them do me justice. To oppose river and harbor bills is no new thing for me.

It was these utterances of mine which caused the Senator from Iowa some days ago in this debate to allude to the Senator from South Carolina in the way he did. But I do not want my share of the stealing in this bill; and while South Carolina has items in it amounting to $300,000, I shall vote against it, and hope it will not become a law. We need the money so much for far more important things that it is criminal to my mind to hesitate for one moment, or discuss this bill at all. Think of it! Forty million dollars to be wasted, and taxes to be heavily increased. That forty millions would build two battle cruisers. No one knows how many submarines it would build, and I can only guess how many airships and other things of that sort we could buy with it.

I make bold to say—and I do not say it in criticism of any other man's vote at all—that I would be ashamed to go home to South Carolina and tell my people that I had voted $300,000 for South Carolina and left unprepared and unprovided for the momentous question of a great Navy. I had rather have, and I believe the Nation needs more, a thousandfold more, two modern up-to-date battle cruisers of the best type than it does or can possibly need or be benefited by this forty millions for rivers and harbors. If this bill does pass, as Senator LODGE has said it was made to do, I pray God the President will veto it.

The wise course would be for us to pass a lump-sum appropriation for rivers and harbors to continue those most meritorious items in the bill—and there are many of these—leave out all surveys, and only give enough to keep the really important projects from going to ruin.

The Army engineers ought not to be encouraged, almost coerced, as it were, to advise or consent to the improvement of this and that creek or river until the country is prepared to protect itself. Common sense, patriotism, and every other consideration which ought to control men are against the passage of this bill. And while I do not claim I am more patriotic than my brethren on this side of the Chamber, and have none of the Pharisee in my nature, I hope there will be some others like myself who do not see their duty lying the way this bill points. I hope there will be votes enough to defeat it.

Mr. KENYON. Mr. President, I join in the wish of the Senator from South Carolina.

To revert to the proposition of the Arkansas River, if there is any proposition that can be a test as to whether or not the Senate will follow the Army engineers when the Army engineers decide against a project, here is the test. We have spent something like three and a half million dollars on the Arkansas River. The commerce in 1913, excluding timber and sand, was, I think, less than 20,000 tons. In 1915, under the allotment of the act of March 4, there was assigned $193,350. In 1913 and 1914 there were some 44,000 snags removed from this river.

I want to put into the RECORD, at least for some future reference, a portion of the minority report of Senator Burton with reference to this river. The part I put in is very short. On page 9 he says:

On the Arkansas River the total tonnage was 71,516 tons—

He is speaking of 1912—

of which 56,208 tons were saw logs. The balance, 15,308 tons, notwithstanding the length of the so-called navigable portion of the river (463 miles), was carried an average of only 34 miles. The appropriations to date on this stream have been $3,108,008.44, and the appropriation in the pending bill is $164,700.

He was referring then to the act of 1914—

Using the same computation as before of 4 per cent on the amount appropriated for this river, and the $164,700 appropriated in this year, which includes work at Pine Bluff and the completion and operation of a dredging plant, the cost for carrying each ton would be $4.04. If the saw logs are excluded, the cost per ton would be $18.81. And yet it is proposed to expend on this stream $349,000 for permanent plant and $118,000 per year for its maintenance.

According to the reports of the Army engineers on page 2719 of volume 2, the appropriations and allotments and the proceeds of some sales—I do not know what those sales are, but they amount to a small figure—make an aggregate of $3,592,402.18. The commerce for 1914 was 79,169 tons. Of that 35,000 tons were logs, 3,000 tons lumber, and 17,115 tons sand and gravel hauled 7 miles, or a total of 55,115 tons that should be subtracted in getting at the real commerce on the river for handling that requires particular improvements, leaving 24,054 tons of commerce.

Mr. President, the House appropriated $209,700 for this stream. The Senate committee have inserted $25,000 more, making the total appropriation $234,700. Now, let us see what the reports of the Army engineers amount to.

When the report of the Army engineers is for a project, as yesterday on the Red River, I note that you follow it; and we have been listening for a year or so, whenever the bill has been up, to eulogies of the Army engineers. The Senator from Louisiana [Mr. RANSDELL] last year rather found fault with Senator Burton for finding any fault upon his part with the Army engineers, and delivered a eulogy of the Army engineers that almost amounted to a canonization. Now, are we going to follow the Army engineers when they decide our way and not follow them when they decide against us? That is the proposition involved here.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER (Mr. SMITH of Michigan in the chair). Does the Senator from Iowa yield to the Senator from Mississippi?

Mr. KENYON. I do.

Mr. VARDAMAN. I should like to ask the Senator from Iowa if that is going to be his course?

Mr. KENYON. It is not.

Mr. VARDAMAN. The Senator is not going to follow them at all, then, is he?

Mr. KENYON. My course is definitely marked in my own mind. I am going to support propositions that, after study, seem to me to be for the benefit of the Nation, and I am going to oppose propositions that seem to me to be wasteful.

Mr. VARDAMAN. I commend the Senator's fidelity to his sense of duty, but if the Army engineer should be mistaken the Senator would not think any other Senator was acting improperly if he did not follow the recommendation of the engineers?

Mr. KENYON. I have no complaint of other Senators. I know very well they will not follow the Army engineers on this proposition, and I should like to see my way clear not to follow them, just because of the chairman of the committee. But, regardless of that, let us see what the engineers report.

Congress ordered a reexamination of this river; and I want to say now that this river is as good as a number of other rivers covered in this bill. There is not any question about that.

Mr. SMOOT. Better.

Mr. KENYON. Yes; better. In the report of Gen. Kingman, Chief of Engineers, Document No. 461, of date December 17, 1915, submitting to Congress the report of Maj. Putnam, Gen. Kingman says:

The Arkansas River has been under improvement by the United States since 1832, when snagging operations were inaugurated. The present project provides for improving the river from its mouth to the head of navigation by snagging operations, removing shoals by dredging and the use of contraction works, and holding the improved channel by revetment where necessary.

Further down he says:

Experience has now demonstrated that no benefit commensurate with the cost can be expected from them, even if confined to the short reach below Pine Bluff, where they have been operated. The commerce has been decreasing and now amounts to only about 55,000 tons, a large part of which consists of forest products, which can usually be handled at medium and high stages without improvement. In view of the existing physical and commercial conditions, the district officer thinks that the work of revetting the banks should be revived, and he recommends that the project be modified to provide for "the improvement of the river from its mouth to the mouth of Grand [Neosho] River (461 miles) by snagging operations, by revetting of banks, and by dredging operations, with a view to producing at ordinary low-water channel depths of 3½ feet to Little Rock, 3 feet from there to Ozark, 2½ feet from there to the mouth of the Canadian River, and 2 feet from there to the mouth of Neosho River." The division engineer calls attention to the general decline of commerce on the western rivers—

And so forth—

After due consideration of the above-mentioned reports, I concur in the views of the division engineer and the Board of Engineers for Rivers and Harbors, and therefore recommend that legislation be enacted modifying the existing project for improvement of Arkansas River, so as to limit the work to snagging the river from its mouth to the mouth of the Neosho, at an annual cost of about $35,000, and authorizing the transfer without charge of the dredges and other plant not required for snagging to such other works of improvement as the Chief of Engineers may designate.

DAN C. KINGMAN,
Chief of Engineers, United States Army.

So he recommends the appropriation of $35,000. The House put in $209,700 and the Senate $234,700. Why?

Mr. STERLING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from South Dakota?

Mr. KENYON. I do.

Mr. STERLING. Will the Senator please state again for what purpose the $35,000 is recommended by the Board of Engineers?

Mr. KENYON. For snagging the river from its mouth to the mouth of the Neosho.

The Board of Engineers, speaking through Col. Black, on page 3 of this report, says:

Under this and the various other projects described by the district officer, there had been expended to June 30, 1914, a total of $3,243,650.91. It is estimated that snagging will cost $35,000 annually, and that it will require $118,700 annually for the operation of the two dredges.

A modification of the plan which they recommend seems to eliminate the dredging.

At the bottom of page 3 is the district officer's plan, which seems to meet with Col. Black's approval. On that subject he says:

The district officer believes that the improvement of the river should not be abandoned, but that more complete work of regulation should be undertaken and the project modified to read:

"The improvement of the river from its mouth to the mouth of Grand [Neosho] River (461 miles) by snagging operations, by revetting of banks, and by dredging operations, with a view to producing at ordinary low-water channel depths of 3½ feet to Little Rock, 3 feet from there to Ozark, 2½ feet from there to the mouth of the Canadian River, and 2 feet from there to the mouth of Neosho River."

He says, further:

The Arkansas River flows through an alluvial bed, and the channel is subject to unusually rapid changes in position and depth. Its banks are easily eroded, and experience has shown that no permanent improvement of channel can be expected unless the banks are protected by revetment. This would necessitate practically continuous work on one or both banks, similar in character to that being done on the Missouri River under the existing project for that stream. Such work on the Missouri River costs from $50,000 to $60,000 per mile, and is expected to result in a channel depth of 6 feet or more. The permanent improvement of the Arkansas would be correspondingly expensive, and owing to the small low-water discharge could hardly be expected to result in a low-water channel depth of more than about 3 feet, which would obviously be inadequate for a commerce great enough to justify such an expenditure.

Further, he says:

The board fully realizes the advantages of water transportation and the benefits that would result to a large section of the States of Arkansas and Oklahoma if a stable channel of good navigable depth were available. The physical conditions on this stream, however, and particularly its small low-water discharge, are such as to prevent any radical improvement except at a cost which is entirely disproportionate to resulting benefits, as far as they can now be foreseen. The removal of snags, at an estimated cost of $35,000 per year, will make the natural depths available and permit a light-draft navigation such as has been carried on in the past. It is believed that this work should be continued.

In view of the foregoing, the board recommends legislation modifying the existing project so as to limit the work to snagging the river from its mouth to the Neosho, at an annual cost of about $35,000, and authorizing the transfer without charge of the dredges and other plant not required for snagging to such other improvement as the Chief of Engineers may designate.

There is also in this document a report of Maj. Putnam, who, I think, was the district engineer.

On page 10 of House Document No. 461, page 6, of Maj. Putnam's report, there is set forth the commerce during the 10-year period ending with the calendar year 1913. It seems that in 1905 there were 86,458 short tons. The commerce seems to have reached its height in 1907, when it amounted to 104,493 tons. In 1913 it amounted to 55,228 tons, of which the heaviest movement, he says, has been below Pine Bluff, 80 per cent of it in forest products. Maj. Putnam makes the following recommendation on page 11:

The improvement of the river from its mouth to the mouth of Grand River (461 miles) by snagging operations, by revetting of banks, and by dredging operations, with a view to producing at ordinary low water channel depths of 3½ feet to Little Rock, 3 feet from there to Ozark, 2½ feet from there to the mouth of the Canadian River, and 2 feet from there to the mouth of Neosho River.

Then Col. Townsend, colonel of the Corps of Engineers, he himself the division engineer, says what I shall read, because it is short and applies somewhat to other rivers than the Arkansas River:

Not only has the commerce of western rivers rapidly declined in recent years, as stated by the district officer, but the character of the boats carrying the traffic has radically changed. In 1900 the average sized boat that navigated the Arkansas River was one of 174 registered tons, while in 1913 it was only of 46 tons. In 1900 the larger vessels made trips from Little Rock and Pine Bluff to Memphis and Vicksburg, while in 1913 the average distance traveled was only 34 miles, indicating that the boat has entirely ceased competing with the railroad in carrying through traffic and is only used to collect the products of a farm distant from a railroad and transport them to the nearest rail connection.

I will ask to have the entire report of Col. Townsend inserted as a part of my remarks.

The matter referred to is as follows:

OFFICE DIVISION ENGINEER, WESTERN DIVISION,
St. Louis, Mo., May 20, 1915.

To the CHIEF OF ENGINEERS, UNITED STATES ARMY:

1. Forwarded.

2. Not only has the commerce of western rivers rapidly declined in recent years, as stated by the district officer, but the character of the boats carrying the traffic has radically changed. In 1900 the average sized boat that navigated the Arkansas River was one of 174 registered tons, while in 1913 it was only of 46 tons. In 1900 the larger vessels made trips from Little Rock and Pine Bluff to Memphis and Vicksburg, while in 1913 the average distance traveled was only 34 miles, indicating that the boat has entirely ceased competing with the railroad in carrying through traffic and is only used to collect the products of a farm distant from a railroad and transport them to the nearest rail connection. A similar condition is found on all the western rivers, with the exception of the transportation of coal on the Ohio River and a small movement of freight on the Missouri River between Kansas City and St. Louis. Such transportation has no effect on rail freight rates, and can be most profitably carried by motor boats and barges of light draft.

3. Whatever may be the causes of this decline of river traffic, they are of general application to all the western rivers, and the density of traffic on the Arkansas River is so small that there is no probability that the improvement of its channel will counteract this general law, particularly since the radical improvement of the Mississippi River from St. Louis to New Orleans, which has existed for the past 10 years, has had no appreciable effect upon it.

4. Should a revival of river commerce occur, it will first be observed between large centers of population, such as Chicago, Pittsburgh, St. Louis, and New Orleans, where there are large amounts of manufactured articles to be moved. The agricultural products that are directly tributary to a river do not furnish a sufficient volume of freight to justify at present its permanent improvement as a route for through traffic, but a revival of commerce, commencing at large centers of population along the trunk stream, may gradually extend to the tributaries.

5. It is therefore recommended that the improvement of the Arkansas River be at present confined to snagging, which is warranted by the existing commerce, and that all attempts to permanently improve the river channel be deferred until there is an appreciable revival of commerce on the Mississippi River. The dredging proposed by the district officer is considered a waste of public funds. It can have no effect on the permanent improvement of the river. It is insufficient even to maintain a temporary channel from the river mouth to Pine Bluff. The transfer of the dredges built for the Arkansas River to the Ohio is suggested, where they would be of some practical use.

C. McD. TOWNSEND,
Colonel, Corps of Engineers, Division Engineer.

Mr. KENYON. The district officer, Maj. Putnam, did, it seems, recommend the dredging, and my statement is in error to that extent. But we have here the division engineer, the Board of Engineers, and the Chief of Engineers of the United States Army, at least to the extent of suggesting a modification project, condemning the project that is carried by the terms of this bill. They recommend $35,000. This bill carries $234,700.

Now, a number of distinguished gentlemen appeared before the Board of Army Engineers, as there appeared before the Committee on Rivers and Harbors of the House. I called attention to the remarks made at that time by the distinguished chairman of this committee. There were few present, not as many as there are now, and I want to call attention to those remarks again. They are as forcible as the remarks of the Senator from South Carolina [Mr. TILLMAN], and I wish that we could follow the suggestion of the Senator from Arkansas. He says with relation to this matter:

> There are millions of dollars scattered over the United States not doing any good except to improve the political prospects of some party. I have been aware that, whether from oversight or whatever it is, there comes up to our committee recommendations that seem to me to be discriminatory. Some things that are not half so worthy as other things are recommended where others things are not recommended. If it is the policy of this administration and of this board to adopt a more rational, businesslike system, I shall aid them in their efforts to do so, and if, after a fair test, the Arkansas River falls under the condemnation of any rule that has been adopted and will be uniformerly applied, I will stand as religiously for that as any other—

We all know that is true—

> but, when I am backed by such reports as the two I have called your attention to—

Reports of the division engineer favoring this project. Indeed, I think there was a time when the Army engineers favored a project that involved an expenditure of $16,000,000 to improve the Arkansas River. The Senator from Arkansas continues:

> and the policy was reasonable of digging out this stretch of 173 miles of river from here to the Mississippi River—I believe I am justified in showing some earnestness and protesting with some emphasis against the report made, and which is now under consideration by you.

After referring to some boats that had been constructed he further said:

> The bill was passed by the committees—

Referring to the last river and harbor bill—

> The bill was passed by the committees, but it was impossible to get it out under the "pork-barrel" system. If the shaking up that that business has gotten in the last two years or in the last two Congresses will result in a more careful discrimination in these objects, I think a very substantial result has come from it.

I had not used the words "pork barrel" in referring to this bill or in the discussion, but I am glad that the chairman of the committee at least is not one who condemned a thorough and full discussion and showing up of the last two bills.

Mr. President, I think that is all I have to suggest about the Arkansas River. I have shown that the commerce over it practically amounts to nothing after the sand, gravel, and logs and the lumber are deducted. There has been an expenditure of over $3,000,000, and the recommendation of all the engineers except the district engineer is against the provision of this bill, and in favor merely of $35,000 for snagging.

If the Senate votes that kind of a proposition into the bill or refuses to take it out it certainly is quite apparent that it is useless to endeavor to strike out any item in this bill.

There may be some reasons for keeping it in, I imagine the chairman has some other reason outside of the question of navigation why he feels this item should remain in the bill, and his personal appeal to Members of the Senate, of course, is most potent. No one can question his good faith and earnestness. The facts, however, speak for themselves. The Senate is at the testing place. Will you follow the Army engineers only when they report for the project you believe in?

Mr. CLARKE of Arkansas obtained the floor.

Mr. JONES. I wish to ask that the amendment be read before the Senator from Arkansas proceeds with his remarks, so that we may know just what it is.

The PRESIDING OFFICER. The amendment will be read.

The SECRETARY. On page 25, line 5, after the word "including," strike out the word "works" and insert "bank protection"; in line 6, after the word "and," insert "Little Rock and vicinity and"; and in line 7 strike out "$209,700" and insert "$234,700," so as to make the paragraph read:

> Arkansas River, Ark. and Okla.: For maintenance of improvement, including bank protection at Pine Bluff and Little Rock and vicinity and the operation of dredging plant, $234,700.

Mr. CLARKE of Arkansas. Mr. President, I regret that a matter of this importance is to be submitted to the Senate at a time when there are not exceeding 10 Members present, but I think it due to those who have enough interest in this bill to attend to have a frank statement made of the reasons why I think the item should be retained in the bill and that the additional amount of $25,000 named in the Senate committee amendment should be provided. The addition of $25,000 is the only change that the Committee on Commerce made in the bill as it came from the House, in so far as the matter of amount is concerned. The Senate amendment provides that some part of it shall be expended in repairing the bank revetment heretofore made by the Government in the vicinity of Little Rock.

The Senator from Iowa [Mr. KENYON], contrary to his usual habit, has gotten into his mind a very erroneous impression about the Arkansas River. From the time that Arkansas was a Territory it has been one of the principal water highways of the country, and down to 1880 it constituted the principal means of reaching the western part of Arkansas and what was then known as Indian Territory. It is one of the well-known rivers of the country, and with proper improvement it will become one of the most important rivers of the country at least so far up as Fort Smith. But the present item does not deal with so comprehensive a problem as that.

The amount of $209,700 was included in the bill by the House, and is the amount recommended by the Board of Engineers, the same Board of Engineers who made this adverse report to which the Senator from Iowa has referred. They evidently had no confidence that Congress was going to adopt the wild and radical recommendation they made in this particular case, unless it shall be adopted in many other cases; in fact, unless Congress shall include in the act a complete change of policy with reference to all the western rivers, because the nonuse of western rivers is the ground upon which Col. Townsend puts his recommendation. I call attention to page 284 of the report accompanying this bill:

> The funds available July 1, 1915, will be so reduced by January 1, 1916, that no active operations can be carried on after that date until additional funds are provided. The estimate for the fiscal year ending June 30, 1917, is to cover snagging and dredging operations, the maintenance of the works at Pine Bluff, and the procurement of additional plant needed in connection with the dredging operations. Total for the fiscal year ending June 30, 1917, $209,700.

That is the amount that the House included in the item. The aditional $25,000 was made necessary by the damage to the bank at Little Rock by the recent disastrous overflows. There have been three disastrous overflows on the Arkansas River during the past 12 months. The last overflow, the highest known in the history of the river, was brought about by the extreme high water of the Mississippi River so that the Arkansas River was not able to discharge itself as rapidly as on former occasions when the former river was not bank full at the same time.

The Government some years ago put in a wing dike north of Little Rock. The probable height of probable high water was estimated at that time, and the elevation of the wing dike was adjusted accordingly. During the last overflow the water rose to such a high stage that it went over the top of it and undermined it and cut the bank at various places and damaged the improvement made by the United States at that point. It threatened to so change the channel as to cut into the populated parts of the city of Argenta, which is located on the north side of the Arkansas River just opposite Little Rock. So we feel that, so far as the small increase in amount is concerned, it has all the indorsement and foundation in actual merit that any other amount in this bill has. There is nothing objectionable or questionable in that feature of the demand.

Now, as to whether the recommendation of Col. Townsend should be accepted, something may be said, because at last his recommendation is the basis of this so-called adverse report. The Arkansas River has been under consideration for many years, as I stated before.

The $3,000,000 that the distinguished Senator from Iowa says has been expended upon the river consisted of appropriations from time to time since 1834 of $1,018,511 for new projects. Since 1834 the current expenditures connected with the maintenance of the river were $1,934,932. Two-thirds of the $3,000,000 the Senator referred to was expended in that great length of time for the current maintenance of the stream, principally during the time when it was actively used for transportation purposes and which have become obsolete by the passing of time and changes due to natural causes. Of the remaining $1,018,000 spent for new projects, more than $400,000 of it was spent within the last three years for the construction of two dredge boats recently provided to operate on the lower reaches of the river. So there has actually been spent in new projects on that river since the year 1834, leaving out the items for dredge construction, about $600,000.

The dredges were not built by accident. They were supplied for purposes of improvement of the river and were the result of very deliberate action taken by the Board of Engineers as

late as 1913. A report was filed justifying this expenditure and earnestly recommending it in the Sixty-first Congress, second session, House Document 510. Three of the most eminent engineers then in the service made the report and recommended that the treatment of the river which would bring the best results was by the dredging process.

The Arkansas River is like all the western rivers. Its waters are heavily charged with silt. There are thousands of square yards of Colorado and Kansas silt brought down and deposited in the bed of the river every year. The result is that the channel of the river is disorganized and its bed is looped with pools of narrow and deep places. An unbroken deposit of white sand from the prairies of the West is observable from the mouth to Fort Smith at any time during an ordinary stage of the river.

So the treatment that was suggested by that particular Board of Engineers in the report filed, as I said, in January, 1910, and under which the boats were provided in 1915, was that these two boats would probably be able to keep the channel open from Little Rock to the Mississippi River. Since the boats were put into the river the water has either been too high, as was the case during the year of 1916, or too low, as was the case in 1915. It is said by those who are in a position to know what they are talking about to be a fact that the dredge boats have been operated in the actual work of dredging for less than 30 days since they were installed on the river. The proposition is now coolly made, without giving the former recommendations of the board a fair trial, to take the boats off to the Ohio River and relegate the Arkansas River to the same national status as an ordinary creek.

The Committee on Rivers and Harbors and the House of Representatives very properly reached the conclusion that Congress was not going to do any such thing. The dredges were built for that river on a plan especially adapted to that situation, and they have been in actual operation about 30 days. The only ground upon which such a radical change of policy could be put was the sweeping recommendation of Col. Townsend, and that was that the western rivers have been condemned because of the disappearance from them as a class of an adequate commerce. He does not say that the river ought to be abandoned unconditionally, but says that it ought to be abandoned until traffic can be restored on the Mississippi River. The people interested in the Arkansas River care nothing about the Mississippi River except as it is a part of the water highway from Little Rock to Memphis.

There are several reasons why Little Rock, which is quite a jobbing center, should have access to Memphis by some means other than railroad communication. The freight zones east and west divide at Memphis. The Mississippi River is the dividing line. Little Rock is 132 miles inside the western zone. The freight rates authorized by the Interstate Railroad Commission are from 30 to 300 per cent higher for all classes of freight coming from the east for delivery at Little Rock than for traffic of the same class coming from the same direction for delivery at Memphis. It gives the Memphis jobbers a decided advantage over those at Little Rock. That matter of difference could be measurably equalized if we had the Arkansas River in a condition to be used. The merchants of Little Rock are among the most enterprising of any to be found in the country. They realize that fact of the handicap of proximity to the dividing line between the two zones, and they provided themselves with two boats to transfer the traffic—hundreds and thousands of tons coming and going to the Memphis gateway, but the condition of the Arkansas River would not permit them to continue it. The particular boats were bought at Grand Rapids, Mich., and brought to Little Rock, and one of them is now lying at the wharf because there is no channel in the river that will permit it to be operated. This is not a case where the commerce has left the river, but one where the river has left an abundant and anxious commerce.

Mr. JONES. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from Washington?

Mr. CLARKE of Arkansas. Certainly.

Mr. JONES. Will the Senator tell me what is the condition of the Mississippi River for navigation purposes from the mouth of the Arkansas River down?

Mr. CLARKE of Arkansas. It is first class. There is a boating stage of about 7 feet in the Mississippi River.

Mr. JONES. Why did the engineer say, then, that the Arkansas River improvement should be put off until there is further navigation on the Mississippi River?

Mr. CLARKE of Arkansas. As the engineer did not explain, and I have not ingenuity enough to answer for him, I must admit that I can not answer.

Mr. JONES. The Senator does not see any reason why, because there is no navigation from the mouth of the Arkansas down the Mississippi River, we should withhold appropriations until they get navigation on the Mississippi to St. Paul?

Mr. CLARKE of Arkansas. I think the Senator's question is a very appropriate one, and it obviously answers itself in the negative. There is no reason in the world why the western rivers should be outlawed by the United States simply because the people will not run boats on the Mississippi River where they can run them if they so desire. They have the best boating stage on the Mississippi River they have ever had in its history. The commercial interests at Little Rock will run boats from Little Rock to Memphis any day the United States will furnish river on which to run them. They have the boats and they have a motive for using them in the fact that thousands of dollars in freight charges will be saved to them, and they will be put in a better condition to compete for business with Memphis in territory common to both; but the vice of the whole of this last recommendation of the board is that it does not deal with the peculiar situation at Little Rock and the Arkansas River from that city to its junction with the Mississippi. The first board did. The river can be maintained at a boatable stage by the outlay of a reasonable sum of money if the dredges are permitted to continue the work assigned to them, as the former board said they could do, in the matter of removing shoals and sand bars separating the pools in the river between Little Rock and the mouth of the river.

Now, take what Col. Townsend said, sitting securely in his office in St. Louis. He did not come down to Little Rock, so far as anyone ever heard; he made no examination of the river; but it is a political recommendation, not in any technical sense, but as a recommendation of policy, and a recommendation with reference to this particular item only; and on that proposition listen to what he says:

2. Not only has the commerce of western rivers rapidly declined in recent years, as stated by the district officer, but the character of the boats carrying the traffic has radically changed.

Now, why should the Arkansas River alone have to be condemned by a proposition involving all the western rivers? Then he goes on to say:

A similar condition is found on all the western rivers, with the exception of the transportation of coal on the Ohio River and a small movement of freight on the Missouri River between Kansas City and St. Louis.

His reasons for condemning the Arkansas River will condemn the Missouri River; they will condemn the White River, the St. Francis River, the Trinity River, the Brazos River, and every river on the western side of the Mississippi River. Col. Townsend continues—

Whatever may be the cause of this decline of river traffic—

That is what he is talking about—the decline of river traffic generally; which does not apply to Little Rock, because we have made arrangements there to see that traffic does not decline there, and we have good reasons for seeing that it does not decline; and one of those reasons is to save money. We are within 132 miles of the dividing line between the eastern and western freight zones, and we must pay the western rate, whereas our competitors in business get their freight delivered at the eastern rate, which is from 30 to 300 per cent less. There is no speculation about it; it is a matter of actual computation and sound business.

The people there, as I have said, have provided for the situation by supplying themselves with two boats, one of which, however, they had to sell, because they could not run it for want of a boatable stage on the river, and not for want of traffic. On one trip out of Memphis the boat was caught between two sand bars with a load of freight on it and remained there many days until the rise came that enabled it to proceed. These very engineers who made this last report sought to travel from Pine Bluff to Little Rock on one of these dredge boats, when they encountered a sand bar, which made it necessary for them to leave the boat and proceed to Little Rock by other means. There is plenty of water in the river, if the dredging process could be carried on to an extent that the shoals and sand bars could be gotten out of the way, to make a continuous channel in the river.

About this last recommendation of Col. Townsend, I will say that it is not a professional recommendation, not a recommendation based upon things an engineer would know, and that other people would not know. Anybody could make the observation contained in his report; I mean any well-informed man of the same standing and character of Col. Townsend; and he is a man of high standing. He said:

It is therefore recommended that the improvement of the Arkansas River be at present confined—

Not permanently abandoned, but—

be at present confined to snagging, which is warranted by the existing commerce, and that all attempts to permanently improve the river channel be deferred until there is an appreciable revival of commerce on the Mississippi River.

We will revive part of it if you will give us a chance, and we will revive as much as two or three boats regularly engaged can haul.

More than that, the greatest bauxite deposit in the world is within 22 miles of Little Rock. The great Aluminum Co. of America owns it. That is one of the great so-called trusts of the country; but they have encountered such differences with the railroads that make it to their interest to ship this ore to Little Rock and Devalls Bluff by rail and there transship it by water to East St. Louis. They have been able to do that profitably. They could furnish thousands of tons—a thousand tons a day—at Little Rock for shipment down the Arkansas River if there were facilities to take care of it. This particular tonnage supply will continue until such time as they can bring the railroads around to their way of thinking about it; but the tonnage is there, and they are actually engaged in shipping it, when the water stages will permit, from Devalls Bluff around the White River and up the Mississippi River to East St. Louis; and they report that, in view of the smaller terminal charges which they pay at East St. Louis, that they can afford to continue shipments in this way.

The actual situation with which we are confronted with here is that less than three years ago the Board of Engineers recommended that two new dredge boats be constructed and put on the Arkansas River. They have been put on the river, and they are there now, but they have worked less than 30 days in execution of the business they were sent there to do.

A provision was put in one of the lump-sum river and harbor appropriations directing the engineers to reinvestigate certain projects. The local engineer, who lives at Little Rock and who is familiar with business conditions there and with the use of the river as a commercial proposition when put in a condition to be navigated, recommended a continuance of the project. He was a man eminent in his profession; he was no novice, but a man about 50 years of age, a former citizen of Massachusetts, who had worked himself up from a lieutenant to a major of engineers. He wrote his report with a knowledge of local conditions and recommended a continuation of the project. It was then referred to the St. Louis office—to Col. Townsend. If that officer ever put his foot in the Arkansas Valley in connection with this examination, nobody ever saw him; but he is a well-informed man, a high authority on water matters, and I am not going to say anything in the slightest degree to his discredit; but the view he takes is one of governmental policy; it is not a professional reason, and is no more binding upon the Senate and no more binding upon the Congress than the same opinion expressed by anybody else of equal standing. If it were not for the reason that grows out of our proximity to the dividing line between the eastern and western freight zones the argument would be somewhat narrowed in our case, as it would also be if it were not for the fact that the bauxite field is within reach with a thousand tons a day of freight that the company will ship over the railroad to Little Rock and then by water to destination. Even then that does not measure the possibilities of the output available for freight tonnage.

So this is not such a project as would appear from a surface examination of some of the expressions found in this last report. It has been repeatedly examined; the closest scrutiny has been given to it, with no desire to exhibit any favoritism in its behalf. A slight increase in the amount required was brought about by damage that has been suffered by the Government dike to the banks at Little Rock since the estimates for this river were made to Congress.

I do not believe, if the Senator from Iowa were familiar with the situation, that he would address any criticism to the Committee on Rivers and Harbors of the House, which inserted this item, and I know he would not address any criticism to the Committee on Commerce of the Senate for the slight enlargement they have made to cover the subsequent damage done to the situation at Little Rock. It is not an abandoned river. In its best days boats, as is shown by official reports in different places, plied between Little Rock and Cincinnati, Little Rock and Memphis, and Little Rock and New Orleans. Single boats went out of that port carrying 3,500 bales of cotton, which is nearly a thousand tons. Boats of a thousand tons capacity came and went from its wharves, and, if we had the opportunity now, we could maintain a successful boat line from Little Rock to Memphis and from Little Rock down the Mississippi River as far as Greenville, in Mississippi. There is a small boat now running and making semiweekly trips from Pine Bluff to Rosedale, Miss., I believe it is.

This is a matter that will not suffer on the fullest examination to which it can be subjected. I believe I will submit the matter, because I think its merit is evident.

The PRESIDING OFFICER. The question is on the adoption of the amendment reported by the committee.

Mr. SMOOT. Mr. President, during the discussion of the river and harbor bill at the last session of Congress a number of what may be termed notorious projects were condemned. Among those referred to at that time were the 10 mentioned in the substitute for the bill of the House which passed the Senate on March 3, 1915. That provision, Mr. President, was found in section 15 of the substitute bill, and reads as follows:

That the following projects now under improvement shall be reexamined in accordance with the law for the original examination of rivers and harbors, with a view to obtaining reports whether the adopted projects shall be modified or the improvement abandoned.

Mr. CLARKE of Arkansas. Mr. President, if the Senator will allow me right there, I will say that I was in the committee when Senator Burton made that suggestion, and I told him that I was entirely agreeable to have the Arkansas River included in it.

Mr. SMOOT. I was going to call the attention of the Senate not only to the Arkansas River item but to the other nine items which were mentioned in that section. The river affected by that provision, Mr. President, were the inland waterway from Norfolk to Beaufort Inlet, N. C.; the Coosa River in Georgia and Alabama; the St. Lucia Inlet, Fla.; the Brazos River, Tex., from Old Washington to Waco; the Red River, La., Ark., Tex., and Okla.; the Ouachita River, Ark. and Okla.; the Arkansas River in Arkansas; the Tennessee River, Tenn., Ala., and Ky.; the Fox River in Wisconsin; and the Missouri River, Mo.

The provision contained this language:

And the Chief of Engineers is directed to make a report upon any other projects, river or harbor, the further improvement of which under present conditions is undesirable or in which modifications of the plans or projects should be made.

I am informed, Mr. President, that all of those reports have not yet been made, and I shall not spend very much time upon the discussion of the Arkansas item, because I think there are others in this bill that are even worse that that. The appropriations for this river, Mr. President, have been as follows:

July 3, 1832, to Sept. 15, 1900, appropriations and allotments	$2,250,783.46
June 13, 1902, continuing improvement and for maintenance, including the general improvement, and removing obstructions and operating snag boats	110,000.00
Mar. 3, 1905:	
For maintenance of improvement	35,000.00
For revetment work in the vicinity of Red Fork, provided it is required in the interest of navigation	30,000.00
Mar. 2, 1907:	
For maintenance of improvement	$35,000.00
Arkansas River at Pine Bluff and White River at Augusta Narrows (part applied to Pine Bluff)	74,200.00
Mar. 3, 1909:	
Preservation and maintenance (general)	35,000.00
For works at Pine Bluff	97,200.00
June 25, 1910:	
For maintenance of improvement, including works at Pine Bluff	51,000.00
For the construction and operation of dredge boats and accessories	375,000.00

Those were the dredge boats referred to by the Senator from Arkansas.

Mr. CLARKE of Arkansas. Those are the ones that have just come into the river.

Mr. SMOOT. I continue:

Feb. 27, 1911, for maintenance of improvement, including works at Pine Bluff and the operation of dredging plant	$62,500.00
July 25, 1912:	
For protecting bank in front of Crawford County Levee	30,000.00
For maintenance of improvement, including works at Pine Bluff and the operation of dredging plant	30,000.00
Mar. 4, 1913, for protecting bank in front of Crawford County Levee (completion)	30,000.00

That was to complete the improvement; and I suppose that is the last appropriation that has been made for that project.

Mr. CLARKE of Arkansas. That is 200 miles west; that is away up near the Oklahoma line.

Mr. SMOOT. That project is completed.

For maintenance of improvement, including works at Pine Bluff and operation of dredging plant	$48,000
Oct. 2, 1914, maintenance and improvement of existing river and harbor works	46,000
Mar. 4, 1915, for maintenance of improvement, including works at Pine Bluff and operation of dredging plant	193,350

Or total appropriations, Mr. President, for that river of $3,533,033.40.

Mr. President, the Senator from Iowa [Mr. KENYON] has already referred to the amount of freight traffic in tonnage upon that river. It amounted to 79,169 tons for last year reported.

The valuation of all the products transported, including everything making up the 79,169 tons, was only $812,657. Now, we are asked, Mr. President, to appropriate $234,700 for a river the traffic on which, in dollars and cents, or the total value of the products transported, is but $812,657. Mr. President, it does seem to me that that is out of all proportion and all reason; and I might say that there are other rivers that are even worse than this. There was one expert who made the remark, in an article written by him some time ago, that we might better buy and burn the freight upon certain rivers in this country than to keep appropriating money as we are doing.

I want to call attention to the estimate of the cost to the Government for furnishing waterways to float actual commerce on a few projects in this bill. In this estimate I do not consider logs as commerce.

On the Ohio River a little over $5 a ton, excluding soft coal; on the upper Mississippi, $12 a ton; on the lower Mississippi, $35 a ton; on the Arkansas, nearly $20 a ton; on the Hennepin, $36.75 a ton; on the Missouri, a little over $40 a ton; Muscle Shoals, $41 a ton; the Arkansas Pass Canal, $80 a ton; the Brazos, $80 a ton; the Red River, $100 a ton; the proposed Muscle Shoals project, $100 a ton; and the Big Sandy, Ky., $350 a ton.

Mr. President, if we were providing transportation of commerce upon these rivers and we had to pay the money out of our own pockets none of us would for a minute consider a proposition of that kind.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Nebraska?

Mr. SMOOT. I do.

Mr. NORRIS. I came in just as the Senator was reading those figures. Does it cost the Government that much per ton for the commerce that is floated on the rivers the Senator mentions?

Mr. SMOOT. Yes; that is what it costs the Government.

Mr. NORRIS. I wish the Senator would go into detail. That is an exceedingly interesting statement. How does he arrive at those figures? What does he take into consideration?

Mr. SMOOT. This is how it is arrived at: The amount the project has cost the Government, and a rate of interest of 4 per cent per annum upon it; then take the amount of actual commerce that is carried on the river, divide it into the cost of project with interest, and it shows the figures I have quoted.

Mr. NORRIS. What rate of interest does the Senator calculate?

Mr. SMOOT. Four per cent interest.

Mr. NORRIS. The Senator in each case takes, in the first place, the entire amount the Government has expended?

Mr. SMOOT. The entire amount the Government has expended upon the river.

Mr. NORRIS. And the interest upon that at 4 per cent?

Mr. SMOOT. The interest upon that at 4 per cent.

Mr. NORRIS. And then the Senator counts that interest——

Mr. SMOOT. And then the added amount each year that is appropriated for the purpose of maintaining those rivers for the purpose of transportation, and that gives the amount it costs for each ton.

Mr. NORRIS. Then the item consists, first, of maintenance, and, second, of interest on investment? Is that right?

Mr. SMOOT. That is right, Mr. President; and it is also based upon the amount that the project has cost the Government, of course.

Mr. NORRIS. That is the point I want to bring out.

Mr. SMOOT. For instance, if there is an appropriation, as there is in the present bill, for revetment purposes or for dredging purposes, outside of maintenance, that is included in the rivers mentioned as part of the cost per ton.

Mr. NORRIS. I should think that would be properly classified as part of the maintenance.

Mr. SMOOT. Yes.

Mr. NORRIS. What I want to reach distinctly is that as far as the investment is concerned the Senator counts nothing but the interest on that?

Mr. SMOOT. That is all.

Mr. RANSDELL and Mr. KENYON addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Louisiana?

Mr. SMOOT. Yes; I yield to the Senator for a question.

Mr. RANSDELL. Did I understand the Senator to say that the cost of transporting freight on the Red River was $100 a ton?

Mr. SMOOT. Yes; $100 a ton for actual commerce.

Mr. RANSDELL. Will the Senator kindly tell me who furnished those figures—whether they were prepared by himself or not?

Mr. SMOOT. The figures that were given by me were furnished by Congressman FREAR, of Wisconsin.

Mr. RANSDELL. I notice that the tonnage on the Red River was 47,351 tons in 1915, valued at $2,939,000. Does the Senator mean to say that the appropriation we made for the Red River in 1915 amounted to $100 a ton on 47,351 tons?

Mr. SMOOT. No; I did not say that it did, Mr. President. I said that, taking into consideration the amount of money that was expended on the Red River and the appropriations made for the maintenance of the river, they amounted to $100 a ton for the actual commerce transported. In relation to the Red River——

Mr. RANSDELL. Will the Senator allow me to finish my question?

The PRESIDING OFFICER. Does the Senator from Utah further yield to the Senator from Louisiana?

Mr. SMOOT. I want to answer further the question which the Senator propounded.

Mr. RANSDELL. Certainly.

Mr. SMOOT. In a statement made in the minority views submitted by Mr. Burton from the Committee on Commerce on the river and harbor appropriation bill on June 25, 1914, referring to the Red River, he says:

> There should be a careful reexamination of each of these waterways and a policy adopted which squares with present conditions. The following are illustrations: On the Red River below Fulton, covering a distance of 475.4 miles, there was in the year 1912 a total tonnage of 44,967 tons. Of this amount 42,640 tons were saw logs, of which the average haul was 131 miles, and lumber 1,100 tons. Of the balance of the freight, including lumber, amounting to 2,327 tons, part was carried 45 and part 80 miles. The total amount appropriated to date for this stream is $2,768,377 There was no appropriation in the pending bill as it came from the House, but by a proposed Senate amendment $100,000 has been inserted. The expense per ton to the United States Government for carrying this freight, including the lumber, can be approximately obtained if an allowance of 4 per cent is made on the amount appropriated to date and the prospective appropriation in the pending bill is added. This interest on the investment would amount to $110,735.08, and adding the $100,000 appropriated would make a total of $210,735.08. The cost per ton would be $4.68, or if the saw logs are excluded the cost per ton would be $90.56 and the cost per ton-mile $1.53.

Mr. RANSDELL. The figure is $4.68 instead of $100, then?

Mr. SMOOT. No, Mr. President; the $4.68 is arrived at by including the saw logs that could have been and are floated down the river without being transported on boats. They are not actual commerce. Excluding the saw logs—and the saw logs are excluded from all the figures that I have quoted—the freight itself, the merchandise, and that which is carried in commerce that requires transportation by barges or boats, amounts to the figures I have given.

Mr. RANSDELL. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Louisiana?

Mr. SMOOT. Yes; I yield to the Senator.

Mr. RANSDELL. The Senator usually tries to be fair. I should like to ask him if he thinks it is fair to charge that river with the entire amount of money appropriated for it since the beginning of this Government, to capitalize that sum at 4 per cent—which is certainly a much higher rate of interest than the Government pays—and not to give the river credit for any of the vast commerce which it has been carrying since we began to make appropriations for it?

I can testify, as I was born and reared near that river, that until very recent years it had a very large commerce. Now, if we are going to charge up to the annual expense of the commerce that is going on it every dollar ever expended on the river, and are going to capitalize that sum and estimate 4 per cent interest on it, ought we not, I say, in all fairness, to credit the river with the commerce that it has been bearing for all these years since the appropriations began?

Mr. SMOOT. Mr. President, the interest is only upon the amount actually appropriated and from the year it was appropriated. It is not 4 per cent for 50 years. Not only that, but the rate of 4 per cent interest is not too high, considering the amount that the Government has paid during the period of the expenditure of the money. It is true that the Government can secure money now at 3 per cent, as our 3 per cent bonds will sell at par; but the Senator knows that it has been but a few years since the Government had a great many 4 per cent bonds in circulation, and some of its bonds bore even a higher rate of interest.

Mr. President, this river exemplifies many of the statements that have been made by Senators calling attention to these "wonderful highways of commerce." The Senator from Louisiana has just referred to the vast amount of commerce upon

this river. Why, the whole commerce for last year was 44,967 tons. Of this amount there was 42,640 tons of saw logs. The Red River is not very different from many of the rivers enumerated in this bill, and it seems to me that the comparison was a just one. As I said the other day, general merchandise is not going to be shipped upon the waterways of the country. That method of transportation is too slow. The railroads are going to carry it, and are carrying over 95 per cent of it to-day, and will carry that amount of it, no matter how much money we expend upon rivers like the Red and others.

Mr. CLARKE of Arkansas. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Arkansas?

Mr. SMOOT. I do.

Mr. CLARKE of Arkansas. I want to call the Senator's attention to the fact that the very use we desire to make of the river from Little Rock to Memphis is to haul merchandise. As far as the 79,000 tons hauled last year is concerned, that was a mere bagatelle. It hauled five times that much on every trip that the boat left Little Rock.

Mr. SMOOT. I grant that that is true, Mr. President, but the trouble is that they do not haul it to-day. The commerce upon the river is decreasing each year.

Mr. CLARKE of Arkansas. The Government will not improve the river so as to let us haul it.

Mr. SMOOT. The trouble is that the railroads will not let it be hauled. The railroads can handle it better, quicker, and safer, and the shipper is going to take advantage of these conditions. Transportation of commerce on this river is only repeating the history of river transportation of every other country.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Minnesota?

Mr. SMOOT. Certainly.

Mr. NELSON. There are two things that I want to call to the attention of the Senator with reference to these matters.

First, he goes on with old rivers like the Red River or the Arkansas and makes a list of all the appropriations that have been made for those rivers. Not many years ago those were the only avenues for trade and commerce, and appropriations were made for them and navigation carried on. By and by the railroads paralelled the rivers; and the railroads, in order to secure the traffic that had formerly moved by the rivers, reduced their rates. If we should close up all of these streams to-day, we would be at the mercy of the railroads as we were in many instances before. It is unfair to foot up the amount that we have devoted to a river in times past when that river was the only avenue for us, and say, "So much has been expended on this river." Why, the Arkansas River, from the time the country was first settled, was the main avenue and the main outlet for the commerce of that State as the Red River was for upper Louisiana and for a part of Texas.

It is unfair to go back and repeat all those figures. They relate to a day when that was the only avenue of transportation. Now they have built railroads along there, and the railroads have had to come down in their rates in order to steal the traffic from the river. That is all there is to it.

Mr. SMOOT. Of course it would not be possible now for the railroads to advance their rates unless the Interstate Commerce Commission should grant them permission to do so. Rates are regulated now. I grant what the Senator says—that in years past the reductions made in the rates came about, perhaps, as he has stated, but——

Mr. NELSON. If the Senator will allow me to interrupt him again, he refers to the Interstate Commerce Commission. When I first came to Washington in 1883 over the Baltimore & Ohio Railroad the rate was only $17, and they only ran two or three passenger cars. Now they run a large train full of passengers, and they charge, I think, a dollar and a half more, owing to the last increase granted by the Interstate Commerce Commission, this 5 per cent increase that they granted at the hearing last year. The rates are higher to-day, and we have an Interstate Commerce Commission, as it has appeared in its operation within the last 12 months, that is willing to give the railroads pretty nearly all they ask. We have higher rates to-day for the transportation of passengers from here to Chicago than we ever had before the Interstate Commerce Commission was created, and when the traffic was not a tenth part of what it is to-day.

Mr. SMOOT. Mr. President, I think that is true so far as the passenger fares are concerned between Chicago and Washington; but the freight rates in this country have all been reduced, particularly the through rates, I will say, from Chicago to almost any part of this country. The passenger business of the railroads has never at any time been very profitable. They have made their money mostly out of freight, as the Senator, no doubt, well knows.

Mr. RANSDELL. Mr. President——

Mr. NELSON. Oh, Mr. President, there are some roads, like the New Haven, the bulk of whose income comes from the passenger business, and to a large extent the same thing is true of the Pennsylvania Railroad.

Mr. SMOOT. I am speaking of the railroads in general, as the reports show. The railroads of the country as a whole make the most of their money from freight and not from passenger traffic.

Mr. RANSDELL. Mr. President, I should like to ask the Senator another question.

The PRESIDING OFFICER. Does the Senator from Utah further yield to the Senator from Louisiana?

Mr. SMOOT. Will the Senator wait until I have answered the question asked by the Senator from Minnesota?

Mr. RANSDELL. Certainly.

Mr. NELSON. Will the Senator allow me to say one word more?

Mr. SMOOT. Certainly.

Mr. NELSON. I can travel from one point to another in the State of Minnesota to-day at a lower rate than you can travel from here to New York, with all this immense traffic, and only two lines to carry it. I can travel in Minnesota from one end of the State to the other at 2 cents a mile, and you have to pay more than that for a ticket from here to New York.

Mr. SMOOT. That is true, Mr. President.

Mr. NELSON. That is the effect of the Interstate Commerce Commission. I hope Senators will not cite the Interstate Commerce Commission as proof that we are going to have lower rates. They have not given them to us. The principal good we have gotten is from the act preventing discriminations between places and individuals; but as for the lowering of rates, the Interstate Commerce Commission has conferred no blessing on us.

Mr. SMOOT. Of course, Mr. President, railroad rates can not be increased without the consent of the Interstate Commerce Commission. That commission, I believe, has had the approval of the American people, and the American people have had confidence in the commission protecting the interest of the people as against extortionate prices charged by the railroads.

I do not want to be unfair in any computation that I may make in relation to cost of transportation on rivers; but take the rivers that I have complained of, and take the amount of traffic carried upon those rivers to-day, outside of saw logs, and the rate that it costs the Government for the actual commerce, such as merchandise of all kinds, fertilizer, cement, oysters, and so forth, is out of all proportion and all reason.

I want to be perfectly frank in this matter in discussing it. I have no hostility to many of the items in the bill. I believe in proper appropriations for rivers and harbors in all parts of the country, but I think appropriation ought to be for rivers where there is at least a chance of increasing the amount of commerce upon them rather than to appropriate money and keep appropriating it from year to year on rivers where the commerce is decreasing every year.

Mr. RANSDELL. Mr. President——

Mr. SMOOT. There is no river that I shall refer to, but the commerce on the rivers is decreasing from year to year, and we are in many cases increasing appropriations for those rivers.

The PRESIDING OFFICER. Will the Senator from Utah yield to the Senator from Louisiana?

Mr. SMOOT. I yield to the Senator.

Mr. RANSDELL. I hope the Senator will not evade an answer to my question. He has made a statement that the cost of the commerce on the Red River was $100 per ton and he has arrived at that figure, or is trying to arrive at it, by capitalizing every expenditure on the river since we began to make appropriations, computing interest at 4 per cent per annum on it. As a matter of fact, he must know, if he knows anything at all about the improvement of rivers and the commerce on rivers, that for many years there was very large commerce on the Red River, and that there were annual sums for maintaining that river. Certainly the maintenance item was a fair offset, I take it, to the commerce of that year. One offset the other for the time being, and it is unfair to bring it forward now to make a capital.

There is another very large item on that river. There was a big raft above the city of Shreveport which at an enormous cost was taken out many years ago. Have we a right to bring all those things forward and make them as a capital and compute interest on it?

I want the Senator to answer me this question: If you were to capitalize the railroads in all that has been spent on them,

the enormous sums subscribed to the original stock and never returned, the enormous bonuses of land given to railroads, the enormous grants in the way of exemption from taxes, going into billions, several times as much as the whole system has cost—if you were to capitalize all that could you earn interest on it?

Mr. SMOOT. That is exactly what every business concern has to do. They have to capitalize every cent that they put into the business, whether it is put in one year or another.

What the Senator says is true—that some of the railroads of this country have had land grants. Of course, those grants proved very profitable to the railroads; but there are other railroads—and most of those that are in competition with the rivers are finding fault with this bill—that never have received a land grant, and they have had to account for every dollar that was put into the road in the way of capital stock from the very first day they began building it to the present time.

Mr. RANSDELL. All those in Louisiana adjacent to the Red River had land grants of the biggest kind and exemption from taxation.

Mr. SMOOT. There is no need of discussing this question from any other point of view than as a business proposition, in my opinion. Whenever the Government puts a dollar into a river, no matter what it is for, whether it is for revetment or for maintenance, it does just exactly the same as if a corporation put their money into building a road and into repairing and maintaining and operating that road.

Mr. HUGHES. Mr. President——

The PRESIDING OFFICER. Will the Senator from Utah yield to the Senator from New Jersey?

Mr. SMOOT. I yield.

Mr. HUGHES. I can not understand how the Senator can draw a parallel between what a railroad does and what the Government does. Of course, the Senator knows and we all know that a railroad each year receives income from the freight carried, but the Government does not and is not supposed to receive income for the freight carried on a river. If so, each year it might have discharged some of the capitalization the Senator now speaks of. I can not see how any parallel can be drawn between the Government appropriating money for rivers and a railroad appropriating money for betterment.

Mr. SMOOT. There is no comparison based upon the position the Senator is taking. We were talking about what the appropriations made by the Government for these rivers actually were, and that the interest upon the actual cost at the rate of 4 per cent will amount to a rate of freight per ton so high that it is absolutely unjustifiable on the part of the Government to continue the appropriations as they have been doing in the past.

Mr. NELSON. Will the Senator allow me to make another suggestion? When comparing railroads with the expenses of water transportation, I want to call the Senator's attention to the fact that we embarked a few years ago upon a system of so-called railroad valuation. A large force has been appointed and is to-day at work on it and probably will be for half a dozen years before the system is completed. By that time it will have cost us millions of dollars, and the whole thing will be obsolete, as far as its value to regulate transportation or to adjust litigation is concerned. Does the Senator know how many million dollars we are spending on the valuation of railroad property?

Mr. SMOOT. I think the Senator will remember that I stated at the time of the passage of the act that that would be the result. I also stated that it would cost at least $10,000,000 to make the valuation, and that by the time the valuation was made the information would be almost useless as far as being a basis for rate making was concerned. I agree with the Senator absolutely as to the result of that appropriation. I think it was a perfect waste of public funds, nearly as bad, if not as bad, as a great many of the appropriations made in this river and harbor bill.

Mr. NELSON. But does not the Senator think the $10,000,00 that will be squandered on the valuation should be charged up against the railroads, not against the rivers and harbors of the country?

Mr. SMOOT. Mr. President, the railroads did not ask for that appropriation. The expenditure of that money has not even the advantage of improving the roads. It does not straighten the curves, it does not take out the weak rails or the rotten ties of the road. The Government gets nothing except simply a report, and a report which will be of little benefit to the people of the United States. I think it is a waste of money, even more so than the appropriations made for certain rivers and harbors I will mention before this bill passes.

Mr. President, I am not opposed to appropriations for rivers and harbors. I think some of the projects in this bill ought to receive more money than is appropriated; they ought to be dredged and put into a shape to enable commerce to be transported at the least possible cost. No one doubts but what traffic will increase on such rivers. Everybody agrees that they should be improved. Most of them are at present used by the Government. I have no objection to rivers of this kind being improved. I believe Senators ought to take an interest in the consideration of the bill, and this Chamber ought to be filled with Senators, rather than have three or four Senators present during the whole day, and when a vote is called have absent Senators come in and ask, "What is my vote?" or, "What am I to vote upon?" or, "What is the project that is being voted upon?"

When the time comes, Mr. President, that the Senate will take an interest in the appropriation of money for rivers and harbors and consider each item upon its own merits, and consider whether it is for the best interests of the United States to appropriate the money for each particular project, I know there are many, many appropriations in this bill that never would receive the sanction of the Senate of the United States if so considered. I am just as sure of it as that I live.

I do not, as a general thing, believe in lump appropriations. I never have done so. I think more appropriations have been squandered through lump-sum appropriations than in any other way. But it seems to me that rather than to make up a bill in the way this bill has been made up and the way former river and harbor bills have been made up, it would be much better to make a lump appropriation and leave the expenditure of the money to the Army engineers.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Nebraska?

Mr. SMOOT. I yield.

Mr. NORRIS. I am interested in what the Senator says about lump-sum appropriations. There is not any doubt, of course, but that as a general proposition it is an extravagant way of legislating. But does not the Senator believe that lump appropriations, if they are justified at all, are justified in cases like the river and harbor improvements of our country, where, necessarily, Congress, with the other duties that it has to perform, finds it an impossibility to get all the information? Much of it is of rather a scientific nature, and Congress finds itself unable to legislate intelligently as to each of the large number of projects that are worthy.

Mr. SMOOT. I agree with the Senator. This is about the only exception, it seems to me, that should be made where the expenditure can possibly be specifically named and the amounts appropriated for. In my opinion, it would be much better to make a direct appropriation of $30,000,000, or even $40,000,000, rather than to pass this bill in the shape it is in.

I want to say another thing to the Senator. I remember that years ago, when former Senator Hemenway was speaking upon a river and harbor bill, he went into the details of many of the items of the river and harbor bill then pending. I remember well that he called attention to appropriations that were made for certain rivers in the past that had never been expended upon the river; they had been transferred to other places. If I remember aright, he called it the short-circuiting of appropriations.

If I had the time, Mr. President, I should like to go into the last appropriation act, where each river was appropriated for, and I should like to follow the expenditure of the appropriations for those rivers to see if the amount of money appropriated was expended upon those particular rivers or whether it had been transferred en bloc to some other rivers that the engineers desired to have it transferred to.

Mr. RANSDELL. That can not be done except by the authority of Congress.

Mr. SMOOT. Mr. President, I know that is often said, and just offhand I would say, as the Senator said, that it can not be done unless by act of Congress. But I want to call the Senator's attention to the fact that Congress has made appropriations for specific purposes and the heads of departments have spent the money for an entirely different purpose, not an appropriation of $20 or $100 or $1,000, but appropriations of tens of thousands of dollars have been spent for purposes for which the Congress of the United States never appropriated the money. I called attention to the case of the $2,000,000 appropriation the other day for the eradication of the foot-and-mouth disease. Tens of thousands of dollars of that appropriation was spent for other purposes than it was intended for.

Not only that, but there is another practice that is growing greater every year, and that is we pass appropriation bills carrying so much money for a specific purpose, and not a year passes but what the expenditures exceeded the appropriations. There

is no law which allows that to be done, and yet Congress is asked to pass a deficiency appropriation bill to cover those expenditures.

Mr. STERLING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from South Dakota?

Mr. SMOOT. I yield.

Mr. STERLING. I should like to ask the Senator from Utah what he thinks of the proposition of appropriating for a long stretch of a certain river, as in the Missouri River, for example, say $175,000 or $200,000 for improvement of the Missouri River from Sioux City to Fort Benton, a distance of 1,477 miles, I think. Would it not be better for Congress to designate a specific project for which an appropriation should be made, rather than leave it to the Board of Army Engineers to determine what particular project should be improved?

Mr. SMOOT. We certainly ought to state specifically where the money shall be spent if we are going into the appropriation of money, the same as we have done in the past in river and harbor bills, with the exception of the fiscal year 1915–16.

Mr. RANSDELL. Will the Senator permit me just one moment? I simply wish to call his attention to pages 36, 37, 38, and 39 of the report of the engineers, made December 1, to show that we authorized a transfer of appropriations made for certain specific purposes which were lying to the credit of the various projects.

Mr. SMOOT. I will say——

Mr. RANSDELL. Wait a moment, please, if you will let me make a statement.

Mr. SMOOT. The Senator is not asking a question.

Mr. RANSDELL. I am going to make a statement, if you please, and to ask the Senator a question in regard to it.

Mr. SMOOT. I will be a little more accommodating to the Senator than he was to me the other day. I have no objection to his continuing his statement.

Mr. RANSDELL. If the Senator objects to according me the right——

Mr. SMOOT. Not at all, Mr. President.

Mr. RANSDELL. I want to show the Senator how these transfers were made without authority. The last river and harbor act authorized the transfer of sums amounting to $5,000,000. We gave $25,000,000 in cash and authorized the Engineer Corps to transfer unused balances and they did make a transfer to the extent of $5,000,000. Those transfers appear in volume 1, on pages 36, 37, 38, and 39 of the Engineer's report for 1915. I simply call the Senator's attention to it. I thought he had overlooked it.

Mr. SMOOT. I had no reference to that. That was done by act of Congress in a specific river and harbor bill. I was speaking of the past practices of the departments in the expenditure of appropriations. I can not state what specific items have been appropriated for a specific purpose that have been transferred to other rivers, but I know it has been stated on this floor time and again that that was done, and I never heard a contradiction made of it.

Mr. President, I simply rose to speak upon the Arkansas River appropriation. I have been carried away from the Arkansas River to the increase of passenger rates upon the railroads, the valuation of railroads, and a number of other very interesting subjects; but I do not want to delay the vote upon this item.

I quite agree, Mr. President, with the Senator from Iowa [Mr. KENYON] that this item should not be agreed to. It proposes to expend the public money with very, very little return for it. The commerce upon the river will not justify the expenditure of this amount of money. I think with the amount of commerce upon the river the appropriations in the past have been very large indeed, for they have been $30,000 and $35,000 and $50,000 per year. I notice that the amount included in the cost of the river is the two dredges. I suppose they cost $375,000, as that is the amount that was appropriated for. I notice in the report of the engineers that this is what is said in reference to them:

> The dredges *H. S. Taber* and *Robert McGregor* were under construction by contract at Dubuque, Iowa, at the beginning of the year. The *H. S. Taber* arrived at the mouth of the Arkansas River on August 12, 1914, and active work was begun August 14, 1914. The *Robert McGregor* was delivered at Pendleton, 42 miles above the mouth, on the Arkansas River, September 18, 1914. As it had not yet been equipped or outfitted, the 30-day trial of this dredge was made with the crew of the *H. S. Taber*, the latter boat remaining with the *Robert McGregor*. At the expiration of the 30-day trial of the *Robert McGregor*, the river was so low that the boat could not be run to Pine Bluff for outfitting and it remained with the *H. S. Taber* until December 29, 1914, when it proceeded to Pine Bluff and was outfitted.

I think the Senator from Arkansas stated the situation exactly when he said that after the Government had spent $375,000 for these dredges and after they had been delivered in August, 1914, it was only possible under river conditions for a 30-day trial of the dredges and scarcely any work was done. It seems to me, Mr. President, that that of itself shows that it would have been very much cheaper for the Government to have hired a dredge to do the work rather than to have put $375,000 into them and have them remain idle at a great expense to the Government.

Mr. CLARKE of Arkansas. That is the very work they were sent there to do. That was the difficulty they were sent there to remove.

Mr. SMOOT. I will ask the Senator if the conditions are such that they can remove that difficulty why they have not done so before this time? It is nearly two years since they were sent there.

Mr. CLARKE of Arkansas. When they first went into the river about the 1st of January, 1914, they found the river very low. During the next year the river was unusually high, and they could not work in consequence of that. So far as the work they were sent there to do is concerned they have devoted less than 30 days to it. Nobody can condemn the project until it has had a fair trial.

Mr. SMOOT. In other words, the Government spent $375,000 for building the dredges and——

Mr. CLARKE of Arkansas. Two brand new first-class dredges adapted to that very situation.

Mr. SMOOT. And from August 12, 1914——

Mr. CLARKE of Arkansas. The report says they were equipped in December, 1914, 1915, and a part of 1916, less than a year and a half.

Mr. SMOOT. And it has been impossible for them to do anything that amounts to anything.

Mr. CLARKE of Arkansas. A part of that time it was absolutely impossible for them to do anything. They are just coming to the time now when they may be able to do something, when the water recedes, as it will this spring. The water is receding now.

Mr. SMOOT. Does the Senator expect that the water will get so low this year that they can not do anything?

Mr. CLARKE of Arkansas. The object is to get ahead and dredge the channel a little at a time, and connect these pools. There is plenty of water in the river, but the water shoals, and the channel is in a deplorable condition.

Mr. SMOOT. It is a larger appropriation than has usually been granted to that river.

Mr. CLARKE of Arkansas. The Senator is quite mistaken. The appropriation recommended there last was $239,350, and there is recommended now by the Board of Engineers $239,350.

Mr. SMOOT. I said appropriated.

Mr. CLARKE of Arkansas. The engineers themselves, out of the lump-sum appropriation, gave approximately the amount we are asking now.

Mr. SMOOT. The engineers give as the appropriation, March 14, 1915, $193,350. However, every year before that the appropriations ran as follows: $46,000, $48,000, $30,000, $30,000, $62,500, $51,000, $74,200, $35,000, $30,000, $35,000.

Mr. CLARKE of Arkansas. The engineers reached the conclusion that that sort of an appropriation was just throwing money away, and the only way to do anything on earth was to put dredges there. Since the dredges were put in the river appropriation has necessarily increased, because the dredges can not run themselves.

Mr, SMOOT. Does the Senator think that after the dredging work is done the commerce will be increased?

Mr. CLARKE of Arkansas. There is not any doubt about it. A navigable river in that section of the country so improved will have that result. There are reasons for it.

Mr. SMOOT. I mean for actual commerce.

Mr. CLARKE of Arkansas. Actual, everyday commerce. There is not any doubt about it. We are in the western freight zone and we pay from 30 to 33 per cent more freight than is paid on freight delivered at Memphis, 132 miles away. With its connections, when the improvement is made, ample commerce will be maintained. As I said before, it is a case where the river has left the commerce and not commerce the river.

Mr. SMOOT. The Senator will be perfectly satisfied, if, after dredging the river and putting it in good shape, and commerce does not increase, to have the river abandoned?

Mr. CLARKE of Arkansas. Yes, indeed; better than that. I have an item in this bill directing them to make a survey and make their report to the next Congress. If it does not show that the river can maintain a commerce, I will be perfectly willing for the item to go out of the bill.

Mr. SMOOT. I think that is a very proper thing to do. Of course I do not believe that we ought to proceed with any of

the general projects that we have authorized or make provision for a reexamination, and particularly do I believe that it is unwise to make appropriations additional to those we have made in the past. I will not take the time of the Senate in saying anything more in relation to this matter. I sincerely hope the Senate will not agree to this amendment.

Mr. CLARKE of Arkansas. May I call the attention of the Senator to the fact that the appropriation last year of $239,350 appears on page 38?

Mr. SMOOT. I notice the report says——

Mr. CLARKE of Arkansas. This is the last report of the Chief of Engineers, part 1.

Mr. SMOOT. I have part 2 of the report of the Chief of Engineers of the United States Army, page 2718, and it says:

Mar. 4, 1915, for maintenance of improvement, including works at Pine Bluff and operation of dredging plant------ $193,350

Mr. CLARKE of Arkansas. That was the first sum appropriated. The second one is in the other volume.

Mr. JONES. Mr. President, the Senator from Iowa [Mr. KENYON] said that an issue would be raised in reference to this amendment as to whether the Senate was going to follow the report or whether the Senate was going to follow the rule which has been referred to, the adoption of projects that have not been recommended by the engineers; that is, it has been urged here in behalf of projects that have been recommended by the engineers that the Senate should adopt them, and hence the Senator said the issue is as to whether an item that is reported against adversely by the engineers should be adopted by the Senate. I am going to refer to that for just a moment.

I was a member of the Rivers and Harbors Committee of the House for six years, and I know that that committee adhered rigidly to the rule that it would not put any item into the river and harbor bill that did not have the approval of the Board of Engineers.

I am not going to consider whether that is a good rule or the reasons for the rule; but I have not, in the time that I have been here, knowingly voted for the adoption of any project that has not had the approval of the Board of Engineers. I believe that it is a good rule to follow, for reasons, as I have said, which I am not going into now. If this proposition came clearly within that rule I would vote against it and I would vote in favor of striking out the item in the bill. That was my impression when the Senator from Iowa [Mr. KENYON] read from the report what he did; but since I have looked into the matter a little bit more fully, I think that I can very consistently vote for this item, even with my belief in the advisability of following the rule to which I have referred.

What is recommended by the engineers, according to the report from which the Senator from Iowa quoted, is a modification or an abandonment of a project that has already been adopted. The item in this bill is simply to carry out a project that has not only been recommended by the Board of Engineers but that Congress itself has actually approved, adopted, and begun. This item is to carry on a project which was adopted by Congress just a few years ago, for which the dredges that we approved have been constructed and put in operation only a little over a year and a half.

So, as I take it, the question here is whether or not we shall accept and follow absolutely the adverse recommendation of the Board of Engineers just submitted, or whether we shall continue the project that the Board of Engineers heretofore recommended, that Congress adopted, and that we have been carrying out practically for a year and a half, but not long enough, as the district officer says, to demonstrate whether or not it can be successfully carried on.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER (Mr. VARDAMAN in the chair). Does the Senator from Washington yield to the Senator from Utah?

Mr. JONES. Yes.

Mr. SMOOT. I desire to ask the Senator if he does not think it would be very much better to wait for a resurvey of the river before the expenditure of this amount of money, as the resurvey of the river was ordered a year ago?

Mr. JONES. I did not know that a resurvey had been ordered a year ago.

Mr. SMOOT. Oh, yes.

Mr. JONES. The document from which the Senator from Iowa read, as I understand, is a report of the last survey. As I understand, the Senator from Arkansas has put another provision in the bill for a further survey.

Mr. SMOOT. I call the Senator's attention—he was not here when I read it—to the provision of the river and harbor bill of March 3, 1915.

Mr. JONES. The Senator from Arkansas says that what I have just suggested to the Senator is correct, that the report from which the Senator from Iowa [Mr. KENYON] read is a response to that provision.

Mr. CLARKE of Arkansas. Yes.

Mr. KENYON. I will say——

Mr. SMOOT. That is the report on the resurvey?

Mr. JONES. Yes.

Mr. SMOOT. And that report is adverse?

Mr. JONES. Yes.

Mr. KENYON. This is the report made in accordance with the act of Congress to which the Senator refers—a very recent report.

Mr. SMOOT. And that report is adverse to the proposition.

Mr. KENYON. That is just what I was contending.

Mr. JONES. That is correct. In other words, it must be admitted that we have an adverse report from the Board of Engineers, and they recommend the abandonment of the project, except as to snagging; but the project which they recommend shall be abandoned is the project that has been approved by the Board of Engineers; it also had the approval of Congress itself, and we have entered upon it. It seems to me that I am not put up against this rule that I have been following, and which I think is a good rule to follow.

Mr. KENYON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Iowa?

Mr. JONES. I do.

Mr. KENYON. Under that theory, then, of the Senator, it makes no difference what the Army engineers may find as to any of these projects, we can not abandon them?

Mr. JONES. No; that does not follow at all.

Mr. KENYON. That is the logic of the Senator's position.

Mr. JONES. Not at all. I am not saying, because of the mere fact that we have already adopted a project, and then the Army engineers should recommend its abandonment, that necessarily we shall still adhere to the one that we adopted; but, under the circumstances of this case, I think that is the proper thing to do; and I will briefly state why I think so.

It was brought out a moment ago that the dredges that Congress provided for under the project that was approved did not get down there on that river until August, 1914. They have been there only a little over a year and a half; and because of exceptional conditions, as I understand the chairman of the committee, they have not been able to do very much; it has not been practicable to use them probably more than a month or so. Now, the district officer, who is on the ground and knows all of the conditions and circumstances, says this:

Operation of suction dredges has not yet passed the experimental stage so far as this river is concerned. By "experimental stage" I mean the extent of work required to maintain a navigation channel over any fixed distance of river and the duration of time through which a dredged channel will remain effective.

If that is correct—and I think the local officer is better able to determine that than is anybody else—it seems to me that we ought at least to complete the experiment; and that is practically what the chairman of the committee, who knows this situation better than anybody else, proposes to the Senate. He said just a moment ago that if, under the provision for a resurvey that he has in this bill, the report should come in that this work should not be carried on, then he would say that it should be abandoned; in other words, he is willing to let the operation of these dredges pass the experimental stage; and, if the result of the experiment is adverse, he will accept that as the proper decision of the matter.

Mr. CLARKE of Arkansas. I want to say, in that connection, that the report recently filed is not based upon any examination at all. It is based upon the recommendation of an officer, whose headquarters are in St. Louis, and who never put his foot in that valley so far as we have been able to hear anything about it. He caused no survey to be made, but merely exercised his judgment generally on what is happening to western rivers.

Mr. JONES. I will read from the report of the district officer, contained in the same document from which the Senator from Iowa read. Of course this is the local man, the man on the ground. He is A. B. Putnam, major, Corps of Engineers. He concludes his report with this statement:

10. I am not of the opinion that the improvement of the Arkansas River should be abandoned, but am inclined to the belief that the work of revetting the banks should be revived.

That is carried out in one of the amendments proposed here:

The commercial importance of the valley is increasing all the time, as is natural under an increase of population. While this increase is not reflected in the river commerce, I can not hold that the absence

of such reflection is an indication of the unworthiness of the improvement of the river.

Then, in his report, he suggests that he has approved the estimate for operating the two dredges, which is $118,700 a year. As I understand, the amount provided for in this bill is the amount that is necessary for the operation of these two dredges, with possibly some additional revetting along the banks.

Mr. CLARKE of Arkansas. And to repair a break in the bank and a wing dike at Little Rock.

Mr. JONES. That is in accordance with the project that the Board of Engineers has approved; it is in accordance with a project that Congress itself approved just a short while ago. We have been working on it only about a year and a half. We have not, according to the local engineer, passed the experimental stage. So, under those circumstances, Mr. President, I think we are more justified in following the project that we have already adopted, at least for another year, than we would be to accept the judgment of the Board of Engineers in their last report; which, as the Senator from Arkansas says, is based upon a general policy, rather than upon anything that may apply particularly to this particular project.

I have not any doubt that the statement of the Senator that the engineer who made the report on which the Board of Engineers based its report, did not go down there and examine the river at all. The report in itself shows that. He simply based his report upon his idea as to what the policy should be with reference to western rivers.

So, Mr. President, in voting for the retention of this item in this bill, I do not believe that I shall be violating the rule that I have heretofore, at least, very consistently followed and in which I believe. I think this item should remain in the bill under the circumstances. This does not indicate how I am going to vote upon the final passage of the bill. I shall probably say something about my view with reference to the framing of this measure and the different items in it a little bit later on; but, so far as this particular item is concerned and so far as this particular amendment goes, I think the item should be kept in the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. KENYON. On that question I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. HARDWICK (when his name was called). I inquire if the Senator from Kansas [Mr. CURTIS] has voted?

The PRESIDING OFFICER. The Chair is informed the Senator from Kansas has not voted.

Mr. HARDWICK. Having a pair with that Senator, I withhold my vote.

Mr. SIMMONS (when the name of Mr. OVERMAN was called). I desire to state that my colleague [Mr. OVERMAN] is unavoidably absent. He is paired with the Senator from Wyoming [Mr. WARREN].

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER], which I transfer to the junior Senator from South Dakota [Mr. JOHNSON] and vote "nay."

Mr. CLARKE of Arkansas. I shall have to have some information as to that kind of a transfer.

Mr. THOMAS. I do not know that any explanation is necessary. If so, I will make it. What is the Senator's point?

Mr. CLARKE of Arkansas. Does the Senator know the attitude of the Senator from South Dakota?

Mr. THOMAS. With respect to this bill?

Mr. CLARKE of Arkansas. Yes.

Mr. THOMAS. He told me this morning——

Mr. CLARKE of Arkansas. That is all right; that is satisfactory.

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Indiana [Mr. KERN] and vote "nay."

Mr. SMITH of Michigan (when Mr. TOWNSEND's name was called). I desire to announce the unavoidable absence of my colleague [Mr. TOWNSEND] on account of sickness in his family. He is paired with the Senator from Florida [Mr. BRYAN]. I desire this announcement to stand for the day.

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the Senator from New Jersey [Mr. MARTINE] and vote "nay."

The roll call was concluded.

Mr. JONES (after having voted in the affirmative). I voted, overlooking the fact that I have a pair for the day with the junior Senator from Virginia [Mr. SWANSON]. I am advised, however, that the junior Senator from Virginia, who is unavoidably absent to-day, would, if present, vote "yea" on this question. I therefore will ask to allow my vote to stand.

Mr. HARDWICK. I transfer my pair with the junior Senator from Kansas [Mr. CURTIS] to the junior Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. MYERS. I inquire if the Senator from Connecticut [Mr. MCLEAN] has voted?

The PRESIDING OFFICER. He has not.

Mr. MYERS. I have a pair with that Senator, which, in his absence, I transfer to the Senator from Illinois [Mr. LEWIS] and vote "yea."

Mr. SHEPPARD. I wish to announce the unavoidable absence on official business of the Senator from Kentucky [Mr. BECKHAM]. He is paired with the Senator from Delaware [Mr. DU PONT].

Mr. PHELAN. I desire to announce the unavoidable absence of the Senator from Oregon [Mr. CHAMBERLAIN]. He has a general pair with the junior Senator from Pennsylvania [Mr. OLIVER].

Mr. FLETCHER. If no announcement has been made concerning the absence of my colleague [Mr. BRYAN]. I desire to announce that he is paired with the Senator from Michigan [Mr. TOWNSEND]. I ask that this announcement stand for the day.

Mr. GALLINGER. I have been requested to announce the following pairs:

The Senator from Maine [Mr. BURLEIGH] with the Senator from Arkansas [Mr. ROBINSON];

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Maryland [Mr. SMITH];

The Senator from Ohio [Mr. HARDING] with the Senator from Alabama [Mr. UNDERWOOD]; and

The Senator from Massachusetts [Mr. WEEKS] with the Senator from Kentucky [Mr. JAMES].

The result was announced—yeas 29, nays 17, as follows:

YEAS—29.

Bankhead	Hardwick	O'Gorman	Smith, Ariz.
Brandegee	Hughes	Owen	Smith, Mich.
Chilton	Jones	Phelan	Vardaman
Clarke, Ark.	Lane	Poindexter	Warren
Culberson	Lee, Md.	Ransdell	Williams
Fall	Martin, Va.	Shafroth	
Fletcher	Myers	Sheppard	
Gallinger	Nelson	Simmons	

NAYS—17.

Borah	La Follette	Smoot	Wadsworth
Brady	Lippitt	Sterling	Works
Catron	Norris	Thomas	
Husting	Page	Thompson	
Kenyon	Sherman	Tillman	

NOT VOTING—50.

Ashurst	Goff	McCumber	Smith, Ga.
Beckham	Gore	McLean	Smith, Md.
Broussard	Gronna	Martine, N. J.	Smith, S. C.
Bryan	Harding	Newlands	Stone
Burleigh	Hitchcock	Oliver	Sutherland
Chamberlain	Hollis	Overman	Swanson
Clapp	James	Penrose	Taggart
Clark, Wyo.	Johnson, Me.	Pittman	Townsend
Colt	Johnson, S. Dak.	Pomerene	Underwood
Cummins	Kern	Reed	Walsh
Curtis	Lea, Tenn.	Robinson	Weeks
Dillingham	Lewis	Saulsbury	
du Pont	Lodge	Shields	

The PRESIDING OFFICER. No quorum has voted.

Mr. CLARKE of Arkansas. Mr. President, may I inquire whether or not there were certain Senators who announced their presence, but did not vote?

The PRESIDING OFFICER. The Chair thinks there was not one. The entire Senate voted.

Mr. SMOOT. The roll will have to be called.

Mr. CLARKE of Arkansas. I think the roll will have to be called.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	Nelson	Simmons
Bankhead	Hardwick	Norris	Smoot
Borah	Hughes	O'Gorman	Sterling
Brady	Husting	Oliver	Thomas
Brandegee	Jones	Owen	Thompson
Chilton	Kenyon	Page	Tillman
Clapp	Lane	Phelan	Vardaman
Clark, Wyo.	Lee, Md.	Poindexter	Wadsworth
Clarke, Ark.	Lodge	Shafroth	Williams
Culberson	Martin, Va.	Sheppard	Works
Fall	Myers	Sherman	

The PRESIDING OFFICER. Forty-three Senators have answered to their names. There is not a quorum present. The Secretary will call the roll of the absentees.

The Secretary called the names of the absent Senators, and Mr. SMITH of Arizona, Mr. SMITH of Michigan, and Mr. WARREN answered to their names when called.

Mr. BECKHAM, Mr. JOHNSON of South Dakota, Mr. LA FOLLETTE, and Mr. WEEKS entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty Senators have answered to their names. There is a quorum present.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House disagrees to the amendments of the Senate to the bill (H. R. 655) to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. KEY of Ohio, Mr. KEATING, and Mr. JAMES managers at the conference on the part of the House.

The message also announced that the House had passed a bill (H. R. 15455) to establish a United States shipping board for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve and a merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries; to regulate carriers by water engaged in the foreign and interstate commerce of the United States, and for other purposes, in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. GALLINGER presented a memorial of the Manchester Dry Goods Co., of New Hampshire, remonstrating against the enactment of legislation to fix standard prices for patented and trade-marked articles, which was referred to the Committee on Education and Labor.

Mr. LODGE presented a petition of sundry citizens of Massachusetts, praying that the United States remain at peace, which was referred to the Committee on Foreign Relations.

He also presented a petition of the National Association of Cotton Manufacturers, of Boston, Mass., praying for the imposition of a tariff on dyestuffs, which was referred to the Committee on Finance.

He also presented petitions of sundry citizens of Boston, Cambridge, Millbury, and Oxford, all in the State of Massachusetts, praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which were ordered to lie on the table.

He also presented petitions of sundry citizens of Massachusetts, praying for an increase in armaments, which were ordered to lie on the table.

He also presented petitions of sundry citizens of Massachusetts, praying for the enactment of legislation looking to a reclassification of the employees in the Bureau of Animal Industry, Agricultural Department, which were referred to the Committee on Agriculture and Forestry.

He also presented a petition of the National Association of Cotton Manufacturers, of Boston, Mass., praying for the enactment of legislation to prevent fraudulent advertising and the misbranding of merchandise, which was referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Massachusetts, remonstrating against the proposed creation of a juvenile court in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented petitions of sundry citizens of Massachusetts, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. PHELAN presented memorials of sundry citizens of California, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

He also presented petitions of sundry citizens of California, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of the Woman's Christian Temperance Union, of Berkeley, Cal., praying for prohibition in the District of Columbia, which was ordered to lie on the table.

REPORTS OF COMMITTEE ON MILITARY AFFAIRS.

Mr. LEA of Tennessee, from the Committee on Military Affairs, to which were referred the following bills, reported them each without amendment:

S. 4176. A bill authorizing and directing the Secretary of War to make certain provisions for the care of Federal and Confederate veteran soldiers who served in the War between the States, 1861 to 1865, to enable them to unite in participation of a national reunion and peace jubilee to commemorate the victories and virtues resulting in the half century of peace and prosperity to the American Nation, to be held in the national domain within the Vicksburg National Military Park October 16, 17, 18, and 19, 1917; and

S. 4473. A bill for the relief of Charles G. Griffa.

He also, from the same committee, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

S. 2880. A bill for the relief of Martin V. Parmer (Rept. No. 466);

S. 3973. A bill for the relief of Clyde R. Altman (Rept. No. 467);

S. 1553. A bill for the relief of Peter Kenney (Rept. No. 468); and

S. 3268. A bill for the relief of John Duggan (Rept. No. 469).

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GALLINGER:

A bill (S. 6078) granting a pension to Rufina M. Sutton (with accompanying papers); to the Committee on Pensions.

By Mr. THOMPSON:

A bill (S. 6079) granting a pension to Henry C. Miller (with accompanying papers); to the Committee on Pensions.

By Mr. WALSH:

A bill (S. 6080) granting a pension to Mary J. Nolan (with accompanying papers); to the Committee on Pensions.

By Mr. REED:

A bill (S. 6081) providing for the purchase of the portrait of Samuel Blodget, jr.; to the Committee on the Library.

A bill (S. 6082) granting an increase of pension to Eliza J. Stillwell (with accompanying papers);

A bill (S. 6083) granting an increase of pension to Louisa E. McMillen (with accompanying papers); and

A bill (S. 6084) granting an increase of pension to William H. Hayes (with accompanying papers); to the Committee on Pensions.

By Mr. POMERENE:

A bill (S. 6085) to repeal an act to provide for the sittings of the United States circuit and district courts of the northern district of Ohio at the city of Youngstown, Ohio; to the Committee on the Judiciary.

A bill (S. 6086) for the relief of the Equity Savings & Loan Co., of Cleveland, Ohio; and

A bill (S. 6087) for the relief of The Royal Savings & Loan Co., of Portsmouth, Ohio; to the Committee on Claims.

RIVER AND HARBOR APPROPRIATIONS.

Mr. LA FOLLETTE submitted two amendments intended to be proposed by him to the river and harbor appropriation bill (H. R. 12193), which were ordered to lie on the table and be printed.

EMPLOYMENT OF STENOGRAPHER.

Mr. POMERENE submitted the following resolution (S. Res. 199), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Civil Service and Retrenchment, or any subcommittee thereof, be, and hereby is, authorized during the Sixty-fourth Congress to send for persons, books, and papers; to administer oaths, and to employ a stenographer, at a cost not exceeding $1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before said committee, the expenses thereof to be paid out of the contingent fund of the Senate; and that the committee, or any subcommittee thereof, may sit during the sessions or recess of the Senate.

PENSIONS TO SURVIVORS OF INDIAN WARS.

The PRESIDING OFFICER (Mr. SMITH of Michigan) laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 655) to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HUGHES. I move that the Senate insist upon its amendments, agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to, and the Presiding Officer appointed Mr. JOHNSON of Maine, Mr. HUGHES, and Mr. SMOOT conferees on the part of the Senate.

HOUSE BILL REFERRED.

A bill (H. R. 15455) to establish a United States shipping board for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve and a merchant marine to meet the requirements of the commerce of the United States

with its Territories and possessions and with foreign countries. to regulate carriers by water engaged in the foreign and interstate commerce of the United States, and for other purposes, was read twice by its title and referred to the Committee on Commerce.

RECESS.

Mr. CLARKE of Arkansas. Mr. President, it is perfectly evident that we shall not be able to get a working quorum today. I move that the Senate take a recess until 11 o'clock on Monday next.

The motion was agreed to; and (at 1 o'clock and 58 minutes p. m., Saturday, May 20, 1916) the Senate took a recess until Monday, May 22, 1916, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

SATURDAY, *May 20, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Infinite Spirit, fountain of light, life, and love, pour out abundantly upon us, we beseech Thee, of those gifts which make for righteousness in the soul, that we may be indeed members of the kingdom of heaven, and thus be able to render unto Thee and our fellow men a truer, nobler, more efficient service as citizens and lawmakers of a great Republic "conceived in liberty and dedicated to the proposition that all men are created equal." For Thine is the kingdom, and the power, and the glory forever. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had insisted upon its amendments to the bill (H. R. 655) entitled "An act to pension the survivors of certain Indian wars from January 1, 1859, to January, 1891, inclusive, and for other purposes," disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. JOHNSON of Maine, Mr. HUGHES, and Mr. SMOOT as the conferees on the part of the Senate.

UNITED STATES SHIPPING BOARD.

The SPEAKER. When the House adjourned yesterday the unfinished business was the bill H. R. 15455, the shipping bill.

Mr. MANN. Mr. Speaker, I withdraw my demand for the reading of the engrossed bill.

The SPEAKER. When we adjourned we had reached the third reading of the bill. The Clerk will read it the third time. The gentleman from Illinois [Mr. MANN] withdraws his request for the reading of the engrossed copy.

The Clerk read as follows:

A bill (H. R. 15455) to establish a United States shipping board for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve and a merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries; to regulate carriers by water engaged in the foreign and interstate commerce of the United States, and for other purposes.

The SPEAKER. The question is, Shall the bill pass?

The question was taken, and the Speaker announced that the "noes" seemed to have it.

Mr. ALEXANDER. Mr. Speaker, I call for the yeas and nays.

Mr. MANN. Mr. Speaker, I make the point of order that there is no quorum present. That will expedite matters.

The SPEAKER. The gentleman from Illinois makes the point of order that there is no quorum present. Evidently there is not. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll. Those in favor of passing this bill will, when their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 209, nays 161, answered "present" 12, not voting 52, as follows:

YEAS—209.

Abercrombie	Bell	Byrns, Tenn.	Connelly

So the bill was passed.

The Clerk announced the following pairs:

Until further notice:

Mr. DRISCOLL with Mr. HAYES.

Mr. ROUSE with Mr. MADDEN.

Mr. CONRY with Mr. PRATT.

Mr. PATTEN with Mr. PORTER.

Mr. CLARK of Florida with Mr. FULLER.

Mr. FITZGERALD with Mr. MILLER of Minnesota.
Mr. LOFT with Mr. TINKHAM.
On the vote:
Mr. HARRISON (for shipping bill) with Mr. CHIPERFIELD (against).
Mr. STEPHENS of Mississippi (for shipping bill) with Mr. SWIFT (against).
Mr. HART (for shipping bill) with Mr. GRIEST (against).
Mr. MONTAGUE (for shipping bill) with Mr. SLEMP (against).
Mr. MORRISON (for shipping bill) with Mr. MCLAUGHLIN (against).
Mr. GLASS (for shipping bill) with Mr. WINSLOW (against).
Mr. TALBOTT (for shipping bill) with Mr. GOULD (against).
Mr. MORGAN of Louisiana (for shipping bill) with Mr. GRAHAM (against).
Mr. SCULLY (for shipping bill) with Mr. MOONEY (against).
Mr. CANTRILL (for shipping bill) with Mr. LANGLEY (against).
Mr. POU (for shipping bill) with Mr. JOHNSON of South Dakota (against).
Mr. STEAGALL (for shipping bill) with Mr. HOLLINGSWORTH (against).
Mr. SEARS (for shipping bill) with Mr. PETERS (against).
Mr. WEBB (for shipping bill) with Mr. DYER (against).
Mr. CASEY (for shipping bill) with Mr. SCOTT of Pennsylvania (against).
Mr. DOREMUS (for shipping bill) with Mr. SMITH of Michigan (against).
Mr. GODWIN of North Carolina (for shipping bill) with Mr. GARDNER (against).
Mr. HENRY (for shipping bill) with Mr. BENNET (against).
Mr. ADAIR (for shipping bill) with Mr. WOOD of Indiana (against).
Mr. LEWIS (for shipping bill) with Mr. OAKEY (against).
Mr. SMITH of Michigan. Mr. Speaker, I wish to change my vote from "nay" to "present."
Mr. LANGLEY. I voted "nay," but I am paired with my colleague, Mr. CANTRILL, and I desire to withdraw my vote and to answer "present."
Mr. GARDNER. I voted "nay," but I am paired with the gentleman from North Carolina, Mr. GODWIN, who did not vote. I withdraw my vote and answer "present."
Mr. MADDEN. I voted "nay," but I am paired with the gentleman from Kentucky, Mr. ROUSE, who did not vote. I withdraw my vote and answer "present."
Mr. STEPHENS of Mississippi. I voted "yea." I desire to withdraw that vote and to answer "present," as I am paired with the gentleman from New York, Mr. SWIFT.
Mr. DEWALT. I voted "yea," but I am paired with the gentleman from Pennsylvania, Mr. MCFADDEN, and I desire to withdraw that vote and to answer "present."
The result of the vote was announced as above recorded.
The SPEAKER. A quorum is present. The doorkeeper will unlock the doors.
On motion of Mr. ALEXANDER, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE TO EXTEND REMARKS.

Mr. GREENE of Massachusetts. Mr. Speaker, I desire to extend my remarks on the bill just passed.
The SPEAKER. The gentleman from Massachusetts asks leave to extend his remarks on the bill just passed. Is there objection?
There was no objection.
Mr. BORLAND. Mr. Speaker, I ask leave to extend my remarks in the RECORD.
Mr. ASWELL. Mr. Speaker, I make the same request.
Mr. OLIVER. Mr. Speaker, I make the same request.
The SPEAKER. Everybody has leave to extend remarks on the bill just passed. That leave was granted long ago.

THE MILITARY ESTABLISHMENT.

Mr. HAY. Mr. Speaker, I call up the conference report on the bill (H. R. 12766) to increase the efficiency of the Military Establishment of the United States; and I ask unanimous consent that the statement be read in lieu of the report.
The SPEAKER. The gentleman from Virginia calls up the conference report on the Army reorganization bill and asks unanimous consent that the statement be read in lieu of the report. Is there objection?
There was no objection.
The conference report is as follows:

CONFERENCE REPORT (NO. 695).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12766) to increase the efficiency of the Military Establishment of the United States, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:
That the House recede from its disagreement to the amendment to the title of the bill and agree to the same.
That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment, as follows: In lieu of the matter proposed by the amendment of the Senate insert the following:
"That the Army of the United States shall consist of the Regular Army, the Volunteer Army, the Officers' Reserve Corps, the Enlisted Reserve Corps, the National Guard while in the service of the United States, and such other land forces as are now or may hereafter be authorized by law.
"SEC. 2. Composition of the Regular Army: The Regular Army of the United States, including the existing organizations, shall consist of 64 regiments of Infantry, 25 regiments of Cavalry, 21 regiments of Field Artillery, a Coast Artillery Corps, the brigade, division, army corps, and army headquarters, with their detachments and troops, a General Staff Corps, an Adjutant General's Department, an Inspector General's Department, a Judge Advocate General's Department, a Quartermaster Corps, a Medical Department, a Corps of Engineers, an Ordnance Department, a Signal Corps, the officers of the Bureau of Insular Affairs, the Militia Bureau, the detached officers, the detached noncommissioned officers, the chaplains, the Regular Army Reserve, all organized as hereinafter provided, and the following as now authorized by law: The officers and enlisted men on the retired list; the additional officers; the professors, the Corps of Cadets, the general Army service detachment, and detachments of Cavalry, Field Artillery, and Engineers, and the band of the United States Military Academy; the post noncommissioned staff officers; the recruiting parties, the recruit depot detachments, and unassigned recruits; the service school detachments; the disciplinary guards; the disciplinary organizations; the Indian Scouts; and such other officers and enlisted men as are now or may be hereafter provided for: *Provided*, That hereafter the enlisted personnel of all organizations of the Regular Army shall at all times be maintained at a strength not below the minimum strength fixed by law: *Provided further*, That the total enlisted force of the line of the Regular Army, excluding the Philippine Scouts and the enlisted men of the Quartermaster Corps, of the Medical Department, and of the Signal Corps, and the unassigned recruits, shall not at any one time, except in the event of actual or threatened war or similar emergency in which the public safety demands it, exceed 175,000 men: *Provided further*, That the unassigned recruits at depots or elsewhere shall at no time, except in time of war, exceed by more than 7 per cent the total authorized enlisted strength.
"SEC. 3. Composition of brigades, divisions, etc.: The mobile troops of the Regular Army of the United States shall be organized, as far as practicable, into brigades and divisions. The President is authorized, in time of actual or threatened hostilities, or when in his opinion the interests of the public service demand it, to organize the brigades and divisions into such army corps or armies as may be necessary. The typical Infantry brigade shall consist of a headquarters and three regiments of Infantry. The typical Cavalry brigade shall consist of a headquarters and three regiments of Cavalry. The typical Field Artillery brigade shall consist of a headquarters and three regiments of Field Artillery. The typical Infantry division shall consist of a headquarters, three Infantry brigades, one regiment of Cavalry, one Field Artillery brigade, one regiment of Engineers, one field signal battalion, one aero squadron, one ammunition train, one supply train, one engineer train, and one sanitary train. The typical Cavalry division shall consist of a headquarters, three Cavalry brigades, one regiment of Field Artillery (horse), one battalion of mounted Engineers, one field signal battalion (mounted), one aero squadron, one ammunition train, one supply train, one engineer train, and one sanitary train. The typical army corps shall consist of a headquarters, two or more Infantry divisions, one or more Cavalry brigades or a Cavalry division, one Field Artillery brigade, one telegraph battalion, and one field signal battalion, and such ammunition, supply, engineer, and sanitary trains as the President may deem necessary. A brigade, a division, an army corps, and an army headquarters shall consist of such officers, enlisted men, and civilians as the President may prescribe. Each supply train, ammunition train, sanitary train, and engineer train shall consist of such officers and enlisted men and shall be organized as the President may prescribe, the line officers necessary therewith to be detailed under the provisions of sections 26 and 27, act of Congress approved February 2, 1901. Nothing herein contained, however, shall prevent the President from increasing or

decreasing the number of organizations prescribed for the typical brigades, divisions, and army corps, or from prescribing new and different organizations and personnel as the efficiency of the service may require.

"SEC. 4. General officers of the line: Officers commissioned to and holding in the Army the office of a general officer shall hereafter be known as general officers of the line; officers commissioned to and holding in the Army an office other than that of a general officer, but to which the rank of a general officer is attached, shall be known as general officers of the staff. The number of general officers of the line now authorized by law is hereby increased by four major generals and 19 brigadier generals: *Provided*, That hereafter in time of peace major generals of the line shall be appointed from officers of the grade of brigadier general of the line, and brigadier generals of the line shall be appointed from officers of the grade of colonel of the line of the Regular Army.

"SEC. 5. The General Staff Corps: The General Staff Corps shall consist of 1 Chief of Staff, detailed in time of peace from major generals of the line; 2 assistants to the Chief of Staff, who shall be general officers of the line, one of whom, not above the grade of brigadier general, shall be the president of the Army War College; 10 colonels; 10 lieutenant colonels; 15 majors; and 17 captains, to be detailed from corresponding grades in the Army, as in this section hereinafter provided. All officers detailed in the General Staff Corps shall be detailed therein for periods of four years, unless sooner relieved. While serving in the General Staff Corps officers may be temporarily assigned to duty with any branch of the Army. Upon being relieved from duty in the General Staff Corps officers shall return to the branch of the Army in which they hold permanent commissions, and no officer shall be eligible to a further detail in the General Staff Corps until he shall have served two years with the branch of the Army in which commissioned, except in time of actual or threatened hostilities. Section 27 of the act of Congress approved February 2, 1901, shall apply to each position vacated by officers below the grade of general officer detailed in the General Staff Corps.

"Not more than one-half of all of the officers detailed in said corps shall at any time be stationed, or assigned to or employed upon any duty, in or near the District of Columbia. All officers detailed in said corps shall be exclusively employed in the study of military problems, the preparation of plans for the national defense and the utilization of the military forces in time of war, in investigating and reporting upon the efficiency and state of preparedness of such forces for service in peace or war, or on appropriate general staff duties in connection with troops, including the National Guard, or as military attachés in foreign countries, or on other duties, not of an administrative nature, on which they can be lawfully and properly employed: *Provided*, That no officer shall be detailed as a member of the General Staff Corps, other than the Chief of Staff and the general officers herein provided for as assistants to the Chief of Staff, except upon the recommendation of a board of five officers not below the rank of colonel, who shall be selected by the President or the Secretary of War, and neither the Chief of Staff nor more than two other members of the General Staff Corps, nor any officer not a member of said corps, who shall have been stationed or employed on any duty in or near the District of Columbia within one year prior to the date of convening of any such board, shall be detailed as a member thereof. No recommendation made by any such board shall, for more than one year after the making of such recommendation or at any time after the convening of another such board, unless again recommended by the new board, be valid as a basis for the detail of any officer as a member of the General Staff Corps; and no alteration whatever shall be made in any report or recommendation of any such board, either with or without the consent of members thereof, after the board shall have submitted such report or recommendation and shall have adjourned sine die: *Provided further*, That the War College shall remain fully subject to the supervising, coordinating, and informing powers conferred by law upon members of the General Staff Corps, and officers for duty as instructors or students in or as attachés of said college may be selected and detailed freely from among members of said corps, but any officer so selected and detailed other than one director shall thereupon cease to be a member of said corps and shall not be eligible for redetail therein so long as he shall remain on said duty; and no officer on the active list of the Army shall, for more than 30 days in any calendar year, be attached to or assigned to duty in the War College in any capacity other than that of president, director, instructor, or student, nor, unless a member of the General Staff Corps, be attached to or employed in the office of the Chief of Staff: *Provided further*, That the organizations heretofore existing in or in connection with the office of the Chief of Staff under the designations of the mobile army division and the Coast Artillery division be, and they are hereby, abolished and shall not be reestablished. The business heretofore transacted in said divisions, except such as comes clearly within the general powers specified in and conferred upon members of the General Staff Corps by the organic act of Congress approved February 14, 1903, is hereby transferred as follows, to wit, to the office of the Chief of Coast Artillery, all business apportioned to that office by law or Army Regulations at the time of the creation of the Coast Artillery division of the office of the Chief of Staff; to the office of The Adjutant General or other bureau or bureaus concerned, all other business; and, subject to the exercise of the supervising, coordinating, and informing powers conferred upon members of the General Staff Corps by the act of Congress last hereinbefore cited, the business transferred by this proviso to certain bureaus or offices shall hereafter be transacted exclusively by or under the direction of the respective heads thereof; and the Chief of Coast Artillery shall be an additional member of the General Staff Corps and shall also be adviser to and informant of the Chief of Staff in respect to the business under his charge: *Provided further*, That hereafter members of the General Staff Corps shall be confined strictly to the discharge of the duties of the general nature of those specified for them in this section and in the organic act of Congress last hereinbefore cited, and they shall not be permitted to assume or engage in work of an administrative nature that pertains to established bureaus or offices of the War Department, or that, being assumed or engaged in by members of the General Staff Corps, would involve impairment of the responsibility or initiative of such bureaus or offices, or would cause injurious or unnecessary duplication of or delay in the work thereof: *Provided further*, That all pay and allowances shall be forfeited by any superior for any period during which, by his order or his permission, or by reason of his neglect, any subordinate shall violate any of the foregoing provisions of this section: *Provided further*, That if any officer detailed in the General Staff Corps, or as an officer of any staff corps or department of the Army, shall be promoted to the next higher grade while so serving he may be permitted to serve out the period of his detail, and the number of officers in the organization in which he shall be serving and in the grade to which he shall have been promoted shall be increased by one for such time as he shall be an additional number in said organization and grade; but the whole number of officers detailed to said organization shall at no time exceed the aggregate of the numbers allowed to the several grades thereof by law other than this proviso.

"SEC. 6. The Adjutant General's Department: The Adjutant General's Department shall consist of The Adjutant General with the rank of brigadier general; 7 adjutants general with the rank of colonel; 13 adjutants general with the rank of lieutenant colonel; and 30 adjutants general with the rank of major.

"SEC. 7. The Inspector General's Department: The Inspector General's Department shall consist of 1 Inspector General with the rank of brigadier general; 4 inspectors general with the rank of colonel; 8 inspectors general with the rank of lieutenant colonel; and 16 inspectors general with the rank of major.

"SEC. 8. The Judge Advocate General's Department: The Judge Advocate General's Department shall consist of 1 Judge Advocate General with the rank of brigadier general; 4 judge advocates with the rank of colonel; 7 judge advocates with the rank of lieutenant colonel; and 20 judge advocates with the rank of major: *Provided*, That acting judge advocates may be detailed under the provisions of existing law for separate brigades and for separate general court-martial jurisdictions, and when not immediately required for service with a geographical department, tactical division, separate brigade, or other separate general court-martial jurisdiction, acting judge advocates may be assigned to such other legal duty as the exigencies of the service may require: *Provided further*, That, of the vacancies created in the Judge Advocate General's Department by this Act, one such vacancy, not below the grade of major, shall be filled by the appointment of a person from civil life, not less than 45 nor more than 50 years of age, who shall have been for 10 years a judge of the Supreme Court of the Philippine Islands, shall have served for two years as a captain in the Regular or Volunteer Army, and shall be proficient in the Spanish language and laws: *Provided further*, That so much of the act of Congress approved August 24, 1912, as relates to the detachment or detail of officers for duty in the Judge Advocate General's Department shall hereafter be held to apply only to the acting judge advocates authorized by law; and hereafter no officer shall be or remain detached from any

command or assigned to any duty or station with intent to enable or aid him to pursue the study of law: *And provided further*, That no officer of the Judge Advocate General's Department below the rank of colonel shall be promoted therein until he shall have successfully passed a written examination before a board consisting of not less than two officers of the Judge Advocate General's Department, to be designated by the Secretary of War, such examination to be prescribed by the Secretary of War and to be held at such time anterior to the accruing of the right to promotion as may be for the best interests of the service: *Provided*, That should any officer in the grade of major of the Judge Advocate General's Department fail in his physical examination and be found incapacitated for service by reason of physical disability contracted in the line of duty, he shall be retired with the rank to which his seniority entitled him to be promoted; but if he should be found disqualified for promotion for any other reason, a second examination shall not be allowed, but the Secretary of War shall appoint a board of review to consist of two officers of the Judge Advocate General's Department superior in rank to the officer examined, none of whom shall have served as a member of the board which examined him. If the unfavorable finding of the examining board is concurred in by the board of review, the officer reported disqualified for promotion shall be honorably discharged from the service with one year's pay. If the action of the examining board is disapproved by the board of review, the officer shall be considered qualified and shall be promoted: *Provided further*, That any lieutenant colonel of the Judge Advocate General's Department who, at his first examination for promotion to the grade of colonel, has been found disqualified for such promotion for any reason other than physical disability incurred in the line of duty shall be suspended from promotion and his right thereto shall pass successively to such officers next below him in rank as are or may become eligible to promotion under existing law during the period of his suspension; and any such officer suspended from promotion shall be reexamined as soon as practicable after the expiration of one year from the date of the completion of the examination that resulted in his suspension; and if on such reexamination he is found qualified for promotion, he shall again become eligible thereto; but if he is found disqualified by reason of physical disability incurred in line of duty in either examination, he shall be retired, with the rank to which his seniority entitled him to be promoted; and if he is not found disqualified by reason of such physical disability, but is found disqualified for promotion for any other reason in the second examination, he shall be retired without promotion.

"SEC. 9. The Quartermaster Corps: The Quartermaster Corps shall consist of 1 Quartermaster General with the rank of major general; 2 assistants to the Quartermaster General with the rank of brigadier general; 21 colonels; 24 lieutenant colonels; 68 majors; 180 captains; and the pay clerks now in active service, who shall hereafter have the rank, pay, and allowances of a second lieutenant, and the President is hereby authorized to appoint and commission them, by and with the advice and consent of the Senate, second lieutenants in the Quartermaster Corps, United States Army. The total enlisted strength of the Quartermaster Corps and the number in each grade shall be limited and fixed from time to time by the President in accordance with the needs of the Army, and shall consist of quartermaster sergeants, senior grade; quartermaster sergeants; sergeants, first class; sergeants; corporals; cooks; privates, first class; and privates. The number in the various grades shall not exceed the following percentages of the total authorized enlisted strength of the Quartermaster Corps, namely: Quartermaster sergeants, senior grade, five-tenths of 1 per cent; quartermaster sergeants, 6 per cent; sergeants, first class, 2⅝ per cent; sergeants, 25 per cent; corporals, 10 per cent; privates, first class, 45 per cent; privates, 9 per cent; cooks, 2 per cent: *Provided*, That the master electricians now authorized by law for the Quartermaster Corps shall hereafter be known as quartermaster sergeants, senior grade, and shall be included in the number of quartermaster sergeants, senior grade, herein authorized: *And provided further*, That all work pertaining to construction and repair that has heretofore been done by or under the direction of officers of the Quartermaster Corps shall, except as otherwise now provided by laws or regulations, hereafter be done by or under the direction of officers of said corps.

"SEC. 10. The Medical Department: The Medical Department shall consist of one Surgeon General, with the rank of major general during the active service of the present incumbent of that office, and thereafter with the rank of brigadier general, who shall be chief of said department, a Medical Corps, a Medical Reserve Corps within the limit of time fixed by this act, a Dental Corps, a Veterinary Corps, an enlisted force, the Nurse Corps and contract surgeons as now authorized by law, the commissioned officers of which shall be citizens of the United States.

"The Medical Corps shall consist of commissioned officers below the grade of brigadier general, proportionally distributed among the several grades as in the Medical Corps now established by law. The total number of such officers shall approximately be equal to, but not exceed, except as hereinafter provided, 7 for every 1,000 of the total enlisted strength of the Regular Army authorized from time to time by law: *Provided*, That if by reason of a reduction by law in the authorized enlisted strength of the Army aforesaid the total number of officers in the Medical Corps commissioned previously to such reduction shall for the time being exceed the equivalent of 7 to 1,000 of such reduced enlisted strength no original appointment to commissioned rank in said corps shall be made until the total number of commissioned officers thereof shall have been reduced below the equivalent of 7 to the thousand of the said reduced enlisted strength, nor thereafter so as to make the total number of commissioned officers thereof in excess of the equivalent of 7 to the thousand of said reduced enlisted strength; and no promotion shall be made above the grade of captain in said corps until the number of officers in the grade above that of captain to which the promotion is due shall have been reduced below the proportional number authorized for such grade on the basis of the reduced enlisted strength, nor thereafter so as to make the number of officers in such grade in excess of the proportional number authorized on the basis of said reduced enlisted strength: *Provided further*, That when in time of war the Regular Army shall have been increased by virtue of the provisions of this or any other Act, the medical officers appointed to meet such increase shall be honorably discharged from the service of the United States when the reduction of the enlisted strength of the Army shall take place: *Provided further*, That persons hereafter commissioned in the Medical Corps shall be citizens of the United States between the ages of 22 and 30 years and shall be promoted to the grade of captain upon the completion of five years' service in the Medical Corps and upon passing the examinations prescribed by the President for promotion to the grade of captain in the Medical Corps: *Provided further*, That relative rank among captains in the Medical Corps, who have or shall have attained that rank by operation of law after a period of service fixed thereby, shall be determined by counting all the service rendered by them as officers in said corps and as assistant surgeons in the Regular Army, subject, however, to loss of files by reason of sentence of court-martial or by reason of failure to pass examination for promotion: *Provided further*, That hereafter the President shall be authorized to detail not to exceed five officers of the Medical Department of the Army for duty with the military relief division of the American National Red Cross.

"The enlisted force of the Medical Department shall consist of the following personnel, who shall not be included in the effective strength of the Army nor counted as a part of the enlisted force provided by law: Master hospital sergeants, hospital sergeants, sergeants (first class), sergeants, corporals, cooks, horseshoers, saddlers, farriers, mechanics, privates (first class), and privates: *Provided*, That master hospital sergeants shall be appointed by the Secretary of War, but no person shall be appointed master hospital sergeant until he shall have passed a satisfactory examination under such regulations as the Secretary of War may prescribe before a board of one or more medical officers as to his qualifications for the position, including knowledge of pharmacy, and demonstrated his fitness therefor by service of not less than 12 months as hospital sergeant or sergeant, first class, Medical Department, or as sergeant, first class, in the Hospital Corps now established by law; and no person shall be designated for such examination except by written authority of the Surgeon General: *Provided further*, That original enlistments for the Medical Department shall be made in the grade of private, and reenlistments and promotions of enlisted men therein, except as hereinbefore prescribed, and transfers thereto from the enlisted force of the line or other staff departments and corps of the Army shall be governed by such regulations as the Secretary of War may prescribe: *Provided further*, That the enlisted men of the Hospital Corps who are in active service at the time of the approval of this Act are hereby transferred to the corresponding grades of the Medical Department established by this Act: *Provided further*, That the total number of enlisted men in the Medical Department shall be approximately equal to, but not exceed, except as hereinafter provided, the equivalent of 5 per cent of the total enlisted strength of the Army authorized from time to time by law: *Provided further*, That in time of actual or threatened hostilities, the Secretary of War is hereby authorized to enlist or cause to be enlisted in the Medical Department such additional number of men as the service may require:

Provided further, That the number of enlisted men in each of the several grades designated below shall not exceed, except as hereinafter provided, the following percentages of the total authorized enlisted strength of the Medical Department, to wit: Master hospital sergeants, one-half of 1 per cent; hospital sergeants, one-half of 1 per cent; sergeants, first class, 7 per cent; sergeants, 11 per cent; corporals, 5 per cent; and cooks, 6 per cent: *Provided further*, That the number of horseshoers, saddlers, farriers, and mechanics in the Medical Department shall not exceed one each to each authorized ambulance company or like organization: *Provided further*, That in said department the number of privates, first class, shall not exceed 25 per cent of the number of privates: *Provided further*, That if by reason of a reduction by operation of law in the authorized enlisted strength of the Army aforesaid the number of noncommissioned officers of any grade in the Medical Department whose warrants were issued previously to such reductions shall for the time being exceed the percentage hereinabove specified for such grade, no promotion to such grade shall be made until the percentage of noncommissioned officers therein shall have been reduced below that authorized for such grade on the basis of the said reduced enlisted strength, nor thereafter so as to make the percentage of noncommissioned officers therein in excess of the percentage authorized on the basis of the said reduced enlisted strength; but noncommissioned officers may be reenlisted in the grades held by them previously to such reduction regardless of the percentages aforesaid; and when under this provision the number of noncommissioned officers of any grade exceeds the percentage specified, any noncommissioned officer thereof, not under charges, may be discharged on his own application: *Provided further*, That privates, first class, of the Medical Department shall be eligible for ratings for additional pay as follows: As dispensary assistant, $2 a month; as nurse, $3 a month; as surgical assistant, $5 a month: *Provided further*, That no enlisted man shall receive more than one rating for additional pay under the provisions of this section, nor shall any enlisted man receive any additional pay under such rating unless he shall have actually performed the duties for which he shall be rated.

"The President is hereby authorized to appoint and commission, by and with the advice and consent of the Senate, dental surgeons, who are citizens of the United States between the ages of 21 and 27 years, at the rate of 1 for each 1,000 enlisted men in the line of the Army. Dental surgeons shall have the rank, pay, and allowances of first lieutenants until they have completed eight years' service. Dental surgeons of more than 8 but less than 24 years' service shall, subject to such examination as the President may prescribe, have the rank, pay, and allowances of captains. Dental surgeons of more than 24 years' service shall, subject to such examination as the President may prescribe, have the rank, pay, and allowances of major: *Provided*, That the total number of dental surgeons with rank, pay, and allowances of major shall not at any time exceed 15: *And provided further*, That all laws relating to the examination of officers of the Medical Corps for promotion shall be applicable to dental surgeons.

"Authority is hereby given to the Secretary of War to grant permission, by revocable license, to the American National Red Cross to erect and maintain on any military reservations within the jurisdiction of the United States buildings suitable for the storage of supplies, or to occupy for that purpose buildings erected by the United States, under such regulations as the Secretary of War may prescribe, such supplies to be available for the aid of the civilian population in case of serious national disaster.

"SEC. 11. Corps of Engineers: The Corps of Engineers shall consist of 1 Chief of Engineers, with the rank of brigadier general; 23 colonels; 30 lieutenant colonels; 72 majors; 152 captains; 148 first lieutenants; 79 second lieutenants; and the enlisted men hereinafter enumerated. The Engineers troops of the Corps of Engineers shall consist of 1 band, 7 regiments, and 2 mounted battalions.

"Each regiment of Engineers shall consist of 1 colonel; 1 lieutenant colonel; 2 majors; 11 captains; 12 first lieutenants; 6 second lieutenants; 2 master engineers, senior grade; 1 regimental sergeant major; 2 regimental supply sergeants; 2 color sergeants; 1 sergeant bugler; 1 cook; 1 wagoner for each authorized wagon of the field and combat train, and 2 battalions.

"Each battalion of a regiment of Engineers shall consist of 1 major, 1 captain, 1 battalion sergeant major; 3 master engineers, junior grade; and 3 companies. Each Engineer company (regimental) shall consist of 1 captain; 2 first lieutenants; 1 second lieutenant; 1 first sergeant; 3 sergeants, first class; 1 mess sergeant; 1 supply sergeant; 1 stable sergeant; 6 sergeants; 12 corporals; 1 horseshoer; 2 buglers; 1 saddler; 2 cooks; 19 privates, first class; and 59 privates; *Provided*, That the President may, in his discretion, increase a regiment of Engineers by 2 master engineers, senior grade, and 2 sergeants; each battalion of a regiment of Engineers by 3 master engineers, junior grade; and each Engineer company (regimental) by 2 sergeants, 6 corporals, 1 cook, 12 privates, first class, and 34 privates.

"The Engineer band shall consist of 1 band leader; 1 assistant band leader; 1 first sergeant; 2 band sergeants; 4 band corporals; 2 musicians, first class; 4 musicians, second class; 13 musicians, third class; and 2 cooks.

"Each battalion of mounted Engineers shall consist of 1 major; 5 captains; 7 first lieutenants; 3 second lieutenants; 1 master engineer, senior grade; 1 battalion sergeant major; 1 battalion supply sergeant; 3 master engineers, junior grade; 1 corporal; 1 wagoner for each authorized wagon of the field and combat train; and 3 mounted companies. Each mounted Engineer company shall consist of 1 captain; 2 first lieutenants; 1 second lieutenant; 1 first sergeant; 2 sergeants, first class; 1 mess sergeant; 1 supply sergeant; 1 stable sergeant; 4 sergeants; 8 corporals; 2 horseshoers; 1 saddler; 2 cooks; 2 buglers; 12 privates, first class; and 37 privates: *Provided*, That the President may, in his discretion, increase the battalions of mounted Engineers by 1 master engineer, senior grade; 2 sergeants; and 3 master engineers, junior grade; and a mounted Engineer company by 2 sergeants; 3 corporals; 8 privates, first class; and 24 privates: *Provided further*, That appropriate officers to command the regiments, battalions, and companies herein authorized and for duty with and as staff officers of such organizations shall be detailed from the Corps of Engineers, and shall not be in excess of the numbers in each grade enumerated in this section. The enlisted force of the Corps of Engineers and the officers serving therewith shall constitute a part of the line of the Army.

"SEC. 12. The Ordnance Department: The Ordnance Department shall consist of 1 Chief of Ordnance, with the rank of brigadier general; 10 colonels; 15 lieutenant colonels; 32 majors; 42 captains; 42 first lieutenants; the ordnance sergeants, as now authorized by law, and such other enlisted men of grades now authorized by law as the President may direct: *Provided*, That ordnance sergeants shall be selected by the Secretary of War from the sergeants of the line or Ordnance Department who shall have served faithfully for eight years, including four years in the grade of noncommissioned officer: *Provided further*, That vacancies which may occur in the commissioned personnel of the Ordnance Department shall be subject to the provisions of sections 26 and 27 of the act approved February 2, 1901, the acts approved June 25, 1906, and February 24, 1915, and acts amendatory thereof relating to the Ordnance Department: *Provided further*, That hereafter the Secretary of War is authorized to detail not to exceed 30 lieutenants from the Army at large for duty as student officers in the establishment of the Ordnance Department for a period of two years; and the completion of the prescribed course of instruction shall constitute the examination for detail in the Ordnance Department.

"SEC. 13. The Signal Corps: The Signal Corps shall consist of 1 Chief Signal Officer, with the rank of brigadier general; 3 colonels; 8 lieutenant colonels; 10 majors; 30 captains; 75 first lieutenants; and the aviation section, which shall consist of 1 colonel; 1 lieutenant colonel; 8 majors; 24 captains; and 114 first lieutenants, who shall be selected from among officers of the Army at large of corresponding grades or from among officers of the grade below, exclusive of those serving by detail in staff corps or departments, who are qualified as military aviators, and shall be detailed to serve as aviation officers for periods of four years unless sooner relieved; and the provisions of section 27 of the act of Congress approved February 2, 1901, are hereby extended to apply to said aviation officers and to vacancies created in any arm, corps, or department of the Army by the detail of said officers therefrom; but nothing in said act or in any other law now in force shall be held to prevent the detail or redetail at any time, to fill a vacancy among the aviation officers authorized by this act, of any officer who, during prior service as an aviation officer of the aviation section, shall have become proficient in military aviation.

"Aviation officers may, when qualified therefor, be rated as junior military aviators or as military aviators, but no person shall be so rated until there shall have been issued to him a certificate to the effect that he is qualified for the rating, and no certificate shall be issued to any person until an aviation examining board, which shall be composed of three officers of experience in the Aviation Service and two medical officers, shall have examined him, under general regulations to be prescribed by the Secretary of War and published to the Army by the War Depart-

ment, and shall have reported him to be qualified for the rating. No person shall receive the rating of military aviator until he shall have served creditably for three years as an aviation officer with the rating of a junior military aviator.

"Each aviation officer authorized by this act shall, while on duty that requires him to participate regularly and frequently in aerial flights, receive an increase of 25 per cent in the pay of his grade and length of service under his commission. Each duly qualified junior military aviator shall, whole so serving, have the rank, pay, and allowances of one grade higher than that held by him under his commission if his rank under said commission be not higher than that of captain, and while on duty requiring him to participate regularly and frequently in aerial flights he shall receive in addition an increase of 50 per cent in the pay of his grade and length of service under his commission. Each military aviator shall, whole so serving, have the rank, pay, and allowances of one grade higher than that held by him under his commission if his rank under said commission be not higher than that of captain, and while on duty requiring him to participate regularly and frequently in aerial flights he shall receive in addition an increase of 75 per cent of the pay of his grade and length of service under his commission: *Provided further*, That the provisions of the act of March 2, 1913, allowing increase of pay and allowances to officers detailed by the Secretary of War on aviation duty are hereby repealed: *Provided further*, That hereafter married officers of the line of the Army shall be eligible equally with unmarried officers, and subject to the same conditions, for detail to aviation duty; and the Secretary of War shall have authority to cause as many enlisted men of the aviation section to be instructed in the art of flying as he may deem necessary: *Provided further*, That hereafter the age of officers shall not be a bar to their first detail in the aviation section of the Signal Corps, and neither their age nor their rank shall be a bar to their subsequent details in said section: *Provided further*, That when it shall be impracticable to obtain from the Army officers suitable for the aviation section of the Signal Corps in the number allowed by law the difference between that number and the number of suitable officers actually available for duty in said section may be made up by appointments in the grade of aviator, Signal Corps, and that grade is hereby created. The personnel for said grade shall be obtained from especially qualified civilians who shall be appointed and commissioned in said grade: *Provided further*, That whenever any aviator shall have become unsatisfactory he shall be discharged from the Army as such aviator. The base pay of an aviator, Signal Corps, shall be $150 per month, and he shall have the allowances of a master signal electrician and the same percentage of increase in pay for length of service as is allowed to a master signal electrician.

"The total enlisted strength of the Signal Corps shall be limited and fixed from time to time by the President in accordance with the needs of the Army, and shall consist of master signal electricians; sergeants, first class; sergeants; corporals; cooks; horseshoers; private, first class; and privates; the number in each grade being fixed from time to time by the President. The numbers in the various grades shall not exceed the following percentages of the total authorized enlisted strength of the Signal Corps, namely: Master signal electricians, 2 per cent; sergeants, first class, 7 per cent; sergeants, 10 per cent; corporals, 20 per cent. The number of privates, first class, shall not exceed 25 per cent of the number of privates. Authority is hereby given the President to organize, in his discretion, such part of the commissioned and enlisted personnel of the Signal Corps into such number of companies, battalions, and aero squadrons as the necessities of the service may demand.

"SEC. 14. Bureau of Insular Affairs of the War Department: Nothing in this act shall be construed to repeal existing laws relating to the organization of the Bureau of Insular Affairs of the War Department.

"SEC. 15. Chaplains: The President is authorized to appoint, by and with the advice and consent of the Senate, chaplains in the Army at the rate of not to exceed, including chaplains now in service, 1 for each regiment of Cavalry, Infantry, Field Artillery, and Engineers, and 1 for each 1,200 officers and men of the Coast Artillery Corps, with rank, pay, and allowances as now authorized by law: *Provided*, That in the appointments of chaplains in the Regular Army, preference and priority shall be given to applicant veterans, if otherwise duly qualified and who shall not have passed the age of 41 years at the time of application, who have rendered honorable war service in the Army of the United States or who have been honorably discharged from such Army.

"SEC. 16. Veterinarians: The President is hereby authorized, by and with the advice and consent of the Senate, to appoint veterinarians and assistant veterinarians in the Army, not to exceed, including veterinarians now in service, 2 such officers for each regiment of Cavalry, 1 for every three batteries of Field Artillery, 1 for each mounted battalion of Engineers, 17 as inspectors of horses and mules and as veterinarians in the Quartermaster Corps, and 7 as inspectors of meats for the Quartermaster Corps; and said veterinarians and assistant veterinarians shall be citizens of the United States and shall constitute the Veterinary Corps and shall be a part of the Medical Department of the Army.

"Hereafter a candidate for appointment as assistant veterinarian must be a citizen of the United States, between the ages of 21 and 27 years, a graduate of a recognized veterinary college or university, and shall not be appointed until he shall have passed a satisfactory examination as to character, physical condition, general education, and professional qualifications.

"An assistant veterinarian appointed under this act shall, for the first 5 years of service as such, have the rank, pay, and allowances of second lieutenant; that after 5 years of service he shall have the rank, pay, and allowances of first lieutenant; that after 15 years of service he shall be promoted to be a veterinarian with the rank, pay, and allowances of captain, and that after 20 years' service he shall have the rank, pay, and allowances of a major: *Provided*, That any assistant veterinarian, in order to be promoted as hereinbefore provided, must first pass a satisfactory examination, under such rules as the President may prescribe, as to professional qualifications and adaptability for the military service; and if such assistant veterinarian shall be found deficient at such examination he shall be discharged from the Army with one year's pay.

"The veterinarians of Cavalry and Field Artillery now in the Army, together with such veterinarians of the Quartermaster Corps as are now employed in said corps, who at the date of the approval of this act shall have had less than 5 years' governmental service, may be appointed in the Veterinary Corps as assistant veterinarians with the rank, pay, and allowances of second lieutenant; those who shall have had over 5 years of such service may be appointed in said corps as assistant veterinarians with the rank, pay, and allowances of first lieutenant; and those who shall have had over 15 years of such service may be appointed in said corps as veterinarians with the rank, pay, and allowances of captain: *Provided*, That no such appointment of any veterinarian shall be made unless he shall first pass satisfactorily a practical professional and physical examination as to his fitness for the military service: *Provided further*, That veterinarians now in the Army or in the employ of the Quartermaster Corps who shall fail to pass the prescribed physical examination because of disability incident to the service and sufficient to prevent them from the performance of duty valuable to the Government shall be placed upon the retired list of the Army with 75 per cent of the pay to which they would have been entitled if appointed in the Veterinary Corps as hereinbefore prescribed.

"The Secretary of War, upon recommendation of the Surgeon General of the Army, may appoint in the Veterinary Corps, for such time as their services may be required, such number of reserve veterinarians as may be necessary to attend public animals pertaining to the Quartermaster Corps. Reserve veterinarians so employed shall have the pay and allowances of second lieutenant during such employment and no longer: *Provided*, That such reserve veterinarians shall be graduates of a recognized veterinary college or university and shall pass a satisfactory examination as to character, physical condition, general education, and professional qualifications in like manner as hereinbefore required of assistant veterinarians; such reserve veterinarians shall constitute a list of eligibles for appointment as assistant veterinarians, subject to all the conditions hereinbefore prescribed for the appointment of assistant veterinarians.

"Within a limit of time to be fixed by the Secretary of War, candidates for appointment as assistant veterinarians who shall have passed satisfactorily the examinations prescribed for that grade by this act shall be appointed, in the order of merit in which they shall have passed such examination, to vacancies as they occur, such appointments to be for a probationary period of two years, after which time, if the services of the probationers shall have been satisfactory, they shall be permanently appointed with rank to date from the dates of rank of their probationary appointments. Probationary veterinarians whose services are found unsatisfactory shall be discharged at any time during the probationary period, or at the end thereof, and shall have no further claims against the Government on account of their probationary service.

"The Secretary of War shall from time to time appoint boards of examiners to conduct the veterinary examinations herein-

before prescribed, each of said boards to consist of three medical officers and two veterinarians.

"SEC. 17. Composition of Infantry units: Each regiment of Infantry shall consist of 1 colonel, 1 lieutenant colonel, 3 majors, 15 captains, 16 first lieutenants, 15 second lieutenants, 1 headquarters company, 1 machine-gun company, 1 supply company, and 12 Infantry companies organized into 3 battalions of 4 companies each.

"Each battalion shall consist of 1 major, 1 first lieutenant, mounted (battalion adjutant), and 4 companies. Each Infantry company in battalion shall consist of 1 captain, 1 first lieutenant, 1 second lieutenant, 1 first sergeant, 1 mess sergeant, 1 supply sergeant, 6 sergeants, 11 corporals, 2 cooks, 2 buglers, 1 mechanic, 19 privates (first class), and 56 privates.

"Each Infantry headquarters company shall consist of 1 captain, mounted (regimental adjutant); 1 regimental sergeant major, mounted; 3 battalion sergeants major, mounted; 1 first sergeant (drum major); 2 color sergeants; 1 mess sergeant; 1 supply sergeant; 1 stable sergeant; 1 sergeant; 2 cooks; 1 horseshoer; 1 band leader; 1 assistant band leader; 1 sergeant bugler; 2 band sergeants; 4 band corporals; 2 musicians, first class; 4 musicians, second class; 13 musicians, third class; 4 privates, first class, mounted; and 12 privates, mounted.

"Each Infantry machine-gun company shall consist of 1 captain, mounted; 1 first lieutenant, mounted; 2 second lieutenants, mounted; 1 first sergeant, mounted; 1 mess sergeant; 1 supply sergeant, mounted; 1 stable sergeant, mounted; 1 horseshoer; 5 sergeants; 6 corporals; 2 cooks; 2 buglers; 1 mechanic; 8 privates, first class; and 24 privates.

"Each Infantry supply company shall consist of 1 captain, mounted; 1 second lieutenant, mounted; 3 regimental supply sergeants, mounted; 1 first sergeant, mounted; 1 mess sergeant; 1 stable sergeant; 1 corporal, mounted; 1 cook; 1 saddler; 1 horseshoer; and 1 wagoner for each authorized wagon of the field and combat train: *Provided*, That the President may in his discretion increase a company of Infantry by 2 sergeants, 6 corporals, 1 cook, 1 mechanic, 9 privates (first class), and 31 privates; an Infantry machine-gun company by 2 sergeants, 2 corporals, 1 mechanic, 4 privates, first class, and 12 privates.

"The commissioned officers required for the Infantry headquarters, supply, and machine-gun companies and for the companies organized into battalions shall be assigned from those hereinbefore authorized.

"SEC. 18. Composition of Cavalry units: Each regiment of Cavalry shall consist of 1 colonel, 1 lieutenant colonel, 3 majors, 15 captains, 16 first lieutenants, 16 second lieutenants, 1 headquarters troop, 1 machine-gun troop, 1 supply troop, and 12 troops organized into 3 squadrons of 4 troops each.

"Each squadron shall consist of 1 major, 1 first lieutenant (squadron adjutant), and 4 troops. Each troop in squadron shall consist of 1 captain, 1 first lieutenant, 1 second lieutenant, 1 first sergeant, 1 mess sergeant, 1 supply sergeant, 1 stable sergeant, 5 sergeants, 8 corporals, 2 cooks, 2 horseshoers, 1 saddler, 2 buglers, 10 privates (first class), and 36 privates.

"Each headquarters troop shall consist of 1 captain (regimental adjutant), 1 regimental sergeant major, 3 squadron sergeants major, 1 first sergeant (drum major), 2 color sergeants, 1 mess sergeant, 1 supply sergeant, 1 stable sergeant, 1 sergeant, 2 cooks, 1 horseshoer, 1 saddler, 2 privates (first class), and 9 privates, 1 band leader, 1 assistant band leader, 1 sergeant bugler, 2 band sergeants, 4 band corporals, 2 musicians (first class), 4 musicians (second class), and 13 musicians (third class).

"Each machine-gun troop shall consist of 1 captain, 1 first lieutenant, 2 second lieutenants, 1 first sergeant, 1 mess sergeant, 1 supply sergeant, 1 stable sergeant, 2 horseshoers, 5 sergeants, 6 corporals, 2 cooks, 1 mechanic, 1 saddler, 2 buglers, 12 privates (first class), and 35 privates.

"Each supply troop shall consist of 1 captain (regimental supply officer), 2 second lieutenants, 3 regimental supply sergeants, 1 first sergeant, 1 mess sergeant, 1 stable sergeant, 1 corporal, 1 cook, 1 horseshoer, 1 saddler, and 1 wagoner for each authorized wagon of the field and combat train: *Provided*, That the President may, in his discretion, increase each troop of Cavalry by 10 privates (first class) and 25 privates; the headquarters troop by 2 sergeants, 5 corporals, 1 horseshoer, 5 privates (first class), and 18 privates; each machine-gun troop by 3 sergeants, 2 corporals, 1 mechanic, 1 private (first class), and 14 privates; each supply troop by 1 corporal, 1 cook, 1 saddler, and 1 horseshoer.

"The commissioned officers required for the Cavalry headquarters, supply, and machine-gun troops, and for the troops organized into squadrons, shall be assigned from those hereinbefore authorized.

"SEC. 19. Composition of Field Artillery units: The Field Artillery, including mountain artillery, light artillery, horse artillery, heavy artillery (field and siege types), shall consist of 126 gun or howitzer batteries organized into 21 regiments.

"In time of actual or threatened hostilities the President is authorized to organize such number of ammunition batteries and battalions, depot batteries and battalions, and such artillery parks with such numbers and grades of personnel and such organizations as he may deem necessary. The officers necessary for such organization shall be supplied from the Officers' Reserve Corps provided by this act and by temporary appointment as authorized by section 8 of the act of Congress approved April 25, 1914. The enlisted men necessary for such organizations shall be supplied from the Regular Army reserve provided by this act or from the Regular Army.

"Each regiment of Field Artillery shall consist of 1 colonel, 1 lieutenant colonel, 1 captain, 1 headquarters company, 1 supply company, and such number of gun and howitzer battalions as the President may direct. Nothing shall prevent the assembling, in the same regiment, of gun and howitzer battalions of different calibers and classes.

"Each gun or howitzer battery shall consist of 1 captain, 2 first lieutenants, 2 second lieutenants, 1 first sergeant, 1 supply sergeant, 1 stable sergeant, 1 mess sergeant, 6 sergeants, 13 corporals, 1 chief mechanic, 1 saddler, 2 horseshoers, 1 mechanic, 2 buglers, 3 cooks, 22 privates (first class), and 71 privates. When no enlisted men of the Quartermaster Corps are attached for such positions there shall be added to each battery of mountain artillery 1 packmaster (sergeant, first class), 1 assistant packmaster (sergeant), and 1 cargador (corporal).

"Each headquarters company of a regiment of two battalions shall consist of 1 captain, 1 first lieutenant, 1 regimental sergeant major, 2 battalion sergeants major, 1 first sergeant, 2 color sergeants, 1 mess sergeant, 1 supply sergeant, 1 stable sergeant, 2 sergeants, 9 corporals, 1 horseshoer, 1 saddler, 1 mechanic, 3 buglers, 2 cooks, 5 privates (first class), 15 privates, 1 band leader, 1 assistant band leader, 1 sergeant bugler, 2 band sergeants, 4 band corporals, 2 musicians (first class), 4 musicians (second class), and 13 musicians (third class). That when a regiment consists of three battalions there shall be added to the headquarters company 1 battalion sergeant major, 1 sergeant, 3 corporals, 1 bugler, 1 private (first class), and 5 privates. When no enlisted men of the Quartermaster Corps are attached for such positions there shall be added to each mountain artillery headquarters company 1 packmaster (sergeant, first class), 1 assistant packmaster (sergeant), and 1 cargador (corporal).

"Each supply company of a regiment of two battalions shall consist of 1 captain, 1 first lieutenant, 2 regimental supply sergeants, 1 first sergeant, 1 mess sergeant, 1 corporal, 1 cook, 1 horseshoer, 1 saddler, 2 privates, and 1 wagoner for each authorized wagon of the field train. When a regiment consists of three battalions there shall be added to the supply company 1 second lieutenant, 1 regimental supply sergeant, 1 private, and 1 wagoner for each additional authorized wagon of the field train.

"Each gun or howitzer battalion shall consist of 1 major, 1 captain, and batteries as follows: Mountain artillery battalions and light artillery gun or howitzer battalions serving with the field artillery of Infantry divisions shall contain three batteries; horse artillery battalions and heavy field artillery gun or howitzer battalions shall contain two batteries: *Provided*, That the President may, in his discretion, increase the headquarters company of a regiment of two battalions by 2 sergeants, 5 corporals, 1 horseshoer, 1 mechanic, 1 private (first class), and 6 privates; the headquarters company of a regiment of three battalions by 1 sergeant, 7 corporals, 1 horseshoer, 1 mechanic, 2 cooks, 2 privates (first class), and 7 privates; the supply company of a regiment of two battalions by 1 corporal, 1 cook, 1 horseshoer, and 1 saddler; the supply company for a regiment of three battalions by 1 corporal, 1 cook, 1 horseshoer, and 1 saddler; a gun or howitzer battery by 3 sergeants, 7 corporals, 1 horseshoer, 2 mechanics, 1 bugler, 13 privates (first class), and 37 privates.

"SEC. 20. Coast Artillery Corps: The Coast Artillery Corps shall consist of 1 Chief of Coast Artillery, with the rank of brigadier general; 24 colonels; 24 lieutenant colonels; 72 majors; 360 captains; 360 first lieutenants; 360 second lieutenants; 31 sergeants major, senior grade; 64 sergeants major, junior grade; 41 master electricians; 72 engineers; 99 electrician sergeants, first class; 275 assistant engineers; 99 electrician sergeants, second class; 106 firemen; 93 radio sergeants; 62 master gunners; 263 first sergeants; 263 supply sergeants; 263 mess sergeants; 2,104 sergeants; 3,156 corporals; 526 cooks; 526

mechanics; 526 buglers; 5,225 privates, first class; 15,675 privates; and 18 bands, organized as hereinbefore provided for the Engineer band. The rated men of the Coast Artillery Corps shall consist of casemate electricians; observers, first class; plotters; chief planters; coxswains; chief loaders; observers, second class; gun commanders and gun pointers. The total number of rated men shall not exceed 1,784. Coxswains shall receive $9 per month in addition to the pay of their grade.

"SEC. 21. Porto Rico Regiment of Infantry: The Porto Rico Regiment of Infantry of the United States Army shall hereafter have the same organization, and the same grades and numbers of commissioned officers and enlisted men, as are by this act or shall hereafter be prescribed by law for other regiments of Infantry of the Army. All vacancies created by this act or occurring hereafter in commissioned offices of said regiment above the grade of second lieutenant and below the grade of colonel shall, except as hereinafter provided to the contrary, be filled by promotion according to seniority in the several grades and within the regiment, subject to the examination prescribed by section 3 of the act of Congress approved October 1, 1890, and said section is hereby extended so as to apply in the cases of all officers below the grade of lieutenant colonel, who shall hereafter be examined for promotion in the Porto Rico Regiment of Infantry, except that the President may prescribe such a system of examination for the promotion of officers of said regiment as he may deem advisable.

"The colonel of said regiment shall be detailed by the President, from among officers of Infantry of the Army not below the grade of lieutenant colonel, for a period of four years unless sooner relieved. Vacancies created by this act in the grades of lieutenant colonel and major in said regiment shall be filled by appointments from the senior captains in regimental rank of the Porto Rico regiment mentioned in the act of March 4, 1915; and captains and lieutenants of said regiment shall also be eligible for such detached service, transfer, or assignment to duty with other organizations as may be approved by the Secretary of War; but vacancies created by such detachment of officers shall not be filled by promotions or appointments.

"All men hereafter enlisting in said regiment shall be natives of Porto Rico. All enlistments in the regiment shall hereafter be the same as is provided herein for the Regular Army, and the regiment, or any part thereof, may be ordered for service outside the island of Porto Rico. The pay and allowances of members of said regiment shall be the same as provided by law for officers and enlisted men of like grades in the Regular Army.

"Vacancies created by this act or occurring hereafter in the grade of second lieutenant in said regiment shall be filled during any calendar year by the appointment by the President, by and with the advice and consent of the Senate, of any native of Porto Rico graduated from the United States Military Academy, and, after such appointment shall have been made or provided for, by like appointment of native citizens of Porto Rico between 21 and 27 years of age.

"*Provided*, That officers of the Porto Rico Regiment of Infantry, United States Army, who held commissions in the Porto Rico Provisional Regiment of Infantry on June 30, 1908, shall now and hereafter take rank in their grades in the same relative order held by them in said Porto Rico Provisional Regiment of Infantry on June 30, 1908, subject to any loss in rank due to failure to pass examinations for promotion or to sentence of court-martial.

"SEC. 22. All existing laws pertaining to or affecting the United States Military Academy and civilian or military personnel on duty thereat in any capacity whatever, the officers and enlisted men on the retired list, the detached and additional officers under the act of Congress approved March 3, 1911, recruiting parties, recruit depots and unassigned recruits, service-school detachments, United States disciplinary barracks guards, disciplinary organizations, the Philippine Scouts, and Indian scouts shall continue and remain in force except as herein specifically provided otherwise.

"SEC. 23. Original appointments to be provisional: Hereafter all appointments of persons other than graduates of the United States Military Academy to the grade of second lieutenant in the Regular Army shall be provisional for a period of two years, at the close of which period such appointments shall be made permanent if the appointees shall have demonstrated, under such regulations as the President may prescribe, their suitability and moral, professional, and physical fitness for such permanent appointment, but should any appointee fail so to demonstrate his suitability and fitness, his appointment shall terminate; and should any officer become eligible for promotion to a vacancy in a higher grade and qualify therefor before the expiration of two years from the date of his original appointment, he shall receive a provisional appointment in such higher grade, which appointment shall be made permanent when he shall have qualified for permanent appointment upon the expiration of two years from the date of his original appointment, or shall terminate if he shall fail so to qualify.

"SEC. 24. Increase to be made in five increments: Except as otherwise specifically provided by this act, the increases in the commissioned and enlisted personnel of the Regular Army provided by this act shall be made in five annual increments, each of which shall be, in each grade of each arm, corps, and department, as nearly as practicable, one-fifth of the total increase authorized for each arm, corps, and department. Officers promoted to vacancies created or caused by the addition of the first increment shall be promoted to rank from July 1, 1916, and those promoted to vacancies created or caused by the second increment shall be promoted to rank from July 1, 1917; those promoted to vacancies created or caused by the addition of the third increment shall be promoted to rank from July 1, 1918; those promoted to vacancies created or caused by the addition of the fourth increment shall be promoted to rank from July 1, 1919; and those promoted to vacancies created or caused by the addition of the fifth increment shall be promoted to rank from July 1, 1920: *Provided*, That in the event of actual or threatened war or similar emergency in which the public safety demands it the President is authorized to immediately organize the entire increase authorized by this act, or so much thereof as he may deem necessary, and when, in the judgment of the President, war becomes imminent, all of said organizations that shall then be below the maximum enlisted strength authorized by law shall be raised forthwith to that strength, and shall be maintained as nearly as possible thereat so long as war, or the imminence of war, shall continue.

"Vacancies in the grade of second lieutenant, created or caused by the increases due to this act, in any fiscal year shall be filled by appointment in the following order: (1) Of cadets graduated from the United States Military Academy during the preceding fiscal year for whom vacancies did not become available during the fiscal year in which they were graduated; (2) under the provisions of existing law, of enlisted men, including officers of the Philippine Scouts, whose fitness for promotion shall have been determined by competitive examination; (3) of members of the Officers' Reserve Corps between the ages of 21 and 27 years; (4) of commissioned officers of the National Guard between the ages of 21 and 27 years; (5) of such honor graduates, between the ages of 21 and 27 years, of distinguished colleges as are now or may hereafter be entitled to preference by general orders of the War Department; and (6) of candidates from civil life between the ages of 21 and 27 years; and the President is authorized to make the necessary rules and regulations to carry these provisions into effect: *Provided*, That any such original vacancies not so filled, and remaining at the time of graduation of any class at the United States Military Academy, may be filled by the appointment of members of that class; and all vacancies in the grade of second lieutenant not created or caused by the increases due to this act shall be filled as provided in the act making appropriation for the support of the Army, approved March 3, 1911: *Provided further*, That enlisted men of the Regular Army who have completed one year's service with an organization may become candidates for vacancies in the grade of second lieutenant created or caused by the increases due to the operation of this act: *Provided further*, That appointments to the grade of second lieutenant in the Corps of Engineers, including those created by this act, shall continue to be made as now provided by law, but that officers of the Army or Navy of the United States may become candidates for said appointments under the provisions of section 5 of the act of Congress approved February 27, 1911, without previously vacating their commissions as officers and that the Secretary of War may, in his discretion, allow persons to become candidates without previously establishing eligibility for appointment as junior engineer under the Engineer Bureau of the War Department: *Provided further*, That officers appointed to original vacancies in the grade of second lieutenant created or caused by this act shall take lineal and relative rank according to dates of appointment, and the lineal and relative rank of second lieutenants appointed on the same date shall be determined under such regulations as the Secretary of War may prescribe: *Provided further*, That the President may recommission persons who have heretofore held commissions in the Regular Army and have left the service honorably, after ascertaining that they are qualified for service physically, morally, and as to age and military fitness; such recommissioned officers shall take rank at the foot of the respective grades which they held at the time of their separation from the Army: *Provided further*, That the provisions of existing law requiring examinations to determine fitness for promotion of

officers of the Army are hereby extended to include promotions to all grades below that of brigadier general: *Provided further*, That examinations of officers in the grades of major and lieutenant colonel shall be confined to problems involving the higher functions of staff duties and command: *And provided further*, That in time of war retired officers of the Army may be employed on active duty, in the discretion of the President, and when so employed they shall receive the full pay and allowances of their grade: *And provided further*, That hereafter any retired officer, who has been or shall be detailed on active duty, shall receive the rank, pay, and allowances of the grade, not above that of major, that he would have attained in due course of promotion if he had remained on the active list for a period beyond the date of his retirement equal to the total amount of time during which he has been detailed on active duty since his retirement.

"SEC. 25. The detached officers: That on July 1, 1916, the line of the Army shall be increased by 822 extra officers of the Cavalry, Field Artillery, Coast Artillery Corps, and Infantry arms of the service of grades from first lieutenant to colonel, inclusive, lawfully available for detachment from their proper arms for duty with the National Guard, or other duty, the usual period of which exceeds one year. Said extra officers, together with the 200 detached officers provided for by the act of Congress approved March 3, 1911, shall, on and after July 1, 1916, constitute the detached officers' list, and all positions vacated by officers assigned to said list, and the officers so assigned, shall be subject to the provisions of section 27 of the act of Congress approved February 2, 1901, with reference to details to the staff corps. The total number of officers hereby authorized for each grade on said list entire shall be in proportion to the total number of officers of the corresponding grade now authorized by law other than this act for all of the said four arms combined, exclusive of second lieutenants and of the 200 extra officers authorized by the act of Congress approved March 3, 1911, and exclusive also of the additional officers authorized by the act to restore lineal rank lost through the system of regimental promotion formerly in force; and the total number of officers hereby authorized for each grade in each of said arms on said list shall be in the proportion borne by the number of officers now authorized by law other than this act for such grade and arm to the total number of officers now authorized by law other than this act for the corresponding grade in all of the said four arms combined, exclusive of the extra and additional officers last hereinbefore specified and excluded: *Provided*, That all vacancies created or caused by the foregoing provisions of this section in grades above that of second lieutenant shall be filled by promotion according to law existing on and before the date of approval of this act, and subject to the examinations prescribed by existing law. As soon as practicable after such promotions shall have been made, there shall be detached from each arm and assigned to the Detached Officers' List a number of officers of each grade equal to the number of officers of said grade by which said arm shall have been increased by the foregoing provisions of this section; and thereafter any vacancy created or caused in any of the said arms of the service by the assignment of an officer of any grade to said Detached Officers' List shall be filled, subject to such examination as is now or may hereafter be prescribed by law, by the promotion of the officer who shall be the senior in length of commissioned service of those eligible to promotion in the next lower grade in the arm in which such vacancy shall occur: *Provided further*, That no officer of any of said arms of the service shall be permitted to remain on said Detached Officers' List for more than 45 days unless he shall have been actually present for duty for at least two years out of the last preceding six years with an organization composed of one or more statutory units, or the equivalent thereof, of the arm to which he shall belong. Any vacancy created in said list by the removal of any officer therefrom because he shall not have been present for duty as before prescribed in this proviso shall be filled by the transfer to said list of an officer having the same grade and belonging to the same arm as the officer whose removal from said list shall have created said vacancy; but, except as before prescribed in this proviso, all officers who shall have been assigned to said list shall remain thereon for not less than four years from the respective dates of their assignment thereto, unless in the meantime they shall have been separated entirely from the Army, or shall have been promoted or appointed to higher offices, or shall have been retired from active service: *Provided further*, That after the apportionment of officers to said Detached Officers' List shall have been made as authorized by this Act, whenever any vacancy shall have been caused in said list by the separation of an officer of any grade therefrom, such vacancy shall, except as prescribed in the last preceding proviso, be filled by the detail and assignment to said list of an officer of the corresponding grade in that arm in which there shall be found the officer of the next lower grade who at that time shall be the senior in length of commissioned service of all the officers of the said lower grade in all of the four arms hereinbefore specified; if two or more officers of different arms shall be found to have equal seniority in length of commissioned service in said lower grade, the question of seniority shall be decided by their relative standing on the list of the commissioned officers of the Army: *Provided further*, That, with a view further to equalize inequalities in past promotions of officers of the line of the Army, on July 1, 1916, the Cavalry shall be increased by 17 colonels and the Infantry by 4 colonels, all of whom shall be additional officers in that grade, and shall not bar nor retard the promotion to which any officer would be entitled if the appointment of the said additional officers had never been authorized; and after July 1, 1919, no vacancies occurring among the said additional officers shall be filled, and the offices so vacated shall cease and determine: *And provided further*, That for the purpose of lessening as much as possible inequalities of promotion due to the increase in the number of officers of the line of the Army under the provisions of this act any vacancies created or caused by this act in commissioned grades below that of lieutenant colonel in any arm of said line may, in the discretion of the President and under such regulations as he may prescribe in furtherance of the purpose stated in this proviso, be filled by the promotion or transfer without promotion of officers of other branches of the line of the Army; but no such promotion or transfer shall be made in the case of any officer unless it shall have been recommended by an examining board composed of five officers, senior in rank to such officer, and of the arm to which the promotion or transfer of such officer shall have been proposed, who, after having made a personal examination of such officer and of his official record, shall have reported him qualified for service in said arm in the grade to which his promotion or transfer shall have been proposed.

"SEC. 26. Retirement of officers of Philippine Scouts: Captains and lieutenants of Philippine Scouts who are citizens of the United States shall hereafter be entitled to retirement under the laws governing the retirement of enlisted men of the Regular Army, except that they shall be retired in the grade held by them at the date of retirement, shall be entitled to retirement for disability under the same conditions as officers of the Regular Army, and that they shall receive, as retired pay, the amounts allowed by law, as retired pay and allowances, of master signal electricians of the United States Army, and no more: *Provided*, That double time for service beyond the continental limits of the United States shall not be counted for the purposes of this section so as to reduce the actual period of service below 20 years: *Provided*, That former officers of the Philippine Scouts who, because of disability occasioned by wounds received in action, have resigned or been discharged from the service, or who have heretofore served as such for a period of more than five years and have been retired as enlisted men, shall be placed upon the retired list as officers of Philippine Scouts and thereafter receive the retired pay and allowances provided by this section for other officers of Philippine Scouts: *And provided further*, That any former officer of Philippine Scouts who vacated his office in the Philippine Scouts by discharge or resignation on account of disability contracted in the line of duty and who was subsequently retired as an enlisted man, except any former officer of Philippine Scouts who has been retired as an enlisted man by special act of Congress, shall be transferred to the retired list created by this section and shall thereafter receive the retired pay and allowances authorized by this section, and no more. Officers of Philippine Scouts retired under the provisions of this section shall not form part of the limited retired list now authorized by law.

"SEC. 27. Enlistments in the Regular Army: On and after the 1st day of November, 1916, all enlistments in the Regular Army shall be for a term of seven years, the first three years to be in the active service with the organizations of which those enlisted form a part and, except as otherwise provided herein, the last four years in the Regular Army Reserve hereinafter provided for: *Provided*, That at the expiration of three years' continuous service with such organizations, either under a first or any subsequent enlistment, any soldier may be reenlisted for another period of seven years, as above provided for, in which event he shall receive his final discharge from his prior enlistment: *Provided further*, That after the expiration of one year's honorable service any enlisted man serving within the continental limits of the United States whose company, troop, battery, or detachment commander shall report him as proficient and sufficiently trained

may, in the discretion of the Secretary of War, be furloughed to the Regular Army Reserve under such regulations as the Secretary of War may prescribe, but no man furloughed to the reserve shall be eligible to reenlist in the service until the expiration of his term of seven years: *Provided further*, That in all enlistments hereafter accomplished under the provisions of this act three years shall be counted as an enlistment period in computing continuous-service pay: *Provided further*, That any noncommissioned officer discharged with an excellent character shall be permitted, at the expiration of three years in the active service, to reenlist in the organization from which discharged with the rank and grade held by him at the time of his discharge if he reenlists within 20 days after the date of such discharge: *Provided further*, That no person under the age of 18 years shall be enlisted or mustered into the military service of the United States without the written consent of his parents or guardians, provided that such minor has such parents or guardians entitled to his custody and control: *And provided further*, That the President is authorized in his discretion to utilize the services of postmasters of the second, third, and fourth classes in procuring the enlistment of recruits for the Army, and for each recruit accepted for enlistment in the Army the postmaster procuring his enlistment shall receive the sum of $5.

"In addition to military training, soldiers while in the active service shall hereafter be given the opportunity to study and receive instruction upon educational lines of such character as to increase their military efficiency and enable them to return to civil life better equipped for industrial, commercial, and general business occupations. Civilian teachers may be employed to aid the Army officers in giving such instruction, and part of this instruction may consist of vocational education either in agriculture or the mechanic arts. The Secretary of War, with the approval of the President, shall prescribe rules and regulations for conducting the instruction herein provided for, and the Secretary of War shall have the power at all times to suspend, increase, or decrease the amount of such instruction offered as may in his judgment be consistent with the requirements of military instruction and service of the soldiers.

"SEC. 28. Pay of certain enlisted men: Hereafter the monthly pay of enlisted men of certain grades of the Army created in this act shall be as follows, namely: Quartermaster sergeant, senior grade, Quartermaster Corps; master hospital sergeant, Medical Department; master engineer, senior grade, Corps of Engineers; and band leader, Infantry, Cavalry, Artillery, and Corps of Engineers, $75; hospital sergeant, Medical Department; and master engineer, junior grade, Corps of Engineers, $65; sergeant, first class, Medical Department, $50; sergeant, first class, Corps of Engineers; regimental supply sergeant, Infantry, Cavalry, Field Artillery, and Corps of Engineers; battalion supply sergeant, Corps of Engineers; and assistant engineer, Coast Artillery Corps, $45; assistant band leader, Infantry, Cavalry, Artillery, and Corps of Engineers; and sergeant bugler, Infantry, Cavalry, Artillery, and Corps of Engineers, $40; musician, first class, Infantry, Cavalry, Artillery, and Corps of Engineers; supply sergeant, mess sergeant, and stable sergeant, Corps of Engineers; sergeant Medical Department, $36; supply sergeant, Infantry, Cavalry, and Artillery; mess sergeant, Infantry, Cavalry, and Artillery; cook, Medical Department; horseshoer, Infantry, Cavalry, Artillery, Corps of Engineers, Signal Corps, and Medical Department; stable sergeant, Infantry and Cavalry; radio sergeant, Coast Artillery Corps; and musicians, second class, Infantry, Cavalry, Artillery, and Corps of Engineers, $30; musician, third class, Infantry, Cavalry, Artillery, and Corps of Engineers; corporal, Medical Department, $24; saddler, Infantry, Cavalry, Field Artillery, Corps of Engineers, and Medical Department; mechanic, Infantry, Cavalry, and Field Artillery, and Medical Department; farrier, Medical Department; and wagoner, Infantry, Field Artillery, and Corps of Engineers, $21; private, first class, Infantry, Cavalry, Artillery, and Medical Department, $18; private, Medical Department, and bugler, $15. Nothing herein contained shall operate to reduce the pay or allowances now authorized by law for any grade of enlisted men of the Army.

"SEC. 29. Final discharge of enlisted men: No enlisted man in the Regular Army shall receive his final discharge until the termination of his seven-year term of enlistment except upon reenlistment as provided for in this act or as provided by law for discharge prior to expiration of term of enlistment, but when an enlisted man is furloughed to the Regular Army Reserve his account shall be closed and he shall be paid in full to the date such furlough becomes effective, including allowances provided by law for discharged soldiers: *Provided*, That when by reason of death or disability of a member of the family of an enlisted man occurring after his enlistment members of his family become dependent upon him for support, he may, in the discretion of the Secretary of War, be discharged from the service of the United States or be furloughed to the Regular Army Reserve, upon due proof being made of such condition: *Provided further*, That when an enlisted man is discharged by purchase while in active service he shall be furloughed to the Regular Army Reserve, unless, in the discretion of the Secretary of War, he is given a final discharge from the Army.

"SEC. 30. Composition of the Regular Army Reserve: The Regular Army Reserve shall consist of, first, all enlisted men now in the Army Reserve or who shall hereafter become members of the Army Reserve under the provisions of existing law; second, all enlisted men furloughed to or enlisted in the Regular Army Reserve under the provisions of this act; and, third, any person holding an honorable discharge from the Regular Army with character reported at least good who is physically qualified for the duties of a soldier and not over forty-five years of age who enlists in the Regular Army Reserve for a period of four years.

"SEC. 31. The President is authorized to assign members of the Regular Army Reserve as reserves to particular organizations of the Regular Army, or to organize the Regular Army Reserve, or any part thereof, into units or detachments of any arm, corps, or department in such manner as he may prescribe, and to assign to such units and detachments officers of the Regular Army or of the Officers' Reserve Corps herein provided for; and he may summon the Regular Army Reserve, or any part thereof, for field training for a period not exceeding 15 days in each year, the reservists to receive travel expenses and pay at the rate of their respective grades in the Regular Army during such periods of training; and in the event of actual or threatened hostilities he may mobilize the Regular Army Reserve in such manner as he may determine, and thereafter retain it, or any part thereof, in active service for such period as he may determine the conditions demand: *Provided*, That all enlistments in the Regular Army, including those in the Regular Army Reserve, which are in force on the date of the outbreak of war shall continue in force for one year, unless sooner terminated by order of the Secretary of War, but nothing herein shall be construed to shorten the time of enlistment prescribed: *Provided further*, That subject to such regulations as the President may prescribe for their proper identification, and location, and physical condition, the members of the Regular Army Reserve shall be paid semiannually at the rate of $24 a year while in the reserve.

"SEC. 32. Regular Army Reserve in time of war: When mobilized by order of the President, the members of the Regular Army Reserve shall, so long as they may remain in active service, receive the pay and allowances of enlisted men of the Regular Army of like grades: *Provided*, That any enlisted man who shall have reenlisted in the Regular Army Reserve shall receive during such active service the additional pay now provided by law for enlisted men in his arm of the service in the second enlistment period: *Provided further*, That upon reporting for duty, and being found physically fit for service, members of the Regular Army Reserve shall receive a sum equal to $3 per month for each month during which they shall have belonged to the reserve, as well as the actual necessary cost of transportation and subsistence from their homes to the places at which they may be ordered to report for duty under such summons: *And provided further*, That service in the Regular Army Reserve shall confer no right to retirement or retired pay, and members of the Regular Army Reserve shall become entitled to pension only through disability incurred while on active duty in the service of the United States.

"SEC. 33. Use of other departments of the Government: The President may, subject to such rules and regulations as in his judgment may be necessary, utilize the services of members and employees of all departments of the Government of the United States, without expense to the individual reservist, for keeping in touch with, paying, and mobilizing the Regular Army Reserve, the Enlisted Reserve Corps, and other reserve organizations.

"SEC. 34. Reenlistment in time of war: For the purpose of utilizing as an auxiliary to the Regular Army Reserve the services of men who have had experience and training in the Regular Army or in the United States Volunteers outside of the continental limits of the United States, in time of actual or threatened hostilities, and after the President shall, by proclamation, have called upon honorably discharged soldiers of the Regular Army to present themselves for reenlistment therein within a specified period, subject to such conditions as may be prescribed, any person who shall have been discharged honorably from said Army, with character reported as at least good, and who, having been found physically qualified for the duties of a soldier, if not over 50 years of age, shall reenlist

in the line of said Army, or in the Signal, Quartermaster, or Medical Department thereof, within the period that shall be specified in said proclamation, shall receive on so reenlisting a bounty which shall be computed at the rate of $8 for each month for the first year of the period that shall have elapsed since his last discharge from the Regular Army and the date of his reenlistment therein under the terms of said proclamation; at the rate of $6 per month for the second year of such period; at the rate of $4 per month for the third year of such period; and at the rate of $2 per month for any subsequent year of such period; but no bounty in excess of $300 shall be paid to any person under the terms of this section.

"SEC. 35. Enlisted men prohibited from civil employment: Hereafter no enlisted man in the active service of the United States in the Army, Navy, and Marine Corps, respectively, whether a noncommissioned officer, musician, or private, shall be detailed, ordered, or permitted to leave his post to engage in any pursuit, business, or performance in civil life, for emolument, hire, or otherwise, when the same shall interfere with the customary employment and regular engagement of local civilians in the respective arts, trades, or professions.

"SEC. 36. Sergeants for duty with the National Guard: For the purpose of assisting in the instruction of the personnel and care of property in the hands of the National Guard the Secretary of War is authorized to detail from the Infantry, Cavalry, Field Artillery, Corps of Engineers, Coast Artillery Corps, Medical Department, and Signal Corps of the Regular Army not to exceed one thousand sergeants for duty with corresponding organizations of the National Guard and not to exceed one hundred sergeants for duty with the disciplinary organizations at the United States Disciplinary Barracks, who shall be additional to the sergeants authorized by this Act for the corps, companies, troops, batteries, and detachments from which they may be detailed.

"SEC. 37. The Officers' Reserve Corps: For the purpose of securing a reserve of officers available for service as temporary officers in the Regular Army, as provided for in this act and in section 8 of the act approved April 25, 1914, as officers of the Quartermaster Corps and other staff corps and departments, as officers for recruit rendezvous and depots, and as officers of Volunteers, there shall be organized, under such rules and regulations as the President may prescribe not inconsistent with the provisions of this act, an Officers' Reserve Corps of the Regular Army. Said corps shall consist of sections corresponding to the various arms, staff corps, and departments of the Regular Army. Except as otherwise herein provided, a member of the Officers' Reserve Corps shall not be subject to call for service in time of peace, and whenever called upon for service shall not, without his consent be so called in a lower grade than that held by him in said reserve corps.

"The President alone shall be authorized to appoint and commission as reserve officers in the various sections of the Officers' Reserve Corps, in all grades up to and including that of major, such citizens as, upon examination prescribed by the President, shall be found physically, mentally, and morally qualified to hold such commissions: *Provided*, That the proportion of officers in any section of the Officers' Reserve Corps shall not exceed the proportion for the same grade in the corresponding arm, corps, or department of the Regular Army, except that the number commissioned in the lowest authorized grade in any section of the Officers' Reserve Corps shall not be limited.

"That all persons now carried as duly qualified and registered pursuant to section 23 of the act of Congress approved January 21, 1903, shall, for a period of three years after the passage of this act, be eligible for appointment in the Officers' Reserve Corps in the section corresponding to the arm, corps, or department for which they have been found qualified, without further examination, except a physical examination, and subject to the limitations as to age and rank herein prescribed: *Provided*, That any person carried as qualified and registered in the grade of colonel or lieutenant colonel pursuant to the provisions of said act on the date when this act becomes effective may be commissioned and recommissioned in the Officers' Reserve Corps with the rank for which he has been found qualified and registered, but when such person thereafter shall become separated from the Officers' Reserve Corps for any reason the vacancy so caused shall not be filled, and such office shall cease and determine.

"No person shall, except as hereinafter provided, be appointed or reappointed a second lieutenant in the Officers' Reserve Corps after he shall have reached the age of 32 years, a first lieutenant after he shall have reached the age of 36 years, a captain after he shall have reached the age of 40 years, or a major after he shall have reached the age of 45 years. When an officer of the Reserve Corps shall reach the age limit fixed for appointment or reappointment in the grade in which commissioned he shall be honorably discharged from the service of the United States, and be entitled to retain his official title and, on occasions of ceremony, to wear the uniform of the highest grade he shall have held in the Officers' Reserve Corps: *Provided*, That nothing in the foregoing provisions as to the ages of officers shall apply to the appointment or reappointment of officers of the Quartermaster, Engineer, Ordnance, Signal, Judge Advocate, and Medical sections of said Reserve Corps.

"One year after the passage of this act the Medical Reserve Corps, as now constituted by law, shall cease to exist. Members thereof may be commissioned in the Officers' Reserve Corps, subject to the provisions of this Act, or may be honorably discharged from the service. The Secretary of War may, in time of peace, order first lieutenants of the medical section of the Officers' Reserve Corps, with their consent, to active duty in the service of the United States in such numbers as the public interests may require and the funds appropriated may permit, and may relieve them from such duty when their services are no longer necessary. While on such duty they shall receive the pay and allowances, including pay for periods of sickness and leaves of absence, of officers of corresponding rank and length of active service in the Regular Army.

"The commissions of all officers of the Officers' Reserve Corps shall be in force for a period of five years unless sooner terminated in the discretion of the President. Such officers may be recommissioned, either in the same or higher grades, for successive periods of five years, subject to such examinations and qualifications as the President may prescribe and to the age limits prescribed herein: *Provided*, That officers of the Officers' Reserve Corps shall have rank therein in the various sections of said Reserve Corps according to grades and to length of service in their grades.

"SEC. 38. The Officers' Reserve Corps in war: In time of actual or threatened hostilities the President may order officers of the Officers' Reserve Corps, subject to such subsequent physical examinations as he may prescribe, to temporary duty with the Regular Army in grades thereof which can not, for the time being, be filled by promotion, or as officers in volunteer or other organizations that may be authorized by law, or as officers at recruit rendezvous and depots, or on such other duty as the President may prescribe. While such reserve officers are on such service they shall, by virtue of their commissions as reserve officers, exercise command appropriate to their grade and rank in the organizations to which they may be assigned, and shall be entitled to the pay and allowances of the corresponding grades in the Regular Army, with increase of pay for length of active service, as allowed by law for officers of the Regular Army, from the date upon which they shall be required by the terms of their orders to obey the same: *Provided*, That officers so ordered to active service shall take temporary rank among themselves, and in their grades in the organizations to which assigned, according to the dates of orders placing them on active service; and they may be promoted, in accordance with such rank, to vacancies in volunteer organizations or to temporary vacancies in the Regular Army thereafter occurring in the organizations in which they shall be serving: *Provided further*, That officers of the Officers' Reserve Corps shall not be entitled to retirement or retired pay, and shall be entitled to pension only for disability incurred in the line of duty and while in active service.

"Any officer who, while holding a commission in the Officers' Reserve Corps, shall be ordered to active service by the Secretary of War shall, from the time he shall be required by the terms of his order to obey the same, be subject to the laws and regulations for the government of the Army of the United States, in so far as they are applicable to officers whose permanent retention in the military service is not contemplated.

"SEC. 39. Instruction of officers of the Officers' Reserve Corps: To the extent provided for from time to time by appropriations for this specific purpose, the Secretary of War is authorized to order reserve officers to duty with troops or at field exercises, or for instruction, for periods not to exceed fifteen days in any one calendar year, and while so serving such officers shall receive the pay and allowances of their respective grades in the Regular Army: *Provided*, That, with the consent of the reserve officers concerned, and within the limit of funds available for the purpose, such periods of duty may be extended for reserve officers as the Secretary of War may direct: *Provided further*, That in time of actual or threatened hostilities, after all available officers of any section of the Officers' Reserve Corps corresponding to any arm, corps, or department of the Regular Army shall have been ordered into active service, officers of Volunteers may be appointed in such arm, corps, or

department as may be authorized by law: *Provided further*, That nothing herein shall operate to prevent the appointment of any officer of the Regular Army as an officer of Volunteers before all the officers of the Officers' Reserve Corps or any section thereof shall have been ordered into active service: *And provided further*, That in determining the relative rank and the right to retirement of an officer of the Regular Army, active duty performed by him while serving in the Officers' Reserve Corps shall not be reckoned.

"SEC. 40. The Reserve Officers' Training Corps: The President is hereby authorized to establish and maintain in civil educational institutions a Reserve Officers' Training Corps, which shall consist of a senior division organized at universities and colleges requiring four years of collegiate study for a degree, including State universities and those State institutions that are required to provide instruction in military tactics under the provisions of the act of Congress of July 2, 1862, donating lands for the establishment of colleges where the leading object shall be practical instruction in agriculture and the mechanic arts, including military tactics, and a junior division organized at all other public or private educational institutions, except that units of the senior division may be organized at those essentially military schools which do not confer an academic degree but which, as a result of the annual inspection of such institutions by the War Department, are specially designated by the Secretary of War as qualified for units of the senior division, and each division shall consist of units of the several arms or corps in such number and of such strength as the President may prescribe.

"SEC. 41. The President may, upon the application of any State institution described in section 40 of this act, establish and maintain at such institution one or more units of the Reserve Officers' Training Corps: *Provided*, That no such unit shall be established or maintained at any such institution until an officer of the Army shall have been detailed as professor of military science and tactics, nor until such institution shall maintain under military instruction at least 100 physically fit male students.

"SEC. 42. The President may, upon the application of any established educational institution in the United States other than a State institution described in section 40 of this act, the authorities of which agree to establish and maintain a two years' elective or compulsory course of military training as a minimum for its physically fit male students, which course when entered upon by any student shall, as regards such student, be a prerequisite for graduation, establish and maintain at such institution one or more units of the Reserve Officers' Training Corps: *Provided*, That no such unit shall be established or maintained at any such institution until an officer of the Army shall have been detailed as professor of military science and tactics, nor until such institution shall maintain under military instruction at least 100 physically fit male students.

"SEC. 43. The Secretary of War is hereby authorized to prescribe standard courses of theoretical and practical military training for units of the Reserve Officers' Training Corps, and no unit of the senior division shall be organized or maintained at any educational institution the authorities of which fail or neglect to adopt into their curriculum the prescribed courses of military training for the senior division or to devote at least an average of three hours per week per academic year to such military training; and no unit of the junior division shall be organized or maintained at any educational institution the authorities of which fail or neglect to adopt into their curriculum the prescribed courses of military training for the junior division, or to devote at least an average of three hours per week per academic year to such military training.

"SEC. 44. Eligibility to membership in the Reserve Officers' Training Corps shall be limited to students of institutions in which units of such corps may be established who are citizens of the United States, who are not less than 14 years of age, and whose bodily condition indicates that they are physically fit to perform military duty, or will be so upon arrival at military age.

"SEC. 45. The President is hereby authorized to detail such numbers of officers of the Army, either active or retired, not above the grade of colonel, as may be necessary, for duty as professors and assistant professors of military science and tactics at institutions where one or more units of the Reserve Officers' Training Corps are maintained; but the total number of active officers so detailed at educational institutions shall not exceed 300, and no active officer shall be so detailed who has not had five years' commissioned service in the Army. In time of peace retired officers shall not be detailed under the provisions of this section without their consent. Retired officers below the grade of lieutenant colonel so detailed shall receive the full pay and allowances of their grade, and retired officers above the grade of major so detailed shall receive the same pay and allowances as a retired major would receive under a like detail. No detail of officers on the active list of the Regular Army under the provisions of this section shall extend for more than four years.

"SEC. 46. The President is hereby authorized to detail for duty at institutions where one or more units of the Reserve Officers' Training Corps are maintained such number of enlisted men, either active or retired or of the Regular Army Reserve, as he may deem necessary, but the number of active noncommissioned officers so detailed shall not exceed 500, and all active noncommissioned officers so detailed shall be additional in their respective grades to those otherwise authorized for the Army. Retired enlisted men or members of the Regular Army Reserve shall not be detailed under the provisions of this section without their consent. While so detailed they shall receive active pay and allowances.

"SEC. 47. The Secretary of War, under such regulations as he may prescribe, is hereby authorized to issue to institutions at which one or more units of the Reserve Officers' Training Corps are maintained such public animals, arms, uniforms, equipment, and means of transportation as he may deem necessary, and to forage at the expense of the United States public animals so issued. He shall require from each institution to which property of the United States is issued a bond in the value of the property issued for the care and safe-keeping thereof, and for its return when required.

"SEC. 48. The Secretary of War is hereby authorized to maintain camps for the further practical instruction of the members of the Reserve Officers' Training Corps, no such camps to be maintained for a period longer than six weeks in any one year, except in time of actual or threatened hostilities; to transport members of such corps to and from such camps at the expense of the United States so far as appropriations will permit; to subsist them at the expense of the United States while traveling to and from such camps and while remaining therein so far as appropriations will permit; to use the Regular Army, such other military forces as Congress from time to time authorizes, and such Government property as he may deem necessary for the military training of the members of such corps while in attendance at such camps; to prescribe regulations for the government of such corps; and to authorize, in his discretion, the formation of company units thereof into battalion and regimental units.

"SEC. 49. The President alone, under such regulations as he may prescribe, is hereby authorized to appoint in the Officers' Reserve Corps any graduate of the senior division of the Reserve Officers' Training Corps who shall have satisfactorily completed the further training provided for in section 50 of this act, or any graduate of the junior division who shall have satisfactorily completed the courses of military training prescribed for the senior division and the further training provided for in section 50 of this act, and shall have participated in such practical instruction subsequent to graduation as the Secretary of War shall prescribe, who shall have arrived at the age of 21 years and who shall agree, under oath in writing, to serve the United States in the capacity of a reserve officer of the Army during a period of at least 10 years from the date of his appointment as such reserve officer, unless sooner discharged by proper authority; but the total number of reserve officers so appointed shall not exceed 50,000: *Provided*, That any graduate qualified under the provisions of this section undergoing a postgraduate course at any institution shall not be eligible for appointment as a reserve officer while undergoing such postgraduate course, but his ultimate eligibility upon completion of such postgraduate course for such appointment shall not be affected because of his having undergone such postgraduate course.

"SEC. 50. When any member of the senior division of the reserve Officers' Training Corps has completed two academic years of service in that division, and has been selected for further training by the president of the institution and by its professor of military science and tactics, and has agreed in writing to continue in the Reserve Officers' Training Corps for the remainder of his course in the institution, devoting five hours per week to the military training prescribed by the Secretary of War, and has agreed in writing to pursue the courses in camp training prescribed by the Secretary of War, he may be furnished, at the expense of the United States, with commutation of subsistence at such rate, not exceeding the cost of the garrison ration prescribed for the Army, as may be fixed by the Secretary of War, during the remainder of his service in the Reserve Officers' Training Corps.

"SEC. 51. Any physically fit male citizen of the United States, between the ages of 21 and 27 years, who shall have

graduated prior to the date of this act from any educational institution at which an officer of the Army was detailed as professor of military science and tactics, and who, while a student at such institution, completed courses of military training under the direction of such professor of military science and tactics substantially equivalent to those prescribed pursuant to this act for the senior division, shall, after satisfactorily completing such additional practical military training as the Secretary of War shall prescribe, be eligible for appointment to the Officers' Reserve Corps and as a temporary additional second lieutenant in accordance with the terms of this act.

"SEC. 52. The President alone is hereby authorized to appoint and commission as a temporary second lieutenant of the Regular Army in time of peace for purposes of instruction, for a period not exceeding six months, with the allowances now provided by law for that grade, but with pay at the rate of $100 per month, any reserve officer appointed pursuant to sections 49 and 51 of this act and to attach him to a unit of the Regular Army for duty and training during the period covered by his appointment as such temporary second lieutenant, and upon the expiration of such service with the Regular Army such officer shall revert to his status as a reserve officer.

"SEC. 53. No reserve officer or temporary second lieutenant appointed pursuant to this act shall be entitled to retirement or to retired pay and shall be eligible for pension only for disability incurred in line of duty in active service or while serving with the Regular Army pursuant to the provisions of this act: *Provided*, That in time of war the President may order reserve officers appointed under the provisions of this act to active duty with any of the military forces of the United States in any grades not below that of second lieutenant, and while on such active duty they shall be subject to the Rules and Articles of War: *And provided further*, That The Adjutant General of the Army shall, under the direction and supervision of the Secretary of War, obtain, compile, and keep continually up to date all obtainable information as to the names, ages, addresses, occupations, and qualifications for appointment as commissioned officers of the Army, in time of war or other emergency, of men of suitable ages who, by reason of having received military training in civilian educational institutions or elsewhere, may be regarded as qualified and available for appointment as such commissioned officers.

"SEC. 54. Training camps: The Secretary of War is hereby authorized to maintain, upon military reservations or elsewhere, camps for the military instruction and training of such citizens as may be selected for such instruction and training, upon their application and under such terms of enlistment and regulations as may be prescribed by the Secretary of War; to use, for the purpose of maintaining said camps and imparting military instruction and training thereat, such arms, ammunition, accouterments, equipments, tentage, field equipage, and transportation belonging to the United States as he may deem necessary; to furnish, at the expense of the United States, uniforms, subsistence, transportation by the most usual and direct route within such limits as to territory as the Secretary of War may prescribe, and medical supplies to persons receiving instruction at said camps during the period of their attendance thereat, to authorize such expenditures, from proper Army appropriations, as he may deem necessary for water, fuel, light, temporary structures, not including quarters for officers nor barracks for men, screening, and damages resulting from field exercises, and other expenses incidental to the maintenance of said camps, and the theoretical winter instruction in connection therewith; and to sell to persons receiving instruction at said camps, for cash and at cost price plus 10 per cent, quartermaster and ordnance property, the amount of such property sold to any one person to be limited to that which is required for his proper equipment. All moneys arising from such sales shall remain available throughout the fiscal year following that in which the sales are made, for the purpose of that appropriation from which the property sold was authorized to be supplied at the time of the sale. The Secretary of War is authorized further to prescribe the courses of theoretical and practical instruction to be pursued by persons attending the camps authorized by this section; to fix the periods during which such camps shall be maintained; to prescribe rules and regulations for the government thereof; and to employ thereat officers and enlisted men of the Regular Army in such numbers and upon such duties as he may designate.

"SEC. 55. The Enlisted Reserve Corps: For the purpose of securing an additional reserve of enlisted men for military service with the Engineer, Signal, and Quartermaster Corps and the Ordnance and Medical Departments of the Regular Army, an Enlisted Reserve Corps, to consist of such number of enlisted men of such grade or grades as may be designated by the President from time to time, is hereby authorized, such authorization to be effective on and after the 1st day of July, 1916.

"There may be enlisted in the grade or grades hereinbefore specified, for a period of four years, under such rules as may be prescribed by the President, citizens of the United States, or persons who have declared their intentions to become citizens of the United States, subject to such physical, educational, and practical examination as may be prescribed in said rules. For men enlisting in said grade or grades certificates of enlistment in the Enlisted Reserve Corps shall be issued by The Adjutant General of the Army, but no such man shall be enlisted in said corps unless he shall be found physically, mentally, and morally qualified to hold such certificate and unless he shall be between the ages of 18 and 45 years. The certificates so given shall confer upon the holders when called into active service or for purposes of instruction and training, and during the period of such active service, instruction, or training, all the authority, rights, and privileges of like grades of the Regular Army. Enlisted men of the Enlisted Reserve Corps shall take precedence in said corps according to the dates of their certificates of enlistment therein and when called into active service or when called out for purposes of instruction or training shall take precedence next below all other enlisted men of like grades in the Regular Army. And the Secretary of War is hereby authorized to issue to members of the Enlisted Reserve Corps and to persons who have participated in at least one encampment for the military instruction of citizens, conducted under the auspices of the War Department, distinctive rosettes or knots designed for wear with civilian clothing, and whenever a rosette or knot issued under the provisions of this section shall have been lost, destroyed, or rendered unfit for use without fault or neglect upon the part of the person to whom it was issued, the Secretary of War shall cause a new rosette or knot to be issued to such person without charge therefor. Any person who is not an enlisted man of the Enlisted Reserve Corps and shall not have participated in at least one encampment for the military instruction of citizens, conducted under the auspices of the War Department, and who shall wear such rosette or knot shall be guilty of misdemeanor punishable by a fine of not exceeding $300, or imprisonment not exceeding six months, or both.

"The President is authorized to assign members of the Enlisted Reserve Corps as reserves to particular organizations of the Regular Army, or to organize the Enlisted Reserve Corps, or any part thereof, into units or detachments of any arm, corps, or department in such manner as he may prescribe, and to assign to such units and detachments officers of the Regular Army or of the Officers' Reserve Corps, herein provided for.

"To the extent provided from time to time by appropriations the Secretary of War may order enlisted men of the Enlisted Reserve Corps to active service for purposes of instruction or training for periods not to exceed 15 days in any one calendar year: *Provided*, That, with the consent of such enlisted men and within the limits of funds available for such purposes, such periods of active service may be extended for such number of enlisted men as may be deemed necessary.

"Enlisted men of the Enlisted Reserve Corps shall receive the pay and allowances of their respective grades, but only when ordered into active service, including the time required for actual travel from their homes to the places to which ordered and return to their homes: *Provided*, That said enlisted men shall not be entitled to retirement or retirement pay, nor shall they be entitled to pensions except for physical disability incurred in line of duty while in active service or while traveling under orders of competent authority to or from designated places of duty.

"The uniform to be worn by enlisted men of the Enlisted Reserve Corps, except corps insignia, shall be the same as prescribed for enlisted men of the Regular Army Reserve, and that in lieu of any money allowance for clothing there shall be issued to each enlisted man of the Enlisted Reserve Corps in time of peace such articles of clothing and equipment as the President may direct: *Provided*, That any clothing or other equipment issued to any enlisted man of the said corps shall remain the property of the United States, and in case of loss or destruction of any article, the article so lost or destroyed shall be replaced by issue to the enlisted man and the value thereof deducted from any pay due or to become due him, unless it shall be made to appear that such loss or destruction was not due to neglect or other fault on his part: *Provided further*, That any clothing or other equipment issued to enlisted men of the Enlisted Reserve Corps which shall have become unserviceable through ordinary wear and tear in the

service of the United States shall be received back by the United States and serviceable like articles issued in lieu thereof: *Provided further*, That when enlisted men of the Enlisted Reserve Corps shall be discharged or otherwise separated from the service, all arms, equipage, clothing, and other property issued to them shall be accounted for under such regulations as may be prescribed by the Secretary of War.

"Any enlisted man of the Enlisted Reserve Corps ordered to active service or for purposes of instruction or training shall, from the time he is required by the terms of the order to obey the same, be subject to the laws and regulations for the government of the Army of the United States.

"The Secretary of War is hereby authorized to discharge any enlisted member of the Enlisted Reserve Corps when his services shall be no longer required, or when he shall have by misconduct unfitted himself for further service in the said corps: *Provided*, That any enlisted man of said corps who shall be ordered upon active duty as herein provided and who shall willfully fail to comply with the terms of the order so given him shall, in addition to any other penalty to which he may be subject, forfeit his certificate of enlistment.

"In time of actual or threatened hostilities the President may order the Enlisted Reserve Corps, in such numbers and at such times as may be considered necessary, to active service with the Regular Army, and while on such service members of said corps shall exercise command appropriate to their several grades and rank in the organizations to which they shall be assigned and shall be entitled to the pay and allowances of the corresponding grades in the Regular Army, with increase of pay for length of service as now allowed by law for the Regular Army: *Provided*, That upon a call by the President for a volunteer force the members of the Enlisted Reserve Corps may be mustered into the service of the United States as volunteers for duty with the Army in the grades held by them in the said corps, and shall be entitled to the pay and allowances of the corresponding grades in the Regular Army, with increase of pay for length of service, as now provided by law for the Regular Army: *And provided further*, That enlisted men of the Enlisted Reserve Corps shall not acquire by virtue of issuance of certificates of enlistment to them a vested right to be mustered into the volunteer service of the United States.

"SEC. 56. Military equipment and instructors at other schools and colleges: Such arms, tentage, and equipment as the Secretary of War shall deem necessary for proper military training shall be supplied by the Government to schools and colleges, other than those provided for in section 47 of this act, having a course of military training prescribed by the Secretary of War and having not less than 100 physically fit male students above the age of 14 years, under such rules and regulations as he may prescribe; and the Secretary of War is hereby authorized to detail such commissioned and noncommissioned officers of the Army to said schools and colleges, other than those provided for in sections 45 and 46 of this act, detailing not less than 1 such officer or noncommissioned officer to each 500 students under military instruction.

"SEC. 57. Composition of the militia: The militia of the United States shall consist of all able-bodied male citizens of the United States and all other able-bodied males who have or shall have declared their intention to become citizens of the United States, who shall be more than 18 years of age and, except as hereinafter provided, not more than 45 years of age, and said militia shall be divided into three classes, the National Guard, the Naval Militia, and the Unorganized Militia.

"SEC. 58. Composition of the National Guard: The National Guard shall consist of the regularly enlisted militia between the ages of 18 and 45 years organized, armed, and equipped as hereinafter provided, and of commissioned officers between the ages of 21 and 64 years.

"SEC. 59. Exemptions from militia duty: The Vice President of the United States; the officers, judicial and executive, of the Government of the United States and of the several States and Territories; persons in the military or naval service of the United States; customhouse clerks; persons employed by the United States in the transmission of the mail; artificers and workmen employed in the armories, arsenals, and navy yards of the United States; pilots; mariners actually employed in the sea service of any citizen or merchant within the United States, shall be exempt from militia duty without regard to age, and all persons who because of religious belief shall claim exemption from military service, if the conscientious holding of such belief by such persons shall be established under such regulations as the President shall prescribe, shall be exempted from militia service in a combatant capacity; but no person so exempted shall be exempt from militia service in any capacity that the President shall declare to be noncombatant.

"SEC. 60. Organization of National Guard units: Except as otherwise specifically provided herein, the organization of the National Guard, including the composition of all units thereof, shall be the same as that which is or may hereafter be prescribed for the Regular Army, subject in time of peace to such general exceptions as may be authorized by the Secretary of War. And the President may prescribe the particular unit or units, as to branch or arm of service, to be maintained in each State, Territory, or the District of Columbia in order to secure a force which, when combined, shall form complete higher tactical units.

"SEC. 61. Maintenance of other troops by the States: No State shall maintain troops in time of peace other than as authorized in accordance with the organization prescribed under this act: *Provided*, That nothing contained in this act shall be construed as limiting the rights of the States and Territories in the use of the National Guard within their respective borders in time of peace: *Provided further*, That nothing contained in this act shall prevent the organization and maintenance of State police or constabulary.

"SEC. 62. Number of the National Guard: The number of enlisted men of the National Guard to be organized under this act within one year from its passage shall be for each State in the proportion of 200 such men for each Senator and Representative in Congress from such State, and a number to be determined by the President for each Territory and the District of Columbia, and shall be increased each year thereafter in the proportion of not less than 50 per cent until a total peace strength of not less than 800 enlisted men for each Senator and Representative in Congress shall have been reached: *Provided*, That in States which have but one Representative in Congress such increase shall be at the discretion of the President: *Provided further*, That this shall not be construed to prevent any State, Territory, or the District of Columbia from organizing the full number of troops required under this section in less time than is specified in this section, or from mantaining existing organizations if they shall conform to such rules and regulations regarding organization, strength, and armament as the President may prescribe: *And provided further*, That nothing in this act shall be construed to prevent any State with but one Representative in Congress from organizing one or more regiments of troops, with such auxiliary troops as the President may prescribe; such organizations and members of such organizations to receive all the benefits accruing under this act under the conditions set forth herein: *Provided further*, That the word Territory as used in this act and in all laws relating to the land militia and National Guard shall include and apply to Hawaii, Alaska, Porto Rico, and the Canal Zone, and the militia of the Canal Zone shall be organized under such rules and regulations, not in conflict with the provisions of this act, as the President may prescribe.

"SEC. 63. Any corps of Artillery, Cavalry, or Infantry existing in any of the States on the passage of the Act of May 8, 1792, which by the laws, customs, or usages of said State has been in continuous existence since the passage of said act, under its provisions and under the provisions of section 232 and sections 1625 to 1660, both inclusive, of title 16 of the Revised Statutes of 1873, and the act of January 21, 1903, relating to the militia, shall be allowed to retain its ancient privileges, subject, nevertheless, to all duties required by law of militia: *Provided*, That said organizations may be a part of the National Guard and entitled to all the privileges of this Act, and shall conform in all respects to the organization, discipline, and training of the National Guard in time of war: *Provided further*, That for purposes of training and when on active duty in the service of the United States they may be assigned to higher units, as the President may direct, and shall be subject to the orders of officers under whom they shall be serving.

"SEC. 64. Assignment of National Guard to brigades and divisions: For the purpose of maintaining appropriate organization and to assist in instruction and training, the President may assign the National Guard of the several States and Territories and the District of Columbia to divisions, brigades, and other tactical units, and may detail officers either from the National Guard or the Regular Army to command such units: *Provided*, That where complete units are organized within a State, Territory, or the District of Columbia the commanding officers thereof shall not be displaced under the provisions of this section.

"SEC. 65. Chiefs of staff of National Guard divisions: The President may detail one officer of the Regular Army as

chief of staff and one officer of the Regular Army or the National Guard as assistant to the chief of staff of any division of the National Guard in the service of the United States as a National Guard organization: *Provided*, That in order to insure the prompt mobilization of the National Guard in time of war or other emergency, the President may, in time of peace, detail an officer of the Regular Army to perform the duties of chief of staff for each fully organized tactical division of the National Guard.

"SEC. 66. Adjutants general of States, etc.: The adjutants general of the States, Territories, and the District of Columbia and the officers of the National Guard shall make such returns and reports to the Secretary of War, or to such officers as he may designate, at such times and in such form as the Secretary of War may from time to time prescribe: *Provided*, That the adjutants general of the Territories and of the District of Columbia shall be appointed by the President with such rank and qualifications as he may prescribe, and each adjutant general for a Territory shall be a citizen of the Territory for which he is appointed.

"SEC. 67. Appropriation, apportionment, and disbursement of funds for the National Guard: A sum of money shall hereafter be appropriated annually, to be paid out of any money in the Treasury not otherwise appropriated, for the support of the National Guard, including the expense of providing arms, ordnance stores, quartermaster stores, and camp equipage, and all other military supplies for issue to the National Guard, and such other expenses pertaining to said guard as are now or may hereafter be authorized by law.

"The appropriation provided for in this section shall be apportioned among the several States and Territories under just and equitable procedure to be prescribed by the Secretary of War and in direct ratio to the number of enlisted men in active service in the National Guard existing in such States and Territories at the date of apportionment of said appropriation, and to the District of Columbia, under such regulations as the President may prescribe: *Provided*, That the sum so apportioned among the several States, Territories, and the District of Columbia, shall be available under such rules as may be prescribed by the Secretary of War for the actual and necessary expenses incurred by officers and enlisted men of the Regular Army when traveling on duty in connection with the National Guard; for the transportation of supplies furnished to the National Guard for the permanent equipment thereof; for office rent and necessary office expenses of officers of the Regular Army on duty with the National Guard; for the expenses of the Militia Bureau, including clerical services, now authorized for the Division of Militia Affairs; for expenses of enlisted men of the Regular Army on duty with the National Guard, including quarters, fuel, light, medicines, and medical attendance; and such expenses shall constitute a charge against the whole sum annually appropriated for the support of the National Guard, and shall be paid therefrom and not from the allotment duly apportioned to any particular State, Territory, or the District of Columbia; for the promotion of rifle practice, including the acquisition, construction, maintenance, and equipment of shooting galleries and suitable target ranges; for the hiring of horses and draft animals for the use of mounted troops, batteries, and wagons; for forage for the same; and for such other incidental expenses in connection with lawfully authorized encampments, maneuvers, and field instruction as the Secretary of War may deem necessary, and for such other expenses pertaining to the National Guard as are now or may hereafter be authorized by law.

"The governor of each State and Territory and the commanding general of the National Guard of the District of Columbia shall appoint, designate, or detail, subject to the approval of the Secretary of War, an officer of the National Guard of the State, Territory, or District of Columbia who shall be regarded as property and disbursing officer for the United States. He shall receipt and account for all funds and property belonging to the United States in possession of the National Guard of his State, Territory, or District, and shall make such returns and reports concerning the same as may be required by the Secretary of War. The Secretary of War is authorized, on the requisition of the governor of a State or Territory or the commanding general of the National Guard of the District of Columbia, to pay to the property and disbursing officer thereof so much of its allotment out of the annual appropriation for the support of the National Guard as shall, in the judgment of the Secretary of War, be necessary for the purposes enumerated therein. He shall render, through the War Department, such accounts of Federal funds intrusted to him for disbursement as may be required by the Treasury Department. Before entering upon the performance of his duties as property and disbursing officer he shall be required to give good and sufficient bond to the United States, the amount thereof to be determined by the Secretary of War, for the faithful performance of his duties and for the safe-keeping and proper disposition of the Federal property and funds intrusted to his care. He shall, after having qualified as property and disbursing officer, receive pay for his services at a rate to be fixed by the Secretary of War, and such compensation shall be a charge against the whole sum annually appropriated for the support of the National Guard: *Provided*, That when traveling in the performance of his official duties under orders issued by the proper authorities he shall be reimbursed for his actual necessary traveling expenses, the sum to be made a charge against the allotment of the State, Territory, or District of Columbia: *Provided further*, That the Secretary of War shall cause an inspection of the accounts and records of the property and disbursing officer to be made by an inspector general of the Army at least once each year: *And provided further*, That the Secretary of War is empowered to make all rules and regulations necessary to carry into effect the provisions of this section.

"SEC. 68. Location of units: The States and Territories shall have the right to determine and fix the location of the units and headquarters of the National Guard within their respective borders: *Provided*, That no organization of the National Guard, members of which shall be entitled to and shall have received compensation under the provisions of this act, shall be disbanded without the consent of the President, nor, without such consent, shall the commissioned or enlisted strength of any such organization be reduced below the minimum that shall be prescribed therefor by the President.

"SEC. 69. Enlistments in the National Guard: Hereafter the period of enlistment in the National Guard shall be for six years, the first three years of which shall be in an active organization and the remaining three years in the National Guard Reserve, hereinafter provided for, and the qualifications for enlistment shall be the same as those prescribed for admission to the Regular Army: *Provided*, That in the National Guard the privilege of continuing in active service during the whole of an enlistment period and of reenlisting in said service shall not be denied by reason of anything contained in this act.

"SEC. 70. Federal enlistment contract: Enlisted men in the National Guard of the several States, Territories, and the District of Columbia now serving under enlistment contracts which contain an obligation to defend the Constitution of the United States and to obey the orders of the President of the United States shall be recognized as members of the National Guard under the provisions of this act for the unexpired portion of their present enlistment contracts. When any such enlistment contract does not contain such obligation, the enlisted man shall not be recognized as a member of the National Guard until he shall have signed an enlistment contract and taken and subscribed to the following oath of enlistment, upon signing which credit shall be given for the period already served under the old enlistment contract: 'I hereby acknowledge to have voluntarily enlisted this —— day of ————, 19—, as a soldier in the National Guard of the United States and of the State of ————, for the period of three years in service and three years in the reserve, under the conditions prescribed by law, unless sooner discharged by proper authority. And I do solemnly swear that I will bear true faith and allegiance to the United States of America and to the State of ————, and that I will serve them honestly and faithfully against all their enemies whomsoever, and that I will obey the orders of the President of the United States and of the governor of the State of ————, and of the officers appointed over me according to law and the rules and articles of war.'

"SEC. 71. Hereafter all men enlisting for service in the National Guard shall sign an enlistment contract and take and subscribe to the oath prescribed in the preceding section of this act.

"SEC. 72. Discharge of enlisted men from the National Guard: An enlisted man discharged from service in the National Guard shall receive a discharge in writing in such form and with such classification as is or shall be prescribed for the Regular Army, and in time of peace discharges may be given prior to the expiration of terms of enlistment under such regulations as the President may prescribe.

"SEC. 73. Federal oath for National Guard officers: Commissioned officers of the National Guard of the several States, Territories, and the District of Columbia now serving under commissions regularly issued shall continue in office, as officers of the National Guard, without the issuance of new commissions: *Provided*, That said officers have taken, or shall take and subscribe to the following oath of office: 'I,———, do solemnly swear that I will support and defend the Constitution of the United States and the constitution of the State of ———, against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I will obey the orders of the

President of the United States and of the governor of the State of ———; that I make this obligation freely, without any mental reservation or purpose of evasion, and that I will well and faithfully discharge the duties of the office of ——— in the National Guard of the United States and of the State of ——— upon which I am about to enter, so help me God.'

"SEC. 74. Qualifications for National Guard officers: Persons hereafter commissioned as officers of the National Guard shall not be recognized as such under any of the provisions of this act unless they shall have been selected from the following classes and shall have taken and subscribed to the oath of office prescribed in the preceding section of this act: Officers or enlisted men of the National Guard; officers on the reserve or unassigned list of the National Guard; officers, active or retired, and former officers of the United States Army, Navy, and Marine Corps; graduates of the United States Military and Naval Academies and graduates of schools, colleges, and universities where military science is taught under the supervision of an officer of the Regular Army, and, for the technical branches and staff corps or departments, such other civilians as may be specially qualified for duty therein.

"SEC. 75. The provisions of this act shall not apply to any person hereafter appointed an officer of the National Guard unless he first shall have successfully passed such tests as to his physical, moral, and professional fitness as the President shall prescribe. The examination to determine such qualifications for commission shall be conducted by a board of three commissioned officers appointed by the Secretary of War from the Regular Army or the National Guard, or both.

"SEC. 76. Filling of vacancies when drafted into Federal service: All vacancies occurring in any grade of commissioned officers in any organization in the military service of the United States and composed of persons drafted from the National Guard under the provisions of this act shall be filled by the President, as far as practicable, by the appointment of persons similarly taken from said guard, and in the manner prescribed by law for filling similar vacancies occurring in the volunteer forces.

"SEC. 77. Elimination and disposition of officers: At any time the moral character, capacity, and general fitness for the service of any National Guard officer may be determined by an efficiency board of three commissioned officers, senior in rank to the officer whose fitness for service shall be under investigation, and if the findings of such board be unfavorable to such officer and be approved by the official authorized to appoint such an officer, he shall be discharged. Commissions of officers of the National Guard may be vacated upon resignation, absence without leave for three months, upon the recommendation of an efficiency board, or pursuant to sentence of a court-martial. Officers of said guard rendered surplus by the disbandment of their organizations shall be placed in the National Guard Reserve. Officers may, upon their own application, be placed in the said reserve.

"SEC. 78. The National Guard Reserve: Subject to such rules and regulations as the President may prescribe, a National Guard Reserve shall be organized in each State, Territory, and the District of Columbia, and shall consist of such organizations, officers, and enlisted men as the President may prescribe, or members thereof may be assigned as reserves to an active organization of the National Guard: *Provided*, That members of said reserve, when engaged in field or coast-defense training with the active National Guard, shall receive the same Federal pay and allowances as enlisted men of like grade on the active list of said guard when likewise engaged: *Provided further*, That, except as otherwise specifically provided in this act, no commissioned or enlisted reservist shall receive any pay or allowances out of any appropriation made by Congress for National Guard purposes.

"SEC. 79. Reserve battalions for recruit training: When members of the National Guard and the enlisted reserve thereof of any State, Territory, or the District of Columbia shall have been brought into the service of the United States in time of war, there shall be immediately organized, either from such enlisted reserve or from the unorganized militia, in such State, Territory, or District, 1 reserve battalion for each regiment of Infantry or Cavalry, or each 9 batteries of Field Artillery, or each 12 companies of Coast Artillery, brought into the service of the United States, and such reserve battalion shall constitute the fourth battalion of any such regiment or 12 companies of Coast Artillery. Reserve battalions shall consist of four companies of such strength as may be prescribed by the President of the United States. When the members of three or more regiments of the National Guard of any State, Territory, or District shall have been brought into the service of the United States, the reserve battalions of such regiments may be organized into provisional regiments and higher units. If for any reason there shall not be enough voluntary enlistments to keep the reserve battalions at the prescribed strength, a sufficient number of the unorganized militia shall be drafted into the service of the United States to maintain each of such battalions at the proper strength. As vacancies occur from death or other causes in any organization in the service of the United States and composed of men taken from the National Guard, men shall be transferred from the reserve battalions to the organizations in the field so that such organizations may be maintained at war strength. Officers for the reserve battalions provided for herein shall be drafted from the National Guard Reserve or Coast Artillery companies of the National Guard or the Officers' Reserve Corps, such officers to be taken, if practicable, from the States, respectively, in which the battalions shall be organized. Officers and noncommissioned officers returned to their home stations because of their inability to perform active field service may be assigned to reserve battalions for duty, and all soldiers invalided home shall be assigned to and carried on the rolls of reserve battalions until returned to duty or until discharged.

"SEC. 80. Leaves of absence for certain Government employees: All officers and employees of the United States and of the District of Columbia who shall be members of the National Guard shall be entitled to leave of absence from their respective duties, without loss of pay, time, or efficiency rating, on all days during which they shall be engaged in field or coast-defense training ordered or authorized under the provisions of this act.

"SEC. 81. Militia Bureau of the War Department: The National Militia Board created by section 11 of the act of May 27, 1908, amending section 20 of the act of January 21, 1903, shall, from the date of the approval of this act, be abolished. The Militia Division now existing in the War Department shall hereafter be known as the Militia Bureau of said department, shall, like other bureaus of said department, be under the immediate supervision of the Secretary of War, and shall not form a part of any other bureau, office, or other organization, but the Chief of the Militia Bureau shall be ex officio a member of the General Staff Corps: *Provided*, That the President may, in his discretion, assign to duty in the Militia Bureau as assistants to the chief thereof not to exceed one colonel and one lieutenant colonel of the National Guard, for terms of four years, and any such officer while so assigned shall, subject to such regulations as the President may prescribe, receive out of the whole fund appropriated for the support of the militia the pay and allowances of a Regular Army officer having the same rank and length of service as said National Guard officer, whose prior service in the Organized Militia shall be counted in ascertaining his rights under this proviso.

"SEC. 82. Armament, equipment, and uniform of the National Guard: The National Guard of the United States shall, as far as practicable, be uniformed, armed, and equipped with the same type of uniforms, arms, and equipments as are or shall be provided for the Regular Army.

"SEC. 83. The Secretary of War is hereby authorized to procure, under such regulations as the President may prescribe, by purchase or manufacture, within the limits of available appropriations made by Congress, and to issue from time to time to the National Guard, upon requisition of the governors of the several States and Territories or the commanding general of the National Guard of the District of Columbia, such number of United States service arms, with all accessories, field-artillery matériel, engineer, coast artillery, signal, and sanitary matériel, accouterments, field uniforms, clothing, equipage, publications, and military stores of all kinds, including public animals, as are necessary to arm, uniform, and equip for field service the National Guard in the several States, Territories, and the District of Columbia: *Provided*, That as a condition precedent to the issue of any property as provided for by this act, the State, Territory, or the District of Columbia desiring such issue shall make adequate provision, to the satisfaction of the Secretary of War, for the protection and care of such property: *Provided further*, That whenever it shall be shown to the satisfaction of the Secretary of War that the National Guard of any State, Territory, or the District of Columbia, is properly organized, armed, and equipped for field service, funds allotted to that State, Territory, or District for the support of its National Guard may be used for the purchase, from the War Department, of any article issued by any of the supply departments of the Army.

"SEC. 84. Under such regulations as the President may prescribe, whenever a new type of equipment, small arm, or field gun shall have been issued to the National Guard of the several States, Territories, and the District of Columbia, such equip-

ment, small arms, and field guns, including all accessories, shall be furnished without charging the cost or value thereof or any expense connected therewith against the appropriations provided for the support of the National Guard.

"SEC. 85. Each State, Territory, and the District of Columbia shall, on the receipt of new property issued to replace obsolete or condemned prior issues, turn in to the War Department or otherwise dispose of, in accordance with the directions of the Secretary of War, all property so replaced or condemned, and shall not receive any money credit therefor.

"SEC. 86. Any State, Territory, or the District of Columbia may, with the approval of the Secretary of War, purchase for cash from the War Department for the use of the National Guard, including the officers thereof, any stores, supplies, material of war, and military publications furnished to the Army, in addition to those issued under the provisions of this act, at the price at which they shall be listed to the Army, with cost of transportation added. The funds received from such sale shall be credited to the appropriation to which they shall belong, shall not be covered into the Treasury, and shall be available until expended to replace therewith the supplies sold to the States in the manner herein authorized: *Provided*, That stores, supplies, and matériel of war so purchased by a State, Territory, or the District of Columbia may, in time of actual or threatened war, be requisitioned by the United States for use in the military service thereof, and when so requisitioned by the United States and delivered credit for the ultimate return of such property in kind shall be allowed to such State, Territory, or the District of Columbia.

"SEC. 87. Disposition and replacement or damaged property, etc.: All military property issued to the National Guard as herein provided shall remain the property of the United States. Whenever any such property issued to the National Guard in any State or Territory or the District of Columbia shall have been lost, damaged, or destroyed, or become unserviceable or unsuitable by use in service or from any other cause, it shall be examined by a disinterested surveying officer of the Regular Army or the National Guard, detailed by the Secretary of War, and the report of such surveying officer shall be forwarded to the Secretary of War, or to such officer as he shall designate to receive such reports; and if it shall appear to the Secretary of War from the record of survey that the property was lost, damaged, or destroyed through unavoidable causes, he is hereby authorized to relieve the State or Territory or the District of Columbia from further accountability therefor. If it shall appear that the loss, damage, or destruction of property was due to carelessness or neglect, or that its loss, damage, or destruction could have been avoided by the exercise of reasonable care, the money value of such property shall be charged to the accountable State, Territory, or District of Columbia, to be paid from State, Territory, or District funds, or any funds other than Federal. If the articles so surveyed are found to be unserviceable or unsuitable, the Secretary of War shall direct what disposition, by sale or otherwise, shall be made of them; and if sold, the proceeds of such sale, as well as stoppages against officers and enlisted men, and the net proceeds of collections made from any person or from any State, Territory, or District to reimburse the Government for the loss, damage, or destruction of any property, shall be deposited in the Treasury of the United States as a credit to said State, Territory, or the District of Columbia, accountable for said property, and as a part of and in addition to that portion of its allotment set aside for the purchase of similar supplies, stores, or material of war: *Provided further*, That if any State, Territory, or the District of Columbia by the Secretary of War pay, or to cause to be paid, the money equivalent of any loss, damage, or destruction of property charged against such State, Territory, or the District of Columbia by the Secretary of War after survey by a disinterested officer appointed as hereinbefore provided, the Secretary of War is hereby authorized to debar such State, Territory, or the District of Columbia from further participation in any and all appropriations for the National Guard until such payment shall have been made.

"SEC. 88. The net proceeds of the sale of condemned stores issued to the National Guard and not charged to State allotments shall be covered into the Treasury of the United States, as shall also stoppages against officers and enlisted men, and the net proceeds of collections made from any person to reimburse the Government for the loss, damage, or destruction of said property not charged against the State allotment issued for the use of the National Guard.

"SEC. 89. Horses for Cavalry and Field Artillery of National Guard: Funds allotted by the Secretary of War for the support of the National Guard shall be available for the purchase, under such regulations as the Secretary of War may prescribe, of horses conforming to the Regular Army standards for the use of Field Artillery and Cavalry of the National Guard, said horses to remain the propery of the United States and to be used solely for military purposes.

"Horses so purchased may be issued not to exceed 32 to any one battery or troop, under such regulations as the Secretary of War may prescribe; and the Secretary of War is further authorized to issue, in lieu of purchase, for the use of such organizations, condemned Army horses which are no longer fit for service, but which may be suitable for the purposes of instruction, such horses to be sold as now provided by law when said purposes shall have been served.

"SEC. 90. Funds allotted by the Secretary of War for the support of the National Guard shall be available for the purchase and issue of forage, bedding, shoeing, and veterinary services, and supplies for the Government horses issued to any battery or troop, and for the compensation of competent help for the care of the material, animals, and equipment thereof, under such regulations as the Secretary of War may prescribe: *Provided*, That the men to be compensated, not to exceed five for each battery or troop, shall be duly enlisted therein and shall be detailed by the battery or troop commander, under such regulations as the Secretary of War may prescribe, and shall be paid by the United States disbursing officer in each State, Territory, and the District of Columbia.

"SEC. 91. Discipline to conform to that of Regular Army: The discipline (which includes training) of the National Guard shall conform to the system which is now or may hereafter be prescribed for the Regular Army, and the training shall be carried out by the several States, Territories, and the District of Columbia so as to conform to the provisions of this Act.

"SEC. 92. Training of the National Guard: Each company, troop, battery, and detachment in the National Guard shall assemble for drill and instruction, including indoor target practice, not less than 48 times each year, and shall, in addition thereto, participate in encampments, maneuvers, or other exercises, including outdoor target practice, at least 15 days in training each year, including target practice, unless such company, troop, battery, or detachment shall have been excused from participation in any part thereof by the Secretary of War: *Provided*, That credit for an assembly for drill or for indoor target practice shall not be given unless the number of officers and enlisted men present for duty at such assembly shall equal or exceed a minimum to be prescribed by the President, nor unless the period of actual military duty and instruction participated in by each officer and enlisted man at each such assembly at which he shall be credited as having been present shall be of at least one and one-half hours' duration and the character of training such as may be prescribed by the Secretary of War.

"SEC. 93. Inspections of the National Guard: The Secretary of War shall cause an inspection to be made at least once each year by inspectors general, and if necessary by other officers, of the Regular Army, detailed by him for that purpose, to determine whether the amount and condition of the property in the hands of the National Guard is satisfactory; whether the National Guard is organized as hereinbefore prescribed; whether the officers and enlisted men possess the physical and other qualifications prescribed; whether the organization and the officers and enlisted men thereof are sufficiently armed, uniformed, equipped, and being trained and instructed for active duty in the field or coast defense; and whether the records are being kept in accordance with the requirements of this act. The reports of such inspections shall serve as the basis for deciding as to the issue to and retention by the National Guard of the military property provided for by this act, and for determining what organizations and individuals shall be considered as constituting parts of the National Guard within the meaning of this act.

"SEC. 94. Encampments and maneuvers: Under such regulations as the President may prescribe, the Secretary of War is authorized to provide for the participation of the whole or any part of the National Guard in encampments, maneuvers, or other exercises, including outdoor-target practice, for field or coast-defense instruction, either independently or in conjunction with any part of the Regular Army, and there may be set aside from the funds appropriated for that purpose and allotted to any State, Territory, or the District of Columbia, such portion of said funds as may be necessary for the payment, subsistence, transportation, and other proper expenses of such portion of the National Guard of such State, Territory, or the District of Columbia as shall participate in such encampments, maneuvers, or other exercises, including outdoor-target practice, for field and coast-defense instruction; and the officers and enlisted men of such National Guard while so engaged shall be

entitled to the same pay, subsistence, and transportation as officers and enlisted men of corresponding grades of the Regular Army are or hereafter may be entitled by law.

"SEC. 95. When any part of the National Guard participates in encampments, maneuvers, or other exercises, including outdoor-target practice, for field or coast-defense instruction at a United States military post, or reservation, or elsewhere, if in conjunction with troops of the United States, the command of such military post or reservation and of the officers and troops of the United States on duty there or elsewhere shall remain with the commander of the United States troops without regard to the rank of the commanding or other officer of the National Guard temporarily engaged in the encampments, maneuvers, or other exercises.

"SEC. 96. Use of Regular Army personnel: The Secretary of War may detail one or more officers and enlisted men of the Regular Army to attend any encampment, maneuver, or other exercise for field or coast-defense instruction of the National Guard, who shall give such instruction and information to the officers and men assembled for such encampment, maneuver, or other exercise as may be directed by the Secretary of War or requested by the governor or by the commanding officer of the National Guard there on duty.

"SEC. 97. Under such regulations as the President may prescribe the Secretary of War may provide camps for the instruction of officers and enlisted men of the National Guard. Such camps shall be conducted by officers of the Regular Army detailed by the Secretary of War for that purpose, and may be located either within or without the State, Territory, or District of Columbia to which the members of the National Guard designated to attend said camps shall belong. Officers and enlisted men attending such camps shall be entitled to pay and transportation, and enlisted men to subsistence in addition, at the same rates as for encampments or maneuvers for field or coast-defense instruction.

"SEC. 98. When any portion of the National Guard shall participate in encampments, maneuvers, or other exercises, including outdoor target practice, for field or coast-defense instruction, under the provisions of this Act, it may, after being duly mustered, be paid at any time after such muster for the period from the date of leaving the home rendezvous to date of return thereto as determined in advance, both dates inclusive; and such payment, if otherwise correct, shall pass to the credit of the disbursing officer making the same.

"SEC. 99. National Guard officers and men at service schools, etc.: Under such regulations as the President may prescribe, the Secretary of War may, upon the recommendation of the governor of any State or Territory or the commanding general of the National Guard of the District of Columbia, authorize a limited number of selected officers or enlisted men of the National Guard to attend and pursue a regular course of study at any military service school of the United States, except the United States Military Academy; or to be attached to an orgnization of the same arm, corps, or department to which such officer or enlisted man shall belong, for routine practical instruction at or near an Army post during a period of field training or other outdoor exercises; and such officer or enlisted man shall receive, out of any National Guard allotment of funds available for the purpose, the same travel allowances and quarters, or commutation of quarters, and the same pay, allowances, and subsistence to which an officer or enlisted man of the Regular Army would be entitled for attending such school, college, or practical course of instruction under orders from proper military authority, while in actual attendance at such school, college, or practical course of instruction: *Provided*, That in no case shall the pay and allowances authorized by this section exceed those of a captain.

"SEC. 100. Detail of officers of Regular Army to duty with the National Guard: The Secretary of War shall detail officers of the active list of the Army to duty with the National Guard in each State, Territory, or District of Columbia, and officers so detailed may accept commissions in the National Guard, with the permission of the President and terminable in his discretion, without vacating their commissions in the Regular Army or being prejudiced in their relative or lineal standing therein. The Secretary of War may, upon like application, detail one or more enlisted men of the Regular Army with each State, Territory, or District of Columbia for duty in connection with the National Guard. But nothing in this section shall be so construed as to prevent the detail of retired officers as now provided by law.

"SEC. 101. National Guard, when subject to laws governing Regular Army: The National Guard when called as such into the service of the United States shall, from the time they are required by the terms of the call to respond thereto, be subject to the laws and regulations governing the Regular Army, so far as such laws and regulations are applicable to officers and enlisted men whose permanent retention in the military service, either on the active list or on the retired list, is not contemplated by existing law.

"SEC. 102. System of courts-martial for National Guard: Except in organizations in the service of the United States, court-martial in the National Guard shall be of three kinds, namely, general courts-martial, special courts-martial, and summary courts-martial. They shall be constituted like, and have cognizance of the same subjects, and possess like powers, except as to punishments, as similar courts provided for by the laws and regulations governing the Army of the United States, and the proceedings of courts-martial of the National Guard shall follow the forms and modes of procedure prescribed for said similar courts.

"SEC. 103. General courts-martial of the National Guard not in the service of the United States may be convened by orders of the President, or of the governors of the respective States and Territories, or by the commanding general of the National Guard of the District of Columbia, and such courts shall have the power to impose fines not exceeding $200; to sentence to forfeiture of pay and allowances; to a reprimand; to dismissal or dishonorable discharge from the service; to reduction of noncommissioned officers to the ranks; or any two or more of such punishments may be combined in the sentences imposed by such courts.

"SEC. 104. In the National Guard, not in the service of the United States, the commanding officer of each garrison, fort, post, camp, or other place, brigade, regiment, detached battalion, or other detached command, may appoint special courts-martial for his command; but such special courts-martial may in any case be appointed by superior authority when by the latter deemed desirable. Special courts-martial shall have power to try any person subject to military law, except a commissioned officer, for any crime or offense made punishable by the military laws of the United States, and such special courts-martial shall have the same powers of punishment as do general courts-martial, except that fines imposed by such courts shall not exceed $100.

"SEC. 105. In the National Guard, not in the service of the United States, the commanding officer of each garrison, fort, post, or other place, regiment or corps, detached battalion, company, or other detachment of the National Guard may appoint for such place or command a summary court to consist of one officer, who shall have power to administer oaths and to try the enlisted men of such place or command for breaches of discipline and violations of laws governing such organizations; and said court, when satisfied of the guilt of such soldier, may impose fines not exceeding $25 for any single offense; may sentence noncommissioned officer to reduction to the ranks; may sentence to forfeiture of pay and allowances. The proceedings of such court shall be informal, and the minutes thereof shall be the same as prescribed for summary courts of the Army of the United States.

"SEC. 106. All courts-martial of the National Guard, not in the service of the United States, including summary courts, shall have power to sentence to confinement in lieu of fines authorized to be imposed: *Provided*, That such sentences of confinement shall not exceed one day for each dollar of fine authorized.

"SEC. 107. No sentence of dismissal from the service or dishonorable discharge, imposed by a National Guard court-martial, not in the service of the United States, shall be executed until approved by the governor of the State or Territory concerned, or by the commanding general of the National Guard of the District of Columbia.

"SEC. 108. In the National Guard, not in the service of the United States, presidents of courts-martial and summary court officers shall have power to issue warrants to arrest accused persons and to bring them before the court for trial whenever such persons shall have disobeyed an order in writing from the convening authority to appear before such court, a copy of the charge or charges having been delivered to the accused with such order, and to issue subpœnas and subpœnas duces tecum and to enforce by attachment attendance of witnesses and the production of books and papers, and to sentence for a refusal to be sworn or to answer as provided in actions before civil courts.

"All processes and sentences of said courts shall be executed by such civil officers as may be prescribed by the laws of the several States and Territories, and in any State where no provision shall have been made for such action, and in the Territories and the District of Columbia, such processes and sentences shall be executed by a United States marshal or his duly appointed deputy, and it shall be the duty of any United States

marshal to execute all such processes and sentences and make return thereof to the officer issuing or imposing the same.

"SEC. 109. Pay for National Guard officers: Certain commissioned officers on the active list belonging to organizations of the National Guard of each State, Territory, and the District of Columbia participating in the apportionment of the annual appropriation for the support of the National Guard shall receive compensation for their services, except during periods of service for which they may become lawfully entitled to the same pay as officers of corresponding grades of the Regular Army, as follows, not to include longevity pay: A captain $500 per year and the same pay shall be paid to every officer of higher rank than that of captain, a first lieutenant $240 per year, and a second lieutenant $200 per year. Regulations to be prescribed by the Secretary of War shall determine the amount and character of service that must be rendered by officers to entitle them to the whole or specific parts of the maximum pay hereinbefore authorized: *Provided*, That all staff officers, aids-de-camp, and chaplains shall receive not to exceed one-half of the pay of a captain, except that regimental adjutants, and majors and captains in command of machine-gun companies, ambulance companies, field hospital companies, or sanitary troops shall receive the pay hereinbefore authorized for a captain.

"SEC. 110. Pay for National Guard enlisted men: Each enlisted man on the active list belonging to an organization of the National Guard of a State, Territory, or the District of Columbia, participating in the apportionment of the annual appropriation for the support of the National Guard, shall receive compensation for his services, except during periods of service for which he may become lawfully entitled to the same pay as an enlisted man of corresponding grade in the Regular Army, at a rate equal to 25 per cent of the initial pay now provided by law for enlisted men of corresponding grades of the Regular Army: *Provided*, That such enlisted man shall receive the compensation herein provided if he shall have attended not less than 48 regular drills during any one year, and a proportionate amount for attendance upon a lesser number of such drills, not less than 24; and no such enlisted man shall receive any part of said compensation except as authorized by this proviso and the three provisos next following: *Provided further*, That the compensation provided herein shall be computed for semiannual periods, beginning the 1st day of January and the 1st day of July of each year, in proportion to the number of drills attended; and no compensation shall be paid to any enlisted man for the first semiannual period of any year unless he shall have attended during said period at least 24 drills, but any lesser number of drills attended during said period shall be reckoned with the drills attended during the second semiannual period in computing the compensation, if any, due him for that year: *Provided further*, That when any man enters into an enlistment other than an immediate reenlistment he shall be entitled to proportional compensation for that year if during the remainder of the year he shall attend a number of drills whose ratio to 24 is not less than the ratio of the part of the year so served to the whole year; and when any man's enlistment shall expire the compensation, if any, to which he may be entitled shall be determined in like manner: *Provided further*, That periods of any actual military duty equivalent to the drills herein prescribed (except those periods of service for which members of the National Guard may become lawfully entitled to the same pay as officers and enlisted men of the corresponding grades in the Regular Army) may be accepted as service in lieu of such drills when so provided by the Secretary of War.

"All amounts appropriated for the purpose of this and the last preceding section shall be disbursed and accounted for by the officers and agents of the Quartermaster Corps of the Army, and all disbursements under the foregoing provisions of this section shall be made as soon as practicable after the 31st day of December and the 30th day of June of each year upon pay rolls prepared and authenticated in the manner to be prescribed by the Secretary of War: *Provided*, That stoppages may be made against the compensation payable to any officer or enlisted man hereunder to cover the cost of public property lost or destroyed by and chargeable to such officer or enlisted man.

"Except as otherwise specifically provided herein, no money appropriated under the provisions of this or the last preceding section shall be paid to any person not on the active list, nor to any person over 64 years of age, nor to any person who shall fail to qualify as to fitness for military service under such regulations as the Secretary of War shall prescribe, nor to any State, Territory, or District, or officer or enlisted man in the National Guard thereof, unless and until such State, Territory, or District provides by law that staff officers, including officers of the Pay, Inspection, Subsistence, and Medical Departments, hereafter appointed shall have had previous military experience and shall hold their positions until they shall have reached the age of 64 years, unless retired prior to that time by reason of resignation, disability, or for cause to be determined by a court-martial legally convened for that purpose, and that vacancies among said officers shall be filled by appointment from the officers of the militia of such State, Territory, or District: *Provided further*, That the preceding proviso shall not apply to any State, Territory, or District until 60 days next after the adjournment of the next session of its legislature held after the approval of this act.

"SEC. 111. National Guard when drafted into Federal service: When Congress shall have authorized the use of the armed land forces of the United States, for any purpose requiring the use of troops in excess of those of the Regular Army, the President may, under such regulations, including such physical examination as he may prescribe, draft into the military service of the United States, to serve therein for the period of the war unless sooner discharged, any or all members of the National Guard and of the National Guard Reserve. All persons so drafted shall, from the date of their draft, stand discharged from the militia, and shall from said date be subject to such laws and regulations for the government of the Army of the United States as may be applicable to members of the Volunteer Army, and shall be embodied in organizations corresponding as far as practicable to those of the Regular Army or shall be otherwise assigned as the President may direct. The commissioned officers of said organizations shall be appointed from among the members thereof, officers with rank not above that of colonel to be appointed by the President alone, and all other officers to be appointed by the President by and with the advice and consent of the Senate. Officers and enlisted men in the service of the United States under the terms of this section shall have the same pay and allowances as officers and enlisted men of the Regular Army of the same grades and the same prior service.

"SEC. 112. Rights to pensions: When any officer or enlisted man of the National Guard drafted into the service of the United States in time of war is disabled by reason of wounds or disability received or incurred while in the active service of the United States in time of war, he shall be entitled to all the benefits of the pension laws existing at the time of his service, and in case such officer or enlisted man dies in the active service of the United States in time of war or in returning to his place of residence after being mustered out of such service, or at any other time in consequence of wounds or disabilities received in such active service, his widow and children, if any, shall be entitled to all the benefits of such pension laws.

"SEC. 113. Encouragement of rifle practice: The Secretary of War shall annually submit to Congress recommendations and estimates for the establishment and maintenance of indoor and outdoor rifle ranges, under such a comprehensive plan as will ultimately result in providing adequate facilities for rifle practice in all sections of the country. And that all ranges so established and all ranges which may have already been constructed, in whole or in part, with funds provided by Congress shall be open for use by those in any branch of the military or naval service of the United States and by all able-bodied males capable of bearing arms, under reasonable regulations to be prescribed by the controlling authorities and approved by the Secretary of War. That the President may detail capable officers and noncommissioned officers of the Regular Army and National Guard to duty at such ranges as instructors for the purpose of training the citizenry in the use of the military arm. Where rifle ranges shall have been so established and instructors assigned to duty thereat, the Secretary of War shall be authorized to provide for the issue of a reasonable number of standard military rifles and such quantities of ammunition as may be available for use in conducting such rifle practice.

"Sec. 114. Temporary vacancies in Regular Army due to details to the National Guard: In time of war the temporary vacancies created in any grade not above that of colonel among the commissioned personnel of any arm, staff corps, or department of the Regular Army, through appointments of officers thereof to higher rank in organizations composed of members taken from the National Guard, shall be filled by temporary promotions according to seniority in rank from officers holding commissions in the next lower grade in said arm, staff corps, or department, and all vacancies created in any grade by such temporary promotions shall be in like manner filled from, and thus create temporary vacancies in, the next lower grade, and the vacancies that shall remain thereafter in said arm, staff corps, or department and that can not be filled by temporary promotions, as prescribed in this section, may be filled

by the temporary appointment of officers of such number and grade or grades as shall maintain said arm, corps, or department at the full commissioned strength authorized by law: *Provided*, That in the staff corps and departments subject to the provisions of sections 26 and 27 of the act of February 2, 1901, and acts amendatory thereof, temporary vacancies that can not be filled by temporary promotions as hereinbefore prescribed shall be filled by temporary details in the manner prescribed in said sections 26 and 27, and acts amendatory thereof, and the resulting temporary vacancies in the branches of the Army from which the details shall be so made shall be filled as hereinbefore in this section prescribed: *Provided further*, That officers temporarily promoted or appointed under the terms of this section shall be promoted or appointed by the President, by and with the advice and consent of the Senate, for terms that shall not extend beyond the war or the passing of the emergency for which additional forces were brought into the military service of the United States, and at the termination of the war or the passing of the emergency said officers shall be discharged from the positions held by them under their temporary commissions or appointments, and officers detailed as herein authorized shall be relieved from their temporary details: *And provided further*, That officers temporarily promoted under the provisions of this section shall not vacate their permanent commissions nor be prejudiced in their relative or lineal standing in the Regular Army.

"SEC. 115. Physical examination: Every officer and enlisted man of the National Guard who shall be called into the service of the United States as such shall be examined as to his physical fitness under such regulations as the President may prescribe without further commission or enlistment: *Provided*, That immediately preceding the muster out of an officer or enlisted man called into the active service of the United States he shall be physically examined under rules prescribed by the President of the United States, and the record thereof shall be filed and kept in the War Department.

"SEC. 116. Noncompliance with Federal act: Whenever any State shall, within a limit of time to be fixed by the President, have failed or refused to comply with or enforce any requirement of this act, or any regulation promulgated thereunder and in aid thereof by the President or the Secretary of War, the National Guard of such State shall be debarred, wholly or in part, as the President may direct, from receiving from the United States any pecuniary or other aid, benefit, or privilege authorized or provided by this act or any other law.

"SEC. 117. Applicable to land forces only: The provisions of this act in respect to the militia shall be applicable to militia organized as a land force and not to the Naval Militia, which shall consist of such part of the militia as may be prescribed by the President for each State, Territory, or District: *Provided*, That each State, Territory, or District maintaining a Naval Militia as herein prescribed may be credited to the extent of the number thereof in the quota that would otherwise be required by section 62 of this act.

"SEC. 118. Necessary rules and regulations: The President shall make all necessary rules and regulations and issue such orders as may be necessary for the thorough organization, discipline, and government of the militia provided for in this act.

"SEC. 119. Annual estimates required: The Secretary of War shall cause to be estimated annually the amount necessary for carrying out the provisions of so much of this act as relates to the militia, and no money shall be expended under said provisions except as shall from time to time be appropriated for carrying them out.

"SEC. 120. Purchase or procurement of military supplies in time of actual or imminent war: The President, in time of war or when war is imminent, is empowered, through the head of any department of the Government, in addition to the present authorized methods of purchase or procurement, to place an order with any individual, firm, association, company, corporation, or organized manufacturing industry for such product or material as may be required, and which is of the nature and kind usually produced or capable of being produced by such individual, firm, company, association, corporation, or organized manufacturing industry.

"Compliance with all such orders for products or material shall be obligatory on any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof and shall take precedence over all other orders and contracts theretofore placed with such individual, firm, company, association, corporation, or organized manufacturing industry, and any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof owning or operating any plant equipped for the manufacture of arms or ammunition, or parts of ammunition, or any necessary supplies or equipment for the Army, and any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof owning or operating any manufacturing plant, which, in the opinion of the Secretary of War, shall be capable of being readily transformed into a plant for the manufacture of arms or ammunition, or parts thereof, or other necessary supplies or equipment, who shall refuse to give to the United States such preference in the matter of the execution of orders, or who shall refuse to manufacture the kind, quantity, or quality of arms or ammunition, or the parts thereof, or any necessary supplies or equipment, as ordered by the Secretary of War, or who shall refuse to furnish such arms, ammunitions, or parts of ammunition, or other supplies or equipment, at a reasonable price as determined by the Secretary of War, then, and in either such case, the President, through the head of any department of the Government, in addition to the present authorized methods of purchase or procurement herein provided for, is hereby authorized to take immediate possession of any such plant or plants, and, through the Ordnance Department of the United States Army, to manufacture therein in time of war, or when war shall be imminent, such product or material as may be required, and any individual, firm, company, association, or corporation, or organized manufacturing industry or the responsible head or heads thereof failing to comply with the provisions of this section shall be deemed guilty of a felony, and upon conviction shall be punished by imprisonment for not more than three years and by a fine not exceeding $50,000.

"The compensation to be paid to any individual, firm, company, association, corporation, or organized manufacturing industry for its products or material, or as rental for use of any manufacturing plant while used by the United States, shall be fair and just.

"The Secretary of War shall also make, or cause to be made, a complete list of all privately owned plants in the United States equipped to manufacture arms or ammunition, or the component parts thereof. He shall obtain full and complete information regarding the kind of arms or ammunition, or the component parts thereof, manufactured or that can be manufactured by each such plant, the equipment in each plant, and the maximum capacity thereof. He shall also prepare, or cause to be prepared, a list of privately owned manufacturing plants in the United States capable of being readily transformed into ammunition factories, where the capacity of the plant is sufficient to warrant transforming such plant or plants into ammunition factories in time of war or when war shall be imminent; and as to all such plants the Secretary of War shall obtain full and complete information as to the equipment of each such plant, and he shall prepare comprehensive plans for transforming each such plant into an ammunition factory, or a factory in which to manufacture such parts of ammunition as in the opinion of the Secretary of War such plant is best adapted.

"The President is hereby authorized, in his discretion, to appoint a board on mobilization of industries essential for military preparedness, nonpartisan in character, and to take all necessary steps to provide for such clerical assistance as he may deem necessary to organize and coordinate the work hereinbefore described.

"SEC. 121. Investigation as to Government manufacture of arms, etc.: The Secretary of War is hereby authorized to appoint a board of five citizens, two of whom shall be civilians and three of whom shall be officers of the Army, to investigate and report to him the feasibility, desirability, and practicability of the Government manufacturing arms, munitions, and equipment, showing in said report the comparative prices of the arms, munitions, and equipment manufactured in Government plants and those manufactured in private plants, the amount of money necessary to build and operate Government plants for the manufacture of arms, munitions, and equipment; showing also what the Government plants and arsenals are now doing in the way of manufacturing arms, munitions, and equipment, and what saving has accrued to the Government by reason of its having manufactured a large part of its own arms, munitions, and equipment for the last four years. And the Secretary of War is hereby directed to transmit said report to Congress on or before January 1, 1917.

"SEC. 122. Investigation concerning medals of honor: A board to consist of five general officers on the retired list of the Army shall be convened by the Secretary of War, within 60 days after the approval of this act, for the purpose of investigating and reporting upon past awards or issues of the so-called congressional medal of honor by or through the War Department; this with a view to ascertain what medals of honor, if any, have been awarded or issued for any cause other than distinguished conduct by an officer or enlisted man in action in-

volving actual conflict with an enemy by such officer or enlisted man or by troops with which he was serving at the time of such action. And in any case in which said board shall find and report that said medal was issued for any cause other than that hereinbefore specified the name of the recipient of the medal so issued shall be stricken permanently from the official medal of honor list. It shall be a misdemeanor for him to wear or publicly display said medal, and, if he shall still be in the Army, he shall be required to return said medal to the War Department for cancellation. Said board shall have full and free access to and use of all records pertaining to the award or issue of medals of honor by or through the War Department. The actual and necessary expenses of said board and its members shall be paid out of any appropriations available for contingent expenses of the Army of the War Department.

"SEC. 123. Procurement of gauges, dies, jigs, etc., necessary for manufacture of arms, etc.: The Secretary of War be, and he is hereby, authorized to prepare or cause to be prepared, to purchase or otherwise procure, such gauges, dies, jigs, tools, fixtures, and other special aids and appliances, including specifications and detailed drawings, as may be necessary for the immediate manufacture, by the Government and by private manufacturers, of arms, ammunition, and special equipment necessary to arm and equip the land forces likely to be required by the United States in time of war: *Provided*, That in the expenditure of any sums appropriated to carry out the purposes of this section the existing laws prescribing competition in the procurement of supplies by purchase shall not govern, whenever in the opinion of the Secretary of War such action will be for the best interest of the public service.

"SEC. 124. Nitrate supply: The President of the United States is hereby authorized and empowered to make, or cause to be made, such investigation as in his judgment is necessary to determine the best, cheapest, and most available means for the production of nitrates and other products for munitions of war and useful in the manufacture of fertilizers and other useful products by water power or any other power as in his judgment is the best and cheapest to use; and is also hereby authorized and empowered to designate for the exclusive use of the United States, if in his judgment such means is best and cheapest, such site or sites, upon any navigable or nonnavigable river or rivers or upon the public lands, as in his opinion will be necessary for carrying out the purposes of this act; and is further authorized to construct, maintain, and operate, at or on any site or sites so designated, dams, locks, improvements to navigation, power houses, and other plants and equipment or other means than water power as in his judgment is the best and cheapest, necessary or convenient for the generation of electrical or other power and for the production of nitrates or other products needed for munitions of war and useful in the manufacture of fertilizers and other useful products.

"The President is authorized to lease, purchase, or acquire, by condemnation, gift, grant, or devise, such lands and rights of way as may be necessary for the construction and operation of such plants, and to take from any lands of the United States, or to purchase or acquire by condemnation materials, minerals, and processes, patented or otherwise, necessary for the construction and operation of such plants and for the manufacture of such products.

"The products of such plants shall be used by the President for military and naval purposes to the extent that he may deem necessary, and any surplus which he shall determine is not required shall be sold and disposed of by him under such regulations as he may prescribe.

"The President is hereby authorized and empowered to employ such officers, agents, or agencies as may in his discretion be necessary to enable him to carry out the purposes herein specified, and to authorize and require such officers, agents, or agencies to perform any and all of the duties imposed upon him by the provisions hereof.

"The sum of $20,000,000 is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, available until expended, to enable the President of the United States to carry out the purposes herein provided for.

"The plant or plants provided for under this act shall be constructed and operated solely by the Government and not in conjunction with any other industry or enterprise carried on by private capital.

"In order to raise the money appropriated by this act and necessary to carry its provisions into effect, the Secretary of the Treasury, upon the request of the President of the United States, may issue and sell, or use for such purpose or construction hereinabove authorized, any of the bonds of the United States now available in the Treasury of the United States under the act of August 5, 1909, the act of February 4, 1910, and the act of March 2, 1911, relating to the issue of bonds for the construction of the Panama Canal, to a total amount not to exceed $20,000,000: *Provided*, That any Panama Canal bonds issued and sold or used under the provisions of this section may be made payable at such time after issue as the Secretary of the Treasury, in his discretion, may deem advisable, and fix, instead of 50 years after date of issue, as in said act of August 5, 1909, not exceeding 50 years.

"SEC. 125. Protection of the uniform: It shall be unlawful for any person not an officer or enlisted man of the United States Army, Navy, or Marine Corps, to wear the duly prescribed uniform of the United States Army, Navy, or Marine Corps, or any distinctive part of such uniform, or a uniform any part of which is similar to a distinctive part of the duly prescribed uniform of the United States Army, Navy, or Marine Corps: *Provided*, That the foregoing provision shall not be construed so as to prevent officers or enlisted men of the National Guard from wearing, in pursuance of law and regulations, the uniform lawfully prescribed to be worn by such officers or enlisted men of the National Guard; nor to prevent members of the organization known as the Boy Scouts of America, or the Naval Militia, or such other organizations as the Secretary of War may designate, from wearing their prescribed uniforms; nor to prevent persons who in time of war have served honorably as officers of the United States Army, Navy, or Marine Corps, Regular or Volunteer, and whose most recent service was terminated by an honorable discharge, muster out, or resignation, from wearing, upon occasions of ceremony, the uniform of the highest grade they have held by brevet or other commission in such Regular or Volunteer service; nor to prevent any person who has been honorably discharged from the United States Army, Navy, or Marine Corps, Regular or Volunteer, from wearing his uniform from the place of his discharge to his home, within three months after the date of such discharge; nor to prevent the members of military societies composed entirely of honorably discharged officers or enlisted men, or both, of the United States Army, Navy, or Marine Corps, Regular or Volunteer, from wearing, upon occasions of ceremony, the uniform duly prescribed by such societies to be worn by the members thereof; nor to prevent the instructors and members of the duly organized cadet corps of a State university, State college, or public high school offering a regular course in military instruction from wearing the uniform duly prescribed by the authorities of such university, college, or public high school for wear by the instructors and members of such cadet corps; nor to prevent the instructors and members of the duly organized cadet corps of any other institution of learning offering a regular course in military instruction, and at which an officer or enlisted man of the United States Army, Navy, or Marine Corps is lawfully detailed for duty as instructor in military science and tactics, from wearing the uniform duly prescribed by the authorities of such institution of learning for wear by the instructors and members of such cadet corps; nor to prevent civilians attendant upon a course of military or naval instruction authorized and conducted by the military or naval authorities of the United States from wearing, while in attendance upon such course of instruction, the uniform authorized and prescribed by such military or naval authorities for wear during such course of instruction; nor to prevent any person from wearing the uniform of the United States Army, Navy, or Marine Corps in any playhouse or theater or in moving-picture films while actually engaged in representing therein a military or naval character not tending to bring discredit or reproach upon the United States Army, Navy, or Marine Corps: *Provided further*, That the uniforms worn by officers or enlisted men of the National Guard, or by the members of the military societies or the instructors and members of the cadet corps referred to in the preceding proviso shall include some distinctive mark or insignia to be prescribed by the Secretary of War to distinguish such uniforms from the uniforms of the United States Army, Navy, and Marine Corps: *And provided further*, That the members of the military societies and the instructors and members of the cadet corps hereinbefore mentioned shall not wear the insignia of rank prescribed to be worn by officers of the United States Army, Navy, or Marine Corps, or any insignia of rank similar thereto.

"Any person who offends against the provisions of this section shall, on conviction, be punished by a fine not exceeding $300, or by imprisonment not exceeding six months, or by both such fine and imprisonment.

"SEC. 126. On and after July 1, 1916, an enlisted man when discharged from the service, except by way of punishment for an offense, shall receive 3½ cents per mile from the place of his discharge to the place of his acceptance for enlistment, enrollment, or original muster into the service, at his option: *Provided*,

That for sea travel on discharge transportation and subsistence only shall be furnished to enlisted men.

"SEC. 127. Nothing in this act shall be held or construed so as to discharge any officer from the Regular Army or to deprive him of the commission which he now holds therein.

"SEC. 128. All laws and parts of laws in so far as they are inconsistent with this act are hereby repealed."

And the Senate agree to the same.

JAMES HAY,
S. H. DENT, Jr.,
JULIUS KAHN,
Managers on the part of the House.

GEO. E. CHAMBERLAIN,
J. C. W. BECKHAM,
R. F. BROUSSARD,
H. A. DU PONT,
F. E. WARREN,
Managers on the part of the Senate.

The Clerk read the statement as follows:

STATEMENT.

The managers on the part of the House on the disagreeing votes of the two Houses on H. R. 12766, a bill to increase the efficiency of the Military Establishment of the United States, make the following statement:

The differences between the two Houses were so wide that the conferees were compelled to rewrite in a great many particulars the bill of the House and the Senate amendment thereto.

The bill, as agreed upon by the conferees, provides for a standing Army in time of peace of 175,000 enlisted men of the line, in addition to which are to be added the enlisted men of the Hospital Corps, the Quartermaster Corps, the Signal Corps, and the Philippine Scouts.

The section of the Senate amendment providing for a Volunteer Army was stricken from the Senate amendment, as was also the provision providing for a reserve army through training in schools, known as the Hardwick amendment.

The provision in the Senate amendment providing for vocational training of enlisted men of the Regular Army was modified so as to give to the Secretary of War full discretion as to the hours of instruction and training.

The organizations provided for in the Senate amendment were accepted by the House.

The increase of officers and organizations are to be made in five annual increments. The General Staff Corps, the Adjutant General's Department, the Inspector General's Department, the Judge Advocate General's Department, and the Quartermaster Corps are all adequately provided for to meet the increase in the Army. The Senate accepted the provision of the House bill with regard to the Medical Corps, which provided for 7 medical officers for every 1,000 of the enlisted strength of the Army.

The Ordnance Department is provided for as in the House bill.

The Signal Corps is increased and the aviation section of the corps is also increased.

The Senate accepted the House provision as to veterinarians.

The Senate accepted the House provision as to Porto Rico Regiment of Infantry.

The House accepted the number of detached officers provided for in the Senate amendment for duty with the National Guard and other detached duty. The House accepted the provision for the retirement of the officers of the Philippine Scouts.

Enlishment in the Regular Army is provided for as follows: A term of seven years, three years with the colors and four in the reserve, and the further provision that an enlisted man serving in continental limits of the United States after one year's honorable service may be furloughed to the reserve upon the recommendation of his company, troop, battery, or detachment commander, in the discretion of the Secretary of War.

Provision is also made for reenlistment.

Provision is made for an Army reserve and also for an Enlisted Reserve Corps.

Provision is also made for an Officers' Reserve Corps, both for the Regular Army and the National Guard.

The Reserve Officers' Training Corps, which the President is authorized to establish and maintain in civil educational institutions, is retained in the bill as it appeared both in the House bill and the Senate amendment, and is known as the Pomerene guard provision.

The Senate accepted the House provision as to the organization and federalization of the National Guard, with the exception that the oath of commissioned officers and enlisted men of the National Guard is the same as is provided for in the Senate amendment and the section of the Senate amendment with regard to the adjutant generals of the States is incorporated in the bill.

The nitrate proposition as it passed the House was agreed to by the Senate, no change having been made in the House provision.

There is retained in the bill the House provision for the utilization and mobilization of the industries of the country in time of war, and also the House provision providing for a board of five citizens to investigate and report upon the practicability of the Government manufacturing arms, munitions, and equipment.

Also the provision authorizing the Secretary of War to purchase or otherwise procure gauges, dies, tools, and fixtures known as the Tilson amendment.

The bill also provides for summer training camps.

JAMES HAY,
S. H. DENT, Jr.,
JULIUS KAHN,
Managers on the part of the House.

Mr. HAY. Mr. Speaker, I ask unanimous consent that there may be two hours' debate on this conference report, at the end of which time the previous question shall be considered as ordered, one half the time to be controlled by the gentleman from California [Mr. KAHN] and the other half by myself.

The SPEAKER. The gentleman from Virginia asks unanimous consent that debate on this conference report be limited to two hours, one hour to be controlled by himself and the other by the gentleman from California [Mr. KAHN], and that at the end of that time the previous question shall be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The House will be in order. The Sergeant at Arms will clear the aisles and keep them cleared until we get through with the consideration of this Army reorganization bill. If gentlemen wish to converse or carry on private debate with one another, the Chair wishes they would leave the Hall. Gentlemen will take their seats. The Chair wants to remark that the pair clerk's desk is not a joke exchange; and when gentlemen come down there to arrange pairs they will please do it as quietly as possible; and while there is a full attendance the Chair wants to repeat a remark that he made the other day, that when the roll is being called Members have no business to cluster around the Clerk's desk. It disturbs the clerks, and it raises a suspicion in the minds of men that the roll call is not fair. The clerks have no right to change votes, and they ought not to be asked to do it. [Applause.]

Mr. HAY. Mr. Speaker, does the gentleman from California desire to go ahead now?

Mr. KAHN. No.

Mr. HAY. Then, Mr. Speaker, I will take the floor. [Applause.]

This conference report embodies the compromise reached on the part of the conferees of the House and Senate on what is known as the Army reorganization bill.

The bill as it passed the House provided for 140,000 men of the line—that is, men who fight. The bill as it was amended by the Senate provided for 250,000 fighting men, and the bill as agreed upon by the conferees provides for 175,000 fighting men.

It has been stated that this bill carries an enlisted force of 206,000 men, and the inference has been drawn that they are all to be put in the Army at once. As a matter of fact, the increase over the number of men now in the Army is to be provided for in five annual increments; and the increase in the officers, with the exception of those officers who are to be used for the purpose of training the National Guard and teaching in military schools, are also to be added in five annual increments. So, as a matter of fact, this bill provides for the next fiscal year an increase of about 12,000 enlisted men and between 3,000 and 4,000 officers. It is entirely within the discretion of Congress, without infringing upon the rights of any officer or man, to cut off next year the increments which are provided for in this bill.

Mr. GARDNER. Will the gentleman yield?

Mr. HAY. I will.

Mr. GARDNER. Do I understand the gentleman to say that this bill only increases the enlisted force of the Army 12,000 men up to the 1st of July, 1917?

Mr. HAY. About that; yes.

Mr. GARDNER. Twelve thousand are the most we can expect up to the 1st of July, 1917?

Mr. HAY. Plus the 20,000 that were authorized in the joint resolution.

Mr. GARDNER. The filling up to about 109,000.

Mr. HAY. One hundred and nineteen thousand.

Mr. GARDNER. I think not.

Mr. HAY. Well, the gentleman probably knows better than anybody else.

These increments are wholly within the discretion of Congress in the next five years. When this war in Europe is over, "when the war drums beat no longer and the battle flags are furled," when the hysteria which has been pervading the atmosphere of the country has died away, when the shouting and the tumult are no more, then Congress can cut off these increments and make the standing army of the United States any number it pleases. [Applause.]

Certain people in the other body were amazed at the attitude of the House of Representatives, and I am amazed at some of the Senators who are trying to couple this legislation with a possible emergency which may exist to-morrow, next week, or next month. This is not an emergency bill. It is not intended as an emergency bill; it is not intended to raise an Army for the purpose of possible war with Mexico or any other power. It is intended as a peace proposition, as I have often said on this floor, and no man who understands the bill or the situation can couple with it what it must be necessary to do in the event of war breaking out in the next few months.

We have already on the statute books, placed there two years ago, a bill known as the volunteer army bill, which would enable the President, when authorized by Congress, to raise as large an Army as he wants if we should be so unfortunate as to go to war. It is useless to try and enlighten these densely ignorant newspaper editors [laughter and applause] who have been undertaking to write about this legislation without knowing anything about it and who have been slandering the Congress of the United States without taking the trouble to find out what Congress was doing or had done. [Applause.]

I beg gentlemen to carry that distinction in their minds that this is not an emergency bill but a bill for future preparedness, and it does that. This bill provides a standing army as large as can be recruited in this country under the volunteer system. It provides a larger number of men than I believe the recruiting officers think they can get. It provides an organization which in time of war can be increased to an army of 216,000 men.

It provides for training young men as officers; it provides for an officers' reserve corps; it provides for a Regular Army reserve of enlisted men; it provides for an enlisted reserve corps of men from civil life; it provides for a nitrate plant to manufacture powder; it provides for the utilization and mobilization of industries in time of war; it provides for purchasing gauges, dies, tools, and fixtures for the purpose of equipping manufacturing plants to be used in time of war—all of these provisions were original House provisions and originated here. [Applause.]

It provides for the development of the National Guard, the only volunteer force in this country which is in existence and with which we could work. It provides for their development, and since this law has passed the House it has developed the National Guard to the extent that at least 40,000 new men have applied for membership in the National Guard. [Applause.] That carries out the assertion made that if the National Guard was put on a proper basis we would have at least the number provided for in this bill in a few years—425,000 men as a reserve. It is purely a preparedness measure. It meets the best thought of the two bodies and, in my judgment, merits the support of every man on this floor.

Mr. MADDEN. Will the gentleman yield?

Mr. HAY. Yes.

Mr. MADDEN. What would be the probable annual expenditure for the National Guard under the provisions of this bill, and would it be effective all at once or does it come annually?

Mr. HAY. It is effective all at once. Of course the annual expenditures depends upon the number of men in the National Guard.

Mr. MADDEN. Assuming the full strength is provided.

Mr. HAY. It would be about a hundred million dollars a year.

Mr. SHERWOOD. Will the gentleman yield?

Mr. HAY. Yes.

Mr. SHERWOOD. If the 63 recruiting officers of the United States failed to get the volunteers, does the bill still provide for an increase of officers?

Mr. HAY. It does not. The bill provides for five annual increments both of commissioned officers and enlisted men, so that, as I said, it is within the power of Congress to cut off the increments if they desire without in any way invading the right of any officer or any man. Therefore, the standing army being in the discretion of Congress, it is for them to say what number they will have when the war is over and when the hysteria passes away.

Mr. Speaker, if there is any gentleman who has a question to ask, I would be glad to answer it. The subject has been so much debated that I do not think it is necessary for me to take up the time of the House.

Mr. HELGESEN. What does the bill provide as to service with the colors?

Mr. HAY. Three years with the colors and four years with the reserve.

Mr. THOMPSON. How much would this bill increase the expenditure for the Army?

Mr. HAY. I will say that this bill, as far as the personnel is concerned, would increase the expense of the Army about $25,000,000. But the gentleman must remember that we are being asked to provide a large reserve of ordnance, guns, ammunition, machine guns, and everything of that sort, and therefore the Army bill will be very largely increased by reason of making provision for the reserve supplies asked for.

Mr. THOMPSON. How much?

Mr. HAY. I can not say; but I think the Army bill will be about $150,000,000 this year.

Mr. THOMPSON. One hundred and fifty million dollars increase?

Mr. HAY. Oh, no; $50,000,000 increase.

Mr. BARNHART. Does the bill carry a provision for vocational training?

Mr. HAY. Yes.

Mr. BARNHART. What is the provision as to profits?

Mr. HAY. That is left to the discretion of the Secretary of War.

Mr. MADDEN. How many men of all classes will it be possible to employ or enlist under the terms of this bill—I do not mean the fighting line?

Mr. HAY. The gentleman means outside of the reserve?

Mr. MADDEN. Everything.

Mr. HAY. Why, it is possible to enlist large numbers. It is impossible to tell how many, but any man who wants to go into the enlisted reserve corps provided for in this bill who is a chauffeur or mechanician of any kind, can do so, and any man who can qualify can go in the officers' reserve corps. Of course, these corps do not cost anything except in time of war when their members will be called into active service.

Mr. MADDEN. Assuming we had the maximum number of men provided for in this bill in the line, how many will there be in the whole service?

Mr. HAY. One hundred and seventy-five thousand.

Mr. MADDEN. How many men would that increase the Army including quartermasters and all other branches of the service?

Mr. HAY. The gentleman means the Quartermaster Corps, Hospital Corps, untrained recruits; about 31,000.

Mr. MADDEN. In addition to the 175,000.

Mr. HAY. The gentleman understands they are noncombatants.

Mr. STAFFORD. Will the gentleman yield?

Mr. HAY. I will.

Mr. STAFFORD. When the Regular Army is up to its full fighting strength of 175,000 and the militia or National Guard is up to its full maximum strength and all the other forces as provided for in this bill are in service, what does the gentleman estimate will be the total national expense for maintenance yearly?

Mr. HAY. Well, I have not figured that that would take place in the near future.

Mr. STAFFORD. The gentleman can count on our having these annual increments of 12,000 men and additional officers will be required each year?

Mr. HAY. I assume an army of 175,000 men would cost about $200,000,000 a year.

Mr. STAFFORD. That, together with $100,000,000 for the National Guard, would be an annual cost of $300,000,000.

Mr. HAY. Yes.

Mr. STAFFORD. In that particular I wish to inquire how much will the States be relieved of the burden of supporting the National Guard by the provisions as carried in this bill?

Mr. HAY. That is up to the States. They can do as they please about it. We can not control the State appropriations and do not undertake to do it in this bill.

Mr. STAFFORD. The gentleman knows, however, the National Government provides the camps and all the munitions, matériel, and so forth?

Mr. HAY. We do that now. The Government does that now under the present law.

Mr. STAFFORD. Not to the extent of paying officers or men.

Mr. HAY. Not to the extent of pay; but we provide everything else but the pay now.

Mr. STAFFORD. It is only an annual expenditure of something like $8,000,000, whereas this will provide an expenditure of $100,000,000.

Mr. HAY. Oh, no.

Mr. STAFFORD. Not for the same number of men, but with the force allowed it will be $100,000,000.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. HAY. I yield to the gentleman from Pennsylvania.

Mr. MOORE of Pennsylvania. In going over the conference report I notice, page 5, under the head of the "Judge Advocate General's Department," a proviso which contains a description of a judge advocate general that is rather unusual. It provides that he shall have been a judge of the Supreme Court of the Philippine Islands for a period of 10 years. Is it the idea that there shall be a judge advocate general located in the Philippine Islands?

Mr. HAY. No; but there is one located there. I will say to the gentleman, that provision was put in at my request, if that is what the gentleman desires to know.

Mr. MOORE of Pennsylvania. I wanted to know if this was not an unusual designation?

Mr. HAY. Not at all. A large number of the officers in the Judge Advocate General's office were civilians, and were appointed from civil life.

Mr. MOORE of Pennsylvania. He is to have been a judge of the supreme court——

Mr. HAY. And also in the Volunteer Army.

Mr. MOORE of Pennsylvania. I inquired to find out if it was the intention to locate one of those judge advocate generals specially in the islands?

Mr. HAY. There is a judge advocate in the islands always.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. HAY. I will.

Mr. GREEN of Iowa. I understood the gentleman, in reply to a question from the gentleman from Massachusetts [Mr. GARDNER], to name the number of enlisted men who would be added by the bill. I assume that in giving that number the gentleman meant that was in addition to the 20,000 we provided for a short time ago. Am I correct in that?

Mr. HAY. Yes, if we ever get them.

Mr. GREEN of Iowa. If we ever get them.

Mr. TRIBBLE. Will the gentleman yield?

Mr. HAY. I will.

Mr. TRIBBLE. I would like to have a little more information with reference to the National Guard and the Regular Army in time of peace. In other words, what benefits the National Guard get from this bill that they have not had heretofore?

Mr. HAY. They get pay.

Mr. TRIBBLE. What pay do they get?

Mr. HAY. Captain and officers above the rank of captain get $500 a year, and enlisted men get one-fourth of the pay of the Regular Army.

Mr. SMITH of Michigan. Does anybody who enlists in the National Guard at the present time get pay?

Mr. HAY. They do not.

Mr. SMITH of Michigan. You spoke something of the difficulty of recruiting the Army to its full strength. I would like to inquire whether or not now the Army is not being recruited to its full strength for volunteers, and what progress is being made—whether or not they are joining freely?

Mr. HAY. I will state to the gentleman that they are not joining freely. We passed that resolution in March, over two months ago, and they have succeeded in getting only 6,000 men, and that number will about take the place of the number going out at the expiration of their term of enlistment.

Mr. SMITH of Michigan. How many stations are recruiting?

Mr. HAY. I understand there are 253, although I am not certain about the number.

Mr. GUERNSEY. As I understand, the added expense of the bill is $100,000,000, on account of the National Guard?

Mr. HAY. The bill does not do that unless the National Guard is recruited up to 425,000 men.

Mr. GUERNSEY. What is the estimated expense of the first year on account of the National Guard?

Mr. HAY. About $27,000,000.

Mr. GILLETT. Will the gentleman tell us, if the Army is recruited up to its full strength of 175,000, how large a mobile army it would leave?

Mr. HAY. We would have 175,000 men.

Mr. GILLETT. Does not the gentleman include the coast defenses?

Mr. HAY. Yes.

Mr. GILLETT. How many would that take?

Mr. HAY. That would take 30,000.

Mr. GILLETT. Is that the only reduction?

Mr. HAY. Yes; that is all.

Mr. MEEKER. Has the gentleman received the report of the enlistments to the Regular Army from Boston of about five weeks?

Mr. HAY. I heard that they got one recruit there. I do not know whether that is true or not. [Laughter.]

Mr. KAHN. Mr. Speaker, I yield 10 minutes to the gentleman from Ohio [Mr. LONGWORTH].

Mr. LONGWORTH. Mr. Speaker, I shall vote for this conference report [applause], but not, I confess, with undiluted enthusiasm. It is an improvement, though, over the bill as it passed the House in many respects, and while it falls far short of meeting the exigencies of the times as I see them, it is at least a considerable step in the right direction.

There is one provision in this report, however, that I regard as possibly the most obnoxious and unjustified piece of legislation that has passed Congress in my experience. I mean the so-called Government nitrate plant. [Applause.] Unfortunately the parliamentary situation is such that we must vote the whole report up or we must vote it down. We must take the bitter with the sweet, if we are to get any of the sweet, and I am compelled, therefore, at the risk of the permanent impairment of my digestion, to stomach this nitrate proposition, but not without voicing, if a useless, at least an emphatic, protest. [Applause.]

What is this so-called nitrate proposition? It is a scheme to spend $20,000,000 of the people's money absolutely uselessly, so far as they are concerned, and the inherent vice of it all is that this money is being taken from them under false pretenses. In the name of national preparedness we are going to spend $20,000,000, and this is but an entering wedge, for eventually it will cost millions more if carried out upon a scheme which has nothing whatever to do with national preparedness, upon a scheme which, when advocated on its real merits, has been repeatedly repudiated by Congress.

Whether or not this scheme can be justified upon any other grounds—and in my judgment it can not be—my proposition now is that it is wholly unjustifiable on the ground of national preparedness and therefore has no proper place in this bill. The "preparedness" cloak is falsely used in this wise: It is argued that if this country were at war and we should have lost control of the sea and be deprived consequently of the use of Chile saltpeter, then we would have to obtain the nitrogen necessary for explosives from the air, and that this can only be done by the use of water power.

Now, the assumption that water power is necessary for the fixation of nitrogen is false, and I challenge, as I have repeatedly challenged, contradiction of that statement. I have on a number of occasions during this session, in speeches and by insertion of documents in the RECORD, shown on unimpeachable authority that there are a number of methods, some in use and some in process of development, in this and other countries for the fixation of nitrogen which are better and cheaper than water power. I have pointed out, by way of illustration, that German interests which owned the control of the water-power company in Norway, where formerly nitrogen was produced by the use of the best and cheapest water power in the world, disposed of their control in that company for the avowed reason that nitrogen could be better and more cheaply obtained at home where there is no water power.

It is useless now to discuss these methods or deal in technicalities, but I want once more to submit this proposition to those who, on the plea of preparedness have forced the inclusion of this item in this bill.

If it be necessary as a preparedness measure to spend $20,000,000 to develop water power to make nitrogen, how is it that Germany, concededly the best prepared and most efficient military power in the world's history who has found herself for a year and a half in the exact situation we are now seeking to guard against—how is it that Germany is daily turning out nitrogen and high explosives in unlimited quantities without the use of an ounce of water power?

I shall not pause for an answer, because there is no answer. [Applause.]

There is one regrettable and distinctly unpleasant feature about this whole business. From the outset there has been a determined and continued effort on the part of somebody or other to keep the real facts from the public. A short time ago there was sent to the newspapers by the Smithsonian Institution for release on the 6th of this month an interesting and elaborate treatise on the various methods of securing nitrogen by other than the use of water power. A few days before its publication, however, it was ordered withdrawn and killed.

This document is to be found on page 7606 of the RECORD, included in the remarks of the gentleman from Wisconsin [Mr. LENROOT]. There is only one possible explanation of this remarkable incident, and that is that some one interested and highly influential found the information published therein embarrassing to the success of this water-power project.

Mr. MANN. Will the gentleman yield?

Mr. LONGWORTH. For a very brief question.

Mr. MANN. Does the gentleman know that shortly after the vote taken in the House on the nitrate proposition the same thing was again furnished in practically the same form and published?

Mr. LONGWORTH. I was not aware of that, but I have no doubt that the gentleman is right. It was a question of the psychological moment in that case.

I have heard it said that the administration insisted that this scheme should be included in the bill. If that be true, it was due, I am sure, either to ignorance of the facts or else to misrepresentation of the facts by those directly interested.

I do not assert that history is repeating itself. I merely mention in passing that it was said of a former President not many years ago by certain of his opponents that he too good-naturedly gave ear to "gentlemen who know exactly what they want." This water-power nitrate scheme, I repeat, is not a preparedness measure and has no place in this bill. I will go even further. Without posing as a prophet or the son of a prophet, I venture this prediction, that not a pound of nitrogen will ever be made at this plant for the use of the Government in time of war. It is obsolete for war purposes before it is built. As a weapon of defense in time of peril to the Nation it will be about as useful as one of the old monitors that are to-day used as targets for our own guns. [Applause.]

The American people will not benefit by this scheme. Not a soul will benefit except a few highly efficient captains of industry, who "know exactly what they want" and who at this moment are doubtless laughing in their sleeves at the ease with which they have pulled the wool over the eyes of a docile Congress.

This incident is not closed, gentlemen. It will rise to plague in the not far-distant future. The people are going to demand an accounting for this and other reckless drafts upon their Treasury. Be well assured that the "pork barrel" will not smell sweeter because of the admixture of its contents with fertilizer. [Applause.]

Mr. KAHN. Mr. Speaker, I yield five minutes to the gentleman from Vermont [Mr. GREENE].

Mr. GREENE of Vermont. Mr. Speaker, I take this occasion simply to put myself on record again in favor of the general policy, and, so far as I may subscribe thereto, to the details embodied in the conference report now before the House for its consideration. As a member of the House Committee on Military Affairs, and as one who for one reason or another for a number of years has endeavored to give some study to the general proposition of national defense and the Military Establishment of the country, I have made up my mind that notwithstanding some of the ideals of a better systematized and more extensive preparation for national defense that I had entertained, this is the best thing I can hope to have an opportunity to vote for under the circumstances.

I am a Vermont Yankee, and it is said to be somewhat characteristic of our people that we know something about how to make a trade. The underlying philosophy of that characteristic is to walk away with all you can honestly get. But I ask you to notice that, as a part of the definition, we are to "walk away," and when we have got all we can get it is time to walk away. I believe we have got all we can get in the present temper of the Congress and with the present organization of this House, and this is the psychological moment, to use a hackneyed phrase, for us to take what we can get and walk away. [Applause.]

I believe that the present Military Establishment is, and has long been, altogether inadequate for the purpose for which it should be designed, and I believe that the coming years will demonstrate even more emphatically than the years of the past have done that we shall need a first-class scheme of national defense if we are to hope to maintain our place among the nations or at least to preserve our own self-respect.

It does not make any difference about the dreams of the millennium. It does not make any difference about the dreams of the pacifists, or of all those who expect that at some time or other in the near future nations are going to beat their swords into plowshares and their spears into pruning hooks. In the language of a former Democratic President, "It is a condition, and not a theory, that confronts us"; and if we want any demonstration of that at all, we have to cast our eyes no farther than the Rio Grande at this very moment. We are not prepared to maintain our self-respect before the nations of the world, under present conditions, with our present Military Establishment.

But I am not one who joins in the idea that all these preparations for national defense should be made in the excitement of immediate and temporary hysteria. I do not believe, myself, there is anywhere near the probability that we shall be engaged in the present war in Europe or that its immediate consequences will be brought home to our doors at once. That might at one time not long ago have appeared likely; but I do believe that the greatest danger of war will threaten this country of ours when the European conflict is over, perhaps some years after it is over, when the great nations now fighting each other will be struggling to regain their share of the world's trade and the world's money to recoup the tremendous losses they are now undergoing. Then will come the inevitable jealousies and frictions that experience shows under one pretext or another all too often lead to war. And the United States, the one great Nation on the globe that actually made a vast money profit while its neighbors were well-nigh bankrupting themselves in war, in its enviable prosperity and riches will be the most conspicuous target of the competition of the great industrial powers of the world. I believe this proposed law, while not all that I desire, is a long step toward the Military Establishment I hope some day to see provided, and I am convinced that it is all that we can possibly expect to get in the way of a greater and better Military Establishment at this time.

The SPEAKER. The time of the gentleman from Vermont has expired.

Mr. GREENE of Vermont. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Vermont asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. KAHN. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MCKENZIE].

The SPEAKER. The gentleman from Illinois [Mr. MCKENZIE] is recognized for five minutes.

Mr. HAY. Mr. Speaker, I yield five minutes to the gentleman.

The SPEAKER. The gentleman from Illinois is recognized for 10 minutes.

Mr. MCKENZIE. Mr. Speaker and gentlemen of the House, I do not know that I shall require 10 minutes to say what I desire to say. In the first place, I simply wish to say that I am going to support this conference report, not that it suits me entirely, because if I had had my way about it I would have left out a few brigadiers and the fertilizer plant and made it a defense bill pure and simple.

But, gentlemen of the House, all matters of this kind are more or less of a compromise, and they ought to be. If we were to be guided by the extreme pacifists in this country, our Nation would be as defenseless as China; and, on the other hand, if we were to be guided by the extreme radical militarists of our country they would saddle onto us a military despotism that would make the militarism of Russia and Germany look like the girls' camp out at Chevy Chase. [Laughter and applause.] But on a great question like this men should be reasonable. They should endeavor to give to the people that character of legislation that is practical and that can be worked out under existing law and under existing circumstances. This bill takes care of the Regular Army in an organization formulated, as I am told, by experts from the Army. It takes care of the National Guard, and combines these two elements of national defense.

The National Guard is now on trial. It remains to be seen whether or not it will give to our country that element of defense which we expect of it. If it does not, then it must step out, and we will have to take up some other plan for training the boys of our country.

I believe that this bill will demonstrate a number of things. It will demonstrate, as I have said, whether or not we can depend upon the National Guard for our reserve. It will determine another question, and that is whether or not the American boy will enter the Regular Army for $15 a month, and if so, it will be an easy matter to extend the Regular Army if the people of this country desire so to do.

Personally I am opposed to a large standing army in time of peace. But that is my individual opinion. If the people of the country want it and the boys will enlist in the Regular Army, all well and good. But if they will not, it will be demonstrated that in order to have a Regular Army we must have conscription, and I am not one of those who believe that the American people are yet ready to have their boys taken in time of

peace and put into the Regular Army to serve for three years. [Applause.]

Ex-President Roosevelt said, if war should come, he and his four sons and his two sons-in-law, or at least one of them, would enlist and rally to the colors. [Applause.] I have no doubt about it, and especially I have no doubt about his distinguished son-in-law, who is an honored Member of this body, going to the colors. [Applause.] Why, of course, they would. I do not doubt the ex-President's word. If ever a foreign power attempted to lay hands on that grand old flag the boys would come from all over this country, as Mr. Bryan says, "a million men springing to arms overnight." [Applause.] Yes; they would come as they did in the years gone by, when they came singing that old song, "We are coming, Father Abraham, 100,000 strong."

But, gentlemen of this House, that is not preparedness. I believe in that character of preparedness that will have something for these boys to take into their hands when they spring to the defense of the flag, and that they will know how to take care of themselves.

And, after all, I want to say once more that, in my judgment, the Regular Army should not be our main thought as a means of national defense. Let us protect our harbors, let us protect our coast line, let us build up our Navy, so that if war ever comes it will do the fighting and prevent the enemy landing on our shores. And the time is coming and is not far distant when we will be called on to vote on the matter of a great navy.

Mr. FERRIS. Will the gentleman from Illinois yield for a question?

Mr. McKENZIE. If I have the time.

Mr. FERRIS. I notice that on the call for 4,000 of the National Guard in the State of Texas only 55 failed to respond. I wonder if that is not typical of the way in which the men of our country will respond when they are needed?

Mr. McKENZIE. That is the history of our National Guard through all the history of our country, and I am proud of it. [Applause.]

Mr. KAHN. Will the gentleman yield for another question?

Mr. McKENZIE. If I have the time. How much time have I?

The SPEAKER. The gentleman has three minutes?

Mr. KAHN. Did the gentleman also read in this morning's paper that the National Guard of Arizona and New Mexico are so badly equipped that they have not been able to mobilize yet?

Mr. McKENZIE. Yes; and I think there is probably something in that, and I will vote to give them the necessary equipment. I think that is the thing we want to look out for—to equip and take care of the boys when they are called into the service of the Government.

Now, gentlemen of the House, I want to say just one word more. It has been said of me and of some others in this fight which we have made in this House, and it has been said in the editorial columns of one of the great newspapers of the world, that we were in favor of leaving this Nation defenseless, and that we were impelled in that by a desire for "pork" or because of sheer cowardice. I want to say to you, gentlemen of this House, that I believe every man here has endeavored to do his patriotic duty. But when a great conflict like this is on, when the waves of passion and emotion are driving men from their steady, stable courses, I think it is the time when a man can show his greatest courage by standing up for what he believes to be right and for the best interests of his country as he sees it and refusing to be driven as a coward from his position because some one criticizes him. [Applause.] I have done in this matter what I believed to be for the interest of my country and my flag, and I have no apology to make to any editorial writer or to the people of the country. [Applause.] I have done my duty, as I think every man here has done his duty as he saw it, and I thank God that we have reached a reasonable, sane compromise, which means reasonable preparedness for our country in time of peace. [Applause.]

I yield back any time that I have remaining.

The SPEAKER. The gentleman yields back one-half minute to the gentleman from California [Mr. KAHN] and one-half minute to the gentleman from Virginia [Mr. HAY].

Mr. KAHN. I yield 10 minutes to the gentleman from Massachusetts [Mr. GARDNER].

The SPEAKER. The gentleman from Massachusetts [Mr. GARDNER] is recognized for 10 minutes. [Applause.]

Mr. GARDNER. Mr. Speaker, the gentleman from Ohio (Mr. LONGWORTH) is wrong in supposing that voting down this conference report defeats the bill. If you vote down this conference report you open up the whole question, so that you can strike out the provision for that nitrate plant if you want to, if you have the votes to do it, and you can put some real things into the bill. The bill as it now stands will be voted for by practically every pacifist in this House and will be praised by every little Army man in the country. Now, what does the bill do? The chairman of the committee (Mr. HAY) has told us that the most it does by way of increasing the enlisted line of the Army is to add some 12,000 men between the present time and the 1st of July, 1917, over a year from now. On the 1st of July, 1917, almost three years after the European war started, we shall have 12,000 more men in the Regular Army, and that is all we will have. That is true, is it not?

Mr. HAY. Plus 20,000.

Mr. GARDNER. Plus whatever we have been able to get under the recent joint resolution.

Mr. HAY. That is the point, you know. Why did you not propose something like compulsory military service, if you believe in it?

Mr. GARDNER. I am in favor of compulsory military training for every man in the United States.

Mr. HAY. Why did not you offer that amendment to the bill? [Applause on the Democratic side.]

Mr. GARDNER. Does the gentleman think I failed to offer that amendment because I was afraid of stating my position?

Mr. HAY. Not at all.

Mr. GARDNER. Mr. Speaker, the gentleman is quite mistaken as to the size of the Regular Army which is at present authorized by law. I have just telephoned down to The Adjutant General's department, and I find that the full authorized enlisted strength of the Army is very much nearer what I said than what the gentleman said. I shall have complete figures in a few minutes. Here are the facts with regard to the number of enlisted men of the line now authorized by law for the Army: Up to a few days ago the complete strength authorized for the United States Army was 100,000 enlisted men of the line. Since then we passed a joint resolution permitting recruitment of the Army up to war strength, which I figure to be about 109,000 men. Now, this pending bill proposes to give us 175,000 enlisted men of the line. It proposes to pay men for serving in the State militia. It provides for camps of the Plattsburg type, and that is all it does.

The Senate provided 250,000 enlisted men of the line. The House rejected that proposition. We were told that we can not enlist so many men. Of course, as matters stand at present you can not get men enough to enlist. It is a surprise to me that we get so many men as we do to give away their services to Uncle Sam in time of peace for 50 cents a day. That is the wage of the Regular Army man—50 cents a day. Of course, we can not get enough enlistments. If we want men we must go out in the labor market and get them. That is the only way we shall ever get them in time of peace.

Mr. QUIN. Will the gentleman yield there?

Mr. GARDNER. Yes.

Mr. QUIN. How much would the gentleman pay?

Mr. GARDNER. I offered an amendment which the gentleman voted against——

Mr. QUIN. And I will vote against everything you favor increasing this Army bill, I will tell you that.

The SPEAKER. When a gentleman asks the Member who has the floor a question he ought to give him a chance to answer.

Mr. QUIN. I want to know how much you will pay them.

Mr. GARDNER. When the bill was up I offered an amendment providing $20 a month for the lowest-rank enlisted men, and increasing all the rest along the line.

Now, Mr. Speaker, these 65,000 men—and it is only 65,000 new men which are authorized—I will tell you what they can do. They can man a trench which extends one-sixth of the distance around the city of New York, and that is all they can do, the whole 65,000 men, if you ever get them, and you do not undertake to get them for five years. You do not propose to get them except one-fifth each year, so that it will be five years before you get them. But you are not going to get them at the present wage. You are not going to get 250,000 men who are willing to go out and obey your officers and sleep in cactus bushes along the border unless you pay them as much as a 16-year-old girl can get in a sweated industry.

Mr. SABATH. Will the gentleman yield?

Mr. GARDNER. Yes.

Mr. SABATH. Does the gentleman believe that by increasing the pay 15 cents a day, from 50 cents to 65 cents per day, that that will secure a larger enlistment?

Mr. GARDNER. Yes; that is the evidence of the officers who testified before the Committee on Military Affairs. I do believe it, because when we raised the pay $2 a month enlistments shot right up.

Mr. SABATH. Is the gentleman willing to pay them 65 cents a day?

Mr. GARDNER. I am willing to pay the men any amount to get men in the labor market, if it is a dollar a day and everything found.

Mr. ANTHONY. Will the gentleman yield?

Mr. GARDNER. Yes.

Mr. ANTHONY. Is it fair to say that these men get 50 cents a day when they really get an equivalent of $40 or $50 a month?

Mr. GARDNER. Yes; that is a fact; they get the 50 cents a day and keep, which some people claim is equivalent to $40 or $50 a month.

Now, Mr. Speaker, the two great jokes of the century have been perpetrated within the last 12 months. One was when Bryan resigned from the Cabinet because Wilson was too much of a Hotspur. The second joke was when we sent the whole Army of the United States to catch one murderer and a parcel of ragamuffins. [Laughter and applause.]

The fact of the matter is that no one has given a single good reason why we should not have an Army of 250,000 men, except that some people want our militiamen on the first line of defense. I do not want them in the first line. I have been in the militia; I have seen them break down in marches in the hot sun in the Spanish War; I have seen them go all to pieces. I have seen their health break down; they are not trained, not hardened, not to be depended upon for the first line; in spite of anything you pay them they are not going to be dependable for the first line. Civilians can not give the time to military matters requisite to fit them for service in the first line at the outbreak of war.

Everybody agrees that in case of a war with a strong power we are going to need 500,000 thoroughly trained men to stop the first rush while the Volunteers are being trained for service. Of course this is based on the assumption that our Navy has lost control of the seas. That figure is agreed on by pretty much everybody, only the authorities disagree as to how we should raise those 500,000 men. The War College says that we ought to have a Regular Army of 250,000 and a regular reserve—that is, a reserve of men who have been Regulars—so that when the war breaks out we shall have available half a million fully trained men who have not grown too old or too fat or too proud to fight. This is the principle the War College lays down: A first line of 500,000 men, exclusively Regulars and former Regulars.

The proposition laid down both by the Chamberlain and by the Hay bills is a first line of 500,000 men partly Regulars and the rest militia men.

My friends, I say to you that that is unsafe.

Do not make a farce of the whole question of preparedness. It is as though we had not learned anything from the war in Europe. You had much better leave the whole matter alone than make a pretense of preparedness. [Applause.]

Mr. KAHN. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, I shall vote against the conference report. [Applause.] As a primary proposition I voted for the bill when it passed the House, because that was the only way we could have the bill make any progress or send it to the Senate for consideration there. But if we should defeat the conference report now, the gentleman from Virginia, who is opposed to the increase that I want, would lose control of the bill. We would send the bill back with new conferees who might agree on proper provisions for the increase of the Army as an emergency proposition.

I like the gentleman from Virginia; he is a fighter. If we could pick an army out anywhere in the world composed of such fighters as Mr. HAY, that army could lick any other army that could be made up. [Laughter and applause.] But he is frank with the House; he does not endeavor to deceive the House. He says that this is purely a peace proposition; that it is not an emergency proposition. He says there is no emergency which this bill is designed to take care of. He frankly states that to the House.

I think there is an emergency in the world. The emergency exists now. It is an emergency which we ought to look forward to and prepare against. The emergency is now. We are not engaged in war now, we do not expect to be engaged in war, but we may be. It is our duty to prepare now for the emergency which now exists, and it is not preparing by saying that we will add 12,000 men to the Army inside of the next 13 months.

The President of the United States could have his way if he would say so. He could tell the Democrats in this House what to do and they would do it. The President of the United States traveled around the country and said, "The sparks are flying everywhere. They may set our house on fire. We should be prepared against that contingency." And lo and behold, he now is indorsing a bill which, with the sparks flying all around, with the danger of our house being set on fire, would not do as much as a pail of water a mile away. Twelve thousand more men in 13 months! We can afford to spend the money preparing against the possibility, knowing that the danger now exists. We will be thankful, if we should prepare now, that we escape with so little loss of money, but if we fail to make preparation now for an emergency that now exists and war should come, history will never tire of telling of the faithlessness of those who supported this proposition. [Applause.]

Mr. KAHN. Will the gentleman from Virginia use some of his time?

Mr. HAY. Yes. I yield five minutes to the gentleman from New York [Mr. CALDWELL]. [Applause.]

Mr. CALDWELL. Mr. Speaker, I am a new member of the Committee on Military Affairs, a big Army man, and I am in favor of this bill because it provides what in my opinion is a big Army, the biggest Army that the United States can hope to get at this time without absolute universal service throughout the country. It provides for a Regular Army as large as can be procured under our system of pay, according to the testimony of Adjt. Gen. McCain, whom I regard as the best posted man in America on this subject. He said that a slight increase of pay would not, in his opinion, based upon his experience, materially increase enlistment, so therefore no increase was provided by the Committee on Military Affairs in its proposed bill. Now, on the question of the organization of the citizen soldiery of this country, I desire to call the attention of this House to the provision of the bill known as section 62. Under that bill the minimum is all that is prescribed. There is no maximum fixed for the citizen soldiery of America and there should not be a maximum, because every citizen of America is ready to be a soldier whenever he is needed.

Mr. DAVIS of Texas. Amen!

Mr. CALDWELL. I would remind the gentleman from Texas that we are in the Halls of Congress, not in a church.

Now, under this bill there can be no soldiery except that which is prescribed by the bill and authorized in accordance with the plan laid down. In the State of New York, the State of Massachusetts, the State of Connecticut, the State of New Jersey, and the State of Pennsylvania, which have already shown that they are prepared to vote universal service, or universal training, as the gentleman from Massachusetts would say—if they pass such statutes as that, every man of the organization becomes a part of the National Guard, and immediately after enacting such statute we will have under arms in the United States more than 3,000,000 men ready, able, and willing to go to the defense of this country. What more do you want? As to the men in the Middle West or central parts of the United States who are against preparedness, I say to you that this bill is good because your people can stay at home if you want them to and our people who desire to train for the defense of their country can organize under this bill and learn how to defend the country when called.

In conclusion, gentlemen, I want to say that in my opinion you who oppose this bill, now that it has come here from the conferees, formed and framed as it is, and with the compromises made, remind me very much of the young, overgrown boy who attempts to cover up his chin and exposes his feet. [Applause.]

Mr. HAY. Will the gentleman from California use some of his time?

Mr. KAHN. Mr. Speaker, I yield five minutes to the gentleman from Kansas [Mr. ANTHONY]. [Applause.]

Mr. ANTHONY. Mr. Speaker and gentlemen of the House, I believe that every Member of this House, if he should perform the duty that he owes to himself and the country, should cast his vote for this bill to-day. [Applause.]

The bill carries more than any of the gentlemen who have yet spoken against it realize. It carries a great deal more of preparedness than the country to-day realizes. While it is true that the bill provides that the increases made in the Regular Army shall be in five annual increments, yet the authority is conferred by this bill upon the President of the United States that upon the outbreak of war, or even with the imminence of war, whenever he believes it necessary, he can instantly set the machinery in motion and increase the Regular Army to the maximum of practically 300,000 men. That is what this bill does; and yet they speak of it as a "little Army" bill. In addition to that, the National Guard is to be increased 50 per cent of the 427,000 authorized the first year, over 200,000 men, and the President is also empowered to at once increase the guard to its maximum of 427,000 men, if he deems it necessary. In addition to that, means have been provided, and ample funds will be given in the

appropriation bill, by which every powder factory, every munition plant, every arsenal for the manufacture of guns, large and small, will be kept going day and night if necessary to put this country in a proper condition of preparedness. All that is needed, gentlemen, is for the press of this country—the big city papers are the greatest sinners in this respect—to tell the truth about the legislation that the Committee on Military Affairs of the House and Senate and the action which the House and Senate will have placed on the statute books to-day, that proper provision has been made in these matters, and the country will be satisfied with this bill.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. ANTHONY. I will.

Mr. SMITH of Michigan. I understood from the gentleman's remark that the President now has authority to increase the present Army up to 300,000 men?

Mr. ANTHONY. Up to practically 300,000 men, in this bill.

Mr. SMITH of Michigan. Could he on the day after this bill passes this House make an order that would be followed by that increase in the number?

Mr. ANTHONY. If he still believed that "sparks are flying and that our house is liable to burn" he can to-morrow instantly set in motion the machinery to give us a Regular Army of 300,000 men. [Applause.]

And if such conditions prevail, gentlemen, there will be no trouble in increasing even the Regular Army to that amount. Now, I can cheerfully support this bill, because it happens that the increase of organizations, of men, and of officers which have been made, practically coincide with the ideas that I originally advanced in the committee and on the floor of this House. I believe the conferees have done their work well. They have given the country what it needs in the way of a Regular Army. They have given the War Department all it can well digest in the next few years, and if it succeeds in getting the number of officers, even, that we have provided for, in the next year, it will be mighty lucky.

Mr. SABATH. I know the gentleman is posted as well as any Member of this House, and therefore I am going to take the liberty of asking the question whether any provisions have been made in this bill as to the increase of our munitions and arms?

Mr. ANTHONY. There have been no direct provisions made in this bill, but the proper appropriations will be made in the bills which will follow, and adequate provision, in my opinion.

Mr. TILSON. There are provisions in this bill. In fact, there is one which I had the honor of proposing to this House, and which went through, authorizing an appropriation for matériel. Is that right?

Mr. ANTHONY. That is true.

Mr. GUERNSEY. Will the gentleman yield?

Mr. ANTHONY. Yes.

Mr. GUERNSEY. Did the gentleman consider the proposition of establishing a Government munitions plant in the interior of the country?

Mr. ANTHONY. Let me say that provision is going to be made so that every plant now possessed by the Government will be run to its full capacity, perhaps, for years to come.

Mr. GUERNSEY. Is there any provision for a new plant?

Mr. ANTHONY. Perhaps other committees which have jurisdiction intend such action.

Mr. SMITH of Minnesota. What provision has been made for new factories?

Mr. ANTHONY. As the gentleman from Connecticut has said, a reserve supply of machinery, tools, jigs, and dies for manufacturing arms will probably be provided by the War Department under the provisions of this bill.

In closing, let me say to the House that I do not believe the emergency which has been spoken of by the gentleman from Illinois [Mr. MANN] exists to-day; but if it should exist, I believe, with the great number of men that we could instantly bring to arms and train before our Navy was wiped off the map, we would have adequate time to raise the army of reserves and volunteers needed for any such emergency, with the Regular Army of 200,000 peace strength and a federalized National Guard of 427,000 peace strength, which this bill creates, to compose our first line of defense, will be adequate, in my opinion, for such purpose. [Applause.]

Mr. HAY. Mr. Speaker, I yield five minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, 4 major generals, 19 brigadiers, a large and juicy assortment of dental and commissary colonels, and $20,000,000 of nitrate "pork" are some of the outstanding and interesting features of this conference report; and, judging by the energy and enthusiasm with which certain newspapers and certain people elsewhere than in this body have advocated and insisted upon these things, you might imagine that these are what they really have in mind when with unction they talk about patriotism and preparedness.

And yet I shall vote for the conference report, because if it is defeated the nitrate "pork" will not go out; the brigadiers and major generals and the dental colonels will not be eliminated; but the general establishment will, I fear, be considerably increased.

Mr. KAHN. The gentleman does not want to deceive the House. There are no dental colonels provided.

Mr. MONDELL. It is possible the dental colonels are only majors.

The bill provides for a peace maximum of 175,000 troops of the line, to be secured in five annual increments, as large a Regular Establishment as we can secure under voluntary enlistment in time of peace, and it is a peace bill. If I believed that the sparks were really dangerously flying and that there was immediate danger to the country, I should not advocate further increases of the Regular Establishment, but the calling to the colors at once of half a million of volunteers [applause], because those are the forces on which we must depend in time of real war. Within the week we have seen the pictures down here at the Belasco Theater showing what the people of England have done since war was declared, and by voluntary enlistment, in arming and equipping 4,000,000 effective troops. That is the best lesson the world has had in a good long time of what a free people can do after the sparks have settled and ignited, and without conscription.

Mr. GREENE of Vermont. Will the gentleman yield?

Mr. MONDELL. I should like to, but have not time. I have only five minutes. This bill will increase under the expected increments the cost of the Military Establishment, as I figure, about $40,000,000 to $50,000,000 a year for five years, and would eventually increase the total cost of the Regular Army and the militia from $200,000,000 to $250,000,000 above the present cost.

But the best provision in the bill is section 24, under which, after the present excitement has subsided and the people are in a normal and reasonable frame of mind, we can cut off unnecessary increments of units of the establishment and keep the Regular Establishment, both as to men and officers, to a size needed and men for garrisons at home and abroad in time of peace and as a nucleus in time of war. [Applause.] While the establishment provided for, if fully organized, is, in my opinion, rather more than we need in time of peace—certainly more in officers—it is large enough, and provision is so made that in time of necessity, if sparks shall threaten or bring the fires of war, the President can, without any further authority, provide in this first line of defense for upward of 300,000 men. Behind that force stands the militia, largely benefited by this bill, and finally the stalwart citizenry of this country, the boys that, if they can not be made soldiers overnight, can be made splendid and effective defenders of their country in a comparatively few days. It is that citizenship, fine, patriotic, sturdy, that any power contemplating an attack would consider more than any military forces we are likely to organize, for all the world knows that temporary or local advantage by a possible enemy would simply serve to augment the tremendous forces that would be hurled at the invader. [Applause.]

Mr. KAHN. Mr. Speaker, I yield the half minute which the gentleman from Massachusetts yielded back to me to that gentleman.

Mr. GARDNER. Mr. Speaker, I accept that half minute for the purpose of inserting in the RECORD the true strength of the line of the Army as authorized in the joint resolution the other day. I said, during the remarks of the gentleman from Virginia [Mr. HAY], that it was 109,000. It happens to be 109,027. The full enlisted war strength of the Army as prescribed by law is 103,294; Philippine Scouts, 5,733. Therefore on the passage of that joint resolution it became possible to recruit the Army up to 109,027, according to information just obtained from The Adjutant General's office.

Mr. HAY. Well, I will say to the gentleman, it does not make any difference to me who said it. I know that when the organizations that now exist are recruited up to their full strength it is 119,000 men and a few hundred, The Adjutant General to the contrary notwithstanding.

Mr. Speaker, I yield three minutes to the gentleman from Oklahoma [Mr. FERRIS].

The SPEAKER. The gentleman from Oklahoma [Mr. FERRIS] is recognized for three minutes.

Mr. FERRIS. Mr. Speaker, I am not in favor of a big Army in time of peace, and I do not believe that this bill will get a big Army in time of peace. That is the reason why I intend to vote for it.

I am not in favor of compulsory service, now or next year, although the gentleman from Massachusetts [Mr. GARDNER] and the gentleman from Illinois [Mr. MANN], with their pugnacious dispositions, may desire and emphatically demand it. This bill carries no compulsory service, and if it did I would not vote for it. I am in favor of the Government munition plant carried in this bill, the gentleman from Ohio [Mr. LONGWORTH] to the contrary notwithstanding, and the people of this country are in favor of it. It is a step forward toward legislating profit out of war and war matériel. They may roll that around under their tongue and say there is a comeback upon it, but I am willing to stand on any comeback there may be about it. It is what the people desire, and I congratulate the committee for putting it in.

The results of the response to the call to service in the State of Texas ought to be very gratifying to the Texas delegation and ought to and will make every Texan very proud. Out of 4,000 militiamen in the State of Texas, if the morning Post tells the truth, only 55 failed to respond. Some of them were rejected.

Mr. GARDNER rose.

Mr. FERRIS. The gentleman from Massachusetts [Mr. GARDNER] need not rise. I know what he has in mind. He is going to read the article down below, showing how the Arizona and New Mexico militiamen did not so readily respond and say that 3,000 have not yet responded, for the purpose of overturning my statement. But the fact is that only 55 of those accepted for service failed to respond. True, some were rejected. I repeat that I am proud of Texas and of Texans, and every Texan ought to rise in his place to-day with considerable pride. I am wondering whether the gentleman from Massachusetts [Mr. GARDNER] can rise in his place with the same amount of enthusiasm for that one man who has enlisted up in his State. [Laughter.]

Something has been said regarding the chairman of the committee, Mr. HAY, as a fighter. I never before was so proud of a fighter as I am proud of him. I wish he could have won all of his fights in conference. His view is the correct one. [Applause.] He has earned and he enjoys the respect and the affection of this House, and he has exacted common decency and common respect and common fairness and common courtesy out of the other end of the Capitol—something that does not happen every day. [Applause on the Democratic side.] If the gentleman from Virginia [Mr. HAY] had won all his fights, we would have had a better bill, because it would have been a smaller bill than it is.

This bill does not please the extremists. They will applaud it neither here nor elsewhere. The gentleman from Illinois [Mr. MANN] and the gentleman from Massachusetts [Mr. GARDNER], on the one hand, will say it is a driveling effort at preparedness. On the other hand, I presume the gentleman from New York [Mr. LONDON] will say it is the most preposterous and outrageous and enormous preparedness program ever heard of in the history of the world. It will not please either one of those extremes. It will not please Henry Ford, on the one hand; neither will it please Theodore, on the other. [Laughter.]

But I am in hopes, Mr. Speaker, that it will please the great body of the American people, 100,000,000 in number, and I hope and believe it will please the Democratic Party, which in this time of excitement and fervor takes the common-sense view, which it ought to do, and adopts a reasonable program, as it has done in this case. [Applause on the Democratic side.]

The SPEAKER. The time of the gentleman from Oklahoma has expired.

Mr. KAHN. Mr. Speaker, how much time have I remaining?

The SPEAKER. Eighteen minutes.

Mr. KAHN. Mr. Speaker, will the gentleman yield me five minutes?

Mr. HAY. I yield the gentleman five minutes.

The SPEAKER. The gentleman is recognized for 23 minutes.

Mr. KAHN. Mr. Speaker, as one of the managers on the part of the House on the military preparedness bill, I shall support the conference report.

It does not wholly express my personal views. I think we should have a larger Army in time of peace than the bill provides for. I think 220,000 men should have been the minimum figure that we should have had for the line of the Army in times of peace. As I have frequently stated on the floor of the House, that would not necessarily mean that we must enlist them immediately; but, having the authorization for them, we could gradually build up the Army as necessities arise to that full minimum strength. There should be such an authorization. As you all know, I strongly urged an authorization, first, for 220,000 and later for 250,000 men for the line of the Army as a minimum peace strength.

But when these matters came up on the floor of the House recently, and the House expressed its judgment through the recorded yea-and-nay votes that were given on the various questions that were submitted at that time, I felt that it became my duty as a manager on the part of the House to follow the instructions of the House, and I believe that this conference report does meet the views of the majority of the House, as expressed here a number of times on record votes.

This bill provides 175,000 men as an enlisted force in the line of the Army in time of peace. As a matter of fact, if all of the organizations which are included in the bill are enlisted to their full peace strength, and the auxiliaries provided for in the bill are also enlisted to their peace strength, it will give us an Army of a trifle over 210,000 men. If the organizations provided in the bill are enlisted to their full war or statutory strength, they will provide 232,495 enlisted men, exclusive of the auxiliaries. By auxiliaries I mean the enlisted men of the Quartermaster's Corps, the Hospital Corps, and the Signal Corps. Adding the full strength of these corps to the men in the line of the Army, there would be a total enlisted strength of 282,461 men; these, plus 12,000 Philippine Scouts, will give us a total under this bill of 294,461 men—the largest Regular Army force that this Government ever has had occasion or opportunity to put in the field in case of national danger.

Mr. QUIN. The National Guard added to that will make how much?

Mr. KAHN. I disagree with my colleague on the committee [Mr. QUIN] that the National Guard can be enlisted to the extent of 425,000 men. The provisions of this bill create a National Guard of such a minimum strength; not of a maximum strength, mark you, but a minimum strength of 425,000 men. As I have repeatedly pointed out on this floor we will never get them. If we get 200,000 or 250,000 men in the National Guard we will be doing all that the country can hope for under this legislation.

I believe, however, that many of the provisions regarding the National Guard embodied in this bill are splendid provisions. I believe that we will federalize them to an extent that those who have been criticizing the bill do not realize.

During the discussion on this conference report this afternoon reference has been made to the mobilization of the militia of the States of Arizona, New Mexico, and Texas. The experience of the War Department since the order calling out the militia of those three States has been anything but encouraging. The following extract from the Washington Times of this date is, in fact, exceedingly discouraging. The article says:

MILITIA HAS FAILED, IS FUNSTON'S REPORT.

The National Guard has failed utterly to meet the emergency for which it was called to the Mexican border, according to official reports to the War Department from Gen. Funston.

Although ordered to the border May 9—11 days ago—not a single militia organization is ready for duty, Gen. Funston reports.

Gen. Funston telegraphed he has been compelled to withdraw the Sixth Cavalry from Gen. Pershing's column to do work of border patrol, for which the National Guard was called out.

Some of the factors causing the delay in mobilizing the militia, as outlined in Gen. Funston's report, are as follows:

CAUSES FOR DELAY.

Shortage of men in skeleton organizations reporting for border duty. Where the paper strength called for 4,000 men in the three State militias there will be less than 3,000 available for duty.

Shortage of equipment for men reporting with militia. Although the War Department furnished Texas, Arizona, and New Mexico with full equipment for 65 men to a company, much of this equipment was missing when the men reported.

Failure of the militiamen to pass the physical examination required before they could be taken into the service of the United States. It was necessary to relax the severity of the regulations to avoid rejection of a large percentage of militiamen.

Refusal of militiamen to take the oath of allegiance in the Regular Establishment when told they would be required to serve if needed for the full period of their enlistment.

Conflict between the Federal Government and States because the uniforms and equipment, although furnished by the War Department, are the property of the States and compensation must be fixed for them before their transfer is effected.

The necessity of filling up the gaps in military units, already skeletonized, to make up for guardsmen rejected as physically unfit or who refuse to take the oath.

MAY BE READY NEXT WEEK.

Gen. Funston believes that the work of mobilizing the three Texas brigades will be completed by the middle of the week. It is not certain whether the Arizona and New Mexico regiments will be ready then or not.

At the earliest, however, it will be 15 days after the troops were called out before they will be available for service. In addition to this the governors of the three States had 10 days' notice to prepare for a call, and for months previously the militia organizations were under orders to be ready for service when called.

Army officers said to-day that at the slow rate of mobilization for the three militia organizations on the border it would take one month to two months to get any large body of militia from the Northern or Eastern States mobilized for the Mexican campaign.

In a speech I delivered on this floor recently in defense of the Volunteer Army provision of the Senate bill, I pointed out that even under the federalized National Guard provisions of the

conference report there must inevitably be delay in mobilizing the forces of the guard, for some of the very reasons given in the newspaper article as being responsible for the slowness of mobilization under existing law. But the conference report does contain many excellent and desirable provisions that will make the National Guard organizations infinitely better than they have been heretofore. One of these provisions relates to the commissioned personnel of these organizations. The officers of the National Guard hereafter will be compelled to pass examinations provided by a board of officers selected by the Secretary of War. The haphazard way of appointing officers for the National Guard, either by political preferment or by election of their officers by the members of the guard themselves, can no longer continue under this proposed law. Every man who hereafter receives a commission as an officer must pass an examination showing that he is capable of commanding men. In that respect a great advance has been made over the legislation of the past.

But, Mr. Speaker, aside from the number of enlisted men in the Regular Army, aside from the strength of the National Guard, there are many things in the bill that should commend it to the membership of the House. In the first place the conference report provides for the organization contained in the Senate bill. Under the bill recommended by the conferees the Army of the United States will be properly divided into tactical units. Heretofore we have had no real legislation on our statute books regarding the organization of the Army in brigades, divisions, Army corps, and armies. The conference report provides that hereafter all this shall be done in organizing the Army of the United States. Every military officer will commend these provisions of the bill.

We have increased the regiments of Infantry from 30 to 65, including the Porto Rico regiment of Infantry. We have increased the regiments of Cavalry from 15 to 25. We have increased the regiments of Field Artillery from 6 to 21, and we have practically doubled the Coast Artillery forces. All of these things should commend this bill to the membership of the House.

We have provided that hereafter in the Judge Advocate General's Department men must take examinations for promotion just as they do in the Medical Department. The officers of the Judge Advocate General's Department are lawyers. They look after the legal affairs of the Army, and it is necessary that they should be up constantly with the legal decisions appertaining to the Army. Hereafter no man in that department can be promoted unless he shall have passed an examination to show his capability as a lawyer so far as the Military Establishment of the Government may be concerned.

The Senate retains the House provision regarding the Medical Corps in this conference report. The House fixed the strength of the Medical Corps so that there shall be 7 medical officers to every 1,000 enlisted men in the Army. That was done after we had had most interesting hearings. We had several medical officers before us who had come but recently from the trenches in Europe, and after listening to them and after realizing the necessity for preparedness in that direction, the House committee provided for 7 medical officers to every 1,000 men. In all our past wars we have lost great numbers of men on account of the inadequacy of our Medical Department. We felt that the people of the United States would never tolerate a recurrence of such unpreparedness in that department. And the Senate accepted the provisions of the House bill.

We have given rank, pay, and allowances to dental surgeons up to the grade of major. We did this advisedly. The dentists on the fields of Europe are working in harmony with the medical surgeons; they are showing their worth on those fields and are doing wonders in their line in restoring the jaws and teeth of desperately wounded men so that they can still remain useful members of society.

We have provided a splendid veterinarian corps. The Senate accepted the House provision in this regard. This corps is also demonstrating its thorough usefulness on the battle fields of Europe.

We have created a new grade in the aviation section of the Signal Corps—that of aviator. If it is impossible to secure the requisite number of Army fliers, the Secretary of War is authorized, even in time of peace, to enlist or, rather, to commission, civilians as aviators in the aviation forces of the United States Army. He can make contracts with civilian fliers and so build up an excellent aviation section for the Army of the United States.

The Coast Artillery has been increased so that we will have 363 companies, exclusive of the 18 bands that are allotted to that branch of the Army. It gives us a total of 30,006 men in the Coast Artillery. That is about one-half the number of men required to man the guns that have been emplaced heretofore.

The States were to furnish the other 30,000 enlisted men, through Coast Artillery militia organizations; but, unfortunately, we have not been able to get those men from the States. Frequently when the Regular Army officers went to the States and asked that they organize the necessary number of Coast Artillery companies for the defense of the Union they were met with the question, "What has the Federal Government done to supply its quota to man the seacoast defense guns?" And heretofore they have had to reply that as yet the Federal Government has not provided the proper number of men. This bill does make provision for the full number of men required for that purpose on the part of the Federal Government. Under the provisions of the bill the coast defenses should in a comparatively short time be infinitely better than most of us hoped for at the time the Hay bill passed this House.

The Porto Rico Regiment—which is called a regiment, but which hereteofore has been a regiment of only two battalions—is created a full regiment by this legislation, and it is now liable to service in any part of the territory of the United States. In other words, if the President should determine that that regiment would be useful on the Isthmus of Panama to defend the Panama Canal, the President of the United States under this legislation would have the right to order the Porto Rico Regiment to Panama, or he would have the right to order them to Hawaii or to the Philippines or anywhere else where he deemed that the exigencies of the case might require their presence.

A very important feature of this bill, in my judgment, is that which provides as to original appointments in the commissioned strength of the Army, except in the case where the appointees are graduates from West Point—that the commissions shall be for a temporary period of two years, within which time the commissioned officer must demonstrate his worth and ability as an officer of the United States Army. If, after the lapse of two years, it be determined that he is not qualified to command troops in the Army of the United States, he is given an honorable discharge from the Army. I believe a great step in advance has been made in that one particular.

The matter of vocational training for enlisted men assumes considerable importance in this bill. It provides that hereafter enlistments in the Army may be made from boys 18 years of age or over without the consent of their parents. Anyone over 16 who wants to enlist may do so with the consent of his parents or guardian. That simply applies to the Army what we have been doing in the Navy for many years. In our Navy boys from 16 to 18 years of age can enlist with the consent of their parents or guardians, but after they have attained the age of 18 it does not require the consent of anyone. This bill follows those provisions.

Under this bill the young man can receive vocational training at the hands of civilian instructors or such other instructors as the Secretary of War may determine to be necessary. In my opinion that provision will bring many young men into the Army who will take advantage of the military training, and who will also be glad to get the vocational training provided by this bill. I firmly believe it will also have a great effect in increasing the number of enlistments for the Regular Army.

There was a provision in the Senate bill which the House conferees insisted should be stricken out. That was the provision known as the Hardwick amendment. It attempted to take into an Army reserve boys 15, 16, 17, and 18 years of age. They were to go into an encampment every year, and while in the encampment those boys were to receive the same pay and allowances that the enlisted men and officers of similar grades in the Regular Army receive, and yet they were not to be utilized, in case we should get into trouble, until they were 18 years of age. That provision was put in on the floor of the Senate. The House conferees insisted that it should go out, and it went out; as did also the provision giving preferences in the civil service of the United States to discharged men of the Regular Army.

Mr. Speaker, in my opinion, the Regular Army reserve will add very materially to the strength of our Army. A great deal of humor was developed by the gentleman from Massachusetts [Mr. GARDNER] a year or two ago over the fact that there were but 16 reserves in our entire Army. As a matter of fact, the reserve section of the existing law had not had an opportunity to go into full effect, nor is it in full effect to-day. But we have now about 4,000 men in the Regular Army reserve, and we feel confident that when the full seven-year period of the law elapses we will have fully 50,000 men in the reserve, ready to

go to the front immediately upon the call of the President to take up the defense of their country.

The enlisted Reserve Corps, in addition to the Regular Army reserve, is a very important feature of this legislation. The men who are chauffeurs, who are telegraph and telephone linemen, who are railroad trainmen, who are fliers, who are working in the factories where flying machines are being constructed, or in locomotive shops, or ammunition factories, or automobile factories, or hospitals, or drug stores, or the one hundred and one different industries where men become skilled in duties that will be of inestimable service to their country in time of national danger will be enrolled under this bill as auxiliary forces. They are to be called out, if the President deems it advisable, for 15 days' training at any time in any one year, and while so training they receive pay and allowances given to men in the Regular Army. It is the purpose to drill these auxiliary forces so that if we ever get into a war we will have men in the Engineer, the Quartermaster, and the Signal Corps, and in the Medical and Ordnance Departments that will enable this Government to perform its work in these various corps and departments as we never at any time in our history have been able to do it heretofore. These men will be encouraged in every way under this bill to become a part of the auxiliary forces of the United States, to be called on in case of national emergency.

I understand that in one section of the country, in Michigan, recently an officer of a railroad company pledged nearly all of his employees in every branch of service of his company to enlist in this enlisted reserve corps. [Applause.] And that is in the State of the great pacifist, Mr. Henry Ford.

Mr. Speaker, there is a provision in the Regular Army reserve that is not unlike the system that prevails in Australia and Switzerland, of which we hear so much in these days. These reserves can be called out for additional training at any time for 15 days in any one year by the President of the United States. That will keep these men in the Regular Army reserve in constant touch with preparedness. In my judgment, it is an excellent provision.

We also allow in this bill the reenlistment of men who have heretofore received honorable discharge from the Regular Army of the United States, provided they are under 50 years of age. It has been estimated before our committee that there are probably as many as 120,000 of these men. I have always questioned the reliability of those figures. I believe there are 40,000 or possibly 50,000 of these men. The bill holds out inducements to them to come back to the colors of the United States in the case of emergency so that they can give to their country the benefit of their previous training.

In addition to that, the men of the Volunteer forces of the United States—in other words, the men of the Spanish-American War who served in the Philippines, or in Hawaii, or Porto Rico, or Cuba are entitled, under that provision, to come back to the colors when they are needed. There is a small payment by way of bounty for their services, so that if they have married since their discharge, and have families dependent upon them, the family will receive a bounty not to exceed $300 when the husband goes to the front. With that sum as payment in the nature of a bounty they will not be altogether helpless. I think that is an excellent provision of the bill.

The bill provides for summer training camps. Under section 54, students and others are invited to the training camps for military instruction. These camps, which were inaugurated last year, have become known as the Plattsburg idea. I believe that that section of the bill is so framed that it will enable the Secretary of War under such terms of enlistment and regulations as he may prescribe practically to create a volunteer army out of these men. [Applause.]

The Officers' Reserve Corps is a splendid provision of the bill. The struggle in Europe has demonstrated beyond question that one of the greatest necessities toward thorough preparedness is a trained force of officers. The so-called Gard amendment, which was adopted by this House when the bill was before it for consideration last March, has been retained in the conference report. No doubt it will furnish the country a large force of additional officers to meet the requirements of the service in case we should ever become involved in war.

Another splendid provision which refers to the National Guard sections of the bill is that which requires the organization of reserve battalions in every State that sends its National Guard to the front when the President drafts them into service. During the Civil War it was the custom for some ambitious civilian or a commissioned officer of one of the lower grades to raise a new regiment of volunteers with himself as colonel in order that the new regiment might go to the front and give him an opportunity to show his ability as a military commander. This will be impossible under the pending legislation. The reserve battalions enlisted in the States to which the respective regiments that go to the front belong will be able to fill up the wastage resulting from disease, death, or any other cause, and will thus constantly maintain the regiments in the field at full war strength.

There is also a provision that the officers and men in the National Guard will be compelled to pass a physical examination when they are drafted into the service of the United States. They must also pass a physical examination at the time they are mustered out, and a record of such physical examination must be filed in the records of the War Department. In the years to come that provision will save a great deal of difficulty regarding pensions.

The bill provides for the purchase by the Government of military supplies of every character in time of war. It compels any individual, firm, company, association, corporation, or organized manufacturing industry to furnish such arms and ammunition, or parts of ammunition, or other supplies and equipments, at a reasonable price to the Government of the United States, and imposes a penalty on any individual, firm, or the responsible head or heads of any company, association, or corporation or organized manufacturing industry for refusing to comply with the provisions of that section of the bill. It provides, however, that compensation to any of those manufacturers of products or material necessary for the defense of the United States shall be fair and just.

The bill provides for a census of all privately owned plants in the United States equipped to manufacture arms or ammunition or the component parts thereof. To insure a prompt mobilization of these various industries a nonpartisan board on mobilization of industries essential for military preparedness is provided for. There is also a provision for the investigation by two civilians and three Army officers as to the Government's manufacture of arms, ammunition, and equipment. The War Department for the past four years has been manufacturing practically all of the arms, ammunition, and equipment which it requires, and yet thousands of men and women throughout the Union have been led to believe that the department purchases all its powder and ammunition from private concerns. These private concerns are charged with being responsible for the demand for preparedness in the United States. In view of the fact that they have not been selling their products to the War Department, I do not see what authority those who are opposed to preparedness can have for their assertions that the ammunition manufacturers are responsible for the demand for a larger military force.

The bill provides for the protection of the uniform of officers or enlisted men of the United States Army, Navy, or Marine Corps. Exception is made, however, in favor of the organization known as the Boy Scouts of America, the Naval Militia, or such other organizations as the Secretary of War may designate for wearing their prescribed uniforms. This will enable such organizations as have been in existence in many of the States and whose uniforms are very similar to the uniforms worn by some units of the Army, Navy, or Marine Corps, to preserve their uniforms through the permission of the Secretary of War.

The bill also provides for the procurement of gauges, dies, jigs, tools, fixtures, and other special aids and appliances, including specifications and detailed drawings as may be necessary for the immediate manufacture, by the Government or private concerns, of arms, ammunition, and equipment for our military forces. That provision I consider to be a great step in the path of military preparedness.

Mr. Speaker, there are many other admirable provisions in this bill. I admit it is not a perfect piece of legislation. It has some weak spots. Perhaps many weak spots. But it is infinitely better than any Army legislation we have had heretofore. It is a decided step toward military preparedness. I hope the conference report will be adopted.

Mr. DENISON. Mr. Speaker, I ask unanimous consent that the gentleman have one minute more in order that I may ask him a question.

Mr. HAY. I will yield to the gentleman one minute more.

Mr. DENISON. I would like to ask the gentleman if there is any way that we can get rid of this nitrate proposition.

Mr. KAHN. If you vote down the conference report and send it back to conference, you might. That matter of the nitrate plant was submitted to the House recently and the House voted for it, and I felt, therefore, as a conferee on the part of the House that I was instructed to stand by the House provision.

In conclusion, Mr. Speaker, I desire to insert a statement showing the minimum and possible maximum commissioned and enlisted strength of the Regular Army under the provisions of the bill recommended in the conference report. It is as follows:

TABLE I.—*Statement showing the commissioned strength of the Regular Army provided by conference committee report on H. R. 12766, Sixty-fourth Congress, first session.*

[This strength will be authorized only after all increments provided for shall have become effective.]

Corps or arm.	Major generals.	Brigadier generals.	Colonels.	Lieutenant colonels.	Majors.	Captains.	First lieutenants.	Second lieutenants.	Dental surgeons.	Veterinarians.	Total.
General officers of the line	[1] 11	[2] 36									47
General Staff	[3] 1	[3] 2	10	10	15	17					[4] 52

Philippine Scouts						52	65	65			182
Total Regular Army	13	4	347	369	1,103	4,018	2,970	2,209	175	118	11,368

[1] Including 1 major general, appointed under act of Mar. 4, 1915. Not a permanent grade.
[2] Including 2 brigadier generals, appointed under act of Mar. 4, 1915. Not a permanent grade.
[3] These may be 2 major generals and 1 brigadier general, but included in "general officers of the line" and not in addition thereto.
[4] Does not include 3 general officers of the line as accounted for above.
[5] This number reported by Office of the Quartermaster General as "now in active service," as pay clerks.
[6] Brigadier general, after present incumbent.
[7] Assuming line 175,000; Quartermaster Corps, 6,403 (present law); Signal Corps, 3,387 (Rept. 263 on S. 4840); Medical Corps (5 per cent), 10,500; Ordnance Department, 1,115; recruits (7 per cent of all above), 14,700=211,112. At 7 per 1,000 men=1,477 officers Medical Corps (1,000 captains and first lieutenants) exclusive of Surgeon General. This is only approximate, not accurate, since enlisted strength depends, in three corps, upon executive action.
[8] 1 for each 1,000 of 175,000 in line of Army; majors, captains, and first lieutenants. Not included in 7 per cent Medical Corps, but in total strength of Medical Department.
[9] Veterinarians and assistant veterinarians (captains, first lieutenants and second lieutenants, according to service).
[10] Includes Aviation Section (1 colonel, 1 lieutenant colonel, 8 majors, 24 captains, 114 first lieutenants).
[11] Cavalry, 25; Infantry, 65; Field Artillery, 21; Engineers, 7; Coast Artillery Corps, 25. Rank according to service. Shown as captains, but not actually such. Not to exceed 15 majors.
[12] Assuming 5 regiments organized in 3 battalions (2 horse and 3 heavy).
[13] Including 200 under act of Mar. 3, 1911, in grades as authorized by that act. These numbers in grade will be changed if the 1,022 are all to be assigned to grades by ratio shown in sec. 25. If the 822 added by bill are assigned by such ratio and the 200 now authorized are left as assigned in 1911, the figures are approximately correct.
[14] Including 17 colonels, Cavalry, 4 colonels, Infantry, made "additionals" by sec. 25.
[15] Including those "additional" by act of Mar. 3, 1911; this is subject to increase by transfer of retired officers to active list under act of Mar. 4, 1915. Several nominations are now pending.

TABLE II.—*Statement showing the minimum and maximum enlisted strength of the Regular Army provided by conference committee report on H. R. 12766, Sixty-fourth Congress, first session, and also maximum "except in event of actual or threatened war" (sec. 2 of act).*

Corps or arm.	Minimum strength.	Maximum strength.
Cavalry, 25 regiments (minimum strength, 999; maximum strength, 1,475)	24,975	36,775
Field Artillery, 16 regiments of 2 battalions (minimum strength, 859; maximum strength, 1,263)	13,744	20,208
Field Artillery, 5 regiments of 3 battalions (minimum strength, 873; maximum strength, 1,282)	4,365	6,410
Field Artillery added to headquarters companies (2) of Mountain regiments when Quartermaster Corps not available	6	6
Field Artillery ammunition batteries, depot batteries, and battalions and Artillery parks, supplied from Regular Army Reserve or Regular Army. Organization fixed by President		
Coast Artillery Corps, 263 companies and noncommissioned staff	29,469	29,469
Coast Artillery Corps, 18 bands of 30 men	540	540
Infantry, 64 regiments (minimum strength, 1,336; maximum strength, 1,964)	85,504	125,696
Porto Rico regiment of Infantry	1,336	1,964
Corps of Engineers, 7 regiments of 2 battalions of 3 companies each (minimum strength, 696; maximum strength, 1,036)	4,872	7,252
Corps of Engineers, 2 battalions Mounted Engineers (3 companies each) (minimum strength, 244; maximum strength, 371)	488	742
Corps of Engineers, 1 band	30	30

TABLE II.—*Statement showing the minimum and maximum enlisted strength of the Regular Army, etc.*—Continued.

Corps or arm.	Minimum strength.	Maximum strength.
Quartermaster Corps, strength to be fixed by President (present law as to minimum and double that for maximum strength) [1]	6,403	12,806
Signal Corps, strength to be fixed by President (strength of, Senate bill 4840) [1]	3,387	4,338
Ordnance Department, strength to be fixed by President (present authority for minimum and double for maximum strength) [1]	1,115	2,230
Medical Corps, 5 per cent of maximum peace (175,000)+Quartermaster Corps, Signal Corps, Ordnance Department, and recruits for minimum	10,500	14,100
5 per cent of above at maximum +232,495, and of recruits for maximum.		
Unassigned recruits, 7 per cent of total enlisted strength	13,700	16,500
Total, excluding Philippine Scouts	210,105	282,461
Philippine Scouts (present law). See section 22	5,733	12,000
Aggregate, Regular Army (including Philippine Scouts) [2]	215,838	296,461

[1] As the enlisted strength of the Quartermaster Corps, Signal Corps, and Ordnance Department are such as may be prescribed by the President, until Executive orders are issued, it is impracticable to ascertain the strength of the Medical Corps and unassigned recruits which are 5 and 7 per cent, respectively, of total enlisted strength. Figures above are based upon assumptions which seem reasonable. But any other estimate may be equally correct, if assumptions as to Executive action be changed.
[2] For present authorized commissioned and enlisted strength, see Army List and Directory, April 20, 1916.

Mr. FOSTER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER pro tempore (Mr. HARDY). The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. STEPHENS of Texas. Mr. Speaker, I ask to extend my remarks in the RECORD.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. BUCHANAN of Illinois. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting an

article written by John J. Walt, an ironworker, and printed in the Bridgeman's Magazine.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. GALLIVAN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting an address of Edward N. Hurley, vice chairman of the Federal Trade Commission, before the Boston Commercial Club, March 28, 1916.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts.

There was no objection.

Mr. HAY. Mr. Speaker, I ask unanimous consent that all gentlemen may have five legislative days after the passage of the bill to extend remarks on the bill.

The SPEAKER pro tempore. The gentleman from Virginia asks unanimous consent that all gentlemen have five legislative days after the passage of the bill to extend remarks on the bill. Is there objection?

There was no objection.

Mr. HAY. Mr. Speaker, I ask for a vote.

The SPEAKER pro tempore. The question is on agreeing to the conference report.

The question was taken, and the Speaker pro tempore announced that the ayes seemed to have it.

Mr. HAY. Mr. Speaker, I make the point of no quorum.

The SPEAKER pro tempore. The gentleman from Virginia makes the point that no quorum is present. Evidently there is not a quorum. The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 351, nays 25, answered "present" 3, not voting 55, as follows:

So the conference report was agreed to.

The Clerk announced the following additional pairs:

For the session:

Mr. DEWALT with Mr. MCFADDEN.

Until further notice:

Mr. WATKINS with Mr. MORIN.

Mr. GODWIN of North Carolina with Mr. VARE.

Mr. STEELE of Pennsylvania with Mr. EMERSON.

Mr. LEWIS with Mr. OAKEY.

Mr. HENRY with Mr. MILLER of Minnesota.

Mr. DOREMUS with Mr. BARCHFELD.

Mr. EVANS with Mr. JOHNSON of South Dakota.

Mr. STEAGALL with Mr. HOLLINGSWORTH.

Mr. SEARS with Mr. PETERS.

Mr. WEBB with Mr. DYER.

Mr. CASEY with Mr. SCOTT of Pennsylvania.

Mr. MONTAGUE with Mr. MILLER of Delaware.

Mr. TALBOTT with Mr. BUTLER.

Mr. ADAIR with Mr. LEHLBACH.

Mr. ROUSE with Mr. MCLAUGHLIN.

Mr. MORGAN of Louisiana with Mr. GRAHAM.

Mr. SCULLY with Mr. MOONEY.

Mr. MORRISON with Mr. SWIFT.

Mr. HART with Mr. GRIEST.

Mr. CLARK of Florida with Mr. FULLER.

Mr. CONRY with Mr. PRATT.

Mr. DRISCOLL with Mr. HAYES.

Mr. HARRISON with Mr. CHIPERFIELD.

Mr. LIEBEL with Mr. ROWLAND.

Mr. GLASS with Mr. WINSLOW.

Mr. SMALL with Mr. TREADWAY.

Mr. LANGLEY with Mr. CANTRILL.

Mr. TREADWAY. Mr. Speaker, I voted "aye." I have a pair with the gentleman from North Carolina, Mr. SMALL, and I desire to withdraw my vote and answer "present." He would vote "aye" also if he were here.

The name of Mr. TREADWAY was called, and he answered "Present."

Mr. LANGLEY. Mr. Speaker, I am paired with my colleague, Mr. CANTRILL. I know that he is for this conference report, and I therefore voted "aye." I believe it is all right to let my vote stand.

The result of the vote was announced as above recorded.

On motion of Mr. HAY, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

The SPEAKER. A quorum is present. The Doorkeeper will unlock the doors.

EXTENSION OF REMARKS.

Mr. ROGERS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the conference report.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. MANN. Was not general leave given?

Mr. LANGLEY. Mr. Speaker, I make the same request.

Mr. FARR. Mr. Speaker, I desire to extend my remarks on the shipping bill.

The SPEAKER. There is general leave; everybody can extend their remarks on the shipping bill and on the conference report, too, but they have to stick to the bill, however, in extensions.

FRAUDULENT ADVERTISING, DISTRICT OF COLUMBIA.

Mr. JOHNSON of Kentucky. Mr. Speaker, I call up the conference report on the bill H. R. 10490.

Mr. ADAMSON. Mr. Speaker, will my amiable friend from Kentucky listen to me for one minute? I have a plea for a minute's time, and I know the gentleman will yield it. My colleague from Georgia has a little emergency bill, and he wants to go home on the next train, and I therefore ask unanimous consent to consider his little bridge bill. It will take but a minute, and I promise the gentleman——

The SPEAKER. What does the gentleman from Kentucky say?

Mr. JOHNSON of Kentucky. Mr. Speaker, I will have to insist on my motion.

I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I have not examined it. Does the statement give information so that we can tell?

Mr. JOHNSON of Kentucky. I think so. That is the intention.

The SPEAKER. Is there objection?

Mr. MANN. We have just had one statement read that did not give any information.

The SPEAKER. Does the gentleman from Illinois object?

Mr. MANN. I do not.

The conference report is as follows:

CONFERENCE REPORT (NO. 712).

The conference committee on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10490) entitled "An act to prevent fraudulent advertising in the District of Columbia," having met, after a full and free conference, have agreed to recommend, and do recommend, to their respective Houses, as follows:

That the House recede from its disagreement to the Senate amendment numbered 1 and agree to the same with an amendment by also striking out the article "a" at the end of line 13, page 1, so that instead of only striking out the word "fraudulent" the part stricken out should be "a fraudulent."

That the House recede from its disagreement to the amendment of the Senate numbered 2 and agree to the same with an amendment. The Senate amendment numbered 2 adds the following language to the bill: "purchase any goods, wares, or merchandise, or anything of value, or to."

That amendment numbered 2 is amended by striking out the word "purchase" therefrom and inserting in lieu thereof the words "sell, barter, or exchange."

That the House recede from its disagreement to the amendments of the Senate numbered 3 and 4.

That the Senate recede from its amendment numbered 5.

BEN JOHNSON,
CARL. VINSON,
WILLIAM J. CARY,
Managers on the part of the House.

JOHN WALTER SMITH,
ATLEE POMERENE,
WILLIAM P. DILLINGHAM,
Managers on the part of the Senate.

The Clerk read the statement as follows:

STATEMENT.

The managers on the part of the House relative to the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10490) entitled "An act to prevent fraudulent advertising in the District of Columbia," herewith submit the following statement concerning the result of the conference:

Relative to amendment numbered 1 the managers on the part of the House have to state that the said bill passed the House containing the language "a fraudulent intent to deceive, mislead, etc." The Senate struck out the word "fraudulent," being of the opinion that the words "deceive, mislead, etc." were sufficient. The managers on the part of the House agreed to that amendment, but called attention to the fact that the article "a" which immediately precedes the word "fraudulent" should also be stricken out. The reason for striking out the article "a" is quite apparent upon reading the bill.

The original draft of the bill contained a clause relating to the "sale of goods, wares, or merchandise" as the result of fraudulent advertising. However, just before the bill was introduced some of its friends struck out that clause and the bill was introduced without it. When the bill was under consideration by the House it was conceded that the language should be restored, but at the moment when attention was called to this omission the section which should have contained it had been passed. It was then deemed advisable to permit the bill to pass in its then present shape and let the correction be made by the Senate. The attention of the Senate was duly invited to the omission referred to; but by inadvertency the word "purchased" was used instead of the word "sell." Then in conference it was deemed best not only to use the word "sell," but to use the three words "sell, barter, or exchange"; so that the bill when thus amended reads "with intent to sell, barter, or exchange any goods, wares, or merchandise, or anything of value, or to deceive, mislead, etc."

Amendment numbered 3 is the striking out of the second use of the word "fraudulent," the words "to deceive, mislead," and so forth, again being deemed sufficient.

Amendment numbered 4 is exactly similar to amendment numbered 3 and the word "fraudulent" was again stricken from the bill.

Senate amendment numbered 5 strikes from the House bill the words "for a valuable consideration." However, the Senate receded, and that language is restored.

That part of section 1 after the semicolon in line 9, page 2, wherein appear the words "for a valuable consideration" undertakes to create an offense where three persons figure in the transaction.

The first of the three is the one who makes the misrepresentations for another, and not for himself.

The second of the three is the one to whom the misrepresentations are made.

The third of the three is the one for whose advantage the misrepresentations are made by the first of the three.

If the first of the three, by use of any of the means set out in the act, should induce the second of the three to use the services of the third and pay a fee or give a valuable consideration for those services, then the offense would be complete; but, upon the other hand, if no fee were charged or paid, or no valuable consideration passed, then there would be no offense, as the second party of the three would have suffered no wrong.

It is the intention of this provision in the bill to punish the act only in event some one is injured.

It is also sought to differentiate between the "capper" or "booster" for a falsely advertised business or alleged profession upon the one hand and the overzealous man or woman upon the other hand who, for instance, innocently writes a letter or, in good faith, gives a testimonial commending the "incorporated dental parlor" which claims that its employees, without the use of a drug, can painlessly extract teeth. Neither is it intended to punish the admiring, overconfident, and gullible friend of the "quack" who claims to be able to permanently cure all human ailments out of the same bottle or with the same pill.

However, it is hoped that the bogus claim agent and patent attorney, of whom there are many in Washington, may be compelled not only to stop his extravagant and untruthful advertising, but, at the same time, become unable to find "boosters" for his cheating game. Also, the "ambulance chaser" for some of the legal fraternity may find his occupation neither profitable nor agreeable if this bill becomes law.

BEN JOHNSON,
CARL VINSON,
WILLIAM J. CARY,
Managers on the part of the House.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

On motion of Mr. JOHNSON of Kentucky, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed joint resolution of the following title, in which the concurrence of the House of Representatives was requested:

S. J. Res. 72. Joint resolution to provide for holding the Texas Bicentennial and Pan American Exposition in 1918.

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 3101. An act authorizing the Secretary of War to extend the lease issued under the act of August 23, 1912, entitled "An act authorizing the Secretary of War to lease to the Chicago, Milwaukee & Puget Sound Railway Co. a tract of land in the Fort Keogh Military Reservation, in the State of Montana, and for a right of way thereto for the removal of gravel and ballast material"; to the Committee on Military Affairs.

BRIDGE ACROSS THE ST. MARYS RIVER, GA. AND FLA.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent for the present consideration of H. R. 14771, because it is an emergency.

The SPEAKER. The gentleman from Georgia [Mr. ADAMSON] asks unanimous consent for the present consideration of the bill the title of which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 14771) granting the consent of Congress to commissioners of Charlton County, Ga., and Nassau County, Fla., to construct a bridge across St. Marys River, to be known as the Dixie Highway Bridge.

The SPEAKER. Is there objection?

Mr. JONES. Reserving the right to object, I would like to ask the gentleman from Georgia if there is a unanimous-consent report on this bill?

Mr. ADAMSON. It is entirely unanimous. Everybody is crying for it.

The SPEAKER. The Chair hears no objection. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to the commissioners of Charlton County, Ga., and Nassau County, Fla., and their successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the St. Marys River, at a point suitable to the interests of navigation, at or near a point known as Calico Hill, to be known as the Dixie Highway Bridge, in the county of Charlton, in the State of Georgia, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

Also the following committee amendment was read:

Page 1, lines 8, 9, and 10, strike out the words "to be known as the Dixie Highway Bridge, in the county of Charlton, in the State of Georgia."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read a third time, and passed.

The title was amended so as to read: "A bill granting the consent of Congress to commissioners of Charlton County, Ga., and Nassau County, Fla., to construct a bridge across the St. Marys River."

On motion of Mr. ADAMSON, a motion to reconsider the vote by which the bill was passed was laid on the table.

PENSIONS.

Mr. RUSSELL of Missouri. Mr. Speaker, I ask to call up the conference report on the bill H. R. 12027.

The SPEAKER. The gentleman from Missouri calls up the conference report on the bill H. R. 12027, of which the Clerk will report the title.

The Clerk read as follows:

H. R. 12027. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of certain soldiers and sailors of said war.

The SPEAKER. The Clerk will read the report.

The conference report was read as follows:

CONFERENCE REPORT (NO 719).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12027) entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 9.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 12, 13, and 14 and agree to the same.

Amendment numbered 15: That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: On page 29, line 1, strike out "$30" and insert in lieu thereof "$24"; and the Senate agree to the same.

JOE J. RUSSELL,
WILLIAM A. ASHBROOK,
CHAS. E. FULLER,
Managers on the part of the House.

CHARLES F. JOHNSON,
WM. HUGHES,
REED SMOOT,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference on the disagreeing vote of the two Houses on certain amendments of the Senate to the bill (H. R. 12027) entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war," submit the following written statement in explanation of the effect of the action agreed upon by the conference committee and submitted in the accompanying conference report as to each of the said amendments, viz:

Amendment No. 1: House recedes. Proof submitted justifies increase.

Amendment No. 2: House recedes. Proof submitted justifies increase.

Amendment No. 3: House recedes. Correction in phraseology.

Amendment No. 4: House recedes. Rules provide for a maximum rate of $50.

Amendment No. 5: House recedes. As the soldier did not hold the rank of captain or above, $20 is the limit.

Amendment No. 6: House recedes. Proof submitted justifies proposed increase.

Amendment No. 7: House recedes. Proof submitted justifies proposed increase.

Amendment No. 8: House recedes. As soldier did not hold rank of captain or better, $20 is the limit.

Amendment No. 9: Senate recedes. Proof submitted justifies pension of $12.

Amendment No. 10: House recedes. Correction of service.

Amendment No. 11: House recedes. Correction of service.

Amendment No. 12: House recedes. Proof submitted justifies proposed increase.

Amendment No. 13: House recedes. As soldier did not hold rank of captain or better, $20 is the limit.

Amendment No. 14: House recedes. Correction of service.

Amendment No. 15: House recedes from its disagreement to the amendment of the Senate, and agrees to the same with an amendment in accordance with the evidence submitted; and the Senate agree to the same.

JOE J. RUSSELL,
WILLIAM A. ASHBROOK,
CHAS. E. FULLER,
Managers on the part of the House.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the conference report was agreed to.

Mr. RUSSELL of Missouri. Mr. Speaker, I also call up the conference report on the bill H. R. 12843.

The SPEAKER. The gentleman from Missouri calls up the conference report on the bill H. R. 12843, which the Clerk will report by title.

The Clerk read as follows:

H. R. 12843. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of certain soldiers and sailors of said war.

The conference report was read as follows:

CONFERENCE REPORT (NO. 720).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12843) entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain

widows and dependent children of soldiers and sailors of said war," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 4, 7, 9, 11, and 16.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 5, 6, 8, 10, 12, 13, 14, 15, 18, and 19, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: On page 4, line 5, strike out amount named and insert in lieu thereof "$24"; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: On page 25, line 21, strike out amount named and insert in lieu thereof "$36"; and the Senate agree to the same.

JOE J. RUSSELL,
WILLIAM A. ASHBROOK,
CHAS. E. FULLER,
Managers on the part of the House.

CHARLES F. JOHNSON,
WM. HUGHES,
REED SMOOT,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes on certain amendments of the Senate to the bill (H. R. 12843) entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war," submit the following written statement in explanation of the effect of the action agreed upon by the conference committee and submit in the accompanying conference report as to each of the said amendments, viz:

Amendment No. 1: House recedes from its disagreement to the amendment of the Senate and agrees to the same with an amendment making the usual allowance for a widow of a captain.

Amendment No. 2: Senate recedes. Proofs submitted justify the proposed increase.

Amendment No. 3: House recedes. Evidence on file does not justify a higher rate than allowed by Senate amendment.

Amendment No. 4: Senate recedes. Claimant is the widow of a captain and under the rules is entitled to a higher rate of pension.

Amendment No. 5: House recedes. Proof submitted does not justify a higher rate.

Amendment No. 6: House recedes. Claimant is the widow of an officer and under the rules she is entitled to a higher rate of pension.

Amendment No. 7: Senate recedes. Proof submitted justifies the proposed pension.

Amendment No. 8: House recedes. Proof submitted does not warrant any increase.

Amendment No. 9: Senate recedes. Proof submitted justifies proposed pension.

Amendment No. 10: House recedes. A correction of service.

Amendment No. 11: Senate recedes. Evidence submitted justifies proposed pension.

Amendment No. 12: House recedes. Bill for claimant was passed by the Senate April 10.

Amendment No. 13: House recedes. Under the rules claimant is entitled to proposed increase.

Amendment No. 14: House recedes. Proof submitted does not justify a higher rate.

Amendment No. 15: House recedes. Soldier's rank does not warrant a higher rate.

Amendment No. 16: Senate recedes. Evidence submitted justifies proposed pension.

Amendment No. 17: House recedes from its disagreement to the amendment of the Senate and agrees to the same with an amendment in accordance with the proof submitted.

Amendment No. 18: House recedes. Claimant is an officer's widow and under the rules entitled to proposed pension.

Amendment No. 19: House recedes. Proof submitted does not justify higher rate.

JOE J. RUSSELL,
WILLIAM A. ASHBROOK,
CHAS. E. FULLER,
Managers on the part of the House.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the conference report was agreed to.

PORTO RICO.

Mr. JONES. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 9533.

The SPEAKER. The gentleman from Virginia moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the Porto Rican bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 9533, with Mr. FERRIS in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 9533, of which the Clerk will report the title.

The Clerk read as follows:

A bill (H. R. 9533) to provide a civil government for Porto Rico, and for other purposes.

The CHAIRMAN. There is an amendment pending, offered by the gentleman from Oklahoma [Mr. MURRAY]. The gentleman from Virginia [Mr. JONES] is recognized.

Mr. JONES. Mr. Chairman——

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the amendment may be again reported.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that the amendment may be again reported. Is there objection?

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. MURRAY: Page 3, line 24, after the word "allowed," insert the words "and that no political or religious test shall ever be required for the exercise of civil or political rights."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. KEATING. Mr. Chairman, before we leave that paragraph, I desire to offer this amendment on page 4, line 8.

The CHAIRMAN. The gentleman from Colorado offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. KEATING: Insert as a new paragraph, on page 4, after line 8, the following:

"That the right of workers to organize for the purpose of securing better wages, shorter hours, and improved working conditions shall never be questioned."

Mr. KEATING. Mr. Chairman, I can not conceive of any reason why the committee should not accept this amendment. I am prompted to offer it by reason of certain events which transpired in Porto Rico two or three years ago and which were called to the attention of the Committee on Labor.

Mr. DAVENPORT. Mr. Chairman, will the gentleman yield to a question in order that I may understand the amendment?

Mr. KEATING. Yes.

Mr. DAVENPORT. Did the gentleman from Colorado use the words "rights of workers" or "rights of laborers"?

Mr. KEATING. I used the words "rights of workers."

Mr. DAVENPORT. It occurred to me that "workers" is rather an indefinite word there, and I thought perhaps the gentleman had used it inadvertently.

Mr. KEATING. I think the term "workers" is really a broader term than "laborers," and therefore I used the word "workers." I am not particularly concerned about the occupation they are engaged in, but I want men who work and who organize to better their condition to be distinctly recognized in the terms of this act.

It is alleged by the workers of Porto Rico that they have been denied that right. I hold in my hands a petition, prepared by the workers of Porto Rico and forwarded to the Committee on Labor of this House, in which they allege that their right to organize, their right to strike, in order to insure shorter hours, increased wages, and improved conditions, has been denied in Porto Rico.

Now, I would not undertake to say that all the statements set out in this petition are true; but, whether they are true or not, the matter has been called to the attention of this House, and we know officially that, in the judgment of the workers of Porto Rico, they are being denied the right to organize. So I offer this amendment in order that it may be distinctly understood that in Porto Rico hereafter the right of workers to organize shall never be questioned.

Mr. YOUNG of North Dakota. Mr. Chairman, will the gentleman yield?

Mr. KEATING. Yes.

Mr. YOUNG of North Dakota. For purposes of information only, I would like to know who denied to them that right? Was it officers of the Porto Rican government or the governor, or who was it that denied to these people the right to organize?

Mr. KEATING. I hold in my hand a report prepared for the American Federation of Labor, and I find the following in that report, which has been made a part of the petition to the Committee on Labor of this House. It says:

PORTO RICO.

Mr. Santiago Iglesias, president of the Federacion Libre de los Trabajadores de Puerto Rico, makes the following report of the year's work in Porto Rico and other Spanish-American countries:

The invasion of Porto Rico by Americans and the infusion of the principles of the American Federation of Labor into the life of the workers have led to considerable change in the attitude of the people toward work and toward the workers. The American Federation of Labor has tended to strengthen in many ways the position of the laborers.

The forces of reaction and greed of employers have shown great aggressiveness during the last year. All that could be done to destroy existing labor organizations and to prevent the organization of new ones in the island has been done.

In spite of that, during the year past the toilers have advanced along the road of progress toward the achievement of a better social, economical, and political independence by means of a methodical and persistent labor fight, both collectively and individually. The effects of this effort will prove in the near future to be highly beneficial to the producing people of the island at large, and specially to the agricultural laborers so much exploited in this country.

The efforts of the American Federation of Labor are being antagonized by those who have interests in keeping this island as a large factory worked by slaves.

On the other hand, the workers are realizing that only by an active, economic organization and a persistent effort the social and economic progress could reach the masses of the workers in the agricultural fields where the crops are collected, and those of the industrial pursuits where they are suffering an intolerable economic exploitation. Certainly they are striving to sweep out the old form of Spanish peonage now aggravated with the American form of plutocracy in its new form of feudalism.

It is true at this time that the landholding conditions involved in most of the agricultural districts of the island have enabled the employers to keep what amounts to a feudal system for the operation of the sugar as well as the tobacco fields and manufactures.

The most important event during the past year brought about by the labor movement was the greatest strike of agricultural workers that ever occurred in this island.

STRIKE OF AGRICULTURAL WORKERS.

About 40,000 agricultural workers of the sugar-cane fields and from some of the mills, men, women, and children went on strike during the early days of February of this year. The bulk of them lack necessary resources for striking. However, it was the most favorable occasion we had to teach the peasants the principles and the aims of trade-unionism and the best way to create the most powerful organization of the agricultural workers.

After taking into consideration the deplorable conditions prevailing in the country, the low wages and long hours, and taking into consideration also the high prices for sugar which the companies obtained at that time in the American market, it seemed to us that no better opportunity would present itself to advance and strengthen the position of the workers getting for them better wages, shorter hours of labor, and the right to organize themselves.

But the old, old story that happens in this island when workingmen entertain any plan for freedom was repeated over again. As soon as the bosses realized that the labor movement afforded an opportunity to be heard and the chance to create a powerful organization, repressive measures were undertaken and a rule of terrorism inaugurated among the working people by the police authorities, by the mayors, judges, and other officials of the government. In time of strikes the masters assumed the power of police in many ways to force the poor laborers to go back to work on the terms of the employers. Of course, real freedom under such conditions is impossible and industrial tyranny prevailed.

The labor men were prosecuted, jailed, wounded, and killed in the streets and highways, with the purpose of stopping the advancement of the labor movement, and of cutting in the bud the aspiration of the peasant folk for freedom, who produce the wealth of the island.

According to the old policy of tyranny the government supported the employers and the privileged, the police force were put at their disposal to force the agricultural workers to return to work, or to compel them to leave the houses where they were living, if they would not go to work under the old conditions. All the public police force, under the pretense of keeping order and guaranteeing the properties, was in the service of the private corporations, landlords, and capitalists to break the strike, to force men to work while they enjoy their banquets and drinks. In almost all the towns where the workingmen were on strike the local headquarters of the police force were installed within the sugar mills or under their premises, the men of the force were fed by the plantations' owners, and the horses and automobiles used by the police to hunt the strikers were also furnished by the bosses.

The governor turned over to the police the whole rural region, and these in their turn had forbidden that there should be any public meeting, gatherings, parades, and groups of not even 10 persons should gather on the highways and barriers of the whole island, though it were shown that such gatherings were of an orderly and peaceful character. So practically a species of martial law was declared by the police, and attacks upon strikers were very common. It was very common to force the labor speakers down from the stands and afterwards to disperse the meetings, the workers being brutally attacked with revolvers, carbines, and clubs.

Thus it is that the wish of the employers was secured by the police force, namely, that of breaking the strike of the poor country workers through fear and intimidation, through persecution, and murder.

Upon request from every union of Porto Rico, we asked President Gompers to help the workers of this country. The American Federation of Labor, after being informed of the many sad incidents of the agricultural strike in which poor laborers had been killed and many others imprisoned and clubbed, asked for and obtained that the Federal Commission on Industrial Relations would investigate the labor troubles of Porto Rico. In pursuance of advices from President Gompers, Mr. Rivera Martinez, president-organizer of the Cigarmakers' Unions of this island, and I went to Washington to be heard before the commission. This hearing took place about May 26–27 of this year. The insular government sent also two representatives to appear before the commission to defend the government officials. Mr. Martin Travieso, secretary of Porto Rico, and Mr. Bills, of the bureau of labor, represented the government.

In summarizing the matters presented before the Commission on Industrial Relations by the labor representatives I desire to mention those of more importance.

Our island of Porto Rico is one of the West Indies which occupies an important place as to agricultural production. It had been a possession of the Spanish monarchy for more than 400 years and had a governmental régime brutalizing in its results, and the régime of this Government was deeply rooted in Porto Rico. The island has about 1,200,000 inhabitants—25,000 industrial workers and about 600,000 agricultural laborers.

From and after 1898 Porto Rico became a possession of the United States of America. It has progressed in many ways. It is true that the conditions of the toilers have improved somewhat, relatively speaking, though not in proportion to the vast wealth that this same class has produced, and much less in comparison with the great improvements made by the monopolists of commerce, industry, the political power, the financial power, and the possessors of privileges and franchises.

Some of the deplorable conditions of the peasant of Porto Rico are the following:

Men working in the sugar and tobacco plantations, engaged in cutting cane, labor an average of 12 hours a day for the wage of 45 to 55 cents.

The system of paying the men with checks is much in vogue. The check system, operated in conjunction with the "pluck-me" stores, enables the company or the tools of the company to gather in all the money paid. Checks are, of course, redeemable only at "pluck-me" stores, or like stores.

Woman labor is even more exploited than that of the men. Women and girls work, as a rule, from 10 to 12 hours a day in sugar fields or selecting tobacco or coffee in the large houses, for which they make an average of 30 to 40 cents a day. Other laborers can not make more than 30 to 40 cents a day for 12 and 14 hours' labor.

Housing conditions are almost indescribable. Families of 10 and 12 live in one room, and a small room at that. This is the rule rather than the exception. It can be found in thousands of cases. Lucky are the families that boast of having a two-room shack. Few, indeed, have three rooms.

The houses in the suburbs are, as a rule, built on hills. As they are difficult to construct, they are built as small as possible. Thus an entire family has to dwell in a small shack measuring 10 by 12 feet in width and less than 8 feet in height.

Now, in the early days of February more than 40,000 of these poor workers went to strike, demanding a flat scale of pay of $1 for an eight-hour workday.

At several points—Fajardo, Juncos, Humancao, and other places—agreements involving 9,000 laborers had been closed with the employers, resulting in the winning of important advantages to the men. But when the police of Porto Rico were placed at the disposal of the corporations, then not only did the corporations give up the idea of reaching terms of agreement with the laborers, but the corporation which had already signed and made peace with its workers broke the agreements and entered fiercely into the contest to establish the old conditions of wages, etc.

At a meeting of the Sugar Producers' Association, held in San Juan, representatives from most of the large sugar interests all over the island discussed means of handling the situation, and finally requested the enlistment of at least 200 more insular police. At this conference Gov. Yager was told that in various sections cane fires had followed meeting of strikers, at which threats were made by strikers against the property of cane men. Most of those who attended the meetings were inclined to oppose a basis of settlement which the Fajardo Co. had reached with its laborers, which provided for a sliding scale of wages to be based on the price of sugar. Since this agreement was entered into it was found unsatisfactory by the laborers, and after a trial of but two days it was dropped, in so far as the field laborers were concerned.

The bureau of labor was helping the employers in breaking the agreements. The following telegram was signed by chief of the bureau of labor:

DOMINGO SANTOS,
Fajardo, P. R.:

Mr. Bird, manager of the Fajardo Sugar Co., has officially informed the government that workingmen are not fulfilling their part of the contract, which makes it therefore neutral. I trust all differences will work out regardless of strike.

(Signed) BILLS.

This telegram was sent after the Sugar Growers' Association and corporations had agreed not to sign any terms of agreements with the workers and not to agree upon any wage scale. More than 1,000 country workers in Fajardo filed complaints duly sworn to before a judge protesting against the attitude of the chief of the labor bureau, and the same thing happened at Juncos, Humacao, and other places. Since the Sugar Growers' Association refused to sign any terms of agreement with the agricultural workers, police violence commenced all over the island to break the strike, as has been proved by many exhibits.

Some of them are as follows:

Exhibit No. 1: Contained the casualties of Juncos, where a parade of strikers was violently dispersed with shots by the police, and the men were beaten.

It was generally known that the man who started the attack against a peaceful parade of agricultural workers at Juncos was an officer of the Sugar Central, who, with a revolver, had been trying to intimidate and violently disperse the assembly of the workers, and, notwithstanding (12 peasants having been injured by the police and the officers of the Sugar Central), no arrest was ordered against the officer of the sugar company, nevertheless the workers were sentenced to six months in the municipal court, and how they were acquitted by the district court,

where they filed an appeal. While this trial was in progress in the district court, the justice had to call attention to one of the corporals and to two of the guardsmen on account of their perjury before the court.

These men of Juncos who were released on the appeal had been put in jeopardy by preferring charges against them for the same crime and with the same evidence. The flags which the strikers carried in the procession, even the American flag, were torn by the police from the hands of those who bore them.

Exhibit No. 2: Contains several documents regarding the deplorable incidents which occurred on the island of Vieques, where a parade of strikers was violently dispersed and five men killed and others wounded; a legal report of the attorneys for the strikers, and some affidavits. It was demonstrated by those documents how some of the men were sentenced by the judge in the local headquarters of the police, which was not a legally constituted court. The writs for imprisonment were amended, some of them were originally used, charging the men with assault and battery, with intent to deprive other persons of life, and in order to deprive them of jury trial these writs were amended and the cases were brought before the municipal court in which a severe penalty was imposed upon them. The dates of the sentences of some of the men were illegally amended to prevent the appeals to the superior courts. The so-called concealed weapons and arms of the laborers were sticks at the ends of which were flags. The same exhibit contains the manner in which the offices of the federation were closed by the police and how the meetings were prohibited; how the liberty of these men was jeopardized by denial of habeas corpus. When the workers protested against those actions they were brutally wounded, jailed, and killed. Three laborers defending themselves wounded two policemen with their machetes. More than 100 arrests followed. In the town the police scattered the people with shots and blows. There was a great dread in the town.

Exhibit No. 3: Contains an affidavit sworn to and signed by about 300 persons, stating that the one responsible for the occurrences that took place in Ponce was only the captain of police, Ramon Fernandez Nater, and those guardsmen under his command, who without cause insulted the people and disbanded a meeting of strikers without cause, which was being held near the market. The meeting was opened in the evening at half past 7, by the members of the organized labor movement. After I had spoken for about an hour, and was making the statement that the police could not be placed on an impartial and independent position while having their quarters in the premises of the sugar mills and plantations, while eating and drinking with the bosses, while using the horses of the sugar-mill owners under the pretense of guaranteeing the properties, I was brutally ordered to leave the tribune, while the captain of police, Fernandez Nater, cried: "This meeting has finished."

Then the police were ordered to dissolve the meeting; the workers were shot and clubbed. The result of this social crime committed against the people was a man dead and several wounded. Organizer Rivera Martinez, myself, and all my fellows from San Juan in the commission were arrested and placed under bail of $2,000.

Ultimately the district court of Ponce, where our trial took place, released my colleagues and me of the charges preferred by the captain of the police against us.

In an affidavit signed by Juan Cruz Piris, secretary of the Free Federation of Workingmen, who after the meeting disbanded came near the headquarters of the police to offer his service to us, and he was beaten by Captain of Police Fernandez Nater and some of the guardsmen; he was then taken to the prosecuting attorney. The prosecuting attorney asked the captain of police why he had beaten Mr. Piris, and the captain of police answered that he had beaten him by mistake. Some of the police without any warrant entered the offices of the federation at Ponce, broke up some of the desks, and took with them some of the documents and papers of the strikers' committee.

Exhibit No. 4: Contains 14 affidavits intended to prove how Policeman Quiles illegally killed the workman named Robledo at the meeting in Ponce, and how the man was killed while he was running, and how captain of police is also responsible for this crime. Policeman Quiles was set free on bail, and he is as yet in active service, not having been suspended as policeman or from payment. He is serving duty and as a man he has the confidence of his chiefs. The commission of the police has just demonstrated its good feelings in regard to Policeman Quiles by voting an appropriation of $100 of the funds of the same force to defend him, and also have requested some of the local headquarters to help this policeman in his defense before the court. This initiative is due to the activity of the chief of police of Ponce, Fernandez Nater. This same police commission granted gold medals to those who killed the strikers of Vieques.

Exhibit No. 5: Contains 14 affidavits to prove how the right of meeting, no matter how peaceful, was absolutely denied by chief of police, who exceeded the order received from the Governor of Porto Rico. The right of meeting in Arecibo was denied to all of the representatives of the American Federation of Labor in or outside of the urban zone.

Contains 7 affidavits signed by several persons to prove assaults, abuses, and searches by the police in the town of Arecibo, and to prove the number of men who were wounded by the police, and how the people were terrorized. To prove how 19 workingmen were held for trial and how they were sentenced to 30 days by the municipal court without being given the necessary time to speak to their lawyers and to produce evidence in their favor. These 19 persons were acquitted on the appeal that they filed in the district court and no further action taken.

Exhibit No. 6: Is an affidavit signed by Mr. Andres Orellano, of the Bakers' International Union, stating how he was thrown from the platform while addressing a meeting in the town of Barceloneta. Charges were preferred against him by the police before the municipal court and he was released He was compelled to leave the town and prohibited from speaking within the jurisdiction of that municipality.

Exhibit No. 7: This is in regard to the unbecoming conduct of the captain of police in Cayey, and the persecutions of the labor press. On March 20 the police violently disbanded a meeting, clubbing the people. A local representative of the federation was arrested after being taken down while he was speaking. The annual labor convention which was in session at the Baptist Church was closely watched and disturbed by police. The labor press men were also arrested for protesting against the brutality of the police officials The same kind of brutalities of the police and violent dispersion of labor meetings occurred at Anasco, San Lorenzo, Bayamon, Humacao, and other places. Public roads were illegally closed to the agricultural strikers in order to prevent them from going from their homes to towns and vice versa. Contains the original letters and telegrams of mayors, prohibiting the free exercise of the right of meeting.

Exhibit No. 8: Is to prove the conspiracy of the employers trying to destroy the American Federation of Labor in Porto Rico, and how to place discredit upon this labor organization.

The Sugar Growers' Association has issued a circular relative to the creation of funds with which to form an association against strikes with the purpose to destroy the Free Federation of the Workingmen of Porto Rico which is the State branch of the American Federation of Labor. The sugar men solicited checks of $15 to be contributed by each member of the Sugar Growers' Association, and at the same time recommended the so-called "Liga Obrera" and "Federation Regional" as sister organizations to counteract the strikes brought on by the "Free Federation," and in order to carry on this work money is urgently requested of each member.

In another circular, pecuniary assistance is also asked of the rich merchants of the island, possibly with the same purpose of working against the American Federation of Labor.

The whole island was placed in the hands of the police and there occurred many dispersions of meetings, speakers taken down from stands, and the entire sugar and tobacco fields were terrorized and workingmen practically forced to go back to work.

The martial law was declared by the police, and attacks upon the people were accumulating rapidly to the discredit of the police who kept on terrorizing the country people.

When the house of delegates was informed by one of its members that a meeting had been disbanded by the insular police in Ponce while I was addressing the gathering, the matter was in the first moment discussed, and one of the members of the house moved that a special committee be appointed to investigate the facts and inform the house of the truth, because one man who had been present in the meeting had been killed by the bullets of the police and some more seriously wounded. A resolution presented was as follows:

"Be it enacted, That the most energetic protest of the house be brought to bear against the violation of the law of defending the rights of the people committed at Ponce by members of the insular police, while they caused a man to come down from the speaker's stand or rostrum while he was in the full exercise of his rights of censure."

When President Gompers received the news by cable in regard to the strikers' conflict and the killing of men he called these matters to the attention of Gen. McIntyre, Chief of the Bureau of Insular Affairs, and asked for information. He was informed that no information as to the killing or wounding of anyone or that the constitutional rights of the people were invaded had been received. Then President Gompers requested Gen. McIntyre to send a cable under his name to Iglesias, Porto Rico, when McIntyre said he would take pleasure in doing it. Mr. Gompers could not get my answer because the Government declared it was not in strict accord with the facts.

Gov. Yager was requested to appoint a commission to investigate the incidents of the strike. All we wanted was an opportunity to present publicly and impartially the facts. The reasons we had for insisting upon the appointment of this commission was that we were firmly convinced that in no other way could the Government obtain the absolute truth of the deplorable facts of tyranny and oppression brought about by the public officials of the Government during the strike.

After our appearance before the Commission on Industrial Relations, upon our request, President Gompers and Secretary Morrison introduced us at the White House, helping the people of Porto Rico by handing to President Wilson, through the courtesy of Secretary Tumulty, the memorial which we had prepared portraying the deplorable situation as it exists in Porto Rico.

CONGRESSIONAL INVESTIGATION.

At the convention of the American Federation of Labor, held in Philadelphia, Pa., was adopted the following resolution:

"Resolved by this convention of the American Federation of Labor assembled, That the President of the American Federation of Labor be earnestly recommended to request the President of the United States or the Congress, or both, to appoint a commission as soon as possible with authority to investigate the deplorable industrial conditions, as well as the general governmental affairs of the island, especially in the questions affecting education, health, and sanitation, economic and living conditions of the working masses of Porto Rico, and land and financial resources, and to ascertain if it is true that the Federal, as well as the organic law, has been continually violated by the big corporations which exploit the people of the island."

It is the earnest wish of the Free Federation of Workingmen of Porto Rico that such commission may visit our island to make a thorough investigation, as the resolution urges; that the commission may be composed of men who will not, as several commissions in the past have done, accept mere courtesies and official declarations as sufficient evidence upon which to base their attitude, but that the commission be composed of men who will go to the heart of things to get the real points and views of men of labor, of business, who know, who feel, who understand.

ORGANIC LAW AND CITIZENSHIP.

That a new organic act or constitution for Porto Rico is necessary all Porto Ricans agree, and all who studied the subject recommend. It is therefore respectfully urged that a new organic act or constitution for the government of Porto Rico should be recommended to Congress and enacted, and it is urged that whatever form the new organic act should take great consideration should be given regarding the power, the influence, and the capacity of which the working people of the island are capable. The existing political vices, the pernicious effect of false system of education by which the children of the poor are impressed with the idea that they occupy an inferior position in society, and the overt conduct of employers should be considered, and indeed under every circumstance the almost defenseless position in which the laborers of Porto Rico are now placed should be regarded as a feature for the consideration and protection of the law and its administrators. The workers should be given the fullest assurance and guarantee of protection in the enjoyment and exercise of constitutional rights equal with those of other citizens of Porto Rico.

At present the people of Porto Rico occupy an anomalous position. We belong to the United States and yet are not citizens of the United States. We are a people belonging to the island of Porto Rico, part of the United States, and yet are a people without a country. Citizenship should be conferred upon the people of Porto Rico, not individually but en bloc, collectively, and thus make for a more complete Americanization of the people of Porto Rico, in full touch, sympathy, and cooperation with the people of the United States. The possessors of capital should be obliged to pay their full share for what the government needs for public education, for sanitation, for roads, and for improvements on the island, as well as the security of justice for all.

This report so impressed the delegates to that national convention that they adopted a resolution calling upon Congress to appoint a committee to investigate conditions in Port Rico.

Congress did not see fit to act upon that suggestion. The matter was never formally brought before this House. I think now it is too late to appoint such a committee.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. KEATING. Mr. Chairman, I ask for five minutes more.

Mr. DAVENPORT. Mr. Chairman, I ask unanimous consent that the gentleman be given five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

Mr. JONES. Mr. Chairman, was the Chair putting the question?

The CHAIRMAN. Yes.

Mr. JONES. I desire to be heard on that for a moment.

Mr. KEATING. No; the Chair was not putting the question on the amendment, but simply my request to proceed for five minutes more.

Mr. JONES. All right.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. YOUNG of North Dakota. Mr. Chairman, will the gentleman yield?

Mr. KEATING. Yes; I yield to the gentleman from North Dakota.

Mr. YOUNG of North Dakota. Does the gentleman believe that if this amendment were adopted it would prevent the repressive measures he speaks of?

Mr. KEATING. It may not prevent those repressive measures, but it would be a recognition in the organic law that the workers have the right to organize, and to that extent it would exercise a restraining influence upon public officials.

Now, as I said before, I have no desire to present an indictment to this House against the officials of Porto Rico. I have no desire to say that these charges are true or untrue. That is not material for the purposes of the present discussion. It should be sufficient, so far as this House is concerned, to know that as responsible a body as the American Federation of Labor has taken cognizance of these charges, that the workers themselves have made the charges, to justify this House in taking action, especially when the only action asked is that this inherent right shall be recognized. The right should be recognized without question wherever the American flag flies—the right of workers to organize for the purpose of improving their condition.

I trust the amendment will be adopted, Mr. Chairman.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Colorado [Mr. KEATING].

Mr. JONES. Mr. Chairman, I can not quite agree with my friend [Mr. KEATING] that this amendment ought to be adopted, if for no other reason, because it is essentially right. I do not think we ought, even if it be admitted that the proposition embodied in his amendment is in itself good, to incorporate it in this bill. He ought not to and we can not put everything in this bill that is essentially right. I do not know what took place before the Committee on Labor nor have I any knowledge as to the character of any petitions which may have been presented to that committee from Porto Rico. I do know that this bill was under consideration in committee for a long time and that no such statement as that just made was made to the Committee on Insular Affairs. I do know, too, that when the Porto Rican bill, which was reported to this House in the Sixty-third Congress, was under consideration in committee no such representations as are now made were then made. I am informed, too, by the Delegate from Porto Rico that the gentleman is mistaken. The people who sent him the information upon which he bases his statement are mistaken in saying that the laborers of Porto Rico have ever been denied the right to strike. I never heard of it, and I have been somewhat familiar with Porto Rican matters for the last 14 or 16 years.

Mr. KEATING. Will the gentleman yield?

Mr. JONES. I will.

Mr. KEATING. The gentleman does not question the right of workers under the American flag, either in Porto Rico or elsewhere, to organize?

Mr. JONES. Certainly not.

Mr. KEATING. And the gentleman believes that it would be quite proper to recognize that right in the fundamental law?

Mr. JONES. Yes; but I can not believe this right has ever been denied, and therefore I see no reason for the adoption of this amendment.

It is doubtless true that some irresponsible persons, some self-constituted, so-called representatives of labor in Porto Rico, have made such representations as these, but I can not believe for a moment that the laboring people of Porto Rico have ever been denied the right to strike. The statement read by the gentleman is most general in its terms. Those who make these charges should be able to point to some specific instance when this right was denied. They should state who denied this right to the laboring people of Porto Rico.

Mr. KEATING. Will the gentleman yield?

Mr. JONES. I will.

Mr. KEATING. If the gentleman will give me time, I will read the complete statement, which gives the date and the names of the public officials, when this instance occurred, and all that. The only reason I did not read the entire statement was because of lack of time. If the committee will grant me permission, I will put the complete statement in the RECORD, so that the gentleman and every one else may know, not only that these events did occur, but who was responsible for them.

Mr. JONES. I have no objection to its going into the RECORD, but I have such absolute confidence in the administration in Porto Rico, especially in Gov. Yager, that I do not believe he would countenance any effort on the part of policemen or other Government officials to prevent labor from organizing.

I desire that the gentleman from Porto Rico [Mr. RIVERA], who knows more about this than anyone else here, may be recognized so that he may state what he knows about this matter.

Mr. RIVERA. Mr. Chairman, I will not oppose this amendment. I consider it very just, although not very important, because the local laws of Porto Rico provide sufficient guaranties for the laboring classes in the island to organize themselves into unions and to declare and maintain strikes. They never were interfered with in the exercise of this right. They do declare strikes. They are organized. The American Federation of Labor has a branch in Porto Rico. This branch has been in existence for more than 12 years. In no instance have the officials of Porto Rico opposed the organization of the laboring classes. The only fact is that at some times laborers and certain of their leaders have during strikes disturbed the public order and the public peace, and the Governor of Porto Rico has been obliged to compel them to respect order. Among the duties of the Governor of Porto Rico is the duty of maintaining peace and good order, and he has always done so effectively. This is the only instance of which I know. Never has the right to organize or to peacefully strike been denied to the laborers of Porto Rico.

Mr. LONDON. Mr. Chairman, in supporting the amendment that the right of workers to organize shall not be abridged I desire to urge that in framing a new fundamental law, a new charter of rights, we must consider modern conditions. At the time the amendments to the Constitution, which we now usually refer to as the Bill of Rights were drafted, the modern struggle between the industrial working class and large employers of labor was unknown. It could not be foreseen. The men who drafted the Declaration of Independence, the men who a few years later presented to the world the Bill of Rights, knew only such conditions as were prevalent in their day, knew only of such struggles as preceded their generation. They could not foresee the modern, gigantic, bitter conflict between capital and labor. You are now framing a fundamental law for Porto Rico and as part of it a bill of rights. The right of workers to organize has been questioned in many States, has been questioned both by legislatures and by the courts. Within recent times in the State of New York they were compelled to pass a special law—I think it is section 170 of the Penal Code, which provides that the organization of workers for the purpose of obtaining an advance in the rate of wages, and so forth, shall not be held a conspiracy. That was done in order to meet the difficulty presented by the common law under which such an organization was held to be an unlawful body. Now, why not say in clear, unequivocal and specific terms that the right of the workers to organize for the improvement of their condition shall not be questioned? It can certainly do no harm, and it may do a great deal of good. By adopting this amendment you will lay down a moral code for the guidance of those who will be engaged in industrial conflicts. This struggle between poor and rich, between those who have and those who have not, between the man who has property and the man who has no property, will go on for many years; and unless you provide a civilized form for the contest, an outlet for a peaceful method of conducting this warfare, unless you by law provide that those who temporarily enjoy the power of making laws shall not utilize that power in order to oppress the masses, you will do a great deal of harm to the people of Porto Rico. Therefore I ask the chairman of the Committee on Insular Affairs not to interpose any objection to the proposed amendment.

Mr. DAVENPORT. Mr. Chairman, I do not think there is a Member of the House who is more strongly in favor of labor having the right to assemble peaceably and to organize for its

own protection and for the purpose of seeing that it gets better wages than I am, but I candidly believe that all the guaranties that are necessary are provided for in the bill of rights for this temporary government of Porto Rico. If they are not, I say frankly that I am in favor of putting in those guaranties. Yet in providing a bill of rights for a temporary and limited government of Porto Rico, which we are now providing, I do not believe it is necessary to write into that bill of rights all the provisions necessary in a statute. I believe we have written into this bill of rights a sufficient guaranty to the laborers of Porto Rico, if they desire to organize and peaceably assemble for the purpose of presenting their grievances against those for whom they are laboring, to protect their rights. To-day is the first time since we began considering this bill—the provisions of which began to be considered more than four years ago—that I ever heard that laborers had been denied the right in Porto Rico to organize. I know at one time that Mr. Gompers was before our committee and spent quite a lot of time, and later on one of the natives of Porto Rico was before us, and if either one of these gentlemen mentioned the fact that any laborers had been denied the right to organize, either by the court or the Government officers, I have no recollection of it, and I can not find it in the report of the hearings.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. KEATING) there were 14 ayes and 19 noes.

Mr. KEATING. Mr. Chairman, I demand tellers.

The CHAIRMAN. The gentleman from Colorado demands tellers. All those in favor of ordering tellers will rise and stand until they are counted. Sixteen gentlemen have risen, not a sufficient number and tellers are refused.

Mr. KEATING. Mr. Chairman, I make the point that there is no quorum present.

The CHAIRMAN. Evidently there is not a quorum.

Mr. FESS. Mr. Chairman, I move that the committee do now rise.

Mr. JONES. Mr. Chairman, the Chair has directed that the roll be called, and it does seem to me that this is not the proper time to move that the committee rise after it has developed that there is no quorum.

The CHAIRMAN. The Chair at first was of the opinion that it was not, but the Chair thinks it is and the question is on the motion of the gentleman from Ohio that the committee rise.

The question was taken; and there were 24 ayes and 32 noes.

Mr. FESS. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed the gentleman from Ohio [Mr. FESS] and the gentleman from Virginia [Mr. JONES] as tellers.

The committee again divided, and the tellers reported that there were 1 aye and 100 noes.

So the committee refused to rise.

Mr. COOPER of Wisconsin. Mr. Chairman, I offer the following amendment.

Mr. KEATING. Mr. Chairman, before I made the point of no quorum I made the demand for tellers. The Chair decided that there was not a sufficient number present to order tellers, and I submit that the Chair should now submit my demand for tellers.

The CHAIRMAN. The vote by tellers has disclosed that a quorum was present. The Chair has no way of knowing whether there was a lack of a quorum before or not.

Mr. KEATING. When the Chairman decided that there was not a sufficient number present to order tellers the Chair counted the number present.

Mr. MURRAY. Mr. Chairman, the gentleman from Colorado desires that his request for a vote by tellers be put, and he is entitled to it, because it has developed that a quorum has come in since he made the point.

The CHAIRMAN. The Chair thinks that this is the situation: The gentleman from Colorado offered an amendment, and the vote was taken, and the amendment was disagreed to. Then the gentleman from Colorado demanded tellers, and tellers were refused. Then the gentleman from Colorado made the point of no quorum.

Mr. KEATING. I made the point of no quorum, and the fact that there was not a quorum in the House prevented the House from giving me tellers.

Mr. JONES. But it has since developed that there was a quorum.

Mr. SABATH. Mr. Chairman, the Chair can not deny the gentleman from Colorado tellers. When the request for tellers was made the Chair ascertained that there was no quorum. We could not have proceeded in order without a quorum, and the request of the gentleman is still pending. The vote that has just been taken was whether the committee should rise, and the committee refused to rise, and the request of the gentleman from Colorado was in order and he is entitled to tellers.

Mr. JONES. May I ask the gentleman from Illinois a question?

Mr. SABATH. Yes.

Mr. JONES. It is admitted that the gentleman from Colorado made the point that there was no quorum, but it has since developed by tellers that there was a quorum, and before that the gentleman's request for tellers had been denied. Then he raised the point that there was no quorum, and therefore he has now nothing to complain of.

Mr. SABATH. If there is a quorum, we can proceed to do business and his request for tellers is in order. The Chair can not deprive him of the right to have tellers.

The CHAIRMAN. The Chair is ready to rule.

Mr. MURRAY. If the Chair had not announced the absence of a quorum the gentleman's contention would not be correct, but after it developed that a quorum was present the gentleman's request for tellers is still pending.

The CHAIRMAN. The Chair thinks that the gentleman's request for tellers was put and denied. After that he made the point of no quorum.

Mr. MURRAY. But it was developed on another question.

The CHAIRMAN. That is true; but the Chair thinks the matter is settled. The gentleman from Wisconsin offers the amendment which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. COOPER of Wisconsin: On page 3, strike out all of paragraph beginning with line 13 and ending with line 15, inclusive, and in lieu thereof insert the following: "That slavery shall not exist in Porto Rico. That involuntary servitude except as a punishment for crime whereof the party shall have been duly convicted, shall not exist in Porto Rico."

Mr. COOPER of Wisconsin. Mr. Chairman, I call the attention of the committee to the fact that as the paragraph is punctuated on page 3 it would permit slavery in Porto Rico as a punishment for crime. It reads:

That neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist in Porto Rico.

Under that language and punctuation either slavery or involuntary servitude could exist in Porto Rico as a punishment for crime. I have drawn the amendment so that there shall be left no opportunity for mistake because of punctuation. I think that there can be no objection to the amendment.

Mr. MONDELL. Will the gentleman yield?

Mr. COOPER of Wisconsin. Yes.

Mr. MONDELL. Would not the gentleman accomplish the same result by placing the comma that is after the word "servitude" after the word "slavery"?

Mr. COOPER of Wisconsin. In my judgment any law which so vitally affects human rights ought not to depend upon punctuation for its proper construction. We ought to put it beyond the possibility of misconstruction, and we can easily do so.

Mr. TOWNER rose.

The CHAIRMAN. Does the gentleman yield?

Mr. COOPER of Wisconsin. I do.

Mr. TOWNER. Mr. Chairman, I was just going to ask for the floor in my own right. I am in favor of the amendment. I think, Mr. Chairman, that the language that is suggested by the gentleman from Wisconsin is preferable to the language used in the bill, not only because it is clearer, but because of the fact that the exception refers not to slavery but to involuntary servitude, and in every respect the language suggested is better, and I hope the chairman of the committee will accept the amendment.

Mr. DAVENPORT. I will say there is no objection whatever to the language used, and so far as the committee is concerned it has no objection and we will accept the amendment offered.

Mr. MONDELL. Mr. Chairman, I do not rise to oppose the amendment, but simply to call attention to the fact that the language in the bill is the language of the Constitution of the United States. The only difference is that the comma is in the wrong place.

Mr. COOPER of Wisconsin. Mr. Chairman, I called attention to the fact that exactly similar language in another measure was the language of the Constitution of the United States when the bill for the Philippines was up a year or more ago. I then had before me a copy of the Constitution of the United States, and the comma in that copy was in precisely the same place as is the comma in this paragraph of the pending bill. The comma is in the wrong place in the thirteenth amendment to the Constitution, and, strictly speaking, the letter of the Constitution would permit slavery in the United States as a punishment for crime, whereof the party shall have been duly con-

victed. As I said, anything in the nature of an organic act, and especially anything which so vitally affects human rights as does the pending paragraph, ought not in the slightest degree to depend for its proper construction upon punctuation.

Mr. DAVENPORT. We have agreed to accept the amendment.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. MURRAY. Mr. Chairman, I have an amendment which I desire to offer.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MURRAY: Page 3, line 2, insert:

"Private property shall not be taken or damaged for public use without just compensation. Until the compensation shall be paid to the owner, or into court for the owner, the property shall not be disturbed, or the property rights of the owner divested. When possession is taken of property condemned for any private or public use the owner shall be entitled to the immediate receipt of the compensation awarded, without prejudice to the right of either party to prosecute further proceedings for the judicial determination of the sufficiency or insufficiency of such compensation.

"In all cases of condemnation of private property for public or private use the determination of the character of the use shall be a judicial question."

Mr. MURRAY. Mr. Chairman, will the committee accept that amendment? If not, I would like to have 10 minutes on this amendment.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to proceed for 10 minutes. Is there objection?

Mr. DAVENPORT. Mr. Chairman, I suggest that my colleague proceed for five minutes, and then if he desires further time——

Mr. MURRAY. Mr. Chairman, I do not want to set a speech for 10 minutes and quit at the end of 5. If I have to set the speech for 5 minutes, I want to know in advance.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. MURRAY. Mr. Chairman, this section is in the nature of a bill of rights. I do not understand the idea that the committee has when they put into a bill of rights provisions in the Federal Constitution prohibiting a State or a Territory from doing things and at the same time there is not put in measures not prohibited to the States. The Constitution of the United States, in Article I, has numerous limitations, but the most of them are limitations on Congress, not against the States or Territories.

For instance, it says that no preference shall be given for regulation of commerce. No tax or duty shall be laid on articles from any State, and so forth, but the limitation against the right of a State or a legislature are found in section 10, which reads as follows:

No State shall enter into any treaty, alliance, or confederation; grant letters of marque and reprisal; coin money; emit bills of credit; make anything but gold and silver coin a tender in payment of debts; pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts; or grant any title of nobility.

Now, these gentlemen have recited these provisions when they were unnecessary. No State or Territory can do that now, but it is fundamental in a sovereignty that the sovereignty has the right to take private property for public use, and that makes it necessary for the States to put in a limitation that it must be paid for, and that is all this does. Now, there is some wording in this in addition to the ordinary State constitutions, in this, that it provides that before, for instance, a railroad can take the property of a citizen they must pay the citizen or deposit the money in the court for the citizen, wherever the Federal court has had jurisdiction. It was true in the Indian country; it is true everywhere, wherever they have jurisdiction. They appoint appraisers and the appraisers assess the damage to the property, and they say to the landowner, "Take this or go to the court." If he does not accept it, they take his property. They litigate him for 5 or 10 years about the value of his land. What is the result? He is denied the right to his property. Nobody who believes in the right of property and the protection of property would insist for a moment that in the exercise of public domain or any kind of public use that a private citizen's private property should be taken until he receives the money or the money is deposited in the court for his benefit. And that is all this provision provides. This provision is found in the Oklahoma constitution and will guarantee to the landowner, to the holder of the property, the value of his property the moment it is taken by a corporation or for any kind of public use.

I am really astonished that the gentleman does not accept it. They put in the provisions prohibited to the State legislature, and leave out the provisions that ought to go in and upon which a Territorial or State legislature can make enactment unless they are limited. Now, I do not object, of course, to the provision prohibiting slavery—although they could not do it under the Federal Constitution or the other provisions they have put in—as an example to the Porto Rican people; but certainly, whenever you exercise a power provided in this amendment of eminent domain by taking property, the real right of the man, whether a large or a small owner, ought to entitle him to the compensation the moment he is divested of the use of that property. And this is all this amendment does.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Oklahoma.

Mr. JONES. I would not object to the first sentence in this amendment, that which declares that private property shall not be taken or damaged for public use without just compensation, but I do very seriously object to the remainder of it.

Mr. MURRAY. I am willing to divide the question and vote on those paragraphs separately.

Mr. JONES. I hope the gentleman will offer his propositions as separate amendments.

Mr. CANNON. Will the gentleman allow me?

Mr. JONES. Certainly.

Mr. CANNON. Section 2, "that no law shall be enacted in Porto Rico which shall deprive any person of life, liberty, or property without due process of law, or deny to any person therein the equal protection of the laws," seems to cover everything.

Mr. MURRAY. No, sir; it does not.

Mr. JONES. It seems to me that covers it sufficiently, and that was the idea of the committee. But in order to make it perfectly clear that property can not be taken without just compensation, I would not object to that much of the amendment. I do object to general legislation in a bill of rights.

Mr. MURRAY. Mr. Chairman, I will agree to call for a division of the question and vote by paragraphs.

Mr. CANNON. I think the gentleman is entirely correct, and it could not be broader than it is succintly stated and carried in the constitutions of all the States.

Mr. MURRAY. Not all of them.

Mr. CANNON. After all, it is in the Federal Constitution. I will read it again:

That no law shall be enacted in Porto Rico which shall deprive any person of life, liberty, or property without due process of law.

That covers everything from the birth of Christ to the end of the world, touching life, liberty, and property.

Mr. MURRAY. The gentleman from Illinois would not claim "compensation" and "due process of law" mean the same?

Mr. JONES. Mr. Chairman, all this is in my time. I just wish to add that I agree with the gentleman from Illinois [Mr. CANNON] that no addition to the language of the bill is necessary. But, inasmuch as the gentleman from Oklahoma thinks "due process of law" and "compensation" might not mean the same thing, I am willing that this bill of rights shall specifically state that private property shall not be taken without due compensation. I am not willing to go further and state just how that compensation shall be ascertained. That is a purely legislative matter and should have no place in a bill of rights. It is a matter of detail and not one of principle. The legislature created in this bill will deal with all purely legislative matters.

Mr. MURRAY. Will the gentleman agree to vote on each paragraph separately? Will he agree to that?

Mr. JONES. I will agree to this, that the gentleman withdraw his amendment and offer the first part of it as a separate and independent proposition.

Mr. MURRAY. I want to consume the balance of my 10 minutes.

Mr. JONES. Mr. Chairman, I thought I had been recognized.

The CHAIRMAN. The time of the gentleman from Virginia [Mr. JONES] has expired.

Mr. JONES. The chairman had asked for a vote when I asked to be recognized. The gentleman had concluded his remarks when I was recognized.

Mr. MURRAY. I asked for 10 minutes a while ago.

Mr. BURNETT. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. BURNETT. Has not the chairman of the committee a right to conclude debate?

The CHAIRMAN. He has.

Mr. BURNETT. And had not the gentleman concluded his time and yielded?

Mr. JONES. The gentleman had yielded the floor.

Mr. MURRAY. I call for a vote on the three separate paragraphs of that amendment.

The CHAIRMAN. The gentleman asks unanimous consent——

Mr. MURRAY. I am entitled to a division of the question.
Mr. JONES. I do not know about that, Mr. Chairman.
Mr. TOWNER. Mr. Chairman, a parliamentary inquiry.
The CHAIRMAN. The gentleman will state it.
Mr. TOWNER. The gentleman has no right to demand that his amendment shall be separated.
Mr. DAVENPORT. Not a bit.
The CHAIRMAN. He has the right to offer it in three parts.
Mr. TOWNER. He has the right to withdraw his amendment, and I hope will withdraw the subsequent parts of the amendment. I agree to that.
Mr. DAVENPORT. Mr. Chairman, permit me to say the parliamentary situation is such and his amendment is so offered that he can not ask for a separate vote on the amendment as offered.
Mr. MURRAY. Mr. Chairman, it is set out in three separate paragraphs.
Mr. DAVENPORT. I submit, Mr. Chairman, it is all in one amendment, and he can not compel this committee to vote upon them separately.
Mr. MURRAY. Does not the gentleman know that it is susceptible of division and separation?
Mr. DAVENPORT. Well, I will say to my colleague that I, too, have exercised a speakership at one time, as the gentleman did, and I think I know as much about parliamentary law as the gentleman does, although I do not parade it all over the country as he does [laughter]; and I say that he can not separate, under parliamentary usage, an amendment into its separate parts after he has offered it in its entirety. He can not then ask that it shall be separated into its parts and voted upon as he wishes.
Mr. FINLEY. Mr. Chairman, if the gentleman from Oklahoma [Mr. MURRAY] will offer his amendment in such form as to secure or cover the right of eminent domain exercised by Porto Rico, I think there will be no objection in the committee here to placing that provision in the bill.
Mr. MURRAY. I will ask the gentleman what objection there is, when this is written in three distinct and separate sentences, to separating them?
Mr. FINLEY. I think that before the gentleman can get a vote in that way he will have to ask unanimous consent of the Committee of the Whole.
Mr. MURRAY. Then, Mr. Chairman, I will ask that.
The CHAIRMAN. What is the gentleman's request?
Mr. MURRAY. That these three sentences be divided and voted upon as separate questions.
The CHAIRMAN. The Chair thinks that as offered this is one combined amendment. The Chair thinks that if the gentleman wants to divide it, he should offer just the part he desires to offer at this point, and the Chair so rules. Will the gentleman indicate what part he wishes to submit?
Mr. MURRAY. Mr. Chairman, will the Chair submit my request for unanimous consent?
The CHAIRMAN. The gentleman from Oklahoma [Mr. MURRAY] asks unanimous consent that the amendment be divided into three parts and voted on separately. Is there objection?
Mr. JONES. I shall have to object, Mr. Chairman.
The CHAIRMAN. Objection is made.
Mr. MURRAY. All right. If the gentleman wants to vote against property rights of individuals, go ahead and vote it down. I will vote for it just as it stands.
The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Oklahoma [Mr. MURRAY].
The question was taken, and the Chairman announced that the "noes" seemed to have it.
Mr. MURRAY. A division, Mr. Chairman.
The CHAIRMAN. A division is demanded.
The committee divided; and there were—ayes 1, noes 26.
So the amendment was rejected.
Mr. BORLAND. Mr. Chairman, I offer an amendment at that point:

Private property shall not be taken or damaged for public use, except upon just compensation, which shall be provided by law.

That is a new paragraph.
The CHAIRMAN. Will the gentleman send up his amendment?
Mr. BORLAND. I will withdraw it for a moment, Mr. Chairman.
The CHAIRMAN. Without objection, the amendment will be withdrawn.
There was no objection.
Mr. SANFORD. Mr. Chairman, I offer an amendment.
The CHAIRMAN. The gentleman from New York [Mr. SANFORD] offers an amendment, which the Clerk will report.
The Clerk read as follows:

Amendment offered by Mr. SANFORD: Strike out all after line 3, page 2, and ending with line 8, and insert:
"That in all criminal prosecutions the accused shall enjoy the right to have the assistance of counsel for his defense, to be informed of the nature and cause of the accusation, to have a copy thereof, to have a speedy and public trial, to be confronted with the witnesses against him, and to have compulsory process for obtaining witnesses in his favor."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York [Mr. SANFORD].
Mr. SANFORD. Mr. Chairman, I hope I may have the attention of the chairman of the committee. I would be pleased if he would accept the amendment I have offered.
Mr. JONES. If the gentleman will explain wherein his amendment differs in substance from the provision of the bill, I will be glad.
Mr. SANFORD. I will explain.
Mr. FESS. Mr. Chairman, will the gentleman yield there?
Mr. SANFORD. Yes.
Mr. FESS. I was wondering whether the gentleman's amendment was not the provision contained in the Federal Bill of Rights?
Mr. SANFORD. Yes. I was about to say that the language is an exact copy of section 6 of the Bill of Rights.
The chairman of the committee wants to know how it differs from the bill. I think I can make it clear to you if I remind you that since the Bill of Rights was written there have been I do not know how many volumes of opinions of judges of our courts written defining those words.
The words embodied in the bill are,

The accused shall have the right to meet the witnesses face to face.

What does it mean? Does it mean to meet the witnesses in a dark alley or in a dark cellar face to face? It seems to me absurd now to present that as a proper interpretation of the words of the committee, and yet some court somewhere might so hold.
Mr. DAVENPORT. Does not that semicolon relate back to the subject of trial, giving a fair trial?
Mr. SANFORD. What it means to meet the witnesses face to face I do not know, and yet I have practiced in the criminal courts as a prosecutor for six years. But under the law of this country and in the definitions that the courts have laid down you find the definitions of human liberty in criminal cases the like of which the world has never seen anywhere.
It is perhaps impossible for us to impose upon those people of Porto Rico our conception of what constitutes our rights and what we mean by individual liberty, but we are not doubtful as to what words do define our idea of individual liberty in this country.
Take another illustration. You say under your bill of rights that you are creating in this committee that a man shall be heard and shall have the benefit of counsel. What does it mean? We have splendid definitions of what it means:

To have the assistance of counsel for his defense—

But what does it mean?—

To be heard.

Perhaps the courts of Porto Rico will construe that to mean that he shall have the right to stand up and say "Present," or that his counsel shall say "Present" for him, that that is being "heard." What I want is that we may offer to these people the same guaranties of the right of defendants in criminal prosecutions that after over 100 years of experience in this country have had their meaning definitely fixed. If we love these things ourselves, and are proud of these combinations of words that mean so much to us, it is our duty at least to offer them in this bill of rights. I do not want to say that the words you have presented here are unscientific, but they certainly are not so precise as the words of our Bill of Rights.
Our courts have interpreted the language of our Constitution, every sentence of it, and I do not think we are called upon to write these strange combinations of words anew here to-day through this committee. If the committee have any reason for throwing aside the Bill of Rights with which we are familiar, if they can give us any reason for these strange combinations of words that they have here, I do not want to make any point of it.
The CHAIRMAN. The time of the gentleman has expired.
Mr. YOUNG of North Dakota. Mr. Chairman, I think the gentleman from New York [Mr. SANFORD] has called attention to a portion of this bill which is very much in need of amendment. As he stated, the Constitution of the United States has been construed and passed upon by the courts so often during the past century it would seem to be very unwise to adopt other words, even if the chairman of the committee may think they are just as good. It seems to me unwise to substitute other

words that have never yet been construed by any court. In addition to what the gentleman from New York has said in calling attention to the wording of this paragraph, I want to call attention particularly to the words in line 4:

He shall have the right to demand the nature and cause of the accusation against him.

Now, of what good is that to a defendant in court, simply to have the right to "demand" it? A man may "demand" anything in a court. He may "demand" his release. He may "demand" every conceivable thing, but the question is whether he has got a right to it.

Now, the words used in the Constitution of the United States are that he shall have the right—

to be informed of the nature and cause of the accusation.

Instead of that we substitute the word "demand," which, so far as I can see, gives him no right at all.

Mr. BORLAND. Will the gentleman yield?

Mr. YOUNG of North Dakota. Certainly.

Mr. BORLAND. I call attention to the fact that it says:

To have a copy thereof—

Meaning a copy of the accusation against him, the bill of indictment, or the information, as the case may be.

Mr. YOUNG of North Dakota. Then in that case I submit to the gentleman, Why change the wording? Why not leave it as we have it in the State constitutions and in the Constitution of the United States?

Mr. BORLAND. I do not know. I simply call the attention of the gentleman to the fact that the accused is entitled to a copy of the instrument to which he is called upon to plead.

Mr. SANFORD. This language says:

To demand the nature of the accusation against him.

Our Constitution says:

The nature and cause of the accusation.

Now, he may be indicted with half a dozen other men. I can conceive that there might be a great deal of difference between having the accusation against himself and having a copy of "the accusation." The difference of opinion here merely illustrates the opportunity for more litigation on such an uncertain subject.

Mr. YOUNG of North Dakota. It seems to me to illustrate the complications and difficulties that would arise if the change were made as proposed in this bill.

Mr. GREENE of Vermont. Will the gentleman yield?

Mr. YOUNG of North Dakota. I yield to the gentleman.

Mr. GREENE of Vermont. If this bill is undertaking to establish a greater degree of liberty for the people of Porto Rico, is it not evident from this discussion that before they can arrive at any practical realization of that liberty the words and terms by which it is conferred must be defined and test cases will arise?

Mr. YOUNG of North Dakota. I think the question may well be raised as to whether we are capable of self-government, if we adopt a crude, ill-constructed section like this. [Laughter.]

Mr. GREENE of Vermont. In the first place, the courts must define the terms in which this supposed liberty is granted.

Mr. YOUNG of North Dakota. Certainly.

Mr. GREENE of Vermont. Whereas the terms of our own Constitution are all construed and have a fixed and definite meaning.

Mr. YOUNG of North Dakota. Yes; certainly.

The CHAIRMAN. The time of the gentleman has expired.

Mr. TOWNER. Mr. Chairman, this language that is used in the bill of rights, as we call it, is the language that has been suggested by the Bureau of Insular Affairs, who have had intimate knowledge with regard to conditions in the island for a great many years. It is in substance the language that is used in the Constitution of the United States. I am frank to say that I see no objection whatever to accepting the substitute offered by the gentleman from New York [Mr. SANFORD]. In fact, I think there is one reason why it should be adopted, and I hope that the chairman of the committee [Mr. JONES] will agree with me and accept it, because it is only a question of form after all. That reason is this, that in the interpretation of this provision of the bill of rights in Porto Rico the courts there would have the assistance of the decisions of the courts of the United States upon the language which is used in the Constitution of the United States. Therefore, as it is only a question of phraseology, I see no real ground or reason why we should not accept the amendment offered, if it is considered to be vital.

Mr. JONES. Mr. Chairman, I fully agree with the gentleman from Iowa [Mr. TOWNER] that there is nothing vital, nothing of substance, involved in this amendment. It is substantially what the bill already contains, and the only thing that can be said in its favor is that it is the language of the Constitution of the United States. If the exact language of the bill is not to be found in the Constitution of the United States, it may be found in the constitution of some of the States of the Union. It is unquestionably substantially the language of the Constitution of the United States. I can not see, therefore, that the language which the gentleman would substitute for that of the bill would in any respect improve matters. I can not agree with the logic of the gentleman from New York [Mr. SANFORD] when he says that the expression that witnesses shall meet the accused face to face is indefinite inasmuch as it is not said where the meeting is to take place. The entire language of the paragraph must, of course, be taken together. Provision is made for a speedy and public trial, and it is at that public trial that the accused must be confronted with his accusers. Still, I agree with the gentleman from Iowa [Mr. TOWNER] that inasmuch as the amendment makes no real change in the language of the bill, it may as well be accepted if for no other reason than to save time.

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from New York [Mr. SANFORD].

The amendment was agreed to.

Mr. HASTINGS. Mr. Chairman, we are considering this afternoon a bill to give a civil government to Porto Rico and to give to the people of Porto Rico a larger measure of self-government, or, in other words, to give them a bill of rights. I thought it might not be inappropriate to call attention to the fact that we have a largely similar condition of people in the United States to whom a larger measure of local authority ought to be given. I refer to the Five Civilized Tribes.

Mr. Chairman, on December 6, 1915, the day Congress convened, I introduced as my first bill H. R. 108, to confer upon the Superintendent for the Five Civilized Tribes in Oklahoma the authority now conferred by law upon the Commissioner of Indian Affairs and the Secretary of the Interior respecting lands allotted to the enrolled restricted members of the Five Civilized Tribes and their individual moneys.

I want to make it clear at the outset that this bill only deals with the lands and moneys of individual restricted Indians and has nothing whatever to do with the tribal property of the Five Civilized Tribes.

In order that the purposes of the bill may be better understood, permit me to state that the eastern half of Oklahoma prior to statehood was known as the Indian Territory and was occupied by the Five Civilized Tribes—Cherokee, Creek, Seminole, Choctaw, and Chickasaw. In the early part of the last century these tribes moved under treaties made with the Government of the United States from the Southern States to the Indian Territory. Each tribe maintained a government of its own, separate and distinct from the other tribes, as much so as one State of the Union is separate and distinct from another State. Each tribe had its own executive head, its legislature, and its judiciary. They enacted their own laws without any supervision whatever from the Federal Government and they executed them. Their lawsuits were tried in their own tribal courts, presided over by judges elected by them and without any appeal to a Federal court.

The difficulty in presenting this question to Congress lies in the fact that but few Members of Congress not on the Indian Committee are acquainted with the situation. They do not distinguish between a member of the Five Civilized Tribes and a reservation Indian. To them the word Indian means a blanket Indian and not a progressive, Christian, civilized Indian citizen of the United States.

For the past 100 years these tribes have intermarried with white people who came among them. Schools and churches were established, and the members of the tribes were recognized as being on an equal plane of intelligence with citizens of the surrounding States. White people settled in their country, railroads were built, cities were established, and finally Congress, by the act of March 3, 1893 (27 Stats., 612), created the Dawes Commission and sent it to the Indian Territory to make treaties with the tribes, with a view of having their lands individualized, their tribal funds paid out per capita, and their territory admitted as a State of the Union.

Under various treaties and acts of Congress, provision was made for the allotment of their lands. The final enrollment showed 101,521 allottees, to whom 19,526,966 acres of land belonged. All the lands agreed to be allotted by the various treaties and acts of Congress have been individualized and patents issued therefor and delivered. The unallotted lands are known as tribal lands.

Let me repeat that this bill only affects the lands allotted and patented to the individual restricted Indian and the moneys deposited with the Government to the credit of the individual Indian. It does not affect any tribal lands or tribal money.

RESTRICTED INDIAN DEFINED—DEGREE OF BLOOD, NOT COMPETENCY, THE TEST.

Under various agreements and acts of Congress under which the lands were allotted, provisions were inserted restricting the sale of their lands for certain periods of time. Part of these restrictions were removed by the act of April 21, 1904 (33 Stats., 189), and by the terms of the acts of April 26, 1906 (34 Stats., 137), and May 27, 1908 (35 Stats., 312), all the homestead land of an enrolled member of one-half Indian blood was restricted from alienation and all the surplus land of an Indian enrolled as of three-fourths or more Indian blood. His business qualifications are determined by his degree of Indian blood, not by his competency. Lawyers admitted to practice in the Supreme Court of the United States, professional men of all classes, officials, members of the legislature, college graduates, and many of the best business men are restricted. (Hearings, pp. 55–56.)

No restricted member of the tribes can lease his land for oil or gas, nor can he make an agricultural lease upon his homestead for more than one year, without the approval of the Secretary of the Interior. In brief, a "restricted Indian" has become a very well-defined term in Oklahoma. It means an Indian, who, under the law, is not permitted to manage his own affairs. In other words, he can not lease, encumber, or sell his land, or handle his own individual money without the approval of the Secretary of the Interior 1,500 miles distant.

Of the 101,521 members of the Five Civilized Tribes, there were, in round numbers, about 75,000 of Indian blood, and of this number 37,182 were restricted. The records show that restrictions have been removed from about 8,000 of these Indians, and about one-third of the Indians remaining have died since their enrollment. Hence the number of Indians within the restricted class in eastern Oklahoma is estimated approximately to be 20,000. Formerly two officials in Oklahoma looked after the affairs of the tribes—one the Commissioner to the Five Civilized Tribes, who succeeded the Dawes Commission, and the other the United States Indian agent. One looked after the tribal property and the other after the individual property of the restricted members of the Five Civilized Tribes. Would any Member of Congress from California, Texas, or any other State want the guardianship of his child's property supervised from Washington?

By the act of August 1, 1914 (38 Stats., 582), Congress consolidated these offices, and the Superintendent for the Five Civilized Tribes was appointed. He was nominated by the President and confirmed by the Senate. Theretofore the officers had been appointed by the Secretary of the Interior. The combined office was considered of more importance, and it was expected greater power would be conferred upon him. The salary was fixed at $5,000 per annum, the same amount the Commissioner of Indian Affairs receives.

PURPOSES OF THE BILL.

This statement is preliminary to what I wish to say regarding the purposes of this bill.

At present a restricted Indian has no control whatsoever over his allotted land, or his share of the tribal moneys, without the supervision of a clerk in the office of the Commissioner of Indian Affairs or the Secretary of the Interior, fifteen hundred miles away. He can not, as above stated, make an agricultural lease or an oil lease upon his land. He can not sell any part of his restricted land, nor can he pay a dollar upon an honest debt which he owes without the approval of the Secretary of the Interior or a clerk or inferior officer under him. It is the purpose of this bill to confer this authority upon the Superintendent for the Five Civilized Tribes at Muskogee, Okla.

SUPERVISION TRANSFERRED.

You will note that the bill does not take away any supervision whatever, but it transfers supervision from Washington to Muskogee. To illustrate: If a restricted Indian wants to make an agricultural lease upon his land, he goes before the local field clerk in Oklahoma, who is under the civil service. (Hearings, p. 59.) He examines the Indian and the lease, and transmits the lease to the Superintendent for the Five Civilized Tribes, who has it sent through the files in the proper division; thence it goes to the Commissioner of Indian Affairs, where it is referred to some clerk; and thence it is sent to the Secretary of the Interior, where it is referred to another clerk and final action is had upon it. It is returned the same way, and the Indian and the tenant are finally notified of the result two or three months thereafter.

Our contention is:

First. That final authority should be given to the Superintendent at Muskogee to approve these agricultural leases, as he understands local conditions.

Second. If a restricted Indian wants to make an oil lease, regular blank forms have been prepared, with rules and regulations understood by everybody, and the Superintendent at Muskogee has local men at convenient points throughout eastern Oklahoma who can supply detailed information. He is more competent, with all this information, to approve these leases than anyone else, and can be as safely trusted to supervise and approve them as any man at the head of a bureau in the office of the Commissioner of Indian Affairs or the clerk in the office of the Secretary of the Interior. The truth is that the Commissioner of Indian Affairs does not personally superintend these matters, nor does the Secretary of the Interior, but some clerk, paid $1,800 or $2,000 per annum 1,500 miles away, supervises the action of the Superintendent for the Five Civilized Tribes, a man upon the ground, appointed by the President and confirmed by the Senate, who is paid a salary of $5,000 per annum.

Third. If a claim is presented against an Indian who is within the restricted class, unless authority is first obtained, it has to go through the same routine that an agricultural lease or an oil lease does. This method results in tedious delays, which the bill introduced by me is intended to correct.

Fourth. If a restricted Indian wants to make application to remove the restrictions upon the sale of his land, it goes through the same channel—through the local field clerk, thence the Superintendent for the Five Civilized Tribes, thence through the bureau under the Commissioner of Indian Affairs, and finally over the desk of some clerk in the Department of the Interior. The Indian may be old and decrepit or sick, or there may be other reasons for urgent action being taken upon his application. Our contention is that all matters affecting the individual Indian—his allotted land and individual money—should be supervised by an honest, trustworthy, competent official, the Superintendent for the Five Civilized Tribes, at Muskogee, Okla. He has a large number of law clerks, stenographers, appraisers, oil inspectors, field clerks, and other clerical help to investigate thoroughly every matter at first hand which may be submitted to him for supervision and approval.

THE QUESTION INVOLVED.

There is but one question involved in this bill, and that is whether Congress favors conferring authority upon a competent, trustworthy Federal official in the State of Oklahoma to supervise the land and money of each individual Indian, or whether that can best be done by a clerk or minor official in the office of the Commissioner of Indian Affairs or the Secretary of the Interior, 1,500 miles away, who knows nothing whatever about the Indian personally or local conditions in Oklahoma, but who acts on no other information than that contained in the typewritten report transmitted.

For more than 100 years the individual members of the Five Civilized Tribes were free to do as they pleased with their individual property. They bought and sold it. They contracted debts and paid them without any supervision whatsoever. By the act of March 3, 1901 (31 Stat., 1447), they were made citizens of the United States. There was no supervision whatever exercised by any officer of the United States until their lands were allotted some 15 years ago.

The present Indian appropriation bill carries an appropriation of $185,000.

We claim that all these matters can be safely trusted to the local man, and that the interests of the individual Indian will be scrupulously guarded, action upon the various transactions expedited, and their rights better protected if this bill becomes a law. There can be no legitimate argument against it.

EVERY DEPARTMENT JEALOUS OF JURISDICTION.

It is the history of every department in Washington that none ever wants to give up any jurisdiction. They all want it centered in Washington. They want to retain all supervision here. No bureau wants to give up any of its authority. Every official at the head of a department clings with great tenacity to all the authority given him.

A representative of the Indian Office appeared before the committee, and, in our judgment, presented an argument wholly foreign to the issues involved in this bill. Among other things:

First. He referred to the necessity for supervision of probate matters in Oklahoma, and invited attention to some cases tried there a few years ago, just after statehood. This has nothing to do with the merits of the bill, because the present Indian appropriation bill carries $85,000 for probate attorneys in Oklahoma. The bill under discussion does not take away any of that supervision, and we respectfully submit that the introduction of these matters is only intended to encumber the record and confuse the issue. Let us not dodge the issue by attempting to distract attention.

Second. He advocated a change of the law providing for more supervision in the approval of agricultural leases. This is wholly foreign to a discussion of this bill. The bill retains all the supervision with reference to the approval of agricultural

leases now provided by law. The only thing this bill seeks to do is to transfer this supervision to a local man in Oklahoma. The issue should not be confused. It should be met squarely. Is it better for this supervision to be made by a competent, trustworthy man in Oklahoma than to transmit all matters by mail 1,500 miles to a clerk at the head of some bureau? This is the point.

Third. It is recommended that the law with reference to the approval of wills be changed. This is also foreign to the subject, as the bill does not seek to change the law in this respect.

Fourth. It is charged that the Superintendent for the Five Civilized Tribes is a political office. It was created by the act of August 1, 1914. The present incumbent, Gabe E. Parker, was nominated by the President and confirmed by the Senate. The hearings (p. 63) show that he was not recommended by any of the members of the Oklahoma delegation and by no person in Oklahoma, that he was the personal selection of the Commissioner of Indian Affairs, and that he was selected solely upon merit. Hence, I submit that such an argument is wholly unjustified.

Mr. Parker is an educated, competent, high-class man. There has not been so much as a breath of suspicion against him, and no insinuation that he is incompetent. He was formerly at the head of one of the schools of Oklahoma. He is a member of the Choctaw Tribe of Indians and thoroughly familiar with conditions in Oklahoma. He is in deep sympathy with the Indians of that State. He was a member of the constitutional convention of Oklahoma and later appointed by the President and confirmed by the Senate as Register of the Treasury. He was finally selected for his present responsible position upon the recommendation of the present Commissioner of Indian Affairs.

These facts are not known to many associations, newspapers, and philanthropic citizens of the United States who have the interest of the Indian at heart. They are led to believe that this bill turns over the supervision of the affairs of the Indians to a local official elected by the citizens of Oklahoma and who would, therefore, be influenced by the people who elect him. This is not true, as the Superintendent for the Five Civilized Tribes is a Federal official. The Commissioner of Indian Affairs, the Assistant Commissioner of Indian Affairs, and the Secretary of the Interior are nominated by the President and confirmed by the Senate. They are Federal officials, as is the Superintendent for the Five Civilized Tribes.

These hearings show (pages 59 and 161) that neither the Secretary of the Interior nor the Commissioner of Indian Affairs passes upon any of the matters affected by this bill. On the other hand, the hearings show that when they come through the mail they are referred to some clerk of a bureau paid $1,800 or $2,000 per annum, who, in effect, sits in judgment upon the acts of the Superintendent for the Five Civilized Tribes. Let us not confuse the issue. What this bill seeks to do is to have final supervision lodged in the Superintendent for the Five Civilized Tribes.

Fifth. The Kagama case (118 U. S., 375) is quoted from. This was a case certified up from the circuit court of appeals in 1886 and is a criminal case involving the constitutional question as to whether or not Congress can confer jurisdiction upon a Federal court in criminal matters over a crime committed by one Indian upon another in a reservation within a State. In it the court took occasion to remark that oftentimes there was prejudice against the Indian in the State in which a reservation was located. This is not a happy argument against the pending bill for many reasons.

The Indians in the Kagama case were reservation Indians. Their lands had not been allotted and they were not citizens of the United States. They had never been made citizens of the United States, as in the case of members of the Five Civilized Tribes, who were made citizens by the act of March 3, 1901. The Five Civilized Tribes have had governments of their own for the past 100 years, and they take part in the local affairs of Oklahoma as actively as white men. The truth is the history of that State for the past few years completely refutes the charge that there is any race prejudice. More than 2,000,000 people are now living in Oklahoma; over one-half dwell in the eastern part, which was formerly occupied by the Five Civilized Tribes. There were enrolled, of all classes, 101,521 members, one-third of whom are now dead. Hence it will be seen that more than 100 white persons live in eastern Oklahoma to each member of the Five Civilized Tribes. Notwithstanding this, a large number of enrolled Indians were elected as delegates to the constitutional convention which framed the organic law of the State. Riley Copeland, A. S. Wyly, J. T. Edmondson, C. O. Frye, O. H. P. Brewer were all Cherokees; W. N. Littlejohn was an enrolled intermarried citizen of the Cherokee Nation; Gabe E. Parker was a Choctaw; and Henry Cloud was a Cherokee. Many others, whom I do not now recall, were elected members of the constitutional convention. The president of that convention was Congressman MURRAY, an intermarried Chickasaw citizen. Will anyone say the above showing indicates prejudice on the part of the people of Oklahoma against the enrolled members of the Five Civilized Tribes.

Let us investigate a little further. Hon. R. L. OWEN was elected one of our first Senators, and Hon. C. D. CARTER, a member of the Indian Committee, was elected a Member of Congress. Both are enrolled citizens. Hon. J. S. DAVENPORT is an intermarried Cherokee citizen and a Member of Congress. Hon. W. H. MURRAY is a Member of Congress and a member of the Indian Committee. The author of this bill is an enrolled Cherokee citizen. Certainly the reasoning by the court in the Kagama case would not apply to Oklahoma.

I might add in this connection that a very large number of the county officers in Oklahoma and members of the State legislature are members of the Five Civilized Tribes. Many of these are restricted Indians. Everyone in Oklahoma knows that there is no prejudice against a member of these tribes. His race is not inquired into. All officers are nominated at a primary and are elected at a general election. Hence we insist that the reference to the Kagama case is not a happy one.

Sixth. It is argued that local pressure may be brought to bear upon the Superintendent, and, of course, it carries with it the insinuation that he may be weak enough to yield to it. This argument is puerile. It is an argument against local self-government everywhere. If this argument be sound, no citizen of Oklahoma should be appointed to the Government service within the State, because he might yield to local influences. This would apply to all tribal and probate attorneys. I am impatient with this suggestion. It is based on distrust and not confidence in officials of the Government. It assumes weakness and not strength of character. It is not justified by the record of the present Superintendent or any of his predecessors. We decided against "long-distance government" in 1776. Every Territory in the United States was persistent in urging admission to statehood in order to bring the Government as near the people as possible.

The hearings (page 15) show that 7,650 letters were forwarded to the Department of the Interior last year by the Superintendent for the Five Civilized Tribes and that 7,694 letters were received by him from the department. Excluding Sundays, the Superintendent signed and forwarded more than 25 letters and reports each day to the department and received as many from Washington.

Our contention is that the making of reports and the reading of letters to and from the department take up practically all of his time and leave but little time in which he can give attention to the important duties of his office. If the bill is enacted into law, all this would be corrected.

In addition, 116,570—page 15—miscellaneous letters were received in the office of the Superintendent for the Five Civilized Tribes and 144,402 miscellaneous letters sent out. If matters brought to his attention could be acted upon in Muskogee expeditiously and not sent to Washington, untold thousands of these letters would never be written. A great deal of the stenographic and clerical help could be dispensed with and the salaries paid them could be used in paying expert farmers, placed in convenient localities among the restricted members of the tribe, who could give them personal attention, aid, and encourage them in improving their homes and farms, and be of much more substantial benefit to the real Indian. At present, so far as I am advised, there is not an expert farmer doing exclusive farm work. It is true that some employees are carried upon the pay roll as expert farmers, but practically all of them are doing administrative work. Very few, if any, are doing expert farm work exclusively. The hope of the Indian needing assistance lies in teaching him farming and stock raising. Instead of doing this, the Government is expending $185,000 annually for clearical help, mostly in a forwarding office at Muskogee, and is not spending money on men to go among the Indians and render them encouraging assistance in their daily tasks.

SAVING TO THE GOVERNMENT.

Our contention is, further, that there would be a great saving of clerical help in the office of Commissioner of Indian Affairs and the Secretary of the Interior if these matters were not forwarded here. (Hearings, p. 156.)

Instead of spending money for the pay of officials, including stenographic and clerical help, we submit that it could be more advantageously spent upon men in the field to look after the Indians themselves.

COMMISSIONER OF INDIAN AFFAIRS SHOULD LOOK AFTER TRIBAL AFFAIRS AND NOT DETAILS OF INDIVIDUAL INDIANS.

The Commissioner of Indian Affairs should look after the broader questions affecting Indians, should shape the policy of the Government as to them, and should be glad to be rid of the numerous little details incident to this work. No business man at the head of a great institution attempts to give attention to minor details. That responsibility is given to others. Congress intended to confer larger authority upon the Superintendent of the Five Civilized Tribes by the act of August 1, 1914, just as this bill does.

The members of the Five Civilized Tribes want their tribal affairs wound up. The Choctaws and Chickasaws want their coal and asphalt lands sold, as well as the remainder of their unallotted lands, including surface and timber lands, and the proceeds divided among them. No representative of the department has asked to appear in person before the Indian Committee to urge action upon these matters. The members of the other tribes are equally anxious to have their affairs wound up as expeditiously as possible.

The Dawes Commission was created by the act of March 3, 1893, 23 years ago. More than one-third of the enrolled members of the tribes are dead, and yet the affairs of some of the tribes, particularly Choctaws and Chickasaws, will not be wound up for years.

We insist that the time of the Commissioner of Indian Affairs should be devoted to the larger tribal questions, so that their settlement may be expedited rather than to the affairs of the individual Indian.

It was conceded by the representative of the Indian Office before the committee (hearings, p. 160): (a) That the approval of all agricultural leases might be safely left to the Superintendent for the Five Civilized Tribes; (b) that perhaps 95 per cent of the oil leases were uncontested (hearings, p. 160) and that these uncontested matters might be safely left to the Superintendent at Muskogee (hearings, p. 153); (c) that he might safely be clothed with authority to finally supervise the investment of money of restricted Indians when the amount did not exceed $2,500 (hearings, p. 160). We insist that this would cover 95 per cent of all investments, would correct 95 per cent of the delays, and practically concedes our contention.

If the Superintendent could be safely trusted with this authority, we see no reason why he should not be allowed to supervise and approve the sale of 10 acres of restricted land, or any amount of less value than $2,500.

EVERY INDIAN IN OKLAHOMA FAVORS THIS BILL.

Every Indian in Oklahoma favors this bill. At least, not one has lodged a protest against it. These hearings indicate that the Five Civilized Tribes have had schools of their own—common schools, high schools, and boarding schools—for 100 years. Many of their members are graduates of the various colleges and institutions of learning in the United States. Many other members are leading lawyers, doctors, farmers, bankers, and business men of every kind. This bill was introduced on the first day Congress convened, December 6, 1915, and has been extensively commented on in the press throughout Oklahoma, and yet no protest has been filed on behalf of a single Indian.

ALL OTHER CITIZENS APPROVE IT.

Every white man who is a citizen of Oklahoma and who is not in the employ of the Indian Office, so far as the hearings show, favors the passage of this bill.

THE PRESS UNANIMOUSLY INDORSES IT.

The hearings (pp. 175–184) show that this bill has been favorably commented upon and analyzed by a large number of newspapers throughout Oklahoma. A number of the clippings have been filed with these hearings. It has not been unfavorably criticized by any newspaper.

OKLAHOMA DELEGATION FAVORS BILL.

Practically all the members of the Oklahoma delegation favor the bill. Senator OWEN has introduced a similar bill in the Senate.

The State Senate of Oklahoma unanimously passed a resolution favoring the bill. The resolution was introduced by a restricted Cherokee Indian—George W. Fields.

PRESENT SYSTEM OCCASIONS DELAYS.

It can not be controverted but what the sending of all these matters through, first, the local field clerk; second, the Superintendent for the Five Civilized Tribes; third, the Commissioner of Indian Affairs; and, fourth, the Secretary of the Interior—shown by the hearings (p. 60) to pass through eight different hands—must occasion delays and criticism against the department and militates against the Indian; and the system has unquestionably aroused more prejudice against the Indian and occasioned more insistent demands for the repeal of all legislation for the supervising of the affairs of individual Indians than anything else. Unless changed it will ultimately destroy the Indian.

LOCAL SYMPATHY AND COOPERATION NECESSARY TO PROTECT INDIAN.

The interests of the restricted Indian can best be subserved by inviting the cooperation of the local officers and the citizens of Oklahoma and not by wholesale criticism of them. A representative of the department can not have any influence with a court or jury, and can not, therefore, protect the restricted Indian unless he invites their cooperation and assistance.

As in all new States, when Oklahoma was first organized some injustices were done the Indian, but when public attention was called to them a splendid citizenship was aroused and the unworthy officials were driven from their places of trust. Juries unhesitatingly convicted those who sought to despoil the Indian.

The report of the Secretary of the Interior shows that the Supreme Court of Oklahoma has promulgated rules for the guidance of the probate courts of the State and that all the courts through the State are now working in harmony with the probate attorneys there.

The Secretary of the Interior, on page 63 of his last annual report, says:

> The State authorities have shown a disposition to cooperate in every way possible with the department, and the Supreme Court of the State of Oklahoma has provided uniform rules of procedure in probate matters, at the suggestion of the Commissioner of Indian Affairs, after his conference with county judges, county attorneys, and tribal attorneys in January, 1914.

It served no good purpose, however, for the representative of the Indian Office to refer to this matter before the Indian Committee for two reasons: First, because the things criticized happened while the department had supervision, and, second, the bill under discussion does not do away with the probate attorneys.

The department has seen fit to file certain letters and circulars from people throughout the East, who are not acquainted with local conditions in Oklahoma, but who get their information solely through the department. Inasmuch as the same references and arguments are used in all of them, we may reasonably infer how they originated.

These good people really believe that they are serving the Indian. They see no difference between an Indian in Oklahoma and an Indian on a reservation. Every Indian to them is a blanket Indian. They do not know that the members of the Five Civilized Tribes had a constitution and a regular form of government for more than 100 years. The reservation Indians do not have. The members of the Five Civilized Tribes have been citizens of the United States since March 3, 1901, and take an active part in the local affairs of Oklahoma. Our eastern friends do not know that many of them are lawyers, doctors, teachers, ministers, bankers, and industrious citizens, competing in every activity with their white neighbors. Our eastern friends insist on one policy for all Indians, and they argue that the policy adapted to reservation Indians should be applied to people who have governed themselves for a century.

Surely a tribe of Indians that gave to the country the great Sequoyah, the inventor of the Cherokee alphabet, the Cadmus of his race, whose statue is soon to be placed in Statuary Hall as one of Oklahoma's distinguished sons; a tribe whose rolls contain the name of Alex Posey, the Creek bard and philosopher; a tribe that produced Green McCurtain, the chief executive of the Choctaws for years; the tribe that produced such distinguished men as Overton Love and George W. Harkins, who so ably and effectively represented the Chickasaws; and the tribe that gave to the country Osceola, the noted Seminole warrior, is not to be compared with the unlettered tribes of reservation Indians of the West.

CONCLUSION.

Finally, permit us to say that this bill affects Oklahoma only, and we desire to repeat that every Indian there, as well as every white man, the two United States Senators, every Member of Congress representing Oklahoma, every newspaper in Oklahoma, and the State Senate of Oklahoma, after the fullest discussion and closest analysis of this bill, all favor its enactment. Can it be that they are all in error? Certainly, if this were not a meritorious bill, after all the discussions which the hearings show have been had upon it in the press throughout Oklahoma, some person, Indian or white, residing in that State would be found to protest against it. We submit that this bill should be promptly enacted into law. Sending all matters to Washington for approval delays the development of the Indian's property. Preparation can not be made to begin work on an agricultural lease until it is approved and returned, and contracts can not

be let to drill oil leases until the action of the authorities at Washington is known. In order to expedite consideration of matters transmitted here for approval a large number of lessees come to the department, either in person or by attorney, and all these delays and expenses could be avoided if final action were had at Muskogee.

The insinuations and criticisms expressed and implied by the representative of the Indian Office in the hearings before the committee against the people of Oklahoma can not be but detrimental to the restricted members of the Five Civilized Tribes. They are residents and citizens of that State, vote and hold office there, attend the public schools, and receive the protection of the State's laws. Under existing legislation, within a few years all of their restrictions will be removed, when they will need the sympathetic cooperation and not the antagonism of the splendid citizenship of which they are a part and among whom they dwell.

I am a member of the Cherokee Tribe. I was reared among the Cherokees and spent my whole life there, attended their public schools, taught in them; was for 4 years attorney general of the tribe, for about 20 years practiced law in the Cherokee tribal courts, and represented them frequently as delegate to Washington, D. C., since 1892. As one of their attorneys I represented the Cherokee Nation before the Commission to the Five Civilized Tribes in making the final roll of citizens of the tribe from 1896 until they were closed March 4, 1907, and I was national attorney for the tribe under contracts approved by the President from January, 1906, to June 30, 1914, assisting in the trial of all important lawsuits before all the courts of the country, including the Supreme Court of the United States. The affairs of the Cherokee Tribe have been completely wound up.

I have made this personal reference to indicate the opportunities I have had to study these people, as well as my great indebtedness to them, my deep affection for them, and my earnest desire to secure the enactment of such legislation as will develop the individual Indian through giving him greater responsibility into a useful productive citizen.

THE ISSUE.

I am determined that the issue presented by this bill shall not be confused. It is this: Does Congress favor the supervision of individual affairs of the restricted members of the Five Civilized Tribes by a competent, trustworthy, and efficient Federal official in Oklahoma, known as the Superintendent of the Five Civilized Tribes, nominated by the President and confirmed by the Senate, with a salary of $5,000 per annum, or does Congress favor supervision by a clerk or inferior official in the office of the Commissioner of Indian Affairs or Secretary of the Interior, located in Washington?

Mr. JONES. Mr. Chairman, I would like to ask if all debate has not been exhausted on this amendment.

The CHAIRMAN. It has.

Mr. MURRAY. Mr. Chairman, I want to offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 3, line 3, before the beginning of the line insert "That no private property shall be taken or damaged for private use, with or without compensation, unless by consent of the owner, except for private ways of necessity, or for drains and ditches across lands of others for agricultural, mining, or sanitary purposes, in such manner as may be prescribed by law."

Mr. MURRAY. Mr. Chairman, the first part of that provision is in the bill of rights. My purpose for introducing it was to create an exception for agricultural and mining purposes. There are two States that have this provision; Missouri was the first to adopt it. I do it because many times drainage districts are organized in many States where you can not prove any public benefit and if you can not prove a public benefit the district fails. You find it also in the development of mining. There are only two States in the Union where you can take private property for private use without consent of the owner—Missouri and Oklahoma—unless they have changed these provisions since 1906. This was introduced in the interest of progress. They have many difficulties in the State of Iowa and other States where they have drainage laws and where they can not prove "public benefit."

Mr. SANFORD. Will the gentleman yield?

Mr. MURRAY. Yes.

Mr. SANFORD. Does the gentleman know that this provision in the bill of rights was held in New York and some other States to prevent the passage of a workmen's compensation act?

Mr. MURRAY. I do not know it.

Mr. SANFORD. It was so held, and several workmen's compensation acts were defeated by this section in the bill of rights, and so we have amended the constitution of New York by another provision permitting the passage of workmen-liability acts.

Mr. MURRAY. The provision that I offer is that in the bill.

Mr. SANFORD. But I call attention to the fact that under the laws of New York, which might also be held under the laws of Porto Rico, it made unconstitutional the compensation act.

Mr. MURRAY. But the constitution of New York does not contain the exception. I introduced it so as to create the exception.

Mr. SANFORD. My conclusion is that if this provision goes in that there should be a further exception permitting the enactment of proper compensation law. I have such a provision taken from the New York constitution, if the gentleman wants it.

Mr. MURRAY. I say in such a way "as the law may provide."

Mr. MONDELL. Will the gentleman yield?

Mr. MURRAY. Yes.

Mr. MONDELL. Does the gentleman say that only two States in the Union have laws which will permit private property to be taken for private use?

Mr. MURRAY. I stated that all the States in the Union prohibited, or did up to 1906, the taking of private property for private use without the consent of the owner except two, and these allowed an exception for agriculture and mining.

Mr. MONDELL. The gentleman has overlooked or forgotten all of the irrigation States. In irrigation there is a taking of private property for private use.

Mr. MURRAY. But you have to prove that it is for the public benefit, and that is eliminated in my amendment.

Mr. MONDELL. We proceed on the theory that irrigation is a public benefit.

Mr. MURRAY. But if it was disputed in the courts you would have to prove it.

Mr. MONDELL. It is never questioned.

Mr. MURRAY. In most places they do question it.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma [Mr. MURRAY].

The question was taken, and the amendment was rejected.

Mr. BORLAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment by Mr. BORLAND: Page 3, at the end of line 2, insert: "Private property shall not be taken or damaged for public use except on payment of just compensation ascertained in the manner provided by law."

Mr. BORLAND. Mr. Chairman, I think that covers the main point of the gentleman from Oklahoma. I do not think the provision in the first paragraph of section 2, which prohibits the taking of life, liberty, and property without due process of law, is coextensive with this amendment. Due process of law means the summons by which a man is brought into court, by which he obtains his day in court. Due process of law is some method of summoning him to appear in the action. It has nothing to do with compensation for private property taken for public purposes. So the amendment is necessary also in addition to the provision occurring in the first sentence of this section.

Now, this amendment I have offered is substantially in the words of the Missouri provision of the constitution, which says that private property shall not be taken or damaged for public use without due process of law.

Mr. TOWNER. Mr. Chairman, as far as I am concerned, and I think as far as the chairman of the committee is concerned, there is no objection to it.

Mr. BORLAND. Mr. Chairman, I do not care to discuss it further, except to say that the decisions in some States have been that "damage" is not the same as "taken." Property may be damaged by the overflowing of a stream or may be damaged by having something cast upon it, as an embankment, and not a natural damage, so I think that if property is damaged for public use it should be compensated for.

Mr. FESS. Will the gentleman yield?

Mr. BORLAND. I will.

Mr. FESS. I notice the Federal Constitution says, "Nor shall private property be taken for public use without just compensation," and I do not know why we omitted that in this bill of rights, so the gentleman's amendment will apply——

Mr. BORLAND. My amendment applies, and if there is any objection on the part of the committee——

Mr. JONES. I do not know of any objection.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. BENNET. Mr. Chairman, I offer the following amendment, and this amendment is to come in after the amendment just adopted.

The Clerk read as follows:

Page 3, at the end of the Borland amendment, insert:

"Nothing contained in this act shall be construed to limit the power of the legislature to enact laws for the protection of the lives, health, or safety of employees; or for the payment, either by employers, or by employers and employees or otherwise, either directly or through a State or other system of insurance or otherwise, of compensation for injuries to employees or for death of employees resulting from such injuries without regard to fault as a cause thereof, except where the injury is occasioned by the willful intention of the injured employee to bring about the injury or death of himself or of another, or where the injury results solely from the intoxication of the injured employee while on duty; or for the adjustment, determination, and settlement, with or without trial by jury, of issues which may arise under such legislation; or to provide that the right of such compensation and the remedy therefor shall be exclusive of all other rights and remedies for injuries to employees or for death resulting from such injuries; or to provide that the amount of such compensation for death shall not exceed a fixed or determinable sum: *Provided*, That all moneys paid by an employer to his employees or their legal representatives, by reason of the enactment of any of the laws herein authorized, shall be held to be a proper charge in the cost of operating the business of the employer."

Mr. BENNET. Mr. Chairman, that language may seem a trifle long, but it has been taken verbatim from the constitution of the State of New York as amended in 1915, and the reasons for that amendment were these: At the legislative session of 1911, I think it was, we passed a workman's compensation act by a unanimous vote of both branches of the legislature. It was construed by the courts, and our highest court, by unanimous vote, declared the law unconstitutional because it violated the constitutional provisions which we have in our Constitution against the taking of private property for public use without just compensation, so that the two successive legislatures of 1912 and 1913 passed this provision and the people ratified it at the polls by about 30,000 majority, and we now have a splendid workman's compensation act, under which we are settling, out of court, something like 30,000 cases a year, to the great benefit of everybody.

Mr. FESS. Will the gentleman yield?

Mr. BENNET. I will.

Mr. FESS. Do I understand this is part of the constitution or is it a legislative enactment?

Mr. BENNET. It is part of the constitution, that which was put in the constitution of the State of New York in order to make the law we knew we could pass constitutional, and as soon as we got this into the constitution we passed a statute, and that statute has been declared constitutional and is one of the most beneficial statutes we have on the statute books. My idea is that we ought to give Porto Rico in this bill of rights every right that any State has, and we ought not to subject it to chance if it happens to pass a workman's compensation act—and my judgment is that every State ought to have a workman's compensation act—we ought not to give any chance of having such an act declared unconstitutional.

Mr. FESS. I think so far as those on this side regard such a provision there would be no objection unless this is writing legislation by an act——

Mr. BENNET. No, sir; it does not write anything legislative; the provision is entirely constitutional.

Mr. FESS. I think the gentleman would realize that the tendency of the time is to put legislation in organic acts.

Mr. BENNET. Yes, sir.

Mr. FESS. And I think they are unwise.

Mr. BENNET. We have resisted that in the State of New York wonderfully up to date.

Mr. BORLAND. Will the gentleman yield?

Mr. BENNET. I will.

Mr. BORLAND. Do I understand that your workman's compensation law, enacted since the adoption of this constitutional amendment, has been sustained?

Mr. BENNET. It has been declared constitutional.

Mr. BORLAND. It was enacted under this particular constitutional amendment?

Mr. BENNET. Yes.

Mr. BORLAND. And it has passed the highest court of the gentleman's State?

Mr. BENNET. It has passed the highest court of our State and has been held constitutional.

Mr. SANFORD. And the United States Supreme Court recently declared it constitutional.

Mr. BENNET. And the United States Supreme Court also, and therefore it seems to me in enacting this new charter for Porto Rico we ought to give them the benefit of something that has been tried and approved not only by the highest court of the State of New York, but, as my colleague [Mr. SANFORD], than whom there is no better lawyer in that State, informs me, has been held constitutional by the Supreme Court of the United States.

Mr. MURRAY. Do I understand that is the verbatim language of the constitution of New York?

Mr. BENNET. Verbatim.

The CHAIRMAN. The time of the gentleman has expired.

Mr. JONES. Mr. Chairman, I confess, for one, that this amendment is so long and seeks to accomplish so many different objects that I am unable to fully grasp its meaning and purpose. For this reason, if for no other, I feel constrained to oppose its adoption. Nothing should be put into a bill of rights that has not been very carefully considered, and certainly there is no opportunity now to consider carefully all that is involved in an amendment of this character and importance.

I much deprecate the habit gentlemen seem to have fallen into of endeavoring to have incorporated into the bill of rights of Porto Rico the various new and novel provisions of the constitutions of their own States. Doubtless they may serve a good purpose in their States, but if we undertake to put into this bill of rights all the progressive and modern ideas that are to be found in the constitutions of the various States of our Union a hundred pages will not suffice to contain the Porto Rican bill of rights.

If this amendment was confined to these words—

Nothing contained in this act shall be construed to limit the power of the legislature to enact laws for the protection of the lives, health, or safety of employees—

I would see no objection to it; but I can not agree to accept all that follows these words simply because, as the gentleman says, it has been adopted by the State of New York. I imagine that the gentleman did not approve the action of the voters of his State when they recently rejected a constitution submitted to them for their ratification by a convention presided over by that distinguished New Yorker, the Hon. Elihu Root. Why, then, should he think that the fact that the amendment he offers was ratified by the people of New York is an all-sufficient reason for inserting it in the Porto Rican bill of rights? This argument does not appeal very strongly to me.

I think, Mr. Chairman, that some better argument should be offered for the adoption of this amendment than that there is a similar provision in the constitution of New York. I am not willing to impose upon the people of Porto Rico a constitutional provision the terms of which I have not had the opportunity to examine and carefully study. I hope the amendment will be voted down.

The CHAIRMAN. The question is on the amendment of the gentleman from New York [Mr. BENNET].

Mr. KITCHIN. Why could not the gentleman from New York [Mr. BENNET] and the gentleman from Virginia [Mr. JONES] get together on this?

Mr. BENNET. I am willing to accept his modification, and I thought if I could get unanimous consent I would modify my amendment in the manner suggested by the gentleman from Virginia.

Mr. JONES. So that it will be in this language. I will mark it and send it down to the Clerk's desk.

The CHAIRMAN. The gentleman from New York asks unanimous consent to modify his amendment. The Clerk will report the modified form.

The Clerk read as follows:

Nothing contained in this act shall be construed to limit the power of the legislature to enact laws for the protection of the lives, health, or safety of employees.

Mr. CANNON. One further word. Read the balance of his proposed amendment.

The CHAIRMAN. The Clerk will report the entire amendment as amended.

Mr. CANNON. I want to hear that which is to be dropped out and see what that says.

The CHAIRMAN. The gentleman from Illinois [Mr. CANNON] asks unanimous consent that the amendment as originally offered be again reported.

Mr. CANNON. That part of it that is proposed to be eliminated. I want to see how it qualifies the other, if at all.

The CHAIRMAN. Without objection, the Clerk will again report it.

The Clerk read as follows:

Nothing contained in this act shall be construed to limit the power of the legislature to enact laws for the protection of the lives, health, or safety of employees; or for the payment, either by employers or by employers and employees or otherwise, either directly or through a State or other system of insurance or otherwise, of compensation for injuries to employees or for death of employees resulting from such injuries without regard to fault as a cause thereof, except where the injury is occasioned by the willful intention of the injured employee to bring about the injury or death of himself or of another, or where the injury results solely from the intoxication of the injured employee while on duty; or for the adjustment, determination, and settlement, with or without trial by jury, of issues which may arise under such legislation; or to provide that the right of such compensation and the remedy therefor shall be exclusive of all other rights and remedies for injuries to employees or for death resulting from such injuries; or to provide that the amount of such compensation for death shall not

exceed a fixed or determinable sum: *Provided*, That all moneys paid by an employer to his employees or their legal representatives, by reason of the enactment of any of the laws herein authorized, shall be held to be a proper charge in the cost of operating the business of the employer.

Mr. CANNON. Mr. Chairman, I suggest to the gentleman that he chops out very important exceptions.

Mr. BENNET. I realize that, but the gentleman has been here a good deal longer than I have, and knows sometimes that if we can get only a little bit we had better take it.

Mr. CANNON. That is a good deal of a bit. It is two bits, or eight bits, for that matter. There is a question of contributory negligence, and a question of where the injury results from intoxication. That is all cut out.

Mr. BENNET. But it is cut out in connection with the giving of the remedy.

Mr. CANNON. You could under that, I take it, empower the legislature to enact a law providing that, where a man is injured, being an employee, without regard to any condition connected with the injury, the employer could be taxed by virtue of that legislation.

Mr. BENNET. I realize that. I realize it is giving a pretty broad power.

Mr. CANNON. It seems to me, if I may be allowed to suggest, as this bill will not be completed to-day—as is perfectly evident—that by unanimous consent this amendment could go over for further consideration, so that it may be returned to later on if desired by the mover thereof or the chairman of the committee—either one, or both.

The CHAIRMAN. The gentleman from Illinois [Mr. CANNON] asks unanimous consent——

Mr. JONES. Mr. Chairman, I am in favor of that, if the gentleman offering it desires it to go over.

Mr. CANNON. He says he will not object to it if you desire it to go over, with leave to return to it later.

The CHAIRMAN. Does the gentleman ask that under unanimous consent?

Mr. BENNET. I think that is only fair. I am inclined to say this, that if we put it over, the whole thing may go in.

Mr. CANNON. I think possibly it ought to do so.

The CHAIRMAN. The gentleman from New York [Mr. BENNET] asks unanimous consent that this may go over and be returned to at a later time. Is there objection? [After a pause.] The Chair hears none.

Mr. MURRAY. Mr. Chairman, I offer an amendment here, and I will say to the chairman that this is taken verbatim from a provision of the Filipino bill.

The Clerk read as follows:

Amendment offered by Mr. MURRAY: Page 4, line 2, after the end of the line add the following: "That no public money or property shall ever be appropriated, applied, donated, or used, directly or indirectly, for the use, benefit, or support of any sect, church, denomination, sectarian institution, or system of religion; or for the use, benefit, or support of any priest, preacher, minister, or other religious teacher or dignitary as such. The contraction of bigamous or plural marriages hereafter is prohibited."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. LONDON. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from New York [Mr. LONDON] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LONDON: Page 4, line 14, strike out lines 14 and 15 and insert the words "16 years in any occupation is hereby prohibited," so that the subdivision will read, "That the employment of children under the age of 16 years in any occupation is hereby prohibited."

Mr. LONDON. Mr. Chairman, the way the subdivision reads now it is absolutely worthless. It provides that "the employment of children under the age of 14 years in any occupation injurious to health or morals or hazardous to life or limb is hereby prohibited." Now, if you had at least said "the employment of children under the age of 14 years is prohibited," you would limit the hours of labor for children; but you do not do that. You qualify the prohibition. You limit the limitation, and you say "the employment of children under the age of 14 years in such occupations as are injurious to health or morals or hazardous to life or limb is prohibited." You are giving to Porto Rico child-labor laws less progressive than you have in some of the States.

It is evident that the committee have had in mind in drafting a bill of rights the new conditions which have arisen because of the great industrial changes from which——

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

Mr. LONDON. Yes.

Mr. BORLAND. The gentleman can shorten his argument if he would realize that Porto Rico has not an industrial population. If the gentleman had ever been in Porto Rico he would know that. It is an agricultural population, and the whole island there is devoted to agriculture; and these children work in agriculture, where they ought to work.

Mr. LONDON. I was going to refer to that. I know that one-half of the population of Porto Rico are workers; that they have an agricultural class of 600,000 and an industrial class of only 25,000. Nevertheless, the employment of children at a very young age is bound to have a deteriorating effect on the rising generation.

Mr. BORLAND. Is not the gentleman's amendment perfectly sweeping? Does it not prevent their employment in agricultural pursuits up to 16 years of age?

Mr. LONDON. It prevents their employment for pay.

Mr. BORLAND. Is not that an outrageous provision, to prevent their employment in agricultural pursuits?

Mr. LONDON. I would prevent the employment of children for wages; not the employment of a child by its parents. There is the difference. No matter how hard a child may work under the loving care and supervision of a parent, the child will never be exploited as much as when it works under the cruel supervision of a foreman or an employer.

Mr. GARRETT. Mr. Chairman, will the gentleman yield for a suggestion?

Mr. LONDON. Yes.

Mr. GARRETT. The gentleman fixes the age at 16. Has the gentleman considered the fact that in Porto Rico, as in all tropical or semitropical countries, children reach maturity much earlier than they do in the Temperate Zone?

Mr. LONDON. I do not know. What I have in mind is this: The probabilities are that these children will be exploited by capital. These children will be exploited by a growing industrial class, by capitalists that will come from America, who will have no compunction about utilizing the labor of young children. That is what I have in mind. If you consider this amendment too sweeping, why not offer amendments that would make it more adaptable? But do not insist on a provision which as it stands has absolutely no meaning, but adds to its other vices the vice of hypocrisy, because it proposes to limit——

Mr. DAVENPORT. Mr. Chairman, will the gentleman yield?

Mr. LONDON. Yes.

Mr. DAVENPORT. I want to understand if the gentleman's contention is that young children under the age of 16 years, irrespective of whether or not they have a father or mother living, shall not be permitted to work on a farm or in any other occupation that is not hazardous or injurious to their health or morals?

Mr. LONDON. Oh, that orphan-and-widow argument has been worked to death for the last 100 years. I saw it in the report of a British commission which examined into the condition of children way back in 1817.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. DAVENPORT. Mr. Chairman, I wanted to ask the gentleman a question as to whether or not that is his contention. I ask unanimous consent that he may have one minute more in order that he may have the opportunity to answer the question I addressed to him.

The CHAIRMAN. The gentleman from Oklahoma [Mr. DAVENPORT] asks unanimous consent that the gentleman from New York [Mr. LONDON] may proceed for one minute more. Is there objection?

There was no objection.

Mr. DAVENPORT. I made that request, Mr. Chairman, in order to be informed as to whether or not it was the gentleman's contention that children under the age of 16 years should not be permitted to be hired for farm labor or for any other kind of labor for wages?

Mr. LONDON. An orphan child?

Mr. DAVENPORT. An orphan child, or a child that has parents.

Mr. LONDON. Civilized States are beginning to learn how to take care of the orphaned by establishing widows' pension funds. We have such a fund, the beginning of such a fund, in New York. It is the only way to save the orphan child, to prevent it from being exploited in infancy. I would permit a child to be employed by its own parents, but I would not permit a child under the age of 16 to be exploited, because the child can not take care of itself.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. LONDON. Mr. Chairman, I ask unanimous consent to extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LONDON. This leave, Mr. Chairman, applies to some former remarks I made on another amendment, does it not?

The CHAIRMAN. Yes; it does.

Mr. MURRAY. Mr. Chairman, this brings up two views with reference to the rearing of children. There are a bunch of mollycoddles in the country who believe that children ought not to be permitted to work until they reach a certain age. As a matter of truth, unless you make them work they will be shiftless in after life. I believe there ought to be a few speeches made here on the subject of the "evils of child idleness." Now, suppose we adopt the most restricted definition that the gentleman could give it—that is, "paid for their work." Here is a widow with one boy. She is washing for a living. Under that provision that boy could not aid her by carrying the clothes back and forth. Away with such a proposition! As a matter of truth, the boy who starts to study a trade and goes up the line from the bottom will in the end make the most thrifty man. [Applause.] That is the reason why the poor men of the country rear boys who can succeed in life, and that is the reason why the wealthy, who give their children all they want, satisfying all their appetites and passions, keeping them from any kind of labor, rear a lot of boys for the dramshops, the gambling dens, and the poorhouse. I would not want my boys to be reared otherwise than to work. When I came to Washington, finding that there was no employment in the summer months when school ended, I said to my boys, "What are you going to do? Are you going to lie around here on the streets playing and learning meanness?" They finally said they would be willing to sell newspapers; and since we have been in Washington they have sold newspapers on the street, and last summer earned $12 a month each, and while doing so bettering their opportunities for success in life. [Applause.]

The Government ought not to attempt to go further than to prevent the child from working in places harmful to the child's life, health, and morals. Granting that most men do not and can not rear their children in an ideal way, nevertheless the man who works day in and day out and year in and year out to feed and clothe and support his children will in the end do far better toward those children than to attempt to follow the doctrine that would be laid down by the gentleman from New York [Mr. LONDON] to rear and educate them "according to law."

Mr. LONDON. Will the gentleman yield one moment?

Mr. MURRAY. Yes.

Mr. LONDON. Does the gentleman disapprove of child-labor legislation?

Mr. MURRAY. I am opposed to any child-labor legislation that goes further than to take children from places injurious to their morals, their health, or their lives, or that tries to prohibit their learning to work. I believe that after all you must leave with the parents the greatest responsibility, however poor the parents may be, to teach the children their morals and their training. Otherwise, or if you follow the doctrine of the gentleman from New York [Mr. LONDON], it would mean that children must be reared according to law in a public nursery, and I do not believe that any rearing of children according to the rules of law will be as good as letting the parent who strives day after day and year after year give them the proper training.

Mr. LONDON. Will the gentleman yield?

Mr. MURRAY. Yes.

Mr. LONDON. Has any suggestion been made by me which would indicate that I want children to be trained in a public nursery at public expense?

Mr. MURRAY. No; but the gentleman represents a doctrine that does favor it, and in the first Oklahoma Legislature they came there urging it, and that is why I know the doctrine that the gentleman refers to. Better to have societies organized to prevent child idleness and to keep them employed, for "an idle brain is the devil's workshop."

Mr. LONDON. Have not a majority of the States of the Union adopted child-labor laws?

Mr. MURRAY. I am not acquainted with a majority of the States, but I am acquainted with what ought to be done. I say to you that the boy who starts at the ground and goes up with the business will be a boy who can take care of that business and himself in after life and will not become a vagabond and a burden upon society. Why do Jews prove thrifty? Because every Jew boy must hustle—must get up and do. You must restrain a boy in his appetites and passions if you expect to make a man out of him. [Applause.]

The CHAIRMAN. The question is on the amendment of the gentleman from New York [Mr. LONDON].

The amendment was rejected.

The CHAIRMAN. Are there any further amendments to this section? If not, the Clerk will read.

The Clerk read as follows:

Page 4, line 18, section 3——

Mr. TOWNER. Mr. Chairman, I have an amendment.

The CHAIRMAN. Will the gentleman allow the Clerk to finish the reading of the section?

Mr. TOWNER. This is an amendment to section 2.

The CHAIRMAN. We have passed section 2.

Mr. TOWNER. I was on my feet, Mr. Chairman.

The CHAIRMAN. The Chair failed to hear the gentleman. The Chair asked if there were any further amendments to this section, and no one offered anything.

Mr. TOWNER. I was on my feet, Mr. Chairman.

The CHAIRMAN. The section has been passed. It will require unanimous consent.

Mr. DAVENPORT. The gentleman is a member of the committee.

Mr. BENNET. I ask unanimous consent that the gentleman from Iowa may offer his amendment.

Mr. GARRETT. Is this the amendment of the gentleman from Iowa [Mr. TOWNER]?

The CHAIRMAN. Yes.

Mr. GARRETT. He is a member of the committee. I ask unanimous consent to return to section 2.

The CHAIRMAN. Is there objection? No objection is heard, and the Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. TOWNER: Page 3, line 4, strike out the word "in" and insert in lieu thereof the words "under the government of."

Mr. TOWNER. Mr. Chairman, this is just simply a verbal change that I think ought to be made in the language, so that it will read:

Hold any office of profit or trust under the government of Porto Rico.

I think it is necessary in order to make it clear.

The CHAIRMAN. The question is on the amendment of the gentleman from Iowa [Mr. TOWNER].

The amendment was agreed to.

Mr. TOWNER. Another amendment: On page 4, in line 2, after the word "under," insert the words "the government of."

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 4, line 2, after the word "under," insert the words "the government of."

The amendment was agreed to.

Mr. TOWNER. Another amendment: In line 16, on page 4, after the word "action," I move to insert the words "now existing."

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 4, line 16, after the word "action," insert the words "now existing."

Mr. GARRETT. Mr. Chairman, just a moment, if the gentleman will permit, before that is voted on. The bill provides—

That the right of action to recover damages for injuries resulting in death shall never be abrogated.

If you insert the words "now existing," it might possibly be construed to exclude subsequent rights of action that might arise. I suggest to the gentleman that this language is broader than the language that he offers.

Mr. TOWNER. I do not know whether the right to recover for death losses exists under the laws of Porto Rico or not.

Mr. BENNET. It does not exist under the civil law. In our State of New York we found that we had to insist on these words, there being no right at common law, nor under the Roman or civil law, and unless you preserve some right of action you have nothing.

Mr. GARRETT. The point I am making is that the language of the gentleman from Iowa would limit it to the right now existing, and might by construction exclude all rights that might arise in the future.

Mr. BENNET. It says that the right shall not be abrogated.

Mr. GARRETT. If no right exists, if it is true that under the Roman law no right exists, it would not add anything to it.

Mr. BENNET. There may be a right of action under some statute that we passed.

Mr. GARRETT. If so, it will be continued.

Mr. DAVENPORT. My recollection is that we extended the statutes over Porto Rico which gives them that right.

Mr. TOWNER. Mr. Chairman, I do not insist on this amendment, and I ask unanimous consent to return to it if necessary.

The CHAIRMAN (Mr. FOSTER). Without objection, the amendment is withdrawn.

There was no objection.

The Clerk, proceeding with the reading of the bill, read as follows:

SEC. 3. That no export duties shall be levied or collected on exports from Porto Rico, but taxes and assessments on property, internal revenue, and license fees, and royalties for franchises, privileges, and concessions may be imposed for the purposes of the insular and municipal governments, respectively, as may be provided and defined by the Legislature of Porto Rico; and when necessary to anticipate taxes and revenues, bonds and other obligations may be issued by Porto Rico or any municipal government therein as may be provided by law, and to protect the public credit: *Provided, however*, That no public indebtedness of Porto Rico or of any municipality thereof shall be authorized or allowed in excess of 7 per cent of the aggregate tax valuation of its property, and all bonds issued by the government of Porto Rico, or by its authority, shall be exempt from taxation by the Government of the United States, or by the government of Porto Rico or of any political or municipal subdivision thereof, or by any State, or by any county, municipality, or other municipal subdivision of any State or Territory of the United States, or by the District of Columbia. In computing the indebtedness of the people of Porto Rico bonds issued by the people of Porto Rico secured by an equivalent amount of bonds of municipal corporations or school boards of Porto Rico shall not be counted.

Mr. BORLAND. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Page 5, line 5, strike out the words "authorized or allowed" and insert the word "valid."

Mr. BORLAND. Mr. Chairman, these bonds are either valid or invalid, for in this act there is no provision for some higher body to authorize the issuance of a bond. There is no provision in this bill to permit anybody to authorize the bonds. I think the word used here ought to be "valid," and if the committee concurs in it, I will not take the further time of the committee.

Mr. JONES. I call the gentleman's attention to the language of the bill. This is the language he desires to have amended:

That no public indebtedness of Porto Rico or of any municipality thereof shall be authorized or allowed in excess of 7 per cent of the aggregate tax valuation of its property.

The very section in which this language is found also provides for the creation of a public indebtedness, but such public indebtedness shall not be authorized in excess of 7 per cent of the taxable value of all property in Porto Rico. If his amendment is adopted the bill will read "that no public indebtedness of Porto Rico or of any municipality thereof shall be valid in excess of 7 per cent," and so forth. It may be that same municipality has now a bonded indebtedness in excess of 7 per cent. If so, the effect of this amendment would be to make that indebtedness invalid. The language of the bill, in my opinion, fully accomplishes the purpose for which it was intended. I can not see how you can make it any plainer.

Mr. BORLAND. I will explain. If there are issues of bonds in Porto Rico, and the chairman of the committee, I suppose, would be familiar with the issues of those bonds——

Mr. JONES. I am not saying that there are any.

Mr. BORLAND. Then an exception should be made; but I contend that this language is necessary. If a municipality in Porto Rico undertakes to issue bonds in excess of its power under the organic law, the validity of these bonds as a burden on the property owners comes before the courts. The question before the court is, Are these bonds that were issued valid or invalid under the organic act? If the organic act provides for some authorization like Congress or by the governor or some other person, then they might be shown to be valid by showing that they were authorized; but the purpose here is to restrain the issuance by a municipality or corporation beyond 7 per cent. That must be obtained by making the overissue invalid.

Mr. BRUMBAUGH. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. BRUMBAUGH. May not the word "valid" have a meaning or construction different from what the gentleman intends it to have? Who would decide as to the validity? Would not the court decide it?

Mr. BORLAND. Precisely.

Mr. BRUMBAUGH. Before they could go ahead with the issue of the bonds they would have to be submitted to the court.

Mr. BORLAND. Not necessarily. If nobody attacked the bonds, there is no case for the court; but if the property owner attacks the bonds as being an overissue the question is whether they were issued in accordance with the provisions of the organic act, namely, whether they exceeded 7 per cent valuation. All these provisions are to restrain parties from issuing an excessive amount of bonds and indebtedness.

The CHAIRMAN. The time of the gentleman has expired.

Mr. JONES. I ask unanimous consent that the gentleman may have one minute more in order that he may answer a question I desire to ask him.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. JONES. If bonds not authorized by this law should be issued, would they not be invalid?

Mr. BORLAND. Let me ask the gentleman a question. What does the words "authorized or allowed" mean?

Mr. JONES. In this connection it means that the Porto Rican Government created under this bill shall not authorize the creation of the public indebtedness contemplated in the bill to an amount that will be in excess of 7 per cent of tax values.

Mr. BORLAND. Well, I see the gentleman's point, and I will answer. If we were to strike out the words "or allowed" and insert before the word "authorized" the word "hereby," that language would be absolutely in accordance with his meaning now. If we were to say "it is hereby authorized in excess of 7 per cent," that would be satisfactory to the position the gentleman has stated, but it says "authorized or allowed."

Mr. JONES. I do not see how the insertion of the word "hereby" would improve matters.

Mr. BORLAND. It says "authorized or allowed," which implies there is a power resident somewhere outside of this act to authorize or allow.

Mr. JONES. I think not; I think that is a strained construction.

Mr. TILSON. Mr. Chairman, I rise in opposition to the gentleman's motion. Is not the trouble with my friend from Missouri the fact that he interprets this to mean an authorization of bonds or other forms of indebtedness, whereas, as a matter of fact, it is a limitation upon the legislative body of Porto Rico? It says to the legislative body of Porto Rico, or any municipality thereof, "You shall not authorize bonds in excess of 7 per cent." That is what it says. Now, as a matter of fact, if in violation of this organic act the legislative body itself should authorize or by legislative act allow some municipality to authorize bonds in excess of 7 per cent, then they would be invalid. This, however, is not an authorization for bonds, but it is a limitation upon the authority of bodies which may authorize bonds. Therefore it seems to me it is correct as it stands. Certainly it would be entirely incorrect and not convey the proper meaning if the word "authorized" were stricken out and the word "valid" inserted.

Mr. BORLAND. I want to call the attention of the gentleman before he sits down to the effect of this language:

And when necessary to anticipate taxes and revenues, bonds and other obligations may be issued by Porto Rico or any other municipal government therein as provided by law—

There is direct authority in your organic law to issue bonds. Now, so far it is unlimited. It goes on to say:

and protect the public credit.

Then it goes on and attempts to limit that authority to 7 per cent of the tax valuation of its property. My contention is that limitation intends to say that an overissue is invalid.

Mr. TILSON. I do not understand there is any authorization of bonds made here at all.

Mr. BORLAND. The gentleman can read it.

Mr. TILSON. This says they shall not issue bonds in excess of a certain amount.

Mr. BORLAND. The words here give power to issue bonds, and if the gentleman will read it, he will see it.

Mr. TILSON. That gives authority to the legislative assembly, or whatever it may be, to authorize bonds; but it states that it shall not authorize them beyond a certain amount. No specific bonds are authorized, and it does not attempt to say that certain bonds are valid and certain invalid, but says——

Mr. BORLAND. The gentleman has not read that carefully. It says:

And when necessary to anticipate taxes and revenue, bonds and other obligations may be issued by Porto Rico or any other municipal government therein.

There is direct authority—"may be issued."

Mr. TILSON. There is a limitation upon that.

Mr. BORLAND. It is unlimited. Then you come to the words:

And no public indebtedness of Porto Rico or of any municipality thereof shall be authorized or allowed—

By whom?—

in excess of 7 per cent.

Now, my amendment is—

Shall be valid in excess of 7 per cent.

Mr. TILSON. No; it should stand as it is as a limitation upon what may be authorized by the legislative body or any municipality thereof.

Mr. MADDEN. Mr. Chairman, I make the point of order there is no quorum present. This is Saturday night, and we have worked very hard all the week.

Mr. JONES. Mr. Chairman, I hope the gentleman will wait until we get through with this section. It is not 5 o'clock yet.

The CHAIRMAN. The gentleman from Illinois makes the point of order there is no quorum present.

Mr. JONES. Mr. Chairman, I hope the gentleman will withdraw it.

Mr. MADDEN. Mr. Chairman, I make the point of order of no quorum.

Mr. JONES. I will ask the gentleman from Illinois to withhold his point until we complete this section. I do not think it will take many minutes.

Mr. MADDEN. I withdraw the point for the present, Mr. Chairman.

Mr. YOUNG of North Dakota. Mr. Chairman——

The CHAIRMAN. There is an amendment pending now. The question is on the amendment offered by the gentleman from Missouri.

The question was taken, and the amendment was rejected.

Mr. YOUNG of North Dakota. Mr. Chairman, this section states that the bonded indebtedness shall be limited to 7 per cent of the assessed valuation, which is ordinarily considered quite high. It would seem to me that the language is sufficiently broad to permit a limit of 7 per cent for the municipal indebtedness, also 7 per cent for school indebtedness on top of 7 per cent for the island government. If so, that would make in some portions of the island indebtedness as high as 21 per cent of the assessed valuation. Should not the wording be changed? Should there not be a limit much under 21 per cent for all kinds of public indebtedness?

I would like to ask the chairman of the committee as to his idea of the meaning of these lines 4 and 5.

Mr. JONES. Well, I will say that the government of Porto Rico could not issue bonds and sell them in excess of 7 per cent of the taxable value. It expressly says, "Of any municipality." It does not speak of any other subdivision.

Mr. YOUNG of North Dakota. It says, "Or any municipality thereof." Is not a school district a municipality?

Mr. JONES. I will say, if the government of Porto Rico could incur indebtedness not exceeding 7 per cent the city of San Juan could do the same thing.

Mr. YOUNG of North Dakota. How about the school district?

Mr. JONES. There is no authority here. There is nothing here on the subject of school districts.

Mr. YOUNG of North Dakota. Does not the gentleman think that the limit would be rather high at 14 per cent?

Mr. JONES. I do not think so. I think property values there are very small.

The CHAIRMAN. The Clerk will read.

Mr. BORLAND. Mr. Chairman, I offer an amendment to section 3, page 5, line 5, after the word "be," insert the word "hereby."

The CHAIRMAN. The gentleman from Missouri offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 5, line 5, after the word "be," insert the word "hereby."

Mr. BORLAND. So that the language will read.

The Clerk read as follows:

Shall be hereby authorized or allowed in excess of 7 per cent.

Mr. BORLAND. If this authorization and allowance is meant the authorization and allowance given by this particular act, it ought to so state. If it is an authorization or allowance by somebody else, the committee would be opposed to its insertion at all.

Mr. GARRETT. Will the gentleman permit. If that language should be inserted which the gentleman suggests, it would mean that they could not authorize anything more, but it would mean the Porto Rican Legislature, of course, could authorize it. The purpose is to put a limitation on the Porto Rican government itself and the municipality. If the gentleman puts in his language, the limitation would not be any limitation at all.

Mr. BORLAND. I offered it a little while ago, and the chairman said the authorization and allowance was in this act. I did not agree with him.

Mr. JONES. I call for a vote, Mr. Chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri [Mr. BORLAND].

The amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 4. That the capital of Porto Rico shall be at the city of San Juan, and the seat of government shall be maintained there.

Mr. MADDEN. Mr. Chairman, I renew the point of order.

Mr. JONES. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. FOSTER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 9533, the Porto Rican bill, and had come to no resolution thereon.

PENSIONS.

Mr. RUSSELL of Missouri. Mr. Speaker, I ask to call up the bill S. 4856 for the purpose of agreeing to a conference report. It will take only a moment.

The CHAIRMAN. The Clerk will report the title.

The Clerk read as follows:

An act (S. 4856) granting pensions and increase of pensions to soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

The SPEAKER. The Clerk will read the conference report.

The Clerk read the report as follows:

CONFERENCE REPORT (NO. 727).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 4856) entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendments numbered 1, 3, 9, 11, 12, 13, 14, 15, 18, and 19.

That the Senate recede from its disagreements to the amendments of the House numbered 5, 7, 8, 10, 16, 17, and 20, and agree to the same.

Amendment numbered 2: That the Senate recede from its disagreement to the amendment of the House numbered 2, and agree to the same with an amendment as follows: In lieu of the amount named insert "$36"; and the House agree to the same.

Amendment numbered 4: That the Senate recede from its disagreement to the amendment of the House numbered 4, and agree to the same with an amendment as follows: In lieu of the amount named insert "$36"; and the House agree to the same.

Amendment numbered 6: That the Senate recede from its disagrement to the amendment of the House numbered 6, and agree to the same with an amendment as follows: In lieu of the amount named insert "$36"; and the House agree to the same.

JOE J. RUSSELL,
WILLIAM A. ASHBROOK,
CHAS. E. FULLER,
Managers on the part of the House.

CHARLES F. JOHNSON,
WM. HUGHES,
REED SMOOT,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 4856) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, submit the following written statement in explanation of the effect of the action agreed upon by the conference committee and submitted in the accompanying conference report as to each of the said amendments, namely:

Amendment No. 1: Reinstates the provision for increase of pension for Moses Green as proposed by the Senate.

Amendment No. 2: Grants a pension of $36 instead of $40 as proposed by the House and $30 as proposed by the Senate.

Amendment No. 3: Reinstates the provision for increase of pension to Justine M. Thrift as proposed by the Senate.

Amendment No. 4: Grants a pension of $36 instead of $40 as proposed by the House and $30 as proposed by the Senate.

Amendment No. 5: Grants a pension of $40 as proposed by the House.

Amendment No. 6: Grants a pension of $36 instead of $40 as proposed by the House and $30 as proposed by the Senate.

Amendment No. 7: Strikes out the provision for pension for James H. Moser.

Amendment No. 8: Grants a pension of $24 as proposed by the House.

Amendment No. 9: Grants a pension of $30 as proposed by the Senate.

Amendment No. 10: Grants a pension of $24 as proposed by the House.

Amendment No. 11: Reinstates the provision for pension for increase of pension to John S. Allison as proposed by the Senate.

Amendment No. 12: Reinstates the provision for pension for increase of pension to George W. Doyle as proposed by the Senate.

Amendment No. 13: Reinstates the provision for pension for increase of pension to Harvey D. Plummer, alias Harvey D. Picknell, as proposed by the Senate.

Amendment No. 14: Reinstates the provision for pension for increase of pension to Benjamin H. Whipple as proposed by the Senate.

Amendment No. 15: Reinstates the provision for pension for increase of pension to Julia C. Bradley as proposed by the Senate.

Amendment No. 16: Grants increase of pension to $24 as proposed by the House.

Amendment No. 17: Grants increase of pension to $24 as proposed by the House.

Amendment No. 18: Grants increase of pension to $25 as proposed by the Senate.

Amendment No. 19: Reinstates the provision for pension for increase of pension to Louis Badger as proposed by the Senate.

Amendment No. 20: Makes provision for additional pension on account of soldier's helpless child as proposed by the House.

JOE J. RUSSELL,
WILLIAM A. ASHBROOK,
CHAS. E. FULLER,
Managers on the part of the House.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken, and the conference report was agreed to.

HOUR OF MEETING MONDAY.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. on Monday next.

The SPEAKER. The gentleman asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. on Monday next. Is there objection?

There was no objection.

EXTENSION OF REMARKS.

Mr. KEATING. Mr. Speaker, I ask unanimous consent to extend my remarks upon the Porto Rican bill.

The SPEAKER. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 53 minutes p. m.) the House adjourned until Monday, May 22, 1916, at 11 o'clock a. m.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. TILLMAN, from the Committee on Indian Affairs, to which was referred the bill (H. R. 6876) to amend an act entitled "An act to amend an act entitled 'An act to provide for the adjudication and payment of claims arising from Indian depredations,' approved March 3, 1891," approved January 11, 1915, reported the same without amendment, accompanied by a report (No. 736), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. NORTON, from the Committee on Indian Affairs, to which was referred the bill (H. R. 12030) to amend an act entitled "An act to provide for the disposal of certain lands in the Fort Berthold Indian Reservation, N. Dak.," approved August 3, 1914, reported the same without amendment, accompanied by a report (No. 737), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. FLYNN, from the Committee on Claims, to which was referred the bill (H. R. 8010) making an appropriation to pay the legal representatives of the estate of John H. Christy, deceased, to wit, E. J. Christy and others, heirs at law of John H. Christy, late of the State of Georgia, in full for any claim for salary and allowance made by reason of the election of the said John H. Christy to the Thirty-ninth Congress and his services therein, reported the same with amendment, accompanied by a report (No. 738), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 1106) for the relief of C. E. Moore; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 2597) for the relief of E. B. Huntley, Noah Harper, and S. Hoagland, sureties on the bond of Mrs. Jewell B. Hope, postmaster at Astor Park, Fla.; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 2742) to reimburse Isaiah Stephens, postmaster of McMechen, Marshall County, W. Va., for money and postage stamps stolen; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 4416) to reimburse L. W. Dragoo, formerly postmaster at Smithfield, Wetzel County, W. Va., for money, money orders, and postage stamps stolen; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 5849) granting a pension to Cornelius J. Hurley; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 10810) granting a pension to Louis F. Pampe; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 5882) to defray expenses of L. K. Meldrim in certain litigation; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 5990) to remiburse S. S. Buzzerd, postmaster of Berkeley Springs, Morgan County, W. Va., for cash stolen; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 6267) to reimburse Tennie A. Anderson, postmaster at Maplewood, Fayette County, W. Va., for money, money orders, and postage stamps stolen; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 10015) for the adjudication and determination of the claims arising under joint resolution of July 14, 1870, authorizing the Postmaster General to continue in use in the Postal Service Marcus P. Norton's combined postmarking and stamp-canceling hand-stamp patents, or otherwise; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 10792) for the relief of George F. Nicholson; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 12725) for the settlement of the claims arising under joint resolution of July 14, 1870, authorizing the Postmaster General to continue to use in the Postal Service Marcus P. Norton's combined postmarking and stamp-canceling hand-stamp patents, and directing him to determine upon a fair, just, and equitable compensation for the use of said inventions; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 14345) to reimburse J. B. Patterson, postmaster of Lacon, Morgan County, Ala., for certain postage stamps stolen; Committee on the Post Office and Post Roads discharged, and referred to the Committee on Claims.

A bill (H. R. 14568) granting a pension to Benjamin Burkett, Rural Retreat, Va.; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 14989) granting a pension to Nina H. Love; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and a resolution were introduced and severally referred as follows:

By Mr. McGILLICUDDY: A bill (H. R. 15839) to regulate the importation into the United States of halibut or salmon taken in the North Pacific Ocean or its tributary waters; to the Committee on Ways and Means.

By Mr. HULBERT: A bill (H. R. 15840) for the purchase of certain lands in the District of Columbia for a public park; to the Committee on Public Buildings and Grounds.

By Mr. LONDON: A bill (H. R. 15841) to amend section 17 and section 64 of the bankruptcy act; to the Committee on the Judiciary.

By Mr. RUCKER: A bill (H. R. 15842) to revise, amend, and codify the laws relating to publicity of contributions and expenditures made for the purpose of influencing the nomination and election of candidates for the offices of Senator and Representative in the Congress of the United States, extending the same to candidates for nomination and election to the offices of President and Vice President of the United States, limiting the amount which may be expended, providing for the publicity of campaign expenses, and for other purposes; to the Committee on Election of President, Vice President, and Representatives in Congress.

By Mr. CARTER of Oklahoma: A bill (H. R. 15843) to establish the southern district of the United States court in the State of Oklahoma, and for other purposes; to the Committee on the Judiciary.

By Mr. HULBERT: Resolution (H. Res. 245) relative to summary execution of Irish prisoners; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 15844) granting an increase of pension to Norman Gregory; to the Committee on Invalid Pensions.

By Mr. BEALES: A bill (H. R. 15845) granting an increase of pension to Daniel Deitrick; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15846) granting an increase of pension to George M. Jacobs; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15847) granting an increase of pension to Elizabeth Spangler; to the Committee on Invalid Pensions.

By Mr. BORLAND: A bill (H. R. 15848) to remove disabilities of Edward R. Schauffler; to the Committee on Military Affairs.

By Mr. BYRNES of South Carolina: A bill (H. R. 15849) granting a pension to William E. Keels; to the Committee on Pensions.

Also, a bill (H. R. 15850) granting a pension to Robert Wilks; to the Committee on Pensions.

By Mr. COLEMAN: A bill (H. R. 15851) for the relief of William H. Watt; to the Committee on Claims.

By Mr. CRAGO: A bill (H. R. 15852) for the relief of Allen Hyatt; to the Committee on Military Affairs.

By Mr. DECKER: A bill (H. R. 15853) granting an increase of pension to John K. Miller; to the Committee on Invalid Pensions.

By Mr. DOOLITTLE: A bill (H. R. 15854) granting an increase of pension to John Johnson; to the Committee on Pensions.

By Mr. GARRETT: A bill (H. R. 15855) granting an increase of pension to Edward C. Eubanks; to the Committee on Invalid Pensions.

By Mr. HAYDEN: A bill (H. R. 15856) granting an increase of pension to Catharine Nichols; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15857) for the relief of George Moran; to the Committee on Military Affairs.

By Mr. HOWARD: A bill (H. R. 15858) granting an increase of pension to Mary J. Peirce; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15859) granting an increase of pension to Frank R. Barfoot; to the Committee on Invalid Pensions.

By Mr. KING: A bill (H. R. 15860) granting an increase of pension to Catharine Shirkey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15861) granting an increase of pension to Laura S. Pritchard; to the Committee on Invalid Pensions.

By Mr. LAFEAN: A bill (H. R. 15862) granting an increase of pension to Caroline Rively; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15863) granting an increase of pension to Euphenia Spangler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15864) granting an increase of pension to Anna Helfrich; to the Committee on Invalid Pensions.

By Mr. McARTHUR: A bill (H. R. 15865) granting an increase of pension to Eda M. McCammon; to the Committee on Invalid Pensions.

By Mr. MARTIN: A bill (H. R. 15866) granting a pension to Cora G. Baber; to the Committee on Pensions.

By Mr. PARKER of New York: A bill (H. R. 15867) granting an increase of pension to William Holley; to the Committee on Invalid Pensions.

By Mr. SWEET: A bill (H. R. 15868) granting an increase of pension to Amanda Adams Hammond; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15869) granting an increase of pension to Julia V. White; to the Committee on Invalid Pensions.

By Mr. WASON: A bill (H. R. 15870) granting a pension to Eva S. Lamson; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BACHARACH: Memorial of Convention of Mental Hygiene Societies of the United States, favoring bill for division of mental hygiene in United States Public Health Service; to the Committee on Interstate and Foreign Commerce.

By Mr. BUCHANAN of Illinois: Petition of 187 citizens of Chicago, Ill., favoring House bill 127, relative to shipment of milk; to the Committee on Foreign Affairs.

By Mr. CAREW: Petition of Philadelphia Chamber of Commerce, in re Senate bill 19; to the Committee on Interstate and Foreign Commerce.

By Mr. CLINE: Petition of Mary Stirk and 70 others, members of the Ladies of the Grand Army of the Republic of Fort Wayne, Ind., favoring increase of widows' pensions; to the Committee on Invalid Pensions.

By Mr. DALE of New York: Petition of Louise M. Tyler, of Denver, Colo., favoring woman-suffrage amendment; to the Committee on the Judiciary.

Also, memorial of the Convention of Mental Hygiene Societies of the United States, favoring bill for division of mental hygiene in the United States Public Health Service; to the Committee on Interstate and Foreign Commerce.

By Mr. ESCH: Petition of P. A. Casberg and 15 others, of La Crosse, Wis., favoring bill to prohibit Taylor system in Government shops; to the Committee on Labor.

By Mr. GALLIVAN: Memorial of Convention of Mental Hygiene Societies, favoring bill relative to division of mental hygiene in the United States Public Health Service; to the Committee on Interstate and Foreign Commerce.

Also, petition of Boston Retail Grocers' Association, against bill for compulsory use of the metric system in the United States; to the Committee on Coinage, Weights, and Measures.

By Mr. KELLEY: Petition of eight retail jewelry firms of Pontiac, Mich., favoring Stephens price-maintenance bill; to the Committee on Interstate and Foreign Commerce.

By Mr. KENNEDY of Rhode Island: Memorial of Phobie L. Cargill Technical High School, of Providence, R. I., in favor of Senate bill 4874; to the Committee on Military Affairs.

By Mr. LAFEAN: Petition of American Union Against Militarism, against proposed subsidy to National Guard; to the Committee on Military Affairs.

By Mr. LINTHICUM: Petition of Cantelou Bros., factors, of Montgomery, Ala., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Qui Vive Club, Mrs. Eugene Henry, Birmingham, Ala., indorsing House resolution 137; to the Committee on Rules.

Also, petition of United Mine Workers of America, Local Union No. 1912, Hartford, Ark., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Dr. M. E. Jaffa, consulting nutrition expert, Berkeley, Cal., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Mr. F. M. Andreasen, secretary State dairy bureau of California, San Francisco, Cal., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Woman's Club, Virginia Barlett, secretary, Paso Robles, Cal., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Browning Club, Mrs. Caroline O. Bradley, secretary, Los Angeles, Cal., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Woman's Bindery Union, Local No. 42, International Brotherhood of Bookbinders, Miss Flora C. Plumb, secretary, Washington, D. C., indorsing House resolution 127; to the Committee on Rules.

Also, petition of Woman's Civic League, Miss A. O. Plaisted, president, Winter Haven, Fla., indorsing House resolution 137; to the Committee on Rules.

Also, petition of United Commercial Travelers of America, H. M. Ashe, secretary, Atlanta, Ga., indorsing House resolution 137; to the Committee on Rules.

Also, petition of the Order of Railroad Telegraphers, Mr. C. A. Pye, secretary, Oglethorpe, Ga., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Dr. H. Louis Jackson, State chemist, board of health, Boise, Idaho, indorsing House resolution 137; to the Committee on Rules.

Also, petition of Consumers' Cotton Oil Mills, F. W. Dewson, Chicago, Ill., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Dr. John D. Robertson, commissioner of health, Chicago, Ill., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Mr. A. W. Currin, Chicago, Ill., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Mr. John B. Newman, assistant commissioner, State food department, Chicago, Ill., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Ladies' Athaneum, Miss Emma J. Imig, secretary, Minier, Ill., indorsing House resolution 137; to the Committee on Rules.

Also, petition of the Illinois League for Nursing Education, Miss Elsie L. Burks, secretary, Chicago, Ill., indorsing House resolution 137; to the Committee on Rules.

Also, petition of E. Re Nata Club, Mrs. F. C. Arthur, Streator, Ill., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Indiana Division, Travelers' Protective Association, Mr. Charles M. Zink, of Indianapolis, Ind., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Fort Wayne Antituberculosis League, Miss Irene Byron, secretary, of Fort Wayne, Ind., indorsing House resolution 137; to the Committee on Rules.

Also, petition of United Mine Workers, Local No. 942, J. Frank Sherum, of Montgomery, Ind., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Woman's Club, Mrs. I. W. Douglass, of Maxwell, Iowa, indorsing House resolution 137; to the Committee on Rules.

Also, petition of Kansas State Agricultural College, Dr. J. T. Willard, of Manhattan, Kans., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Gove City Chapter of the Utopian Club, Mrs. Claude Thomas, of Gove City, Kans., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Croweberg Local Union, No. 1896, Mr. Frank Eber, of Croweberg, Kans., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Kansas State Federation of Labor, Charles Hamlin, secretary, of Leavenworth, Kans., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Current Events Club, Mrs. Daniel B. Weeks, of Augusta, Me., indorsing House resolution 137; to the Committee on Rules.

Also, petition of chief, bureau of bacteriology, department of health, Dr. William Royal Stokes, of Baltimore, Md., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Mr. Henry M. Walker, of Baltimore, Md., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Harvard Medical School, Dr. M. J. Rosehau, of Boston, Mass., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Medical Woman's Club, Margaret Kock, M. D., president, of Minneapolis, Minn., indorsing House resolution 137; to the Committee on Rules.

Also, petition of State Chemist Dr. W. F. Hand, of Agricultural College, Miss., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Stove Mounters' International Union, Local No. 34, E. W. Kaiser, secretary, of St. Louis, Mo., indorsing House resolution 137; to the Committee on Rules.

Also, petition of United Mine Workers of America, Local No. 858, B. D. Chesney, of Bearcreek, Mont., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Woman's Club, Ellen Stewart Griffin, president, of Franklin, N. H., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Barbers' Union, James McAdams, of Watervliet, N. Y., indorsing House resolution 137; to the Committee on Rules.

Also, petition of North Carolina Cotton Seed Crushers' Association, H. A. White, secretary, of Greenville, N. C., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Order of Railroad Telegraphers, J. H. Williams, of Wilson, N. C., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Granite Cutters' International Association, J. O. Belton, secretary, of Mount Airy, N. C., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Newbern Cotton Oil & Fertilizer Mills, C. L. Ives, president, of Newbern, N. C., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Women's Club, Mrs. George Dial, president, of Springfield, Ohio, indorsing House resolution 137; to the Committee on Rules.

Also, petition of Sorosis Club, Mrs. George Lee Miller, president, of Canton, Ohio, indorsing House resolution 137; to the Committee on Rules.

Also, petition of superintendent, Cincinnati Antituberculosis League, Dr. Courtenay Dinwiddie, of Cincinnati, Ohio, indorsing House resolution 137; to the Committee on Rules.

Also, petition of grand counselor, United Commercial Travelers, Mr. Louis Wirth, of Dayton, Ohio, indorsing House resolution 137; to the Committee on Rules.

Also, petition of Laundry Workers' Local No. 28, of Chickasha, Okla., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Portland Railroad Woman's Club, Miss Emma I. Holmes, secretary, of Portland, Oreg., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Woman's Civic Club, of Lebanon, Oreg., indorsing House resolution 137; to the Committee on Rules.

Also, petition of United Mine Workers of America, W. A. Kelley, secretary, South Fork, Pa., indorsing House resolution 137; to the Committee on Rules.

Also, petition of United Mine Workers of America, Local 2179, John Andrews, secretary, Lilly, Pa., indorsing House resolution 137; to the Committee on Rules.

Also, petition of department of biology, Lafayette College, Prof. William F. Foster, Easton, Pa., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Civic League and Housewives' Club, Mrs. J. L. Barringer, president, Florence, S. C., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Memphis Bag Co., William Borwork, manager, Memphis, Tenn., indorsing House resolution 137; to the Committee on Rules.

Also, petition of United Mine Workers of America, John J. Boise, secretary, Soddy, Tenn., indorsing House resolution 137; to the Committee on Rules.

Also, petition of P. I. Fletcher, Texline, Tex., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Dallas Oil & Refining Co., J. S. Le Clerco, manager, Dallas, Tex., indorsing House resolution 137; to the Committee on Rules.

Also, petition of W. S. Forbes & Co., S. C. Ewing, Richmond, Va., indorsing House resolution 137; to the Committee on Rules.

Also, petition of polishers' branch of the International Association of Granite Cutters, Mr. Arthur H. Pine, Barre, Vt., indorsing House resolution 137; to the Committee on Rules.

Also, petition of United Mine Workers of America, J. S. Johnson, secretary, Carbonado, Wash., indorsing House resolution 137; to the Committee on Rules.

Also, petition of United Mine Workers of America, Local 2586, D. T. Rayford, Mahon, W. Va., indorsing House resolution 137; to the Committee on Rules.

Also, petition of Boiler Makers' Brotherhood, Mr. F. G. Maybury, Elkins, W. Va., indorsing House resolution 137; to the Committee on Rules.

Also, petition of United Mine Workers of America, Local No. 2293, Port. J. Ward, Rock Springs, Wyo., indorsing House resolution 137; to the Committee on Rules.

By Mr. MEEKER: Memorial of Rising Sun Council, No. 52, of Luxemburg, Mo., against bill to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. OAKEY (by request): Memorial of Sunday school of Fourth Church, of Hartford, Conn., favoring bill for Federal censorship of motion pictures; to the Committee on Education.

By Mr. O'SHAUNESSY: Memorial of Wood & Skilton, of Philadelphia, Pa., in re House bill 165; to the Committee on Interstate and Foreign Commerce.

Also, memorial of Providence Central Federated Union, of Providence, R. I., and the Rhode Island State Branch of the American Federation of Labor in re House bill 8828 and Senate bill 3457; to the Committee on Appropriations.

Also, memorial of American Association for Labor Legislation in re House bill 15376; to the Committee on Labor.

Also, memorial of the national committee for mental hygiene in re House bill 721; to the Committee on Interstate and Foreign Commerce.

Also, memorial of Newport Central Labor Union, favoring investigation of dairy conditions in the United States; to the Committee on Rules.

Also, memorial of the Franklin Typothetæ, of Chicago, in favor of the Stevens bill; to the Committee on Interstate and Foreign Commerce.

Also, memorial of one hundredth meeting of the National Association of Cotton Manufacturers, favoring preparedness; to the Committee on Military Affairs.

Also, petition of American Women's German Aid Society, of Saylesville, R. I., in re foreign conditions; to the Committee on Foreign Affairs.

Also, memorial of Jenckes Spinning Co., of Pawtucket, R. I., in re House bills 8665 and 8677; to the Committee on Interstate and Foreign Commerce.

By Mr. STEPHENS of Texas: Memorial of Manufacturers' Association of Texas, favoring the Shields water-power bill; to the Committee on Rivers and Harbors.

By Mr. STINESS: Petition of Jenckes Spinning Co., of Pawtucket, R. I., against bills to prohibit Taylor system in Government shops; to the Committee on Labor.

By Mr. TAGUE: Memorial of Central Council of Irish County Associations of Massachusetts, relative to treatment of Irish prisoners by England; to the Committee on Foreign Affairs.

SENATE.

MONDAY, *May 22, 1916.*

(Legislative day of Thursday, May 18, 1916.)

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, the pending question being on the amendment of the Committee on Commerce, page 25, line 5, after the word "including," to strike out the word "works" and insert "bank protection"; in line 6, after the words "Pine Bluff and," to insert "Little Rock and vicinity and"; and, in line 7, after the word "plant," to strike out "$209,700" and insert "$234,700," so as to make the clause read:

Arkansas River, Ark. and Okla.: For maintenance of improvement, including bank protection at Pine Bluff and Little Rock and vicinity and the operation of dredging plant, $234,700.

Mr. CLARKE of Arkansas. Mr. President, a parliamentary inquiry. On last Saturday the pending item in the bill was submitted to a yea-and-nay vote, and the vote on this particular proposition disclosed the absence of a quorum. What is the ruling of the Chair as to whether the names of the absentees shall be called or that the vote be declared void, to be taken over?

The VICE PRESIDENT. The opinion of the Chair is that the roll call developing a quorum—the taking of the yeas and nays on the amendment is the pending question; that the roll call must be proceeded with and a quorum developed.

Mr. CLARKE of Arkansas. De novo, overlooking the former call?

The VICE PRESIDENT. De novo.

Mr. CLARKE of Arkansas. I have no objection.

Mr. KENYON. Then the order of business is merely to proceed with the roll call.

Mr. BRANDEGEE. Did the Secretary call the roll to develop the presence of a quorum?

The VICE PRESIDENT. The Chair was not here, but the Chair understands that a quorum was developed.

Mr. BRANDEGEE. I did not understand that a quorum had been developed.

The VICE PRESIDENT. A quorum was developed.

Mr. CLARKE of Arkansas. A quorum was not developed on the vote upon the item, but it was developed upon the suggestion of the absence of a quorum. Whatever the ruling is it will be agreeable and we will conform to it.

The VICE PRESIDENT. The yeas and nays no doubt will develop a quorum this morning. The Secretary will call the roll on agreeing to the amendment.

The Secretary proceeded to call the roll.

Mr. SAULSBURY (when his name was called). I have a general pair with the junior Senator from Rhode Island [Mr. COLT]. I see that he is not in the Chamber, and I withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER]. In his absence I withhold my vote. If I were at liberty to vote, I would vote "nay."

Mr. WALSH (when his name was called). I inquire if the Senator from Rhode Island [Mr. LIPPITT] has voted?

The VICE PRESIDENT. He has not.

Mr. WALSH. I have a pair with that Senator and withhold my vote.

Mr. WILLIAMS (when his name was called). Transferring my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the Senator from Illinois [Mr. LEWIS], I vote "yea."

The roll call was concluded.

Mr. SAULSBURY. I transfer my pair with the junior Senator from Rhode Island [Mr. COLT] to the junior Senator from South Carolina [Mr. SMITH] and vote "yea."

Mr. MYERS (after having voted in the affirmative). Has the Senator from Connecticut [Mr. MCLEAN] voted?

The VICE PRESIDENT. He has not.

Mr. MYERS. I transfer my pair with that Senator to the Senator from Maryland [Mr. LEE] and allow my vote to stand.

Mr. OVERMAN. I am paired with the junior Senator from Wyoming [Mr. WARREN]. I transfer my pair to the junior Senator from Louisiana [Mr. BROUSSARD] and vote "yea."

Mr. CHILTON. I am paired with the Senator from New Mexico [Mr. FALL], but if present he would vote as I am about to do. I vote "yea."

Mr. GALLINGER (after having voted in the affirmative). I have voted, but I have a pair with the senior Senator from New York [Mr. O'GORMAN], who is absent. I transfer that pair to the Senator from Idaho [Mr. BRADY] and allow my vote to stand.

Mr. DILLINGHAM. Owing to the absence of the senior Senator from Maryland [Mr. SMITH], with whom I have a pair, I withhold my vote.

Mr. WEEKS. I have a general pair with the senior Senator from Kentucky [Mr. JAMES]. In the absence of that Senator I withhold my vote.

Mr. CHILTON. I wish to announce the absence of my colleague [Mr. GOFF] on account of illness, and also the unavoidable absence of the senior Senator from Indiana [Mr. KERN].

Mr. OWEN. I wish to ask if the Senator from New Mexico [Mr. CATRON] has voted?

The VICE PRESIDENT. He has not.

Mr. OWEN. I withhold my vote.

Mr. UNDERWOOD (after having voted in the affirmative). I am paired with the junior Senator from Ohio [Mr. HARDING]. I transfer that pair to the senior Senator from Virginia [Mr. MARTIN] and allow my vote to stand.

Mr. MARTINE of New Jersey. I wish to announce the absence of the Senator from Oregon [Mr. CHAMBERLAIN] on official business.

Mr. OWEN. I transfer my pair with the Senator from New Mexico [Mr. CATRON] to my colleague [Mr. GORE] and vote "yea."

Mr. SHERMAN (after having voted in the negative). I wish to inquire if the Senator from Kansas [Mr. THOMPSON] has voted?

The VICE PRESIDENT. He has not.

Mr. SHERMAN. I have a pair with that Senator and withdraw my vote.

Mr. TILLMAN. I am paired with the Senator from West Virginia [Mr. GOFF] and withhold my vote.

Mr. GALLINGER. I have been requested to announce the following pairs:

The Senator from Maine [Mr. BURLEIGH] with the Senator from Arkansas [Mr. ROBINSON];

The Senator from Kansas [Mr. CURTIS] with the Senator from Georgia [Mr. HARDWICK];

The Senator from Delaware [Mr. DU PONT] with the Senator from Kentucky [Mr. BECKHAM];

The Senator from North Dakota [Mr. GRONNA] with the Senator from Maine [Mr. JOHNSON];

The Senator from Pennsylvania [Mr. OLIVER] with the Senator from Oregon [Mr. CHAMBERLAIN]; and

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Florida [Mr. BRYAN].

The yeas and nays resulted—yeas 34, nays 14, as follows:

YEAS—34.

Bankhead	Hitchcock	Overman	Sheppard
Brandegee	Hollis	Owen	Simmons
Chilton	Hughes	Phelan	Smith, Ga.
Clapp	Jones	Pittman	Stone
Clark, Wyo.	Lea, Tenn.	Poindexter	Underwood
Clarke, Ark.	Lodge	Ransdell	Vardaman
Culberson	Martine, N. J.	Reed	Williams
Fletcher	Myers	Saulsbury	
Gallinger	Nelson	Shafroth	

NAYS—14.

Ashurst	La Follette	Smoot	Wadsworth
Husting	Norris	Sterling	Works
Johnson, S. Dak.	Page	Sutherland	
Kenyon	Pomerene	Taggart	

NOT VOTING—48.

Beckham	du Pont	Lewis	Smith, Ariz.
Borah	Fall	Lippitt	Smith, Md.
Brady	Goff	McCumber	Smith, Mich.
Broussard	Gore	McLean	Smith, S. C.
Bryan	Gronna	Martin, Va.	Swanson
Burleigh	Harding	Newlands	Thomas
Catron	Hardwick	O'Gorman	Thompson
Chamberlain	James	Oliver	Tillman
Colt	Johnson, Me.	Penrose	Townsend
Cummins	Kern	Robinson	Walsh
Curtis	Lane	Sherman	Warren
Dillingham	Lee, Md.	Shields	Weeks

The VICE PRESIDENT. The Senator from Illinois [Mr. SHERMAN] and the Senator from South Carolina [Mr. TILLMAN] are present in the Chamber, and if voting in the negative would not change the result. So the Chair declares the amendment of the committee carried. The next amendment of the committee will be stated.

Mr. CLARKE of Arkansas. We passed over the amendment embraced in lines 4, 5, 6, and 7, on page 11, to await the presence of the Senator from Delaware [Mr. SAULSBURY]. I ask that that amendment may be taken up.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. The committee reports to insert, after line 3, on page 7, the following:

Maintenance and repair of the Government iron pier, Harbor of Lewes, Del., hereafter, under regulations prescribed by the Secretary of War, to be opened to public use, $10,000.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

Mr. SMOOT. Mr. President, this is one of the items in the bill that I think, if we take the record into consideration, there is no justification for. I wish to call the attention of the Senate to a few of the things that I find in the report as given by the engineers and found in the committee report. Speaking of previous projects, it says:

A wooden-pile landing pier, about 1,200 feet long and 20 feet wide, terminating in 8 feet of water at the pierhead, was constructed in 1837 (act of Mar. 3, 1837), for use of vessels in communicating with the shore, so that provisions and supplies could be obtained, and also to give access to lines of travel and afford mail accommodations. This structure was guarded by a series of six ice-breaker piers on the seaward side and a like series on the inner side, placed 100 to 150 feet apart at distances of 75 feet from the landing pier. This structure cost about $60,000, and endured about 12 years. Its failure was caused by a vessel which broke through it after the piles had been honeycombed by boring worms. For scope of previous projects, see Appendix, page 1783.

Present project: The river and harbor act of July 15, 1870, adopted a project and appropriated $225,000 for the construction of "a good and substantial pier of stone or iron in the Delaware Bay, at or near Lewes, in Sussex County, in the State of Delaware," for the benefit of commerce that was expected to develop at this locality, but which has failed to materialize.

Operations and results prior to the fiscal year: Work was commenced April 15, 1871, and completed in 1882, except as to superstructure, at a cost of $353,546.41, and resulted in the construction of 1,155 linear feet of pier having a width of 21 feet, and 546 linear feet having a width of 42 feet, or a total length of 1,701 feet, with a depth of water at the pierhead of about 21 feet at mean low water. At the date of completion of the substructure, the superstructure of the inner section, which had been completed in accordance with the original plan, required complete rebuilding on account of decay. Between 1882 and June 30, 1890, the work was directed toward maintenance and practically carried to completion the superstructure of the pier. The amount expended for maintenance of the pier since completion is $34,292.99, making a total of $387,839.40 expended on the work up to the close of the previous fiscal year. The Junction & Breakwater Railroad, since absorbed by the Pennsylvania Railroad Co., was authorized by the act of July 15, 1870, to extend their railway upon and over the said pier, but this right has never been, and doubtless never will be, exercised, as the pier is not sufficiently strong to support the weight of a modern locomotive. The sundry civil act of March 3, 1891, authorized the Marine Hospital Service to occupy a portion of the pier.

The engineers proceed to tell us what the effect of the improvement has been. They say:

Effect of improvement: The pier has never been used to any extent for the interchange of commerce. It has been used occasionally as a landing place for vessels reporting at Lewes. The United States Lighthouse Establishment uses the pier as a place for the storage of buoys, the United States Life-Saving Service has a boathouse at a point about midway of the pier, and the United States Quarantine Service uses it occasionally for landing passengers. The pier was also used to some extent by the Engineer Department during the construction of the harbor of refuge in Delaware Bay from 1897 to 1901, but has not been used by this department to any extent since that time.

Mr. President, there was no appropriation made for this improvement for the years 1913, 1914, and 1915. When lump-sum appropriations were made in the last two river and harbor bills, and the division of that money was left in the hands of the Army engineers, not one cent was appropriated for this pier; in other words, for the last five fiscal years there has been nothing appropriated for this pier. The last appropriation made for its improvement was on February 27, 1911, and there was a thousand dollars appropriated at that time to make some repairs upon the pier.

There are no commercial statistics given by the engineers, and I suppose there is no commerce affected by it. I judge so from the report made by the engineers themselves.

Therefore, Mr. President, it seems to me that this proposed appropriation would be an absolute waste of money. While the Government of the United States has already spent upon this pier $387,839.40, I believe the first loss is the best loss, and that we might just as well take that loss now and put no more money into this pier, which does not in any way benefit commerce, so far as I can see from any report which I have examined.

Mr. President, it is just such items as this, it seems to me, that ought to be stricken from the bill. This whole question was considered by the other House, and the House did not appropriate a dollar for this pier. It was considered by the committee in the House and they refused to insert an appropriation for it. When we consider the other items in this bill that were inserted by the House committee, items that ought never to be in a river and harbor appropriation bill, it seems to me that it is absolutely inexcusable to have this item included in the bill and the amount appropriated.

Mr. President, I expect the Senator from Delaware [Mr. SAULSBURY] to give his reasons why this item should be in the bill, but as soon as those reasons are given I hope that the Senate will vote to disagree to the amendment reported by the committee of the Senate.

Mr. SAULSBURY. Mr. President, the statement of the Senator from Utah [Mr. SMOOT] shows how true is the saying that a little knowledge is a dangerous thing. The distinguished Senator from Utah has taken a bit from the report of the committee, which shows quite a different state of facts, as he interprets that report, from the facts which anyone familiar with the ground and anyone familiar with the reports in the Engineer's Office of the War Department, from which I have to-day come, would consider the real condition.

I do not want this Congress to appropriate a single dollar for any purpose in the State which I in part represent unless such appropriation addresses itself to the good judgment of the Members of this body. The Senate, I think, will hear a considerable amount more about the harbor at Lewes, Del., before this session terminates than it has heretofore, and I shall hope to make Congress somewhat familiar with the conditions.

The harbor of Lewes, Del., is a fine harbor, 120 miles from New York, 114 miles from the Capes of the Chesapeake, 101 miles from the city of Philadelphia, a little over 100 miles from this city—possibly it may be as far as 150 miles. That harbor is absolutely without any defenses, though it is known by the War Department, from official reports in its possession, to be the most vulnerable portion of our Atlantic seaboard. The War College have recommended, in a letter to the Military Committee of this body, the fortification of that harbor, and for a long period of time this Government has made improvements in that harbor, chiefly as a harbor of refuge for vessels engaged in the Atlantic seaboard trade, this being the only harbor between New York and the Capes of the Chesapeake which can be so used. The Government has spent at that point, in making that harbor of refuge, over two and one-quarter million dollars, as is shown by the schedule of expenditures at page 11 of the schedule which the committee submits.

This iron pier, which is in this harbor of refuge and which was built for the purpose of being used in the interchange of commerce at that point between boats and the shore, was built at an original expense of about $360,000, as I remember it, and the cost of maintenance brings the whole amount up to $387,839.

From the report from which the Senator from Utah read it would seem that there is no commerce in the port of Lewes. As a matter of fact there are several piers there, which have been erected by private parties and by subscription, where boats do land. There had been a large trade at Lewes, to my personal knowledge, until the small railroad referred to in this report as the Junction & Breakwater Road was purchased by the Penn-

sylvania Railroad Co. and added to its system. Then, after having purchased the railroad from the Old Dominion Steamship Co., the boats to New York, which ran daily, were discontinued, and the trade and traffic of that whole southern peninsula was diverted over the rails to Philadelphia and to New York rather than making the short trip by water from this point.

There have been from time to time lines of steamships plying to this port from Philadelphia, as well as from New York, but the superstructure of this pier has been allowed to fall into decay, simply because the people there could not use it, or they believed that they could not use it. So far as the development of commerce over that pier is concerned, the statement made in this report which the Senator from Utah read would remind me of a man who built a house and then walled up all the doors and windows with masonry, and when the roof had rotted off said it was not worth while to renew the roof because the house had never been used. That is practically the condition into which that pier has fallen at Lewes. When it was completed in the eighties and the request was made to use it for railroad purposes, for the interchange of traffic, it was found that the superstructure was too light to sustain the weight of a locomotive, and it is to-day too light to sustain the weight of a locomotive; but that does not mean that that pier can not be used for the interchange of ordinary traffic through light shifting engines or something of that kind.

Here is $380,000 worth of Government property which could be used by people who want to use it. They never have had the right to use it, as they supposed, and I can not find that any regulations have ever been promulgated for the use of that pier. The pier has just been allowed to go to pieces, so far as the superstructure is concerned, and that superstructure has now rotted.

Mr. KENYON and Mr. GALLINGER addressed the Chair.

Mr. SAULSBURY. I yield to the Senator from Iowa, who first rose, I think.

Mr. KENYON. I will yield to the Senator from New Hampshire.

Mr. GALLINGER. Mr. President, the inquiry I wish to make is this: Is it contemplated by this appropriation to strengthen the pier so that a modern locomotive could pass over it?

Mr. SAULSBURY. I do not think the $10,000 will place the pier in that condition. I think the $10,000 will renew the superstructure so that it can be used for ordinary traffic purposes, but not for trains.

Mr. KENYON. Mr. President——

Mr. SAULSBURY. I yield to the Senator from Iowa.

Mr. KENYON. I should like to inquire of the Senator why the pier has never been used? I have not heard any explanation of that.

Mr. SAULSBURY. The reason the pier has never been used, as I am informed, is that the people there have never thought they had the right to use it.

Mr. KENYON. Why have they thought that they did not have the right to use it?

Mr. SAULSBURY. Because, for example, here is a statement which I see in the report of the committee to the effect that an amendment was placed on the sundry civil bill authorizing the Marine Hospital Service to use the pier. I do not know whether they would have been permitted to use it or not; but this morning I stopped at the War Department and in talking with Col. Taylor in regard to it he said that they could have used it if they had asked permission to use it. Now they are asking permission to use it. I do not know how many times they have asked it heretofore, or whether they have ever done so, but evidently the pier has not for years been in a condition to be used.

Mr. KENYON. We have spent $387,000 on the pier, and that did not put it in condition for use.

Mr. NELSON. Mr. President, will the Senator from Delaware allow me?

Mr. SAULSBURY. Certainly.

Mr. NELSON. I want to suggest to the Senator this fact—and I think it ought to be decisive of the case—that the Government has spent over $350,000 in the construction of this pier, and it is now a question of whether the pier should be preserved or go to decay and destruction. I read from the report of the Chief of Engineers as follows:

> It will require the expenditure of about $10,000 to place the pier in a reasonable state of repair.

We have invested a large sum of money in that pier, and it would be a shame if, for the lack of $10,000, we allowed it to go to decay and destruction. The previous expenditure would be an absolute waste. Waiving all other considerations, I think this is perfectly decisive of the case.

Mr. SAULSBURY. I thank the Senator. I was going to call attention to that recommendation.

Mr. SMOOT. Let me read the complete sentence from the report to which the Senator from Minnesota has just called the attention of the Senate. The engineers say:

> It will require the expenditure of about $10,000 to place the pier in a reasonable state of repair, but for the reason that the pier is used so little no work of maintenance is proposed at this time.

That is the complete recommendation of the Army engineers.

Mr. SAULSBURY. Mr. President, I will call the attention of the Senator in a moment to what is the very latest recommendation of the Army engineers with regard to this pier. I was trying to get along toward that. I have read the reports of the Army engineers in regard to this pier and also the correspondence which I have had with a former Chief of Engineers. They seemed to be without information or, at least, unable to arrive at any recommendation regarding this pier.

I propose, Mr. President, to ask the Senate to increase this amount from $10,000 to $78,000, in accordance with the recommendation which is now just being printed and which I have seen this morning at the War Department. The Chief of Engineers, Gen. Black, who is probably well known to all of us, makes that recommendation in connection with various uses that the Government can make of the pier; and I should like, if the Senate can place such an amendment to this bill, to have that done for the purpose of referring this amendment to the conference committee when it is appointed, and let them determine this whole matter as to whether they would follow the recommendation of the War Department, which will be available to every Member of the Senate in the course of a day or two. I have merely seen the proof sheets of this recommendation.

I want to say, Mr. President, that, in my judgment, it is very important that that particular portion of our seaboard shall be carefully looked after, if we are going to have any real preparedness and any real defense along sensible and coherent lines of our eastern seaboard. That particular point, as I have said, is declared in official reports to the War Department to be the most vulnerable point on the Atlantic seaboard, and the report now in hand and approved by the Chief of Engineers declares that this pier should be placed in a condition of good repair, at an expenditure of $78,000, for the uses of the War Department. I have just read that report, and I have made a memorandum of it, and I may have in the course of a half hour or so a copy of that report, which is only in the proof sheets, as I have said.

The other day, when I had a few words to say on this subject in reply to the Senator from Iowa, the official report made me say that I knew my way to the Willard Hotel. I do not know that that will be particularly charming to some of my prohibition friends in my State; but what I said was that I personally knew this location as well as I know my way from this Capitol up Pennsylvania Avenue to the Willard Hotel.

The idea that there is no commerce in that harbor is entirely wrong. There are two piers within a few hundred feet of this Government pier used by commercial houses and fish-fertilizer factories, and there are other piers which also exist there.

Mr. CLARKE of Arkansas. Mr. President, will the Senator from Delaware permit me to say that the representation made to the Committee on Commerce which was most influential in causing that committee to include this item in the bill was that a certain canal was about completed to divert commerce to the point at which this pier is located. It was originally built to accommodate certain railroad terminals in connection with shipping which assembled at that point, but the railroad company thought proper to move their terminals to another point, which, in a way, caused this pier to fall into disuse. If it were not for the showing made that commerce would seek that point by reason of the completion of the canal, with the name of which the Senator from Delaware is perfectly familiar, the committee would not have given the item the attention they did. They believe it meritorious and think the amendment ought to be made.

Mr. SAULSBURY. Precisely; and at that time, Mr. President, I may say that I did not know that this recommendation would be coming in from the War Department. I knew that it ought to come in; I knew that this vast amount of Government property at that point would be useless for commerce; I knew that the pier would be of very great advantage, but I could not find any justification myself for asking for an appropriation of that kind unless it had been considered. Now, I hope, Mr. President——

Mr. SMOOT. Mr. President, will the Senator allow me to interrupt him?

Mr. SAULSBURY. Yes.

Mr. SMOOT. Can the Senator state what has happened between the time of the report of the Army engineers in 1915 and the report to which the Senator now refers as having been made by the Army engineers upon the same project? Has anything happened to change the opinion of the engineers?

Mr. SAULSBURY. Mr. President, I can not answer that fully. I can guess as to some matters which have happened to change the condition. It was a surprise to me to find this report ready to be presented, and a copy of the rough proof has been given to the House committee, and I have been hoping that that would be delivered at my desk so that I could inform the Senate more fully. But this is one thing that has happened:

A bill has been introduced and has been referred to the Military Affairs Committee of this body, authorizing an appropriation for the purpose of defending this harbor, and if this harbor is defended this pier will be of very great use to the War Department. The War Department has recommended that this harbor be defended. The matter is now in the hands of the Military Affairs Committee of this body, which increased the amount asked for for the defense of the harbor, a bill concerning which I introduced, and asked for $480,000. The War Department recommend that $700,000 be appropriated, and they say they have the guns which they could put at this point, and they hope the harbor will be defended.

That is one of the things that has happened. It is merely a fuller understanding that has come to the War Department regarding this particular locality, more than the trifling questions of who has used this particular pier and how much it has been used. I do not think I would be justified in asking the Senate to do this as a positive and conclusive matter at this stage, but I suggest to the chairman of the Commerce Committee and to the Senate that I would very much like the Senate to change this amendment to read $78,000 instead of $10,000, and let the conferees have the benefit of all the information that can come to them from the War Department in regard to this matter, stating that I am entirely satisfied with any result that they may reach.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER (Mr. PHELAN in the chair). Does the Senator from Delaware yield to the Senator from Colorado?

Mr. SAULSBURY. Gladly.

Mr. THOMAS. I should like to inquire of the Senator, who has referrred to that project as one which the War Department is considering in connection with the subject of preparedness, what the high-water and low-water depth of the harbor is?

Mr. SAULSBURY. The harbor would hold a fleet of warships. I suppose the depth of water in the harbor runs possibly as high as 100 feet. I do not undertake to state accurately.

Mr. THOMAS. Is that true with regard to the end of the pier?

Mr. SAULSBURY. I think the reports show that the water at the pier has a depth of 21 feet.

Mr. President, under such conditions as these, I sincerely hope the Senate will agree to increase the amount of the amendment. My original amendment was for $75,000, which I put in my proposal because of letters which I had from the former Chief of Engineers, Gen. Kingman. That, on the basis of the report made to the Board of Engineers, was reduced to $10,000, which, in view of the report, was reasonable. But, from the information that I give the Senate to-day, it seems to me that the request I make is reasonable, to increase the amount to $78,000.

As I say, I merely wish the matter to be properly considered by the committees of the two Houses when they meet in conference on this bill; and if there is not a dollar appropriated for this project after they have duly considered it, I shall not be dissatisfied. I do not want a single dollar appropriated for anything which is going to be wasted.

Mr. STERLING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Delaware yield to the Senator from South Dakota?

Mr. SAULSBURY. I yield.

Mr. STERLING. Do I understand the Senator from Delaware to say that the report in course of preparation by the War Department has reference to this particular pier?

Mr. SAULSBURY. Yes.

Mr. STERLING. I confess that in view of the report of the committee, which I understand is based upon the report of the Board of Army Engineers, I was not very favorably impressed with this appropriation, because the report is to the effect that "it will require the expenditure of about $10,000 to place the pier in a reasonable state of repair, but for the reason that the pier is used so little no work of maintenance is proposed at this time." Yet, in view of what the Senator from Delaware says in regard to the recommendation to be made by the War Department, I for one should like to consider that recommendation. I thought it might be proper to suggest to the chairman of the committee that this proposed amendment be passed over for the time, until that recommendation can be laid before the Senate, as I understand the Senator from Delaware to say that it will be here before long.

Mr. CLARKE of Arkansas. Mr. President, it is not at all necessary that the amount carried by the item shall be increased to $78,000 in order to give the conference committee jurisdiction of it. The adoption of the amendment in the present form would carry the matter before the conference committee, and that conference committee can either increase or diminish the amount or leave it out, just accordingly as the showing then made will justify its action. It is not at all necessary that it shall be increased at this time in order that the conference committee may have jurisdiction of the matter.

Mr. GALLINGER. Mr. President, inasmuch as there is no appropriation for this purpose in the bill as it comes to us, and we have placed $10,000 in the bill, does the Senator think that the conference committee could increase that amount?

Mr. CLARKE of Arkansas. If the House should insist upon the Senate amendment with an increase of it, I think we would have that right; yes. We probably would not have the right to originate an increase of the amount.

Mr. GALLINGER. I have had a contrary opinion, but perhaps I am wrong.

Mr. CLARKE of Arkansas. The Senator has an idea that the House could not insist upon the increase?

Mr. GALLINGER. My notion has been that the only thing the House could do would be to consider the difference between the amount of the House and the amount of the Senate.

Mr. CLARKE of Arkansas. It is not a House item. It is a new item added in the Senate. It has never been before the House. It is not in the House bill.

Mr. GALLINGER. I have not thought it could be increased, but I may be wrong.

Mr. SAULSBURY. That was my idea.

Mr. GALLINGER. I was about to suggest to the Senator from Delaware precisely what the Senator from South Dakota has suggested—that I apprehend, from appearances, that we are not going to pass this bill to-day, and why not let this item be passed over, with a view to receiving the report to which the Senator calls attention?

Mr. SAULSBURY. That would be most agreeable to me.

Mr. CLARKE of Arkansas. Oh, yes; that is all right.

Mr. SAULSBURY. I shall be very glad to have that done, and I expect that report to be on my desk at any moment.

Mr. CLARKE of Arkansas. Very well.

The PRESIDING OFFICER. Without objection, the item will be passed over.

The next amendment was, on page 25, line 8, after the word "maintenance," to strike out "$30,500" and insert "and for preventing cut-off at De Valls Bluff, in accordance with House Document No. 1259, Sixty-second Congress, third session, $30,700. In addition thereto the sum of $8,000, appropriated by the river and harbor act approved March 4, 1914, is made available unconditionally," so as to make the clause read:

White River, Ark.: For maintenance, and for preventing cut-off at De Valls Bluff, in accordance with House Document No. 1259, Sixty-second Congress, third session, $30,700. In addition thereto the sum of $8,000, appropriated by the river and harbor act approved March 4, 1914, is made available unconditionally.

The amendment was agreed to.

The next amendment was, on page 25, line 15, to strike out "Cache River, Ark.: For maintenance, $3,000," and insert:

Cache River, in Arkansas: That the Cache River in the State of Arkansas be, and the same is hereby, declared to be a nonnavigable stream within the meaning of the Constitution and laws of the United States. This provision shall become void after one year from the date of the approval of this act unless within said period the Legislature of Arkansas shall pass an act expressly approving this declaration. The right of the Congress to alter, amend, or repeal this paragraph is hereby expressly reserved.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

Mr. NORRIS. Mr. President, this amendment seems to be a departure. I should like to have the chairman of the committee, or some other member of the committee, explain why line 15 is stricken out and the amendment proposed inserted?

Mr. CLARKE of Arkansas. Mr. President, the principal reason for it is that the Cache River is not much of a river. On page 286 of the report, it says:

The river is not navigable at low water, the controlling channel depths over the shoals being from 6 to 8 inches. The total expenditure for maintenance under the present project to June 30, 1915, is $27,419.58.

This is a river wholly within the State of Arkansas, if it can be called a river at all. It is a very shallow and tortuous stream, probably 150 miles in length. It runs from northeast to southwest. The levees on the White River, into which it empties, coming in the direction I indicate, have been put up to an extent that keeps out of the river a certain amount of water that formerly went into it. It never was a navigable stream in the sense that it was regularly navigated by any craft. For a time there was considerable timber found upon its banks. The land has now become valuable for farming. As long as it is nominally or technically navigable, the bridges constructed across it must be swing bridges, or such bridges as can be opened to permit boats to pass through. Those bridges cost a vast amount of money. They are wholly useless there. The citizenship in that locality are unanimously in favor of doing away with the technical navigability of the river, when it is not navigable, as a matter of fact.

This amendment, however, does not assume to dispose of that matter finally. It gives the consent of the National Government to the declaration of nonnavigability, provided the Arkansas Legislature at its next session ratifies that consent. It did that for the purpose of giving the persons interested in the matter generally an opportunity to apply to a local tribunal for the purpose of having their protests, if there be any, heard and disposed of. We went further than that, and included a provision that "the right of the Congress to alter, amend, or repeal this paragraph is hereby expressly reserved," so that if at any time it might become important that the legal navigability of the river should be restored, the right to do so should be reserved.

Mr. NORRIS. Mr. President, I am not, of course, opposed to the amendment. I do not understand why the limitation should be put on; but, at least, the amendment, it seems to me, ought to appeal to those who are opposing—as, to a limited extent, I have—some of the provisions of this and other river and harbor bills. But I wanted to call attention to it, because it seems to me that it illustrates a practice that has been pursued by Congress in the past, and is still pursued in this bill, of using Federal funds for the purpose of improving rivers that, as a matter of fact, are not navigable and for practical purposes can not be made navigable; and that, in the end, does not bring any good returns to the localities in which the streams are located.

Here is a stream for which Congress has in the past appropriated a great deal of money, comparatively speaking. I notice from the report that back as far as 1894 provision was made in the river and harbor bill for the improvement of this river. I judge from what the chairman of the committee says, together with what I learn from the report, that the country through which the river ran was not then settled. It was perhaps a timbered country, and they were getting saw logs out of the country and settling it up. Now, as the chairman says, the country has been settled up; and since Congress has been improving the river for navigation, it follows that when the settlers in the community want to build a bridge across this river they have to come to Congress to get consent. So they prefer, I presume, to have Congress declare that this river is nonnavigable—something that, I presume, is apparent to anybody who will look at it—and thus enable them to build bridges, when the country settles up, for the purpose of travel and of commerce.

I believe there are a good many other streams where Congress has been doing the same kind of work, where money is appropriated and streams developed when there is nothing there but forest, and we spend a great deal of the Federal funds for the purpose of improving streams on which the commerce is continually declining.

Here is a stream that from the report of the committee itself we find is not in fact navigable, although we have been appropriating money to improve it ever since 1894, the controlling depths over the shoals at low water being from 6 to 8 inches. So that since 1894 we have been digging and snagging and spending money in this stream, and after all these years we have from 6 to 8 inches of water in it.

Mr. KENYON. Mr. President——

Mr. NORRIS. I yield to the Senator from Iowa.

Mr. KENYON. I will inquire of the Senator if he knows the depth of the stream before we commenced doing all this work—whether the work has deepened it or not?

Mr. NORRIS. I am not informed as to that, but it would be interesting to know whether there was at low water more than 6 or 8 inches of water in 1894.

The total expenditure for maintenance under the present project to June 30, 1915, is $27,419.58. To-day we had the case of a pier that was not much used, and the argument was made that we had spent such a vast amount of money there that now we certainly could not quit. Here would be another instance, if the committee were inclined to take that view of it; and I presume they would if it were not for the fact that the people living along the stream, the farmers, who want to build some bridges across this little creek, are opposed to having it developed any further on a scheme of navigation. So they say: "If we want to put a couple of logs across this stream of water and put down some planks, so that we can drive across it, we do not want to go to Congress to get that permission, as we will have to do as long as it is in theory a navigable stream of water."

I presume, although there is nothing here to show it, that the bed of the creek is quicksand, or something of that kind, because if it were not something like that they would not need a bridge. They could drive across it; and, in fact, if the bottom were solid, it would be a good place, unless the water goes down lower than the report shows, to wet up the horses' hoofs and to swell the fellies on the wagon wheels so that the tires would not come off. So I take it, since they want to bridge this stream and only have 6 inches of water to begin with, that it is a dangerous stream to ford. With all this improvement that Congress has made during all these years, it seems to me that the engineers, if they had had their eyes open to their duty and had done it properly, might have built fords at various places with this money and put in stone and gravel, so that the farmers of the community could have forded the stream, rather than to go to the expense, since lumber is so high, of building bridges.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Mississippi?

Mr. VARDAMAN. I ask the Senator from Nebraska is he opposed to this amendment?

Mr. NORRIS. I said I was not. I am trying to offer words of praise to the committee for the recommendation they have made to abandon this stream.

Mr. VARDAMAN. It seems that I was not present when the Senator expressed his approval of the action of the committee. Judging from what the Senator has said since I entered the Chamber, it is a question of the committee, in the Senator's estimation, of being "damned if you do and damned if you don't." The committee is trying to stop an outlay of money, which the Senator condemns. It is receiving at his hands no very kindly censure for what, it seems, he approves.

Mr. NORRIS. The Senator does not exercise his usual shrewd perception, or he would discover from the very able argument that I am making that I have been condemning what has been going on in the past and finding fault, perhaps, because the same favorable recommendation in regard to this stream is not made in reference to some other streams that are in the bill.

Mr. VARDAMAN. The Senator does not hope to accomplish any special good by dwelling upon what has happened and the mistakes Congress has made in the past, for which this Congress is in no way responsible?

Mr. NORRIS. Yes; the Senator hopes to be able to do that, and I presume after I have finished my argument all these other bad creeks and mud holes in this bill will immediately by unanimous consent be stricken out of the bill, because I will illustrate what happened in these streams when we, for 10, 15, or 20 years, continued to appropriate money, and they are condemned in the end by the local community, who, I presume, originally were anxious to have Federal money expended in their immediate vicinity.

Mr. VARDAMAN. I do not think it sounds very well for the Senator to impute to Representatives in Congress the motives which he has imputed to the men who constructed this bill. I trust the Senator does not maintain that he has a corner on all the political morality and all the wisdom that is possessed by this body. The Senators and Representatives who have constructed this bill are charged with the same duties to the public, inspired, I apprehend, I am willing to concede to them, by the same patriotic motives that inspire the Senator from Nebraska in the performance of his duty, and I do not think it is in good form that the Senator should impute to his colleagues motives of that character.

Mr. NORRIS. Mr. President, I have not been aware that I have imputed any dishonorable motives to the committee or to my colleagues. If it be true that in this bill or any other a committee, after it has made a favorable report——

Mr. CLARKE of Arkansas. Mr. President, will the Senator yield?

Mr. NORRIS. In just a moment I will yield to the Senator. If it be true that in that case, when anyone opposes what has been done in the past and uses a very apt illustration before the Senate to show that the same procedure ought to be extended to other cases, he is guilty of discourtesy, then it must follow that when a bill is reported here by a committee it be-

comes the duty of every Member of the Senate to stand by it or else he might be liable to the charge that he is impugning somebody's motives. I yield to the Senator from Arkansas.

Mr. CLARKE of Arkansas. I fear that I shall not be able to interest the Senator as I thought I might a moment ago. I wanted to exonerate him from any charge of making an unfair reflection upon the committee. I am sure he did not do it. I think he is just exercising his privilege, as he has a right to do, just as any orator from the Platte might do. That river is said to be 900 miles long, 200 feet wide, and 6 inches deep. Generally orators coming from that section assimilate their remarks somewhat to the aqueous example which confronts them.

Mr. VARDAMAN. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. VARDAMAN. If the Senator's remarks go to prove that these appropriations were made for improvements in the rivers in order that the money might be expended in the communities in which the rivers happened to be located, it is, I submit, an implied charge of infidelity to duty, and I can scarcely conceive that a man who has any right to occupy a place on this floor would vote for any such measure or prostitute the functions of his place for such a purpose.

Mr. NORRIS. I agree with the Senator. I can not conceive that anyone would do that. I have not said that anyone would.

Mr. President, I presume there is not a stream or a harbor in this bill where provision is made for the expenditure of public money in its improvement but that has almost the unanimous support of the local community, and they are anxious to have streams in their community improved. They are anxious to have public money expended in their vicinity. I am not saying that that is a dishonorable feeling to have; I am not going to be kept from voting for a provision or for a bill because any Senator, even though I respect him as highly as I do the Senator from Mississippi, tries to say that because I am opposed to a practice that has gone on in the past, and I am illustrating it by actual facts that the committee admits to be true. I am not going to be bound, even though I incur the censure of all the friends I have here or elsewhere. I take it I am within my province when I direct the attention of the Senate to the fact that here is a stream that we have been appropriating money for since 1894 that now is abandoned by the committee. I commend them for abandoning it, but I call attention to the fact that the same thing that has been done during all these years with regard to this stream is being done now with regard to other streams that are contained in this bill.

Mr. VARDAMAN. Mr. President——

Mr. NORRIS. I yield to the Senator from Mississippi.

Mr. VARDAMAN. I am sure I would not in any way proscribe or circumscribe the Senator's conduct in this Chamber. I am sure the Senator is going to vote for the things that his judgment and his conscience approve, and I would not have the great admiration for him that I now have if I did not believe he was going to oppose the things that he believes to be wrong and favor the things he believes to be right. It is proper for him to do that and I honor him for it; but he can do that, he can exercise untrammeled his judgment, without imputing improper motives to others.

So far as the communities or the localities taking great interest in the development of their waterways, that is perfectly natural. I do not know what the people of California or Oregon need in their waterways. I have not had the pleasure of visiting that favored part of our country and, of course, neither I nor my constituents have an intelligent personal interest in it. It is that spirit of altruistic selfishness which moves all patriotic men in the performance of a duty like that, and it is perfectly proper. If they did not present their enterprises to the Congress and give the Congress information regarding them of course nobody else would. I commend them for doing that. It is prudent; it is proper that they should. But because it is to their interest, because they may reap some pecuniary advantage from it, I am not going to say that the motives behind it or that move them are not proper or that they are for the purpose of plundering the Treasury.

Mr. NORRIS. Neither am I, Mr. President. I am not only not going to do that but I have not done it as a fact in the past. I believe in the brief time I have been a Member of this body I have been as free from impugning motives as anyone; and never before to my knowledge has anybody intimated that I was impugning a motive to somebody else that was not proper.

But because those people favor the development of streams that in my judgment ought not to be developed, because they favor the improvement of streams that I believe are nothing more than ordinary creeks, some of them hardly entitled to that designation, I know no reason why I should favor them because some one else who lives in the community does favor them. If that is the duty of a Member of Congress, then we might just as well abandon Congress and let the local communities send in a statement as to how much they want for every stream and every harbor, and put it in the bill. I am not finding fault with the man who defends it; I am not questioning his honesty, and he is entitled to the same privilege to defend them and to show that they are good as I am to show that they are bad, but if I believe they are bad I am going to say so.

Now, Mr. President, on this improvement the report says, referring to the expenditure of $27,419.58 during the past year on this stream:

> This improvement has no effect on freight rates. The benefit is confined to that of giving outlet for its timber to an isolated, limited territory. * * * Practically all commerce is confined to forest products, less than 1 per cent originating agriculturally or otherwise, and 82 per cent consisting of rafted saw logs.

Mr. President, if this stream or any other stream must be developed by Federal funds under the clause of the Constitution that provides for navigation, in order to let local parties float saw logs down the stream, then this appropriation is justifiable; otherwise it is not. I take it the committee feel that they were not justifiable in expending public funds for that purpose, and they have abandoned it in this particular case.

Mr. LANE. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. LANE. I think it is just as important to the community, if their main product is saw logs, to get them to market as any other community has to get its products to market.

Mr. NORRIS. What product?

Mr. LANE. Saw logs. It is just as important to the community that they should get that main product and that resource, if it is lumber and saw logs, to market as it is to another community to get potatoes, cotton, wheat, or anything else to market.

Mr. NORRIS. Yes.

Mr. LANE. Of course it is.

Mr. NORRIS. But does the Senator believe it is necessary to develop our rivers and streams in order to float saw logs down the streams?

Mr. LANE. It is just as important as it would be to transport wheat, corn, cattle, potatoes, or anything else, if that is the main product of that section of the country.

Mr. NORRIS. If the Senator thinks that way—that they are justifiable, as I said awhile ago, in developing streams, digging out the channel in order that people living along the banks may float saw logs down those streams——

Mr. LANE. Yes; if that is the only way you can get the saw logs to market and the country is heavily timbered, as it is out on the Pacific coast. That is their principal asset, and it is our duty to help them just as much as it is your duty to open a river for any other purpose of navigation.

Mr. NORRIS. Now, the Senator feeling that way, he is perfectly justified, if he believes that we ought to develop these streams for the purpose, in voting for an appropriation of this kind. I do not believe it myself.

Mr. LANE. I do not see wherein the distinction is made or why you should make a classification which eliminates important products from getting an outlet. It should apply to anything that is useful. People use lumber. They have to build houses. They can not eat it, to be sure; neither can they eat cotton and a hundred other things that go to market. You can not justly make such a distinction.

Mr. KENYON. Mr. President——

Mr. NORRIS. Just a moment, and then I will yield to the Senator from Iowa. In my judgment, we have no right to expend—perhaps I ought to modify that; we have a right, but we are not justified in expending public funds for the purpose of digging channels in order that people may float saw logs down the channel; neither are we justified in digging channels to float corn or oats or people down. It is a matter of commerce that we ought to develop. There should be a stream developed where commerce will go up the stream and down the stream, something that will carry produce. In other words, we are confining it in this case to one product. If we had a stream that we could develop by improvement so that boats could go up and down and carry the commerce of the country up and down, saw logs could float down. There is no objection to saw logs going down, but to develop a stream that has no other commerce than saw logs going down is a waste of public funds. In the first place, it does not help to take the saw logs down. In 99 times out of 100 they will go down just as well without it and lots of times better than where they build a dam across that would interfere with the saw logs going down. I yield to the Senator from Iowa.

Mr. KENYON. I was going to ask a question. The floating of logs on streams does not require, as I understand it, the same amount of water and the same amount of work to formulate and develop the channel that are required for boats to carry general merchandise and freight. The logs float along without much water, do they not?

Mr. LANE. Certainly, but I understood the appropriation was made to improve the stream to the extent that it would permit the transportation of logs. I will say that in certain portions of the country 85 per cent of the produce is lumber or logs, and that it is just as important to get those to market that the people may have cheap lumber at the other end of the line as it is to get any other article of commerce such as steel, iron, lime, and a hundred other articles. It is just as important, and more important, to that community. Also it requires less money in expenditure, as the Senator from Iowa has suggested. It does not require the development of the channel and it is not necessary to have a deep channel so that a steamboat can go back up, for the products of that country do not go up the stream but mostly go down it. In going into the interior you reach the mountainous country, where a steamboat can not navigate the stream. It takes years and years, after the logs have been cut off and the stumps have been cleared out, before you can cultivate the land to any extent. You can not develop the country at all unless you get their product out, which is logs. If it is necessary to straighten the channel or dredge it or to pull out obstructions, the Government ought to do that work as cheerfully for that section as it will do the same work for another section of the country on other streams for other products. The Government can not better expend its money and do its duty by the people any more equitably than to do that with regard to all people, provided it does it economically and within the limit to which the commerce is entitled. If it expends enough money to float products, such as logs, out of a section of the country without spending more than is necessary, that item will, in my opinion, be absolutely all right. It is just as necessary to the people on the Pacific coast as it is to the people on the lower Mississippi or the Ohio or upon any other stream for other commerce.

Mr. NORRIS. If the Senator feels that way about it, he will certainly oppose the amendment of the committee, because the committee propose to stop in this particular case. The farmers want to build some bridges across the stream and they are opposed to this development because they do not want to come to Congress to get permission to build a bridge, so that we will have to say to the farmers of the locality, "There is a fellow farther upstream who has a few saw logs he wants to float down here, and you can not build a bridge, or when you do build a bridge you will have to get the consent of the War Department, and you will have to build the bridge high enough so that the saw logs can float under the bridge." I presume a good-sized saw log could not get through if bridges should be constructed on streams like this.

Mr. LANE. Mr. President, it is quite evident that the Senator from Nebraska does not know much about saw logs and has not had much experience with bridges. It would be a foolish undertaking for anyone to build a bridge so low that a saw log could not float under it. The largest saw log that floats is 8 or 10 feet through in our section of the country; it will float half under water, and therefore the bridge would only have to be 4 feet high. If you build a bridge with 6 or 8 feet clear way the logs can get through. So that argument will not stand.

Mr. NORRIS. But, Mr. President, the Senator could not float one of his saw logs down this stream with 6 inches of water. A saw log 6 feet through would not be able to get any distance. It would tear the bridges out from one end to the other of the stream.

Mr. LANE. No; it would not float in that depth of water.

Mr. NORRIS. In fact, when he went to the Secretary of War to get permission to place across the stream a couple of logs on which to lay some planks the Secretary of War would refer him to the Corps of Engineers, and they would refer the matter to the district engineer, and the district engineer would refer it to some one else, who would go out and make a survey, and who might find, perhaps, that at that place it was not desirable to have a bridge. So the farmers of the community who wanted to get to town to sell their wheat or corn or to ship it out of the country would not be able to get the bridge, and they could not cross the stream because the bed of the stream might be too soft or muddy.

Mr. LANE. But I understand the Board of Engineers have nothing to do with bridges on nonnavigable streams.

Mr. NORRIS. But we are providing only for navigable streams in this bill. If the Senator will read the amendment, it shows on its face that at the present time this is a navigable stream; and any citizen of the United States who would want to build a bridge across it would have to come to Washington and get the permission of the Secretary of War to do so. Not only that, but he would, perhaps, have to secure the passage of an act of Congress before he could build a bridge across the stream. This is a navigable stream; but we are going to make it unnavigable by the adoption of this amendment. That seems like a queer proposition, but it is true. The stream is navigable now; but as soon as this bill becomes a law it will then be nonnavigable, because we will have said so in black and white. That ought to satisfy anybody. That is what this amendment is and nothing else. It is a declaration that this stream is not navigable, and everybody will have to take notice of that fact after we have passed the law.

The only objection I have to the amendment is that it provides that the Legislature of Arkansas must take a hand in it. This is the proviso which is added:

> This provision shall become void after one year from the date of the approval of this act unless within said period the Legislature of Arkansas shall pass an act expressly approving this declaration.

So here is a case where we are going to pass a law of Congress and get the approval of the State legislature. Otherwise it will become void one year afterwards. The stream is now navigable, but we will pass a bill, and as soon as it becomes a law the stream becomes nonnavigable; and in one year from that time, unless the Legislature of Arkansas declares by solemn statute that it is nonnavigable, it will again become navigable. This river is now a navigable stream; we pass a law and it becomes nonnavigable; and all commerce ceases; everything is on a dead quiet; the Legislature of Arkansas meets in solemn conclave and says that this stream is navigable, and then it becomes again navigable. Now you have it and now you do not have it.

So the farmer who wants to get across this creek to town with a load of corn or oats or wheat will have to look at the calendar before he starts, for he would not dare even to put a temporary structure across that stream; he would not dare impede that river in any way by dropping a load of rocks into it, in order to make the foundation solid, so that he might drive across, unless he got the permission of the authorities here in Washington to do so.

Mr. President, it seems to me that this only illustrates what I pointed out the other day, that Congress is undertaking, in bills of this kind, to do something that it can not satisfactorily do. It is not the right way for us to legislate. We have been doing it a great many years, and, of course, as has already been pointed out here, a Senator is liable to have his motives impugned if he dares suggest that it is not the right way. After 10 years of development of this stream we have but 6 inches of water in it; and it seems to me that as to other streams provided for in this bill, just as bad as this one, in my humble judgment, where we are appropriating money for maintenance and the continuance of the work, we ought to take the same action that we take here.

Mr. NEWLANDS. Mr. President, I understand the Senator from Nebraska [Mr. NORRIS] is critical of this amendment which is offered by the committee regarding the Cache River, in Arkansas. This amendment involves an abandonment of the proposed appropriation contained in the House bill of $3,000 for the maintenance of the Cache River. I understand that many of the critics of this bill have been opposing it on the ground that numerous unknown rivers and creeks are receiving appropriations ostensibly in the interest of navigation, and the Senator from Nebraska himself indulges in a somewhat dual argument regarding this item.

The Senator from Nebraska condemns this amendment because it condemns the Cache River to nonnavigability and in the same breath he insists that numerous other items in this bill ought to be treated in the same way; that instead of having appropriations made for their improvement, many other rivers should be abandoned by the Government.

Mr. President, the difficulty with the whole bill is the system under which we are operating. Congress will never be satisfied with it; the country is not satisfied with it; these long and protracted debates indicate that the Senate is not satisfied with it; the failure of two river and harbor appropriation bills indicates that, and yet every public man will concede that it is essential to improve the waterways of the country; that it is essential to develop and control them for every useful purpose, not only for navigation but for the reclamation of arid lands, the development of water power, the reclamation of swamp

lands, and for the other beneficial uses and controls that come from river regulation. It must be true that we are dissatisfied with the system when so much criticism is given to bills of this kind.

I only intend to say a few words, simply to point the argument of the Senator from Nebraska, and those words shall be confined simply to the system itself.

The difficulty is that we are treating each one of these little rivers and inlets and waterways as a separate unit, and we are not considering them all with a view to having a connected and continuous system of waterways which will be perfected instrumentalities for navigation.

I have no doubt that many of the little rivers which are included in this bill would be valuable parts in a continuous and connected system, whilst they are subject to criticism, and to severe criticism, when each one is considered as a separate unit; and yet, under our system with reference to these projects, as the initiative lies in the individual Congressmen and not in some organization charged with the direction of a great public policy, we must have a bill composed of individual projects, appealing to the interests of the individual Representative or Senator and considered without relation to a perfected system of waterway transportation. We have been improving these rivers now for generations and have not yet perfected a single river in the United States—not one. That is a sorry showing for the present system.

Some of us have been urging a policy for years through different bills, among them a bill which I have been urging for many years and which bears the name of the Senator from Louisiana [Mr. BROUSSARD] and myself, calling for a comprehensive policy regarding our waterways, providing for coordination of the scientific services which are engaged in detached studies throughout the country of various parts of these waterways, calling for the cooperation of the States with the Nation, calling for an ample fund which will secure continuous work and which will give us a system of 25,000 miles of waterways and afford as perfect a system of transportation as our 250,000 miles of railways, a system which will carry more tonnage and commerce than the miles of railway in the country, for the waterways will carry the bulky and the cheap objects of transportation.

Mr. President, I do not intend to take up the time of the Senate. I have recently addressed a circular letter to each Senator calling attention to the fact that I have a motion pending here to refer the flood-control bill, known as the Humphreys bill, and the so-called Newlands bill, both of which lie on the table, to the Interstate Commerce Committee of the Senate, and I ask leave to insert that letter in the RECORD.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nevada?

Mr. SMITH of Michigan. Mr. President, let me ask the Senator from Nevada, does he think that under the rules of the Senate the Interstate Commerce Committee have jurisdiction of the subject matter, or does he ask this as a favor and courtesy from his colleagues?

Mr. NEWLANDS. I think the Interstate Commerce Committee has jurisdiction of that subject, but it has never yet asserted it, and I will give my reasons. The older committee is the Commerce Committee. The jurisdiction of that committee covered both interstate and foreign commerce.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nevada to have inserted in the RECORD the circular letter referred to by him?

Mr. SMITH of Michigan. No; I shall not object, because I think it is a good letter and does the Senator from Nevada credit; but I was really a little in doubt after I had read it whether the Senator was asking a courtesy from his colleagues or a right for his committee. My own impression is that the Committee on Commerce have jurisdiction over that subject, and that it ought not to be deprived of that jurisdiction without good reason.

The PRESIDING OFFICER. In the absence of objection, the letter referred to by the Senator from Nevada will be printed in the RECORD.

The letter is as follows:

UNITED STATES SENATE,
Washington, D. C., May 19, 1916.

MY DEAR SENATOR: I have a motion pending to refer the so-called flood-control bill and the Newlands river-regulation bill to the Interstate Commerce Committee, instead of the Commerce Committee, and I am inclosing you my remarks upon the question of committee jurisdiction as well as copies of these bill. This question will be disposed of shortly, either during or after consideration of the river and harbor bill.

Is not the primary and basic reason for river regulation the need of the country—not for mere river channels without commerce, but for a great system of inland waterways, like that of Germany, crowded with actual water-borne commerce, thereby relieving congested railway traffic, reducing transportation costs, and rendering unnecessary huge additional burdens on the people for new railroads and enormously expensive railroad terminals?

Have not our efforts to establish such a system been a failure? Have we not thus far made progress backwards, in our attempt to upbuild inland-waterway commerce?

The answer to all these questions must be "yes."

And is not the reason for the steady deterioration in our waterway commerce the fact that we have assumed, up to this time, that all that was needed to develop water-borne commerce was "river improvement" as heretofore made, through the river and harbor bill, under the jurisdiction of the Senate Commerce Committee and the House Rivers and Harbors Committee?

That is the reason. That is why we have failed. A revival of waterways will be brought about only by coordinating rail and water routes and rates of transportation, and providing adequate transfer facilities and waterway terminals. That can not be done through any other committee than the Interstate Commerce Committee.

I have given this subject much thought and am profoundly convinced that until the jurisdiction over inland waterways, including river regulation, is vested in the Interstate Commerce Committee, our efforts to establish waterway commerce will continue fruitless and we will continue to waste millions upon the improvement of rivers that carry no commerce justifying the expenditure.

Flood control is a mere incident of river regulation or waterway development. The constitutional authority for flood control lies primarily and principally in the power to aid interstate commerce by promoting waterway development. Any other source of power is incidental. If I am right in these views, and it seems to me they are incontrovertible, is it not clear that the river-regulation bill, introduced by me in the Senate, and the flood-control bill, recently passed by the House, should be referred to the Interstate Commerce Committee?

I hope you will concur with me in this view. No question has arisen in many years of more vital importance to the country than the benefits that will result from this new and broader treatment of our problem of waterway development, contemplating, as it does, not only the carrying of interstate commerce but the creation of interstate commerce by such beneficial use of the water as will prevent the formation of floods in the lower reaches of the rivers.

If we now inaugurate the policy I am urging, in a very few years the Mississippi, the Missouri, the Ohio, and all other rivers reaching far inland from the bays and harbors on the Atlantic, Pacific, and Gulf coasts will be crowded with commerce, and the saving to our people in the cost of transportation will be so vast as to be almost beyond calculation.

Very truly, yours, FRANCIS G. NEWLANDS.

Mr. NEWLANDS. Mr. President, I have great respect for the Committee on Commerce, and my suggestion involves no lack of confidence whatever in that committee; but I think that every subject ought to go to a committee having jurisdiction. I was about to show that originally the Commerce Committee was the only committee having power to deal with these subjects, and that its jurisdiction included both interstate and foreign commerce. Later on, the attention of the country being called to the necessity of regulating interstate commerce, a committee was organized called the Interstate Commerce Committee, and the assumption of that committee of jurisdiction over interstate commerce has been a very gradual one, but a very progressive one.

In the first place, that committee took jurisdiction only over the railroads. Then it extended its jurisdiction to express companies, to telegraph companies, to pipe-line companies, and other instrumentalities of interstate commerce; thus, by gradual process, not enlarging its jurisdiction, but assuming jurisdiction over a subject which the very character of the committee and its organization entitled it to.

Only recently has the question of waterway transportation come up as a vital question affecting the prosperity of the country in the future. The question of coordinating the waterways with the railways has only come up within late years. The attention of the country has been called to the absolute necessity of developing its rivers, not only for navigation, but for all incidental purposes, and attention has also been called to the fact that the elaboration and development of the incidental uses of these rivers will go far toward justifying the very large expenditure necessary for the development of rivers for navigation; so that, by teamwork between the users, great work can be acomplished in the development of these rivers, which will make them not only a source of wealth, whereas at present they are destroyers of wealth, but will make them great and beneficial instrumentalities for the promotion of the transportation of the country, and in such a way as to aid the railroads and not to injure them, for we are beginning to realize that we are about reaching the limit of the capacity of our railway transportation. The freight congestion all over the country is calling our attention to that fact, and we are told that it will take an expenditure of $5,000,000,000 upon the railroads in the near future in order to meet the demands of transportation. If we can by an expenditure of $1,000,000,000 in the development of these 25,000 miles of waterways in the country do away with the necessity of an expenditure of a large portion of that $5,000,000,000 which in the near future must otherwise be expended upon the railways, we will be doing the country a great benefit in the line of economy as well as efficiency.

So, too, as the telegraph lines and the express companies and other instrumentalities have gradually come within the jurisdiction of the Interstate Commerce Committee—not by usurpation, but by right—why is it not time now logically to conclude that waterway transportation should come up for action by that committee? The most important part of waterway transportation is the perfection of the rivers themselves for commerce, and a most important part of that development will be legislation which will prevent the rail carriers from destroying the water carriers, as they have in the past, by lowering the rates during the navigable season so that transportation will not be profitable to the water carriers and then raising the rates during the season when the rivers are not navigable either as the result of drought or ice. There must be also a system of teamwork that is absolutely essential.

Mr. JONES. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Washington?

Mr. NEWLANDS. Yes.

Mr. JONES. I just wanted to ask the Senator if there is not a provision in the law now under which, if a railroad lowers its rates as the Senator has suggested, they can not be raised again without making a showing to the Interstate Commerce Commission?

Mr. NEWLANDS. I do not recall the exact legislation upon this subject. There has been some.

Mr. JONES. That is my recollection—that there is such a provision in the law.

Mr. NEWLANDS. There has been some legislation upon the subject, but the question has never been taken up seriously by the Interstate Commerce Committee. It ought to be, and the whole question ought to be taken up, it seems to me, by that committee.

In the friendliest spirit to the Commerce Committee, and without any disposition whatever to invade its jurisdiction, I simply say that it seems to me that the time has come when the Interstate Commerce Committee, organized to take charge of interstate commerce, should assume the jurisdiction which was originally granted to it when the committee itself was created, and that this is not a usurpation of authority, but is simply the exercise of a right which has existed but has not been used.

I do not want to delay the consideration of this bill. I say it would be a great mistake if the numerous rivers included in this bill which are regarded as small and inferior were suddenly declared to be nonnavigable. I yield to the wisdom of the Senator from Arkansas with reference to this particular river. I have no doubt his judgment is right regarding this river, and I concur in the amendment which he has offered, that it should be declared to be nonnavigable. But I object to the suggestion of the Senator from Nebraska [Mr. NORRIS] that all the obscure little rivers included in this bill should be declared nonnavigable, for I think it would be a blow aimed at the future development of the great waterway transportation system of the country, which will involve not only the development of the existing rivers and their tributaries but their connection by artificial canals in such a way as to make it possible to move from one part of the country to another entirely by water, as they do in Germany and in France.

Mr. SMITH of Michigan. Mr. President, the Senator from Nevada [Mr. NEWLANDS] has for years pressed upon the committee his views regarding the coordination of the various departments in his general plan, but I think never until now has he disclosed any selfish purpose to do the whole thing himself. For one, I must say that I can not agree with the Senator that the Committee on Interstate Commerce is the appropriate committee to take charge of the legislation as he suggests.

I want to say further—and I am sorry the Senator from Nebraska [Mr. NORRIS] is not here—that a great deal has been said against this bill. We can judge this bill somewhat by the various items affecting our own States. There is not an item in this bill affecting the State of Michigan that I would not be willing to leave to the Senator from Nebraska on its merit. That is the test of these items. There is only one river in Michigan provided for in this bill by affirmative appropriation, and that is the St. Clair River. This came too late to include in the House bill. The present channel in the St. Clair River accommodates 78,800,000 tons of freight annually. The commerce in this river last year amounted to $855,800,000. All of that commerce must be carried through a channel on the Canadian side of the St. Clair River, and it is so tortuous and irregular that it exposes vessels going up the river to violent and dangerous contact with those going down. I do not know of a project in this bill that has more merit than that, and yet that is the only Michigan river provided for in this bill.

I am going to repeat that last year the tonnage on that river amounted to 78,800,000. There is no traffic so great on any similar waterway in the world. I asked that an item of $83,000 be put in to cut another channel, in order that the vessels coming down would not be obliged to go over onto the Canadian side, and navigate a channel that is in itself very insufficient to accommodate the traffic.

This item is a belated item. It came over here because the Chief of Engineers did not get his report in until after the bill had passed the House. Not to put it in would be the grossest kind of neglect.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee on page 25.

The amendment was agreed to.

Mr. CLARKE of Arkansas. Mr. President, there is a formal amendment to be made in line 14, page 26. The word "Church" should be stricken out and the word "Clinch" inserted.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to strike out the word "Church" where it occurs in line 14, page 26, and to insert in lieu thereof the word "Clinch."

The amendment was agreed to.

The next amendment was, on page 26, line 25, after "$500,000," to strike out "*Provided*, That no contract shall be entered into for the construction thereof until the local interests shall assume and pay all claims for flowage damage or arrange to do so in manner satisfactory to the Secretary of War," so as to make the clause read:

Tennessee River, Tenn., Ala., and Ky.: For maintenance and continuing improvement by open-channel work above Chattanooga, Tenn., $300,000, and of this amount not to exceed $5,000 may be expended, in the discretion of the Chief of Engineers and Secretary of War, for the maintenance of the Clinch and Holston Rivers at or near the mouth of said rivers; for maintenance and continuing improvement by open-channel work between Florence and Riverton, Ala., $120,000; for continuing improvement by the construction of locks and dams between Chattanooga, Tenn., and Browns Island, Ala., in accordance with the report submitted in House Document No. 360, Sixty-second Congress, second session, as modified by the report of the Board of Engineers for Rivers and Harbors printed in Rivers and Harbors Committee Document No. 1, Sixty-fourth Congress, first session, $500,000: *Provided further*, That one high dam or two low dams may be constructed according as the local interests may contribute the cost of all claims for flowage damage arising from either type of dams, respectively: *And provided further*, That the Secretary of War shall ultimately determine the type of dams to be constructed; for continuing improvement and for maintenance below Riverton, Ala., $24,000; in all, $944,000.

Mr. KENYON. Mr. President, I think we should have some information as to why this proviso is proposed to be stricken out, and some information as to why it was originally put in. I assume that the Army engineers asked for it. This bill carries $944,000 for the Tennessee River. We have spent something like $10,000,000 on it out of the Federal Treasury, and its commerce, deducting sand, gravel, and timber, does not require any more water than it did 50 years ago. Now, we come along with this proposition, which in itself, as to the amounts appropriated for, ought to be reduced, and at the proper time I shall move to reduce them. The only proviso here that seems to be for the protection of the Federal Treasury is stricken out, and the Government will be compelled under this amendment to pay all claims for flowage damage if this proviso is stricken out.

After this great expenditure of money on this river, running into the millions, and the appropriation in this bill with this proviso assumedly put in by request of the Army engineers, just why it should be stricken out, and the Public Treasury compelled to stand this flowage damage, is more than I can understand.

I shall ask for a vote on this proposition, Mr. President, if it comes to a vote now without explanation. I ask for the yeas and nays on this proposition.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Secretary will call the roll on the motion to strike out.

Mr. CLARKE of Arkansas. Mr. President, the Senator from Alabama [Mr. BANKHEAD] desires to be recognized.

Mr. BANKHEAD. Mr. President, I desire to say a word with reference to the motion to strike out this proviso. It will be observed that the bill provides for the construction of a dam in the Tennessee River——

Mr. CLARKE of Arkansas. Mr. President, as the matter is one of some importance, I think Senators ought to hear what the Senator from Alabama has to say about it, because when they vote on it they ought to know what they are voting about. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	Nelson	Smith, Ariz.
Bankhead	Hughes	Norris	Smith, Mich.
Brady	Husting	Oliver	Smoot
Brandegee	Jones	Page	Sterling
Broussard	Kenyon	Phelan	Stone
Chilton	Kern	Pittman	Sutherland
Clapp	La Follette	Poindexter	Swanson
Clark, Wyo.	Lane	Ransdell	Taggart
Clarke, Ark.	Lewis	Reed	Underwood
Curtis	Lippitt	Saulsbury	Vardaman
Dillingham	Lodge	Shafroth	Wadsworth
Fall	Martin, Va.	Sheppard	Walsh
Gallinger	Martine, N. J.	Sherman	Williams
Hitchcock	Myers	Simmons	

Mr. SMITH of Michigan. My colleague [Mr. TOWNSEND] is unavoidably absent on account of illness in his family. He is paired with the junior Senator from Florida [Mr. BRYAN]. I desire the announcement to stand for the day.

Mr. CURTIS. I desire to announce that the junior Senator from Georgia [Mr. HARDWICK] is absent on account of illness. I have a pair with that Senator. I will let this announcement stand for the day.

The PRESIDING OFFICER. Fifty-five Senators have answered to their names. There is a quorum present. The question is on the amendment of the committee on page 27, to strike out the proviso, upon which the yeas and nays have been ordered.

Mr. BANKHEAD. Mr. President, the pending motion is to strike out the proviso on page 27, beginning on line 4. An examination of the bill as reported by the committee discloses the fact that there were two provisos with reference to this item. The committee struck out the first proviso. I thought the motion included both, but it appears that as the bill is printed only the first proviso was affected.

Now what are the facts? The bill contains an item for the construction of a lock and dam on the Tennessee River between Hales Bar and Decatur. Hales Bar is 35 miles below Chattanooga and was constructed by private capital exclusively. It improved the navigability of the river up to and above Chattanooga.

This proviso, Mr. President, contemplates that the farmers—the owners of land along the river where the lock is to be constructed—shall pay all the damage, the flowage damage, as it is commonly called by the engineers.

There is no town anywhere along there. Nobody lives on that stretch of the river except the farmers along the river for 50 or 75 miles. If these landowners who own small tracts of land along that river that would be subjected to overflow are compelled to pay for that flowage before this work can be constructed, it simply means, Mr. President, that the lock and dam so much needed will never be built.

If this situation was at a considerable port of commerce, a place like Chattanooga or even at Decatur, there would be, perhaps, some justice in saying that the local interests that are to be so greatly benefited by this construction should pay at least a part of the flowage damage. But we should not require it to be paid by these farmers, all of whom are, as I said, small landowners, and that portion of their lands that would be overflowed by this construction is the most valuable part of their holdings.

This proviso is much worse than the one stricken out, because the one stricken out by the committee contemplated the building of one dam—one low dam—as it is expressed. The proviso that we are now considering provides that one high dam may be built, I presume for the purpose of creating a power situation, if that should appear to be advisable, and in that case the flowage damage would exceed $100,000.

Now, why should these people be called upon to pay that? There is no justice in it. There is no fairness in it. No board of engineers, so far as I know, have suggested or recommended it, and how it got into this bill I do not quite understand. It came over, however, from the House of Representatives. As I stated, it was my impression when the committee acted upon the bill that both these provisos were included in the motion I made and that both were stricken out. There is some misunderstanding about it, either in the printing or in the construction put upon the motion I made, by the Committee on Commerce when the bill was being considered.

That is all there is in this case, and I hope the Senate will recognize the injustice of the unusual demand that is being made—the requirement that would be made of people on this stretch of the river owning small tracts of land. The most valuable of their land would be destroyed by the construction of this dam, and then in the face of that it has been proposed that they shall be required to pay the flowage damage.

The PRESIDING OFFICER. The question is on the amendment of the committee, on which the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CURTIS (when his name was called). I am paired with the junior Senator from Georgia [Mr. HARDWICK], who is absent on account of illness, and I withhold my vote.

Mr. GALLINGER (when his name was called). I am paired with the senior Senator from New York [Mr. O'GORMAN], who is absent, and I withhold my vote.

Mr. OVERMAN (when his name was called). I again announce my pair with the junior Senator from Wyoming [Mr. WARREN]. I transfer that pair to the Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. SAULSBURY (when his name was called). In accordance with my previous announcement of a general pair I withhold my vote.

Mr. SHERMAN (when his name was called). I am paired with the Senator from Kansas [Mr. THOMPSON]. I transfer that pair to the Senator from Iowa [Mr. CUMMINS] and vote "nay."

The roll call was concluded.

Mr. DILLINGHAM. I have a general pair with the senior Senator from Maryland [Mr. SMITH], who is absent for the day. For that reason I withhold my vote. I will let this announcement stand in relation to all votes during the afternoon.

Mr. UNDERWOOD (after having voted in the affirmative). I am paired with the junior Senator from Ohio [Mr. HARDING]. I transfer that pair to the Senator from Tennessee [Mr. LEA] and let my vote stand.

Mr. MYERS. I will ask if the Senator from Connecticut [Mr. MCLEAN] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. MYERS. I have a pair with that Senator. I transfer my pair to the Senator from South Carolina [Mr. SMITH] and vote "yea."

Mr. WILLIAMS. I have a standing pair with the senior Senator from Pennsylvania [Mr. PENROSE]. I understand that if he were present he would vote as I am about to vote. I therefore regard myself as released from the pair. I vote "yea."

Mr. TILLMAN. In the absence of my pair, the Senator from West Virginia [Mr. GOFF], I withhold my vote.

Mr. OLIVER (after having voted in the affirmative). I understand that the senior Senator from Oregon [Mr. CHAMBERLAIN] with whom I have a pair is not present. I will therefore transfer my pair to my colleague [Mr. PENROSE] and allow my vote to stand.

The result was announced—yeas 35, nays 17, as follows:

YEAS—35.

Bankhead	Lippitt	Phelan	Smith, Mich.
Borah	Lodge	Pittman	Stone
Broussard	Martin, Va.	Poindexter	Swanson
Chilton	Martine, N. J.	Ransdell	Underwood
Clapp	Myers	Reed	Vardaman
Clark, Wyo.	Nelson	Sheppard	Wadsworth
Clarke, Ark.	Oliver	Simmons	Walsh
Fall	Overman	Smith, Ariz.	Williams
Hughes	Page	Smith, Ga.	

NAYS—17.

Ashurst	Husting	Lane	Sutherland
Brady	Johnson, S. Dak.	Norris	Taggart
Brandegee	Jones	Sherman	
Hitchcock	Kenyon	Smoot	
Hollis	La Follette	Sterling	

NOT VOTING—44.

Beckham	Fletcher	Lee, Md.	Shafroth
Bryan	Gallinger	Lewis	Shields
Burleigh	Goff	McCumber	Smith, Md.
Catron	Gore	McLean	Smith, S. C.
Chamberlain	Gronna	Newlands	Thomas
Colt	Harding	O'Gorman	Thompson
Culberson	Hardwick	Owen	Tillman
Cummins	James	Penrose	Townsend
Curtis	Johnson, Me.	Pomerene	Warren
Dillingham	Kern	Robinson	Weeks
du Pont	Lea, Tenn.	Saulsbury	Works

So the amendment of the committee was agreed to.

Mr. CLARKE of Arkansas. The logic of that is to make it necessary to strike out the other proviso in the bill, and I move, beginning with the word "*further*," in line 4, that the matter between that point and the word "That," in line 8, be stricken out; in other words, that the second proviso be stricken out.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to strike out the following words:

Provided further, That one high dam or two low dams may be constructed according as the local interests may contribute the cost of all claims for flowage damage arising from either type of dams, respectively: *And provided further.*

Mr. WALSH. Will the chairman of the committee give us some information as to why these provisions were put in the bill originally?

Mr. CLARKE of Arkansas. They were put in in the House. The committee did not go very elaborately into the investigation before the amendment suggested by the Senator from Alabama [Mr. BANKHEAD] was adopted, because they felt satisfied that even if the Senate committee should agree with the Senator from Alabama the matter would not pass entirely beyond the control of the conference because it would come up again in conference. It was the purpose of the committee at that time to look into the general question as to whether or not the words "local interests" really meant the farmers of the locality or whether it meant certain other interests interested in the construction of that particular dam. In other words, the committee felt that a full opportunity would be left to determine the justice and propriety of the provision by striking it out. Assuming that the House had some particular reason for including it, we did not make a very full examination of the report of the Board of Engineers. We just assumed that it was such an unusual provision to be in the bill that it was worthy of further investigation.

Mr. WALSH. I will say that I was investigating the report accompanying the bill and I find in it no explanation whatever of the significance or import of the original provision and no explanation whatever of the action recommended by the committee, namely, striking out the first proviso, and no explanation whatever in the report as to why, if the first proviso was stricken out, the second proviso was not likewise stricken out.

Mr. CLARKE of Arkansas. If the words "local interests" be confined to landowners, farmers along the route owning that part of the land adjacent to the river which will be subject to overflow in the event the dam is constructed, there is no justice in making those persons pay the flowage damage.

Mr. WALSH. I agree with the Senator.

Mr. CLARKE of Arkansas. They are victims, not beneficiaries, in a large degree.

Mr. WALSH. I agree with the Senator completely that there is no semblance of justice in that, and I assume that that was not what was meant at all. Of course, we all understand that there are immense power possibilities in that portion of the Alabama River. I assumed that this meant that those parties who desired to develop power on the river might be induced to enter into some arrangement with the Government by which the expense of the work would be divided between them and the Government. Am I correct?

Mr. CLARKE of Arkansas. The term "local interests" in its primary meaning would not include an arrangement like that, but it might be made in this particular instance to mean it. If upon further investigation that turns out to be the fact, I assume that the amendment will not remain out of the bill, although we might strike it out here now. If there are interests other than those of the farmers and the landowners along the stream interested sufficiently to make it just to contract with them, that will be demanded before the matter is finally disposed of.

Mr. WALSH. With the enlightenment I have, I do not know really how to vote on this question.

Mr. NELSON. Will the Senator from Montana allow me? I wish to say to him that this is a dam to be constructed by the Government, not by private parties; and, of course, if there is any surplus power for the Government to lease, it would get a profit out of it. It is not like a private dam.

Mr. JONES. Mr. President, I merely wish to call the attention of the Senator from Montana to the fact that the engineers recommend that the flowage rights should be taken care of by the State, counties, and municipalities, and other local interests before the Government goes into the expenditure of this money.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arkansas.

The amendment was agreed to.

The next amendment was, on page 27, after line 18, to insert "*Provided also*, That the pierhead for marking the east end of the east breakwater extension and provided for in the existing approved project shall be located at the east extremity of the breakater as now built, the structure to be built with funds previously appropriated for that purpose," so as to read:

Harbor at Cleveland, Ohio: For maintenance, $65,000: *Provided also*, That the pierhead for marking, etc.

Mr. SMOOT. Mr. President, in the first place, I wish to suggest that the word "also" ought to be stricken out.

Mr. CLARKE of Arkansas. Yes.

Mr. POMERENE. There is no objection to that.

Mr. SMOOT. If there is no objection to that, I wish to ask the Senator from Ohio to explain this amendment.

The PRESIDING OFFICER. Is there objection to the amendment offered by the Senator from Utah that the word "also" be stricken out? The Chair hears none, and it is so ordered.

Mr. POMERENE. Mr. President, I do not have with me the correspondence which I had on this subject. I offered this amendment at the instance of the Cleveland Chamber of Commerce. There have been some changes in the harbor there, and it seems provision was made for the construction of this pierhead under some previous action of Congress at a given place, as I understand it.

Mr. CLARKE of Arkansas. May I interrupt the Senator?

Mr. POMERENE. Certainly.

Mr. CLARKE of Arkansas. During the consideration of this item the matter was referred to the junior Senator from Ohio [Mr. HARDING], who was directed to make the necessary investigation and report to the committee. He reported that the amendment was entirely proper and was much needed, and supported the report with some communications from persons who were anxious to be heard. The effect of it was that it satisfied the committee absolutely that it was an entirely proper amendment. It does not cost the Government anything and makes more convenient the general improvement contemplated by the appropriation.

Mr. POMERENE. I may say also that I had some letters from certain shipping interests, working in harmony with the chamber of commerce, and they were to the effect that this provision should be in the bill.

Mr. SMOOT. The object I had in asking the question was to know from the Senator from Ohio whether, if the change was made, it would cost more than the original plan?

Mr. CLARKE of Arkansas. My understanding is that the junior Senator from Ohio reported that it would not; that it was merely a convenience in providing the improvement.

Mr. SMOOT. As far as dollars and cents are concerned, there is no change made by a change of the plan.

Mr. CLARKE of Arkansas. No.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 28, after line 7, to insert:

Arcadia Harbor, Mich.: For improvement and rebuilding old piers, $25,000.

Mr. KENYON. Mr. President, I only wish to suggest about Arcadia that, as I understand the report of the Chief of Engineers and the Board of Army Engineers, this is a project that has been condemned twice. Of course, I realize that that makes no difference. We have appropriated, according to the report, $63,000 for Arcadia Harbor. The commerce is practically nothing. What there has been has been forest products. I wish to read into the RECORD a part of the report of the Chief of Engineers, dated February 8, 1916:

Arcadia Harbor is on the east shore of Lake Michigan, 17 miles north of Manistee Harbor and 10 miles south of Frankfort Harbor. The harbor was constructed by private parties to afford facilities for the shipment of lumber. The river and harbor act approved March 3, 1905, adopted a project for the maintenance of the entrance channel by dredging not less than 50 feet wide and 12 feet deep below low water, at an annual cost of $3,000, the work to continue for a period of five years. Since the expiration of that period several reports have been submitted under congressional authorization recommending the discontinuance of improvement by the United States. The district officer is of opinion that the present and prospective commerce is too small to justify the necessary expenditure for the maintenance of this harbor and he recommends that the improvement be abandoned by the United States. The division engineer and the Board of Engineers for Rivers and Harbors concur in this opinion.

After due consideration of the above-mentioned reports, I concur in the views of the district officer, the division engineer, and the Board of Engineers for Rivers and Harbors, and therefore recommend legislation authorizing the discontinuance of the work of maintaining this harbor.

Notwithstanding that, Mr. President, Arcadia is in this bill for $25,000. I dislike to object to it on account of the distinguished Senator from Michigan [Mr. SMITH]. That is always the hard part of any of these matters, because Senators seem to have certain projects which they regard as personal to themselves, and when any criticism or objection is raised we are met with the charge that we assume that all morality and honesty is with us. But here is the direct issue again, just as it was on the Arkansas River, of a project condemned by the Army engineers, of whose infallibility we have heard so much, and it will be for the Senate again to go on record as to whether it will simply stand by the Army engineers when they report favorably to their projects and reverse them when they report otherwise.

Mr. SMITH of Michigan. Mr. President, I do not know that I care to say anything. Almost everyone in the Senate is

familiar with Arcadia. This little rural community on Lake Michigan built this harbor at their own expense, at a cost of $75,000, which was a great deal for a small community like that. The Government engineer went up there and investigated the matter and concluded that to rebuild these piers would require an expenditure of $140,000. The people there took up the matter, and more than half rebuilt the piers at an expense of $15,000. It will take $25,000 to complete the project. This rural community has no other way of getting its products to market, except through this harbor, to Milwaukee and Chicago.

Mr. SMOOT. Mr. President, I simply wish to add a few words to what the Senator from Iowa [Mr. KENYON] stated in relation to this project. All the commerce at this harbor, as reported by the Chief of Engineers, amounts to but 21,525 short tons. That was in the year 1914. The amount is growing less each year. Ninety-five per cent of the commerce is in forest products alone. It is entirely a local business. There is but one railroad that reaches the little town, known as the Arcadia & Betsie River Railroad.

Mr. SMITH of Michigan. I will say to the Senator from Utah, if he will permit me, that that railroad does not do the town any good; it was never intended as a commercial highway.

Mr. SMOOT. I am not speaking against the town; I am speaking against the appropriation of $25,000. I was simply calling attention to the fact that there was a railroad that reached the little town; and I was going to say that it does not do an interstate business.

Mr. SMITH of Michigan. Probably not.

Mr. SMOOT. Mr. President, the engineers report as to the "proposed operations" as follows:

Proposed operations: The funds available for maintenance will be exhausted June 30, 1916. No recommendation is made for appropriation for fiscal year ending June 30, 1917. Maintenance for the year would require about $4,000 for dredging, engineering, and contingencies.

The engineers have reported against the project; but if there is to be an appropriation made, they say that $4,000 is all that is necessary, yet we find an amendment in the bill providing for an expenditure of $25,000.

Mr. SMITH of Michigan. The Senator from Utah does not think that that money would be wasted by the engineers, does he?

Mr. SMOOT. Mr. President, I can not say what the engineers would do with the money.

Mr. SMITH of Michigan. Does the Senator believe the money would be wasted?

Mr. SMOOT. I am afraid a great deal of it will be.

Mr. SMITH of Michigan. Not on this little project.

Mr. SMOOT. In fact, I think that nearly half of all the money that has been appropriated in the past 50 years, amounting in the total to $850,000,000, has been wasted, so far as any benefit to the commerce of the country is concerned.

Mr. SMITH of Michigan. This would not pay the interest on that amount of money for 30 seconds.

Mr. SMOOT. That is true; but this is only one of the items in the bill which never ought to be in it, in my opinion.

Mr. SMITH of Michigan. If the Senator from Utah speaks much longer, the interest will amount to more than the appropriation.

Mr. SMOOT. Mr. President, I know there is little use in calling the attention of the Senate to any of these unwarranted appropriations, and I have become discouraged in doing so; perhaps it will be just as well to let the bill pass; but I do know that if the people of the country understood that appropriations were being made by Congress for this character of work it would not meet their approval. I know this proposed appropriation is small compared to other great items in the bill; but $25,000 for this project and $25,000 for another project, and $12,000 for this and $10,000 for that, will soon run up into the millions of dollars, as every Senator must understand.

There are some 270 items or projects appropriated for in the bill, and I can not see what justification a Senator can offer for voting an appropriation of $25,000 for a project which the Army engineers say should be abandoned, and as to which they also further state that if it is to be maintained, and if the Government of the United States is to make further appropriations for its maintenance, $4,000 will be ample for the dredging, for the engineering, and for all contingencies; yet we find an amendment to the bill carrying $25,000 for the purpose.

Mr. President, I am not going to say any more upon this item; but it seems to me that it can not be defended; and I do not believe that the Senate of the United States ought to throw this money away, for that is exactly what it means if the amendment is agreed to.

Far be it from me to cast a vote that would harm any of the people in the little town which this project is supposed to assist; if I thought, Mr. President, that it would assist them in any way, I would never vote against it; but here we find that 95 per cent of all the commerce consists of saw logs, that can be floated without the expenditure of a single cent by the Government for dredging. Therefore, Mr. President, I shall be content to allow Senators to vote for this appropriation if they desire to do so; but I do not believe that any Senator can justify his vote for it.

The PRESIDING OFFICER (Mr. WALSH in the chair). The question is on the amendment reported by the Committee on Commerce.

Mr. KENYON. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. CHILTON. What is the pending question?

The PRESIDING OFFICER. The Secretary will state the pending amendment.

The SECRETARY. On page 28, after line 7, it is proposed by the Committee on Commerce to insert the following item:

Arcadia Harbor, Mich.: For improvement and rebuilding old piers, $25,000.

The Secretary proceeded to call the roll.

Mr. CLAPP (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS]. Being advised, however, that if present the Senator from North Carolina would vote as I shall vote, I vote "yea."

Mr. CURTIS (when his name was called). Again announcing my pair with the junior Senator from Georgia [Mr. HARDWICK], I withhold my vote.

Mr. MYERS (when his name was called). I make the same announcement as to my pair and its transfer which I made on the last vote and vote "nay."

Mr. SAULSBURY (when his name was called). Repeating the same announcement as to my pair that I made on the previous roll call, I withhold my vote.

Mr. WEEKS (when his name was called). I have a general pair with the senior Senator from Kentucky [Mr. JAMES]. That Senator being absent, I withhold my vote. I will ask that this announcement stand for the day.

Mr. WILLIAMS (when his name was called). I transfer my pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the Senator from Tennessee [Mr. LEA] and vote "nay."

The roll call was concluded.

Mr. STONE. I have been requested to announce that the Senator from South Carolina [Mr. TILLMAN] is paired with the Senator from West Virginia [Mr. GOFF].

Mr. GALLINGER. I announce my pair with the senior Senator from New York [Mr. O'GORMAN], who is absent to-day. For that reason I withhold my vote.

Mr. LEA of Tennessee. The transfer of a pair having been made to me, I desire to transfer that pair to the senior Senator from Texas [Mr. CULBERSON] and will vote "yea."

Mr. THOMAS. I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER], which I transfer to the junior Senator from South Dakota [Mr. JOHNSON] and vote "nay."

Mr. CATRON (after having voted in the affirmative). I have a pair with the Senator from Oklahoma [Mr. OWEN], who has not voted. I therefore ask to withdraw my vote.

Mr. CURTIS. Mr. President, I have been requested to announce the following pairs:

The Senator from Maine [Mr. BURLEIGH] with the Senator from Arkansas [Mr. ROBINSON];

The Senator from Delaware [Mr. DU PONT] with the Senator from Kentucky [Mr. BECKHAM];

The Senator from North Dakota [Mr. GRONNA] with the Senator from Maine [Mr. JOHNSON];

The Senator from Rhode Island [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS];

The Senator from Michigan [Mr. TOWNSEND] with the Senator from Florida [Mr. BRYAN]; and

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Maryland [Mr. SMITH].

The result was announced—yeas 27, nays 22, as follows:

YEAS—27.

Broussard	Lea, Tenn.	Pittman	Smith, Ariz.
Chilton	Martin, Va.	Poindexter	Smith, Mich.
Clapp	Martine, N. J.	Ransdell	Stone
Clarke, Ark.	Nelson	Reed	Swanson
Fall	Oliver	Shafroth	Vardaman
Fletcher	Page	Sheppard	Wadsworth
Hollis	Phelan	Simmons	

NAYS—22.

Ashurst	Husting	Sherman	Thompson
Borah	Jones	Smoot	Walsh
Brady	Kenyon	Sterling	Williams
Brandegee	Lane	Sutherland	Works
Gore	Myers	Taggart	
Hughes	Pomerene	Thomas	

NOT VOTING—47.

Bankhead	du Pont	Lee, Md.	Robinson
Beckham	Gallinger	Lewis	Saulsbury
Bryan	Goff	Lippitt	Shields
Burleigh	Gronna	Lodge	Smith, Ga.
Catron	Harding	McCumber	Smith, Md.
Chamberlain	Hardwick	McLean	Smith, S. C.
Clark, Wyo.	Hitchcock	Newlands	Tillman
Colt	James	Norris	Townsend
Culberson	Johnson, Me.	O'Gorman	Underwood
Cummins	Johnson, S. Dak.	Overman	Warren
Curtis	Kern	Owen	Weeks
Dillingham	La Follette	Penrose	

So the amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 28, after line 13, to insert:

For dredging above Ogden Street Bridge, Menominee River, $16,000.

Mr. KENYON. Mr. President, I am not rising to object to that item, but I should like to have some explanation of it in the RECORD. I think there was nothing concerning it before the committee.

Mr. SMITH of Michigan. Mr. President, it is perfectly simple. This bridge runs across the center of the city of Menominee. The appropriations hitherto have been expended only south of the bridge, and this amendment authorizes an expenditure of $16,000 north of the bridge, which is necessary. Menominee is a thriving city, and this stream is an important highway of commerce.

Mr. KENYON. I should like to ask the Senator if there is any recommendation by the Board of Army Engineers in regard to this item?

Mr. SMITH of Michigan. In the last river and harbor bill we provided for an appropriation for use south of this bridge. In the bill prior to that I think the same thing was done, and, without authority to dredge north of that bridge none of this money, $16,000, can be spent there. I have nothing more to say about it. I think the item ought to go in.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 28, after line 19, to insert:

Saugatuck Harbor and Kalamazoo River, Mich.: For maintenance, $10,000.

Mr. KENYON. Mr. President, notwithstanding this is a small item and there seems to be some irritation when we ask about small items, I should like to inquire if a resurvey of this project was not ordered at the last session of Congress and whether or not there has been any report on it? There was nothing before the committee, as I remember, about this item. Of course, I suppose it does not make much difference whether we know anything about it or not, but I should like to secure what information I can.

Mr. SMITH of Michigan. Mr. President, I know something about it. I know about the traffic there. There is a very large traffic at Saugatuck, which is an important harbor on Lake Michigan. The harbor has been completed. No money was provided for maintenance. The harbor will not maintain itself. It is left to Congress to say whether that harbor shall be maintained; and we put this item of $10,000 in the bill to maintain it. If the engineers do not spend it for that purpose it will be left in the Treasury.

Mr. SMOOT. Has there been an appropriation heretofore for this specific project?

Mr. SMITH of Michigan. This harbor has been practically completed, and now it has got to be maintained, just as other items provide for maintenance for the harbor at Charlevoix, at Frankfort, and other places.

The money, as I have said, can only be used for maintenance; if it is not necessary, it will not be expended; but if it is necessary, its expenditure must be authorized in order to enable the engineers to protect the work already done.

The PRESIDING OFFICER. The question is on the adoption of the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 29, after line 15, to insert:

St. Clair River, Mich., with a view to securing a channel along the water front of Port Huron 21 feet deep at low water and 400 feet wide, according to the report of the Chief of Engineers in House Document No. 782, first session Sixty-fourth Congress, $88,325.

Mr. SMITH of Michigan. Mr. President, the report referred to in the amendment did not reach the House before the bill was completed. The item provides an additional channel in the St. Clair River. Through the St. Clair River passed last year 78,800,000 tons of freight, valued at $855,500,000. That channel is very congested, tortuous, and unsafe to navigate; we want another channel along the Port Huron water front, which will make it more safe for vessels than otherwise. No waterway in the world accommodates the amount of traffic that is borne on the St. Clair River. This amendment ought to be agreed to. It was put in by the committee on my motion, and I have no doubt that it will be approved by the Senate.

Mr. SHERMAN. Mr. President, I want to inquire of the Senator in connection with this proposed amendment if he intends to offer any objection to the adoption of the amendment to which I will call his attention on page 31, beginning in line 24 and extending over to page 32? I ask that question in view of a communication from certain manufacturers and harbor authorities presented some days since and incorporated in the CONGRESSIONAL RECORD. It referred to the alleged lowering of the lake levels, especially in the upper lake regions, because of the diversion of water through the sanitary district channel of Chicago. Does the Senator intend to offer any objection to the amendment to which I have referred?

Mr. SMITH of Michigan. Mr. President, I do not know just why the Senator from Illinois should ask that question. Does the Senator mean to argue that the construction of another channel through the St. Clair River would divert the waters of Lake St. Clair and Lake Huron?

Mr. SHERMAN. Yes, sir.

Mr. SMITH of Michigan. Not at all.

Mr. SHERMAN. That is the point.

Mr. SMITH of Michigan. This channel is not long and only 400 feet wide.

Mr. SHERMAN. It is the bone of contention, Mr. President.

Mr. SMITH of Michigan. It is a very different thing from an artificial waterway that takes water out of Lake Michigan and puts it into the Gulf of Mexico.

Mr. SHERMAN. Before the vote, in order that I may vote as intelligently as I am able to do, I should like to state that the St. Clair River, which connects the waters of the two lakes, Huron and Erie, is directly connected with the question of lake levels. As I remember now—and I can turn to the document later—the original natural depth of the St. Clair River at or about the point covered by this amendment was about 8 feet. There were a number of channels in its natural state, making what might be called flats, as I remember the report of the engineers on it. The channel has now been changed until the present depth is about 20 feet, and it is contemplated by this amendment that the depth would be increased to about 21 feet. The original width of this channel was much less than is now proposed. I do not know what it was, but it is now proposed in this amendment to make the width some 400 feet.

Mr. SMITH of Michigan. Yes.

Mr. SHERMAN. I call the Senator's attention to the physical condition not only of the upper lake region that is connected with the subject of levels, but the increasing of the width and depth of the connecting waters between the lakes, which comprise what is called the lower lake region. The greater these connecting waters are increased in depth or width the greater the flow of water. It facilitates the passage of water even between so large bodies as the lakes.

The reason why I make this inquiry is that if any objection shall be made to the proposed amendment on the ground that it diverts a certain amount of water from Lake Michigan, I wish to state now that these improvements of waterways like the St. Clair River facilitate the flow of water from Lake Huron into Lake Erie, and so from Lake Michigan and Lake Superior. This one, standing by itself, would be insignificant; but this question has been raised and argued at great length, and many engineers of two nations have reported at various intervals, and have arrived at widely different conclusions. The claim is, on petition filed by the Senator some days ago, that so much water has been diverted from the territory of these petitioners that it interferes with navigation, and has very materially affected the ability to receive and transmit water-borne freight from certain points.

I wish to call the Senator's attention to this matter, and to inquire if he knows about how much of this change in the lake levels is to be attributed to increasing the depth and width of the natural outlet of the lakes, the connecting waters, like the St. Clair River. I will confine it for the present to that point. It is contended by Canada, in numerous reports of their engineers and by their representative, who has been a number of times in consultation with the Chicago authorities, that they have not materially contributed to this. I wish to say, however, to generalize, without going into details at this time, that the increase in the depth and width of the connecting waters between the Great Lakes, whether in the upper or lower lake region, increasing very materially the flow, has contributed

vastly more to the lowering or change of the lake levels—without conceding that it is such as to interfere with commerce in any material degree—than all the waters diverted, even though the maximum amount permitted by the War Department should be diverted, at Lake Michigan to the Chicago River and the sanitary district. It has never exceeded 10,000 cubic feet per second, and even that has been cut down of late. That is how this amendment here, which contemplates a change by increasing the depth 1 foot and by increasing the width from 300 feet to 400 feet, which will make a greater outlet for the water and thereby facilitate the flow to an extent that might interfere with the lake levels above, was complained of and charged to the account of the sanitary district.

Mr. SMITH of Michigan. Of course, Mr. President, it would be useless to argue the proposition that to deepen the river would cause the concentration of water to be greater at this point than otherwise; and the engineers have stated that deepening a channel like this to which I have referred would have a tendency, but to what extent I am not able to say, to reduce the lake level. That is one of the reasons why they have been so jealous in protecting the diversion through the Sanitary Canal and the Illinois River on the proposed Lakes-to-the-Gulf plan. But we have reached the point when commerce is seriously congested and the danger to shipping has become very great because of the incapacity of the channel in the St. Clair River, which must, as I said a few moments ago, accommodate 78,800,000 tons of freight a year. There is no waterway like it. There are no figures like these that I know anything about. The value of that commerce aggregates $855,800,000 per year. They can not safely operate those ships through that single channel along the Canadian shore. Many accidents occur. I venture the assertion that a million dollars' worth of damage has been done to vessels as they attempted to pass through this narrow strip, the St. Clair River.

This is vital to the safety of our commerce on the Lakes, and the engineers recommended it. Their recommendation came too late to get it into the House bill. I have taken the liberty of putting it into the Senate bill. It ought to pass. I have no doubt but that it will pass; and the work of making a new channel to accommodate this commerce should not be longer delayed. The expense is not great, and it has most unusual merit. When we reach the item referred to by the Senator from Illinois I may have something to say about it. A great many people are seriously exercised about it in my State. They think that the diversion of water through that canal would be a serious thing to them and to the shipping upon the Lakes; but this item ought not to be confused with that.

Mr. CLAPP. Mr. President, can the Senator tell us the difference in altitude, if any, between Lake Huron and Lake Erie?

Mr. SMITH of Michigan. No; I can not tell the Senator. The engineers have considered that matter and recommend this plan.

Mr. CLAPP. Is it not so much that in order to maintain this channel you have got to go on and deepen it still farther?

Mr. SMITH of Michigan. No; I do not think so.

Mr. CLAPP. But if the mean level of Lake Huron is above the mean level of Lake Erie, in proportion as you deepen the channel of course it will naturally reduce the mean level in the upper lake and require another deepening of the channel, I should think.

Mr. SMITH of Michigan. The engineers say that it is entirely feasible, and that it is very inexpensive. It takes all the shipping from the Northwest.

Mr. CLAPP. It might be inexpensive and it might be feasible. I was just thinking of the ultimate; that is all. I am not opposed to the item at all.

Mr. SMITH of Michigan. I do not know, Mr. President, but that I ought to put into the RECORD a statement of the number of vessels that have been injured at that point and their cost. It is a very large item. I think it will go very close to a million dollars. I do not think, however, that I will encumber the RECORD with it. There can not be any opposition to this item.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the committee.

The amendment was agreed to.

The next amendment was, on page 31, line 23, after "$55,000," to insert "and the improvement of navigation of the Illinois River, authorized by an act of the Illinois General Assembly providing for an expenditure of $5,000,000 therefor by the State of Illinois, be, and is hereby, authorized in accordance with said act," so as to make the clause read:

Illinois River, Ill.: Continuing improvement and for maintenance below Copperas Creek, $55,000; and the improvement of navigation of the Illinois River, authorized by an act of the Illinois General Assembly providing for an expenditure of $5,000,000 therefor by the State of Illinois, be, and is hereby, authorized in accordance with said act.

Mr. LEWIS. Mr. President, in this connection, as explanation of that matter—if explanation is at all needed—I beg to yield to my colleague [Mr. SHERMAN], who is a member of the committee, that he may make an explanation now; and if there is any desire that it shall be followed with anything, I will take the liberty of doing so.

[Mr. SHERMAN addressed the Senate. See Appendix.]

The PRESIDING OFFICER. Does the Senator from Illinois offer the amendment he has read as an amendment to the one proposed by the committee?

Mr. SHERMAN. Yes, sir. It has been printed.

The PRESIDING OFFICER. It will be read.

Mr. CLARKE of Arkansas. Let the amendment be read as it will be when amended as suggested by the Senator from Illinois.

Mr. SHERMAN. All right.

The PRESIDING OFFICER. The Secretary will read the amendment as proposed to be amended.

The SECRETARY. On page 31, line 25, after the word "Assembly," insert the words "approved June 18, 1915," and, on page 32, line 2, following the word "act," insert "the Interstate Commerce Commission is hereby given power to fix reasonable charges and tolls for the use of and navigation upon the waterway created under said act of the general assembly of said State in all interstate transportation," so that if amended it will read:

Illinois River, Ill.: Continuing improvement and for maintenance below Copperas Creek, $55,000; and the improvement of navigation of the Illinois River, authorized by an act of the Illinois General Assembly, approved June 18, 1915, providing for an expenditure of $5,000,000 therefor by the State of Illinois, be and is hereby authorized in accordance with said act.

The Interstate Commerce Commission is hereby given power to fix reasonable charges and tolls for the use of and navigation upon the waterway created under said act of the general assembly of said State in all interstate transportation.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

Mr. CLARKE of Arkansas. Mr. President, the committee has no objection to the amendment of the committee being amended as indicated by the amendment offered by the Senator from Illinois.

The PRESIDING OFFICER. Without objection, the amendment to the amendment is agreed to. The question is on agreeing to the amendment of the committee as amended.

Mr. LEWIS. Mr. President, I do not know that what I shall say is at all required, and I may impose upon the indulgence of the Senate merely to make clear what might otherwise be presumed to be doubtful.

We have all listened to my colleague [Mr. SHERMAN] in his exposition of the mechanical and engineering surroundings of this project. Without repeating those matters and saving the Senate the burden of its duplication, I desire to say that my position can be expressed by an incident which is reported at the time Edmund Burke ran for the third time for Parliament for Bristol. There was elected with Mr. Burke a colleague by the name of Lauderdale. Lauderdale was a dry-goods merchant. He affected in no wise statesmanship. He knew little of governmental affairs. He knew much of bookkeeping and accounts touching the dry-goods business. After Edmund Burke had rendered a very clear exposition upon governmental questions Mr. Lauderdale rose and responded as follows: "Gentlemen, I say ditto to Mr. Burke; I say ditto." [Laughter.] My position can be best expressed in those exact terms. I say ditto to my colleague. I give my approval to his position. I support his contention. I have personal knowledge of the matters to which he refers.

Mr. President, the Legislature of the State of Illinois, Republican by majority, supported this measure under the suggestion of a Democratic governor. My colleague and myself went over the State of Illinois in different parts presenting from time to time the virtues of this project, getting the people of our State to vote the $5,000,000 bonds indebtedness which is contemplated in the enterprise.

The Committee on Commerce has courteously considered the whole project, and, as I feel, very patriotically given its approval to this extent, that it allows the State of Illinois to make the expenditure under the supervision of the Federal Government, that the expenditures might cooperate with such methods as the Federal Government now inaugurate and give effect to touching the streams for interstate commerce.

Mr. President, there are but two allusions I shall make, and this shall dispose of anything I shall say upon the project. The able Senator from Michigan [Mr. SMITH] a few moments ago addressed the Senate very capably respecting an amendment touching Michigan, and but for his very able utterance would

hardly have overcome the formidable opposition we saw addressed toward it; but in this observation of his he expressed some doubt as to whether the Illinois project would exhaust the water of the Lakes, or at least so separate this water as to create some little complication upon the surrounding States.

I desire to say to the able Senator that this matter has been seriously investigated and reported upon by the engineering department of the Federal Government; and I wish to offer him the suggestion that if there should be danger in prospect that this waterway could in any wise flood by surplus water the lands of any State, any arrangement by locks suggested by the Federal Government, I am sure, would overcome that. So, therefore, we have at the outset an engineering project and an engineering proposition which would overcome the difficulties of my learned friend from Michigan, if he voiced generally the objections which might come from other sources.

Mr. President, I beg to allude to two other things. If the War Department has objected—that is, if the Chief of Engineers of the War Department has objected—upon the ground that the provisions of the act of the Illinois Legislature, which I tendered to the Senator from Minnesota [Mr. CLAPP], who asked for it, would permit unfair or unreasonable charges for commerce, I have this reply to make: Within the State of Illinois there is a public utilities commission, and within that State these rates will be regulated by that public utilities commission to the same extent that they regulate all other rates purely intrastate. In matters interstate, as affecting Illinois and the other States, the Interstate Commerce Commission, by an opinion of the Supreme Court of the United States lately rendered, has complete jurisdiction. Therefore, to the extent of interstate rates, the Interstate Commerce Commission has full jurisdiction. No imposition therefore seems likely or possible.

For the reasons urged by my eminent colleague [Mr. SHERMAN] in the lucid explanation he has made, I respectfully submit to the Senate that the project is a very worthy one. We are supporting it with our money, the money of Illinois, and asking nothing of the Federal Government but its supervision and that it treat this project as it treats other projects instigated by the War Department and sustained by the Federal Government.

I ask for a vote on the amendment.

Mr. SMITH of Michigan. Just one word, Mr. President. I filed the other day with the Secretary of the Senate a protest from shippers on the Lakes addressed to the Chief of Engineers of the War Department, a copy of which they gave to me. They say:

> Each and all of us emphatically protest against any additional water being given to said canal, and respectfully urge that the amount be cut down to not to exceed 250,000 cubic feet per minute during a day of 24 hours.

These people—and their judgment has been reinforced by expert engineering opinion—hold that a diversion of the waters of Lake Michigan into this canal to the extent proposed would reduce the lake levels by an additional 8 or 10 inches. Of course, this is very serious. I do not pretend to give that as my judgment, but I will say that our committee has frequently had this matter up for investigation. Such eminent engineers as Mr. Cooley and Mr. Noble have reported upon it. It is a serious question whether these waters can be diverted through that river and the lake levels be maintained.

I do not desire to impede or to thwart a proposition of such vital importance as that suggested by the Senators from Illinois; but the War Department have this matter now under advisement. The governor of the State of Illinois appeared before the Secretary of War the other day, and in his statement he said to the Secretary of War that he did not desire to reduce the water of Lake Michigan at all; that he thought their plan would not do it. They are asking for a more liberal maximum than has heretofore been granted; and until the War Department have passed upon the question, it seems to me it should not be hastily decided.

I am aware of the large expenditure and its purpose by the State of Illinois, all of which is very commendable; but it can not be said that if the waters of the lake are reduced it will involve no additional expenditure on the part of the Government, for if the levels of Lake Michigan and the other inland lakes are reduced, then we must spend millions and millions of dollars to afford sufficient depth of water in the harbors in order to make them properly navigable. It is just possible that this great expense that the State of Illinois is incurring may have to be compensated by an equal expenditure by the General Government in order that the damage to the lake levels may be rectified.

I simply desire to reaffirm what has been stated in this protest made to the Chief of Engineers. I think the matter ought to be taken up with the engineering department of the Government before decisive action is taken. I think that the engineers should be asked whether or not the lakes can stand this increased diversion of their waters. If the engineers say that they can not, why, then, the authorization ought not to be made.

As I said a moment ago, I do not care to go further into the matter. If it proceeds very far and it becomes evident that injury will be done, the project may be halted. The Government may find it necessary to halt it. Congress may have to reconsider the passage of this section at some future time. I hope that may not be the case; but people doing business on Lake Michigan and Lake Superior and the other lakes are entitled to be heard.

Illinois is almost as vitally interested as is my own State. The maintenance of the present volume of water in the harbor at Chicago is a very important thing to Chicago; I do not disguise that at all; but it seems to me that there is enough to this proposition to warrant its reference to the War Department and to take the judgment of the Chief of Engineers and his advice before we get into a situation from which it may be most difficult to extricate ourselves.

Mr. SHERMAN. Mr. President, before the Senator from Michigan concludes I will ask him if he knows that the War Department, acting through its engineers, has made no objection on the question of lowering the Lake levels; that their objection, speaking through the Chief of Engineers, was entirely on the question of the possibility of the State imposing an excessive freight charge, or toll, and on the ownership of the hydroelectric power to be developed by the waterfall? The objection was based on those considerations and not on the question of Lake levels. They have not raised that question.

Mr. SMITH of Michigan. Oh, yes, Mr. President; this question was raised.

Mr. SHERMAN. They have not raised that question so as to make it a part of their present objection. I take it for granted, I may say to the Senator, that they have passed on that in previous years.

Mr. SMITH of Michigan. This question was raised, I will say to my friend from Illinois, the other day. Four or five days ago at the hearing attended by Gov. Dunne, he said—at least it was so reported to me—that they did not seek to take a cupful of water through the Illinois River in addition to what they are now taking. The Senator and his colleague—both of whom I respect very highly, of course—desire only to do what is practicable and proper. Illinois would suffer if the Lake levels were to be reduced, just as Michigan, Wisconsin, and Minnesota would suffer. If by reason of authorizing the expenditure of $5,000,000 in that improvement by the State of Illinois the levels of the Lakes were to be reduced so that there must be expended an additional $5,000,000 or more by the General Government for dredging we shall not have acted wisely.

Mr. SHERMAN. Mr. President, may I ask the Senator again if he realizes that not one gallon of water additional will be taken out by the improvement contemplated? There was a maximum flow permitted by the War Department of 10,000 cubic feet per second; that was the maximum which was allowed. That was reduced by the War Department several years ago, and I think the present cubic feet per second flow is 4,167 cubic feet. The engineers in the War Department having charge of the lake question report that this improvement contemplating an 8-foot channel would not require, if that were the only question—for there are many other questions connected with this diversion of water—a maximum of 10,000 cubic feet per second through the controlling works; that, if the question of navigation alone were to be considered, the diversion of 1,000 cubic feet per second for a 24-hour day would be all that would be required to provide the depth contemplated by the improvement.

Mr. SMITH of Michigan. I understand that that was the argument made by the delegation from Illinois the other day. I am sorry, however, that the Secretary of War has not been able to reach a conclusion upon that hearing. I have just telephoned to the Chief of Engineers to see if a conclusion had been finally reached, and I have ascertained that it has not been. The Senator contends that this will not divert any additional water into the Illinois River, does he not?

Mr. SHERMAN. Yes, sir.

Mr. SMITH of Michigan. And I believe that that is the contention of the Senator's colleague? Am I right about that?

Mr. LEWIS. The Senator is.

Mr. SMITH of Michigan. If that is true, of course, any argument that might be attempted against this provision in the bill would be unnecessary and puerile; but if it should turn out that this would reduce the levels of the Lakes, it would be an exceedingly serious matter. For that reason I have felt called upon to present this memorial and to invite the attention of Senators to the question. I should like very much if we were able to get the judgment of the Engineering Corps of the Army before this provision becomes a law.

Mr. SHERMAN. Mr. President, there will not be a particle of danger. If you put the $5,000,000 paid by the sanitary district taxpayers into the hands of the Army engineers or the Board of Engineers, it would not be 24 hours until there would be a favorable decision. They have an idea that nobody but themselves ought to spend any money.

Mr. SMITH of Michigan. I do not know about that. They were quite in accord with the recommendations of the National Waterways Commission that the respective communities should spend at least half the amount necessary to put their harbors and their rivers in proper shape. I know they badgered that Waterways Commission, for I was a member of that commission and heard their arguments; but I do not care to say any more about it. It is an important matter, in my opinion, and the Senators from Minnesota and the Senators from Wisconsin are all interested in the matter and will be heard before the bill passes the Senate.

Mr. SHERMAN. Mr. President, may I correct a statement made by me? I referred to the Board of Engineers. The Board of Engineers is favorable to this project. I meant to refer to the Chief of Engineers. It would not be fair to say what I did about the Board of Engineers. It is the Chief of Engineers who made the objection.

Mr. LEWIS. Mr. President, let me observe that if any of the objections of the Senator from Michigan shall ever arise and shall ever have existence, such will be plain to the engineers. The Government engineers, cooperating with those from the State of Illinois having charge of this matter, will necessarily observe the amount of water coming forth and report at any time when it could and should be curtailed, and I assure the Senator from Michigan that then Illinois will obey any injunction looking to the protection of her neighboring States which the Board of Engineers recommend.

Mr. CLAPP. Mr. President, I have not gone over carefully the act of the Illinois Legislature referred to in the proposed amendment. It is referred to in the amendment as follows:

> And the improvement of navigation of the Illinois River, authorized by an act of the Illinois General Assembly providing for an expenditure of $5,000,000 therefor by the State of Illinois, be, and is hereby, authorized in accordance with said act.

That is a Federal authorization to proceed under the State law; and, while probably the Federal Government could, as a matter of abstract right, regulate that permission, or, at least, modify the terms of its exercise as expressed in the State law, yet if the State should go on and make a large expenditure on the strength of the authorization by the Federal Government of the proceeding under the State act, would it not place the Federal Government in a position where the State might justly say afterwards "you have authorized this expenditure, business has been adjusted to it, and it is hardly fair for you now to withdraw it or to withdraw any portion of it"? Would not that situation arise if later it was found that the use of the water, as contemplated by the State act, was seriously affecting the Lakes?

Mr. LEWIS. Mr. President, I reply to the Senator from Minnesota by saying that the State of Illinois anticipated that and has practically indicated to the Government that it accepts the permission granted upon such conditions as the Government tenders, and accepts it subject to having the whole project interdicted if at any time it shall develop that it is harmful to any part of the country. For that reason I say to the able Senator that the State of Illinois has anticipated the situation which he supposes might arise, and could not complain in equity——

Mr. CLAPP. The State would be estopped from making complaint.

Mr. LEWIS. The State would be estopped from entering complaint, inasmuch as she sets forth that she accepts the permission under these conditions.

Mr. CLAPP. Mr. President, I realize, of course, the importance of this matter to the State represented by the two Senators from Illinois, and hardly know just what plan to adopt as to voting for a matter of this great importance. I will ask the Senator if the subject was ever considered in the committee?

Mr. SHERMAN. Yes, sir. I offered the amendment in the committee and it was adopted there. Although there was no debate on it, no objection was made. I stated the purpose of the provision.

Mr. CLAPP. Were the engineers brought before the committee?

Mr. SHERMAN. No, sir. The Board of Engineers favored granting the permission, but the Chief of Engineers made objection, not upon the question of navigation or because of engineering problems or that any obstruction to navigation might ensue, but on the two questions which I mentioned a while ago—one that the State ought not to claim the water power and the other that it might charge excessive freights or tolls. The freight or toll question is covered in the amendment which is printed and is pending.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 32, after line 2, to insert:

> Mississippi River: Government dike, in Illinois, directly opposite the city of Louisiana, Mo., for raising dike at least 7 feet, $15,000, or as much thereof as may be necessary.

Mr. CLARKE of Arkansas. Mr. President, the junior Senator from Missouri [Mr. REED] has charge of that amendment. He is not now in the Chamber, and I ask that it may be passed over for a few moments. An amendment relative to the Government pier at Lewes, Del., on page 11, which was passed over, might be disposed of at this time. I refer to the item on lines 4, 5, 6, and 7, page 11.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 11, after line 3, it is proposed to insert:

> Maintenance and repair of the Government iron pier, harbor of Lewes, Del., hereafter, under regulations prescribed by the Secretary of War, to be opened to public use, $10,000.

Mr. SAULSBURY. Mr. President, I referred this morning to a report from the Chief of Engineers in regard to the iron pier at Lewes, Del., of which I had seen an advance copy. I have received from the Committee on Rivers and Harbors of the House a copy of that report, which I send to the desk, and ask the Secretary to read paragraph 4 on the second page, which gives the meat of the whole matter.

The VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

> After due consideration of the above-mentioned reports, I concur with the Board of Engineers for Rivers and Harbors in the opinion that the repair and maintenance by the United States of the iron pier in Delaware Bay, near Lewes, Del., is not justified solely in the interests of commerce and navigation; in view, however, of the fact that this pier is used by several branches of the Government service and might be important in connection with military-defense operations, I believe that it should be placed in suitable condition for governmental and commercial use. While the act of March 3, 1891, authorized the transfer of the pier to the Treasury Department, it is not apparent that such transfer would be advisable at the present time, as the pier is of value not only to that department but is continuously used and occupied by the Department of Commerce, and with the strengthening proposed by the district officer it will be suitable for commercial purposes and for certain needs of the War Department. It is therefore recommended that an appropriation of $78,000 be made for repairing this pier, and that the provision of the act of March 3, 1891, authorizing the transfer of the pier to the Treasury Department be repealed.
>
> W. M. BLACK,
> *Chief of Engineers, United States Army.*

Mr. SAULSBURY. Mr. President, that gives the statement of the case as I know it. Connected with the paragraph of the report which has been read is a complete history of this whole matter, showing when the pier was built, the circumstances, in so far as the War Department knows, of how it has been used and how it is used now. My object in having this read is to put the committee in possession of such facts as I have. That report is now in the possession of the Committee on Rivers and Harbors of the other House. I want this amendment to go in the bill, and I have no objection, under the circumstances, to accepting the amendment as the committee has proposed it for only $10,000, with the understanding, as expressed by the chairman of the committee, that they may change it to such an amount as the report convinces them should be allowed.

Mr. SMOOT. Mr. President, I think the Senator ought to be advised that, in the opinion of a great many Senators, conferees have no power to increase the maximum amount put in a bill by either House. Whatever amount is provided in this amendment can not be increased in conference, but it may be decreased. In other words, the House having appropriated nothing and the Senate having appropriated $10,000, the conferees will have power to fix an amount between nothing and $10,000, but the conferees will have no power to increase the appropria-

tion over the amount fixed by the Senate, there having been no appropriations provided in the bill by the House.

Mr. SAULSBURY. Mr. President, I find there is a difference between two of the oldest Members of this body as to whether such action can be taken. I confess that I am not sufficiently familiar with the proceedings of conference committees or with the action this body and the other have taken in connection with such matters to express an opinion. It seems to me that the suggestion of the chairman of the committee in charge of this bill is a reasonable one, that where the Senate has incorporated in the bill a new amendment carrying an appropriation, if the conferees find that that amount is not sufficient, but they favor the amendment, the appropriation might be increased to carry out the evident purpose for which the appropriation is intended.

Mr. SMOOT. I will say to the Senator that that has not been the practice of the Senate; and I believe if the conferees will look up the precedents established by the conferees of both Houses for years and years back they will find that wherever there is an amendment added to a bill by either House inserting a new item of appropriation the amount of that item can not be increased in conference. It can be, as I have stated, decreased between the amount which the House provided and the amount provided by the Senate, but it can not be increased over and above the maximum amount proposed to be appropriated by the House which incorporated the amendment in the bill.

Mr. CLARKE of Arkansas. Mr. President, that rule would put limitations upon the legislative power of the two Houses which I do not think is justified by the Constitution. If the Senate should insert in the bill this item appropriating $10,000, the House might conclude that the amendment was a proper one, but that $10,000 was not sufficient to supply the facilities which the adoption of the project was intended to furnish, and they might insist that sufficient money should be appropriated to do effectively what we are attempting to do. There never can be any such limitation as that. The Senate conferees would be in no position to insist that the amount should be increased; I agree to that; but if the House agrees to the purpose of the provision, then they have a right to exercise their judgment as to how much money it requires to effectuate it.

Mr. SMOOT. But the Senate conferees must agree before a report can be made to either House.

Mr. CLARKE of Arkansas. If the Senate conferees were convinced that it was the proper thing to do, it would be their duty to accede to it.

Mr. SMOOT. I have been on a great many conference committees; but I will say to the Senator that if it happens that this amount is increased in conference, being a committee amendment inserted in the Senate, there having been no action taken on it by the House, it will be the first time that I have ever seen such an increase made since I have been in the Senate.

Mr. CLARKE of Arkansas. Therefore the most expeditious way to treat the matter is to increase the amount here to $78,000. Then, I presume, the Senate conferees can agree to its reduction if the necessity exists.

Mr. SMOOT. There is no doubt about that.

Mr. CLARKE of Arkansas. Let that be the course, then.

Mr. SAULSBURY. May I ask the Senator in charge of the bill if he is willing to accept an amendment increasing the amount to $78,000, stating at the same time——

Mr. CLARKE of Arkansas. I think that might be submitted to the Senate. I am not going to vote against it. It is a matter now that is under the jurisdiction of the Senate.

Mr. SAULSBURY. I only state that I shall be very glad to have the conference committee thoroughly examine this question, in view of the recent report from the War Department, and determine it. What their conclusion is will be entirely agreeable to me. I think this is a sufficiently important matter to place it within the consideration of that committee; and I hope there will be no objection to increasing the amount in this amendment, then, to $78,000 and letting it go to the conference committee. With that understanding, I move that the $10,000 be stricken out and $78,000 inserted. I move that the amendment of the committee be amended in that fashion.

Mr. SMOOT. Mr. President, upon that I desire to say just a few words.

It seems to me this is a most extraordinary course for the engineers to pursue. This river and harbor bill was based upon and made in large part from last fall's report of the engineers just a few months ago. This is an item placed in the bill by the Senate committee for a certain project that a few months ago the Army engineers rejected and advised against. In the supplemental report just read there is no new information. It does say if certain things are done, then a certain amount should be appropriated. We had better wait and see if those certain things are done.

I want to call the attention of the Senate to the regular report of the engineers and the conclusions then reached by the engineers, and let Senators judge for themselves whether there has been any additional light given to the Senate as to why this appropriation should be made.

Mr. KENYON. Mr. President, does not the Senator think that, perhaps, in the interest of economy, it would be well to accept this amendment, because if the debate runs on a few days more the Army engineers may raise this amount another $75,000 or $80,000?

Mr. SMOOT. They may do it, particularly if there is an urgent request from some Senator for an additional report as a basis for an increase.

Mr. SAULSBURY. Mr. President, as I am somewhat interested in this discussion, I wish the Senators would not have a conversation between themselves, but would speak loud enough so that we may hear them on this side of the Chamber.

Mr. SMOOT. I shall try to do so, Mr. President. I thought I was speaking loud enough to be heard all over the Chamber.

I will read a part of the engineers' report, and I want the Senators to follow it and see how closely it accords with the report that has been read from the desk to-day:

> The pier has never been used to any extent for the interchange of commerce. It has been used occasionally as a landing place for vessels reporting at Lewes. The United States Lighthouse Establishment uses the pier as a place for the storage of buoys; the United States Life-Saving Service has a boathouse at a point about midway of the pier; and the United States Quarantine Service uses it occasionally for landing passengers. The pier was also used to some extent by the Engineer Department during the construction of the harbor of refuge in Delaware Bay from 1897 to 1901, but has not been used by this department to any extent since that time.

That is about the statement that was made in this additional report to-day. The engineers, when they made this report a few months ago, knew the conditions just as they existed and just as they are stated in this report, and this is their conclusion then:

> It will require the expenditure of about $10,000 to place the pier in a reasonable state of repair, but, for the reason that the pier is used so little, no work of maintenance is proposed at this time.

Now, Mr. President, we are not only asked to appropriate $10,000 for this purpose, but that it be increased to $78,000.

Mr. STERLING. Mr. President, does not the Senator from Utah think, in view of the further uses to which this pier may be put, as shown by the later report just read from the desk a while ago, that we would be justified at least in appropriating $10,000 to keep the pier in reasonable repair?

I will say to the Senator that that is what appeals to me. Standing alone, and without this further report, I would have voted against this proposed appropriation of $10,000; but in view of what is stated in this report as to the uses to which the pier may be put I believe that the pier should be kept in repair and an appropriation of $10,000 made for it.

Mr. SMOOT. Mr. President, I can not agree with the Senator from South Dakota in his conclusion. The Army engineers, when the report was made a few months ago, knew the conditions and knew what this pier was to be used for just as much as they know to-day. There is some reason for this supplemental report. It is dated yesterday, a few days after the item was questioned on the floor of the Senate. It does seem to me that it is an absolute waste of public money. I am not going to say anything more about it. If the Senate wants to put in $78,000 or $178,000, or a million dollars, I know the opponents of this bill are powerless to prevent it.

Mr. CLARKE of Arkansas. Mr. President, in making the suggestion I did I thought that would reduce the question to be submitted to the Senate to the one question of adoping the amendment.

Mr. SMOOT. That is true.

Mr. CLARKE of Arkansas. I did not know that there would be any controversy as between the two amounts.

Mr. SMOOT. What the Senator says is true, that there will be no controversy then; but it will be in the power of the conferees to make an appropriation of $78,000, and if we put it at $10,000 we will certainly limit it to that amount.

Mr. CLARKE of Arkansas. I do not agree with the Senator about that; so I suggest to the Senator from Delaware that he withdraw his amendment for $78,000, which provoked the controversy, and let us vote on the item for $10,000. We will run the risk.

Mr. SAULSBURY. I shall be very glad to withdraw that amendment.

I want to say one more word in regard to this matter. Evidently the Senator from Utah is under the impression that there is no commerce at that pier. I was not sure as to how

many piers were in use in that harbor; but since the discussion this morning I wired a friend of mine, who is a prominent business man, inquiring how many piers there are in use at that harbor in addition to this iron pier, which is practically unused except by the Government. I have received from him this reply:

Three fish-house piers, one railroad, one iron.

Making altogether four piers in use in this harbor besides this iron pier, of which this iron pier can be made, at very small expense, the very best of all of them.

That may, I think, convey to the Senator from Utah some information as to some commerce going on there.

Mr. SMOOT. Oh, Mr. President, if the Senator thought I stated there was no commerce there, I think he is mistaken. I know that there are some fish piers there. The engineers' report calls attention to them. In fact, one of them adjoins this iron pier, so the report says. I simply say that if the iron pier were destroyed to-morrow morning, swept into the bay, it would make no difference to the commerce now there.

Mr. SAULSBURY. It is not used for commerce.

Mr. SMOOT. That is what I stated.

Mr. SAULSBURY. We are trying to get it in a position where it can be so used.

I think it is quite profitless to continue the discussion, so I think we might as well determine the question of the insertion of the amendment or leaving it out.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

Mr. SMOOT. Upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CURTIS (when his name was called). I am paired with the junior Senator from Georgia [Mr. HARDWICK], and therefore withhold my vote.

Mr. MYERS (when his name was called). Announcing the same transfer of my pair with the junior Senator from Connecticut [Mr. MCLEAN] that I announced on the last roll call, I vote "yea."

Mr. SAULSBURY (when his name was called). I transfer my general pair with the junior Senator from Rhode Island [Mr. COLT] to the junior Senator from Maryland [Mr. LEE] and will vote. I vote "yea."

Mr. THOMAS (when his name was called). I transfer my pair with the senior Senator from North Dakota [Mr. MCCUMBER] to the junior Senator from South Dakota [Mr. JOHNSON] and will vote. I vote "nay."

Mr. TILLMAN (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. GOFF]. Not knowing how he would vote on this question, I withhold my vote. I will let this announcement stand for the day.

Mr. WARREN (when his name was called). I have a pair with the junior Senator from North Carolina [Mr. OVERMAN]. As he is not present, I withhold my vote.

Mr. WILLIAMS (when his name was called). I have a general pair with the senior Senator from Pennsylvania [Mr. PENROSE], but I have been informed that if present he would vote as I intend to vote. I therefore feel at liberty to vote. I vote "yea."

The roll call was concluded.

Mr. BECKHAM. Has the senior Senator from Delaware [Mr. DU PONT] voted?

The VICE PRESIDENT. He has not.

Mr. BECKHAM. I have a general pair with him and withhold my vote.

Mr. GALLINGER. I am paired with the senior Senator from New York [Mr. O'GORMAN]. I transfer that pair to the junior Senator from Idaho [Mr. BRADY] and vote "yea."

Mr. CLARK of Wyoming. I desire to ask if the senior Senator from Missouri [Mr. STONE] has voted?

The VICE PRESIDENT. He has not.

Mr. CLARK of Wyoming. I have a general pair with that Senator, and therefore withhold my vote.

Mr. CURTIS. Mr. President, if there is not a quorum present, I should like to be counted as present to help make a quorum.

Mr. CLARKE of Arkansas. I suggest that the Secretary call the names of absentees.

Mr. SMOOT. The result has not yet been announced.

The roll call resulted—yeas 33, nays 11, as follows:

YEAS—33.

Ashurst	Culberson	Hollis	Martine, N. J.
Bankhead	Fall	Lea, Tenn.	Myers
Brandegee	Fletcher	Lewis	Nelson
Chilton	Gallinger	Lodge	Oliver
Clarke, Ark.	Hitchcock	Martin, Va.	Phelan
Pittman	Saulsbury	Smith, Mich.	Williams
Poindexter	Sheppard	Sterling	
Pomerene	Simmons	Swanson	
Ransdell	Smith, Ariz.	Vardaman	

NAYS—11.

Husting	La Follette	Sherman	Thomas
Jones	Norris	Smoot	Works
Kenyon	Page	Taggart	

NOT VOTING—52.

Beckham	Dillingham	Lee, Md.	Smith, Ga.
Borah	du Pont	Lippitt	Smith, Md.
Brady	Goff	McCumber	Smith, S. C.
Broussard	Gore	McLean	Stone
Bryan	Gronna	Newlands	Sutherland
Burleigh	Harding	O'Gorman	Thompson
Catron	Hardwick	Overman	Tillman
Chamberlain	Hughes	Owens	Townsend
Clapp	James	Penrose	Underwood
Clark, Wyo.	Johnson, Me.	Reed	Wadsworth
Colt	Johnson, S. Dak.	Robinson	Walsh
Cummins	Kern	Shafroth	Warren
Curtis	Lane	Shields	Weeks

The VICE PRESIDENT. On the amendment of the committee the yeas are 33, the nays are 11. There are three Senators present and not voting. There is not a quorum present. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gallinger	Norris	Smoot
Bankhead	Hitchcock	Oliver	Sterling
Brandegee	Hollis	Owen	Taggart
Catron	Husting	Page	Thomas
Chilton	Jones	Pomerene	Tillman
Clapp	Kenyon	Ransdell	Vardaman
Clark, Wyo.	La Follette	Saulsbury	Warren
Clarke, Ark.	Lea, Tenn.	Sheppard	Weeks
Culberson	Lippitt	Simmons	Works
Curtis	Lodge	Smith, Ariz.	
Fall	Nelson	Smith, Mich.	

The VICE PRESIDENT. Forty-two Senators have answered to the roll call. There is not a quorum present.

Mr. CLARKE of Arkansas. I move that the Sergeant at Arms be directed to notify the absentees and to request their attendance. I understand that the Committee on Agriculture and Forestry is in session; and I move that the Sergeant at Arms be especially directed to notify the Senators present there that the Senate is in session, and that they are expected to give some attention to service here.

The VICE PRESIDENT. The question is on the motion of the Senator from Arkansas.

The motion was agreed to.

The VICE PRESIDENT. The Sergeant at Arms will carry out the instructions of the Senate.

Mr. LEWIS, Mr. MARTIN of Virginia, Mr. FLETCHER, Mr. SWANSON, Mr. PHELAN, Mr. JOHNSON of South Dakota, Mr. MYERS, Mr. KERN, and Mr. WADSWORTH entered the Chamber and answered to their names.

The VICE PRESIDENT. Fifty-one Senators have answered to the roll call. There is a quorum present.

Mr. CLARKE of Arkansas. I move that the order directing the Sergeant at Arms to request the attendance of absent Senators be vacated.

The motion was agreed to.

The VICE PRESIDENT. The Secretary will proceed with the calling of the roll on the amendment of the committee.

The Secretary proceeded to call the roll.

Mr. BECKHAM (when his name was called). I transfer my pair with the senior Senator from Delaware [Mr. DU PONT] to the junior Senator from New Jersey [Mr. HUGHES] and will vote. I vote "yea."

Mr. CHAMBERLAIN (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence I withhold my vote.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE]. In the absence of that Senator I withhold my vote.

Mr. CURTIS (when his name was called). Repeating the announcement that I made before, I withhold my vote.

Mr. GALLINGER (when his name was called). Repeating the transfer that I made on the last roll call, I vote "yea."

Mr. MYERS (when his name was called). Announcing the same transfer of my pair as heretofore to-day, I vote "yea."

Mr. SAULSBURY (when his name was called). I transfer my pair with the junior Senator from Rhode Island [Mr. COLT] to the junior Senator from Tennessee [Mr. SHIELDS] and will vote. I vote "yea."

Mr. THOMAS (when his name was called). I again announce my pair and withhold my vote.

Mr. WILLIAMS (when his name was called). Repeating my announcement on the previous roll call, I vote "yea."

The roll call was concluded.

Mr. CHAMBERLAIN. My pair having returned to the Chamber, I desire to vote. I vote "yea."

Mr. OWEN. Has the junior Senator from New Mexico [Mr. CATRON] voted?

The VICE PRESIDENT. He has not.

Mr. OWEN. I withhold my vote.

Mr. DILLINGHAM. Owing to the absence of the senior Senator from Maryland [Mr. SMITH], with whom I have a pair, I withhold my vote.

The result was announced—yeas 44, nays 10, as follows:

YEAS—44.

Ashurst	Gallinger	Myers	Sheppard
Bankhead	Hitchcock	Nelson	Simmons
Beckham	Hollis	Newlands	Smith, Ariz.
Brandegee	Johnson, S. Dak.	Oliver	Smith, Ga.
Chamberlain	Lane	Overman	Smith, Mich.
Chilton	Lea, Tenn.	Page	Sterling
Clapp	Lee, Md.	Phelan	Thompson
Clarke, Ark.	Lippitt	Pittman	Vardaman
Culberson	Lodge	Pomerene	Walsh
Fall	Martin, Va.	Ransdell	Warren
Fletcher	Martine, N. J.	Saulsbury	Williams

NAYS—10.

Borah	Kenyon	Sherman	Works
Husting	La Follette	Smoot	
Jones	Norris	Wadsworth	

NOT VOTING—42.

Brady	Goff	McLean	Stone
Broussard	Gore	O'Gorman	Sutherland
Bryan	Gronna	Owen	Swanson
Burleigh	Harding	Penrose	Taggart
Catron	Hardwick	Poindexter	Thomas
Clark, Wyo.	Hughes	Reed	Tillman
Colt	James	Robinson	Townsend
Cummins	Johnson, Me.	Shafroth	Underwood
Curtis	Kern	Shields	Weeks
Dillingham	Lewis	Smith, Md.	
du Pont	McCumber	Smith, S. C.	

So the amendment of the committee was agreed to.

Mr. POMERENE. Mr. President, I wish to submit a conference report.

Mr. CLARKE of Arkansas. I can not consent to displacing the pending bill without the deliberate action of the Senate.

Mr. POMERENE. It is in order at any time.

Mr. CLARKE of Arkansas. It is in order at any time to present it, but not at any time to consider it.

Mr. POMERENE. If there is any discussion upon the report I will not press it.

Mr. CLARKE of Arkansas. With that understanding, I will not object.

FRAUDULENT ADVERTISING IN THE DISTRICT OF COLUMBIA.

Mr. POMERENE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10490) entitled "An act to prevent fraudulent advertising in the District of Columbia," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the Senate amendment numbered 1 and agree to the same with an amendment by also striking out the article "a" at the end of line 13, page 1, so that instead of only striking out the word "fraudulent" the part stricken out should be "a fraudulent."

That the House recede from its disagreement to the amendment of the Senate numbered 2 and agree to the same with an amendment. The Senate amendment numbered 2 adds the following language to the bill "purchase any goods, wares, or merchandise or anything of value or to."

That amendment (No. 2) is amended by striking the word "purchase" therefrom and inserting in lieu thereof the words "sell, barter, or exchange."

That the House recede from its disagreement to the amendments of the Senate numbered 3 and 4.

That Senate recede from its amendment numbered 5.

JOHN WALTER SMITH,
ATLEE POMERENE,
W. P. DILLINGHAM,
Managers on the part of the Senate.

BEN JOHNSON,
CARL VINSON,
W. J. CARY,
Managers on the part of the House.

The report was agreed to.

RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. CLARKE of Arkansas. Mr. President, the next amendment is one offered by the junior Senator from Missouri [Mr. REED]. I do not see him in his seat. I will not undertake to dispose of it in his absence unless we get through with the committee amendments. I ask that that amendment be passed over for the present.

Mr. SMOOT. It is on page 32.

Mr. CLARKE of Arkansas. Inserting lines 3, 4, 5, and 6, on page 32. I ask that all the matter in italics in the paragraph beginning on page 33, line 6, down to the end of the paragraph may be read. That is a single amendment

The VICE PRESIDENT. The amendment of the committee will be read.

The SECRETARY. On page 33, after the word "Mississippi," at the end of line 5, insert "and the Ohio River from its mouth to the mouth of the Cache River"; in line 7, after the word "which," to strike out "is" and insert "are"; and in line 16, after the word "action," insert "*Provided further*, That no part of the improvement of the Ohio River, with a view to the construction of locks and dams, shall be considered as transferred to or placed under the control and jurisdiction of the Mississippi River Commission: *Provided further*, That a survey, with a report, shall be made by the Mississippi River Commission of the Atchafalaya River in accordance with the general plan of said commission for the improvement of the Mississippi River, and in making such survey and report, if in their opinion the improvement of the Atchafalaya is desirable, consideration shall be given and recommendation made as to any plans for cooperation on the part of local interests," so as to make the clause read:

Mississippi River from Head of Passes to the mouth of the Ohio River, including salaries, clerical, office, traveling, and miscellaneous expenses of the Mississippi River Commission: Continuing improvement with a view to securing a permanent channel depth of 9 feet, $6,000,000, which sum shall be expended under the direction of the Secretary of War in accordance with the plans, specifications, and recommendations of the Mississippi River Commission, as approved by the Chief of Engineers, for the general improvement of the river, for the building of levees, and which may be done, in the discretion of the Secretary of War, by hired labor or otherwise, between Head of Passes and Cape Girardeau, Mo., and for surveys, including the survey from Head of Passes to the headwaters of the river, in such manner as in their opinion shall best improve navigation and promote the interests of commerce at all stages of the river: *Provided*, That of the money hereby appropriated so much as may be necessary shall be expended in the construction of suitable and necessary dredge boats and other devices and appliances and in the maintenance and operation of the same: *Provided further*, That the watercourses connected with said river and the harbors upon it, now under the control of the Mississippi River Commission and under improvement, together with the harbor at Vicksburg, Miss., and the Ohio River from its mouth to the mouth of the Cache River, which are hereby transferred to and placed under the control and jurisdiction of such commission, may, in the discretion of said commission, upon approval by the Chief of Engineers, receive allotments for improvements now under way or hereafter to be undertaken, to be paid for from the amount herein appropriated: *Provided further*, That the report of the Mississippi River Commission, contained in House Document No. 667, Sixty-third Congress, second session, shall not be construed as a project requiring special congressional action: *Provided further*, That no part of the improvement of the Ohio River, with a view to the construction of locks and dams, shall be considered as transferred to or placed under the control and jurisdiction of the Mississippi River Commission: *Provided further*, That a survey with a report shall be made by the Mississippi River Commission of the Atchafalaya River in accordance with the general plan of said commission for the improvement of the Mississippi River, and in making such survey and report, if in their opinion the improvement of the Atchafalaya is desirable, considerations shall be given and recomendation made as to any plans for cooperation on the part of local interests.

Mr. CLARKE of Arkansas. The paragraph ends there. The latter part of the amendment is simply for a survey. I did not notice that it was there. I take it for granted that there will be no objection to it, however.

The principal part of the amendment has for its purpose the extension of the jurisdiction of the Mississippi River Commission up to the mouth of what is known as Cache River, on the Ohio River. It seemed that the proximity of that locality to the Mississippi River in a way involves the levee system and bank protection that the Government has heretofore committed itself to, and that this is the most rational way in which to deal with the situation. The Chief of Engineers has now recommended that the jurisdiction of the commission be extended to that point.

I send to the desk his letter on that subject, which is self-explanatory. Let the Secretary read the letter.

The Secretary read as follows:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, May 4, 1916.

Hon. JAMES P. CLARKE,
Chairman Committee on Commerce, United States Senate.

SIR: 1. Replying to your letter of the 3d instant, asking that I furnish for the use of your committee at its meeting this morning such information as my office may possess relative to the necessity for work to protect the levees between Cairo and Mound City, Ill., on the Ohio River, I have the honor to inclose herewith copies of reports received this morning from the district officer, Maj. George R. Spalding, Corps of Engineers, which contain the only information available.

2. With regard to Maj. Spalding's suggestion that the lower Ohio River be placed under the supervision of the Mississippi River Commission, I beg to say that I fully concur in this suggestion, with the understanding that it applies to levee and bank protection work only. To carry out this suggestion it would only be necessary to make the following changes in the pending river and harbor bill as it passed the House of Representatives.

On page 29, at the end of line 1, add "and the Ohio River from its mouth to the mouth of the Cache River"; in line 2 substitute the word "are" for the word "is"; and at the end of line 11 add "*Provided further*, That no part of the improvement of the Ohio River with a view to the construction of locks and dams shall be considered as transferred to or placed under the control and jurisdiction of the Mississippi River Commission."

If the matter is thus placed under the control of the Mississippi River Commission, the commission could make proper investigations and take such steps as may be necessary and proper to protect the levees. From Maj. Spalding's reports it does not appear that the matter is especially urgent—at least, that the entire work is not especially urgent—and if this is the case, the commission could allot to it as much of the funds appropriated as might be necessary, and this could probably be done without serious interference with the other work assigned to the commission.

Very respectfully,

W. M. BLACK,
Chief of Engineers United States Army.

Mr. CLARKE of Arkansas. There are two other letters relating to the details of the project. It is not necessary to have them read, but I ask that they be printed in the RECORD in connection with this item.

The VICE PRESIDENT. Without objection, it is so ordered.

The letters referred to are as follows:

WAR DEPARTMENT,
UNITED STATES ENGINEER OFFICE,
Cincinnati, Ohio, May 2, 1916.

From: The District Engineer Officer, First District, Cincinnati, Ohio.
To: The Chief of Engineers, United States Army, Washington, D. C.
Subject: Levees at Cairo, Ill.

1. The following copies of telegrams are furnished for the information of the Chief of Engineers:

"WASHINGTON, D. C., *May 2, 1916.*

"Kindly advise me by wire my expense, Cochran Hotel, if you consider immediate revetment work on Ohio River bank between Cache River and North Levee necessary to save levee embankment. If so, can you give approximate estimate of cost?

"GEORGE PARSONS."

"CINCINNATI, OHIO, *May 2, 1916.*

"Regret can make no report Cairo levee work except on direct orders from Chief of Engineers.

"SPALDING."

2. Mr. Parsons is president of the Cairo Trust, which owns or controls the drainage district at Cairo. See map opposite page 2733, Report of Chief of Engineers for 1914. The Ohio River levee (8 on plat shown) was built by the drainage district.

3. While I have made no examination of conditions referred to by Mr. Parsons, at my last visit to Cairo he expressed anxiety as to this levee from erosion, and later wired me asking if I could not use some emergency funds to protect the bank. I replied that there were no funds available, and, in my opinion, congressional enactment would be necessary if the War Department was to do any work. There is no question but that bank protection would be a good thing, and is probably advisable. Whether it is in the interest of navigation is another matter. In this connection attention is invited to report of Col. Lydecker, dated December 7, 1903, printed as House Document No. 308, Fifty-eighth Congress, second session.

4. This information is furnished, as it is thought Mr. Parsons may visit the office of the Chief of Engineers in reference to the matter.

GEO. R. SPALDING,
Major, Corps of Engineers,
United States Army.

CINCINNATI, OHIO, *May 3, 1916.*

CHIEF OF ENGINEERS,
Washington, D. C.:

Erosion of bank will in time, unless arrested, destroy Big Four Railroad embankment, which is part of drainage district levees. Bank protection desirable. Would cost couple hundred thousand. Might divert current for less. Examination at low water needed for proper report. Property to be protected is railroad and 7,000 acres farm land. Do not believe Cairo city or Mound City levees endangered, nor is danger to railroad embankment imminent. Advisability of placing these lower Ohio levees under supervision Mississippi River Commission is suggested. Hasty letter mailed last night.

SPALDING.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. REED. Mr. President——

Mr. CLARKE of Arkansas. The next amendment is associated with the same matter, and we will then go to the matter for which the Senator from Missouri rose.

The VICE PRESIDENT. The next amendment of the committee will be stated.

The next amendment was, on page 34, after line 3, to insert:

The jurisdiction of the Mississippi River Commission is hereby extended so as to include that part of the Arkansas River between its mouth and the intersection thereof with the division line between Lincoln and Jefferson Counties, and any funds which are herein or may be hereafter appropriated by Congress for improving the Mississippi River between Head of Passes and the mouth of the Ohio River, and which may be allotted to levees and bank revetment, may be expended under the direction of the Secretary of War, in accordance with the plans, specifications, and recommendations of the Mississippi River Commission, as approved by the Chief of Engineers, and upon like terms and conditions for levees and bank revetment upon any part of the Mississippi River now under the jurisdiction of said commission, and in such manner as will best promote and accomplish the purposes for which commission was created, in so far as the territory hereby added to its said jurisdiction may be involved.

Mr. CLARKE of Arkansas. Mr. President, this amendment does not call for any additional appropriation. It simply extends the jurisdiction of the Mississippi River Commission so as to make it coextensive with the damage to be remedied by the creation of the commission. The levee in this locality extends from the mouth of the Arkansas River to the Red River. The flood line on the Mississippi River has increased in the last 10 years probably 6 or 7 feet. The levees on the Arkansas River will take care of an elevation of about 49 or 50 feet. The levees on the Mississippi River are designed to take care of the water up to the present high-water level, which is about 57 feet. The result is that the waters of the Mississippi River back up the Arkansas in times of overflow and come down behind the Mississippi front levee and overflows the vast section of the country in Arkansas and Louisiana. In addition, this backwater flow weakens the Mississippi River levee by saturating both sides of it, which is recognized as a great evil in levee maintenance.

The jurisdiction of the commission now extends up the Arkansas River to Red Fork. I am not entirely familiar with the exact number of miles. The purpose is to extend the jurisdiction several miles farther up the river, so as to make the zone of protection the same as that of the injury to be guarded against.

It was disclosed during the last high water, which was the highest in the history of the Arkansas Valley, that when the Mississippi River is at flood tide and the Arkansas River is also at its highest, that the water enters the basin south of the Arkansas several miles—I do not know the exact number—further up the Arkansas River than it was originally calculated it would do. The purpose of this amendment is to extend the jurisdiction of the commission so as to include that newly established limit of damage. It does not involve any new appropriation.

Mr. SMOOT. How many miles does it extend the jurisdiction of the Mississippi River Commission?

Mr. CLARKE of Arkansas. It would be a guess on my part to say, but I express the opinion that the added distance is not many miles beyond what is now under the jurisdiction of the commission. The commission when it comes to act will determine the exact boundary where its intervention is actively necessary.

Mr. SMOOT. That is, the Mississippi River Commission today has jurisdiction over a portion of the Arkansas River?

Mr. CLARKE of Arkansas. A very small part of it—up to what is called Red Fork, one of the landing places on the river by which the distances are designated.

Mr. SMOOT. It simply extends the jurisdiction of the commission to the point where the waters of the Mississippi do not get behind the levees on the Arkansas.

Mr. CLARKE of Arkansas. Substantially, yes. The commission always exercise a discretion in all matters coming before it. They do not expend money unless they find it necessary, and it is generally in cooperation with the local community. I repeat the pending amendment does not call for any additional appropriation.

The amendment was agreed to.

Mr. CLARKE of Arkansas. The Senator from Missouri [Mr. REED] has an amendment. It appears at page 32, lines 3, 4, 5, and 6, which he doubtless will explain to the satisfaction of the Senate.

Mr. REED. Mr. President, I think the best statement I can make of the facts is in a letter written by Mr. Glenn, who is himself a member of the Mississippi River Commission. I will read the letter. I will say in advance it will be noticed this item is only $15,000. Mr. Glenn says:

LOUISIANA, MO., *May 12, 1916.*

Senator JAMES A. REED,
Washington, D. C.

DEAR SENATOR: In reference to matter of raising dike in the Mississippi River opposite Louisiana, Mo., the facts are as follows:

Some years ago the Government permitted the Chicago & Alton Railroad Co. to build an approach for a bridge from the Illinois side of the river below Louisiana, Mo., about 1,500 feet or more in length out into the river. A little later it permitted the railroad company to put in a large dike about 2,500 feet north of this approach above mentioned, extending into the river, for the purpose of throwing the current to the Missouri side to create deep water at the draw of bridge. Later the Government built a large dike 2,000 or 3,000 feet north of first-mentioned dike for this same purpose. The railroad approach and these dikes have caused the river on the Illinois side from the embankment north to fill with sand bars for 2 miles. The ferry for a number of years has been landing at the end of last-mentioned dike in low water. The Government extended and raised this dike for this purpose once, but the dike settled, and now when the stage of water reaches 7½ feet above low water (as per Government gauge at Chicago & Alton bridge) the ferry can not land on this dike, but must get into the shore through narrow chutes, and at last land against a

railroad embankment, which is extremely dangerous, and the landing is only made with much difficulty. This is a great highway for interstate automobiles and wagon traffic. From talks and correspondence it seems those in authority think the law which says that money appropriated "shall be used in aid of navigation," etc., means exclusively up and down stream, and not across the stream. The Government's action, stated before, caused this condition, and in justice should give some relief.

Yours, truly, ED. A. GLENN.

I desire to present in this connection a letter from Speaker CLARK. Louisiana, Mo., is in Speaker CLARK'S home county, and I read it not because of his importance as an individual but because he writes with a full knowledge of the facts.

THE SPEAKER'S ROOMS,
HOUSE OF REPRESENTATIVES,
Washington, D. C., May 13, 1916.

Hon. JAMES A. REED,
United States Senate Chamber.

MY DEAR SENATOR: In connection with, or indorsement of, the letter from Col. Glenn, of the Mississippi River Commission, I hope it will be possible for the Senate to adopt an amendment to the river and harbor bill for raising a Government dike opposite Louisiana, Mo., in order to afford a suitable ferry landing.

There was originally an excellent ferry landing at all seasons of the year. About 40 years ago, however, the Chicago & Alton Railroad Co. was allowed to build an embankment on the Illinois shore in connection with their bridge across the Mississippi River at that point. Later the United States Government put in a big dike just above the railroad embankment straight out into the river.

The result of these dikes has been the practical destruction of the ferry landing at that point by the formation of continuous sand bars. When the river rises so as to make it impossible for the ferryboat to land at the end of the Government dike, it prevents the running of the ferryboat, which, at this point, is practically the only means of communication between Missouri and Illinois for miles up or down the river.

Farmers from a large section of Illinois find it necessary to go to Louisiana on business and the ferryboat is a real necessity to a great many.

An appropriation to raise the dike at this point so as to make a ferry landing possible would be a real and genuine aid to navigation, and would be a great convenience to a great many people on both sides of the river.

With kindest regards, I am your friend,

CHAMP CLARK.

Mr. President, those are the facts very briefly. The Government made this condition by virtue of having built or permitted the building of various dikes out in the river. This simply proposes to raise the Government dike so that it comes above the high-water mark. It is a very small appropriation and I hope it will be accepted.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

The next amendment was, on page 35, line 12, after the word "maintenance," to strike out "$1,200,000" and insert "$1,500,000," so as to make the clause read:

Mississippi River from the mouth of the Missouri River to Minneapolis, Minn.: Continuing improvement and for maintenance, $1,500,000.

Mr. KENYON. Mr. President, I hope before that amendment is agreed to that we may have some explanation of it. Of course it is a very small matter—only $200,000; very trivial—but the bill carries for the Mississippi River from the mouth of the Missouri to Minneapolis as it came from the House $1,200,000. That part of the river was allotted last year by the Army engineers $1,000,000; in 1914 it was allotted $800,000.

I realize, Mr. President, that the Mississippi River ought to be a great channel of commerce. It is the river that flows the entire length of my State, and I have received a great many letters condemning my attitude as to this bill from people along the Mississippi River in my State. I do not propose, as far as I am concerned, to vote for appropriations for the Mississippi River in order to get what my people may think they ought to have along there in a bill that carries with it so many other propositions that seem to me to be very indefensible. It does seem that at this time in the condition of our national finances, instead of increasing the appropriation for the Mississippi River from the mouth of the Missouri River to Minneapolis, it ought to be cut down at least to the amount which was proportioned last year and which seems to have carried on the work.

The Mississippi River has lost 90 per cent of its commerce in the last 40 years. We have expended approximately $150,000,000 on the Mississippi River. There have been certain lands reclaimed. The expenditure has probably had an effect upon freight rates. If there is any channel in this country that could be developed for commerce, it would seem to be the Mississippi River. What are the cold facts about the commerce of that river? I want to put them into the RECORD as showing that the commerce on the Mississippi River has simply been running down; and while the commerce, according to the figures of the Army engineers, appears to be large, yet, when analyzed, when the brush is taken out, and the gravel and the sand and the logs and the lumber and the animals and the automobiles ferried across the river are taken out, it is rather a small commerce on which to have expended this tremendous amount of money.

From the mouth of the Ohio to the mouth of the Missouri the bill carries $350,000. We have heretofore appropriated $17,351,469.85. The freight traffic for the year 1914 on that part of the river was 204,118 short tons. Of that, 6,079 short tons were transported 5 miles; of that, lumber comprises 5,683 short tons; logs, 46,202 short tons; coal, 2,780 tons, transported 5 miles.

As to the commerce from the mouth of the Missouri River to Minneapolis—and I want to refer just briefly to that commerce, for it would be expected, and it would seem, that there would be a large commerce on that part of the river—on page 2767 of the Army engineers report for 1915, it is stated:

Lumber: The lumber business, formerly of great magnitude on the river as connected with the movement of logs and lumber, has, owing to the destruction of the forests in Wisconsin contiguous to the Mississippi River and tributaries, dwindled so that in 1914 there was only a comparatively small quantity of lumber and lath floated from St. Croix River to Guttenberg and other points. The lumber cut at Minneapolis during 1914 was 89,873,200 feet b. m., but none of this product was floated on the river below the falls of St. Anthony, although it is believed that on completion of Lock No. 1 a large part of this product will find its way down river.

In 1914 on that portion of the river the traffic was as follows:

Upper Mississippi River freight statement for 1914.

Designation.	Short tons.	Ton-miles.	Valuation.
Rafted lumber and lath	13,211	4,482,868	$169,114
Miscellaneous freight	1,132,574	15,472,577	40,900,063
United States material	281,185	2,115,662	254,864
Total	1,426,970	22,071,107	41,324,041

That would seem to be a large commerce, but on that same page of the Engineer's report there is classified this nearly a million and a half short tons of commerce. I ask to have that classified freight-traffic table inserted in my remarks, without taking the time of the Senate to read it.

The VICE PRESIDENT. Without objection, permission to do so is granted.

The table referred to is as follows:

Classified freight traffic, 1914.

Articles.	Amount.		Valuation.	Average haul.	Ton-miles.
	In customary units.	In short tons.			
				Miles.	
Brick	488,650 pieces	1,475	$4,216	10.2	15,059
Brush	295,427 cubic yards	37,002	98,423	18.1	670,594
Cement	2,474 tons	2,474	24,413	7.6	18,752
Coal	18,678 tons	18,678	62,271	11.8	219,956
Corn	170,706 bushels	4,797	113,070	4.7	22,318
Farm produce	3,344 tons	3,344	100,335	6.0	20,110
Fish	6,783 tons	6,783	629,401	5.97	40,500
Gravel	116,745 cubic yards	178,017	88,624	11.5	2,024,850
Hay	1,641 tons	1,641	29,515	3.4	5,583
Lath	7,356,850 pieces	2,552	27,447	140.7	359,038
Live stock	61,803 head	21,502	4,234,927	1.2	25,786
Logs	2,627,221 feet b. m.	8,853	64,296	22.5	199,073
Lumber	17,197,826 feet b. m.	28,247	419,625	160.0	4,265,265
Merchandise	87,404 tons	87,404	24,672,790	67.8	5,926,745
Oats	59,845 bushels	959	85,490	1.4	1,397
Rock	194,791 cubic yards	261,805	182,656	8.9	2,339,702
Sand	403,257 cubic yards	599,558	195,102	4.4	2,623,769
Shells	10,186 tons	10,186	195,431	39.4	401,356
Shingles	550,000 pieces	56	1,665	4.1	231
Teams	20,240	30,201	5,206,900	1.0	30,752
Wheat	64,535 bushels	1,936	65,272	2.5	4,922
Wood	25,991 cords	41,885	121,888	16.1	673,312
Miscellaneous	77,615 tons	77,615	4,700,284	28.1	2,182,037
Total		1,426,970	41,324,041	15.5	22,071,107

Mr. KENYON. I wish, however, to call attention to the fact that of that traffic brush comprises 37,002 short tons, the average haul being 18.1 miles; coal, 18,678 tons, the average haul, 11.8 miles; cement, 2,474 tons, average haul, 7.6 miles; gravel, 178,017 tons, average haul 11.5 miles; live stock, 21,502 tons, average haul, 1.2 miles. Apparently the traffic is all across the river. Logs, 8,853 short tons, average haul, 22.5 miles; lumber, 28,247 tons, with a very much longer haul, 160 miles; rock, 261,805 tons, with a haul of 8.9 miles; oats, 959 tons, with an average haul of 1.4 miles; shingles, 56 tons, average haul, 4.1 miles; teams, 30,201 tons, with an average haul of 1 mile. And so on it goes.

For the year before the commerce on that portion of the river mounted to, logs, short tons, 64,489; rafted lumber, 13,570 tons;

miscellaneous freight, 1,294,864 tons; United States material, 772,392 tons; making a total of 2,145,315 short tons.

That seems to be a very large commerce, but when analyzed we find that of that commerce brush for river construction work constituted 82,450 tons; gravel dredged from the river, 398,179 tons; rock for river work, 708,066 tons; sand dredged from the river, 562,040 tons; logs, that are floated on the river and have been all these years, 98,268 tons; lumber and wood barged, 64,408 tons; animals ferried across the river, 55,322 tons; automobiles ferried across the river, which are put in as "commerce" by the Army engineers, 6,034 tons, making a total of that class of freight of 1,974,980 tons that could be floated in 3 or 4 feet of water and which was actually so floated, leaving less than 200,000 tons of commerce, which was hauled on an average not over a distance of 34 miles.

I merely put these figures into the RECORD. I do not know what is the matter with the commerce on the Mississippi River. There ought to be a great commerce there. We have spent enough on the Mississippi River, if we were doing this as a proposition for regulating railroad rates, to build a railroad on each side of that river, and that would be just as good a way to regulate the railroad rates.

Mr. SHAFROTH. Mr. President, will the Senator from Iowa yield for a question?

Mr. KENYON. Yes.

Mr. SHAFROTH. I should like to know whether or not there are discriminatory rates made by the railroad companies? There has been considerable agitation for a good many years about requiring railroad companies to charge no more for a short haul over the same line than for a long haul. I have always thought, especially as to the Mississippi River, that the lack of commerce upon our waterways was due very largely to the fact that the railroads charge such low rates to terminal points or to places near terminal points that they would sometimes transport freight almost at a loss and make it up by charging high rates to intermediate points. That condition, I can readily see, would hurt commerce very much upon any river; and it seems to me that there ought to be incorporated in this bill a provision to the effect that no charge shall be made by a railroad for a short haul greater than for a long haul over the same line of road. If that were the case, the railroads could not make up the losses which they sustain on the through freight by charging it up to the intermediate points, and thereby a river which is susceptible of navigation and of carrying a considerable commerce between the larger cities or towns would no doubt have a better chance to survive. I should like to ask the Senator whether or not he has examined that matter so as to see whether any of the appropriations in this bill are influenced by that consideration?

Mr. KENYON. Mr. President, I have given a good deal of thought, of course, to that subject. There is not any doubt about what the Senator says. In my judgment, it has much weight; and the truth is the railroads have done that very thing.

Mr. SHAFROTH. Then, why would it not be wise to put a provision in this bill to the effect that that practice may not be continued and prohibiting the Interstate Commerce Commission from allowing a charge for a short haul to be greater than for a long haul over the same line in the same direction?

Mr. KENYON. The Interstate Commerce Commission has that power now.

Mr. SHAFROTH. The Interstate Commerce Commission has it now; but if you make the law absolute, so that the railroads can not depart from it for the purpose of meeting competition or anything else, it seems to me it would be wise to do so. If that were done we would have river navigation and river traffic to a large extent in this country. I believe that is one of the things that has prevented the development of traffic on the rivers of the United States.

Mr. KENYON. I think that is true.

Mr. SMOOT. Mr. President——

Mr. KENYON. I yield to the Senator from Utah.

Mr. SMOOT. I desire to suggest to the Senator from Colorado that, in my opinion, the commerce on the Mississippi River will never grow much greater than it is to-day until there is freight in sufficient quantities up the river as well as down the river. It is impossible to make traffic profitable by river transportation or any other kind of transportation where there is freight only one way.

Mr. SHAFROTH. I should like to ask the Senator how it is that the railroads succeed in securing freight both ways and make great profits? Is it possible that steamboats can not secure the same kind of business?

Mr. SMOOT. It is possible, and it is a fact that they do not have it. The railroads traverse the settled portions of the country, either by the main line of the road or side lines, and reach every hamlet in the country.

There is an immense amount of freight upon the railroads, both going and coming, but upon the Mississippi River the freight obtained is that taken at the large centers of commerce in the Northern States and transported to the South, and there is little in the South to be transported up the river to be distributed at the points at which the down-river freight is loaded. It is impossible to make water transportation profitable under those conditions, and no matter how much money the Government of the United States spends on the Mississippi River it will never be a success, so far as transportation and commerce are concerned, until freight can be shipped both ways on the river.

Mr. SHAFROTH. Mr. President, if the Senator from Iowa will permit me, we have a number of railroads, for instance, the Illinois Central, which pretty nearly parallels the Mississippi River, and which extends in all directions on the line of that river from New Orleans to St. Louis and Chicago and clear up to Minnesota; and it seems to me that, if that road, with its numerous trains each day, gets sufficient traffic to make it pay each way, steamboats, with the natural advantages which they have, would of necessity be a paying proposition.

I believe that this is one of the important factors to be determined as to whether we can ever make the Mississippi River a successful highway of commerce. I want to call the attention of the Senator from Utah to the fact that we have had the same trouble out West. Our freight rates were such at one time that on shipments from New York to Grand Junction it was advisable to ship via San Francisco and back to Grand Junction. Even in recent years shipments have been made from New York to Salt Lake City and back to Grand Junction in order to get a lower freight rate than from New York to Grand Junction. It seems to me when those conditions exist and we have an opportunity in a bill to put in a provision that the railroads shall not be permitted to charge a higher rate for a short haul than for a long haul over the same line—and nobody, it seems to me, can contend that such a system is equitable—that we ought to do it, and I believe it will make our rivers carry a great deal more commerce than they do now.

Mr. SMOOT. Mr. President——

Mr. KENYON. I yield to the Senator.

Mr. SMOOT. I simply want to emphasize what the Senator from Colorado [Mr. SHAFROTH] has said in relation to the unjust freight rates charged to intermountain points by the railroads as compared with the freight rates to the Pacific coast, we will say. Years ago I had occasion to go to San Francisco to buy a few carloads of wool. I purchased the wool and went into the railroad company's office and asked what the freight rate was that day. I was told 75 cents a hundred. I said, "I have two or three carloads which I desire to ship." The railroad official asked, "Where do you want to ship them—to Boston or Philadelphia?" I said, "To neither place; I want to ship them to Provo, Utah." "Oh," said he, "the rate to Provo is $2.25 a hundred." The distance from San Francisco to Provo, Utah, was not one-third of the distance from San Francisco to Boston, and yet the freight rate from San Francisco to Boston was 75 cents and the freight rate from San Francisco to Provo was $2.25—two-thirds of the distance and three times the amount. That is only a sample of what we had to contend with for years and years in the intermountain country.

Mr. REED. Mr. President, will the Senator from Iowa permit me to say a word?

Mr. KENYON. I was about through, but I will yield to the Senator.

Mr. REED. On this particular point, I called the attention of the Senate several days ago not only to the inequalities of these rates, but to the fact that since the Panama Canal had been opened the roads have been allowed to readjust their rates to and from points where it is claimed the railroads come in competition with the water rates through the Panama Canal, with the result that a readjustment of rates is going on of such a nature that the discrimination against the interior parts of the country, to which the Senator from Utah [Mr. SMOOT] and the Senator from Colorado [Mr. SHAFROTH] have both adverted, is now pressed upon us in an aggravated form.

I repeat what I then said—that the early business of Congress must be to meet this situation. There are two ways to meet it, probably—one by the creation of water competition, which would result in a readjustment of rates based upon the new water competition; the other by legislative enactment, which may or may not be an easy task to accomplish. I say now that I intend in the very near future to introduce a bill affecting the long and short haul clause; but, so far as this bill

is concerned, I do most earnestly call the attention of the Senator from Iowa to the fact that whenever there is a river transportation, however small it may be, it affords a basis for adjustment of railroad rates upon the basis of water competition so that you may actually have a condition of substantially little river transportation, and yet that little river transportation may result in the making of railroad rates so that the general benefit to commerce is almost inestimable. And at this particular time, when the great central part of this country, in which the Senator's own magnificent State lies, is confronted by not only a potential or prospective but by an absolute discrimination and disadvantage because it is alleged to be without water competition, every man ought to give himself pause who represents that part of the country and who does anything to prevent the creation of a water competition.

I have taken longer than I intended, but I want to add one word. I want to illustrate the situation.

Since the Panama Canal has been opened, the railroads having their termini on the Pacific coast at harbors touched by boats have claimed that the long-and-short haul clause of the interstate-commerce act should be set aside as to those points because of this competition by water, and the Interstate Commerce Commission in several cases has ruled with the contention of the roads, the result being that goods can now be shipped from the Atlantic coast to the Pacific, then into the interior, and I believe I speak by the card when I say farther into the interior than the State of Utah, represented by the Senator who has just spoken [Mr. SMOOT], even on almost to the Mississippi River, cheaper than those goods can be shipped directly across the continent to the same point. That would not be true to so great an extent if the representatives of that territory could go before the Interstate Commerce Commission and show a water competition at that point, and insist upon rates being based upon the water competition.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Colorado?

Mr. REED. I do.

Mr. THOMAS. I merely wish to remind the Senator that the condition he describes is not something that has occurred since the opening of the Panama Canal. That situation the people of my section of the country have been suffering from for over a quarter of a century. It is not due to any new condition created by the completion of the Panama Canal. It is an old sore, and is getting worse, instead of better.

Mr. REED. But, Mr. President, if the Senator will pardon me, I think he did not hear all of my statement.

Mr. THOMAS. Yes; I heard it all. I may have misunderstood it.

Mr. REED. The condition to which the Senator refers has existed for many years. In order to meet that condition, there was placed in the interstate-commerce law a provision that more should not be charged for a short haul than for a long haul; but at the same time the power was vested in the Interstate Commerce Commission, whenever it found as a fact that there were competitive conditions rendering it desirable or necessary—I do not quote the exact language, but my recollection of it—the Interstate Commerce Commission could set aside the long-and-short haul clause.

What I am calling the attention of the Senate to is this: Since the building of the Panama Canal, the railroads in a number of cases have obtained rulings from the commission to the effect that ports on the Pacific coast where steamships also run are these competitive points within the meaning of that act, and they have set aside the long-and-short haul clause by a direct order; so that the condition to which the Senator from Colorado adverts is being aggravated, and the necessity for some action is manifest.

I say to the Senate that under those conditions I think we ought to be trying to build up a commerce on these rivers. Even if the commerce on the rivers be not so great as apparently to pay for the investment, yet, in estimating the real benefit, you must take into consideration the fact that railroad rates to points where there is water competition are cut enormously; so that the right estimate and the just estimate is not dependent merely upon the commerce upon the river but upon the saving upon all of the commerce to and from the points in question.

I say to the Senator now that the business upon the Missouri River which has sprung up there in the last few years has had the effect of reducing railroad rates and of enabling escape from raises of railroad rates. Always we are able to claim and to show an actual river competition. And now I say again to the Senator from Iowa, whom I regard as one of my best friends, and whom I also regard as one of the best men in the Senate, that if he will but put his shoulder to the wheel and help us, we can place the upper Missouri as far at least as Sioux City in such condition that his great State will receive the benefit of railroad rates based upon this water competition.

Mr. KENYON. Mr. President, the discussion, of course, is interesting. We have been discussing this matter off and on here for a number of days. My State, I think, has been a sufferer from discriminatory railroad rates perhaps as much as any State in the Union. We have the Mississippi on one side of us, and that is made a basic point. We have the Missouri on the other, and that has been a basic point also to some extent. But now take just what the Senator says: Are we not down to the question of regulating railroad rates (1) by water competition, or (2) by proper legislation?

I am willing to join the Senator in any effort to get legislation; or, if the other is the only way, and I should want to think a good while about that, because of the great expense attached to it, I might join him along that line. I do not agree it is the only way. If we say we must have water competition to regulate railroad rates, then do we not confess Congress to be incompetent to formulate laws which will regulate them?

When I first came to the Senate I introduced a bill to give the Interstate Commerce Commission power to fix a minimum rate. It seemed to me the commission should have that power. They could determine then that railroads should not make less than a certain rate, and thus prevent them from reducing their rates in order to drive out water competition.

There is another view that comes to my mind from the suggestion of the Senator. Along the Missouri River and along the Mississippi River, with those as basic points, the rates are reduced, and the people along those rivers get the benefit of those rates. The railroads, I assume, under the law are entitled to earn a reasonable return upon the investment. Now, if the rates are made to the people along these rivers for this lesser amount, somebody has to make up that. The people in the interior, who can not have the river transportation, must pay this additional amount to make up what the river points are gaining.

It has always seemed to me that there was an element of injustice in that. Just as in the Panama situation, which the Senator cites, the people in the interior must pay to make up for the reduction in the rates granted to the ports along the ocean by reason of the Panama Canal. All the people are compelled to contribute to dredge or canalize rivers, and then the people along the rivers get the benefit of rates brought about by the contributions of all the people. We may well ask ourselves if that is fair.

So the whole subject is one of such seriousness that I have doubted if we were ever going to solve it until the Government was compelled, possibly, to take over the railroads. I am not ready as yet, however, to accept that as the only alternative. If we had a situation like Germany, the problem would be a different one. They have handled it because they compel the railroads to cooperate with the waterways, and they do not permit them to make rates that will drive the commerce off of their streams. The Government owns both railways and waterways.

Mr. SHAFROTH. Mr. President, does not the greatest evil that exists in this matter arise from the fact that the railroad companies, when there is any movement in the way of forming companies for navigation on these rivers, make the rate at these terminal points or at these large points so low that when the navigation company examines into it its officials conclude that they can not make any money at that rate, and consequently they do not build their steamboats to go on the rivers? The result of it is, that after that occurs and the movement has subsided, then the railroad companies, to a large extent, reestablish the higher rates.

There is something very peculiar about this interstate commerce law. I do not know whether Senators have ever examined the wording of it or not; but the wording of it is that no higher charge shall be made for a short haul than for a long haul over the same line, in the same direction, for persons and other like property.

Mr. KENYON. Under the same circumstances.

Mr. SHAFROTH. Yes; but the language is, "persons and other like property." What does that mean? What is "like property" to persons? Of course it would be impossible to charge a person going to a given place a higher rate for a short haul than for a long one, because he would get off the car. Since they have put in those words, "persons and other like property," I believe there would be a great contest as to whether there is anything whatever of a restriction upon the railroad

companies to keep them from charging a greater sum for a short haul than for a long one.

If the railroad companies lose money by coming into competition with rivers and harbors, then it seems to me they have no right to make it up from the people living in the interior. Besides that, it seems to me that when they attempt to control that traffic in that manner it has an effect that is exceedingly bad on the interior of the country and upon these intermediate points.

There is no reason why the railroads should run in competition with boats on rivers any more than what is reasonable. The idea that discrimination should be given to the railroads to the extent of permitting them to lose money in order to get freight at a certain point where there is river competition is untenable. The river boats have to live and should be permitted to live; and you are not going to have fair traffic conditions on the rivers unless you permit them to live by a law that will compel the railroad companies to charge no more for a short haul than for a long haul over the same line.

Mr. WILLIAMS. Mr. President, when the interstate-commerce act originally passed the House of Representatives, and was called then by the name of a distinguished Senator from the South, it conveyed a provision, absolute and unconditional, that under no circumstances should more be charged for a short haul than for a long haul. It reached the Senate of the United States, and when it came here the seemingly very innocent words "under similar conditions" or "under similar circumstances"—I have forgotten which; "similar conditions," I believe, was the language—were introduced. That language was then construed to give a discretion, and that discretion was exercised in this way: It was decided that when a railroad was subjected to water competition it had a right to meet that competition by lowering its rates to the river or lake or seacoast point to the rate at which it could get its share of the traffic.

Now, "its share of the traffic" meant nothing. That meant the point at which it could get the traffic, because if a railroad can give you the same rate that a watercourse can, the railroad has the advantage of delivering the product very much more quickly. So "at the same rate" it has an advantage, and the shipper, of course, took the railroad rather than the watercourse.

Mr. President, that law was afterward changed, and was expressed as the Senator from Colorado [Mr. SHAFROTH] a moment ago quoted it. It became still more vague, still more indefinite, and added, if anything, still more discretion to the rate-fixing power.

I have said once before upon the floor of the Senate and I have said several times at the other wing of the Capitol that you will never under the sun escape the evil of sacrificing freight rates at all the interior points to seaports and termini rates until you go back to the original idea that under no circumstances must railroads ever charge more for a short haul than for a long haul, except on goods billed for export and not subject to stop in transitu.

The result of the present law is that you sacrifice all interior commerce—you make the rates that the railroads charge in competition with watercourses less than the cost of the service—and the railroads must necessarily recoup their losses on long hauls by charging an increased price for interior traffic. The consequence of the discretion lodged with the Interstate Commerce Commission has been that the entire commerce of the Mississippi and Ohio Valleys and the Rocky Mountain States of the country has been sacrificed to the building up of New York, Baltimore, Philadelphia, Norfolk, Savannah, Charleston, New Orleans, San Francisco, and whatsoever ultimate destinations of commerce there may be. While the railroads carry for cost or for less than cost their freight between New York and San Francisco they must make it up by an increased cost from San Francisco to Denver and from New York to Denver, and while they carry it for less than cost from New York to New Orleans to meet the freight rates around Cape Hatteras, and even around Florida, which ordinarily would be cheaper by water rate than they are, they make up by the freight rates which they charge from Crystal Springs or some other place along the road to some other equally unrecognized point intermediate and not final.

There are places in the State of Mississippi, or there were a few years ago, and I suppose are yet, where you could carry a bale of cotton for $1.25 to New Orleans because it was a river course, although the bale of cotton was not carried on the river but was carried on the railroad, and where 12 miles out a shorter distance, 50 miles out a shorter distance, 75 miles out a shorter distance, the freight rates were greater because the point of departure was off a watercourse. Twelve miles out from the river it was $3.50 instead of $1.25.

That has been the system. In other words, you have chosen deliberately to sacrifice the interior commerce of the United States to the commerce between the termini. You have done that deliberately. The law does it.

Now, what is the consequence? The railroads are congested. They can not carry the freight. Their charges from terminus to terminus are very cheap as compared with all European countries. So that half of the argument that our railroad men make over here in behalf of our system as against those abroad are based upon these reductions of averages that come from rates from water terminus to water terminus. But if you take the interior commerce, 100 miles, 200 miles, 500 miles from places which have no water competition, you have the highest freight rates in the world. The average is false if by it is meant to be spelled the general welfare and the price of transportation of the goods of the people. You are sacrificing the people who live in the interior of the country to the people who live upon the seacoast, or else you are sacrificing the people who live in the Middle West off of the river courses to those who live upon the rivers and the lakes.

Thus you not only have created a congestion of the freight business for the railroads, but you have created a vacuum of freight business for the river. Why? Because you permit that railroad, regardless of what it has to recoup upon intermediate points, to make its freight rate from water terminus to water terminus so cheap that a man dares not build a river boat and put it in the business, for if the railroads temporarily lower their freight rates, which they can not do now overnight as they used to, but which they can still do after notice, the boat goes out of business. Then if a man attempts to build a boat to put in the trade he has not been in a week or two before, the railroad can go to the Interstate Commerce Commission and get permission under this discretion granted to meet the boat rate, and the minute it meets it equally the boat can not compete, because the boat can not deliver as quickly.

I have heard a lot said here about the German efficiency, and a lot of it has disgusted me, because there is no peculiar German efficiency over and above ours or over and above that of other countries. There is a very efficient class in Germany, and that is the governing class. The masses of Germany are less well prepared than we, or the English even, are to meet the problems of the world. The élite, the people who do the thinking, the professors, the men who do the leading, and the German at the moment of his birth is seeking a leader, while the American at the moment of his birth is seeking to be a leader—the men who do the leading are very much more efficient than we are. The Government as a government is more efficient. The people as individuals are less so. We are their superiors in enterprise and in courage and in intellect; but, notwithstanding that, there are some things about the German Government in connection with this question that appealed to me as a matter of opinion.

Mr. SHAFROTH. Mr. President——

Mr. WILLIAMS. Wait a minute. Under the "iron-and-blood" rule of Bismarck and the men who followed him when they came to building up the commerce of Germany, they laid down the iron-clad rule that under no circumstances should the charge made for a short haul exceed that made for a long haul going on the same line and in the same direction.

Mr. SMOOT. Unless for exportation.

Mr. WILLIAMS. Unless for exportation; the Senator is right; but that has nothing to do with this particular question. That is a matter relating to foreign relations, and I have acquired the habit of driving directly at the point, and I frequently forget to condition things so as to include everything or to include the branches that grow out of the tree when I am talking about the trunk.

They made the ironclad rule that under no circumstances should the charge made for a short haul in the same direction on the same line exceed that for a long haul. What is the consequence? When I was a boy in Germany, the Rhine carried steamers like the Hudson now carries tourists and passengers from New York to Albany. The Rhine carried up steamers from Cologne to Coblenz to Mainz and all the way as far as navigation went, to Mannheim, and somewhat beyond. Mannheim was a little, sleepy village; it amounted to nothing. I do not remember it except for the fact that we went down there once to hear some magnificent Wagner opera. That is about all it then amounted to. Mannheim to-day is one of the chief commercial cities of Germany. The entire Rhine is lined from way above Mannheim, mighty near to Schaffhausen, clear down to Rotterdam beyond the German boundaries with freight ships, doing what? Carrying lumber, iron ore, the heavy products concerning which the matter of expedition of freight is a secondary consideration, while the railroads on both sides of the Rhine, on the left and on the right, are full of the other sorts

of freight that are carried. The railroads are never congested, because when it comes to the coal and the iron and the lumber and the locomotives and the harvesting machines and the great, heavy slow freight the river carries them.

Now, here in the United States is the great Mississippi River. The Rhine is a mere pigmy in comparison with it. If you look at two drawings on the same scale and the Mississippi was that big [indicating], you could not see the Rhine at all in breadth and you could hardly see it in length. From St. Paul down to New Orleans if there is a through freight boat I do not know it. There are boats from Cairo to St. Louis. There are boats from Memphis down to the mouth of the St. Francis, the White, and the Arkansas. There are boats from New Orleans up the Red River and running out; but there are no through freights on the Mississippi River any more. Why? Because if you had $5,000,000 and wanted to put it into those boats the railroads, under the permission given by law, would bankrupt you in six months, and if you had any sense you would not enter the arena. If you have not much sense, and generally in that case you have not much money, either, you build one or two boats and you undertake the venture, and at the end of a week or two you are out of the business.

I have known in my experience not less than 12 boat lines originating from the tributaries of the Mississippi organized to travel up to St. Louis and down to New Orleans which have been bankrupted in less than a year. Now and then I have seen the merchants of a neighborhood gather together and say, "These railroad rates are extortionate; we want river transportation." Then after a little while the P Line, as my friend from Arkansas remembers, or some other line of these I remember, has gone out of business. It has to go out of business.

Senators, I do not care whether you dig a channel 14 feet deep from the Lakes to the Mississippi or not; unless you change this law you will never have commerce upon the river. That does not mean that equipping the river for carrying cheap commerce does not benefit the people. It benefits the people by making the railroads at all river points, at any rate, reduce their freight rates. But you never will get rid of the great evil of a congestion of freight upon the railroad and paucity of freight upon the river unless you go back to the present German principle and the original American Regan principle, which is an ironclad rule that under no circumstances shall the freight for a short haul exceed that for a long haul.

Mr. SHAFROTH. Mr. President——

Mr. WILLIAMS. One minute. I have been told, though I have not examined it, that the ordinary freight rate from New York to Denver—I was told the other day—is the ordinary freight rate from New York to San Francisco plus the rate from San Francisco back to Denver. Is that so?

Mr. SHAFROTH. No; I do not think it is that much. There was a time when Grand Junction, in our State, was the point; but I do not think that that is the case now.

Mr. WILLIAMS. The Senator says it is not quite true now. It is approximately true, is it not?

Mr. THOMAS. It is very much more than the through rate to the coast.

Mr. WILLIAMS. So it is approximately true.

Mr. President, then, under the present system none of our work in improving watercourses can do any good except to prepare a passageway for freight when we have sense enough to change the law. I am in favor of this provision because I am in favor of preparing the passageway beforehand.

Mr. THOMAS rose.

Mr. WILLIAMS. Now, if the Senator from Colorado will pardon me——

Mr. THOMAS. I was going to remind the Senator that the mere imposition by the German Government of a rule prohibiting the railroads from making discrimination between a long and a short haul does not meet the difficulty. The Senator overlooks the fact, for the moment, of course, that in Germany the Empire owns the railroads and fixes a price for heavy freight that is practically prohibitive, thus forcing that class of transportation upon the river.

It also, being the owner of the railroads, builds great terminal facilities, so that railroads and the water lines can interchange their traffic. In other words, the Government, through Government ownership, requires and carries out a policy whereby land transportation and water transportation are correlative; they do not compete together; they form a great system.

I am sure the Senator will have to go further than the mere prohibition of a difference between the long and the short haul before he can bring about the result which we all desire so much; in other words, until we practically control by some means the system of land transportation, and by our control compel them to cooperate with instead of opposing our lines of rivers and harbors. Until that is done we are never going to have any water traffic to amount to anything.

Mr. WILLIAMS. I think the Senator from Colorado is in error. The rate fixed upon the railroads and the rate fixed upon the watercourses determine the division of the freight regardless of the ownership of either. While our Government does not own the railroads it has reserved the power to fix the rates through the Interstate Commerce Commission, and if it will fix the rates so that they shall be fair and nondiscriminative—they are discriminating now in favor of the seaport and lake and river termini—then necessarily it will follow that watercourses will carry the heavy freight where time is not the essence of the contract and the railroads will carry everything else.

Now, as to joint freight between the two, where it is necessary to change from a railroad to a watercourse and from a watercourse to a railroad, whatever troubles we have with that proposition now are not troubles with regard to watercourses which are intervening, but troubles with regard to railroad freight rates, which I discussed. In Germany while the German Government owns the railroads it does not own the boats upon the Rhine; it never has owned one. The trouble is demonstrated to be with the railroads and not with the boats.

Mr. CLARKE of Arkansas. May I ask the Senator from Mississippi whether it would suit him to resume his remarks to-morrow and let us take a recess now?

Mr. WILLIAMS. I am through and have been for some minutes.

Mr. CLARKE of Arkansas. I am not complaining at all.

Mr. WILLIAMS. I understand. I know the Senator from Arkansas is too polite to complain unless he had a real grievance.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the joint resolution (S. J. Res. 72) to provide for holding the Texas Bicentennial and Pan American Exposition in 1918.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12766) to increase the efficiency of the Military Establishment of the United States.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10490) to prevent fraudulent advertising in the District of Columbia.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 4856) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12843) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12027) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

The message further announced that the House had passed a bill (H. R. 14771) granting the consent of Congress to commissioners of Charlton County, Ga., and Nassau County, Fla., to construct a bridge across the St. Marys River, in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. JONES presented petitions of sundry citizens of Washington, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. TAGGART presented the memorial of Joe R. Ray and 39 other citizens of Indianapolis, Ind., remonstrating against appropriations for sectarian purposes, which was ordered to lie on the table.

Mr. CHAMBERLAIN presented a petition of sundry citizens of Dallas, Oreg., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Hood River County, Oreg., praying for an investigation into the price of

sugar, which was referred to the Committee on Agriculture and Forestry.

He also presented memorials of sundry citizens of Oregon, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

Mr. WARREN presented a petition of the Uinta County (Wyo.) Branch of the Congressional Union for Woman Suffrage, praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which was ordered to lie on the table.

Mr. OLIVER presented a petition of sundry citizens of Allegheny County, Pa., praying for the enactment of legislation to found the Government on Christianity, which was referred to the Committee on the Judiciary.

He also presented a memorial of the Board of Trade of Philadelphia, Pa., remonstrating against the passage of the so-called ship-purchase bill, which was referred to the Committee on Commerce.

He also presented petitions of sundry citizens of Pennsylvania, praying for the adoption of an amendment to the Constitution to prohibit polygamy, which were referred to the Committee on the Judiciary.

He also presented a petition of Local Union No. 1936, United Mine Workers of America, of Branchdale, Pa., praying for an investigation into conditions surrounding the marketing of dairy products, which was referred to the Committee on Agriculture and Forestry.

Mr. PHELAN. I beg to present to the Senate a telegram and correspondence in the nature of a memorial by the most representative American Irish society of San Francisco, which carries on the traditions of such societies as the Friendly Sons of St. Patrick, organized in Revolutionary days, of which George Washington himself was an honorary member. I have received many communications on the subject, but I have singled this one out with my reply, as indicating the condition of public sentiment, so far as these societies and our fellow citizens of Irish extraction are concerned. I consider their plea worthy the attention of the Senate of the United States. I ask that this correspondence may be printed in the RECORD and referred to the Committee on Foreign Relations.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

[Telegram.]

SAN FRANCISCO, CAL., *May 19, 1916.*

Hon. JAMES D. PHELAN,
United States Senate:

We have sent the following telegram to President Wilson. Will you, as a fellow member of the Knights of St. Patrick, kindly request him to give it early consideration:

"The Knights of St. Patrick of San Francisco, an organization composed of American citizens, now in the forty-second year of its existence, respectfully requests that you request the British Government to exercise all possible clemency in behalf of Irish prisoners who are now or who may hereafter be under arrest in connection with the recent uprising in Ireland to the end that secret trials and secret executions and severe sentences of imprisonment may cease. This request is made on behalf of numberless American citizens whose ancestry, like your own, is Irish. In behalf of American friends and relatives of those concerned in the Irish uprising and as Secretary of State, John Sherman, in the protest of the United States to Spain against reconcentration in Cuba in 1897, said: 'In the name of common humanity.' As precedents which justify your friendly interposition in the present emergency, we would cite the letter of Thomas Jefferson, Secretary of State, to Gouverneur Morris, minister to France, in 1793, requesting the release of Gen. Lafayette from imprisonment; the action of President Fillmore in 1851 in conveying Kossuth in an American war vessel from Turkey to the United States; the communication of Secretary of State Seward, in 1867, to Mexico, in behalf of clemency for Maximilian; the communication of Secretary of State Fish, in 1872, to Spain, protesting against the death penalty being inflicted upon Cuban insurgents; the action of President Grant, in 1867, in obtaining a mitigation of the capital punishments of those convicted in the Canadian courts in connection with the Fenian uprising; the representations made by President Grant to England, in 1867, in behalf of the Irish prisoners in the Manchester case; and the numberless requests made by various Presidents of the United States to Russia for clemency in behalf of her Jewish subjects. The only offense of the Irish revolutionists was the same aspiration for liberty which inspired Washington in the American Revolution. The extreme and unusual severity of their secret executions and imprisonments has deeply stirred and saddened the millions of American citizens who are proud of their Irish blood and who sympathize with every nation which strikes for liberty."

ROBERT P. TROY,
President Knights of St. Patrick.
RICHARD C. O'CONNOR,
Chairman Board of Trustees.
JOHN MULHERN,
Corresponding Secretary.

MAY 22, 1916.

Mr. ROBERT P. TROY,
President Knights of St. Patrick,
703 Market, San Francisco.

MY DEAR MR. TROY: Your telegram of May 19, concerning presidential protest to England in behalf of Ireland, is received.

I desire to say I am in full sympathy with your action, and have already communicated with the President. Protests have been made in several cases where the lives of American citizens of Irish birth have been in peril. Last Thursday night the President sent such a protest in the case of Lynch, a citizen of New York, at the instance of Senator O'GORMAN, and the day before I had a personal interview with Hon. Robert Lansing, Secretary of State, and Hon. Frank L. Polk, the counselor of the Department of State, urging that representations be made on the general subject.

Majority leader, Senator JOHN W. KERN, introduced a resolution in the Senate which I am supporting, requesting the State Department to formally act.

I am sure that the administration will do everything in its power to carry out the wishes of the Knights of St. Patrick.

Very truly yours,

JAMES D. PHELAN.

MAY 22, 1916.

To the PRESIDENT,
The White House.

MY DEAR MR. PRESIDENT: I have received a telegram from the Knights of St. Patrick, of San Francisco, communicating the one that they sent to you. They request me as follows:

"Will you, as a fellow member of the Knights of St. Patrick, kindly request the President to give early consideration to the telegram which we have sent him?"

It is requested that this Government make representations to the British Government to the end that it shall exercise all possible clemency in behalf of Irish prisoners, to stop secret trials and secret executions, and to resort to the courts of law to determine the guilt or innocence of the parties and the measure and nature of the punishment, if any is decreed.

American citizens of Irish birth have been arrested and held without trial; and there are reports that one such citizen has been condemned by court-martial to capital punishment. In reenforcing the sentiments of the Knights of St. Patrick I can not too strongly urge that you comply with their request.

You have in the name of humanity protested to other foreign Governments against the recklessness of power. "The divine right of revolution" is inherent in every people; our independence was won under the leadership of that "immortal rebel," George Washington. It is true that those who fail in such an enterprise expose themselves to trial for treason. The Revolutionary fathers were all traitors in the eyes of the English law, but patriots in the eyes of the world.

"No treason succeeds, and what is the reason?
For when it succeeds, who dare call it treason?"

There is no excuse for treason in America, because the people are the sovereign and under the Constitution have a lawful and effective means of expressing their views. This is the right for which the unconquerable spirit of the Irish people has contended for centuries. It was conceded by Mr. Gladstone and recently by the present ministry of England. Its accomplishment was met with armed resistance on the part of the people of the north, by mutiny among the troops and insubordination among the officers of the British Army. This doubtless led to the futile attempt to accomplish by force what Parliament and the ministry had abjectly failed to establish by law. Well might the Irish patriots, having but the single and sincere purpose to redeem their country, come to the conclusion that there was no remedy which did not involve the employment of force.

The poets, who have been described as the "unauthorized legislators of the world," had long taught them "Hereditary bondsmen, know ye not who would be free themselves must strike the blow."

I personally felt the same emotion when I read of the shooting of Pearce and his brave and patriotic associates that I experienced when I read of the secret execution of Ferrer, the Spanish patriot, who had conspired in some way against the King. Patriots are killed because they have no means within the constitution to remedy intolerable conditions, and hence they are compelled to resort to conspiracies and overt acts. It is not a matter of choice. If constitutional rights are accorded them, there will be no need of violence.

We can not as Americans look with indifference upon these events, because if our emotions do not respond under such circumstances our own liberties and independence are in danger. We will have failed of our appreciation of those things for which our American revolutionists died.

Therefore, I repeat, in the name of humanity and liberty you should protest against these practices which all history, modern enlightenment, as well as political sagacity, condemn. From whatever point of view they are regarded, these executions can only be classified as crimes or as blunders. I am,

Respectfully, yours, JAMES D. PHELAN.

Mr. PHELAN presented a memorial of sundry citizens of Sawtelle, Cal., remonstrating against the proposed creation of a juvenile court in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a memorial of sundry citizens of Calistoga, Cal., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

He also presented a memorial of the Ladies' Auxiliary, Ancient Order of Hibernians, of Los Angeles, Cal., and a memorial of the County Clare Association of California, of San Francisco, Cal., remonstrating against the execution of Irishmen connected with the recent revolt in Ireland, which were referred to the Committee on Foreign Relations.

REPORTS OF COMMITTEES.

Mr. NORRIS, from the Committee on Public Lands, to which was referred the bill (S. 1792) for the relief of settlers on unsurveyed railroad lands, reported it with amendments and submitted a report (No. 470) thereon.

Mr. JOHNSON of Maine, from the Committee on Pensions, to which was referred the bill (H. R. 15048) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, reported it with amendments and submitted a report (No. 471) thereon.

He also, from the same committee, to which was referred the bill (H. R. 14576) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, reported it with amendments and submitted a report (No. 472) thereon.

Mr. GORE, from the Committee on Agriculture and Forestry, to which was referred the bill (H. R. 12717) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1917, and for other purposes, reported it with amendments and submitted a report (No. 473) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TAGGART:

A bill (S. 6088) granting an increase of pension to George D. Mitchell (with accompanying papers);

A bill (S. 6089) granting an increase of pension to Jesse O. Banion (with accompanying papers);

A bill (S. 6090) granting an increase of pension to Noah Sage (with accompanying papers);

A bill (S. 6091) granting an increase of pension to George Yeager (with accompanying papers);

A bill (S. 6092) granting an increase of pension to James M. Beeber (with accompanying papers);

A bill (S. 6093) granting an increase of pension to Jacob A. Stewart (with accompanying papers);

A bill (S. 6094) granting an increase of pension to Pollard McKenney (with accompanying papers);

A bill (S. 6095) granting an increase of pension to Francis M. Pierce (with accompanying papers);

A bill (S. 6096) granting an increase of pension to Hymelius Mendenhall (with accompanying papers);

A bill (S. 6097) granting an increase of pension to Elzira Vanhoy (with accompanying papers);

A bill (S. 6098) granting an increase of pension to Alfred McFeely (with accompanying papers);

A bill (S. 6099) granting an increase of pension to Elijah Kessler (with accompanying papers);

A bill (S. 6100) granting an increase of pension to Charles Wilkinson (with accompanying papers);

A bill (S. 6101) granting a pension to James M. Brown; and

A bill (S. 6102) granting an increase of pension to Theodore Luther; to the Committee on Pensions.

By Mr. LANE:

A bill (S. 6103) granting a pension to Charles E. Wilber (with accompanying papers); and

A bill (S. 6104) granting an increase of pension to Theodore Hansen (with accompanying papers); to the Committee on Pensions.

By Mr. JOHNSON of Maine:

A bill (S. 6105) granting an increase of pension to James H. Kneeland (with accompanying papers);

A bill (S. 6106) granting a pension to Leonora V. Lunt (with accompanying papers);

A bill (S. 6107) granting an increase of pension to Thaddeus Cross (with accompanying papers);

A bill (S. 6108) granting an increase of pension to Charles E. Cook (with accompanying papers);

A bill (S. 6109) granting an increase of pension to Florence M. Moore (with accompanying papers);

A bill (S. 6110) granting an increase of pension to Horatio N. Lowell (with accompanying papers);

A bill (S. 6111) granting an increase of pension to Truman F. Maxim (with accompanying papers);

A bill (S. 6112) granting a pension to Fred S. Knight (with accompanying papers);

A bill (S. 6113) granting a pension to Alden Turner (with accompanying papers); and

A bill (S. 6114) granting an increase of pension to Almon G. Warren (with accompanying papers); to the Committee on Pensions.

By Mr. BRANDEGEE:

A bill (S. 6115) for the relief of the heirs at law of the late Duncan H. Campbell; to the Committee on Patents.

AMENDMENT TO DISTRICT APPROPRIATION BILL.

Mr. BANKHEAD submitted an amendment proposing to appropriate $4,140 to pay Thomas W. and Alice N. Keller for ground taken and damages on account of condemnation proceedings in square No. 2838, in the city of Washington, etc., intended to be proposed by him to the District of Columbia appropriation bill (H. R. 15774), which was referred to the Committee on the District of Columbia and ordered to be printed.

COAST AND GEODETIC SURVEY.

Mr. JOHNSON of Maine. I submit an amendment intended to be proposed by me to the sundry civil appropriation bill (H. R. 15836) relative to an additional appropriation for the United States Coast and Geodetic Survey. I ask that the amendment be printed and referred to the Committee on Appropriations.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. JOHNSON of Maine. I also submit a letter from the Superintendent of the United States Coast and Geodetic Survey stating the reasons for the necessity for the appropriation, which I ask may be printed in the RECORD and referred to the Committee on Appropriations to accompany the amendment.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

DEPARTMENT OF COMMERCE,
UNITED STATES COAST AND GEODETIC SURVEY,
Washington, May 22, 1916.

Hon. CHARLES F. JOHNSON,
United States Senate, Washington, D. C.

MY DEAR SENATOR JOHNSON: In accordance with your request that I set forth reasons for the necessity for the introduction of an amendment to H. R. 15836 in the Senate of the United States to provide funds which the United States Coast and Geodetic Survey requires in addition to those contained in the sundry civil bill just reported, I submit the following:

The sundry civil bill as reported to the House of Representatives does not make provision for some help and materials, etc., that this bureau must have to continue issuing its charts throughout the coming fiscal year. I tried to impress the Appropriations Committee of the House with the gravity of the situation, but apparently failed to make them comprehend the seriousness of the facts. I am therefore glad for the opportunity afforded by your kind request.

I enumerate our needs in the order of their importance.

First, in regard to the production and output of charts: I need not detail how rapidly information comes in requiring changes in the nearly 700 charts covering our 103,000 miles of coast line; but there are in this office to-day reported dangers in the way of submerged rocks and shoals found and other dangers to navigation, and changes in aids to navigation that make it absolutely necessary to reprint 135 of our charts with the least possible delay.

Nor shall I burden you with the details of how this information must be examined, verified, drafted, engraved, or lithographed before it finally filters through the office and goes on the printed chart so that it is absolutely correct and reliable when the chart is sent to the merchant mariner or to our Navy Department for the use of the Navy vessels.

The point is that requests come to us daily for some of these 135 charts that are out of print, and vessels are delayed in their sailings because they can not be supplied with our charts.

We have at this writing a request from a vessel that is leaving New York for 223 of our charts, of which 64 can not be supplied, because they are out of print; nor can we give any definite promise when they can be furnished. Another shipowner wishes 27 different charts, of which 17 can not be supplied; and still another has ordered 27, of which 18 are out of print; and there are many other such orders.

We have made a careful canvass of the situation, and have no hesitancy in saying that the extra help requested in this amendment will no more than meet the situation.

Should it be thought that a remedy could be had in overtime work, the answer is that we have resorted to this means continually. The inevitable result must be, if this is made a permanent practice, that the better class of our employees will be driven to other branches of the Government service where overtime work is not continually required, or to positions outside the Government service. We would then be in a worse situation than now, because the number of persons skilled in the technical qualifications required is limited, and it takes time for a person having the technical qualifications to further acquire the exact knowledge needed to carry on our work.

The above applies to skilled help. Now, in regard to chart paper and other supplies:

During the current fiscal year 75,949 pounds of chart paper were purchased at a cost of $12,151.80. More than this was needed and would have been purchased had the current appropriations been adequate. One of the necessary elements, with reference to chart paper, is that it be well seasoned before printing. If charts are printed on "green" paper, the paper in seasoning distorts the chart so that the distances represented thereon are misleading to a mariner, and the chart is a menace rather than a guide.

Only a certain grade and quality of paper can be used for chart-making purposes, and this kind of paper is not carried in stock by the paper mills. It therefore follows that when this bureau places an order for chart paper, that paper is made on the receipt of the order, and we receive "green" paper. To meet this condition, it has been our custom to keep a supply of chart paper on hand; but owing to the increased demand for charts, with no increase in funds, this stock has been from year to year encroached upon until it is practically exhausted.

We are now facing an unprecedented demand for charts, with no reserve stock of seasoned paper to draw upon. With the cost of paper advanced some 50 per cent, owing to a rag famine resulting from foreign embargoes, it is absolutely necessary that additional funds be provided for the purchase of chart paper, unless we are to stop work.

The primary cause of this increase of demand can be attributed to the increased activity in shipping, and to the increased demands of our Navy Department. In figures, which fail to convey any notion of the work involved, this increase during the present year has been 30,000 charts.

Our resources are strained almost to the breaking point, and with the growing demand which is more apparent each day we shall shortly be absolutely swamped unless Congress at an early day provides adequate funds.

Money appropriated for chart paper in reality takes little, if anything, out of the Treasury, for the reason that the printed charts are sold for the cost of paper and printing, and the money from these sales reverts to the Treasury each month.

While we must have the funds for the skilled help and the chart paper referred to above, it is also necessary, if our work is to go on, that money be provided for the two chart presses. Without going into

detail I may say that the presses now in use are antiquated, and require a maximum of hand labor with the minimum of production, and are insufficient for our present demands.

LAUNCHES FOR WIRE-DRAG WORK, ETC.

Under existing appropriations for wire-drag work there has never been sufficient money to purchase launches for this work. The result is that each year we hire the necessary launches under competitive bids.

While we make the best selection possible for launches for this work, these two results follow:

First. The type of launch needed for wire-drag work is the type used by fishermen, and we are in the market for them at the very time of the year when they are needed by the fishermen. From this it follows that, though the launches are hired under competitive bids, the amount of rental paid is out of proportion to the value of the launch.

Second. In nearly every instance, though the specifications call for launches suited as closely as possible to our needs, we often have to replace the entire superstructure to adapt them to our needs. When the season is over, the rigging we have placed on them must be removed and the launches placed in their former condition to be returned to the owners.

The result is that we are, in rentals and adjustments, paying over and over again the value of these launches, while if money were available to build launches exactly suited to our needs there would not be this extravagant yearly outlay. Then, too, the time of our parties in securing these bids and making these changes each season would be saved.

AS TO MONEY FOR A NEW VESSEL.

The Federal Government has appropriated $35,000,000 for a new railroad in Alaska and is making many other wise expenditures there, and as the only way to reach the ports of that country is by water, it follows logically that, with the 23,000 miles of shore line yet to be surveyed, we must have vessels and appropriations to carry on the work.

Meanwhile, I have figures from what I consider reliable sources showing that the losses in Alaskan waters for the past 10 years in vessels valued at $20,000 and upward have averaged $490,300 each year, or more than twice the amount of money this bureau has available yearly for surveys of all kinds on the coasts of Alaska.

The Coast and Geodetic Survey vessel *Gedney*, 41 years old, was sold last fall, after being condemned by the Steamboat-Inspection Service. We have nothing to take her place. Without a new vessel the condition will be most unfortunate. The supply must be increased not decreased. I am,

Respectfully, yours, E. LESTER JONES,
Superintendent.

HOUSE BILL REFERRED.

H. R. 14771. An act granting the consent of Congress to commissioners of Charlton County, Ga., and Nassau County, Fla., to construct a bridge across the St. Marys River was read twice by its title and referred to the Committee on Commerce.

RECESS.

Mr. CLARKE of Arkansas. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 5 o'clock and 20 minutes p. m., Monday, May 22, 1916) the Senate took a recess until to-morrow, Tuesday, May 23, 1916, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

MONDAY, *May 22, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Teach us, O God, the meaning of life. We are profoundly impressed with the vast and countless variety displayed in Thy creative acts. Every thing in nature bears its peculiarity, and when we reach man the differences are more clearly defined. Each is cast in a different mold and stamped with a personality all his own, and can fulfill his particular place better than another. Help us, therefore, until we find our sphere to do what we find to do with earnestness, patience, persistence, and courage, that we may be prepared for the work Thou hast called us to do.

And only the Master shall praise us,
And only the Master shall blame;
And no one shall work for money,
And no one shall work for fame;
But each for the joy of the working,
And each in his separate star,
Shall draw the thing as he sees it,
For the God of things as they are!

Amen.

The Journal of the proceedings of Saturday, May 20, 1916, was read and approved.

CHANGE OF REFERENCE.

Mr. COX rose.

The SPEAKER. For what purpose does the gentleman from Indiana rise?

Mr. COX. To prefer a unanimous-consent request; to ask that two bills now pending before the Committee on the Post Office and Post Roads, of which I do not think that committee has jurisdiction, be referred to the Committee on Reform in the Civil Service.

The SPEAKER. What are the bills about?

Mr. COX. One is H. R. 6915 and the other is H. R. 10130.

The SPEAKER. What are they about?

Mr. COX. They relate exclusively to civil-service pensions.

The SPEAKER. Without objection, the reference will be made.

There was no objection.

EXTENSION OF REMARKS.

Mr. DALE of Vermont. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the rural-credits bill.

The SPEAKER. The gentleman from Vermont [Mr. DALE] asks unanimous consent to extend his remarks on the rural-credits bill. Is there objection?

There was no objection.

TEXAS BICENTENNIAL AND PAN AMERICAN EXPOSITION.

Mr. SLAYDEN. Mr. Speaker, I would like to have taken off the Speaker's table and have considered Senate joint resolution 72.

The SPEAKER. The Chair lays before the House Senate joint resolution 72, which the Clerk will report.

The Clerk read as follows:

Joint resolution (S. J. Res. 72) to provide for holding the Texas Bicentennial and Pan American Exposition in 1918.

Resolved, etc., That whenever it shall be shown to the satisfaction of the President of the United States that a suitable site has been selected and that adequate provision has been made for buildings and grounds that will enable the Texas Bicentennial and Pan American Exposition to inaugurate, carry forward, and hold an exposition at the city of San Antonio, Tex., on or about the 1st day of November, 1918, to celebrate the two hundredth anniversary of the settlement of San Antonio, the President of the United States be, and he hereby is, authorized and requested to invite Spain and all the Pan American countries and nations to such proposed exposition, with a request that they participate therein.

The SPEAKER. There is a House resolution of similar tenor on the calendar.

Mr. SLAYDEN. Yes; precisely the same.

Mr. GARNER. With a unanimous report from the committee.

Mr. MANN. I believe it requires unanimous consent, nevertheless. Did the gentleman from Texas ask unanimous consent?

Mr. SLAYDEN. No; I asked that the bill be laid before the House.

Mr. MANN. I suggest that the gentleman ask unanimous consent.

Mr. SLAYDEN. I ask unanimous consent, then, Mr. Speaker, that the Senate bill be considered in lieu of the House bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. MANN. Now, Mr. Speaker, I would like to ask the gentleman a question. Recollecting the attitude of many very distinguished gentlemen from Texas on the floor of the House in reference to expositions in the past, is it the expectation or intention to ask for any Government appropriation in aid of this exposition, except possibly a Government exhibit?

Mr. SLAYDEN. No; Mr. Speaker, there is no such intention, and the officers of this exposition association, as I suppose you would call it, have filed with the Committee on Industrial Arts and Expositions over their signatures a pledge that they would not do so.

Mr. MANN. Well, I remember, in reference to the California exposition, that we had the same statement from Members of the House from California in reference to that exposition; and they carried it out. They never asked for any aid, but somebody else did—the President did—and we had a very determined contest over it. Is the same procedure likely to happen in reference to this exposition? Of course the gentleman can not speak for the next President. I understand that.

Mr. SLAYDEN. No; but I assure the gentleman that it is not the intention of any Member of the Texas delegation to do so, and these gentlemen from Texas were told that fact with a frankness which I think some of them thought was almost brutal.

Mr. MANN. Of course I understand that would not prevent, so far as I know, a Senate amendment on the sundry civil bill or on the deficiency bill carrying an appropriation that would have to be voted on in the House.

Mr. GARNER. May I say to the gentleman from Illinois that both the Senators from Texas have taken the same position as the House Members, that they will not ask for money to defray the expenses of the exposition or money to defray a deficiency in the expenses of the exposition? At least one of the Senators will be here, and probably the other.

Mr. MANN. Personally I may say that I think the Government ought to make an appropriation in aid of this exposition.

Mr. GARNER. But the Texas delegation do not feel that way about it, and they are not willing to support one.

Mr. SLAYDEN. Question, Mr. Speaker.

The SPEAKER. The question is on the third reading of the Senate joint resolution.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

The SPEAKER. Without objection, the House resolution of similar tenor will be laid on the table.

There was no objection.

On motion of Mr. SLAYDEN, a motion to reconsider the vote whereby Senate joint resolution 72 was passed was laid on the table.

PORTO RICO.

Mr. GARRETT. Mr. Speaker, I desire to prefer a request for unanimous consent touching the Porto Rican bill.

The SPEAKER. The gentleman will proceed.

Mr. GARRETT. I ask unanimous consent, Mr. Speaker, that the House may resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the Porto Rican bill; that the Clerk shall immediately proceed to read the bill without interruption; that during the reading amendments may be offered; that at the conclusion of the reading the amendments may be read in the order in which they are offered, and that at not later than 4 o'clock the committee shall proceed to vote upon the amendments offered, and so perfect the bill, and upon its perfection the committee shall rise and report the bill to the House, the previous question shall be considered as ordered on the bill and all amendments thereto to final passage, except one motion to recommit.

The SPEAKER. The gentleman from Tennessee [Mr. GARRETT] asks unanimous consent that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the Porto Rican bill; that the Clerk shall read the bill without interruption until the reading has been concluded, whereupon any amendments that may be offered shall be read in the order in which they are sent to the Clerk's desk; thereupon the committee shall rise and report the bill to the House, the previous question shall be considered as ordered, and without intervening motion except one motion to recommit the House shall vote on the bill. This shall happen before 4 o'clock——

Mr. GARRETT. Not later than 4 o'clock.

The SPEAKER. Not later than 4 o'clock. Is there objection?

Mr. MANN. Reserving the right to object, the gentleman from Tennessee [Mr. GARRETT] is one of the best legislators in this House. If he were not, I would say that that proposition was fit to come from a set of lunatics, but not from sane men. I do not think that that is a proper way to legislate, and I object.

The SPEAKER. The gentleman from Illinois objects.

Mr. JONES. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the Porto Rico bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 9533) to provide a civil government for Porto Rico, and for other purposes, with Mr. FOSTER in the chair.

The Clerk read as follows:

SEC. 5. That all citizens of Porto Rico, as defined by section 7 of the act of April 12, 1900, "temporarily to provide revenues and a civil government for Porto Rico, and for other purposes," and all natives of Porto Rico who were temporarily absent from that island on April 11, 1899, and have since returned and are permanently residing in that island, and are not citizens of any foreign country, are hereby declared, and shall be deemed and held to be, citizens of the United States: *Provided*, That any person hereinbefore described may retain his present political status by making a declaration, under oath, of his decision to do so within six months of the taking effect of this act before the district court in the district in which he resides, the declaration to be in form as follows:

"I, ———, being duly sworn, hereby declare my intention not to become a citizen of the United States as provided in the act of Congress conferring United States citizenship upon citizens of Porto Rico and certain natives permanently residing in said island."

In the case of any such person who may be absent from the island during said six months the term of this proviso may be availed of by transmitting a declaration, under oath, in the form herein provided within six months of the taking effect of this act to the executive secretary of Porto Rico: *And provided further*, That any person who is born in Porto Rico of an alien parent and is permanently residing in that island may, if of full age, within six months of the taking effect of this act, or if a minor upon reaching his majority or within one year thereafter, make a sworn declaration of allegiance to the United States before the United States District Court for Porto Rico, setting forth therein all the facts connected with his or her birth and residence in Porto Rico and accompanying due proof thereof, and from and after the making of such declaration shall be considered to be a citizen of the United States.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I think there was some discussion in general debate in reference to this section, as the gentleman will doubtless recall.

Mr. JONES. The gentleman from New York [Mr. BENNET] suggested that there should be an amendment to this section in order that certain Porto Ricans who are resident in New York and who were absent from the island at the date mentioned in this section might be included in this provision. It was stated at the time that there was no provision of general law upon the subject of naturalization which would permit them to become citizens of the United States. Since that time the general laws upon the subject have been examined; I have conferred with Mr. BENNET, and he is perfectly satisfied, not only that they can become naturalized under the general law but that a number have already been so naturalized, and he therefore does not desire any amendment, but thinks that the law is sufficiently broad.

Mr. MANN. That statement is satisfactory. I remember seeing in the newspapers at one time the statement that some of these people were refused naturalization. Whether the statement was correct or not, I do not know. The gentleman says they have been naturalized?

Mr. JONES. So I am informed by the Insular Affairs Bureau, and the gentleman from New York [Mr. BENNET] is satisfied of that fact.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

SEC. 19. That the commissioner of health shall have general charge of all matters relating to public health, sanitation, and charities, and shall perform such other duties as may be prescribed by law.

Mr. JONES. Mr. Chairman, I desire to offer an amendment. On page 16, line 14, after the word "charities," insert "except such as relate to the conduct of maritime quarantine."

The CHAIRMAN. The gentleman will please send the amendment to the desk so that the Clerk can get it. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES: Amend, on page 16, line 14, after the word "charities," by inserting the following: "except such as relate to the conduct of maritime quarantine."

Mr. JONES. I will state, Mr. Chairman, that this amendment was suggested by the Treasury Department. The Treasury Department seemed to think that this duty could be better performed by officials of the United States.

Mr. CANNON. Will the gentleman allow me?

Mr. JONES. Certainly.

Mr. CANNON. Is that all the explanation?

Mr. JONES. I will say to the gentleman, if he desires a further explanation, that the section as framed placed these matters under officials appointed by the Governor of Porto Rico. The Treasury Department, having the machinery to perform these duties, thought there would be some confusion if they were turned over to the Porto Rican government and that it would be better to have them conducted as they now are, under Federal authority.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia [Mr. JONES].

The amendment was agreed to.

The Clerk read as follows:

SEC. 20. That there shall be appointed by the President an auditor, at an annual salary of $6,500, for a term of four years and until his successor is appointed and qualified, who shall examine, audit, and settle all accounts pertaining to the revenues and receipts, from whatever source, of the government of Porto Rico and of the municipal governments of Porto Rico, including public trust funds and funds derived from bond issues; and audit, in accordance with law and administrative regulations, all expenditures of funds or property pertaining to or held in trust by the government of Porto Rico or the municipalities or dependencies thereof. He shall perform a like duty with respect to all government branches.

He shall keep the general accounts of the government and preserve the vouchers pertaining thereto.

It shall be the duty of the auditor to bring to the attention of the proper administrative officer expenditures of funds or property which, in his opinion, are irregular, unnecessary, excessive, or extravagant.

In case of vacancy or of the absence from duty, from any cause, of the auditor, the Governor of Porto Rico may designate an assistant, who shall have charge of the office.

The jurisdiction of the auditor over accounts, whether of funds or property, and all vouchers and records pertaining thereto, shall be exclusive. With the approval of the governor, he shall from time to time make and promulgate general or special rules and regulations not inconsistent with law covering the methods of accounting for public funds and property, and funds and property held in trust by the government or any of its branches: *Provided*, That any officer accountable for public funds or property may require such additional reports or returns from his subordinates or others as he may deem necessary for his own information and protection.

The decisions of the auditor shall be final, except that appeal therefrom may be taken by the party aggrieved or the head of the department concerned within one year, in the manner hereinafter prescribed. The auditor shall, except as hereinafter provided, have like authority as that conferred by the law upon the several auditors of the United States and the Comptroller of the United States Treasury, and is authorized to communicate directly with any person having claims

before him for settlement, or with any department, officer, or person having official relations with his office.

As soon after the close of each fiscal year as the accounts of said year may be examined and adjusted the auditor shall submit to the governor an annual report of the fiscal concerns of the government, showing the receipts and disbursements of the various departments and bureaus of the government and of the various municipalities, and make such other reports as may be required of him by the governor or the head of the executive department of the Government of the United States, to be designated by the President as herein provided.

In the execution of his duties the auditor is authorized to summon witnesses, administer oaths, and to take evidence, and in the pursuance of these provisions may issue subpœnas and enforce the attendance of witnesses.

The office of the auditor shall be under the general supervision of the governor and shall consist of the auditor and deputy auditor and such necessary assistants as may be prescribed by law.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word, largely for the purpose of inquiring the viewpoint of the committee as to this supervisory control of the auditor over the revenues of Porto Rico. I understood from reading the report of the chairman of the committee that it was the policy of the committee to give complete control to these islanders in the management of their internal affairs. Yet we have here a provision for the appointment of an auditor by the President, who will virtually exercise supervisory authority over the control of the revenues. If these Porto Ricans are to be vested with full authority in the management of their internal affairs, why should you withhold from them this authority in the management of their own revenues?

Mr. JONES. Mr. Chairman, I will say to the gentleman from Wisconsin that he is not quite correct in assuming that this bill is intended to give the Porto Ricans full and complete authority over all of their domestic matters. It is intended, however, to give them the fullest measure of self-government that, in the opinion of the committee, ought to be bestowed upon them, taking into consideration the interests of the United States. For instance, the President appoints the attorney general under this bill, under a section that has already been read, and the President appoints the commissioner of education, while the governor appoints the other four heads of departments.

There were various reasons for thinking that would be better. For instance, as to the department of education, if the Porto Rican government had complete control over that subject there might be some question as to whether English would be taught in the schools or whether Spanish would be substituted therefor. The committee thought it would be better to have that matter under the control of a commissioner of education appointed by the President, so as to insure the continued teaching of English in the public schools. I mention that simply as one of the exceptions to the rule which the gentleman thinks the committee desires to lay down.

Now, as to this specific question as to the auditor, I will say that my recollection is that as the bill was originally drawn there was no provision such as this, but some of the members of the committee, some of the minority members especially, thought there ought to be that provision. I think the gentleman from Iowa [Mr. TOWNER], the ranking minority member of the committee, was very earnest in the belief that there should be an auditor. I think the gentleman will admit that it is a wise provision.

Mr. STAFFORD. If the gentleman will allow me, an auditor is in the nature of a comptroller, an administrative official purely; and in my viewpoint, if we are going to vest these islanders with control over the administration of their own affairs, certainly the governor should have the right to appoint a purely administrative official like the auditor, rather than to vest that authority in the President to appoint some person who might not be in harmony or personally acquainted with the business affairs of the island.

Mr. JONES. I will be frank enough to say to the gentleman that I rather inclined to that view myself at the time, and when the bill was first drawn this provision was not in it, but other members of the committee desired this change.

Mr. STAFFORD. What was the motive that impelled the gentleman to withdraw from his logical position of having this official appointed by the governor rather than by the President?

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that my time be extended five minutes, in order that the gentleman from Virginia may finish his explanation.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. JONES. In the first place, I will say to the gentleman that this bill does not propose to confer full and complete self-government upon the people of Porto Rico. For instance, we retain the veto power in the President. The Porto Ricans would confer only a qualified veto power on the governor. The committee deemed it wise to lodge absolute veto power in the hands of the President. It was the opinion of the committee that this position of auditor should be created. My friend from Iowa, Judge TOWNER, who took great interest in the framing of this bill, was particularly anxious that an auditor should be provided for.

Mr. STAFFORD. Oh, there can be no objection from one standpoint that all the officials should be appointed by the President, but if we proceed along the line of giving the auditor the full authority as consistent with their own government, the management of their own affairs, I can see why the auditor should be appointed by the governor. As to the commissioner of education and the attorney general I can see a potency in the reasons advanced by the gentleman from Virginia as to why the President should have the authority to appoint them. But here is a purely administrative official taken out of the hands of the local authorities and placed in the hands of the President, who knows nothing about the local conditions.

Mr. JONES. I realize that there is a good deal in what the gentleman says, but the committee concluded, after full discussion, that this position should be created.

Mr. CANNON. Mr. Chairman, I move to strike out the last word. I wish I had the time to go into this matter as I would have under general debate. It seems to me that this and the other provisions which propose to make it a half-and-half government in Porto Rico is a confession that the whole bill should fail. If they be ripe for self-government, if they should be clothed with citizenship, if there is a public sentiment and manhood there to enable them to elect both branches of their legislature and to have citizenship, not thrust upon them by compulsion, they ought to have it in full measure, but this half-and-half plan, to my mind, is a confession that the bill ought to fail.

Now, I have not anything but the kindliest feelings for the Porto Ricans. I have a kindly feeling toward every human being on earth. I am for this provision in the bill if it is to pass; but experience has shown us that in the West Indies under the French, the British, the Spanish, or American control, that they are not competent for self-government. Oh, there are some that are competent, and if you give them enough power their competency would make them oppressors perhaps for the great benefit or the great harm of the most of the population.

I want to say here and now that I have been in Porto Rico many times. I have been in Cuba many times; I have been in Jamaica many times; and, as I said on a former occasion, there are 30 per cent pure African and enough to make 75 per cent who are not Caucasion or Spanish, but mixed. We are in Hayti now, and we are liable to be called to Cuba under a provision in their constitution which we made them adopt. We are responsible for them. Bless my soul, under 200 or 300 years of English domination in Jamaica they are not yet ready for self-government.

Now, it is not just to the Porto Ricans; it is not just to us that this bill should pass. But, if it must pass, this section and other provisions in it should remain, although it gives them privileges that Territories do not ordinarily have. That is all I want to say, and I say it as a final protest. I shall vote against this bill.

Competent for self-government? I want to say that we have 10,000,000 people, lately enslaved, who have made very great progress, but they are in contact with 90,000,000 of people who have proved their competency for self-government of the Caucasion race; and with the fullness of time, with this great disparity in population, I believe as generations come and go we will work out our salvation in this country, but down in Porto Rico I am not so optimistic. [Applause.]

The CHAIRMAN. The pro forma amendment is withdrawn, and the Clerk will read.

The Clerk read as follows:

SEC. 21. That any person aggrieved by the action or decision of the auditor in the settlement of his account or claim may, within one year, take an appeal in writing to the governor, which appeal shall specifically set forth the particular action of the auditor to which exception is taken, with the reason and authorities relied on for reversing such decision. The decision of the governor in such case shall be final and conclusive.

Mr. MANN. Mr. Chairman, I move to strike out the last word. The office of auditor ought never to be a political office. I very much approve of the provision of the preceding section for the appointment of an auditor by the President of the United States, so that that officer will not be involved in local politics. I question somewhat the desirability of this section providing for an appeal from the auditor to the governor. You might just about as well let the governor appoint the auditor, direct him how he shall make his findings, as to let an appeal be taken from the auditor to the governor.

I think on the whole we have a very good system in the United States in reference to the auditing of claims or bills against the United States. They first go through the departments. They go to the auditor for the different departments; that official being an official of the Treasury Department. Then an appeal can be taken from the auditor to the comptroller. It is supposed, and I think correctly, that the Comptroller of the Treasury is an official who is not reached by clamor or influence. His term of office is not coincident with that of the President of the United States. He invariably holds over beyond the term of the President, and while new comptrollers are appointed from time to time the decision of the comptroller is believed to be absolutely on the square, apart from any political influence.

Well, the governor will be influenced more or less by popular clamor in Porto Rico. If he is a good governor he will try to make himself popular, and the auditor, the man who determines whether a bill shall be paid, ought to decide in accordance with the law and absolutely regardless of public opinion. I do not think myself it is good judgment to allow an appeal from the auditor to the governor. The auditor, appointed as he is, is there merely to construe the law. The governor, appointed as he is, both being appointed by the same official, wants not only to construe the law but he wants to make himself popular with the people of Porto Rico, and it will occasionally arise that there will be popularity on the one side in favor of the payment of a bill, and the law on the other side. I think we always ought to hew to the line of the law in the payment of bills against the Government.

Mr. JONES. Mr. Chairman, it seems to me this is a very wholesome and salutary provision. I can not quite agree with my friend from Illinois [Mr. MANN] that the governor would be any more apt to be influenced by popular clamor than the auditor would be. They are both appointed by the President of the United States, and the governor holds his office at the pleasure of the President of the United States, and I think there ought to be some right of appeal somewhere. If not to the governor, it ought to be to the President of the United States. Surely you would not wish to burden the President of the United States with a matter of detail such as this; and even if you did, the President would refer it to the governor and, in all probability, would follow the advice of the governor. The auditor should not be clothed with autocratic power. He ought not to be vested with a power that can not be reviewed by anybody; and that being true, I know of no official other than the governor to whom the appeal should be taken. The governor, as I have said, and as the gentleman knows, as well as the auditor, is appointed by the President of the United States and is removable at the pleasure of the President. His appointment must also be confirmed by the Senate of the United States.

Mr. MANN. Mr. Chairman, just a word. Mr. Chairman, I think somebody has to be an autocrat about the payment of bills. The Comptroller of the Treasury in our country is an autocrat. There is no appeal from his decision unless you have a legal claim where you can go to the Court of Claims. I do not see any great difference between making the governor an autocrat and the auditor an autocrat, except that the auditor will know a great deal more about the subject than the governor, necessarily. That is his business. It is an incident with the governor; it is the business of the auditor. The gentleman says the auditor ought not to be an autocrat. Well, it would be well, possibly, if we could prevent anybody from being an autocrat, but in this case the governor will be an autocrat. He can overrule the auditor, and the decision of the governor is final, and very likely, if many appeals are taken, the decision of the governor will be rendered without the same scrutiny and care which will be given to the subject by the auditor. That is the whole business of the auditor; it is the mere incident to the duties of the governor.

The CHAIRMAN. Without objection, the pro forma amendment is withdrawn.

There was no objection.

The Clerk read as follows:

SEC. 25. That all local legislative power in Porto Rico, except as herein otherwise provided, shall be vested in a legislature, which shall consist of two houses, one the senate and the other the house of representatives, and the two houses shall be designated "the Legislature of Porto Rico."

Mr. PARKER of New Jersey. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I propose to offer an amendment to section 37, which defines the local legislative power that is granted by this section; but, lest I should be held to waive my right and my amendment should be held to involve something of a general legislative effect, I say a few words just now. When we are dealing with an island like this we must reverse the old motto "Be good, and you will be happy." If we make them happy they will be good. If the United States will give prosperity to an island of this sort, they will be bound by ties of affection to the United States, and if they do not have prosperity there is certain to be a revolution some day. Now, there is no doubt that the exports from Porto Rico to the United States of sugar, coffee, and so forth, have grown wonderfully; but I want to point out to the committee that the growth of exports and imports does not always indicate real prosperity. Jamaica in ancient days made enormous exports of sugar, but it was grown by slave labor. They have less imports and exports now, but, on the whole, the people are happier than they were then, though they might have more employment and be more prosperous. It just happens. During many years I have studied from time to time the affairs of Porto Rico; I have had some rather recent information from people who have been there. A young naval officer lately wrote me that sugar plantations were very prosperous in Porto Rico, but that the plain people were not doing well. The population has increased greatly because of the abolition of disease. The United States have not given them profitable employment. Another gentleman whom I know well—I do not mention names—told me that he was down on a plantation in Porto Rico quite recently; that the head of that big sugar company told him that he had made 60 per cent profit during last year, and at the same time he learned that the men who were loading at the wharves at the shipping towns in Porto Rico were getting 5 cents, and sometimes a little more, per hour for loading. My friend told me that this sugar plantation had 10 or 15 square miles of territory, and that he had heard that they had gotten rid of small farms that used to be on that area by rather arbitrary methods.

On my suggestion that he did not get that from the headman he said, "No; but his foreman suggested it to me." To the inquiry, "Was it by tax sale?" he said he did not know. I remember that my friend Larrinaga, the former Commissioner, told me that the poorer people of Porto Rico did not understand how to deal with taxes on land and were sold out. I understand my friend the present Commissioner to say that they are not sold out now. I remember that there were many tax sales, and I regretted them. The people of Porto Rico should know how to settle their own form of taxation. They will be ready to submit, as they did in olden times, to the old provision that put into the Porto Rican treasury a duty on goods coming to and fro from the United States which amounted to one-fourth of the duty charged on goods from outside. That gave the government something to live on.

Unfortunately in the year 1900 we passed an act, on April 12, chapter 191, page 77, which has reduced those duties from 25 to 15 per cent, which was to go into the Porto Rican treasury, and then provided that as soon as the United States was convinced that they had a system of local taxation which made them independent of those duties the duty should be abolished, and that, at any rate, all duties should be abolished in 1902. They are gone.

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

Mr. PARKER of New Jersey. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from New Jersey asks unanimous consent for five minutes more. Is there objection? [After a pause.] The Chair hears none.

Mr. PARKER of New Jersey. They are gone. By this act we establish a great many officers. I notice one is to be paid $4,000. That does not mean pesos, but dollars, each of which is $2 and more than that to them. We have given them a central government that costs money. It is imposing license taxes, and every municipality does the same. Those people do not usually speak English. They can not get into the labor market in this country and get something to do, as our people can. They ought to have an opportunity to build up their own industries. And as a believer in the prosperity of every bit of the land that belongs to the United States, I urge, and shall urge when we get to section 37, that there should be given to their legislature such powers as Canada has against England, and as Australia has, and as New Zealand has, and as every happy and loyal colony of Great Britain has—the power to lay a tariff against their home country, the United States—which tariff, however, should be preferential and should not exceed a certain proportion of the United States tariff on goods that come from elsewhere. Unless you give to this legislature, to a certain extent—not altogether, but within reasonable bounds—the power of the purse and the power of regulating their commerce within reasonable limits, they are not free; they will not be prosperous; they will not be happy, and if they are not happy they will not be loyal. [Applause.]

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

SEC. 26. That the senate of Porto Rico shall consist of 19 members elected for terms of four years by the qualified electors of Porto Rico. Each of the seven senatorial districts defined as hereinafter provided shall have the right to elect two senators, and in addition thereto there shall be elected five senators at large. No person shall be a member of the senate of Porto Rico who is not over 30 years of age, and who is not able to read and write either the Spanish or English language, and who has not been a resident of Porto Rico for at least two consecutive years, and, except in the case of senators at large, an actual resident of the senatorial district from which chosen for a period of at least one year prior to his election, and who does not own in his individual right taxable property in Porto Rico to the value of not less than $1,000. Except as herein otherwise provided, the senate of Porto Rico shall exercise all of the purely legislative powers and functions heretofore exercised by the executive council, including confirmation of appointments; but appointments made while the senate is not in session shall be effective either until disapproved or until the next adjournment of the senate. In electing the five senators at large each elector shall be permitted to vote for but one candidate, and the five candidates receiving the largest number of votes shall be elected.

Mr. LONDON and Mr. MANN rose.

The CHAIRMAN. The gentleman from New York [Mr. LONDON] is recognized.

Mr. LONDON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 21, line 13, after the word "election," in line 13, strike out all that follows in line 13, and all in line 14, and the words "less than $1,000," in line 15.

Mr. LONDON. Mr. Chairman, the amendment is very simple. If the people of Porto Rico are qualified to take care of their own affairs, why should we impose a property qualification on members of the senate. It is a dangerous thing to do. You are giving to the propertied class the right to rule the country. You are drawing distinctions which should not exist. You are separating the people. You authorize one portion of the community to rule over the other portion of Porto Rico. It is a dangerous thing, and I do not believe that you should embody it in the law of Porto Rico as reflecting the best judgment of Congress in the year 1916. We can not go back to the theories of those legislators of 100 years ago who did try to create special distinctions for the propertied class. You know that the Senate of the United States was only a short time ago called "the Millionaires' Club." When you study the minutes of the Constitutional Convention of 1787, you will find that the authors of the Constitution feared the masses; they feared the crowd. I do not recall who it was who said it, but I believe it was Morris, that it was "necessary to create a legislature which should be independent of the whims and caprices of the people." Now, there is no reason in the world why we should now in drafting a law for Porto Rico embody every reactionary principle, every conservative principle in the old constitutions, principles that have been repudiated by the progressive part of America. Why should you now in the year 1916 go back to reactionary principles, to reactionary theories, to theories that have been exploded, to theories which will place property above men? That is where the vice of this thing lies.

In this section you have another obnoxious provision to which I want to call your attention:

No person shall be a member of the senate * * * who has not been a resident of Porto Rico for at least two consecutive years.

Mind you, when it comes to residence you permit a man to become a member of the Senate who has been a resident of Porto Rico for two years, but when it comes to property, then the native must own at least a thousand dollars worth of property. In other words, a rich man, a well-to-do man, who will come to Porto Rico and will have been a resident for two years only will have a right to sit in the upper house of Porto Rico and to govern Porto Rico. But a man who has been a resident of Porto Rico for 20 years, or who is a native of Porto Rico, a man of education, a man of intelligence, who does not possess a thousand dollars' worth of property, will be disqualified from contributing his judgment and his voice to the shaping of the laws for his own people.

I do not understand the operations of the minds of the members of the committee. I do not understand what they are after, unless it is their object to give to property the right to rule over the people of Porto Rico. A government of the people of Porto Rico by the Porto Ricans is inconceivable under the proposed bill.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York [Mr. LONDON].

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. LONDON. I ask for a division, Mr. Chairman.

The committee divided; and there were—ayes 4, noes 42.

So the amendment was rejected.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. MANN. This section provides that the senators shall be elected by the qualified electors of Porto Rico. Section 35 provides that the qualified electors of Porto Rico "shall consist of those citizens that will be hereafter registered in accordance with the terms of this act and of the laws of Porto Rico hereafter enacted." Is there any provision in this bill in reference to the registration of the electors of Porto Rico?

Mr. JONES. There is not, I will say to the gentleman; but I desire also to say to him in this connection that that section has been redrafted—the thirty-fifth section. The gentleman from Iowa [Mr. TOWNER] and myself, it was understood, were to redraft it, and I shall present a new section for this thirty-fifth section when we reach it.

The CHAIRMAN (Mr. CROSSER). Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 30. That the terms of office of senators and representatives shall be four years from the 1st of January following their election. In case of vacancy among the members of the senate or in the house of representatives, special elections may be held in the districts wherein such vacancy occurred, under such regulations as may be prescribed by law, but senators or representatives elected in such cases shall hold office only for the unexpired portion of the term wherein the vacancy occurred.

Mr. CANNON. Mr. Chairman, I notice that the senators and representatives are to be elected at the same time, and that the tenure of office is four years in each case. Am I correct in that?

Mr. RIVERA. Yes; you are correct.

Mr. CANNON. Why should not the senators serve a longer term than the representatives, or why should not the representatives serve a longer term than the senators?

They are elected at the same time. If you were to have hysteria in the island, you would have a complete absence of check by this arrangement. We get hysteria in the United States sometimes. The Senate is elected with a tenure of six years, one-third going out every two years. In theory, and I must confess in practice, according to my observation for a considerable number of years, the Senate does not as promptly reflect the popular judgment, or hysteria, as the case might be, as the House does. Many a time I have thought that the Senate did not perhaps perform its function. At times it has been uncomfortable. But after all, a majority of that Senate, two-thirds of it, lasts for four years, one-third of it for six years, and one-third of it for two years, and it gives an opportunity for a sober second thought, inasmuch as both Houses must concur in legislation. That has been exceedingly useful.

Now, they might have a storm, or a "brain storm," in Porto Rico; and with an election once in four years, the only check would be the veto of the governor.

The CHAIRMAN. The Clerk will read.

Mr. CANNON. I would be glad to know the views of the Committee on Insular Affairs. Of course, the gentleman in charge of the bill may have the power to proceed. I did not quite consume my five minutes. He will have the power to read along, and everything will go; but if there is some reason why both these houses should be elected at the same time and have the same tenure I think it would be well to give the House information, if there is any.

Mr. JONES. I shall be glad to give the best reason I can. I certainly did not intend to be discourteous to the gentleman. I did not understand that he had offered any amendment. He asked whether or not the two houses were to be elected at the same time and whether they were to have the same terms, and I indicated that that was the case. I did not know that the gentleman desired any further explanation.

In the first place I want to say that the reason of economy—the frequency of elections—had more or less to do with this provision than any other consideration. The only practical solution of the question other than that which we adopted would have been to have elected senators for four years and representatives for two years, or representatives for three years and senators for six years. That idea was suggested some two years ago during the consideration of the Philippine bill, and objection was made to it on the floor, and the bill was amended. The idea is to reduce the number of elections as much as possible.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. JONES. Yes.

Mr. TOWNER. That last remark that the gentleman made was what I was going to call attention to. I think we all understand the common ground upon which the objection of the gentleman from Illinois [Mr. CANNON] was based. However, on consultation with the Insular Department, that has had charge of these matters for a good many years, and with the people of Porto Rico, through their Representative, Mr. RIVERA——

Mr. JONES. And I would add the Governor of Porto Rico, who came here——

Mr. TOWNER. Yes; and considering the present condition of the finances, taking into consideration all those things, it was thought best to place these terms as they are in the bill.

Mr. CANNON. In other words, it is popular government; they are to govern themselves. But this is another argument against any legislation.

Mr. TOWNER. I do not altogether agree with the gentleman from Illinois, I will say.

Mr. MONTAGUE. I would like to ask the gentleman from Iowa a question.

Mr. TOWNER. The gentleman from Virginia [Mr. JONES] has the floor.

Mr. MONTAGUE. Do I understand from the gentleman from Virginia and the gentleman from Iowa that the only argument for this uniformity of term of the House and Senate is the one of economy?

Mr. TOWNER. It is not the only argument.

Mr. MONTAGUE. That is the only one that has been given.

Mr. TOWNER. That is the principal argument.

Mr. MONTAGUE. If that is the principal argument, would you not accomplish the object aimed at by abolishing one or the other branch of the Congress?

Mr. JONES. I do not think that that is a fair deduction at all.

Mr. MONTAGUE. I deduce that from the principle presented. If you are going to have a bicameral body, you ought to have a varying term, according to the development and usages of our legislative institutions.

Mr. JONES. And you ought to have some regard for the people as to the cost of elections and the frequency of elections.

Mr. MONTAGUE. I think that is right.

Mr. JONES. This recommendation was made by gentlemen who are more familiar with local conditions than members of the committee. It was made by the Chief of the Bureau of Insular Affairs and by Gov. Yager, who came on here, and the committee, considering all things—the matter of expense and the matter of the frequency of elections—concluded that this was the better proposition.

Mr. RIVERA. Mr. Chairman, there are other reasons aside from that of economy in favor of this provision of the bill. In my judgment, the principal and paramount reason is not only economy, but it is a social and political reason. The people of Porto Rico are easily excited by an electoral contest, and it is better for them to have elections once in four years rather than once in two years, because if elections are to be held every two years there will be an enormous loss of time.

Mr. KEATING. Will the gentleman yield?

Mr. RIVERA. Certainly.

Mr. KEATING. How do your citizens manifest this excitement?

Mr. RIVERA. In different ways.

Mr. KEATING. Do they commit acts of violence?

Mr. RIVERA. Oh, no; they never manifest their excitement by unlawful means.

Mr. KEATING. You mean that they take an interest in the elections. Is that the idea?

Mr. RIVERA. They take a great interest; yes.

Mr. KEATING. Is it not true that in this country prior to an election the citizens take a great deal of interest in the election?

Mr. RIVERA. The people of the United States have different characteristics than the people of the Latin countries. In the Latin countries eight months before the election the people are very much occupied in election matters.

Mr. KEATING. The gentleman does not mean to convey the impression to this House that elections in Porto Rico are marked by acts of violence, does he?

Mr. RIVERA. No; not at all. There is no violence.

Mr. KEATING. By "excitement" the gentleman means that the people of Porto Rico are interested in their elections?

Mr. RIVERA. Yes; they are warmly interested in the elections.

Mr. KEATING. That they discuss the questions at issue?

Mr. RIVERA. Yes.

Mr. KEATING. And discuss the candidates?

Mr. RIVERA. Yes.

Mr. KEATING. But no violence is committed?

Mr. RIVERA. We think it is better that the elections in Porto Rico should be held once in four years, because of the saving in the people's time, and also for the reason of economy. The distinguished gentleman from Iowa [Mr. TOWNER] has explained this point clearly.

Mr. KINKAID. Will the gentleman yield for a question?

Mr. RIVERA. Yes.

Mr. KINKAID. How many months before the election are the candidates brought out?

Mr. RIVERA. Eight months.

Mr. KINKAID. Do the voters become so much interested in the campaign that they devote most of that eight months to having public meetings and electioneering for their candidates and working against those whom they oppose?

Mr. RIVERA. Yes.

Mr. KINKAID. And during that time do they neglect their work?

Mr. RIVERA. To some extent.

Mr. KEATING. I do not want to assume the responsibility for defending the gentleman's constituents, but I would suggest to him that he should not permit the impression to be given to this House that the people of his country are so utterly lacking in qualifications for self-government that for eight months prior to an election they neglect their business and devote all their attention to politics.

Mr. RIVERA. That is not exactly my affirmation. I have not stated that. The people of my country, enthusiastic as are all the peoples of the Latin race, do not limit their activity to casting their votes, but they frequent clubs, attend political meetings, discuss political issues, and sometimes carry their generosity to the point of neglecting their profitable business for the sake of their principles and ideals. This is the only meaning of my remarks, which the gentleman from Colorado has attempted to criticize.

Mr. KINKAID. Will the gentleman yield further?

Mr. RIVERA. With pleasure.

Mr. KINKAID. Does the gentleman mean that the people of Porto Rico can not afford to devote eight months to a campaign every two years?

Mr. RIVERA. That is what I mean.

Mr. KINKAID. And it would be more economical to have an eight months' campaign only once in four years, which would amount to two months for each year?

Mr. RIVERA. Certainly.

Mr. KINKAID. I think that that is a sensible proposition.

Mr. KEATING. If the gentleman will yield, I want to clear up this point. It is a serious matter. There are a million people in Porto Rico who are seeking self-government. Their Representative is here. He has not, as I understand it, stated that his people neglect their work? I am sure he does not desire to convey that impression to the House.

Mr. RIVERA. They do not completely neglect their other occupations, but they do so in part.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. Does the gentleman from Porto Rico desire more time?

Mr. RIVERA. Yes; I do.

Mr. STAFFORD. I ask unanimous consent that the gentleman may have five minutes more.

Mr. JONES. I ask unanimous consent that the debate on this amendment conclude in five minutes.

Mr. CANNON. Oh, I think we ought not to do that. I take it there will not be a protracted debate.

The CHAIRMAN. The gentleman from Illinois objects.

Mr. CANNON. A little later the gentleman may present his proposition and I shall not object. I have no desire for a long debate.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] asks unanimous consent that the time of the gentleman from Porto Rico be extended five minutes. Is there objection?

There was no objection.

Mr. RIVERA. I think it is a matter of economy, not only for the government of Porto Rico but also for the private citizens of Porto Rico, to have the elections every four years and not every two years, because at election time the enthusiasm there is very ardent, and frequently produces a great deal of public effervescence.

In elections for officials of the municipality the people are used to spending very much money. Sometimes in a little town of 10,000 inhabitants they spend more than $10,000 in one election. That is too expensive. According to the report the expenses of an election, referring to private expenses and not public expenses of the Government, are about $200,000 for each election,

and it seems to me that it would be a very good thing to save this large amount of money.

Mr. TILSON. Will the gentleman yield?

Mr. RIVERA. I will.

Mr. TILSON. Does not the gentleman take into consideration the matter of experience—that if the official will receive four years service it will be of much benefit to him as compared to two years or a shorter service?

Mr. RIVERA. Yes; that is another powerful reason. The gentleman from Illinois [Mr. CANNON] said that it was difficult for him to understand the different conditions between members of the house and members of the senate in Porto Rico, because the members of both houses are elected for four years; but the difference is that the members of the house will be elected by a single legislative district and the members of the senate will be elected by five districts. In this manner if a member of the house is given 20,000 votes, the member of the senate will receive 100,000 votes. That is the distinction between the members of the two bodies. Senators will have more representation and responsibility.

Mr. CANNON. Will the gentleman yield.

Mr. RIVERA. I will.

Mr. CANNON. In the whole island you elect 20?

Mr. RIVERA. Thirty members of the house and 19 senators.

Mr. CANNON. A portion of them from the island at large that everybody votes for.

Mr. RIVERA. Yes, sir.

Mr. CANNON. The others are elected by districts.

Mr. RIVERA. Exactly. Fourteen senators are elected by seven districts.

Mr. CANNON. Will the gentleman answer a further question? In the United States, here and there, we have bribery at elections. Fortunately, so far, taking the whole electorate, the rule is not bribery but honest voting upon the judgment of the electors. How is it in Porto Rico? The gentleman spoke of large expenditures; is there any bribery there?

Mr. RIVERA. Nothing of the kind. The elections are completely honest. The large expense that I spoke of is on account of the propaganda.

Mr. CANNON. There is no bribery, the gentleman says, direct or indirect, of the individual voter?

Mr. RIVERA. No bribery at all. Or, perhaps, in a very small number of cases; but not to any dangerous extent.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. RIVERA. I will.

Mr. SMITH of Michigan. How does it take so much money, then, to elect a senator or representative?

Mr. RIVERA. It takes no money at all.

Mr. SMITH of Michigan. He does not pay anything?

Mr. RIVERA. Nothing. I have been elected to represent the people of Porto Rico in this House for three terms, and I did not spend one cent in my elections. [Applause.]

Mr. KINKAID. Did any person run against the gentleman for the office; was there any opposition?

Mr. RIVERA. Oh, yes.

Mr. KINKAID. Every time?

Mr. RIVERA. Yes. I belong to the Union Party in Porto Rico, and there is another party, called the Republican Party, which has no connection with the Republican Party in the United States; it is a local party. But every time that I was a candidate the Republican Party has also presented its candidate, and I have had a great opposition.

Mr. KINKAID. Mr. Chairman, I am heartily in favor of the provision of the bill under consideration; that is, I think few elections are preferable to frequent elections in Porto Rico. I favor fewer elections rather than frequent elections in the United States. I think in several of the States of the Union general elections come too often. Several of the old States, including Massachusetts and Rhode Island, elect a governor every year. That seems to me to be useless and very uneconomical. As I view it, too much time and too much money, honestly expended, is lost in holding general State elections annually. Neither can a fair trial be given an administration in one year.

The State of Nebraska has recently changed its constitution so that it does not require a general State election every year. A general election is now required but once in two years. This year will be the first year to vote under the new system and elect all of the officers that heretofore have been elected by two elections, held a year apart. I think we ought to go still further and elect both State and county officials for four instead of two years. Mr. Chairman, it is significant that while old constitutions are being amended to make official terms longer no changes are being made to shorten terms, hence progress is in the direction of longer terms in office. I think the general trend is for fewer elections, with correspondingly longer terms in office. At any rate, I have stood consistently for such change for years.

Mr. Chairman, I am indeed very much pleased to know that the able gentleman from Porto Rico gives his unqualified approval of the provisions contained in the bill for the election of the members of the house as well as the members of the senate for a term of four years. I can readily understand why this may be appropriate for Porto Rico, but not desirable for the States of the Union. The stand taken by the gentleman from Porto Rico, in my estimation, reflects very favorably upon himself and his constituents. The reasons, in substance, given by the able gentleman from Porto Rico in favor of infrequent rather than frequent elections for his people, as I understand him, though he has not expressly so stated himself, is that their enthusiasm, stimulated and awakened by the exercise of the right of suffrage, comparatively new to them, leads them to devote too much time to political campaigns to the neglect of their usual vocations, thus tending to impoverish individuals and cause loss to the local public generally. The reason, therefore, is an economic and laudable one.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. HELM. Mr. Chairman, I move to strike out the last two words. Ever since I have been a member of the Insular Affairs Committee I have felt a very keen and lively interest in the people of Porto Rico. They are indeed the wards of this Government. One of the features of this situation to which I have alluded on every occasion similar to this is the possibility of the enormous trade looming up, the commerce of South America looming up as a possibility for this country, and inasmuch as this bill now makes the Porto Ricans citizens of the United States, we ought to take advantage of every possibility to select from the Porto Ricans the representatives for the Consular Service especially, and send as many of them as possible into the countries of South America as representatives of this Government. They have a kindred language, they are a kindred race, and they know the manners and customs of the people of South America. They would make the most serviceable representatives in a business way that this Government could have.

I hope that the department will, as far as it can, take notice of this situation and carry it into execution as far as it is possible to do so.

Another thing I could never understand and that is why, since the construction of the Panama Canal, we have not employed Porto Ricans when we have been going through the south islands to secure labor of all kinds in the construction of the canal.

I am informed that labor there is at a discount, that there is not enough employment in the island of Porto Rico for the Porto Ricans. Why our Government from the start has not been going to the island of Porto Rico to get labor to take down to the canal to help construct it I do not know.

Mr. MADDEN. Will the gentleman yield?

Mr. HELM. I will.

Mr. MADDEN. Does the gentleman know that the Canal Commission organized a board of civilians to go all over the world to find men to go and dig the canal, and they had to take them where they could get them?

Mr. HELM. I think if we could get laborers on the islands of the South Seas in the same latitude as Porto Rico it could have been possible to have obtained them in Porto Rico. On my trip to the Canal Zone I saw Jamaicans and laborers from several of the islands in the South Sea who were doing the manual labor in the Canal Zone, and why we have not had our people—citizens of our colonial possessions, if you may so term them—at work there instead of these English citizens is something I can not understand. I can not yield further.

Mr. YOUNG of North Dakota. Will the gentleman yield?

Mr. HELM. I only have five minutes. Now, this situation has arisen: There is a great scarcity of labor in this country now. Labor is at an enormous premium in the United States; there is a good paying job for every person willing to work. People are offering $3 a day for the commonest kind of work, and this bill makes the Porto Ricans citizens of the United States, and why we could not, why we should not, undertake in every possible way to get labor from Porto Rican Islands into the United States to take the place of this labor that has gone back to Europe——

The CHAIRMAN. The time of the gentleman has expired.

Mr. ALMON. Mr. Chairman, I see no objection to the text of the bill providing that the senators and representatives in the Porto Rican Legislature shall both be elected for a term of four years. It is true, as has been stated by some, that it has been the practice in many of the States of the Union to elect the members of the State senate for a term of four years and the members

of the house for two years. Such was the case in Alabama until 1901. Since then, in accordance with the provisions of the constitution of 1901, we have elected our State officers and the members in both branches of the legislature at the same time for a term of four years. This new plan has given satisfaction and, we believe, is in the interest of good government. If this be true as to one State it would no doubt be true as to others. If it works well in the States it would, no doubt, in Porto Rico.

When the question of terms of the President of the United States, Senators, and Members of the House was under consideration in the convention which prepared the Constitution of the United States there was wide difference of opinion as to what should be the length of the term of these various officers, and it is said that giving the United States Senators six years, the President four years, and the Members of the House two years was the result of compromise. It was then provided that the Senators should be elected by the legislatures of the various States. That has been changed so that they are now elected directly by the people.

There is a strong sentiment in this country to-day for the election of the Members of this House for four years, and if it could be left to a vote of the people of the Nation I believe it would carry by an overwhelming majority. I hope the committee to which the resolution providing for an amendment to the Constitution providing for the election of the Members of Congress for four years was referred will grant hearings and report the resolution, in order that it may come before Congress and that we may have an expression on the subject. [Applause.]

Mr. FESS. Mr. Chairman, I simply want to remind the committee that there was no controversy as to whether this should be a bicameral system of the two houses, but there was a question as to whether the tenure should be the same in both houses. However, the committee came to the conclusion, and it was a unanimous vote, ultimately, that instead of lessening the time of members of the house from four to two years, or extending the time of the members of the senate from four to eight years, it was better to make the tenure of the members of the two houses the same, four years. That similarity of tenure does not destroy the bicameral system at all. The facts are, we provide for 35 districts and four members at large for the house, and we have 7 districts with two members from each and five members at large in the senate, their duties and powers while legislative are not entirely similar, and therefore there is a difference in the two houses which makes it a bicameral system instead of a unicameral system, but the only similarity is in the tenure. We agreed that two years in the house is too short and eight years in the senate is too long, and a compromise is reached to make them both four years. It does not destroy the bicameral system at all. The functions of the two houses are preserved, as they are recognized in the States. The only bit of difference from what we have in the several States and in the Federal Government is the similarity of tenure, and that is why the committee came to that conclusion.

Mr. JONES. Mr. Chairman, there is no amendment offered.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

SEC. 32. That the senate and house of representatives, respectively, shall be the sole judges of the elections, returns, and qualifications of their members, and they shall have and exercise all the powers with respect to the conduct of their proceedings that usually pertain to parliamentary legislative bodies. Both houses shall convene at the capital on the second Monday in February following the next election, and organize by the election of a speaker or a presiding officer, a clerk, and a sergeant at arms for each house, and such other officers and assistants as may be required.

Mr. CANNON. Mr. Chairman, I move to strike out the last word. I would like to ask the gentleman in charge of the bill, does this provide for the length of sessions for the senate and house?

Mr. JONES. I think it does in the subsequent section:

But no regular session shall continue longer than 90 days, not including Sundays, holidays, or days during which both houses may by concurrent resolution and with the approval of the governor have agreed to a recess.

The Clerk read as follows:

SEC. 34. That the enacting clause of the laws shall be as to acts, "Be it enacted by the Legislature of Porto Rico," and as to joint resolutions, "Be it resolved by the Legislature of Porto Rico." Bills and joint resolutions may originate in either house. The governor shall submit at the opening of each regular session of the legislature a budget of receipts and expenditures, which shall be the basis of the ensuing biennial appropriation bill. No bill shall become a law until it be passed in each house by a majority vote of all of the members belonging to such house and be approved by the governor within 10 days thereafter. If, when a bill that has been passed is presented to the governor for his signature he approves the same, he shall sign it; or if not, he shall return it, with his objections, to that house in which it originated, which house shall enter his objections at large on its journal and proceed to reconsider it. If, after such reconsideration, two-thirds of all the members of that house shall agree to pass the same, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered, and if approved by two-thirds of all the members of that house it shall be sent to the governor, who, in case he shall then not approve, shall transmit the same to the President of the United States. The vote of each house shall be by yeas and nays, and the names of the members voting for and against shall be entered on the journal. If the President of the United States approve the same, he shall sign it and it shall become a law. If he shall not approve same, he shall return it to the governor, so stating, and it shall not become a law. If any bill presented to the governor contains several items of appropriation of money, he may object to one or more of such items while approving of the other portion of the bill. In such case he shall append to the bill, at the time of signing it, a statement of the items to which he objects, and the appropriation so objected to shall not take effect. If any bill shall not be returned by the governor within 10 days (Sundays excepted) after it shall have been presented to him, it shall be a law in like manner as if he had signed it, unless the legislature by adjournment prevents its return, in which case it shall be a law if signed by the governor within 10 days after receipt by him; otherwise it shall not be a law. All laws enacted by the Legislature of Porto Rico shall be reported to the Congress of the United States, as provided in section 23 of this act, which hereby reserves the power and authority to annul the same. If at the termination of any fiscal year the appropriations necessary for the support of the government for the ensuing fiscal year shall not have been made, the several sums appropriated in the last appropriation bills for the objects and purposes therein specified, so far as the same may be applicable, shall be deemed to be reappropriated item by item; and until the legislature shall act in such behalf the treasurer may, with the advice of the governor, make the payments necessary for the purposes aforesaid.

Mr. COOPER of Wisconsin. Mr. Chairman, I ask unanimous consent that the committee return to page 25, section 33.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to return to page 25, section 33. Is there objection? [After a pause.] The Chair hears none.

Mr. COOPER of Wisconsin. Mr. Chairman, I move to strike out the last word. I want to ask a question of the gentleman in charge of the bill. Beginning with line 18, the gentleman will observe that the governor may call "special sessions of the legislature or of the senate"; that is, he may call a special session of either the legislature or of the senate alone at any time. Then, in lines 20, 21, and 22, is a provision that the governor—

shall call the senate in session at least once each year on the second Monday in February of those years in which a regular session of the legislature is not provided for.

That amounts to a regular session of the senate. The bill is mandatory that the senate shall convene on that day—the second Monday of February—in certain designated years. These would not be special sessions of the senate. They are to be fixed by law. Then follows the language in line 23:

But no special session shall continue longer than 10 days.

Now, that applies only to any special session of either the legislature or of the senate. But how about the sessions of the senate which the law in mandatory fashion requires shall convene regularly on the second Monday in certain Februarys? How long are these to continue?

Mr. FESS. There is no limit.

Mr. COOPER of Wisconsin. If they are to draw $7 per day, ought there not to be some limitation upon the length of time in which the senate shall remain in session in these particular February sessions?

Mr. GARRETT. Will the gentleman permit? The criticism of the gentleman from Wisconsin may possibly be well taken, but, in the contemplation of the committee, this session of the senate was regarded as a special session, because it was provided that the governor should call it.

Mr. COOPER of Wisconsin. But strictly speaking, taking these two provisions of the paragraph together, it is not, because there is in the same clause a provision for the calling of special sessions of the senate. These are specifically called special sessions. But the other provision is mandatory that the senate shall convene on the second day of February in certain years. That is, convene regularly in these years.

Mr. MANN. It is on the call of the governor.

Mr. COOPER of Wisconsin. It is not a special session, because just before that there is a provision for special sessions of the senate to be called by the Governor to convene at any time.

Mr. GARRETT. I see the point the gentleman makes. But still it does not mean by direction of the law. It means by the call of the governor. That, I think, makes it a special session.

Mr. TILSON. Will the gentleman yield?

Mr. GARRETT. Mr. Chairman, if the gentleman will permit a minute, in order to clear up any doubt that may be in the mind of anyone concerning this, I think I could suggest an amendment, after the word "in," in line 21, by inserting the word "special."

Mr. TILSON. I was just going to suggest that to the gentleman from Wisconsin.

Mr. GARRETT. I think that would bring it within the terms of the bill.

Mr. COOPER of Wisconsin. It ought to be there if that is the meaning, and then these February sessions can not last longer than 10 days.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 25, line 21, after the word "in," insert the word "special."

The question was taken, and the amendment was agreed to.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. SAUNDERS having taken the chair as Speaker pro tempore, a message in writing from the President of the United States was communicated to the House of Representatives, by Mr. Sharkey, one of his secretaries.

PORTO RICO.

The committee resumed its session.

The Clerk read as follows:

SEC. 35. That the qualified electors of Porto Rico, for any election whatsoever, shall consist of those citizens that will be hereafter registered in accordance with the terms of this act and of the laws of Porto Rico hereafter enacted. That no person shall be allowed to register as a voter or to vote in Porto Rico who is not a citizen of the United States, over 21 years of age, and who is not able to read and write, or who is not a bona fide taxpayer in his own name in an amount of not less than $3 per annum.

Mr. JONES. Mr. Chairman, I move to strike out all of section 35 and insert in lieu thereof the following, which I send to the Clerk's desk.

The CHAIRMAN. The gentleman sends the following amendment to the Clerk's desk, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. JONES for the committee: Strike out all of section 35 and insert in lieu thereof the following:

"SEC. 35. That the qualified electors of Porto Rico shall consist of all male citizens of the United States 21 years of age or over (except insane or feeble-minded persons and those convicted in a court of competent jurisdiction of an infamous offense since the 13th of August, 1898) who are able to read or write either the Spanish or English language, and who shall be bona fide taxpayers in their own name and in an amount not less than $3 per annum. No person shall be allowed to vote at any election whatsoever who shall not be registered as a qualified elector, and no person shall be registered as a qualified elector unless he shall have the qualifications herein specified and shall further comply with such regulations as may be hereafter enacted by the Legislature of Porto Rico."

Mr. JONES. Mr. Chairman, I merely wish to state that during the general debate upon this bill it was developed that this section was defective in some respects, and the gentleman from Iowa [Mr. TOWNER], the ranking member of the minority of the committee, and I undertook to redraft it. The amendment which I send to the desk is intended to cure the defects that we then discovered in the section. For instance, the section as it appears in the bill would require that the voter must be able to read and write and also must be a taxpayer to an amount not less than $3 per annum. That was not the intention of the committee in drafting the bill. The intention was to make the provision in the disjunctive and not in the conjunctive. It was not the purpose of the committee to add a property qualification to an educational one. A voter possessing either qualification should be permitted to vote. As the language is written in the bill, he would have to possess both the property and the educational qualifications.

Mr. TILSON. As I heard the gentleman's amendment, it did not seem to me it provided for any residence in Porto Rico at all. Did it not simply say that any citizen of the United States should be an elector? Should it not provide that he should reside in Porto Rico?

Mr. JONES. It provides that the qualified electors of Porto Rico shall consist of those citizens that will be hereafter registered in accordance with the terms of this act and of the laws to be hereafter enacted.

Mr. TILSON. Should it not say something about residence in Porto Rico?

Mr. JONES. There is nothing said as to residence in this bill.

Mr. TILSON. Was it not the intention to make it so?

Mr. JONES. I will say to the gentleman that all voters have to be registered, and the power and authority is conferred upon the legislature to provide for their registration. This bill simply undertakes to provide for the qualifications of voters, and the legislature has conferred upon it the authority to provide for registration, and so forth.

Mr. MANN. Mr. Chairman, I offer an amendment to the amendment.

The CHAIRMAN. The gentleman from Illinois offers an amendment to the amendment, which the Clerk will report.

The Clerk read as follows:

Amendment to the amendment offered by Mr. MANN: After the word "citizens," insert the words "without regard to sex"; and before the word "citizens" strike out the word "male."

Mr. MANN. Mr. Chairman, I offer an amendment to perfect the text of the bill.

The CHAIRMAN (Mr. FOSTER). The gentleman from Illinois offers an amendment to perfect the text. The Clerk will report it.

Mr. JONES. Mr. Chairman, does the gentleman offer two amendments?

Mr. MANN. One is an amendment to the amendment and one is to perfect the text of the bill.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois to perfect the text of the bill.

The Clerk read as follows:

Amendment offered by Mr. MANN: On page 28, line 12, after the word "enacted," insert the words "and no discrimination shall be made as to sex."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

Mr. STAFFORD. Mr. Chairman, I wish to be heard before that very important amendment shall be put to a vote.

Mr. KEATING. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. KEATING. The vote will come, first, on the amendment to perfect the text, and after that is voted on an opportunity will be afforded to vote on another amendment to perfect the text, will it not?

The CHAIRMAN. The vote will first come on the amendment to the amendment.

Mr. MANN. No; the first will come on the amendment to perfect the text.

The CHAIRMAN. The first will come on the amendment offered by the gentleman from Illinois.

Mr. JONES. The first vote will come on his amendment to perfect the text.

Mr. MANN. That is the rule.

The CHAIRMAN. Yes; that is correct.

Mr. LONDON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LONDON. May I offer in the form of a substitute an amendment?

The CHAIRMAN. To what?

Mr. LONDON. To retain section 35 as it appears in the original bill, and to strike out that part of section 35 which begins on line 14 with the word "age," and then strike out lines 15 and 16 of section 35.

The CHAIRMAN. It will be in order for the gentleman from New York to offer an amendment after the amendment of the gentleman from Illinois has been disposed of.

Mr. LONDON. It will not be in order to offer it at this time?

The CHAIRMAN. Not at this time.

Mr. JONES. Mr. Chairman, does the gentleman from Illinois [Mr. MANN] desire any prolonged discussion of these amendments?

Mr. MANN. No. I am willing to vote right now.

Mr. JONES. I will ask, Mr. Chairman, that by a unanimous-consent agreement the debate on these amendments be closed in 10 minutes.

Mr. MANN. Very well.

Mr. KEATING. Reserving the right to object, Mr. Chairman, that would not close debate on other amendments to the section?

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that the debate on these two amendments be closed in 10 minutes.

Mr. MANN. The debate on my amendments, not on that of the gentleman from Virginia.

Mr. KEATING. To close debate, as far as the amendments of the gentleman from Illinois are concerned, but that would not apply to the right of the gentleman from New York [Mr. LONDON] to offer his amendment?

Mr. MANN. That would not affect his right to offer further amendments.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. JONES. I suppose the gentleman from Illinois wants to use his time. I would like to close the debate on this proposition.

The CHAIRMAN. There seems to be no one on the other side asking for recognition.

Mr. JONES. The gentleman from Wisconsin [Mr. STAFFORD] asked for time.

Mr. KEATING. Mr. Chairman, this is too important a question to be disposed of without some debate.

The CHAIRMAN. Unless some one wants to occupy the floor, the Chair will put the question.

Mr. KEATING. I am enthusiastically for it.

Mr. MANN. Mr. Chairman, I do not particularly desire to take the time to discuss the woman-suffrage amendment, the equal-suffrage amendment, which I offered. It has been discussed all over the country. If there is anyone in this House who is not familiar with it, he ought not to be here. [Laughter.] Ten minutes' discussion on the subject amounts to nothing. I think everyone is prepared to vote on the subject. That is what it is—an equal-suffrage amendment. [Cries of "Vote!" "Vote!"]

Mr. JONES. Mr. Chairman, I want to say just a word. I shall not undertake in five minutes to discuss this question of woman suffrage, but I do wish to say that I hope this committee will not undertake to force woman suffrage upon the people of Porto Rico.

As I understand it, there is no desire for it in the island. Nobody has appeared before the Committee on Insular Affairs asking for it. I do hope that the Congress of the United States will not undertake to force woman suffrage upon the people of Porto Rico, and that Representatives upon this floor, simply because they have woman suffrage in their own States, will not undertake to fasten it upon a people who do not desire it, who have never asked for it, and who have never shown any disposition to have it.

Mr. KEATING. Mr. Chairman, will the gentleman yield?

Mr. JONES. I certainly will.

Mr. KEATING. I wanted to ask the gentleman if he consulted with the people of Porto Rico, or if the committee consulted with the people of Porto Rico, before they inserted in this section a provision which will disfranchise 60 per cent of the voters of Porto Rico?

Mr. JONES. This subject was somewhat discussed by Porto Ricans who appeared before our committee, most of whom, I think, favored some restrictions upon the suffrage.

Mr. KEATING. The gentleman does not pretend, though, that the 160,000 men disfranchised have been consulted?

Mr. JONES. I will say to the gentleman that, so far as I know, only one or two persons who claimed to represent them have protested against it. But I was not discussing that proposition at this time. That is not the matter upon which the committee is called upon to vote now. I am simply saying that so far as the committee is aware there is not a single human soul, male or female, in Porto Rico demanding equal suffrage, and therefore it seems to me that the Congress of the United States ought not to undertake to force equal suffrage upon that people.

Mr. Chairman, I reserve the rest of my time.

Mr. MANN. Mr. Chairman, this bill provides that the people shall not be qualified to vote unless they can read and write or pay taxes to the extent of $3 a year. I think that the woman in Porto Rico who can read and write or the woman who is a taxpayer there ought to have the privilege of voting. [Applause.] If all the men and all the women qualified to vote in Porto Rico under the terms of this bill do vote, the electorate there will be a smaller percentage of the population than there is now in any State in the Union; and when you attempt to cut down the electorate all along the line, and give the franchise only, as you say, to intelligence or property, then beyond all question you ought to give it to women. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. MANN].

The question was taken; and on a division (demanded by Mr. JONES) there were—ayes 63, noes 33.

Mr. JONES. Tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. JONES and Mr. MANN.

The committee again divided; and the tellers reported—ayes 60, noes 37.

Accordingly the amendment was agreed to.

The announcement of the result was received with applause.

The CHAIRMAN. The vote now comes on the amendment offered by the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Chairman, debate is limited on these two amendments.

Mr. JONES. Mr. Chairman, I understand that this is the amendment offered by the gentleman from Illinois.

Mr. LONDON. Mr. Chairman, I have an amendment to the text.

Mr. MANN. I hope the gentleman from New York will reserve it until this amendment is disposed of. It will be in order after my amendment is voted on.

Mr. GARRETT. Let us see about that. What is the amendment?

Mr. MANN. His amendment will be in order after this amendment is disposed of.

Mr. GARRETT. I do not know whether it will or not. I have not heard the amendment read.

Mr. MANN. I know it will.

Mr. GARRETT. Well, let us hear it read. We will see about that.

The CHAIRMAN. Does the gentleman from New York [Mr. LONDON] offer an amendment to perfect the text of the bill as now printed?

Mr. LONDON. Yes.

Mr. MANN. We had a unanimous-consent agreement to close debate on these two amendments.

Mr. GARRETT. That is quite correct; but, Mr. Chairman——

The CHAIRMAN. As the Chair understands it, the gentleman from New York offers an amendment to the substitute offered by the gentleman from Virginia.

Mr. MANN. But the gentleman from New York will be entitled to offer an amendment to perfect the text after my amendment is disposed of.

Mr. GARRETT. Mr. Chairman, an amendment to perfect the text takes precedence.

Mr. MANN. It certainly takes precedence except for the unanimous-consent agreement. If there is debate, after you have made this agreement, you certainly will not get any more agreements.

Mr. GARRETT. The only unanimous-consent agreement was to close debate.

Mr. MANN. The gentleman's amendment will be in order after this amendment is disposed of.

Mr. LONDON. I will offer it as soon as the amendment of the gentleman from Illinois is disposed of.

The CHAIRMAN. The question is on the amendment to the substitute offered by the gentleman from Virginia.

Mr. MONDELL. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from Wyoming rise?

Mr. MONDELL. I desire to offer an amendment perfecting the text of the amendment offered by the gentleman from Virginia [Mr. JONES]. I desire to know whether such an amendment is now in order.

The CHAIRMAN. It is not.

Mr. MONDELL. Will such an amendment be in order later?

The CHAIRMAN. It will be in order. The question is on the amendment offered by the gentleman from Illinois [Mr. MANN] to the substitute offered by the gentleman from Virginia [Mr. JONES].

Mr. STAFFORD. May we have that amendment reported again?

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After the word "citizens," in the amendment offered by Mr. JONES, insert the words "without regard to sex"; and before the word "citizens" strike out the word "male."

The CHAIRMAN. The question is on the amendment just reported.

The question being taken, on a division (demanded by Mr. JONES) there were—ayes 51, noes 36.

Accordingly the amendment was agreed to.

The announcement of the result was received with applause.

Mr. JONES. Now, Mr. Chairman, I suppose the vote comes on my amendment as amended.

Mr. MANN. The amendment of the gentleman from New York [Mr. LONDON] is now in order.

Mr. LONDON. Mr. Chairman, I ask that my amendment be read.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from New York [Mr. LONDON].

The Clerk read as follows:

Amendment offered by Mr. LONDON: Page 28, line 14, strike out the words "and who is not," and also strike out all of lines 15 and 16.

Mr. LONDON. Mr. Chairman, this opens up again the question whether the unit of society is the human being or property. If you adopt the amendment which I now propose, you will eliminate the most objectionable feature of the bill. If you permit it to stand as recommended by the committee, you will disfranchise three out of every four voters in Porto Rico.

The people of Porto Rico have been exercising the franchise for 14 years. We are not called upon to confer a new right or a new privilege. We are asked to take away a right that people have enjoyed for 14 years. You have heard from the representative of Porto Rico that his people take an intense interest in elections, that for months prior to an election they debate and discuss and analyze the issues involved in the campaigns, and now you attempt to separate the Porto Rican people into two classes. One class is to make the law and the other class is to obey it. One class is to rule, the other class is to be

ruled. According to the testimony of every man who appeared before the Committee on Insular Affairs, a tax of $3 will disfranchise 165,000 people out of a total of 205,000 voters. I can not understand on what principle you defend the action of the committee. I presented the subject to you before, and I ask you to think twice before you put yourselves down as reactionaries and as willing to bring back to life the principle that property and not man shall rule.

The bill is both unwise and reactionary. It is unwise because it forces upon the Porto Ricans United States citizenship, when almost all the Porto Ricans, with the exception, as I am informed, of a small labor and Socialist group, crave Porto Rican citizenship under the protection of the United States. It is not for us to say whether the Porto Ricans are foolish or wise in their preference for Porto Rican sovereignty. In dealing with national aspirations you deal with matters of the heart, which do not lend themselves to calculating logic.

It is more than probable that if no attempt is made to graft upon them American citizenship that in the very logic of events and by the very force of its own growth and development Porto Rico will consider it a privilege to become an integral part of the United States. The wisest course, then, would be to give them the greatest possible measure of self-government consistent with the exercise of protection by an elder brother over a younger one. They would then become the makers of their own fate. The inexorable law of life would lead them to merge into the people of the United States.

We do not only impose upon them American citizenship but we force upon them theories of government which have long ago been repudiated by the progressive forces of American democracy.

The bill provides that no person shall be a member of the Senate of Porto Rico unless (among other qualifications) he owns in his individual right taxable property in Porto Rico to the value of not less than a thousand dollars. In other words, the upper legislative body is made accessible only to the very richest. A thousand dollars is a fabulously large sum of money for Porto Rico.

Under Spanish rule the Porto Ricans were governed by the aristocracy of birth. We are imposing upon them the most despicable kind of an aristocracy, the aristocracy of pelf. No matter how cultured or educated a man may be, unless he has accumulated taxable property of the value of at least $1,000 the proposed law will exclude him from representing the people of Porto Rico in their highest legislative body.

In some European countries, where the form of constitutional monarchy prevails and where the franchise has not yet been extended so as to cover every citizen, along with special privileges enjoyed by the man of property, homage is paid to the intellectual elements by giving representation to universities or by exempting college graduates from property qualifications.

I am pointing out this merely to show that we are less progressive in this matter than are some constitutional monarchies.

But the limit of iniquity is reached in the proposed act by the provision that no person "who is not able to read and write or who is not a bona fide taxpayer in his own name in an amount of not less than $3 per annum" shall be allowed to exercise the franchise. According to the unanimous testimony of all who appeared during the hearings, the sum of $3 is so onerous a tax that it will disqualify 165,000 out of 205,000 voters who participated in the last election. The present minimum tax is 3 cents.

When one but considers the miserable economic conditions prevailing in Porto Rico, where 5 cents an hour is considered a generous wage, there will be no difficulty in reaching the conclusion that the suggested tax has for its object the disfranchisement of the great majority of the working people of Porto Rico. One need but read the report of the last strike of the agricultural workers on the island—and there are 600,000 of them—to realize how utterly helpless the great masses will be when, in addition to the disadvantage of poverty, they will be deprived of the opportunity to assert their rights through the means of the ballot.

It may be worth while to quote here from the report of the United States Commission on Industrial Relations that: "As a result of the low-wage standard, the diet of the laborers, consisting chiefly of rice, beans, codfish, and plaintains, is so miserably inadequate that the worker not only is rendered inefficient but to a large extent undernourished;" that "there are nearly 200,000 children for whose education no provision has been made"; that "the great majority of the Porto Ricans are landless, the land being owned by corporations, wealthy landlords, and the colonial government and municipalities."

How big a sum a $3 tax is in Porto Rico one can appreciate only when he reads that "A majority of the rural workers live in huts which do not cost more than $10 to build."

For more than 50 years after the adoption of the Federal Constitution, the various States of the Union struggled to rid themselves of the antiquated property qualifications which hampered the growth of democracy. Dorr's Rebellion in Rhode Island in 1842 resulted in abolishing a system of voting which limited the franchise to landlords and to their first-born sons. Manhood suffrage is at least theoretically recognized as the very foundation of democracy. Many States of the Union and several European nations have extended the franchise to woman. Universal suffrage is inevitable.

You seek to reverse the law of progress, so far as Porto Rico is concerned. What the American States have freed themselves from, after long and painful effort, you now seek to foist upon Porto Rico. As it is, wealth has a tremendous advantage over poverty. You make the wealthy class so much stronger by conferring upon them the exclusive power of making the law of the land. By law you divide the Porto Ricans into classes. One class is to make the law, the other is to obey. The few are to command; the many are to serve. Such are the principles which the Congress of the United States promulgates in the year 1916. What a strange sort of democracy! What a peculiar kind of republicanism!

I challenge your right to endow property with the franchise which you deny to man.

Mr. AUSTIN. Mr. Chairman, this bill comes here with the unanimous approval of the Committee on Insular Affairs—Democrats and Republican alike. It has the support, the cordial support, of the Representative of the people of Porto Rico in this House. If it is satisfactory to the citizens and the Representative of the Porto Rican people, the gentleman who represents the East Side of New York ought to hold his peace.

Mr. LONDON. Mr. Chairman, I ask that the expression "from the East Side" be stricken out. It is as if I said "the gentleman from the mountainous regions of Tennessee." I am a Representative from New York.

Mr. KEATING. Mr. Chairman, I ask that the gentleman's remarks be taken down. He said the gentleman who misrepresents the East Side. The gentleman from Tennessee is so punctilious himself and so often instructs the House——

The CHAIRMAN. The gentleman from Colorado can not proceed after he has demanded that the remarks be taken down.

Mr. BURNETT. Mr. Chairman, does the gentleman mean to say that it is a disgrace to represent the East Side?

Mr. KEATING. I will withdrawn the request, Mr. Chairman; I will permit the gentleman to proceed.

Mr. AUSTIN. I do not ask the gentleman from Colorado to permit me to proceed.

The CHAIRMAN. The gentleman from Colorado withdraws his request, and the gentleman from Tennessee will proceed.

Mr. AUSTIN. I supposed that the gentleman from New York [Mr. LONDON] represented an East Side district of New York City. If he has not that honor——

Mr. BURNETT. Mr. Chairman, I think there was a misapprehension. The gentleman from Colorado understood the gentleman from Tennessee to say "misrepresents."

Mr. AUSTIN. That is a question for the people of that district to pass upon, and I take it they will do it next November. [Laughter.]

Mr. KEATING. I want to say, Mr. Chairman, that I did understand the gentleman to say that Mr. LONDON misrepresented that district. The reporter's notes will show whether I was in error or not.

Mr. AUSTIN. In the first statement I made I did not use the word misrepresent. Later on I may have used it.

Mr. KEATING. The gentleman did use it in his first statement.

Mr. AUSTIN. I did not.

Mr. LONDON. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman can not make a parliamentary inquiry while the gentleman from Tennessee has the floor.

Mr. AUSTIN. Mr. Chairman, universal suffrage has been tried in Porto Rico for 14 years and has been unsatisfactory to the people of the island. They have made such representations to us, and the committee thought it was our duty to correct it. If the gentleman from New York wants to put ignorance above education, that is his right. There are 60 per cent of the people of Porto Rico of the voting age who are illiterate. There are no harsher conditions in relation to the payment of taxes in this bill than in the State of Tennessee or a large number of States of the Union, the New England States especially. By and by,

with free educational advantages in Porto Rico, they will have a great majority of the people who are going to vote who will be able to read their tickets. We do not permit ignorance to rule in the Southern States, and yet the gentleman from New York is for universal suffrage in Porto Rico regardless of the ability to read or the payment of taxes. And yet he would not dare to stand on the floor of this House and favor universal suffrage and the right of illiterates to control in South Carolina or Louisiana.

Many of the cities, counties, and congressional districts in the United States do not have universal suffrage, and yet he will advocate here, as the gentleman from Colorado proposed, universal suffrage, regardless of their ability to read and write or the payment of taxes. No man in Porto Rico who does not qualify himself to read and write and has not industry and patriotism enough to save and contribute $3 toward the running expenses of the government ought to be placed in the position to dictate the form of government and the manner in which the goverment should be run.

Mr. REILLY. Will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. REILLY. Does this require two qualifications, or only one?

Mr. AUSTIN. He must either be able to read and write or pay taxes to the amount of not less than $3.

Mr. REILLY. Why would not one be sufficient to protect the government?

Mr. AUSTIN. One is sufficient. He can vote if he pays taxes to the amount of $3, or he can vote if he can read and write.

Mr. JONES. At the present time the people control only one branch of the legislature. This bill confers upon them the right to elect both branches, and we thought that when we have extended them that right we ought to put these reasonable restrictions in.

Mr. AUSTIN. I thank the chairman of the committee for his statement. This is a forward and advanced step in giving the people of Porto Rico the right to manage their local affairs, and it should receive the undivided support of this House. It is a piece of splendid constructive legislation and is a credit and an honor to the distinguished gentleman from Virginia who reports the bill. It does not lie in the mouth of the gentleman from New York [Mr. LONDON] or the gentleman from Colorado [Mr. KEATING] to question the wisdom, the justice, or the patriotism of this measure, which bears the impress of this splendid man's work, the dean of this House, the gentleman from Virginia, Mr. JONES. [Applause.]

Mr. KEATING. Mr. Chairman, I am sure I have no disposition to question the patriotism or the ability of the gentleman from Virginia, the chairman of the committee. But I do not understand that when we offer amendments to this bill we are questioning the ability or the patriotism of the gentlemen who compose the Committee on Insular Affairs. A few moments ago an amendment was adopted, largely by votes on the other side of the House, led by the distinguished gentleman from Illinois, the minority leader, and I am sure he would be the last man in this House to question the ability or the patriotism of the distinguished and well-beloved chairman of the Committee on Insular Affairs.

But, Mr. Chairman, this is a fundamental question. For years the people of Porto Rico have been permitted to vote without an educational or a property qualification; and it is estimated that if the proposed restrictions are thrown about the franchise 60 per cent of the men who now vote will be deprived of the ballot. The gentleman from Tennessee [Mr. AUSTIN] states that this 60 per cent have not demonstrated their capacity to use the franchise. But I submit to this House—and I think the distinguished gentleman from Virginia, the chairman of the committee, will bear me out, and I am sure that the distinguished representative from Porto Rico will sustain me—that there is not a scintilla of evidence to sustain that assertion.

Why, one of the most distinguished residents of Porto Rico, a former Member of this House, testifying before a committee of the Senate, submitted this amazing instance to show the capacity of the people of Porto Rico for self-government: He said that in one instance 5,000 votes had been cast in a municipal election, and the result had been determined by a majority of 7 votes; and those who lost—and I think he represented the losing side—instituted a contest and expended a very considerable amount of money; and he called the attention of the committee to the fact that after weeks of endeavor they had been unable to find among those 5,000 votes 7 tainted votes. I want to submit in all candor to the members of this committee that a better record could not be made in any American municipality.

Now, my friends, most of these men whom you will disfranchise—if you adopt the provisions of this bill or if you adopt the substitute offered by the gentleman from Virginia—are the toilers of Porto Rico. This weapon, the ballot, is the only weapon they have with which they may protect their interests, and I appeal to the Members of the American House of Representatives, without regard to party affiliations, not to take away from these men the measure of self-government which was granted them even by their Spanish rulers.

Mr. AUSTIN. Will the gentleman yield for a question?

Mr. KEATING. I wish the American people to be quite as generous in their dealing with these Porto Ricans as were the Spaniards who preceded them. I am delighted to yield to the gentleman.

Mr. AUSTIN. Why did not the gentleman favor universal suffrage in the Philippine Islands and offer an amendment to the Philippine bill to that effect?

Mr. KEATING. Mr. Chairman, if I neglected to offer such an amendment, if I voted for any restriction upon suffrage in the Philippine Islands, I did it unconsciously, because I not only believe in permitting the Filipinos to vote without regard to property qualifications or educational qualifications, but I favor giving them their independence, and I would vote that way to-day, and if I had an opportunity this moment to give the people of the Philippines complete independence I would deem it a very high privilege.

Mr. AUSTIN. If the gentleman was a citizen of the South, say in Mississippi, would he favor universal suffrage there?

Mr. KEATING. Mr. Chairman, I do not propose to raise the color question here at this time [laughter on the Republican side], but I will say that the gentleman from Tennessee sits on the Republican side of the House and represents the party which wrote into the Constitution the declaration that the black man should be protected in his rights. It is rather strange to hear a Republican enunciate such a doctrine, and I do not think it will meet with any vast amount of applause or approval on that side of the aisle.

Mr. AUSTIN. I beg the gentleman's pardon; I never enunciated any doctrine, but I asked the gentleman a straightforward question and he dodged the answer.

Mr. DAVENPORT. Ask him whether he did——

Mr. KEATING. No; I will not ask the gentleman any question relating to his views on the color question. I want to confine my remarks to the pending measure. I hope no restriction will be placed on the Porto Ricans' right to vote.

Mr. JONES. Mr. Chairman, I desire to say a word or two before this amendment is voted on. This question was very carefully considered by the Committee on Insular Affairs, and while I greatly appreciate the kindly things the gentleman from Tennessee [Mr. AUSTIN] has said in regard to myself, I do not and can not take credit for the insertion in this bill of the provision to which he calls attention. It was very carefully considered by the whole committee. As gentlemen know, different views are entertained as to the question of the capacity of the people of Porto Rico for self-government. The people of Porto Rico only elect one branch of their legislature at this time. The legislature to-day consists of an executive council of 11 members and of a house of delegates. The executive council is appointed by the President of the United States, and, of course, the house of delegates can not enact any law without the concurrence of the executive council.

Mr. REILLY. Will the gentleman yield?

Mr. JONES. In just one moment I will. Now, when the proposition was made to give the people of Porto Rico control of both branches of their legislature by allowing them to elect a senate as well as a house of representatives a number of Members of this House thought that was going too far. I was one of those who advocated giving them control of both branches of their legislature; other gentlemen were not willing to go so far unless a veto power was lodged somewhere, either in the governor or the President. Most of them insisted that if the people of Porto Rico were permitted to elect both branches of their legislature that certain restrictions should be placed upon the exercise of the right of suffrage. So this was a matter of compromise, so to speak. The people of Porto Rico desire more than anything else to be given the right to elect both branches of their legislature. We give them that right in this bill, but in doing so it has seemed to us that reasonable restrictions should be placed upon the exercise of the suffrage. I now yield to the gentleman.

Mr. REILLY. The gentleman states that at the present time they elect by universal suffrage one house?

Mr. JONES. I would not say universal suffrage. I had not desired to discuss that matter, but I may say here that the gentleman from Colorado [Mr. KEATING] was mistaken in saying that the people of Porto Rico enjoyed universal suffrage under Spanish sovereignty.

Mr. REILLY. What were the qualifications when we took over the island from the Spaniards?

Mr. JONES. I can not answer that question from memory. The present organic law says:

At such elections all citizens of Porto Rico shall be allowed to vote who have been bona fide residents for one year and who possess the other qualifications of voters under the laws and military orders in force on the 1st day of March, 1900, subject to such modifications and additional qualifications and such regulations and restrictions as to registration as may be prescribed by the Executive Council.

Mr. REILLY. Now, will the gentleman yield?

Mr. JONES. That has been declared to be manhood suffrage, but it is not what is generally understood to be manhood suffrage.

Mr. REILLY. What, if anything, has occurred in the exercise of the right to vote, as read by the gentleman, that would indicate the wisdom of restricting the right to vote in Porto Rico?

Mr. JONES. As I have already said, the people of Porto Rico now vote only for the members of their house of delegates.

Mr. REILLY. Have they elected good delegates?

Mr. JONES. I think in the main they have.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LONDON. Mr. Chairman, I ask unanimous consent that the time of the gentleman be extended for two minutes. I want to ask him a question.

The CHAIRMAN. The gentleman from New York [Mr. LONDON] asks unanimous consent that the time of the gentleman from Virginia be extended two minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. LONDON. May I ask whether an ignorant person who can not read and write will become intelligent if he pays $3 taxes?

Mr. JONES. I will say to the gentleman that if a man is sufficiently thrifty and has the business capacity to accumulate property sufficient to pay a tax of $3, I think he has a sufficient stake in the land to permit him to vote. That is what I think.

Mr. LONDON. It is not a question of intelligence.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. LONDON].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. LONDON. Division, Mr. Chairman.

Mr. COOPER of Wisconsin. May I ask to have the amendment read?

The CHAIRMAN. The amendment will be again read.

The amendment was again reported.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. LONDON].

On a division (requested by Mr. LONDON) there were—ayes 9, noes 59.

So the amendment was rejected.

Mr. KEATING. Mr. Chairman, I desire to offer an amendment to perfect the text.

Mr. MONDELL. Mr. Chairman, I thought I had an amendment pending.

The CHAIRMAN. The gentleman has an amendment to the substitute, and this is to perfect the text. The gentleman will be recognized in time. The Clerk will report the amendment of the gentleman from Colorado [Mr. KEATING].

The Clerk read as follows:

Page 28, line 15, after the word "write," strike out the remainder of the section.

Mr. GARRETT. Mr. Chairman, that has been stricken out.

Mr. KEATING. Mr. Chairman, this amendment if adopted will strike out the property qualification. The amendment of the gentleman from New York [Mr. LONDON] struck out both the educational and the property qualification. My amendment will merely strike out the property qualification.

Mr. MANN. Will the gentleman yield?

Mr. KEATING. Yes.

Mr. MANN. Under the bill, a man who can not read or write, but pays taxes, votes. The gentleman seeks to strike that privilege out. I think the gentleman offers his amendment under a misapprehension.

Mr. KEATING. I am perfecting the original text of the bill.

Mr. MANN. I am referring to the original text of the bill—who is not able to read and write, or who is not a bona fide taxpayer. That is the original bill. The gentleman is seeking to strike that out. I know the gentleman does not desire to do it.

Mr. KEATING. The gentleman is quite right when he says I do not desire to restrict the franchise. I withdraw the amendment.

Mr. MONDELL. Mr. Chairman, I offer an amendment, which is at the Clerk's desk.

The CHAIRMAN. The gentleman from Wyoming offers an amendment to the substitute. Are there any more amendments to perfect the text?

Mr. LONDON. Will it be in order to offer an amendment to section 35 in the following form:

At the end of section 35 add the words "or who is not the head of a family."

The CHAIRMAN. It is in order to offer such an amendment. Does the gentleman offer the amendment?

Mr. LONDON. I do offer that amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

Mr. JONES. Has the amendment of the gentleman from Wyoming [Mr. MONDELL] been reported?

The CHAIRMAN. The gentleman from New York offers an amendment to perfect the text of the section, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LONDON: Page 28, line 16, at the end of the section add the words "who is not the head of a family."

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

Mr. MANN. I would just like to ask the gentleman from New York, for information, if, in view of the amendment just agreed to, whether he would always be able to determine the head of the family or not? [Laughter.]

Mr. LONDON. I think the gentleman from Illinois has put a very embarrassing question, and has put the whole House in an embarrassing position with his amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. LONDON].

Mr. DAVIS of Texas. Mr. Chairman, I do not want to let this whole discussion go without saying something. In the committee the matter that presented itself seriously to me was the question that we were not only regulating a right to vote, while we enlarged the scope of the representation in legislative matters, our proscription as to the vote would necessarily disfranchise a large element of the population that is now voting. I realize that that is a dangerous proposition to a people that you are governing at long distance. And so I offered practically in committee the amendment of the gentleman from New York [Mr. LONDON], defining what qualifications for voting should be; that he could vote when he paid taxes to the amount of $3, or could read and write, either the English or the Spanish language, or was the head of a family, a householder, under the rules and customs of the country. That is practically the qualification for a juror in my State. The State of Texas in qualifying a juror asks him if he can read and write, or if he is a householder, the head of a family; and if he is the head of a family, whether he can read or write or not, he is qualified as a juror. And so I undertook to put that qualification to the voters in this bill, but the Committee on Insular Affairs disagreed with me and unanimously agreed on the measure as it is. I just wanted to make my position clear, so that it would be understood.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York [Mr. LONDON].

The question was taken, and the amendment was rejected.

Mr. JONES. Now, Mr. Chairman, if all the amendments to the text have been disposed of——

The CHAIRMAN. They have been——

Mr. JONES. Inasmuch as the amendment offered by the gentleman from Illinois [Mr. MANN] on the subject of woman suffrage has been added to the text, I would like to withdraw my amendment.

Mr. MANN. It has been added to both.

Mr. JONES. Yes. I suppose the object the gentleman had in view has been subserved by putting it in the text, and I suppose he has accomplished what he wants; and I ask unanimous consent to withdraw the amendment.

Mr. MANN. I probably will not object. The gentleman from Virginia offered an amendment because he thought there ought to be some change, so far as woman suffrage is concerned; it is in both alike.

Mr. JONES. Yes.

Mr. MANN. If there was any reason for offering the substitute before, that reason still exists. Of course if there was no reason for it——

Mr. JONES. There was a reason for it, but I do not think it exists now, inasmuch as the text has been perfected by the gentleman from Illinois.

Mr. MANN. Both the text and the amendment have been perfected. If there was any reason for offering the substitute that reason still exists. I can see but one reason why the gentleman wants to withdraw it. He would not want a roll call in the House to vote against his own amendment. There is no other reason.

Mr. JONES. Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to withdraw his amendment. It can only be withdrawn by unanimous consent. Is there objection?

Mr. MANN. I object.

Mr. MONDELL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wyoming.

The Clerk read as follows:

Amendment offered by Mr. MONDELL to the amendment offered by Mr. JONES: Amend the amendment offered by the gentleman from Virginia [Mr. JONES] by adding at the end thereof the following: "*Provided*, That nothing herein contained shall be held to deprive any person of the right to register and vote who has heretofore legally exercised those rights under the laws of Porto Rico."

Mr. JONES. Mr. Chairman, a point of order. I would like to ask if this amendment is in order. The amendment offered by the gentleman from New York [Mr. LONDON] was not in this language, but it was substantially this amendment, and it was designed to accomplish exactly the same purpose. I had not supposed the gentleman would want to offer this after the House had——

Mr. MANN. Even supposing that to be true, one amendment was an amendment to the text of the bill and the other was to the substitute.

The CHAIRMAN. The Chair thinks this amendment is clearly in order. The gentleman from Wyoming [Mr. MONDELL] is recognized.

Mr. MONDELL. Mr. Chairman, I hope the committee will accept my amendment. I am in favor of the educational qualification which the committee provides for, both in the original text of the bill and in the substitute offered by the gentleman from Virginia [Mr. JONES]. I think that under existing conditions in Porto Rico that is a very excellent provision.

But here is the question we are confronted with: Right or wrong, a number of years ago we granted to the people of Porto Rico universal male suffrage, and under that provision of law those people have been voting for a considerable number of years. Now, granting for the sake of argument that in proposing to turn over to them a complete control of their affairs we are wise in the view that it is necessary somewhat to limit the right of franchise, should we in so doing disfranchise those who have already exercised that right?

I am one of those who hold perhaps an extreme view with regard to these matters of the franchise. I doubt if under a republican form of government in a representative government there resides anywhere authority to take the right of franchise from those to whom it has once been granted, except as a punishment for crime. You may modify conditions of franchise with regard to the new voter. We did that in my State when we adopted our State constitution. We provided the qualifications for the elector of the future, but we made no effort to disfranchise those who had been voting up to that time.

Now, gentlemen will say that it is important that we should modify the qualifications for the franchise in Porto Rico even to an extent and in a way that will disfranchise about 30 to 35 per cent of the people, now that we are giving them virtually self-government. Does the fact that the committee has agreed to such a provision indicate the necessity of it to the extent of disfranchising many voters? Not necessarily. It does indicate a view on the part of the committee that in the running of years that shall come the qualifications they propose should govern, but there has been no evidence before the committee to the effect that those people, even the illiterates, have not reasonably discharged their duty as electors, and my amendment simply provides that, retaining all the qualifications proposed by the committee for the future, we shall still not disfranchise the man who has had the right to vote in the past. I do not believe we have any authority to do it. But whether we have or not it is not necessary to do it. The number of these illiterates or nonproperty-holding electors will decrease very rapidly.

I well remember when we adopted an educational qualification in my State. The number of illiterate voters was very small, to begin with, not over 2½ per cent; but the number of those illiterates who had been voters and had continued to exercise the right under our constitutional provision decreased rapidly, and they became at once a marked set of voters, different from the others, separate and apart, and they hesitated somewhat about offering their ballot under those circumstances.

So that while we had a small per cent of illiterate voters prior to the adoption of that amendment, and those men were still qualified to vote, the number of those illiterates who did vote decreased in the first election, and in a very short time practically none of those illiterate voters attempted to exercise the right of the franchise. But we did save ourselves from the charge that we had attempted to take away from a voter a right which had been at one time granted, and we passed to the new order of things without resentment on the part of anyone, for we took no right from anyone, we made the change without criticism of the new provision because it wronged no one. We did justice, and we secured the conditions that we desired. Let us do the same in Porto Rico. In providing new qualifications for voters let us refrain from doing injustice and wrong to a large body of those now exercising the right of franchise.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. COOPER of Wisconsin. Mr. Chairman, I move to strike out the last word. I should like to ask the gentleman from Virginia if there is any provision in this bill concerning elections, how they are to be regulated, and so forth?

Mr. JONES. Matters of registration and everything pertaining to the conduct of elections are left to the Legislature of Porto Rico.

Mr. COOPER of Wisconsin. In my judgment, we ought to provide in this law that elections in Porto Rico shall be by ballot. Experience has taught me, and what I have read has confirmed the teachings of experience, that we ought to put a stop to voting by voting machines. I think the gentleman from Illinois [Mr. MADDEN] can tell what they have learned about such voting in the city of Chicago, after awarding a million dollar contract for machines.

Mr. MADDEN. Does this bill provide for voting by machines?

Mr. COOPER of Wisconsin. No; but it would permit that method of voting.

Mr. MADDEN. It ought to prohibit it.

Mr. MONDELL. The amendment has no relation to the matter of voting by machines.

Mr. MADDEN. If the gentleman will allow me, I will say that the election commissioners of the city of Chicago contracted for a million dollars worth of voting machines, and they put them into operation in some of the wards in the city, and upon investigation it was proved beyond any doubt that if anyone wished to reverse the will of a voter and to cause his vote to be recorded against the man whom he supposed he was voting for all it was necessary to do was to have some one put a thin slip of paper behind one of the keys, and when the voter pressed the key to vote for the candidate for whom he intended to vote his vote would be registered against that candidate, and so do exactly the reverse of the thing that the voter wanted to do and that he was expecting to do. The result was that upon the investigation of the question by the legislature of our State the board of election commissioners of Chicago were compelled to throw this $1,000,000 worth of voting machines into the junk heap so that the people of our city might have a right to vote according to the way they believed they were voting.

Mr. COOPER of Wisconsin. In line with what the gentleman from Illinois [Mr. MADDEN] has said, a former Member of this House told me that his own defeat was due to the fact that there was what he denominated crooked work in the manipulation of voting machines at the election. He was beaten by a very small majority, only one vote, I think. He said there was no question whatever that in certain wards the machines were fixed to defeat him, possibly in the manner just indicated by the gentleman from Illinois [Mr. MADDEN].

And, Mr. Chairman, in this connection there is this other thing to which I wish to call attention. You have voted and I have voted by pulling the lever of a machine, and yet neither you nor I could make an affidavit as to whom we voted for nor as to whether we had voted at all.

Mr. MADDEN. You could not see.

Mr. COOPER of Wisconsin. When you mark a ballot with a pencil, hand your ballot to an election official, and see him deposit it in the box you know for whom you have voted. But when you vote by pulling the lever of a machine you see no record made nor can you tell for whom you have voted, nor, as I have said, whether you have voted at all. You trust it all to a machine made by some other man, a machine which has been

in the possession of other people all of the time and about the workings of which you know nothing. As has just been narrated by the gentleman from Illinois [Mr. MADDEN], the city of Chicago canceled a contract for $1,000,000 worth of voting machines because, after a thorough test, it was found that by inserting pieces of paper in the machines they could be used absolutely to defeat the will of the voters.

This is not a trifling matter. On the contrary, it is of very great importance. We should not permit the Legislature of Porto Rico to enact a law that would allow the use of voting machines in the island.

Mr. TEMPLE. Why would it not be as easy to protect the machines against improper manipulation as it would be to protect the count of the ballots? It is not the machine that ought to be thrown away, but the man who manipulated it so as to produce a false result ought to be locked up.

Mr. COOPER of Wisconsin. I do not know how the gentleman from Pennsylvania feels about it, but when I mark a ballot and hand it to the election official, and see him put it into the box I know that, so far as I am concerned, I have voted for the candidate of my choice; but when I pull the lever of a machine, I see no record made and do not know for whom I have voted. I could not make an affidavit that I had actually voted for any person.

Mr. KING. Will the gentleman permit a suggestion?

Mr. COOPER of Wisconsin. Yes.

Mr. KING. I want to state for the information of gentlemen that I happened to be a member of the committee of the Illinois Legislature that investigated that subject. It was proven there beyond question that those machines could be manipulated, that they could be arranged so that at least 10 votes could be added for a particular candidate before the voters started to vote in the morning, and in that way favor the candidates whom those manipulating the machines desired to see elected.

Mr. MADDEN. Not only that, but they could manipulate the machines so as to defeat the will of the voter and make his vote be registered for the opponent of the man whom he desired to support.

Mr. KING. Yes.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MONDELL. Will the gentleman yield?

Mr. COOPER of Wisconsin. Yes.

Mr. MONDELL. I am not going to object to the gentleman from Wisconsin discussing something that is not before the House, but I have an amendment pending, and I am afraid Members will conclude that my amendment has something to do with voting machines. It has not; it has something to do with disfranchisement. I do not want my amendment to get mixed up with the voting machines, and I would like to have the gentleman from Wisconsin say something in favor of my amendment.

Mr. COOPER of Wisconsin. I had intended to reach that later in the discussion. [Laughter.] Mr. Chairman, the statements of the two gentlemen from Illinois, Mr. KING and Mr. MADDEN, are of extreme importance. I repeat that it is most important to the people of Porto Rico that these crooked machines shall not be installed for voting purposes in that island. We can make a sufficient educational test if we require that the vote shall be by the Australian ballot and prohibit the giving of assistance to voters in marking their ballots. That would constitute an excellent educational test.

Mr. MONDELL. If you adopt the educational test you would not disfranchise those who have already been voting?

Mr. COOPER of Wisconsin. Oh, no. The people there are civilized, so civilized, I will say to the gentleman from Wyoming, that in the island of Porto Rico years ago, when they bought and sold slaves, they voluntarily taxed themselves, raised money to the aggregate of $16,000,000, paid for all of the slaves, and made them free. That is better, far better, than we did in the United States, for we killed hundreds of thousands of our own people before we could free the slaves.

In Porto Rico the population is homogeneous; the island is in size only about 90 miles by 40 miles; it is close to our shores, and when the Panama Canal is opened is going to be made a very busy spot by the shipping of the world, which will stop there on its way to and from that great waterway. The people of Porto Rico are abundantly able to elect their legislature in both branches, but I am in favor of prohibiting them from voting by machinery and of requiring them to use the Australian ballot.

Mr. HOWARD. Will the gentleman yield?

Mr. COOPER of Wisconsin. Yes.

Mr. HOWARD. I have enjoyed the gentleman's dissertation on inanimate machines. The gentleman does not have any reference to the human machine which is built up all over the country?

Mr. COOPER of Wisconsin. No; you do not work the human machine with a lever; you do that with the pocketbook. [Laughter.]

Mr. MONDELL. Mr. Chairman, I ask unanimous consent that my amendment may be again reported.

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

The Clerk again reported the amendment as follows:

Amend the amendment of the gentleman from Virginia [Mr. JONES] by adding at the end the following: "*Provided*, That nothing herein contained shall be held to deprive any person of the right to register his vote who has heretofore legally exercised this right under the laws of Porto Rico."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wyoming [Mr. MONDELL].

The question was taken; and on a division (demanded by Mr. MONDELL) there were 27 ayes and 51 noes.

So the amendment was lost.

Mr. HUDDLESTON. Mr. Chairman, I move to strike out the last word.

Mr. JONES. Mr. Chairman, I ask that all debate on this amendment and amendments to the amendment close in five minutes.

Mr. HUDDLESTON. I will say that it is my intention to offer an amendment later, so that I shall feel obliged to object to the request.

Mr. JONES. The gentleman will be recognized. How much time does the gentleman want?

Mr. HUDDLESTON. I want five minutes now and five minutes on my amendment when I offer it. I suggest to the gentleman that we let the amendment be offered at the proper time and then make an agreement.

The CHAIRMAN. Has the gentleman from Alabama an amendment to offer?

Mr. HUDDLESTON. I now move to strike out the last word, and I will offer an amendment later.

The CHAIRMAN. The gentleman will proceed.

Mr. HUDDLESTON. Mr. Chairman, it seems to me the fundamental mistake we are making this afternoon is in undertaking to dictate to the people of Porto Rico who shall vote and who shall not vote in those islands. Many of us have never been in Porto Rico, many of us have never seen a Porto Rican except the distinguished Porto Rican Commissioner who is here this afternoon, and practically none of us have any knowledge of the conditions that exist in that island. How, then, can we assume the knowledge that will enable us to say for that people who shall and who shall not vote? I assert that the whole proceeding is undemocratic and, even more, it is un-American.

It is fundamental in this country that just governments derive their powers from the consent of the governed. It is just as fundamental that you have no right to interfere with the right of the people to local self-government unless it is absolutely necessary for the good of the whole people of the Nation.

Now I ask, Is it necessary for the good of the whole of the people of the United States that we shall dictate to the people of Porto Rico as to which of them may vote? I assert that there is nothing of the kind, no such condition as this. In your State, Mr. Chairman, in the State of every gentleman here, the people would resent bitterly any attempt on the part of the Congress to prescribe the qualification of voters. In my section of the country the right of the people of the separate States to fix such qualifications is regarded as sacred, as the ark of our liberties; and any man who would lay his hand on the right of Alabama to govern itself, anybody who would assume to dictate to Alabama what part of her citizenship should vote and what part should not vote would, if we had our will, meet the fate of the man of old when he laid his hand upon the ark of the covenant. I am willing to concede to the people of Porto Rico the same rights that I claim for my own people. I am even willing to insist that they shall have exactly the same measure of political freedom, the same right of self-government that the people of Alabama have, and I say that to the people of Porto Rico should be left the question as to who shall enjoy the right of franchise. I insist that we ought to give to the people of Porto Rico who now have the right to vote the right in some fair and proper way to meet together and fix the qualifications of voters. Unless we do so, we will betray the fundamental principles of Americanism; we will betray the real democracy.

Mr. MONTAGUE. Will the gentleman yield for a question?

Mr. HUDDLESTON. I will.

Mr. MONTAGUE. I desire to ask the gentleman if we have not uniformly fixed the right of suffrage in the Territories of America?

Mr. HUDDLESTON. I am not able to say; but I am able to tell the gentleman that never have we undertaken to say to the

people of any Territory of the United States that they should not have in future, when they become a State, the right to fix the qualifications of voters.

Mr. MONTAGUE. Will the gentleman permit me another question?

Mr. HUDDLESTON. In just a moment.

Mr. MONTAGUE. I think the gentleman misapprehended my question.

Mr. HUDDLESTON. I do not think I did. We do not contemplate that Porto Rico shall become a State of this Union. There is not a gentleman here who has any such idea in his mind. The organization of a Territory is a temporary thing. It is intended merely to give the people a form of government until the time shall come when they shall have the population to organize as a State and to legislate for themselves. Nothing of the kind is contemplated here. We are passing an organic act, we are fixing a permanent form of government for the people of those islands, and I insist that they shall be allowed, that they themselves shall be allowed, to say who shall take part in that government.

Mr. LLOYD. Is it not true we have provided the form of government in Alaska, that we have provided a different one in Hawaii, and have not we provided a different one still in the Philippine Islands, and is it not true that in Porto Rico there is a different condition existing than in any of these other places?

Mr. HUDDLESTON. I think so.

Mr. LLOYD. And this Government——

Mr. HUDDLESTON. But I think entirely different conditions obtain in Porto Rico than those which obtain in the Philippines. The people of Porto Rico are of our race, they are people who inherit an old civilization—a civilization which may be fairly compared to our own.

Mr. LLOYD. In every Territory of the United States, the United States Government has fixed the qualifications of voters.

Mr. HUDDLESTON. Mr. Chairman, the gentleman by his question evades the proposition I lay down.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HUDDLESTON. Mr. Chairman, I withdraw the pro forma amendment.

The CHAIRMAN. The question is upon the amendment offered by the gentleman from Wyoming in the way of a substitute to section 35.

Mr. HUDDLESTON. Mr. Chairman, I ask that the amendment be again reported.

The amendment was again reported.

Mr. MANN. Mr. Chairman, I move to strike out the last word. In view of the statement of the gentleman from Alabama that the State of Alabama would not permit the gentleman's government in any way even to influence the right of the State of Alabama to determine who shall vote in that State, I suggest that he would read the fifteenth amendment to the Constitution of the United States:

The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous conditions of servitude.

I am inclined to think they do not know there is such a provision in the Constitution.

Mr. HUDDLESTON. Does the gentleman mean to say that provision of the Constitution of the United States is acceptable to the people of Alabama?

Mr. MANN. I mean to say that the United States have imposed that provision on the State of Alabama; and does the gentleman mean to say that the State of Alabama and its citizens refuse to obey the Constitution of the United States in its entirety?

Mr. HUDDLESTON. I say that we obey that provision with extreme reluctance. I say, furthermore, that never in the history of this country, with the consent of the people of Alabama, will any amendment to the National Constitution similar to that read by the gentleman be adopted.

Mr. MANN. With the consent of Alabama. This bill may not be adopted with the consent of Alabama. Well, the Government will run.

Mr. JONES. Has all debate on this been exhausted?

The CHAIRMAN. The debate has been exhausted.

Mr. COOPER of Wisconsin. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The question is on the substitute of the gentleman from Virginia.

Mr. COOPER of Wisconsin. I do not understand——

The CHAIRMAN. The parliamentary situation is this——

Mr. COOPER of Wisconsin. I desire to perfect the text in the original——

The CHAIRMAN. By unanimous consent amendments were offered to the text and exhausted, and then the question of a substitute was under consideration, and one amendment has been offered to that. Now, the question under consideration is the substitute as offered by the gentleman from Virginia, as amended.

Mr. COOPER of Wisconsin. Then I offer it as an amendment at the end of the substitute proposed by the gentleman from Virginia.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

At the end of the substitute insert the following: "All elections under the provisions of this act and of laws enacted in pursuance thereof shall be by ballot."

Mr. COOPER of Wisconsin. Mr. Chairman, I think there can be no objection to that amendment.

Mr. JONES. Mr. Chairman, if I had my way about it I would much prefer having it written in the organic law that all voting should be by a viva voce vote. I should much prefer that to the ballot, but I think that is a matter that ought to be left to the people of Porto Rico.

We have not undertaken in this bill to go into matters of detail as to registration, as to whether they shall have the ballot, or whether, if they have it, it shall be provided by the state or the candidates, and all that sort of thing. We think the Porto Ricans, as the gentleman does, have sufficient intelligence to decide for themselves whether the voting shall be viva voce or whether it shall be by ballot, or how it is to be done. I have no doubt in my own mind but that it will be done by ballot. I prefer, however, the viva voce system of voting.

Mr. COOPER of Wisconsin. I am surprised to hear the gentleman from Virginia suggest the possibility of viva voce voting. A man that runs a great plantation in Porto Rico could vote every one of the employees on that plantation. All he would have to do would be to stand around and indicate to them how he desired them to vote and they would vote that way, not vote at all, or not work on his plantation.

Mr. JONES. May I ask the gentleman a question?

Mr. COOPER of Wisconsin. Yes.

Mr. JONES. I will ask the gentleman if he does not remember a contested-election case before this House some years ago—he was here at the time—when the evidence showed that the representatives of certain great packing houses stood near the ballot boxes and handed ballots out to the voters, to the number of several hundred in one single precinct? The voters were unable to read the English language, and they accepted their ballots from the agents of their employers.

Mr. COOPER of Wisconsin. Yes, Mr. Chairman. I do not remember that particular instance, but I know of such cases having happened many years ago; but, fortunately, throughout the whole North they are impossible now. The secret-ballot system has done away with that. If I may, in this connection, be permitted to do so, in reply to the gentleman from Virginia, I will narrate a little personal experience.

On an election day in the afternoon I was seated in my office drawing a complaint when in came a man and his wife. I had been his attorney in a suit that he had thought of some importance. He said, "Hal, I am sorry I can not vote for you." I replied, "That is all right whether you can or not. Vote as you please." "Oh, no," he said, "I want to vote for you, but I can not get near the polls without showing my ballot. Three or four heelers are there, and everybody who comes up has to show his ballot." I went with him to his precinct. There was a long line of voters waiting for an opportunity to vote, with heelers at intervals on each side. One of the largest of these stood there, and as the men came up shouted, "Make them show their ballots. Make them show their ballots." Other heelers would make them show their ballots. Many of the voters dropped out one by one. It happened that I was elected to the State senate that year, and as soon as possible I went to work to devise an election law to stop that sort of thing. So I drafted and introduced the bill which became a law and first established the secret-ballot system in Wisconsin, and since then we have never had that sort of abuse at elections. What the gentleman from Virginia [Mr. JONES] said was true everywhere before we had the secret-ballot system, but it is true no more. If you revive the viva voce system you restore those abuses and a thousand others still more aggravated. You will have intimidation. You will have the man with a mortgage on another's place watching the mortgagor as he votes. An employer who happens to be tyrannical in his disposition—not all employers are that way—will see to it when his employees vote viva voce that they vote as he wants them to vote or that they shall not work for him. Secret voting must be maintained

in the United States of America if this Republic is to endure. Let the men who would corruptly use money buy or try to buy voters. The voters will have the secret ballot and the would-be buyer can not see the vote delivered. Therein we are safe. But the minute you do away with ballots and have a lot of poor men stand up and say "I vote this way," and another man has it in his power to say "You vote the other way or you get your pay check and quit to-morrow," you restore the system that never ought to have been even suggested by the gentleman from Virginia. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin to the substitute offered by the gentleman from Virginia [Mr. JONES].

The question was taken, and the chairman announced that the "noes" seemed to have it.

Mr. COOPER of Wisconsin. A division, Mr. Chairman.

The committee divided, and there were—ayes 27, noes 42.

So the amendment was rejected.

The CHAIRMAN. The question is on the substitute offered by the gentleman from Virginia [Mr. JONES].

Mr. HUDDLESTON. Mr. Chairman, I would like to have that reported.

The CHAIRMAN. The Clerk will report the substitute.

The substitute was again read.

Mr. COOPER of Wisconsin. A parliamentary inquiry. If it requires another amendment to strike out section 35, it will be in order after the substitute is acted on?

The CHAIRMAN. The committee closed the consideration of section 35 to perfect it, and then the question came up on the substitute.

Mr. COOPER of Wisconsin. I desire to offer an amendment now.

The CHAIRMAN. To the substitute?

Mr. COOPER of Wisconsin. To the section.

The CHAIRMAN. It is not in order to offer an amendment to the section.

Mr. HUDDLESTON. Mr. Chairman, I desire to offer an amendment to the substitute.

The CHAIRMAN. The gentleman will send it to the Clerk's desk.

The Clerk read as follows:

Page 28, line 12, after the word "enact," strike out all of the remainder of section 35.

Mr. HUDDLESTON. I have not the substitute before me, Mr. Chairman. I want to strike out the portion that describes the qualifications of voters.

The CHAIRMAN. There is apparently no place in the substitute where this amendment would apply.

Mr. HUDDLESTON. The portion of the substitute prescribing the qualifications of voters is the one I wish to strike out.

Mr. DAVENPORT. Evidently it is desired to strike out all after the word "enacted" on line 12.

The CHAIRMAN. The Chair will state that the gentleman's amendment, so far as the Chair is able to understand it, can not be inserted in the substitute at an appropriate place.

Mr. HUDDLESTON. I have not the substitute before me.

Mr. MANN. Oh, we shall never finish the bill at this rate. I ask for the regular order, Mr. Chairman.

The CHAIRMAN. The regular order is the amendment offered by the gentleman from Alabama [Mr. HUDDLESTON], which the Clerk will report.

The Clerk read as follows:

Amend the substitute by striking out all after the words "per annum."

Mr. JONES. Mr. Chairman, will the Clerk report the words to be stricken out?

The CHAIRMAN. The Clerk will report the words to be stricken out.

The Clerk read as follows:

No person shall be allowed to vote at any election whatsoever who shall not be registered as a qualified elector, and no person shall be registered as a qualified elector unless he shall have the qualifications herein specified, and shall further comply with such regulations as may be hereafter enacted by the Legislature of Porto Rico.

Mr. CANNON. Mr. Chairman, is that an amendment or an amendment to the substitute?

The CHAIRMAN. An amendment to the substitute.

Mr. CANNON. So that it would read, if it were adpoted, how?

Mr. HUDDLESTON. Mr. Chairman, is this taken out of my time?

Mr. CANNON. Oh, not at all.

The CHAIRMAN. The Clerk will report it as it would read if it were adopted.

The Clerk read as follows:

SEC. 35. That the qualified electors of Porto Rico shall consist of all citizens without regard to sex, of the United States, 21 years of age or over (except insane or feeble-minded persons and those convicted in a court of competent jurisdiction of an infamous offense since the 13th of August, 1898), who are able to read and write either the Spanish or English language, or who shall be bona fide taxpayers in their own name in an amount not less than $3 per annum.

Mr. CANNON. That is the way it would read if the amendment were adopted?

Mr. HUDDLESTON. My amendment was not inserted in the proper place, Mr. Chairman. It is the part relating to qualifications, being able to read and write or being taxpayers. I made a mistake in writing my amendment. I ask unanimous consent to correct my amendment.

The CHAIRMAN. The gentleman from Alabama [Mr. HUDDLESTON] asks unanimous consent to correct his amendment. Is there objection?

There was no objection.

Mr. JONES. Regular order, Mr. Chairman.

Mr. MANN. Reserving the right to object, Mr. Chairman, how soon will we get it closed up?

The CHAIRMAN. The Chair can not answer that question.

Mr. CANNON. Now, Mr. Chairman, let the Clerk read the substitute as it would read if the amendment of the gentleman from Alabama were adopted.

The CHAIRMAN. The Clerk will report the substitute as it would read if the amendment of the gentleman from Alabama were adopted.

The Clerk read as follows:

SEC. 35. That the qualified electors of Porto Rico shall consist of all citizens, without regard to sex, of the United States, 21 years of age or over (except insane or feeble-minded persons and those convicted in a court of competent jurisdiction of an infamous offense since the 13th of August, 1898).

Mr. HUDDLESTON. Mr. Chairman, I have endeavored in making this amendment, which, I fear, is a little crude, to leave it to the people of Porto Rico to say who shall vote. That is the purpose of my amendment, and I trust that purpose is effected by it.

The argument implied by the questions which were asked me a few minutes ago, that we should afford to the people of Porto Rico the same treatment with reference to fixing the qualifications of voters that we give to those citizens of the United States living in the Territories which we organize, is not a fair argument. It is necessary in organizing a Territory of the United States to start out with some plan or form of government. In order to do that we have to make some provision as to who shall vote. We have to have something to start out on. Prior to their organization there is no provision of law as to who shall vote in the Territories. There is nobody qualified to vote. There is an absence of law on the subject. This is true of the Territories, of Hawaii, and also of the Philippines. It is not true of Porto Rico. In Porto Rico we have now laws which provide who shall vote. There are persons in Porto Rico who now exercise the franchise.

Mr. JONES. Does the gentleman mean to say that we have not got a law in the Philippines as to who shall vote?

Mr. HUDDLESTON. We did not have until Congress passed one, and therefore it was proper to put into that law some provision as to voting.

Mr. JONES. We did not have it in Porto Rico until we put it there.

Mr. HUDDLESTON. How can the gentleman justify himself in putting in the organic act that is to outline the government of Porto Rico a provision that would cut off the right of a large part of the people of Porto Rico to vote? Is the gentleman putting that provision in for the benefit of the Porto Ricans themselves? Does the gentleman know more about what the people of Porto Rico want than they know? Is he better qualified to pass upon the qualifications of voters and the qualities that fit the people of Porto Rico for self-government than the Porto Ricans themselves? If the gentleman does not claim for himself that knowledge of Porto Rico, he has no right to undertake to dictate to them on the subject.

Mr. JONES. Mr. Chairman, will the gentleman yield?

Mr. HUDDLESTON. Yes.

Mr. JONES. I understand the gentleman from Alabama bases his remarks upon the theory that the people of Porto Rico ought to be permitted to fix their own qualifications for voting.

Mr. HUDDLESTON. I base my argument on the theory that this is the United States of America, and supposed to be a free country, and that the people have the right to rule it. Our ancestors said in effect that no just government can exist against the will of the people. If the gentleman knows of a higher political principle, I will be glad to have him state it.

Mr. JONES. I am not questioning the gentleman's position at all, but——

Mr. HUDDLESTON. The gentleman is in effect repealing the Constitution of the United States when he attempts to put in this provision of law.

Mr. JONES. I started out simply by saying what I thought was the gentleman's position, but I wanted to ask this question: Will this amendment that the gentleman has offered accomplish what he states he wanted to do?

Mr. HUDDLESTON. I hope it will. If not, then I hope the gentleman will put the measure in such shape that it will.

Mr. JONES. That is the reason why I wanted to call the gentleman's attention to it.

Mr. HUDDLESTON. I think it will.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama [Mr. HUDDLESTON].

The amendment was rejected.

The CHAIRMAN. The question is on the substitute of the gentleman from Virginia [Mr. JONES] as amended.

Mr. CULLOP. Mr. Chairman, may that amendment be reported again?

The CHAIRMAN. The gentleman from Indiana asks unanimous consent that the amendment be again reported. Is there objection?

A MEMBER. Regular order!

The CHAIRMAN. The regular order is demanded, which is equivalent to an objection. The question is on the amendment offered by the gentleman from Virginia [Mr. JONES] as amended.

The question was taken; and on a division (demanded by Mr. JONES) there were—ayes 38, noes 49.

Accordingly the substitute was rejected.

The Clerk read as follows:

SEC. 37. That the legislative authority herein provided shall extend to all matters of a legislative character not locally inapplicable, including power to create, consolidate, and reorganize the municipalities so far as may be necessary, and to provide and repeal laws and ordinances therefor; also the power to alter, amend, modify, and repeal any and all laws and ordinances of every character now in force in Porto Rico or any municipality or district thereof not inconsistent with the provisions of this act.

No executive department not provided for in this act shall be created by the legislature.

Mr. PARKER of New Jersey. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from New Jersey offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. PARKER of New Jersey: Page 30, line 2, in section 37, after the word "act," strike out the period and insert in lieu thereof the following: " ; also the power to impose, levy, and collect duties upon merchandise going to the United States from Porto Rico and coming into Porto Rico from the United States, which duties shall not exceed 25 per cent of the duties which are required to be levied upon like articles of merchandise imported from foreign countries."

Mr. PARKER of New Jersey. Mr. Chairman, I have spoken twice on this subject and would like to say only a word more on one or two matters that have not been touched upon.

My amendment proposes to reenact the law that prevailed when we first took Porto Rico. We did not then leave it to the Porto Rico Legislature to say how much of the 25 per cent should be collected, but we ordered 25 per cent of the United States duties collected on goods from Porto Rico, which when collected were remitted to them, and 25 per cent of the like duties were collected on articles sent from the United States to their shores, and that amount was given to them, and the United States kept their government provided with sufficient revenue instead of taxing the people out of existence.

Afterwards Congress abolished that, and the present arrangement is a sham. The law says that they shall have United States duties on goods that go into Porto Rico from foreign countries; but the steamship lines run to New York, and the duties are paid there and go into the United States Treasury, and then those same goods are sent to Porto Rico, but the people of Porto Rico get no benefit from the foreign tariff unless the ship goes from the foreign country to Porto Rico. The only way to see that they will get any benefit is to make it more profitable to send the goods to Porto Rico direct from the foreign country than to send them via New York.

Outside of that the United States, with its great manufacturing power, is supplying everything those poor people want, and so they get little or no revenue from the tariff. Our factories are driving their shoemakers out of existence with American shoes. They are driving the carpenters who made their furniture out of their trade. They are driving their blacksmiths who made their locks and their hinges out of their trade. They have done that to our small trades here, but our people can go into a mill and get along. There they have no mills, and they are left in the same condition as India and Ireland were left.

Do we realize that the free-trade policy of Great Britain sent calicoes into India which drove their cotton manufactures almost out of existence. Sheffield sent tools there which drove Indian-made tools—the best handmade tools in the world—out of existence. English machine-made carpets and shawls made the woolen productions of India something to be had only by the very rich who could pay for their art designs. Do we realize that between the great home country and the little colony, with a different language, and different traditions, which has not the freedom to go to the home country and get the benefit of its business, this is destruction to the small country, such as has changed India from one of the richest countries in the world to one of the poorest (although it has been given good government), because its people have to pay taxes upon their trades and upon their lands, as we are forcing Porto Rico and the Philippines to do? England has learned better as to her recent colonies. They demanded the right of self-government. The United States should profit by that example and see that that right of self-government, which involves the power of the purse, shall be given under proper restrictions and preferences not to the United States but to these poor people. [Applause.]

Mr. MANN. Mr. Chairman, those who have been in the House a long time remember the trouble in reference to the tariff laws in Porto Rico when we passed the law providing for a tariff on goods entering Porto Rico from the United States and on goods coming from Porto Rico to the United States. Then we changed that law and provided for the free entrance of goods between Porto Rico and the United States.

I am unable to agree with the distinguished gentleman from New Jersey [Mr. PARKER], in the belief that it will be wise to have goods going from the United States into Porto Rico pay a tariff there and have the goods coming from Porto Rico into the United States pay a tariff here. We are probably destined to possess Porto Rico as a part of us forever, as we use the term "forever." Since the construction of the Panama Canal it is quite essential that the United States shall have command of the Caribbean Sea. I think we should bring ourselves as closely as possible in touch with Porto Rico and the Porto Ricans. I have no doubt that the privileges and rights which we accord to them now will in the future be increased, and I am not in favor of building up any kind of wall over which commerce must jump between Porto Rico and the United States. The closer we are in touch with them the better. I do not think we ought to provide any tariff wall now.

Mr. GARRETT. Mr. Chairman, that is what the amendment proposed by the gentleman from New Jersey would do, or, at least, it would give the possibility to the Legislature of Porto Rico to do it.

Mr. MANN. That is the reason I am opposing it.

Mr. JONES. Will the gentleman permit a suggestion?

Mr. MANN. Certainly.

Mr. JONES. The laws of the United States now provide for free trade between Porto Rico and the United States.

Mr. MANN. I am well aware of that fact.

Mr. JONES. And this bill provides that the laws of the United States that are not locally inapplicable shall be applicable in Porto Rico, so that we provide in it that the United States shall legislate on the tariff question, and the proposition of the gentleman from New Jersey [Mr. PARKER] is to take it away from the Congress and to confer it upon the Legislature of Porto Rico.

Mr. MANN. The distinguished gentlemen from Virginia and Tennessee do not accord me any sense or knowledge at all. Having discussed for some time the question, both gentlemen now tell me that we have free trade with the island and that the gentleman from New Jersey proposes a method by which it shall be changed. That is the reason I am on the floor. I did not require to be told that. Of course that is the case. I am opposed to giving any opportunity to building up any tariff wall between Porto Rico and the United States.

Mr. AUSTIN. Mr. Chairman, I want to call attention to a statement made by Gen. McIntyre when we had him before the committee in the preparation and consideration of this bill. I asked him what the trade was between the United States and Porto Rico under the Spanish Government, and he said practically nothing, but that last year it amounted to $30,000,000. We have built up and increased our trade in Porto Rico on account of the tariff laws. It was a tariff which gave us an advantage over our competitors. We have as a result built up our annual trade with Porto Rico from nothing to $30,000,000.

Mr. PARKER of New Jersey. Will the gentleman permit a question?

Mr. AUSTIN. Yes.

Mr. PARKER of New Jersey. The gentleman recognizes that I leave 75 per cent still of preference?

Mr. AUSTIN. That is true, but we want absolute free trade between our country and its colonial possessions, as we have between the different States. We sold $7,500,000 to the Philippines, Porto Rico, and the Hawaiian Islands under foreign flags, and last year under our flag we sold $85,000,000, because of our tariff laws, which gave us an opportunity to go in without paying custom duties. Our competitors were compelled to pay custom duties. It gave us a preference, and that preference resulted in an increased trade of from $7,500,000 to $85,000,000 annually. So we ought to be exceedingly careful about placing a duty on the importation of goods into Porto Rico or our insular possessions, because it may rob us of the absolute and necessary preference we ought to have covering the difference in the cost of production here and abroad.

Mr. FOCHT. How much were the imports to Porto Rico and what benefit was it to us?

Mr. FESS. The combined exports and imports was $83,000,000.

Mr. AUSTIN. The gentleman from Ohio says the combined exports and imports were $83,000,000. The imports into Porto Rico from the United States last year were $30,929,831, and the exports to the United States were $42,311,920. Porto Rico will never be anything but an agricultural country. It has no mineral resources, no manufacturing industries, and for the most depends upon its tropical fruits, coffee, sugar, pineapples, and, as the Democratic governor of the island said in the hearing before the committee, free trade in sugar would ruin that country, whereas the protective tariff would help it—make it prosperous.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

SEC. 38. That all grants of franchises, rights, and privileges of a public or quasi public nature shall be made by a public-service commission, consisting of the heads of executive departments, the auditor, and two commissioners to be elected by the qualified voters at the first general election to be held under this act and quadrennially thereafter. The terms of said elective commissioners shall commence on the 1st of January following their election, and they shall serve for four years and until their successors are elected and qualified. Their compensation shall be $8 for each day's attendance on the sessions of the commission, but in no case shall they receive more than $400 during any one year. The said commission is also empowered and directed to discharge all the executive functions relating to public-service corporations heretofore conferred by law upon the executive council. Franchises, rights, and privileges granted by the said commission shall not be effective until approved by the governor, and shall be reported to Congress, which hereby reserves the power to annul or modify the same.

Mr. JONES. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

Add to section 38 the following clause:

"The interstate-commerce act and the several amendments made or to be made thereto, the safety-appliance act and the several amendments made or to be made thereto, and the act of Congress entitled 'An act to amend an act entitled "An act to regulate commerce, approved February 4, 1887," and all acts amendatory thereof by providing for valuation of the several classes of property of carriers subject thereto and securing information concerning their stocks, bonds, and other securities, approved March 1, 1913, shall not apply to Porto Rico. The Legislative Assembly of Porto Rico is hereby authorized to enact laws relating to the regulation of the rates, tariff, and services of public carriers by rail in Porto Rico; the public-service commission hereby created shall have power to enforce that law under proper regulation."

Mr. MANN. Mr. Chairman, I would like to ask the gentleman from Virginia about a matter in the preceding section where I think there ought to be a change of phraseology, although I have no change to suggest. The last clause at the bottom of page 29 reads:

SEC. 37. That the legislative authority herein provided shall extend to all matters of a legislative character not locally inapplicable, including power to create, consolidate, and reorganize the municipalities so far as may be necessary, and to provide and repeal laws and ordinances therefor; also the power to alter, amend, modify, and repeal any and all laws and ordinances of every character now in force in Porto Rico or any municipality or district thereof not inconsistent with the provisions of this act.

Whoever drew that, I think, had in mind that if there was an alteration or modification of the law that the new law should not be inconsistent with this act, but that is not what it says. It says they shall have power to alter, amend, modify, and repeal any existing law not inconsistent with this act. Or, leaving out the two negatives, they have the power to alter or amend any law which is now consistent with this act. That, plainly, was not the intention.

Mr. JONES. The purpose of it was to confer on the legislature authority to alter, amend, modify, or repeal any or all laws, ordnances, and so forth, not inconsistent with the provisions of this act.

Mr. MANN. To amend any law not inconsistent with this act.

Mr. JONES. They could not enact any legislation that was inconsistent with this act.

Mr. MANN. That is different. I take it that what was intended was that they could not enact new legislation in repealing or modifying a law inconsistent with this act.

Mr. JONES. That is the purpose.

Mr. MANN. That is not what it says. The word "inconsistent" that this act refers to is existing law. I simply call the attention of the gentleman from Virginia to it for his consideration. I am not offering any amendment.

Mr. JONES. What amendment would the gentleman suggest to carry out his idea?

Mr. MANN. I have no amendment to offer.

Mr. JONES. I will ask permission to return to this section later on.

Mr. MANN. I am not asking for that, although I am perfectly willing. I called it to the attention of the gentleman, for I wanted to be sure that my point was right. The gentleman will have a chance to have it corrected.

Mr. JONES. Mr. Chairman, I ask to return to the section if, on examination, it would seem that it needs correction.

Mr. LONGWORTH. Will the gentleman yield?

Mr. JONES. I will.

Mr. LONGWORTH. Does not the gentleman think that the salary of $400 a year is pretty small for men who occupy such an important position as commissioners with power to grant franchises, and so forth?

Mr. JONES. We thought not. There were a number of the members of the committee who thought that was too much, and we spent a good deal of time over this question of salaries, conferred with the Commissioner, who is a member of the committee, and concluded that would be proper.

Mr. LONGWORTH. Does the Resident Commissioner think that salary is sufficient?

Mr. JONES. Yes; we all substantially agreed as to the proposition.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia.

Mr. STAFFORD. Mr. Chairman, as to the amendment, I move to strike out the last word. I would like to inquire of the gentleman from Virginia why the gentleman restricted the power of the public service commission to merely rail lines and did not extend it to water lines that cover the local interisland services of Porto Rico?

Mr. JONES. I will say to the gentleman and to the committee that under recent decisions of the Supreme Court of the United States in cases appealed from Porto Rico it has been held that there are in force in that island the acts of Congress known as the safety-appliance acts and the Federal employer's liability act. The effect of these decisions is to apply to Porto Rico all of the Federal legislation affecting the regulation of rates and service by common carriers by rail.

This carries with it the jurisdiction of the Interstate Commerce Commission of the United States, in so far as it is vested with power to control such matters.

By reason of the peculiar conditions existing in Porto Rico and the modest character of the railroads in operation there it has been found that the application of the Federal laws above referred to presents a matter of the gravest difficulty. The bulk of the traffic by railroads in Porto Rico consists of sugar cane transported from the fields to central sugar factories. This traffic exists but five or six months in the year and requires a special character of car and service. The only railroad in the island worthy of the name is a narrow-gauge road, whose principal business is that of cane transportation, as above stated.

Mr. STAFFORD. The gentleman is giving a justification of his proposed amendment, but he is not answering the question which I propounded to him.

Mr. JONES. I thought the gentleman desired me to explain the reasons——

Mr. STAFFORD. I wished to ascertain why the gentleman excluded water lines from the provision of his amendment and only extended the power of the public service commission to the rail lines.

Mr. JONES. There are no water lines.

Mr. STAFFORD. I assume there is some communication by water around the island.

Mr. JONES. From the United States to Porto Rico?

Mr. STAFFORD. No; I mean from different ports about the island.

Mr. JONES. Well, perhaps so.

Mr. STAFFORD. That is not covered by the amendment of the gentleman.

Mr. JONES. The reason is this: The conditions that relate to the railroads are very peculiar, just as I attempted to state to the committee, and I have not heard of any reasons why the water transportation should be exempt. There is but one railroad that can be called a railroad in the island, and that is a narrow-gauge road that is engaged for five or six months in the year in hauling cane, and if these acts to which I have referred are to be applied through the Interstate Commerce Commission to these roads it will produce a very great hardship. This amendment is suggested by the department having charge of the matter. I have never had my attention called to the water transportation by any complaint in regard to it.

Mr. STAFFORD. The other day the shipping bill provided various regulatory provisions for controlling water traffic. The gentleman is creating a public-service commission which has jurisdiction over public-service affairs in Porto Rico. Why should not it extend also to the water lines?

Mr. JONES. Well, I will say to the gentleman that this amendment is the result of an opinion written by a member of the Interstate Commerce Commission, which I have in my hand. If the gentleman cares to have it read for the information of the gentlemen in the committee, I can do it.

Mr. STAFFORD. I can understand the reason for the exemption of the interstate-commerce laws from application on the island——

Mr. JONES. Well, I have not looked into the steamboat question, nor has any member of the committee, as far as I know.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia.

The question was taken, and the amendment was agreed to.

Mr. TOWNER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Page 30, line 16, after the figures "$400," insert the word "each."

Mr. TOWNER. Mr. Chairman, this is offered——

Mr. JONES. Will the gentleman explain his amendment?

Mr. TOWNER. The gentleman will notice in line 16 it says, "but in no case shall they receive more than $400 during any one year." Of course it may be implied that that meant $400 for the commission. I just simply inserted the word "each" for the purpose of making it clear.

Mr. JONES. The words "each member"?

Mr. TOWNER. No; just simply "each"; that will be sufficient.

Mr. MANN. Mr. Chairman, just a moment. Does the gentleman want to insert "each" or "each commissioner"?

Mr. TOWNER. Well, "each commissioner." I have no objection.

Mr. MANN. There are two. It is not intended to pay anybody but the elective commission, is it?

Mr. TOWNER. No, sir; but you will notice this is part of one sentence, and it says "their compensation shall be $8 for each day's attendance on the sessions of the commission, and in no case shall they receive more than $400 during any one year." This means "$400 each" and not $400 for the entire commission.

Mr. MANN. Well, I presume it would refer back to the elective commission.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. TOWNER].

The amendment was agreed to.

The Clerk read as follows:

SEC. 39. That all grants of franchises and privileges under the section last preceding shall provide that the same shall be subject to amendment, alteration, or repeal, and shall forbid the issue of stocks or bonds except in exchange for actual cash or property at a fair valuation equal in amount to the par value of the stocks or bonds issued, and shall forbid the declaring of stock or bond dividends, and in the case of public-service corporations shall provide for the effective regulation of charges thereof and for the purchase or taking of their property by the authorities at a fair and reasonable valuation.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I shall not offer any amendment in regard to this, though I think it is unfortunate that the bill provides that there shall be no issue of stock or bonds except in exchange for actual cash and property at a fair valuation, and so forth. I think promotion charges, and charges of organization, are legitimate charges in organizing a corporation and getting the money with which to finance a great enterprise. It is very seldom that such things are successful without the payment of such charges. My recollection is that in the water power bill which we passed we recognized the right to pay for promotion and organization expenses. I am not sure what the language was. Then, I doubt, also, the desirability of saying that there never shall be a stock or bond dividend. In my judgment a corporation just organized may well be advised that instead of paying dividends from the start to build up a surplus, so that they have cash on hand as working capital, and then after a while pay a stock dividend instead of paying dividends from the start, and always have a working capital.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 40. That the execution of the laws of the United States relating to immigration, to tariffs, customs, and duties on importations into the United States and the regulations made pursuant thereto shall be effected in Porto Rico through officials appointed by the Governor of Porto Rico: *Provided*, That the exemption of aliens arriving in Porto Rico from the payment of the head tax provided by section 1 of the act of Congress of February 20, 1907, is hereby repealed.

Mr. JONES. Mr. Chairman, I move to amend section 40 by striking out all the words beginning on line 12, as follows:

That the execution of the laws of the United States relating to immigration, to tariffs, customs, and duties on importations into the United States and the regulations made pursuant thereto shall be effected in Porto Rico through officials appointed by the governor of Porto Rico: *Provided*,

So as to leave these subjects in the hands of officials appointed by the United States Government. I offer this amendment at the suggestion of the officials of the Treasury Department, who think that confusion would result from any change in present conditions.

The CHAIRMAN. The gentleman from Virginia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 31, by striking out, in line 12, after the figures "40," the remainder of the line down to and including the word "*Provided*," in line 17.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. STAFFORD. Is it not the purpose of the committee to have officials of the Treasury Department give consideration to the importance of these respective matters rather than to have local officials look after the enforcement of these affairs?

Mr. JONES. That is the purpose of this amendment. It is believed that if the change contemplated in the bill is made it will result in confusion, which should be avoided. Hence I am offering this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia [Mr. JONES].

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 42. That Porto Rico shall constitute a judicial district to be called "the district of Porto Rico." The President, by and with the advice and consent of the Senate, shall appoint one district judge, who shall serve for a term of four years and until his successor is appointed and qualified, and whose salary shall be $5,000 per annum. There shall be appointed in like manner a district attorney, whose salary shall be $4,000 per annum, and a marshal for said district, whose salary shall be $3,500 per annum, each for a term of four years, unless sooner removed by the President. The district court for said district shall be called "the District Court of the United States for Porto Rico," and shall have power to appoint all necessary officials and assistants, including the clerk, interpreter, and such commissioners as may be necessary, who shall be entitled to the same fees and have like powers and duties as are exercised and performed by United States commissioners. Such district court shall have jurisdiction of all cases cognizable in the district courts of the United States, and shall proceed in the same manner. In addition said district court shall have jurisdiction for the naturalization of aliens, and for this purpose residence in Porto Rico shall be counted in the same manner as residence elsewhere in the United States: *Provided, however*, That no person who declares his intention not to become a citizen of the United States in accordance with the provisions of section 5 of this act may thereafter be naturalized. Said district court shall have jurisdiction of all controversies where all of the parties on either side of the controversy are citizens or subjects of a foreign State or States, or citizens of a State, Territory, or District of the United States not domiciled in Porto Rico, wherein the matter in dispute exceeds, exclusive of interest or cost, the sum or value of $2,000, and of all controversies in which there is a separable controversy involving such jurisdictional amount and in which all of the parties on either side of such separable controversy are citizens or subjects of the character aforesaid: *Provided*, That nothing in this act shall be deemed to impair the jurisdiction of the District Court of the United States for Porto Rico to hear and determine all controversies pending in said court at the date of the approval of this act. Upon the taking effect of this act the salaries of the judge and officials of the District Court of the United States for Porto Rico, together with the court expenses, shall be paid from the United States revenues in the same manner as in other United States district courts. In case of vacancy or of the death, absence, or other legal disability on the part of the judge of the said District Court of the United States for Porto Rico, the President of the United States is authorized to designate one of the judges of the Supreme Court of Porto Rico to discharge the duties of judge of said court until such absence or disability shall be removed, and thereupon such judge so designated for said service shall be fully authorized and empowered to perform the duties of said office during such absence or disability of such regular judge, and to sign all necessary papers and records as the acting judge of said court, without extra compensation.

Mr. MANN. Mr. Chairman, I move to amend page 33, line 16, by striking out "$2,000" and inserting "$3,000."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Amend, on page 33, in line 16, by striking out "$2,000" and inserting "$3,000."

Mr. CULLOP. That makes it conform to the law here in the United States.

Mr. MANN. I think so. That was what was in the bill before. If I had my own way about it, I would make it $5,000. I do not think there is any reason for letting everybody go into the United States courts when they have their own courts there.

Mr. GARRETT. The only reason I can give so far as I am personally concerned——

Mr. MANN. Has the gentleman the same notion about this that I have?

Mr. GARRETT. The only reason, I will say to the gentleman, that the committee had in fixing this at $2,000 was that the values are much less down there than they are here.

Mr. MANN. The local courts in the main are to be fully trusted everywhere. I think we confer altogether too much jurisdiction upon the Federal courts here. We have too small an amount here. And so I think we can increase it. I do not see why we can not increase the amount down there.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was agreed to.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. There is one provision here that rather struck me as being somewhat harsh to these present residents of Porto Rico who decline the summary process of this bill by refusing to become citizens in six months—that they shall not be allowed later to become naturalized. I can not understand why we should mandatorily in the proviso as found on page 33—and I would like to have the attention of the chairman—expressly prohibit those residents of Porto Rico who decline for some good reason to become citizens of the United States within six months of the enactment of this law from at any time in the future availing themselves of the privilege of naturalization and becoming citizens. It seems to me that those residents who may take the oath and decline to become citizens of the United States within the six months after the passage of this act may change their minds thereafter, and should be given the full privilege of coming under the fold of citizenship of the United States.

Mr. JONES. What section is the gentleman discussing now?

Mr. STAFFORD. I am referring to the proviso on page 33, which reads as follows:

Provided, however, That no person who declares his intention not to become a citizen of the United States in accordance with the provisions in section 5 of this act may hereafter be naturalized.

I can not appreciate the reason for such an arbitrary provision as that. I can not understand the purpose of the committee trying to force or include all the residents of Porto Rico into citizenship and requiring, as stated in section 5, that they shall be so considered unless they take the oath that they do not intend to become citizens. But I can also appreciate how large numbers who may to-day decline to become citizens should still be privileged to become citizens thereafter. Before moving to strike out that proviso, I wish to inquire of some member of the committee what was the real reason for placing that arbitrary prohibition against these residents who might not wish to become citizens to-day from ever becoming citizens. They may move to the United States. I question whether they would even be privileged to avail themselves of citizenship in this country if they came here after they had once taken the oath not to become citizens under section 5.

Mr. JONES. Mr. Chairman, in reply to what has been stated by the gentleman from Wisconsin [Mr. STAFFORD], I wish to say that the committee thought the provisions of section 5 were as liberal as they ought to be made. Six months is given those people, who otherwise would be made collectively citizens of the United States, in which to go into the courts and declare that they do not desire to be so made.

If they are out of Porto Rico they do not even have to go there in person to make this declaration; they can transmit such declaration under oath. When those who do not desire to become citizens of the United States have deliberately so declared in court, that action on their part should end the matter so far as they are concerned.

Mr. STAFFORD. If those people some time within six months say they do not want to avail themselves of citizenship, and then, after seeing the workings of the government, desire to have citizenship, I think they ought to be granted that right and not be barred.

Mr. JONES. I can only say to the gentleman that it was the consensus of opinion of the Committee on Insular Affairs that when a Porto Rican deliberately renounced his United States citizenship he should not be permitted thereafter to change his mind.

Mr. STAFFORD. Mr. Chairman, I withdraw the pro forma amendment and move to strike out the clause on page 33, beginning on line 7 with the word "provided" and ending with the word "naturalized," on line 10.

The CHAIRMAN (Mr. CRISP). The Clerk will report the amendment.

The Clerk read as follows:

Amend, on page 33, by striking out the clause beginning with the word "provided," on line 7, down to and including the word "naturalized," on line 10.

Mr. STAFFORD. Mr. Chairman, I think the provisions under section 5 are very harsh and mandatory, whereby you compel every resident virtually to become a citizen of the United States unless within six months after the passage of this act he takes an oath that he does not wish to be so included.

I think you go very far in your arbitrary legislation, in the provision which I here seek to strike out, in providing that these persons who for some reason or other may not now desire to become citizens of the United States shall not have the privilege forever after of becoming naturalized. You are driving them virtually under the cover of citizenship in the provisions of section 5, and you are enforcing it still more by saying, "If you do not accept citizenship now, you may never be privileged to have it."

That certainly is not consistent with the ideas of citizenship which rests upon the volition of the individual. Never before in the history of our Government have we passed any such restrictive prohibition as that.

Mr. YOUNG of North Dakota. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. YOUNG of North Dakota. Are there not a large number of people living in Porto Rico who, under the provisions of this proposed bill, if they were denied the privilege of citizenship, as provided in the clause that the gentleman proposes to strike out, would not be citizens of any country at all?

Mr. STAFFORD. Why, certainly.

Mr. YOUNG of North Dakota. They would not be citizens of the United States or any other country.

Mr. STAFFORD. They are to-day subjects of the United States. We have thrown the protecting arm about them. They are not citizens of Spain, and they can not be. You are proposing to create by this provision two different classes in Porto Rico—native Porto Ricans who within six months accept the privileges of the Government and do not take an oath that they do not want to come under these provisions, and those who decline and will be forever debarred from becoming citizens of the United States. You say you wish to bring these residents into the fold of the United States and give them as full liberties as possible, and yet after they see the beneficent workings of the government that you are here attempting to establish by this proviso, you say, "You will not be privileged to have in the future those privileges, and you will be forever barred from citizenship or of exercising the privileges of government thereunder."

Mr. JONES. Vote, Mr. Chairman.

Mr. STAFFORD. I think the proviso should certainly be stricken from the bill.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wisconsin [Mr. STAFFORD].

The question was taken, and the Chairman announced that the "noes" seemed to have it.

Mr. STAFFORD. I ask for a division.

The committee divided; and there were—ayes 23, noes 35.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 44. That writs of error and appeals from the final judgments and decrees of the Supreme Court of Porto Rico may be taken and prosecuted to the Supreme Court of the United States in any case wherein is involved the validity of any copyright, or in which is drawn in question the validity of a treaty or statute of, or authority exercised under, the United States, or wherein the Constitution of the United States, or a treaty thereof, or an act of Congress is brought in question and the right claimed thereunder is denied, without regard to the sum or value of the matter in dispute, and in all other cases in which the sum or value of the matter in dispute, exclusive of costs, to be ascertained by the oath of either party or of other competent witnesses, exceeds the sum or value of $5,000. Such writs of error and appeals shall be taken within the same time, in the same manner, and under the same regulations as writs of error and appeals are taken to the Supreme Court of the United States from the district courts.

Mr. STAFFORD. Mr. Chairman, I move to strike out, in lines 15 and 16, the words "Supreme Court of the United

States," and insert in lieu thereof "the Fifth Circuit Court of the United States."

The CHAIRMAN. Will the gentleman from Wisconsin please restate his amendment? What page?

Mr. STAFFORD. Page 35. Strike out, from lines 15 and 16, the words "Supreme Court of the United States," and insert in lieu thereof the words "the Circuit Court of Appeals of the Fifth Circuit of the United States."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin [Mr. STAFFORD].

The Clerk read as follows:

Amend, page 35, by striking out, in lines 15 and 16, the words "Supreme Court of the United States," and inserting in lieu thereof the words "Circuit Court of Appeals of the Fifth Circuit of the United States."

Mr. STAFFORD. Mr. Chairman, I will ask unanimous consent to modify the amendment by substituting the "First" instead of the "Fifth" circuit.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to modify his amendment by substituting the "First" instead of the "Fifth" circuit.

Mr. CULLOP. Mr. Chairman, if that were done, it would provide for two appeals instead of one. The appeal would be taken from the Supreme Court of the District of Porto Rico to the Court of Appeals, and then from the Court of Appeals to the Supreme Court of the United States, and it would be multiplying litigation and multiplying the cost instead of reducing the same.

Mr. STAFFORD. I ask for recognition, Mr. Chairman.

The CHAIRMAN. The gentleman from Wisconsin is recognized.

Mr. STAFFORD. If my amendment is adopted, I will follow it with another amendment, striking out the last sentence of the section on page 36 and incorporating the same phraseology as we find in the Panama Canal government act. I would not submit this proposed amendment to the attention of the committee were it not that this very question was considered some years back, when the Committee on Interstate and Foreign Commerce was considering the question of appeals from the district courts of the Canal Zone.

At that time the committee thought that the Supreme Court of the United States was too burdened with litigation to have any appeals from the district court direct, and in the Panama Canal government act reported from the committee in 1910, and again in 1912, which became a law, the appellate jurisdiction was conferred upon the Circuit Court of Appeals. Now, the Supreme Court of the United States is back in its consideration of pending cases more than one year. So far as cases arising from the Supreme Court of Porto Rico are concerned, we ought not to burden the Supreme Court of the United States more than is necessary.

Mr. CULLOP. Will the gentleman yield?

Mr. STAFFORD. I yield to the gentleman from Indiana.

Mr. CULLOP. There is a wide difference between the Panama act and this one. Appeals from Panama are from the district court of the United States just the same as in the United States. Now, the appeal from the Supreme Court of Porto Rico is the same as an appeal from the supreme court of any State in this country. It goes direct to the Supreme Court of the United States, and the autonomy in the practice ought to be kept in this instance just the same as it is in cases appealed from the various State supreme courts in the United States; whereas, if the gentleman's amendment was adopted, it would be an exception to the method of appeal from other State supreme courts in this country.

Mr. STAFFORD. Will the gentleman recognize that, so far as cases arising in the Canal Zone are concerned, there is no authority for direct appeal in any case to the Supreme Court of the United States? The Interstate and Foreign Commerce Commitee of the House had this very question under consideration, and for the reason that we did not wish to burden the Supreme Court with appellate jurisdiction from these minor courts, we provided that those appeal cases should be sent to the circuit court of appeals. I am attempting to accomplish the same purpose in the amendment which I am submitting to the attention of the committee.

Mr. DAVENPORT. Will the gentleman yield?

Mr. STAFFORD. I yield to the gentleman from Oklahoma.

Mr. DAVENPORT. Is it not a fact that when a question is raised in any district court of the United States to-day involving a treaty or a constitutional provision the appeal is taken directly from that district court to the Supreme Court of the United States?

Mr. STAFFORD. The preceding section that we have just passed provided for that very case. That section provides for appellate jurisdiction in all those cases arising in the district court of Porto Rico first going to the circuit court of appeals, and then, if a case involves a constitutional question, being referred to the Supreme Court upon certification.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. DAVENPORT. Mr. Chairman, my contention is that this section is drawn as it should be drawn. It simply provides for appealing cases from the Supreme Court of Porto Rico to the Supreme Court of the United States where a treaty of the United States or the Constitution of the United States is involved or a treaty or an act of Congress brought into question in the trial of the case; and so far as I have been able to observe in the last 25 years in the district courts and circuit courts as we once had them in the United States, now all merged into the district courts, where questions of that character were involved those cases were appealed directly to the Supreme Court of the United States in order to get them settled. And that is the way you would bring a case on appeal if you were coming from the supreme court of a State to the Supreme Court of the United States in order to get those constitutional or treaty questions settled. It is not an unusual thing to do, and I do not believe the amendment should prevail, because questions will arise in the Supreme Court of Porto Rico that ought to be brought direct to the Supreme Court of the United States and settled finally, and the burden of appealing to the district court and then from the district court to the Supreme Court of the United States ought not to be imposed upon litigants who are as far away as these people are from the court to which they would have to bring the case.

Mr. JONES. Will the gentleman let me suggest to him that the present organic law provides for an appeal to the Supreme Court of the United States, and there has never been any question raised as to burdening the Supreme Court with these appeals.

Mr. DAVENPORT. This provision has never been called in question before when questions designated as they are designated in this act have been involved, and never will be, in my judgment, because it is not right to compel them to go such a circuitous route as they would have to go by appealing to the circuit court of appeals and then to the Supreme Court in order to get them to the court of last resort, the only court where you can finally get the questions definitely settled.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. STAFFORD].

The amendment was rejected.

The Clerk read as follows:

SEC. 57. That this act shall take effect upon approval, but until its provisions shall severally become operative, as hereinbefore provided, the corresponding legislative and executive functions of the government in Porto Rico shall continue to be exercised and in full force and operation as now provided by law; and the Executive Council shall, until the assembly and organization of the Legislature of Porto Rico as herein provided, consist of the attorney general, the treasurer, the commissioner of the interior, the commissioner of education, the commissioner of health, and the commissioner of agriculture and labor, and the five additional members as now provided by law. And any functions assigned to the Senate of Porto Rico by the provisions of this act shall, until this said senate has assembled and organized as herein provided, be exercised by the Executive Council as thus constituted.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I wish the gentleman from Virginia would tell us briefly just what this section means. Of course I know generally what it means. It says—

But until its provisions shall severally become operative, as hereinbefore provided.

There will be some delay on account of an election down there. I do not know just what it will be. When does it take effect?

Mr. JONES. I do not know whether there will be any delay or not; but until the election does take place, and the senate provided for in the act is elected, I understand that the Executive Council provided for in this bill will exercise the powers conferred upon the senate. The Executive Council in Porto Rico now is the senate, and this is to prevent any hiatus, as I understand it. It is provided that the duties that are devolved upon the senate shall be discharged by this Executive Council until the senate has been elected and organized.

Mr. MANN. Under the terms of this act the Legislature of Porto Rico in some way has to provide a qualification of voters. They could not have an election there until you do that, or can you?

Mr. JONES. This act provides the qualification of voters.

Mr. MANN. This is what section 35 provides:

That the qualified electors of Porto Rico, for any election whatsoever, shall consist of those citizens that will be hereafter registered in accordance with the terms of this act and of the laws of Porto Rico hereafter enacted.

You can not have an election until you fix the qualification of voters. You can not fix the qualification of voters until you enact hereafter a law of Porto Rico; you can not have a meeting of the legislature. Does the executive council have authority to pass a law for Porto Rico?

Mr. JONES. No; the legislature now consists of the house of delegates and the executive council, and this legislation will have to provide for the registration of the voters who are qualified as provided in this act.

Mr. MANN. When does the legislature meet again?

Mr. JONES. I can not state what day the legislature meets; I do not recall it; but the governor can call the legislature in extra session if it is desirable to do so. This section simply provides that any duties that devolve upon the senate shall be performed by the executive council until this legislature is elected. They have a legislature there now, but we abolish the present executive council, and therefore we substitute this council in the place of that council, which is abolished for the purpose of enacting the legislation which the gentleman thinks is necessary and in which I entirely agree with him is necessary.

Mr. MANN. This bill says:

That this act shall take effect upon approval, but until its provisions shall severally become operative, as hereinbefore provided, the corresponding legislative and executive functions of the government in Porto Rico shall continue to be exercised and in full force and operation as now provided by law; and the executive council shall—

Of course it would be a violent assumption to assume that the governor of Porto Rico would not think it necessary to call an extra session of the legislature, which he is not required to do; but if he does not, the law would not go into effect, or a large share of it would not go into effect.

Mr. JONES. The gentleman from Porto Rico [Mr. RIVERA] tells me that the legislature will not meet again until February unless the governor convenes it under the power which he has under the present law.

Mr. MANN. I am inclined to think that it would be wise to have in here a provision for a special session of the legislature, because you provide for elections in November and fix the status as of November for a four-years' term.

Mr. JONES. I do not think we are taking any risk on that, because the governor of Porto Rico is more anxious to pass this law as soon as possible than any Member of Congress, and so are all the people down there. The governor is very anxious to see this bill passed, and he can be relied upon to do everything in his power to organize the legislature provided for.

Mr. MANN. And still, an act of this sort ought not depend on the whim or act of any one man.

The Clerk read as follows:

SEC. 58. That the laws and ordinances of Porto Rico now in force shall continue in force and effect, except as altered, amended, or modified herein, until altered, amended, or repealed by the legislative authority herein provided for Porto Rico or by act of Congress of the United States; and such legislative authority shall have power, when not inconsistent with this act, by due enactment to amend, alter, modify, or repeal any law or ordinance, civil or criminal, continued in force by this act as it may from time to time see fit.

Mr. BAILEY. Mr. Chairman, I ask unanimous consent to return to page 29 for the purpose of correcting the text, and I offer an amendment for that purpose.

Mr. JONES. Consent was given, Mr. Chairman, to return to this paragraph.

Mr. MANN. When was consent given?

Mr. JONES. The gentleman from Illinois [Mr. MANN] raised a question about the language, and I asked unanimous consent to return to it if necessary.

The Clerk read as follows:

Page 29, line 23, after the word "therefor," strike out the remainder of the paragraph and insert in lieu thereof the following: "Also the power to alter, amend, modify, or repeal any and all laws and ordinances of every character now in force in Porto Rico, or any municipality or district thereof, in so far as such alterations, amendments, or modifications or repeal may be consistent with the provisions of this act."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

SEC. 59. That all laws or parts of laws applicable to Porto Rico not in conflict with any of the provisions of this act, including the laws relating to tariffs, customs, and duties on importations into Porto Rico prescribed by the act of Congress entitled "An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes," approved April 12, 1900, are hereby continued in effect, and all laws and parts of laws inconsistent with the provisions of this act are hereby repealed.

Mr. DUPRÉ. Mr. Chairman, I move to strike out the last word. What adjustment was made, if any, of the question raised by the gentleman from New York [Mr. BENNET] about the citizenship of Porto Ricans now in America?

Mr. JONES. The gentleman from New York [Mr. BENNET] discovered on examination of the general laws relating to naturalization that there was no difficulty in the way of the persons to whom he referred becoming naturalized.

Mr. STAFFORD. Mr. Chairman, I wish to direct the attention of the gentleman from Virginia to an amendment offered by the gentleman from New York [Mr. BENNET] providing for incorporation of a provision that would permit a workman's compensation act. That was passed over for subsequent consideration. The gentleman from Virginia had no objection to the incorporation of the first clause of that amendment. I suggest that we return to that section, and if no other amendment is offered, incorporate the first part of that in the bill of rights.

Mr. JONES. I will say to the gentleman from Wisconsin that the gentleman from New York, although he did not specifically refer to this, came to me and said that he had no further amendments to offer.

The CHAIRMAN. The Chair begs to state this amendment, offered by the gentleman from New York [Mr. BENNET], was passed temporarily at the suggestion, as the Chair remembers, of the gentleman from Illinois [Mr. CANNON] and was to be recurred to later. Unless the chairman of the committee has the authority of the gentleman from New York to withdraw it, or it is thought best to do so at this time—the Chair understands the gentleman from New York is not here at this time.

Mr. GARRETT. Does anyone desire to insist upon that amendment?

Mr. STAFFORD. I believe the gentleman from Virginia said that he had no objection to the first part of the amendment.

Mr. JONES. I did not think there was any necessity for it, but I had no objection to it. I did object to the rest of it, but it went over with the understanding that the matter was to be taken up, but, as I said, the gentleman from New York came to me and told me of his satisfaction with the section relating to citizenship, and that he had no further suggestion or amendments to offer; and while he did not give me specific authority to withdraw it——

Mr. MANN. Let us get at it. I ask to have the amendment reported.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Modification of the amendment offered by Mr. BENNET: On page 3, to follow the amendment already adopted as a new paragraph, insert the following:

"Nothing contained in this act shall be construed to limit the power of the legislature to enact laws for the protection of the lives, health, or safety of employees."

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York just read.

The question was taken, and the amendment was agreed to.

Mr. JONES. Mr. Chairman, I move that the committee do now rise and report the bill to the House with amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. FOSTER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 9533, and had directed him to report the same to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. JONES. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. JONES. I demand a vote on the amendment to section 35.

The SPEAKER. Is a separate vote demanded on any other amendment; if not, the Chair will put them in gross.

Mr. GARNER. Is that the so-called suffrage amendment?

Mr. MANN. Mr. Speaker, reserving the right to ask for a separate vote, my understanding is the previous question being ordered the other amendments are agreed to, and we will not have a vote on the suffrage amendment to-night.

Mr. JONES. That is the understanding, I think.

Mr. KITCHIN. With the further understanding we will take up the District resolution and discuss it after this.

Mr. MANN. Mr. Speaker, I ask unanimous consent that the other amendments be considered as agreed to, and that the vote upon the amendment to section 35 and the final passage of the bill go over until to-morrow morning.

Mr. KITCHIN. And that we meet at 11 o'clock to-morrow.

Mr. MANN. I am perfectly willing.

Mr. KITCHIN. And that we meet at 11 o'clock to-morrow morning.

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent that all amendments, except the one to section 35, be considered as agreed to, that the vote on that amendment and the bill go over until to-morrow, and that the House meet at 11 o'clock to-morrow. Is there objection? [After a pause.] The Chair hears none.

ORDER OF BUSINESS.

Mr. MADDEN. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Illinois rise?

Mr. MADDEN. Mr. Speaker, I rise for the purpose of entering a motion to reconsider the vote by which the House on the unanimous-consent motion of the gentleman from Indiana [Mr. COX] had the bills H. R. 6915 and H. R. 10130 transferred from the Committee on the Post Office and Post Roads to the Committee on Reform in the Civil Service. I do that for the reason that there is a large majority of the Committee on the Post Office and Post Roads in favor of those bills. They have had them under consideration, and on last Wednesday they passed a motion to take those bills up for consideration again on next Wednesday and consider them until final conclusion.

Mr. GARRETT. When was that order made?

Mr. MADDEN. That was this morning.

Mr. KITCHIN. By unanimous consent?

The SPEAKER. It was a unanimous-consent order.

Mr. MADDEN. It was on motion of the gentleman from Indiana.

Mr. GARNER. Mr. Speaker, if it was by unanimous consent, the gentleman, under the rules, would not have the right to make a motion to undo what has been done by unanimous consent unless he can get it done by unanimous consent.

Mr. MADDEN. I think I have under the rules of the House.

Mr. FOSTER. Will not the gentleman let it go over until the gentleman from Indiana is here?

Mr. MADDEN. It was done when I was not here.

The SPEAKER. The Chair wishes the gentleman would bring it up in the morning.

Mr. MANN. I suggest that the gentleman enter the motion to reconsider.

Mr. MADDEN. I have entered the motion to reconsider.

Mr. GARNER. Has the gentleman a right to enter a motion to reconsider when it is given by unanimous consent? I reserve a point of order against the gentleman's motion.

The SPEAKER. Anyhow, the RECORD will show the gentleman reserved the point of order. The Chair was under the impression from what the gentleman from Indiana stated that the committee wanted it done.

Mr. MADDEN. Not at all; two-thirds of the committee did not want it done.

Mr. GARNER. Mr. Speaker, just a moment. May I say that if the House has done a thing by unanimous consent——

The SPEAKER. There is no use to argue that now.

Mr. MANN. For the benefit of the gentleman let me suggest that the Journal of this proceeding will show that by unanimous consent the gentleman from Indiana moved to do so-and-so. That is the record of it.

The SPEAKER. The Chair will investigate all that.

Mr. MADDEN. I enter the motion, Mr. Speaker.

Mr. GARNER. I reserve a point of order.

The SPEAKER. Both things will be done in the morning and decided.

SAMUEL SCHWARZ (H. DOC. NO. 1153).

The SPEAKER laid before the House the following message from the President of the United States, which, with the accompanying documents, was referred to the Committee on Foreign Affairs and ordered printed:

To the House of Representatives:

In response to the resolution of the House of Representatives dated May 13, 1916, and reading as follows:

Resolved, That the President of the United States be, and he is hereby, requested, if not incompatible with the public interests, to furnish the House of Representatives with a statement of what he has done under the provisions of section 2001 of the Revised Statutes to secure the release of Samuel Schwarz, an American citizen alleged to be unjustly deprived of his liberty by or under the authority of the Government of Great Britain.

I transmit herewith a report from the Acting Secretary of State, furnishing a summary of the correspondence on file in the Department of State relating to the case of Samuel Schwarz.

WOODROW WILSON.

THE WHITE HOUSE,
Washington, May 22, 1916.

DISTRICT OF COLUMBIA.

Mr. POU. Mr. Speaker, I offer the following privileged report from the Committee on Rules.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

House resolution 240 (H. Rept. 740).

Resolved, That during the consideration of the bill (H. R. 15774) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1917, and for other purposes, it shall be in order to consider the following items (the general rules of the House notwithstanding):

"Hereafter all appropriations made for the support of the government of the District of Columbia, including all sums appropriated in any general appropriation act indicated to be paid out of the District of Columbia revenues and amounts to pay the interest and sinking fund on the funded debt of said District, shall be paid out of the revenues of the District of Columbia to the extent that the same shall be sufficient therefor and the remainder out of any money in the Treasury not otherwise appropriated."

On pages 73, 74, and 75:

"Upon the passage of this act the terms of the members of the present board of directors shall terminate, and thereafter the board shall consist of the Surgeon General of the Army, the Surgeon General of the Navy, the Surgeon General of the Public Health Service and one Senator and two Representatives in Congress, to be appointed by the Vice President and the Speaker of the House of Representatives, respectively, each for the term of a single Congress and be eligible for reappointment, and five members, who shall be residents of the District of Columbia, to be appointed by the commissioners. Of the number of directors appointed by the commissioners first after the passage of this act, one shall serve for one year, two for two years, and two for three years; all subsequent appointees of said commissioners shall serve for three years, except that appointments to fill vacancies occurring during a term shall be for the unexpired term. The said board shall have full power to appoint all officers and employees of said hospital, including the medical staff, subject to the approval of the commissioners. There shall always be at least three members of each sex upon said board. The said hospital shall continue to operate as a hospital (and dispensary) for the treatment of diseases peculiar to women and lying-in asylum, and shall continue to furnish board, lodging, medicine, and medical attendance gratuitously to those unable to pay therefor, when so duly certified by the Board of Charities of the District. It shall also receive patients who are willing to pay their expenses, and all money received from said patients shall be paid daily to the collector of taxes of the District, to be deposited by him to the credit and to constitute a part of the annual appropriation for support and maintenance of said hospital, which money, together with all appropriations made for said hospital, shall be expended under the direction of the board of directors of the hospital and the supervision and control of the commissioners."

On pages 83, 84, and 85:

"That whenever any person has been convicted of crime in any court in the District of Columbia and sentenced to imprisonment for more than one year by the court, the imprisonment during the term for which he may have been sentenced or during the residue of said term may be in some suitable jail or penitentiary or in the reformatory of the District of Columbia, above referred to; and it shall be sufficient for the court to sentence the defendant to imprisonment in the penitentiary without specifying the particular prison or the reformatory of the District of Columbia and the imprisonment shall be in such penitentiary, jail, or the reformatory of the District of Columbia as the Attorney General shall from time to time designate: *Provided further*, That the commissioners are vested with jurisdiction over such male and female prisoners as may be designated by the Attorney General for confinement in the reformatory of the District of Columbia from the time they are delivered into their custody or into the custody of their authorized superintendent, deputy, or deputies, and until such prisoners are released or discharged under due process of law: *And provided further*, That the residue of the term of imprisonment of any person who has heretofore been convicted of crime in any court in the District of Columbia and sentenced to imprisonment for more than one year by the court may be in the reformatory of the District of Columbia instead of the penitentiary where such person may be confined when this paragraph takes effect, and the Attorney General, when so requested by the Commissioners of the District of Columbia, is authorized to and he shall deliver into the custody of the superintendent of said reformatory or his deputy or deputies any such person confined in any penitentiary in pursuance of any judgment of conviction in and sentence by any court in the District of Columbia, and the Commissioners of the District of Columbia are vested with jurisdiction over such prisoners from the time they are delivered into the custody of said superintendent or his duly authorized deputy or deputies, including the time when they are in transit between such penitentiary and the reformatory of the District of Columbia and during the period they are in such reformatory until they are released or discharged under due process of law. The Attorney General shall pay the cost of the maintenance of said prisoners so transferred, said payment to be made from appropriations for support of convicts, District of Columbia, in like manner as payments are now made for the support of District convicts in Federal penitentiaries. Nothing herein contained shall be construed as applying to the National Training School for Boys or the National Training School for Girls. The provisions of this paragraph shall take effect on and after July 1, 1916."

On pages 95 and 96:

"SEC. 6. That hereafter no part of any money appropriated by this or any other act shall be used for the payment to the Washington Gas Light Co. or the Georgetown Gas Light Co. for any gas furnished by said companies for use in any of the public buildings of the United States or the District of Columbia at a rate in excess of 70 cents per 1,000 cubic feet."

On page 96:

"SEC. 7. That all fees, assessments, rents, and all other receipts now required when collected to be paid into the Treasury, one-half to the credit of the District of Columbia and one-half to the credit of the United States, shall hereafter when collected be paid into the Treasury and credited wholly to the revenues of the District of Columbia.

"SEC. 8. That hereafter the Commissioners of the District of Columbia are authorized and directed to assess and collect rent from all users of space occupied under the sidewalks and streets in the District of Columbia, which said space is occupied or used in connection with the business of said users."

On pages 97 and 98:

"SEC. 10. That hereafter the half cost of the paving or repaving of a roadway between the side thereof and the center thereof with sheet asphalt, asphalt block, granite block, vitrified block, cement concrete, bituminous concrete, macadam, or other form of pavement shall be assessed against the property abutting the side of the street so improved, such assessments to be levied and collected as now provided as to alleys and sidewalks: *Provided*, That the advertisement by publication of the commissioners' intention to do such work and the formal hearing in respect thereto required by law as to alley and sidewalk improvements shall not be required as to roadway improvements.

"There shall be included in the area the cost of which is assessable hereunder only the roadway area abutting the property between lines normally projected from the building line of the street being improved at the points of intersection with the building lines of intersecting streets.

"There shall be excluded from the cost of the roadway work to be assessed hereunder:

"First. The cost of all such work beyond a line 20 feet from the side thereof.

"Second. The cost of all such work within the space within which street railway companies are required to pave by law, and nothing herein contained shall be construed as relieving street railway companies from bearing all the expenses of paving and repairing streets and avenues between lines 2 feet exterior to the outer rails of their tracks, as required by section 5 of the act providing a permanent form of government for the District of Columbia, approved June 11, 1878."

On pages 98 and 99:

"SEC. 11. That for the protection of streams flowing through United States Government parks and reservations in the District of Columbia from pollution by sewage discharged therein from sewerage systems of Maryland towns and villages bordering said District, the commissioners are authorized to enter into an agreement with the proper authorities of the State of Maryland for the drainage of such sewerage systems into and through the sewerage system of the District of Columbia; and the said commissioners are further authorized to permit connections of Maryland sewers with the District of Columbia sewerage system at or near the District line whenever, in their judgment, the sanitary conditions of streams flowing into and through such United States Government parks and reservations in the District of Columbia are such as to demand the elimination of such pollution: *Provided*, That all cost of construction of such sewers to and connection with the sewerage system of the District of Columbia shall be paid by the proper authorities of the State of Maryland, and that said State shall enter into such agreement with the commissioners and shall guarantee the protection of the District of Columbia sewerage system from unauthorized connections thereto, and shall reimburse the District of Columbia for the actual cost of pumping and handling such sewage by annual payments for such service, as determined by the commissioners in such agreement; all such sums collected therefor to be paid into the Treasury of the United States through the collector of taxes to the credit of the District of Columbia."

Mr. POU. Mr. Speaker, I ask unanimous consent that there be not exceeding an hour's debate on the rule, and that at the end of that time the previous question be considered as ordered; that one half the hour be controlled by myself and the other half by the gentleman from Kansas [Mr. CAMPBELL].

The SPEAKER. The gentleman from North Carolina [Mr. POU] asks unanimous consent that the debate on this rule shall not exceed an hour, one half of the time to be controlled by himself and the other half by the gentleman from Kansas [Mr. CAMPBELL], and that at the end of that time the previous question shall be considered as ordered.

Mr. CAMPBELL. Reserving the right to object, is it the intention of the gentleman from North Carolina to conclude debate on the rule to-night?

Mr. POU. That is our very earnest desire.

Mr. CAMPBELL. Is it the intention to ask for a vote on the rule to-night?

Mr. POU. That is our purpose. I would like very much to get the rule adopted if we can.

Mr. MANN. There was an understanding there would be no record vote on the rule to-night, I will say to the gentleman. I do not think the gentleman ought to ask us to agree to the previous question. He can move the previous question.

Mr. POU. I shall do everything I can to carry out any agreement that may have been made.

Mr. PAGE of North Carolina. The gentleman would have no objection to the previous question being considered as ordered at the end of the hour's debate if the vote goes over until to-morrow?

Mr. MANN. I have no objection to moving the previous question.

Mr. CANNON. May I make one suggestion? What is the use of debate to empty seats on an important rule of this kind. You might just as well vote at once unless you are going to get gentlemen here.

Mr. MANN. I think the gentlemen who are not here, if the vote goes over until to-morrow, will read all the debate in the RECORD. [Laughter.]

The SPEAKER. Is there objection?

Mr. GARRETT. Mr. Speaker, do I understand the gentleman from Illinois [Mr. MANN] to state that there was an agreement that there would be no vote on this this evening?

Mr. MANN. That was the agreement, yes; with the majority leader.

Mr. CAMPBELL. I have a demand for much more than 30 minutes' time, I will say to the gentleman from North Carolina [Mr. POU]. I do not know whether the gentlemen who asked for time would want to talk to empty seats here or not.

Mr. POU. Surely an hour ought to be sufficient. It seems to me we could have an agreement to go on for an hour this afternoon.

Mr. PAGE of North Carolina. Question, Mr. Speaker.

The SPEAKER. Is there objection?

Mr. MANN. As the request is put, I shall have to object.

The SPEAKER. The gentleman from North Carolina [Mr. POU] asks unanimous consent that debate on this rule shall proceed for not more than an hour, half of the time to be controlled by himself and half by the gentleman from Kansas [Mr. CAMPBELL]. Is there objection? [After a pause.] The Chair hears none.

The gentleman from North Carolina is recognized for 30 minutes.

Mr. POU. Mr. Speaker, this resolution makes in order legislation which has had long and serious consideration by the great Committee on Appropriations of this House and by other committees as well. In view of the fact that there has been this consideration given to this legislation, the Committee on Rules has felt justified in giving the House an opportunity to vote upon this legislation.

I reserve the balance of my time.

Mr. CAMPBELL. Mr. Speaker, after I have occupied 10 minutes I desire to have my attention called to it.

The SPEAKER. Very well.

Mr. CAMPBELL. Mr. Speaker, there have been a great many rules brought in from the Committee on Rules making legislation in order on appropriation bills during this session of Congress. Heretofore the legislation that has been in order on appropriation bills has been such legislation as the committee bringing it in had jurisdiction of. In this case five substantive legislative provisions are made in order on an appropriation bill of which the Committee on Appropriations, which reports the bill, does not have jurisdiction.

These matters of legislation, or most of them, are now under consideration before the Committee on the District of Columbia, a committee made up of able Representatives, who give serious consideration to the matters referred to that committee. All those important matters of legislation are taken away from the Committee on the District of Columbia and jurisdiction is assumed by the Committee on Appropriations, and the Committee on Rules is asked to make all those matters of legislation in order on this appropriation bill.

The matters to be considered by the House are of the greatest possible importance to the country and to the District of Columbia. It is proposed by one provision that is made in order by this rule to repeal or set aside a provision in the charter or the fundamental law of the District of Columbia by a rider on an appropriation bill brought in by a committee that has not jurisdiction of the subject. I refer to that provision under which the expenses of the District government have been paid since 1878.

In 1874 the Congress of the United States took up for serious consideration, by the appointment of a commission or a committee, the regulation of the expenses of the District of Columbia and apportioning that expense between the General Government and the District. The result was that after four years of labor, under the leadership of Senator J. C. S. Blackburn, of Kentucky; Senator Allen G. Thurman, of Ohio; and Senator Edmonds, of Vermont, a charter or fundamental law was solemnly enacted by the Congress of the United States to be known from that time on as the charter or fundamental law of the District of Columbia. It is now proposed to change that fundamental law by this rider on an appropriation bill.

Now, if this House wants to take that responsibility, if this House wants to undo in a few moments what it took four years of consideration to enact, the responsible majority is assuming a great responsibility.

Mr. LONGWORTH. Mr. Speaker, will the gentleman yield for a question?

Mr. CAMPBELL. Yes.

Mr. LONGWORTH. Would it not be possible to consider this matter in the regular course on a District day?

Mr. CAMPBELL. There is no doubt of it.

Mr. LONGWORTH. There is no necessity for bringing it up in this way, is there?

Mr. CAMPBELL. Absolutely none, except to get it through on a rider. The bill must go through, and the only excuse for placing this fundamental legislation, this repeal of the fundamental law of the District of Columbia, on an appropriation bill is to have it go through as a rider on an appropriation bill.

Now a year ago a joint commission was appointed, consisting of Senators and Representatives, made up of the ablest

Members of the Senate and of this House. That commission took time to seriously consider the question that is proposed to be reported here. Two large volumes of testimony were taken. A report was made by that commission, and, strangely enough, the report was not referred to the Committee on Appropriations, but was referred to the Committee on the District of Columbia.

That report is totally ignored by the Committee on Appropriations, in that the investigating committee found that Congress was solemnly bound to provide by appropriations for the payment of 50 per cent of the interest and the sinking fund upon the funded debt of the District. One of the very first provisions made in order by this rule is in violation of that finding, and the recommendation that that condition be carried out by the Congress of the United States is set aside by one of the first provisions of this rule. The Committee on Appropriations totally ignores the recommendations of the commission that was appointed by the last Congress to consider this very subject, and Members of Congress are asked, under a possible 10 minutes of time for consideration, to vote upon a question that in the first instance had consideration for four years, and that in the last Congress was deemed to be of sufficient importance to justify the appointment of a joint commission, and that commission deemed the subject of sufficient importance to take testimony for weeks. They took testimony, as I stated, consisting of two volumes, and made a report. All this matter is ignored, and this House is asked to make in order on an appropriation bill legislation that should be considered by and reported out of the Committee on the District of Columbia.

Mr. Speaker, I do not desire to go into the probable effects of this law if it is enacted. These matters have been discussed here from time to time for years. The danger of the enactment of this first provision, repealing the organic law of the District of Columbia, is that the city of Washington will begin at once to deteriorate into the old conditions in which it was found in 1874, when the matter of considering the question of paying the expenses of the District was taken up. That was a third of a century ago. I sincerely hope, in the interest of the country and in the interest of the pride which every citizen of the Republic has in the Capital of the Nation, that no step will be taken that will result in the Capital going backward.

The SPEAKER. The gentleman has used 10 minutes.

Mr. FOSTER. Mr. Speaker, I yield five minutes to the gentleman from North Carolina [Mr. PAGE].

The SPEAKER. The gentleman from North Carolina [Mr. PAGE] is recognized for five minutes.

Mr. PAGE of North Carolina. Mr. Speaker, I have repeatedly said that on general principles—and being a member of the Committee on Appropriations and knowing thoroughly the rules as they apply to legislation on an appropriation bill—I do not believe that it is good legislative policy to legislate on appropriation bills. But there are exceptions to all rules, and the committee formulating this bill, after very mature consideration, and not only that but after consultation with some of our colleagues who serve upon the legislative committee of the District of Columbia, decided that it was——

Mr. MEEKER. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman from North Carolina yield to the gentleman from Missouri?

Mr. PAGE of North Carolina. Yes.

Mr. MEEKER. Has it not been the exception this year not to legislate upon appropriation bills?

Mr. PAGE of North Carolina. Oh, no; not this year. I will remind the gentleman that at this session of Congress there have been rules making in order on the Post Office appropriation bill a great mass of legislation. Only two weeks ago there was a rule that made in order on the Agricultural bill a great deal of legislative matter.

Mr. MEEKER. I say that an appropriation bill which does not contain legislation is the exception this year.

Mr. PAGE of North Carolina. It has been the exception in every Congress in which I have served, and this is the seventh. As far as that goes, the law creating the Public Utilities Commission for the District of Columbia and the excise law for the District of Columbia were passed on District appropriation bills. If that side of the House was in control at this time, and they could not find another place, they would not hesitate to bring in a rule to pass a tariff bill on the District of Columbia appropriation bill. [Applause and laughter.] This whole question about the propriety of passing legislation by a rider on an appropriation bill is altogether a matter of whether you favor legislation or are opposed to it. Why, the Evening Star of this city, which has criticized this rider because it was carried on an appropriation bill, has criticized the subcommittee of the Committee on Appropriations because it did not bring out legislation on the same bill establishing a garbage plant for the District of Columbia—because that paper wants a garbage plant and it does not want the other. The same is true with every individual here.

This matter of the fiscal relations of the District of Columbia was discussed at great length in the first session of the Sixty-third Congress, because of section 8 that was carried in the District appropriation bill. Section 8 passed this House by a decided majority. It was in practical effect just exactly this legislation. In the last session of Congress what was known as section 15 passed this House on a record vote by nearly 100 majority. Since the Senate would not accept that, there was, on motion of the gentleman from Alabama [Mr. UNDERWOOD], a resolution agreed to in this House which appointed a select special committee to take under consideration this whole matter of the fiscal policy of the District of Columbia, between it and the United States Treasury. As the gentleman from Kansas [Mr. CAMPBELL] has said, that committee sat for nearly two months, and took testimony that filled two volumes, and made a recommendation.

The gentleman from Kansas says that this provision does not carry out that recommendation in one minor detail. With that exception it does carry it out. That exception is as to the bonded debt of the District of Columbia. That debt up to date has been paid in accordance with the act of 1878. It was more than $30,000,000. It has been paid, until now the amount is less than $6,000,000. This very bill carries $975,000 for interest and sinking fund of the bonded debt of the District of Columbia. By the year 1923 that bonded debt will have been retired. That is a mere temporary matter. This other, which is included in the first section of this bill and the first section of this rule, is permanent legislation.

The gentleman from Kansas referred to the former distinguished Senator from Kentucky, Senator Blackburn, who, in 1874, as a Members of this House, was chairman of the committee that for four years investigated and made a report upon which was based the legislation of 1878. If the gentleman from Kansas had taken the time to read the testimony before this select committee sitting last fall he would have found that that same ex-Senator Blackburn appeared before that committee and gave unmistakably his testimony and his judgment that the time had arrived when that law was no longer equitable and that the very provision that is in this bill should be enacted into law. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. FOSTER. I yield to the gentleman from Mississippi [Mr. SISSON] five minutes.

Mr. SISSON. Mr. Speaker, it was my pleasure to serve on the District subcommittee that made the two recommendations referred to by the gentleman from North Carolina [Mr. PAGE] a moment ago. In the last several years there has been no justification for the arbitrary half-and-half plan which has prevailed in the District of Columbia. When I first went upon the Committee on Appropriations I insisted that the only just and equitable plan was that all the property in the District of Columbia should be assessed at a reasonable value and that a reasonable tax rate should be levied against that property; that that money should be collected, and whatever other money was needed to run the District government should be paid out of the Federal Treasury, and that Congress should assume that responsibility on behalf of the people of the United States.

Mr. LONGWORTH. Will the gentleman yield?

Mr. SISSON. I yield to the gentleman from Ohio.

Mr. LONGWORTH. What does the gentleman estimate will be paid as a matter of fact by the District of Columbia and what portion by the Government?

Mr. SISSON. At the present assessment and the present valuation, in round numbers, about $8,000,000 will be paid by the District of Columbia.

Mr. LONGWORTH. At the present rate of taxation?

Mr. SISSON. Yes. Now, those are round figures. I could tell the gentleman exactly by looking at the District appropriation bill, which has just been reported to the House.

Mr. TILSON. Expressed in terms of percentages?

Mr. SISSON. About 60–40, or about 61 per cent to 39 per cent.

Mr. LLOYD. It will be about 69 per cent to 31 per cent, I think; but that has nothing to do with the principle.

Mr. SISSON. Not a thing.

Mr. LLOYD. Is it not true that next year the figures might be reversed, according to this rule?

Mr. SISSON. If Congress saw fit and proper to appropriate vast sums of money, that would be true.

Mr. LLOYD. That is the point I am making, but the thing that is fixed is the amount that the District shall pay.

Mr. SISSON. That is it exactly. In other words, under this law and under section 8, which was awkwardly drawn, but did just exactly, in substance, what this does, the amount that the District should pay was fixed. But last year we put almost this exact language into the appropriation bill and thrashed it out on the floor of the House at length, and by a vote of 2 to 1 the House of Representatives passed this provision. It went over to the Senate, and for the first time in the history of the Senate for thirty-odd years the provision was championed by a Senator, Senator KENYON of Iowa, and one-third of the Senate voted for it. Then the bill came back to the House, after a disagreement, and the House, by more than 2 to 1, stood by the House conferees, and then the bill went back to the Senate. Certain influences were brought to bear here, and then the gentleman from Alabama [Mr. UNDERWOOD] offered the proposition that was carried, by a small majority of 14, to have this joint commission appointed. The men appointed on that commission were not wedded to this proposition. They were absolutely fair, and the three Senators appointed were Senators who, so far as the record shows, had been on the other side of this proposition. Yet, after two months of taking testimony, all three of the members of the House commission and all three of the members of the Senate commission made a unanimous report as to this provision that is in this bill. The only difference between their recommendation and this bill was in reference to the bonded debt of the District of Columbia.

Mr. CAMPBELL. Mr. Speaker, I yield 10 minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Speaker, ever since I have been a member of the Committee on Rules I have tried to pursue a consistent policy with reference to legislative riders on appropriation bills. I have always been opposed to such riders except in two classes of cases—one where the legislation proposed was so intimately connected with appropriations that they ought to be considered together, and the other an emergency that called for an exception to the rule.

If this rule that is now proposed was confined in its provisions of those two classes of cases I should gladly support it. I want to frankly say that in my judgment the provision known as the half-and-half provision does come within that rule. It is intimately connected with the appropriations and does affect the appropriations that may be made.

But, Mr. Speaker, there are other provisions in this bill that have no connection whatever with appropriations, and I can not understand upon what theory the Committee on Appropriations, which is not a legislative committee at all, has incorporated them into the bill—one, for instance, in reference to the organization of a hospital here, another with reference to the amendment of the Criminal Code of the District of Columbia, and there are other provisions.

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. LENROOT. For a brief question.

Mr. PAGE of North Carolina. The gentleman mentioned the hospital; the hospital is very intimately connected with the appropriations, and that is the reason of its being in here.

Mr. LENROOT. Yes; but I can not assume that the Appropriation Committee will make the appropriations greater or less because of the legislation included in this bill. I would assume that the Committee on Appropriations would make such appropriations for running the hospital as in its judgment was necessary for that purpose, and the matter of administration of that hospital lies not with the committee, but with the Committee on the District of Columbia, so far as the legislation of the House is concerned.

So, Mr. Speaker, the rule in its present form can not receive my support, although there are some provisions that I believe should be made in order.

The House will observe that there is no limit to debate for the consideration of this bill provided for in this rule. I am not complaining of that, but I do want to draw the contrast between this rule and the rule adopted the other day on the shipping bill, a bill carrying $50,000,000, a bill containing new subjects of legislation that have never been considered by either House of Congress. Under that rule adopted by the Democratic majority consideration under the five-minute rule was limited to less than two days, and we witnessed at 4 o'clock last Friday one of the greatest farces ever perpetrated on this House. We had over 100 amendments, many of them important amendments, many of them amendments that the majority members of the Committee on the Merchant Marine and Fisheries agreed ought to be adopted to this bill, and yet every one of them was voted down just as fast as they were read from the Clerk's desk.

I said at that time that while the Democratic majority would make a claim that they shut off debate on that bill because they needed to expedite business and hurry along the business of the House—I prophesied then that upon the District of Columbia bill, that carrying an appropriation of $11,000,000, there would be no effort to shut off debate; that debate would be unlimited as far as the rule was concerned. It will take at least a week to consider it, and a little later on, as we get into the consideration of the bill, we can fairly expect that we will have a debate of an hour or more on such important items as to whether or not the secretary of the automobile board shall have $300 or $350 a year. [Laughter.] And so on with other items, ample debate, ample opportunity to debate little infinitesimal items on this bill, but no opportunity to debate great questions of public policy and expenditure of millions of dollars of public money on the shipping bill.

Again I want to call the attention of the House that although the Democratic majority did not have time on the shipping bill to afford the minority an opportunity for fair consideration of that bill, they had plenty of time on the Porto Rican bill, to which there was no opposition and as to which there was a unanimous report from both sides of the House. We have been on that bill two days, we have been considering that bill to-day, and just finished the consideration of it a few minutes ago. If the Democratic side was sincere in their rule on the shipping bill, why have they not been anxious to expedite business on other bills? The answer is that their claim with reference to the shipping bill was a pure piece of hypocrisy on the part of the Democratic majority.

Mr. GORDON. Will the gentleman yield?

Mr. LENROOT. Briefly.

Mr. GORDON. Does not the gentleman think that there is an important principle involved in the payment by the people of the United States for one-half of the taxes of the District of Columbia, one-half of the sewer assessments and one-half of the sidewalk assessment?

Mr. LENROOT. I do, and I want full debate and full consideration; but I say to my friend that it is not more important than the creation of a shipping board, spending $50,000,000 of the Government money and the matter of the regulation of the shipping of the United States and of the world that has never been before considered. If the gentleman from Ohio thinks that this now requires full debate and consideration, why did not he vote for full debate and consideration on the shipping bill? Is it the gentleman's idea that the half-and-half question in Washington is more important than the other great questions? Evidently the gentleman thinks so, and if he thinks so he is justified in voting as he did against every amendment from the minority, only inquiring, "How does my chairman stand, and I will vote the way he does whether he is right or whether he is wrong?"

Mr. GORDON. Does the gentleman want an answer?

Mr. LENROOT. Yes.

Mr. GORDON. I voted against those amendments because I thought that they were offered as a filibuster and not offered in good faith.

Mr. LENROOT. Does the gentleman want an answer to that?

Mr. GORDON. Why, most of the men that offered them did not stay here until they were voted on.

Mr. LENROOT. The chairman of the committee—and it is no breach of confidence for me to state this, for it was stated in the presence of several persons—said while some of the amendments were being voted on, and he voted against them, that many of them he thought ought to be adopted. Does that answer the gentleman's question? The gentleman was content to vote against the amendments because they came from this side of the aisle.

Mr. GORDON. No, no.

Mr. LENROOT. It was not necessary to inquire whether an amendment was a good amendment or whether it was a bad amendment. He took the position, "I am a Democrat, and this side of the House and my leader is against it, and so I will follow my leader." But, Mr. Speaker, I hope the time will come when this House will not legislate in this manner.

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. LENROOT. I will.

Mr. HUMPHREY of Washington. I want to ask the gentleman whether there had been any intimation from the President that this District bill must pass before the Democratic convention meets?

Mr. LENROOT. I judge not, because if there was there would be a rule on this bill like there was on the shipping bill. [Laughter on the Republican side.]

The SPEAKER. The gentleman from Wisconsin yields back one minute.

Mr. FOSTER. Mr. Speaker, I yield five minutes to the gentleman from Ohio [Mr. GARD].

Mr. GARD. Mr. Speaker, I am in accord with the general principle that legislation should not be embodied as riders upon appropriation bills except it be intimately related thereto, and the subject upon which I desire to give the Members of the House some information is, I think, intimately related to the subject of these appropriations. That is the first part of the bill making in order the question of appropriation for the payment of interest and the principal of the funded debt and for the expenses of the District of Columbia. I first want to say that it is my idea that the language which is carried in the bill providing for the payment of interest and sinking fund of the District of Columbia out of the revenues of the District is not a proper recommendation to this House. The finding of the select committee, which was a unanimous finding of three United States Senators and three Members of this House of Representatives, was to the effect that the inception of this bond legislation, the rulings of all the departments, and indeed the very highest sense of justice between the bondholders, the citizens of the District, and the citizens of the General Government, ought to be to the effect that these bonds, having been issued under a particular law, should be by that particular law paid; and therefore I believe, Mr. Speaker, that this bill should be so amended, and I refer, with the permission of the chairman of the Subcommittee on Appropriations, to line 6 of page 1, where I think the word "and" should be stricken out and the word "except" be incorporated.

Mr. PAGE of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. GARD. Yes.

Mr. PAGE of North Carolina. In order that this matter may be cleared, I want to say to the gentleman, and through him to the committee, that the committee reporting this bill will not only consider that amendment, but has no particular antipathy to the views as expressed by the gentleman from Ohio when we come to take up the bill.

Mr. GARD. It would seem to me that by the striking out of the word "and" and inserting the word "except" this can be made to read:

> That all appropriations for the support of the District of Columbia except the interest on the funded debt of the District shall be paid from the revenues of the District to the extent that the same shall be sufficient therefor, and the remainder out of any money in the Treasury not otherwise appropriated.

And for the information of gentlemen who may desire it, I say this, further. I may say that this provision is carried on page 66 for the payment of interest and the sinking fund on this funded debt, and that can be very easily amended, in line 18, so as to provide for the findings of the select committee, which findings, I believe, are authorized by law.

This funded debt is not a large debt. The city of Washington is indeed unique in not having a large public debt. There remains about $6,000,000, I think, of the debt; and in the ordinary course of events that will be paid off in 1923 or possibly in 1922, and after that time the city of Washington will have no funded debt. The larger part for the consideration of the House will be the question as to how the expenses of the District of Columbia shall be paid. Now, the findings of the select committee, in brief, upon that is that there is not and should not be any arbitrary rule, but that the responsibility of the residents of the District of Columbia should be the payment of a fixed and reasonable amount assessed as proper taxation.

The SPEAKER. The time of the gentleman has expired.

Mr. FOSTER. Will the gentleman use some of his time?

Mr. LENROOT. Mr. Speaker, I yield seven minutes to the gentleman from Massachusetts [Mr. TINKHAM].

Mr. TINKHAM. Mr. Speaker, before protesting against this rule, to which I am much opposed, I desire to ask the honorable Representative from North Carolina, who has charge of the bill, whether he has ever heard of any appropriation bill which carried eight separate and diverse pieces of legislation? I ask him if he has ever heard of an appropriation bill which carried a provision in reference to such an important matter as the fiscal relations between the Federal Government and the District of Columbia; the appointment of trustees to a hospital board; the terms and transfers of prisoners and the power of parole; the price of electric service to be paid by the Government; the creation of a trust fund for money for the great District of Columbia; the taxing of vacant spaces under the streets in the District of Columbia; a law concerning the paving of streets, and an authorization for an agreement between the Commonwealth of Maryland and the District of Columbia in reference to sewers?

Mr. PAGE of North Carolina. Mr. Speaker, the gentleman has addressed a very long series of questions to me. I was going to ask him if he would give me time to answer them, and if he wants me to answer them now or at some later time.

Mr. TINKHAM. Mr. Speaker, the question is extremely simple. I asked the gentleman if he has ever known an appropriation bill in his term of service which has carried so many diverse pieces of legislation, utterly ungermane to the subject of the provisions of the bill and not properly before the Appropriations Committee. The gentleman can say yes or no.

Mr. PAGE of North Carolina. Mr. Speaker, I prefer to make my own answer and not answer as the gentleman tells me. I do not admit, in the first place, his premise that these various items are correlated to the appropriations. On the other hand, more than half of them, in fact a majority of them, are directly related to the appropriations, and I have seen on a number of appropriation bills more legislative provisions not related to the appropriations than are on this bill.

Mr. TINKHAM. Mr. Speaker, in view of the fact that the honorable Representative from North Carolina was not responsive to my last question, I ask him in all courtesy to be responsive to my next question. Was any public hearing given on any of these pieces of legislation, either by the Appropriations Committee or by the subcommittee of the Appropriations Committee? I mean public hearings?

Mr. PAGE of North Carolina. Mr. Speaker, in answer to the gentleman's question, if he will give himself the time to read the hearings before the subcommittee of the Appropriations Committee formulating this bill, he will find that there is a very considerable amount of testimony relating to each of the items contained in this rule. That item does not hold public hearings, but the hearings are as voluminous, possibly, as if they had been public, and the gentleman has access to them.

Mr. TINKHAM. Mr. Speaker, the answer of the honorable gentleman is that there were not any public hearings given.

Mr. PAGE of North Carolina. That is my answer, Mr. Speaker. Will the gentleman yield further?

Mr. TINKHAM. I will.

Mr. PAGE of North Carolina. Will the gentleman allow me to interrogate him? Has the gentleman taken the pains to read the hearings before the subcommittee of the Appropriations Committee having charge of this bill at this session of Congress?

Mr. TINKHAM. Not very closely.

Mr. PAGE of North Carolina. Will the gentleman submit to another interrogation?

Mr. TINKHAM. I will.

Mr. PAGE of North Carolina. Has the gentleman taken the time and the pains to read the testimony given before the select committee sitting last fall and having been commissioned to take testimony in relation to the fiscal relations of the District of Columbia?

Mr. TINKHAM. I have read about 800 pages.

Mr. PAGE of North Carolina. The gentleman has done very well.

Mr. TINKHAM. Now, Mr. Speaker, I want to protest against this rule, first, because it is arbitrary, and that which is arbitrary should not be done in the popular house of a great democracy unless there is great and compelling necessity, and there is no great and compelling necessity for arbitrary action in these matters. Next, I want to protest against this rule because it is unnecessary that it should pass. Every piece of legislation proposed, with two exceptions, and they are of minor importance, are before the Committee on the District of Columbia.

Mr. PAGE of North Carolina. Will the gentleman yield to a further question?

Mr. TINKHAM. I will.

Mr. PAGE of North Carolina. The gentleman, I believe, is a member of the legislative Committee on the District of Columbia?

Mr. TINKHAM. I am.

Mr. PAGE of North Carolina. Has the gentleman used due diligence in having this legislation reported to the House of Representatives and put on the Calendar?

Mr. TINKHAM. I have done everything that is possible, Mr. Speaker.

Mr. PAGE of North Carolina. Has the gentleman introduced any bill on any of these subjects in which he is so much interested?

Mr. TINKHAM. I have not. There was no necessity for my doing so, because the bills were before the Committee on the District of Columbia.

Next, I protest against this rule because you are asking for legislation for the District of Columbia, 350,000 people, American citizens, without any public hearing. The first recommenda-

tion for legislation affects vitally what is the most important part of the charter or organic act of the District of Columbia.

The SPEAKER. The time of the gentleman has expired.

Mr. FOSTER. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. RAINEY].

Mr. LENROOT. I yield to the gentleman from Massachusetts [Mr. TINKHAM] one minute more.

Mr. TINKHAM. I think there is no necessity for it.

Mr. RAINEY. Mr. Speaker, the people of the District of Columbia were given most extensive hearings on this subject in which they are so vitally interested before the joint committee of the House and Senate having this matter in charge for purposes of investigation. We for nearly 60 days' time listened to the representatives of various civic organizations here in the city. We heard everybody who wanted to be heard. Citizens of Washington are not complaining about taxation. They are not insisting that they are assessed too high, and yet under the present assessments they will contribute more for public purposes than ever before—nearly $2,000,000 more.

That contribution will occur during the fiscal year 1917. They will contribute during that year over $8,000,000 for public purposes. Now, if the Government of the United States matched dollar for dollar this year the contributions made by the people of Washington it would make a total of over $16,000,000 to be expended here in this Capital City, over $1,000,000 more than the commissioners submitted estimates for. Now, what other course can be pursued under these circumstances than to abandon the half-and-half system of contributions which has prevailed in the management of District affairs from 1878 down to the present time?

This bill appropriates about as much for the District of Columbia as the last bill appropriated. This bill appropriates $11,631,000 and the last bill appropriated $11,662,000. It is going to cost just as much to run the District of Columbia during the next fiscal year as it has cost during the present fiscal year, except that the people who live here contribute more. Now, that situation of affairs may be reversed under the present system at any time.

Mr. LLOYD. They do not contribute more, in fact. They contribute more in proportion to what the National Government contributes.

Mr. RAINEY. They will contribute over $8,000,000.

Mr. LLOYD. If the United States Government paid one-half the expense, they would still have to pay $8,000,000.

Mr. RAINEY. If the United States should contribute $8,000,000, that would be $16,000,000, and that is $7,000,000 more than needed.

Mr. LLOYD. What I am trying to express is, that the District of Columbia is paying just the same as it would pay if the half-and-half principle were carried out, because the tax is levied, and the amount that is collected under the law at the present time would be paid in taxation.

Mr. RAINEY. Yes; but the fact remains that next year—during the year 1917—the citizens will pay $8,000,000.

Mr. LLOYD. Certainly.

Mr. RAINEY. If the Federal Government contributes as much as they contribute—and they are not complaining any about that—it would make a total of $16,000,000.

Mr. CRISP. Mr. Speaker, will the gentleman yield?

Mr. RAINEY. Yes.

Mr. CRISP. The gentleman from Missouri [Mr. LLOYD], as I understood it, means that the taxpayers will pay under this new plan just what they would pay under the other; that the individual payment of the taxpayer in the District is not increased any. Is not that it?

Mr. LLOYD. Yes. The only people who will benefit by this bill is the General Government.

The SPEAKER. The time of the gentleman from Illinois has expired.

Mr. FOSTER. Mr. Speaker, will the gentleman from Wisconsin [Mr. LENROOT] use some of his time?

Mr. LENROOT. How much time have we remaining on this side, Mr. Speaker?

The SPEAKER. Four minutes.

Mr. LENROOT. I yield that time to the gentleman from Wyoming [Mr. MONDELL].

The SPEAKER. The gentleman from Wyoming is recognized for four minutes.

Mr. MONDELL. Mr. Speaker, the unwisdom and viciousness of legislation upon an appropriation bill is universally recognized. It is prohibited by the rules, and the situation is made no better by the fact that such legislation is made in order by a special rule. As a matter of fact, to the extent that such action inclines Members of the majority to accept the legislation as being approved by their side, it renders the situation even more dangerous, and we are even more likely to legislate unwisely when legislation is thus made in order than we would be otherwise.

As a member of the Committee on Appropriations, it might be assumed that I would be in favor of extending the jurisdiction of the committee in this way. But the practice is vicious, and I am as much opposed to it when it is offered by a committee of which I am a member as when it is offered by any other committee.

Further than that, not only has the Committee on Appropriations assumed the right to legislate, but in a very important matter, to wit, in regard to the half-and-half plan, it has not proposed legislation in harmony with either the letter or the spirit of the findings of the joint committee which the House and Senate appointed for the purpose of investigating these matters.

First, it has proposed legislation contrary to the letter of the recommendation made by the joint committee relating to the funded debt and the interest thereon; and, second, it has proposed legislation not calculated to carry out the recommendation of the joint committee to the effect "that the Congress should pursue a definite policy of regular and liberal appropriations, having in view not only the permanent moral and physical advancement of the city but also its permanent and growing grandeur as a municipal expression of the Nations' home and the people's pride." Who is there on either side of the House who will suggest that the meager appropriations made in this bill for our great Capital City in any way carry out that declaration of our joint committee as to what our legislation should accomplish touching the Capital of the Nation?

Mr. PAGE of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. MONDELL. Yes.

Mr. PAGE of North Carolina. Is there anything to prevent a majority of this House increasing it to any amount?

Mr. MONDELL. There is nothing to prevent the majority, but the gentleman will see to it that there is not a majority favorable to increases. He has, or believes he has, a majority on his side already bound against liberal appropriations, contrary to the recommendations of the joint committee, for which that side is largely responsible. First, the commissioners were influenced to make low estimates, and, second, you have reduced the estimates they have made by two and one-half million dollars.

The SPEAKER. The time of the gentleman from Wyoming has expired.

Mr. FOSTER. Mr. Speaker, I yield to the gentleman from Kentucky [Mr. JOHNSON] the remainder of my time, except one minute.

The SPEAKER. The gentleman from Kentucky is recognized for five minutes.

Mr. JOHNSON of Kentucky. Mr. Speaker, as a general proposition, I am not in favor of "riders" upon appropriation bills. However, I am very much in favor of this amendment, call it "rider," if you please, being placed on this appropriation bill in order to do away with the old half-and-half arrangement.

It has been insisted here by the gentleman from Kansas [Mr. CAMPBELL] and by my good friend from Massachusetts [Mr. TINKHAM] that this matter ought to come from the Committee on the District of Columbia. Those for whom they speak have not heretofore taken this position. During the last Congress when I prepared an amendment similar to this one and got it upon the District appropriation bill those who now proclaim the loudest against this measure going upon the appropriation bill said that the Committee on the District of Columbia was not qualified to determine the matter and that a special committee should be created to consider it.

At last they succeeded in getting the Senate to defeat my amendment which went on the District appropriation bill by which the half-and-half was abolished and themselves put a "rider" on the appropriation bill providing for a special joint committee. That special joint committee, which has gone into this subject, was created, I say, by a "rider" upon an appropriation bill, and it was put there by those who now decry this rider. At this time it is the report of that special committee which is placed upon this appropriation bill, and to that they object and call it a "rider" and unfair.

Every District appropriation bill for years has commenced with language similar to this: "That there is hereby appropriated one-half out of the revenues of the District of Columbia and one-half out of the Federal Treasury such sums as are herein appropriated."

Now, if this amendment is adopted that language will be changed in substance to this: "That hereafter the expenses of the District of Columbia shall be paid from its own revenues if

sufficient, and if not sufficient then the remainder shall be paid from the Federal Treasury."

What can be fairer? The gentleman from Wyoming [Mr. MONDELL] just spoke of the "miserable, meager amount" to be contributed by the United States. That "miserable, meager amount" that he speaks of, if I am correctly advised, amounts to $3,500,000 in this bill.

Mr. MONDELL. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of Kentucky. I do.

Mr. MONDELL. The gentleman misunderstood me. The adjective that I used had reference not to the amount of the national contribution, but to the character of the appropriations made for the District in the bill.

Mr. JOHNSON of Kentucky. Under the present tax rate the District of Columbia is raising about $8,000,000 annually. Regardless of whether or not it is necessary to spend double that amount, it is insisted by some that the United States Government shall still put up $8,000,000 to carry out the half-and-half arrangement. That would make $16,000,000; and even the Commissioners of the District of Columbia do not claim that $16,000,000 are needed. Therefore, why should the United States put up $8,000,000 when nobody claims that amount is needed.

Now, the gentleman from Kansas [Mr. CAMPBELL] and the gentleman from Massachusetts [Mr. TINKHAM] both say that these matters ought to come from the District of Columbia Committee. Is it not a fact that those who represent the District—in other words, the Commissioners of the District of Columbia themselves—have gone before the Appropriations Committee and asked them to include in their appropriations several of the very items against which some of these gentlemen complain of being in this appropriation bill?

To resume, this amendment comes properly before the Appropriations Committee because the Appropriations Committee is endeavoring to carry out the findings of the special committee which was appointed in compliance with a rider on the District of Columbia appropriation bill in the last Congress.

The special joint committee was created by the friends of the half-and-half plan by means of a rider on the District appropriation bill, and they should not now object to the finding of that special committee being enacted into law through the same committee and upon the same bill which created the commission.

It is well for members to constantly bear in mind that no member of the special joint committee, either Senator or Representative, ever cast a vote against the half-and-half, and that it is their report which it is now proposed to put upon the appropriation bill for the District of Columbia.

The SPEAKER. The time of the gentleman has expired.

Mr. FOSTER. I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is——

Mr. MANN. No.

Mr. FOSTER. The understanding was that the matter should go over until to-morrow. I move that the House do now adjourn.

ADJOURNMENT.

The motion of Mr. FOSTER was agreed to; accordingly (at 5 o'clock and 50 minutes p. m.) the House adjourned until to-morrow, Tuesday, May 23, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on reexamination of Buffalo Harbor, N. Y. (H. Doc. No. 1139); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

2. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Leonidas M. Jewett *v.* The United States (H. Doc. No. 1140); to the Committee on War Claims and ordered to be printed.

3. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of H. Walter Nichols *v.* The United States (H. Doc. No. 1141); to the Committee on War Claims and ordered to be printed.

4. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Posey Buckley *v.* The United States (H. Doc. No. 1142); to the Committee on War Claims and ordered to be printed.

5. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Ebenezer Knight *v.* The United States (H. Doc. No. 1143); to the Committee on War Claims and ordered to be printed.

6. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Edward G. Mathey *v.* The United States (H. Doc. No. 1144); to the Committee on War Claims and ordered to be printed.

7. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Theodore L. Minier *v.* The United States (H. Doc. No. 1145); to the Committee on War Claims and ordered to be printed.

8. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Cary W. Moore *v.* The United States (H. Doc. No. 1146); to the Committee on War Claims and ordered to be printed.

9. A letter from the chief clerk of the Court of Claims, transmitting a list of cases referred to the court by the House of Representatives, which cases were dismissed by the court under section 5 of the act of March 4, 1915, commonly known as the Crawford amendment (H. Doc. No. 1147); to the Committee on War Claims and ordered to be printed.

10. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Postmaster General submitting an estimate of deficiency in the appropriation for contingent expenses, Post Office Department, fiscal year ending June 30, 1916 (H. Doc. No. 1148); to the Committee on Appropriations and ordered to be printed.

11. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Postmaster General submitting an estimate of appropriation for publication of the Official Postal Guide for the fiscal year ending June 30, 1917, being additional to the sum provided for by the legislative, executive, and judicial act for the same year (H. Doc. No. 1149); to the Committee on Appropriations and ordered to be printed.

12. A letter from the Secretary of the Treasury, transmitting a communication from the Secretary of Commerce submitting a supplemental estimate of appropriation, "Salaries and wages of officers and crews of lighthouse vessels and lighthouse tenders, including temporary employment when necessary, for the fiscal year ending June 30, 1917 (H. Doc. No. 1150); to the Committee on Appropriations and ordered to be printed.

13. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting urgent estimates of deficiencies required for the service of the War Department in consequence of recent operations upon the border and in Mexico (H. Doc. No. 1151); to the Committee on Appropriations and ordered to be printed.

14. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting supplemental estimates of appropriations covering urgently needed buildings and other construction in connection with the proposed ordnance depot in the Canal Zone (H. Doc. No. 1152); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. DILL, from the Committee on the Public Lands, to which was referred the bill (S. 3928) to accept the cession by the State of Washington of exclusive jurisdiction over the lands embraced within the Mount Rainier National Park, and for other purposes, reported the same without amendment, accompanied by a report (No. 739), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 9619) granting a pension to Eliza J. St. Clair; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 5521) granting a pension to James H. Buckner; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills were introduced and severally referred as follows:

By Mr. BYRNES of South Carolina: A bill (H. R. 15871) authorizing the purchase of a site for a public building at Bamberg, S. C.; to the Committee on Public Buildings and Grounds.

By Mr. DOOLITTLE: A bill (H. R. 15872) to establish a Government bureau to loan money on agricultural lands as security; to the Committee on Banking and Currency.

By Mr. WISE: A bill (H. R. 15873) providing for a site and public building for a post office at Thomaston, Ga.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 15874) providing for a site and public building for a post office at Jackson, Ga.; to the Committee on Public Buildings and Grounds.

By Mr. KONOP: A bill (H. R. 15875) to incorporate the Kee-too-wah Band of Cherokee Indians in Oklahoma, otherwise known as the Night Hawks, into an industrial community for their mutual benefit and protection and the promotion of education, self-government, self-control, and industry among them, and for other purposes; to the Committee on Indian Affairs.

By Mr. KIESS of Pennsylvania: A bill (H. R. 15876) to enlarge and extend the post-office building at Williamsport, Pa.; to the Committee on Public Buildings and Grounds.

By Mr. GLASS: A bill (H. R. 15877) to amend section 6 of an act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes, approved March 14, 1900, as amended by the act of March 2, 1911; to the Committee on Banking and Currency.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. BURKE: A bill (H. R. 15878) granting an increase of pension to Catherine Assenmacher; to the Committee on Invalid Pensions.

By Mr. CARLIN: A bill (H. R. 15879) for the reinstatement of Commander James H. Reid in the United States Navy; to the Committee on Naval Affairs.

Also, a bill (H. R. 15880) granting a pension to Mary E. Sanborn; to the Committee on Pensions.

By Mr. CARY: A bill (H. R. 15881) for the relief of Lloyd D. Pocock; to the Committee on Military Affairs.

By Mr. DILL: A bill (H. R. 15882) granting an increase of pension to Mrs. Mary Eaton; to the Committee on Invalid Pensions.

By Mr. DIXON: A bill (H. R. 15883) granting an increase of pension to George P. Wright; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15884) granting an increase of pension to Rowland Robinson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15885) granting an increase of pension to Frank Niegenargend, alias Frantz Mier; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15886) granting an increase of pension to Wilkerson E. Grubbs; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15887) granting an increase of pension to Jacob Stevens; to the Committee on Pensions.

By Mr. GOOD: A bill (H. R. 15888) granting an increase of pension to Orrel Tucker; to the Committee on Pensions.

Also, a bill (H. R. 15889) granting an increase of pension to Lydia W. Nott; to the Committee on Invalid Pensions.

By Mr. HAMLIN: A bill (H. R. 15890) granting an increase of pension to Louisa Mawhinney; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 15891) granting an increase of pension to John C. Young; to the Committee on Invalid Pensions.

By Mr. HILLIARD: A bill (H. R. 15892) granting an increase of pension to Samuel E. Palmer; to the Committee on Invalid Pensions.

By Mr. HUMPHREY of Washington: A bill (H. R. 15893) granting a pension to Loue Thompson; to the Committee on Pensions.

Also, a bill (H. R. 15894) granting a pension to John F. Mulhall; to the Committee on Pensions.

By Mr. KEARNS: A bill (H. R. 15895) for the relief of the Royal Savings & Loan Co., of Portsmouth, Ohio; to the Committee on Claims.

By Mr. LANGLEY: A bill (H. R. 15896) to correct the military record of Jefferson Mullins; to the Committee on Military Affairs.

Also, a bill (H. R. 15897) to correct the military record of Benjamin F. States; to the Committee on Military Affairs.

By Mr. TAGUE: A bill (H. R. 15898) for the relief of Louis A. Berretta; to the Committee on Claims.

By Mr. MOSS of Indiana: A bill (H. R. 15899) granting an increase of pension to Lemon McGrew; to the Committee on Invalid Pensions.

By Mr. PLATT: A bill (H. R. 15900) for the relief of John Hill; to the Committee on Military Affairs.

By Mr. POWERS: A bill (H. R. 15901) granting an increase of pension to Leo V. Burchetts; to the Committee on Pensions.

Also, a bill (H. R. 15902) to remove the charge of desertion from the military record of Preston B. Stanfill; to the Committee on Military Affairs.

By Mr. QUIN: A bill (H. R. 15903) for the relief of the Bluff City Railway Co., a corporation domiciled and doing business at Natchez, in the State of Mississippi, by requiring the Chief of Engineers to cause an examination to be made into the facts attending a collision between a barge being towed by the tug *Marengo* on the Mississippi River and a wharf house belonging to said Bluff City Railway Co. and situated on the river in front of said city of Natchez, and, subject to the approval of the Secretary of War, to adjust and settle all claims for damages sustained by said Bluff City Railway Co. in a sum not to exceed $5,000, and report same to Congress; to the Committee on the Judiciary.

By Mr. RAKER: A bill (H. R. 15904) for the relief of Thomas A. Winn; to the Committee on the Public Lands.

Also, a bill (H. R. 15905) granting an increase of pension to Daniel Stevenson; to the Committee on Invalid Pensions.

By Mr. RAMSEYER: A bill (H. R. 15906) granting an increase of pension to Harvey Enyart; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15907) granting an increase of pension to James E. Houghland; to the Committee on Invalid Pensions.

By Mr. RAYBURN: A bill (H. R. 15908) for the relief of Ed. D. Steger and J. E. Labatt; to the Committee on War Claims.

By Mr. ROWLAND: A bill (H. R. 15909) granting an increase of pension to Theodore Sinzig; to the Committee on Invalid Pensions.

By Mr. SMITH of Michigan: A bill (H. R. 15910) granting a pension to George M. Woodard; to the Committee on Pensions.

By Mr. VINSON: A bill (H. R. 15911) granting a pension to Victor Lewis; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of the Elizabeth Decherd Woman's Missionary Society, of Mount Air Church, Curryville, Mo., against sale, etc., of liquors in Porto Rico; to the Committee on Insular Affairs.

By Mr. BAILEY: Petition of H. O. Snively, D. T. Ketring, A. D. Schmucker, F. R. Schmucker, H. R. Allender, R. H. Justice, W. W. Woods, W. M. Eicholtz, J. G. Metz, B. E. Marty, Rhule & Acker, H. H. Patterson, and Estep & Flaig, all of Williamsburg, Pa., in favor of a tax on mail-order houses; to the Committee on Ways and Means.

By Mr. CAREW: Memorial of American Union against militarism in re military bill; to the Committee on Military Affairs.

By Mr. DALE of New York: Petition of Bakery and Confectionery Workers' International Union of America, favoring passage of workmen's compensation act in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of Lora C. Little, of Portland, Oreg., and Adelaide Short, of Lowden, Wash., favoring woman suffrage amendment; to the Committee on the Judiciary.

By Mr. DAVIS of Texas: Papers to accompany House bill 14549, granting a pension to John I. Temple; to the Committee on Pensions.

Also, petition of J. O. Cary, Waco, Tex., favoring bill for Federal control of the National Guard; to the Committee on Military Affairs.

By Mr. DYER: Memorial of the National Committee for Mental Hygiene favoring House bill 721, for division of mental hygiene in the United States Public Health Service; to the Committee on Interstate and Foreign Commerce.

Also, petition of Missouri State Dairy Association, relative to dairy conditions in the State of Missouri; to the Committee on Agriculture.

By Mr. EAGAN: Memorial of Gadsden (Ala.) Chamber of Commerce, favoring Shields water-power bill; to the Committee on Rivers and Harbors.

Also, petition of the National Committee for Mental Hygiene, favoring House bill 721, for division of mental hygiene in

United States Public Health Service; to the Committee on Interstate and Foreign Commerce.

By Mr. FITZGERALD: Memorial of Merchants' Association, of New York, favoring the maintenance and proper extension of pneumatic-tube service in connection with the transportation of mail; to the Committee on the Post Office and Post Roads.

Also, memorial of United Brotherhood of Carpenters and Joiners of America of the District Council of Greater New York, urging the prevention of the reduction of wages or depriving workmen of requisites, now employees in the Canal Zone; to the Committee on Insular Affairs.

Also, memorial of Common Council of Nome, Alaska, unreservedly commending the work of the Alaska Road Commission on the peninsula and earnestly urging the Government and the road commission to extend the road so begun with all possible dispatch; to the Committee on Insular Affairs.

Also, memorial of board of governors of India House (Inc.), urging Congress to appropriate sufficient funds to carry out such a program of preparedness, particularly with respect to the defense of our Atlantic, Gulf, and Pacific coasts; to the Committee on Military Affairs.

Also, memorial of men of the Bushwick Avenue Congregational Church, urging Congress to take immediate action that will result in carrying out the recommendations of the General Board of the Army and the General Board of the Navy in the program for adequate defense preparedness of the United States; to the Committee on Military Affairs.

Also, memorial of executive committee of the Society of Chagres, favoring Senate bill 3457 and House bill 8828; to the Committee on Appropriations.

Also, memorial of 11 citizens and others of New York, urging adequate military and naval preparedness of the United States; to the Committee on Military Affairs.

Also, memorial of Central Memorial Committee, Sons of Veterans, of Brooklyn and Long Island Division of New York, approving the adoption by the Congress and the constituted authorities of the United States of such a wise policy of preparedness as shall fully and adequately provide for the effective defense of our country; to the Committee on Military Affairs.

By Mr. GALLIVAN: Memorial of Central Council of Irish County Associations, relative to England's treatment of Irish prisoners; to the Committee on Foreign Affairs.

By Mr. HOLLINGSWORTH: Papers to accompany House bill 15633 to pension Douglas D. Powell; to the Committee on Pensions.

By Mr. HUMPHREY of Washington: Petition of sundry citizens of the State of Washington, against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. IGOE: Memorial of Missouri State Dairy Association, relative to condition of dairies in State of Missouri; to the Committee on Agriculture.

Also, memorial of Medical Society of City Hospital Alumni, St. Louis, Mo., against resolution relative to physicians in Government connected with private health institutions; to the Committee on Interstate and Foreign Commerce.

By Mr. MARTIN: Petition of sundry citizens of the State of Louisiana, favoring bills taxing mail-order houses; to the Committee on Ways and Means.

By Mr. MATTHEWS: Evidence supporting House bill 15791, granting a pension to Herman H. Jahn, alias Herman Martin; to the Committee on Pensions.

By Mr. OAKEY (by request): Memorial of executive board of Woman's Suffrage Association of Connecticut, relative to two women commissioners for Federal censorship of motion pictures; to the Committee on Education.

By Mr. O'SHAUNESSY: Petitions of Christian Rudolph, jr., and Otto Rudolph, of Providence, R. I., in re shipment of hospital supplies by the Red Cross to the central powers; to the Committee on Foreign Affairs.

Also, petition of Louise P. Chance, of Providence, R. I., favoring the Gallinger amendment to the Agricultural appropriation bill; to the Committee on Agriculture.

Also, petition of Phobie L. Cargill, of Providence, R. I., in favor of Senate bill 4874; to the Committee on Education.

By Mr. PATTEN: Memorial of the Merchants' Association of New York, favoring Senate joint resolution 60 and opposing House bill 563 and similar bills; to the Committee on Interstate and Foreign Commerce.

By Mr. PRATT: Petition of Elmira (N. Y.) Local Union, No. 57, of Metal Polishers, Buffers, and Silver Platers, Brass Workers' Union of North America, A. J. Miller, president, and Charles Cordier, recording secretary, favoring inspection of dairy products; to the Committee on Agriculture.

Also, petition of Mrs. Mary E. Parsons, R. A. Parsons, and Samuel E. Blinn, all of Candor, N. Y., opposing the passage of House bills 491 and 6468, to amend the postal laws, and House bill 13048, known as the juvenile-court bill; to the Committee on the Post Office and Post Roads.

By Mr. ROWE: Petition of members of the Holy Name Society of the Church of Our Lady of Victory, Brooklyn, N. Y., favoring bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

Also, petition of the Plattsduetscher Volksfest-Verein, of New York, against war with Germany; to the Committee on Foreign Affairs.

Also, memorial of Chamber of Commerce of the State of New York, against bills to prohibit the Taylor system in Government shops; to the Committee on Labor.

By Mr. SMITH of Michigan: Petition of M. E. Miller and 22 citizens of Diamondale and vicinity, against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. SMITH of Minnesota: Memorial of Trades Assembly of Minneapolis and Hennepin County, Minn., against the Federal reserve bank; to the Committee on Banking and Currency.

By Mr. STINESS: Petition of Robert W. Adams, C. E., of Providence, R. I., favoring passage of the Shields water-power bill; to the Committee on Interstate and Foreign Commerce.

Also, petitions of Rhode Island State Branch of American Federation of Labor and Providence (R. I.) Building Trades Council, favoring House bill 8828, relative to wages, etc., of employees on Panama Canal; to the Committee on Appropriations.

Also, petition of Rhode Island Chiropodists' Society, favoring passage of bill regulating practice of chiropody in the District of Columbia; to the Committee on the District of Columbia.

By Mr. TIMBERLAKE: Petition of citizens of Boulder County, Colo., against Sunday observance bill in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of citizens of Boulder County, Colo., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. TINKHAM: Memorial of Central Council of Irish County Clubs of Massachusetts, denouncing Britain for brutal inhumanity; to the Committee on Foreign Affairs.

SENATE.

TUESDAY, *May 23, 1916.*

(Legislative day of Thursday, May 18, 1916.)

The Senate reassembled at 12 o'clock m., on the expiration of the recess.

The Vice President being absent, the President pro tempore took the chair.

Mr. KENYON. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Iowa suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gallinger	Norris	Smith, Mich.
Bankhead	Hardwick	Oliver	Smoot
Brady	Hitchcock	Overman	Sterling
Brandegee	Husting	Page	Sutherland
Burleigh	Johnson, S. Dak.	Penrose	Taggart
Catron	Kenyon	Pittman	Thomas
Chamberlain	La Follette	Pomerene	Tillman
Chilton	Lane	Ransdell	Townsend
Clapp	Lea, Tenn.	Reed	Vardaman
Clarke, Ark.	Lee, Md.	Saulsbury	Warren
Colt	Martin, Va.	Shafroth	Williams
Curtis	Martine, N. J.	Sheppard	Works
Dillingham	Myers	Sherman	
Fletcher	Nelson	Simmons	

Mr. CHILTON. I wish to announce for the day the absence of my colleague [Mr. GOFF] on account of illness.

The PRESIDING OFFICER (Mr. SHAFROTH in the chair). Fifty-four Senators have responded to their names. There is a quorum present.

Mr. SHEPPARD. Out of order I ask unanimous consent to report two bridge bills from the Committee on Commerce, and I direct the attention of the Senator from Mississippi [Mr. VARDAMAN] and the Senator from Georgia [Mr. HARDWICK] to the bills.

The PRESIDING OFFICER. The Senator from Texas asks unanimous consent to report two bridge bills. Is there objection?

Mr. GALLINGER. Mr. President, I do not object if I may be permitted to introduce a bill which is important.

Mr. CLARKE of Arkansas. I have not any objection to devoting some reasonable time this morning to current business

provided it does not displace the river and harbor bill. With that understanding I have no objection.

Mr. VARDAMAN. There will be no controversy over this bridge bill. It is a bill authorizing the citizens of Pascagoula, Miss., to build a bridge over the Pascagoula River.

Mr. GALLINGER. There is no objection to it.

Mr. VARDAMAN. It is very desirable that action be taken immediately. The department has approved it.

PASCAGOULA RIVER BRIDGE, MISSISSIPPI.

Mr. SHEPPARD. From the Committee on Commerce, to which was referred the bill (S. 6041) granting the consent of Congress to Jackson County, Miss., to construct a bridge across West Pascagoula River at or near Pascagoula, Miss., I report it favorably without amendment, and I submit a report (No. 475) thereon.

Mr. VARDAMAN. I ask for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ST. MARYS RIVER BRIDGE, FLORIDA.

Mr. SHEPPARD. From the Committee on Commerce I report back favorably without amendment the bill (H. R. 14771) granting the consent of Congress to commissioners of Charlton County, Ga., and Nassau County, Fla., to construct a bridge across the St. Marys River, and I submit a report (No. 474) thereon.

Mr. HARDWICK. I ask unanimous consent for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. POMERENE. I introduce a bill.

Mr. SMITH of Michigan. Mr. President, are we proceeding by unanimous consent?

The PRESIDING OFFICER. We are.

Mr. SMITH of Michigan. I object.

Mr. CLARKE of Arkansas. I assume the Senator from Michigan did not hear the announcement made some minutes ago. It is perfectly evident that in consequence of the numerous recesses we have had the volume of current morning business has been accumulating, and I believed it would be in the interest of speeding up the consideration of the river and harbor bill to permit that to be done at one time instead of scattering it through the day. I still think that is a better policy.

Mr. SMITH of Michigan. If it will speed the passage of the bill, I withdraw the objection.

TRAINING OF ORGANIZED MILITIA AND NATIONAL GUARD.

Mr. CHAMBERLAIN. There is one bill to the consideration of which I hope the Senator from Michigan will not object, and that is the bill which passed the House to appropriate $200,000 for training the Organized Militia of any State, Territory, or of the District of Columbia this summer. If it is not passed now, it will be too late to avail the Secretary of War, and, on his request, on reporting it back I shall ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the reception of the report? The Chair hears none.

Mr. CHAMBERLAIN. From the Committee on Military Affairs I report back favorably with amendments the bill (H. R. 15005) to appropriate $200,000 for training the Organized Militia of any State, Territory, or of the District of Columbia, and I submit a report (No. 476) thereon. I ask for unanimous consent for the present consideration of the bill.

There being no objection, the bill was considered as in Committee of the Whole.

The amendments were, on page 1, line 3, after the word "Militia," to insert "or National Guard"; on page 1, line 11, after the word "purposes," to insert "as amended, or as may hereafter be authorized by law"; and on page 2, line 5, after the words "Organized Militia," to insert "or National Guard," so as to make the bill read:

Be it enacted, etc., That for paying the expenses of the Organized Militia or National Guard of any State, Territory, or of the District of Columbia, which may be authorized by the Secretary of War to participate in such encampments as may be established for the field instructions of the troops of the Regular Army, as provided by sections 15 and 21 of the act of January 21, 1903, entitled "An act to promote the efficiency of the militia, and for other purposes," as amended, or as may hereafter be authorized by law, to be immediately available and to remain available until the end of the fiscal year 1917, $200,000 is hereby appropriated: *Provided*, That when it is not practicable to obtain the presence of regular troops for a joint encampment, the funds herein appropriated shall be available for such encampments, maneuvers, and field instruction for the Organized Militia or National Guard as the Secretary of War may prescribe.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "An act to appropriate $200,000 for training the Organized Militia or National Guard of any State, Territory, or of the District of Columbia."

Mr. CHAMBERLAIN. I desire to have the letter of the Secretary of War, which is embodied in the report of the committee, printed in the RECORD in connection with the bill, so that the reasons for its passage may be given.

The PRESIDING OFFICER. The Chair hears no objection, and it is so ordered.

The letter referred to is as follows:

WAR DEPARTMENT,
Washington, May 5, 1916.

Hon. GEORGE E. CHAMBERLAIN,
Chairman Committee on Military Affairs,
United States Senate.

DEAR SIR: I see by the CONGRESSIONAL RECORD of May 4, 1916, page 8490, that H. R. No. 15005, appropriating $200,000 for training the Organized Militia has passed the House, and I request that if possible, endeavor be made to obtain the passage of this bill in the Senate as promptly as possible in order that camps of instruction determined upon for the instruction of troops of the auxiliary arms of the Organized Militia prior to June 30, 1916, may be carried out.

In order to afford the Field Artillery and sanitary troops of the Organized Militia an opportunity to attend camps for field training, it is necessary that the camps shall be established early in June and continue until October. Twenty-two batteries, seven field hospitals, and six ambulance companies must attend before June 30. The camps will be occupied to their full capacity by other organizations after June 30 and until the end of the season in which men can attend. Unless, therefore, the organizations scheduled for the periods prior to June 30 are permitted to go at the times designated, they will be deprived of all field training this year. Nine batteries are composed wholly or in part of students of universities, who can not attend camps except immediately after the end of the college year. In addition to the above it will be necessary to have 22 companies of Coast Artillery attend camp July 2, and preparations must be completed prior to June 30. Before the movements can be ordered, funds must be available for the preliminary preparation of the camps, for ammunition, and for the expenses of the troops. The States have been authorized to have all of the foregoing organizations participate in the camps, and the troops have made plans accordingly.

It was expected by the War Department that the money for which estimates have been submitted for these camps would be appropriated in time to give the States authority for participation. It is now evident that there will be delay in the passage of the appropriation bill for the fiscal year 1917 and if the holding of these camps is prevented now, the effect will be harmful upon the morale and the efficiency of the militia for whom they are intended.

It is therefore requested that in order to insure the training of these organizations the necessary action be taken to assure the prompt passage of H. R. No. 15005 by the Senate to meet such expenditures that must be obligated for the camps prior to June 30, 1916, if these camps are to be held. A memorandum showing how it is contemplated that the $200,000 appropriated by the House bill is to be spent is inclosed for your information.

Very truly, yours,

NEWTON D. BAKER, *Secretary of War.*

ESTATE OF DAVID B. LANDIS.

Mr. OLIVER. On the 5th of January I introduced the bill (S. 2998) for the relief of the estate of David B. Landis, deceased, and the estate of Jacob F. Sheaffer, deceased, and it was referred to the Committee on Claims. It is a matter that involves revenue and it should have gone to the Committee on Finance. I ask that the Committee on Claims be discharged from the further consideration of the bill and that it be referred to the Committee on Finance.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

COMMITTEE ON CIVIL SERVICE AND RETRENCHMENT.

Mr. LEA of Tennessee. From the Committee to Audit and Control the Contingent Expenses of the Senate I report back sundry resolutions, and as the Senators who submitted the resolutions say they are urgent I ask unanimous consent for their present consideration.

The PRESIDING OFFICER. The Chair hears no objection, and the reports will be received.

Mr. LEA of Tennessee, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 199, submitted by Mr. POMERENE on the 20th instant, reported it favorably with an amendment (S. Rept. 477), and the Senate, by unanimous consent, proceeded to consider the resolution.

The amendment was, in lines 3 and 4, to strike out the words "to send for persons, books, and papers," so as to make the resolution read:

Resolved, That the Committee on Civil Service and Retrenchment, or any subcommittee thereof, be, and hereby is, authorized during the Sixty-fourth Congress, to administer oaths, and to employ a stenog-

rapher, at a cost not exceeding $1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before said committee, the expenses thereof to be paid out of the contingent fund of the Senate, and that the committee, or any subcommittee thereof, may sit during the sessions or recess of the Senate.

Mr. SMITH of Michigan. I should like to ask the Senator from Ohio a question. Is it the purpose of the Senator from Ohio to go into the question of the violation of the civil-service law by the present administration? Is the Senator to take up in this investigation the question of the discharge and hiring of employees of the Government in open and flagrant violation of the civil-service rules? If it is to be a mere recapitulation of the virtues of civil-service reform and not of its present practical workings, I shall object.

Mr. POMERENE. Mr. President, I am very sorry the Senator from Michigan is so disturbed.

Mr. CLARKE of Arkansas. It was implied in the agreement that nothing would be considered which would provoke controversy.

Mr. SMITH of Michigan. I object.

Mr. POMERENE. I hope the Senator from Arkansas will permit the resolution to be considered.

Mr. CLARKE of Arkansas. There is a controversy as to whether or not there is objection, and the Senator from Michigan has objected.

Mr. POMERENE. I hope the Senator from Michigan will withdraw his objection after I shall have made a brief statement.

The PRESIDING OFFICER. The Senator from Michigan objects, and the resolution will go to the calendar.

COMMITTEE ON TERRITORIES.

Mr. LEA of Tennessee. I report back favorably with an amendment, from the Committee to Audit and Control the Contingent Expenses of the Senate, Senate resolution 192, submitted by Mr. PITTMAN on the 13th instant, and I ask for its immediate consideration.

The Senate, by unanimous consent, proceeded to consider the resolution.

The amendment was, in lines 3 and 4, to strike out the words "to send for persons, books, and papers," so as to make the resolution read:

Resolved, That the Committee on Territories or any subcommittee thereof be, and hereby is, authorized during the Sixty-fourth Congress to administer oaths and to employ a stenographer, at a cost not exceeding $1 per printed page, to report such hearings as have been had or may be had in connection with any subject which may be pending before said committee, the expenses thereof to be paid out of the contingent fund of the Senate, and that the committee or any subcommittee thereof may sit during the sessions or recess of the Senate.

Mr. SMOOT. I wish to ask the Senator from Tennessee if the Committee on Territories have any idea of sending for persons outside of Washington?

Mr. LEA of Tennessee. There is an amendment striking out that provision.

Mr. SMOOT. That is stricken out?

Mr. LEA of Tennessee. The resolution as amended provides only for the administration of oaths and the holding of hearings.

Mr. SMOOT. There was so much confusion in the Senate I did not hear the amendment stated.

The amendment was agreed to.

The resolution as amended was agreed to.

COMMITTEE ON PUBLIC HEALTH AND NATIONAL QUARANTINE.

Mr. LEA of Tennessee. I ask unanimous consent for the present consideration of Senate resolution 114, being Order of Business No. 388, authorizing the Committee on Public Health and National Quarantine, or any subcommittee thereof, to employ a stenographer and to send for persons, books, and papers, and so forth.

Mr. CLARKE of Arkansas. I can only consent to have matters considered that are of an urgent character. Otherwise we will be put to a disadvantage if the consideration of the river and harbor bill is longer delayed.

Mr. LEA of Tennessee. The Senator from Louisiana [Mr. RANSDELL] requested me to ask for the immediate consideration of the resolution.

Mr. CLARKE of Arkansas. I shall object. I will explain why to the Senator from Louisiana when he comes in.

PETITIONS AND MEMORIALS.

Mr. NELSON presented a petition of Corning Grange, No. 632, Patrons of Husbandry, of Lansing, Minn., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. THOMAS presented a petition of sundry citizens of Fort Collins, Colo., praying that the United States remain at peace, which was referred to the Committee on Foreign Relations.

Mr. SUTHERLAND. I present resolutions adopted at a meeting of the Daughters of the Utah Indian War Veterans, held May 6, 1916, at Salt Lake City, Utah, protesting against the action of the Judiciary Committee of the House of Representatives in failing to report the Susan B. Anthony amendment. I ask that the resolutions be printed in the RECORD.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

SALT LAKE CITY, UTAH, *May 10, 1916.*

Senator GEORGE SUTHERLAND,
Washington, D. C.

DEAR SIR: At a regular meeting of the Daughters of the Utah Indian War Veterans, held May 6, 1916, at Salt Lake City, Utah, the following resolution was passed:

"*Resolved*, That the Daughters of the Utah Indian War Veterans protest against the action of the Judiciary Committee in failing to report the Susan B. Anthony amendment to the House; and

"*Resolved*, That we request immediate action from this committee, and that our Representatives to Congress may be allowed to vote on this measure; and

"*Resolved*, That we request and favor the passage of this measure through Congress; and

"*Resolved further*, That a copy of this resolution be sent to the President of the United States and to all the national administration leaders, with instructions that they be read into the CONGRESSIONAL RECORD."

Miss EMMA E. LINDSEY,
State Regent, Daughters of the Utah Indian War Veterans.
Mrs. LILY CLAYTON WALSTENHOLME,
State First Vice Regent, Daughters of the Utah Indian War Veterans.

Mr. SUTHERLAND. I present resolutions adopted by the envoys of the Congressional Union at Hotel Utah, Salt Lake City, May 11, 1916, which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

Resolution passed at a breakfast given the envoys of the Congressional Union, at the Hotel Utah, Salt Lake City, Utah, May 11, 1916.

Whereas there can be no finer use of political power than to wield it to win freedom for our countrywomen, politically less fortunate than ourselves: Be it

Resolved, That we call upon the administration to put its party strength behind the passage of the Susan B. Anthony Federal suffrage amendment, so that it may be passed on without delay to the State legislatures for their ratification, and that we hold the administration responsible for its passage; be it further

Resolved, That a copy of this resolution be sent the leaders of the administration, the Judiciary Committee of the House of Representatives, and the Utah congressional delegation, with the request that it be read into the CONGRESSIONAL RECORD by Senator SUTHERLAND and Congressman MAY.

MARGARET ZANE W. CHERDRON,
Chairman.

Mr. SUTHERLAND. I present resolutions adopted at the Woman Voters' Conference, assembled in Salt Lake City, Utah, May 11–13, 1916, which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

Whereas the women voters of the United States, now numbering over 4,000,000, desire the immediate enfranchisement of women throughout the Nation; and

Whereas they wish their own voting and citizenship rights guaranteed by the United States Constitution; and

Whereas the Democratic Party is to-day responsible for the passage of the national suffrage amendment through Congress: Be it

Resolved, That we call upon the Democratic Party to pass this national suffrage amendment on to the State legislatures for ratification, and we hereby determine to organize our political strength in support of this measure, for use if necessary, in the next national election without considering the interest of any national political party; and be it further

Resolved, That these resolutions be intrusted by the members of the Woman Voters' Conference assembled in Salt Lake City on May 11 and 12, 1916, to its duly elected representatives of the 12 free States to be presented in person to the President and Congress of the United States.

MARGARET ZANE CHERDRON,
General Chairman Woman Voters' Conference.

Mr. JOHNSON of South Dakota presented a memorial of the trustees of the German Presbyterian Church of Avon, S. Dak., remonstrating against the severance of diplomatic relations between the United States and Germany, which was referred to the Committee on Foreign Relations.

Mr. POINDEXTER presented a petition of Aeneas Lake Grange, No. 423, Patrons of Husbandry, of Tonasket, Wash., praying that the Government take over the sugar industry and sell sugar direct to the consumers, which was referred to the Committee on Agriculture and Forestry.

He also presented a memorial of D. H. Feddersen and sundry other citizens of Freeland, Wash., remonstrating against any change being made in the parcel-post law, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of Puget Sound quarterly meeting of Friends, held at Tacoma, and a petition of Gerhard

Kolligs and sundry other citizens of Port Angeles, Wash., praying that the United States remain at peace, which were referred to the Committee on Foreign Relations.

He also presented a petition of the Commercial Club of Seattle, Wash., praying for the enactment of legislation to protect the halibut industry, which was ordered to lie on the table.

Mr. PHELAN presented a petition of the Vocational Guidance Society, of San Francisco, Cal., praying for Federal aid for vocational education, which was ordered to lie on the table.

He also presented memorials of sundry citizens of Sacramento, Cal., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

He also presented memorials of sundry citizens of Sawtelle, Cal., remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

REPORTS OF COMMITTEE ON CONTINGENT EXPENSES.

Mr. LEA of Tennessee, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 121 authorizing the Secretary of the Senate to pay to Caroline L. Rifenberg, widow of Sherman Rifenberg, late a laborer in heating department of the United States Senate, a sum equal to six months' salary at the rate he was receiving at the date of his death, reported it without amendment.

He also, from the same committee, to which was referred Senate resolution 136, to authorize the Secretary of the Senate to pay Clara M. Curran, widow of John W. Curran, late a laborer of the United States Senate, a sum equal to six months' salary, etc., reported it without amendment.

He also, from the same committee, to which was referred Senate resolution 190, authorizing an additional clerk to the Committee on Public Lands until the end of the present session of the Sixty-fourth Congress, reported it without amendment.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HITCHCOCK:

A bill (S. 6116) providing for the taxation of the lands of the Winnebago Indians and the Omaha Indians in the State of Nebraska; to the Committee on Indian Affairs.

By Mr. MYERS:

A bill (S. 6117) to establish a horse-breeding station in the State of Montana; to the Committee on Agriculture and Forestry.

By Mr. GALLINGER:

A bill (S. 6118) for the national defense and the general welfare, to regulate commerce between the United States and foreign countries, and to restore and maintain American ships in foreign trade; to the Committee on Commerce.

A bill (S. 6119) granting an increase of pension to Horatio P. Abbott (with accompanying papers); to the Committee on Pensions.

By Mr. POMERENE:

A bill (S. 6120) for the relief of the Central Building Loan & Savings Co., Columbus, Ohio; to the Committee on Claims.

A bill (S. 6121) granting a pension to Alma Frambes (with accompanying papers); and

A bill (S. 6122) granting an increase of pension to Henry T. Hertslet (with accompanying papers); to the Committee on Pensions.

By Mr. BANKHEAD:

A bill (S. 6123) for the relief of John D. McNeel, collector of internal revenue, district of Alabama; to the Committee on Claims.

By Mr. THOMAS:

A bill (S. 6124) granting a pension to Matilda J. Wilson; to the Committee on Pensions.

By Mr. TAGGART:

A bill (S. 6125) granting an increase of pension to John S. Kephart;

A bill (S. 6126) granting an increase of pension to Edward Foster;

A bill (S. 6127) granting a pension to Thomas R. Poole;

A bill (S. 6128) granting an increase of pension to David F. Boyer;

A bill (S. 6129) granting an increase of pension to Sarah I. Tammadge; and

A bill (S. 6130) granting a pension to Leo J. Emery; to the Committee on Pensions.

By Mr. JOHNSON of South Dakota:

A bill (S. 6131) granting an increase of pension to Patrick A. Stack (with accompanying papers); and

A bill (S. 6132) granting an increase of pension to John Ferguson (with accompanying papers); to the Committee on Pensions.

By Mr. POINDEXTER:

A bill (S. 6133) authorizing the Secretary of War to grant to John D. Sherwood, of Spokane, Wash., the right to overflow certain lands on the Fort George Wright Military Reservation, at Spokane, Wash., and to accept the conveyance to the United States of other lands to be designated by the Secretary of War and suitable for a rifle range in exchange for the land so overflowed; to the Committee on Military Affairs.

A bill (S. 6134) granting an increase of pension to Stephen O. Meyers (with accompanying papers); and

A bill (S. 6135) granting a pension to Sarah Compton (with accompanying papers); to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 6136) to restore First Lieut. Archibald Grymes Hutchinson, resigned, to the active list of the Army; to the Committee on Military Affairs.

AMENDMENT TO SUNDRY CIVIL BILL.

Mr. MYERS submitted an amendment proposing to appropriate $5,000 for a fish-cultural station at Bozeman, Mont., intended to be proposed by him to the sundry civil appropriation bill (H. R. 15836), which was referred to the Committee on Appropriations and ordered to be printed.

PENSIONS AND INCREASE OF PENSIONS.

Mr. HUGHES submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 4856) entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendments numbered 1, 3, 9, 11, 12, 13, 14, 15, 18, 19.

That the Senate recede from its disagreement to the amendments of the House numbered 5, 7, 8, 10, 16, 17, 20, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 2, and agree to the same with an amendment as follows: In lieu of the amount named insert "$36"; and the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 4, and agree to the same with an amendment as follows: In lieu of the amount named insert "$36"; and the House agree to the same.

That the Senate recede from its disagreement to the amendment of the House numbered 6, and agree to the same with an amendment as follows: In lieu of the amount named insert "$36"; and the House agree to the same.

CHARLES F. JOHNSON,
WILLIAM HUGHES,
REED SMOOT,
Managers on the part of the Senate.

JOE J. RUSSELL,
WILLIAM A. ASHBROOK,
CHARLES E. FULLER,
Managers on the part of the House.

The report was agreed to.

RIVER AND HARBOR APPROPRIATIONS—STATUE OF LIBERTY, NEW YORK HARBOR.

Mr. CLARKE of Arkansas. I offer an amendment to the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, and ask that it be printed and printed in the RECORD and that there also be printed in the RECORD the public document accompanying it.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment proposes to add as an additional section to the bill the following:

SEC. —. That the Secretary of War be, and he is hereby, authorized to accept for and on behalf of the United States, with thanks to the donors, funds raised or to be raised by the New York World by popular subscription for the construction of an electric-lighting plant adequate for the illumination of the Statue of Liberty, on Bedloes Island, New York Harbor, with the understanding that the funds will be applied to

the purpose for which donated and that the lighting plant after construction will be maintained at the expense of the United States.

[House of Representatives, Document No. 496, Sixty-fourth Congress, first session.]

NEW LIGHTING PLANT FOR STATUE OF LIBERTY, NEW YORK HARBOR.

LETTER FROM THE ACTING SECRETARY OF WAR, TRANSMITTING COPY OF A JOINT RESOLUTION AUTHORIZING THE SECRETARY OF WAR TO ACCEPT, ON BEHALF OF THE UNITED STATES, FUNDS FOR THE CONSTRUCTION OF A LIGHTING PLANT FOR THE ILLUMINATION OF THE STATUE OF LIBERTY ON BEDLOES ISLAND.

WAR DEPARTMENT,
Washington, January 3, 1916.

To the SPEAKER OF THE HOUSE OF REPRESENTATIVES:

SIR: I have the honor to inclose herewith, for submission to Congress, copy of a joint resolution authorizing the Secretary of War to accept, on behalf of the United States, funds for the construction of a lighting plant for the illumination of the Statute of Liberty, on Bedloes Island, New York Harbor.

The reasons for this action are set forth in copies of correspondence accompanying.

The plans and specifications in the premises have been retained in the files of the office of the Quartermaster General.

Respectfully,

HENRY BRECKINRIDGE,
Acting Secretary of War.

—

NEW YORK WORLD,
Washington Bureau, October 27, 1915.

Col. ISAAC W. LITTELL,
Quartermaster Corps, Local.

DEAR SIR: Attached you will find detailed plans for the night illumination by electricity of the Statue of Liberty on Bedloes Island, about which a representative of the World talked with you and Capt. Robinson some time ago. At that time you suggested that a proposition be submitted in concrete form, the plans being worked out by an engineer. You will note that the accompanying plans were worked out by Mr. George Williams, of Henry L. Doherty & Co., 60 Wall Street, New York.

In brief, the proposition is that the World by popular subscription raise $20,000 to install the new lighting plant, the Federal Government to appropriate annually thereafter approximately $4,000 for maintenance.

The publishers of the World are anxious to learn whether the proposition as outlined is acceptable to the Government. No steps can be taken toward raising the funds for the initial cost until this question is determined. The World is quite anxious to go ahead with the proposition if it is acceptable, or to receive any suggestions looking to modifications which the Army experts may deem wise.

In general, the plan provides for the illumination of the entire statue, increasing the power of the present light only enough to meet the light thrown on the statue proper. You will recall that our representative discussed the effect of an illumination of the entire statue, making it stand out in bold relief. This character of illumination, Capt. Robinson suggested, would make a beautiful sight without interfering with other aids to navigation.

We would appreciate a report on the acceptability of the proposition at your early convenience.

Respectfully, yours, CHARLES S. ALBERT.

—

DEPARTMENT OF COMMERCE,
LIGHTHOUSE SERVICE, GENERAL DEPOT,
OFFICE OF INSPECTOR, THIRD DISTRICT,
Tompkinsville, N. Y., November 18, 1915.

HEADQUARTERS, EASTERN DEPARTMENT,
OFFICE OF QUARTERMASTER,
Governors Island, N. Y.

SIR: Referring to your letter of November 10, 1915, File No. 619.1, concerning the new lighting plans for the Statue of Liberty.

You are advised that this service has no objections to the installation as described by the plans and specifications received with your letter of November 10, which plans and specifications are herewith returned.

In the absence and by direction of the inspector.

Respectfully,

RAYMOND HASKELL,
Superintendent.

—

WAR DEPARTMENT,
OFFICE OF THE SUPERVISOR OF NEW YORK HARBOR,
ARMY BUILDING, 39 WHITEHALL STREET,
New York City, November 22, 1915.

From: Supervisor of New York Harbor.
To: Chief Quartermaster, Eastern Department, Governors Island, N. Y.
Subject: New lighting plant for Statue of Liberty.
Reference: Q. M. letter No. 619.1 of November 19, 1915.
Inclosure: Plans and specifications for illuminating Statue of Liberty.

1. Replying to reference I do not find any objections to the plant proposed. The matter is not under the cognizance of this office, and I am not prepared to comment on the technical features involved.

ROY C. SMITH,
Captain, United States Navy.

—

Joint resolution authorizing the Secretary of War to accept, on behalf of the United States, funds for the construction of a lighting plant for the illumination of the Statue of Liberty, on Bedloes Island, New York Harbor.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of War be, and he is hereby, authorized to accept for and on behalf of the United States, with thanks to the donors, funds raised or to be raised by the New York World by popular subscription for the construction of an electric-lighting plant, adequate for the illumination of the Statue of Liberty, on Bedloes Island, New York Harbor, with the understanding that the funds will be applied to the purpose for which donated, and that the lighting plant, after construction, will be maintained at the expense of the United States.

—

WAR DEPARTMENT,
OFFICE QUARTERMASTER GENERAL OF THE ARMY,
Washington, November 3, 1915.

From: Quartermaster General.
To: The Adjutant General of the Army.
Subject: New lighting plant for Statue of Liberty, New York Harbor.

1. Herewith are detailed plans for the night illumination by electricity of the Statue of Liberty at Fort Wood, New York Harbor. These plans were submitted to this office by the New York World, of New York City. There is also inclosed a letter from the New York representative of the World, briefly describing the proposition of that paper, which is, that the World shall arrange for the installation of the necessary apparatus for this illumination, while the Government shall provide for its maintenance.

2. It is recommended that this matter be referred to the commanding general, Eastern Department, for his remarks and recommendations. In connection with this case the department commander should ascertain whether the New York Harbor and lighthouse authorities would make any objection to this installation on the grounds of interfering in any way with navigation.

HENRY G. SHARPE,
Acting Quartermaster General,
By I. W. LITTELL,
Colonel, Quartermaster Corps.

—

[First indorsement.]

WAR DEPARTMENT,
ADJUTANT GENERAL'S OFFICE,
November 5, 1915.

To the commanding general, Eastern Department, for action as recommended herein.

By order of the Secretary of War.

W. M. WRIGHT,
Adjutant General.

—

[Second indorsement.]

HEADQUARTERS EASTERN DEPARTMENT,
November 26, 1915.

To THE ADJUTANT GENERAL OF THE ARMY:

1. It is recommended that the inclosed plans for lighting the Statue of Liberty be approved.

2. Attention is invited to inclosed letters from the Department of Commerce, Lighthouse Service, and Supervisor of New York Harbor.

LEONARD WOOD,
Major General, Commanding.

—

[Third indorsement.]

ADJUTANT GENERAL'S OFFICE,
November 30, 1915.

To the Quartermaster General.

—

[Fourth indorsement.]

OFFICE QUARTERMASTER GENERAL,
December 1, 1915.

To THE ADJUTANT GENERAL OF THE ARMY:

1. Returned. It would seem proper to present the project covered in these papers to the Judge Advocate General of the Army for an expression of opinion by him as to the acceptance of the proposed donation from the New York World, especially with reference to representing the matter to Congress for acceptance and future maintenance, and such action is recommended.

C. A. DEVOL,
Acting Quartermaster General.
By I. W. LITTELL,
Colonel, Quartermaster Corps.

—

[Fifth Indorsement.]

WAR DEPARTMENT,
ADJUTANT GENERAL'S OFFICE,
December 2, 1915.

To the Judge Advocate General, for an expression of opinion as recommended in the preceding indorsement hereon. The return of these papers is desired.

By order of the Secretary of War.

G. W. READ,
Adjutant General.

—

[Sixth indorsement.]

WAR DEPARTMENT,
JUDGE ADVOCATE GENERAL'S OFFICE,
December 7, 1915.

To THE ADJUTANT GENERAL:

1. The views of this office are desired with reference to the acceptance of the proposed donation by popular subscription to be raised by the New York World of a new lighting plant, to cost about $20,000, for the "illumination by electricity of the Statue of Liberty on Bedloes Island," the purpose being to add to the present lighting plant so as to provide "for the illumination of the entire statue." The offer is made on the understanding that the Federal Government will maintain the lighting plant at an annual expense of about $4,000.

2. In opinions of this office dated November 17, 1911, respecting the authority of the War Department to accept the donation of six horses from a private owner, and of November 22, 1911, upon an offer of the county commissioners of Galveston County, Tex., to donate shell to join the brick roads along the east wall at Fort Crockett, Tex., by two loops around the batteries, it was held that in the absence of restriction imposed by law, such as are imposed with respect to the acceptance of land or of voluntary services, there would be no legal objection to the acceptance of the proposed donations, the view being that where the donations are not accompanied by any burden upon the United States the acceptance by the proper executive officers would not be illegal (Dig. Op., J. A. G., 910–G). In the present case, the acceptance of the proposed donation would include an undertaking in the part of the Government to assume the maintenance of the new lighting plant at an annual expense of about $4,000, and I am clearly of opinion that

the proposed donation, to be made with the understanding that the Government shall assume this increased burden, can not legally be accepted without authority of Congress.

E. H. CROWDER,
Judge Advocate General.

[Seventh indorsement.]

WAR DEPARTMENT,
ADJUTANT GENERAL'S OFFICE,
December 9, 1915.

Through the Judge Advocate General, to the Quartermaster General, the preceding indorsement hereon being approved by the Secretary of War.

W. M. WRIGHT,
Adjutant General.

[Eighth indorsement.]

WAR DEPARTMENT,
JUDGE ADVOCATE GENERAL'S OFFICE,
December 10, 1915.

To the Quartermaster General, noted.

[Ninth indorsement.]

OFFICE QUARTERMASTER GENERAL,
December 13, 1915.

TO THE ADJUTANT GENERAL OF THE ARMY:

1. Returned. Sixth indorsement of the Judge Advocate General, page 4 hereon, in which he gives his opinion that the donation of a lighting plant for the Statue of Liberty in New York Harbor can not legally be accepted without the authority of Congress, has been noted.

2. Attention is invited to paragraph 3 of the letter of the New York World, dated October 27 1915, in which it is stated that the publishers are anxious to learn whether the proposition as outlined is acceptable to the Government, as they desire to go ahead in the matter of raising funds therefor. The question of acceptability appears to have been determined favorably in the second indorsement, page 2, with its inclosures.

3. It is, therefore, recommended that the New York World be informed that the installation they propose is acceptable to the Government but that the authority of Congress is necessary before it can be accepted and they may take the necessary measures for introducing a bill in Congress for this purpose, or, if considered more desirable by the Secretary of War, a bill may be drafted by the Judge Advocate General and duly submitted, the New York World being informed of such action being taken by the War Department.

HENRY G. SHARPE,
Acting Quartermaster General.
By I. W. LITTELL,
Colonel, Qaurtermaster Corps.

[Tenth indorsement.]

WAR DEPARTMENT,
ADJUTANT GENERAL'S OFFICE,
December 22, 1915.

Through the Quartermaster General, to the Judge Advocate General, inviting attention the preceding indorsement hereon, with request that the Judge Advocate General draft the necessary bill for presentation to Congress covering this matter.

It is desired that the Quartermaster General advise the New York World accordingly.

By order of the Secretary of War:

W. M. WRIGHT,
Adjutant General.

[Eleventh indorsement.]

OFFICE QUARTERMASTER GENERAL,
December 22, 1915.

To the JUDGE ADVOCATE GENERAL OF THE ARMY:

1. Forwarded, inviting attention to the ninth and tenth indorsements hereon, pages 5 and 6, and to the request contained in the latter indorsement that your office draft the necessary bill for presentation to Congress covering the donation by the New York World of a lighting plant for the Statue of Liberty in New York Harbor.

2. This office has advised the above newspaper of the proposed action in submitting the matter to Congress.

HENRY G. SHARPE,
Acting Quartermaster General.
By I. W. LITTELL,
Colonel, Quartermaster Corps.

[Twelfth indorsement.]

WAR DEPARTMENT,
JUDGE ADVOCATE GENERAL'S OFFICE,
December 23, 1915.

TO THE ADJUTANT GENERAL:

1. Returned, inclosing draft of a joint resolution for "authorizing the Secretary of War to accept, for the United States, funds for the construction of a lighting plant for the illumination of the Statue of Liberty, on Bedices Island, New York Harbor." It is believed that the draft submitted will be sufficient for the purpose in view.

W. A. BETHEL,
Acting Judge Advocate General.

[Thirteenth indorsement.]

WAR DEPARTMENT,
ADJUTANT GENERAL'S OFFICE,
December 29, 1915.

To the Quartermaster General, for preparation of draft of letters for the signature of the Secretary of War presenting this matter to Congress for its consideration.

By order of the Secretary of War.

W. M. WRIGHT,
Assistant Adjutant General.

RIVER AND HARBOR APPROPRIATIONS.

Mr. CLARKE of Arkansas. I move that the Senate proceed to the consideration of House bill 12193.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The PRESIDING OFFICER. The pending amendment will be stated.

The SECRETARY. On page 35 in the item relative to the Mississippi River from the mouth of the Missouri River to Minneapolis, Minn., continuing improvement and for maintenance, the committee proposes in line 12 to strike out "$1,200,000" and to insert in lieu "$1,500,000."

Mr. NELSON. Mr. President, it was not my purpose to have taken up the time of the Senate in discussing any part of this river and harbor bill; but, in view of some remarks that were made last evening in reference to this amendment, I ask the indulgence of the Senate for a few minutes.

The amendment relates to that reach of the Mississippi River extending from the mouth of the Missouri River to Minneapolis, a distance of some 660 miles. The present project for the improvement of that river was adopted by Congress by the act of March 2, 1907, and it contemplated the improvement of the river by removing sand bars and improvement at rapids and by wing dams and other works in order to promote the navigation of the river.

The river before that was in normal times of only about 4 feet depth; in some places hardly that. The present project contemplates the improvement of the river so as to make it navigable at a low-water depth of 6 feet. A large share of the work has gone on under the river and harbor act of June 25, 1910, and provision was made in connection with the improvement with a view of completing it within 12 years.

It is estimated that the whole project would cost upward of $20,000,000; and on the basis of completing it in 12 years, it would have involved an appropriation of something over a million and a half dollars a year. The last regular annual appropriation made for this work was in 1913, when we had a full river and harbor bill, and it amounted to a million and a half dollars—exactly the same as the appropriation contained in this bill.

The engineers recommend in reference to this improvement an expenditure of $1,900,000. When the bill was before the committee I, in the first instance, asked the committee to allow the entire recommendation of the engineers and to make the appropriation $1,900,000. The committee agreed to that; but afterwards, for the purpose of framing the bill as economically and as reasonably as possible, I consented to a reduction of that sum to $1,500,000; in other words, to a reduction of $400,000 below the estimates of the Government engineers.

I may as well read at this point from the Report of the Chief of Engineers what is stated regarding this project:

> Present project: The present project was adopted by Congress in the river and harbor act of March 2, 1907, and is given in full with detailed estimate in House Document No. 341, Fifty-ninth Congress, second session. This project provides for obtaining a channel depth of 6 feet, with width varying from 300 feet at St. Paul to 1,400 feet between the Illinois and Missouri Rivers; the channel to be obtained by means of contraction works consisting of wing or spur dams for narrowing the main channel of the river and closing dams for closing side chutes, by rock excavation and by auxiliary dredging and repairs to work constructed under previous projects; the Rock Island Rapids to be surmounted by two locks, each having a length of 350 feet between miter sills, 80 feet clear width, and a depth of 6 feet on the miter sills at low water. The additional work contemplated at the Des Moines Rapids Canal, as also the improvement of the river from Montrose to Burlington, Iowa, about 31 miles, has been made unnecessary by the dam of the Mississippi River Power Co. at Keokuk, Iowa. The upper limit of the project named in House Document No. 341, Fifty-ninth Congress, second session, was the Omaha Bridge at St Paul, but by the river and harbor act of March 2, 1907, which adopted the project the upper limit was fixed at Minneapolis. Estimated cost for completing the project is $20,000,000, with $300,000 per annum for maintenance after completion. The river and harbor act of June 25, 1910, made an appropriation for this improvement "with a view to completing said improvement within a period of 12 years."

The commerce on this river, like the commerce on all of our rivers, has not been extensive, but I think I may truthfully say that the commerce on this reach of the river has been about as great as it has been on the lower reaches of the river. As a matter of fact, it has been slightly on the increase. We have been handicapped by the fact that most of our transcontinental railroads run from east to west and there has been a purpose to divert the traffic of the Northwest from going down to the Gulf and to bring it over to the Atlantic seaboard. We are now very much interested in the navigation of this river be-

cause of the opening of the Panama Canal. We hope we will be able to send our commerce from the upper Mississippi down the length of that river and by water either to Europe or to the Central American or to the South American States, through the Panama Canal.

I wish to quote further from the last report of the Chief of Engineers. After describing the improvement which has been carried on—and I will not weary the patience of the Senate by quoting the description in detail—the report adds:

Effect of improvement: The usual reduction in freight rates due to water competition is experienced, but comparatively little benefit is expected until transfer and terminal facilities are provided at the various cities, plans for which, in some cases, are now being carried out. Some increase in commercial water-borne freight is noted.

I wish also to call attention to the commercial statistics. In 1912 the value of the commerce was $26,677,651, in 1913 it was $32,705,137, and in 1914 it was $41,324,041. While the tonnage in 1914 diminished because the Government failed to do the usual river and harbor work and failed to carry the amount of supplies usually carried in river and harbor improvements, yet a footnote to these figures states:

NOTE.—The loss in total tonnage of 1914 as compared with 1913 is due to the decrease in United States material on account of a short season and the abandonment of the sand and gravel plant at Hannibal. From this latter cause the commercial tonnage fell off 250,000 tons, but in other commodities increased over 50,000 tons.

For the information of the Senate I submit and call attention to this comparative statement:

Comparative statement.

Calendar year—	Total.	Commercial.	United States material.	Valuation.
	Short tons.	*Short tons.*	*Short tons.*	
1912	1,830,294	1,358,983	471,311	$26,677,651
1913	2,145,315	1,372,923	772,392	32,705,137
1914	1,426,970	1,145,785	281,185	41,324,041

The engineers make this further statement:

Amount that can be profitably expended in fiscal year ending June 30, 1917, for works of improvement and for maintenance, $1,900,000.

While a good deal of money has been spent on this reach of the river from first to last, I find by looking over the reports of the Department of Commerce that a great deal of it has been spent in the lower reaches of this portion of the river in so-called harbor improvements. I find various cities in Iowa, in Illinois, and all along up to the borders of Minnesota have from time to time had extensive improvements made to their harbors, as they are called, but they were really made to afford facilities of access to steamboats and to prevent the caving of the banks, and in some instances appropriations have been made for levees to prevent the overflow of the lowlands along the river. I am not finding fault with these appropriations, but I point them out to show that they have swollen the aggregate amount that has been appropriated for the river.

Years ago there was a good deal of commerce on this river, and there is still considerable commerce on it. Now, with the construction of the Panama Canal, we hope that the commerce will increase by great bounds. There has been difficulty in securing the proper kind of boats for the commerce of the Mississippi River. The wholesale merchants of St. Paul and Minneapolis are now engaged in securing boats of the same character as those which have been adopted in the State of Alabama and in other places, under the leadership of a gentleman by the name of Bernhard. They hope, when they get those boats of a peculiar kind, that they will be able to divert a great deal of the freight and commerce down the course of the Mississippi River.

The soft coal of Iowa and Illinois ought to come up the Mississippi River, and our wheat for foreign shipment ought to go down the Mississippi River, for both of those commodities are a species of freight which is heavy and coarse and which can hardly bear expensive railroad transportation. Cheap water transportation will be much more beneficial.

Mr. President, as I said a moment ago, I do not know of any rivers in this country that have been improved where there is, in proportion to distance and everything else, as much commerce as there is on this stretch of the Mississippi River. The statistics which I have before me do not show the amount of the traffic for the year 1915, they only give the traffic for the year 1914; but I am informed by the Boards of Trade of Minneapolis and St. Paul that that commerce has been increasing and that it was much greater in 1915 than it was in 1914. I have not, however, the exact statistics at hand, nor are they now available.

As I have stated, this amendment proposes to increase the appropriation of the other House by $300,000, which is $400,000 less than the Government engineers have recommended for this improvement.

I am unwilling to take up the time of the Senate further in this matter. There is much more, however, which might well be said in favor of the proposition. I have, I think, however, said enough to convince the Senate of the absolute justification for this proposed increase.

Mr. TAGGART. Mr. President, in a general way I am in favor of improving the rivers and harbors of our Nation; particularly am I in favor of improving the rivers on which we have a real and substantial commerce, such as the Mississippi and its tributaries, the Ohio and the Missouri, and I am equally in favor of improving all of our main harbors where vessels of deep draft load and unload their commerce; indeed, as I look at it, our large harbors need improvement much more than do our small rivers. While I am in favor of going this far, I am unalterably opposed to the improvement of every little creek, bay, inlet, sound, and river at the expense of the United States Treasury.

From my viewpoint, I believe that every dollar of the public's money expended in river and harbor projects should give to the people 100 cents on the dollar in return, and it can only return to the people value received by giving cheap transportation rates.

Mr. President, I have read the bill under consideration, together with the majority and minority reports. When this bill left the House it carried an appropriation of $39,770,760. As reported to the Senate by the Committee on Commerce it carried an appropriation of $40,899,935. With the bill in its present shape I do not see how I can give it my support. I do not consider it my duty to vote for every measure that is presented to the Senate. I conceive it to be my duty to vote only for those measures which, when enacted into law, will give to the people benefits at least equal to the cost of procuring such benefits. This bill has many worthy projects in it which commend themselves to me, but it has many items which do not.

It is generally understood that water transportation, for various reasons, has rapidly declined in the past quarter of a century, and this notwithstanding the fact that we have expended upon our rivers and harbors in the United States more than $800,000,000. I will not stop at this time to inquire as to the reason of the decline of river transportation. Certainly it has not been due to a lack of appropriations made by Congress for their improvement. If under an expenditure of over $800,000,000 river transportation has rapidly declined, will any Senator contend for a moment that if during the same period of time the Government had expended double the amount it has already expended on improvements our rivers would to-day be carrying a single ton of freight more than they are now carrying? Having tried the experiment of generously appropriating for the improvement of rivers with a view of reclaiming freight traffic thereon, and with facts demonstrating to a certainty that this system is a failure, is it not time for Congress to call a halt in this lavish expenditure of money?

As above stated, I am in favor of improving the great water thoroughfares of our Nation, the natural arteries of river commerce, together with such other rivers as can fairly and definitely be shown to have in sight an actual tangible commerce.

I read in the bill an item relating to the Tombigbee River:

For maintenance of improvement from the mouth to Demopolis, $25,000; and from Demopolis, Ala., to Walkers Bridge, Miss., $10,000; in all $35,000.

The honorable Mr. FREAR, a Member of the House, says, in speaking of the expenditures for the improvement of this river, that—

The Government has expended $9,901,295. The total cost of the improvement and betterment of this river has been about $12,000,000.

During the year 56,000 tons of commerce was averaged at the 17 locks on this river, at a cost of about $12 per ton; and in his statement he says 95 per cent of this was coal, stone, and floatable timber.

I also find in the bill the following item:

Arkansas River, Ark. and Okla.: For maintenance of improvement * * * $234,700.

Over $3,500,000 has been expended on this river, and the actual commerce in 1913, including floatable timber and sand, amounted to less than 10,000 tons. The Government engineers recommended its abandonment in 1915. This appropriation for an utterly useless project, condemned by the Army engineers, seems to me to be absolutely indefensible.

I also find in the bill the item "Red River, Ark. and Tex." The bill as it left the House contained the following language:

Continuing improvement and for maintenance between Fulton, Ark., and Washita River, Tex., $25,000.

This item has been amended by including the "repair of levees destroyed by overflows in 1915 and 1916" and increasing the appropriation from $25,000 to $50,000. In 1913, after deducting the floatable timber, the tonnage on the river was 16,094 tons, and the Government has heretofore expended $3,000,000 in appropriations on this river. It is estimated that the commerce on the river costs the Government $80 to $100 per ton, counting interest on the investment and maintenance charges.

Mr. President, I could go through this bill and the various reports and select many items on a parity with those I have mentioned. I do not believe the people who pay the taxes would approve of appropriating money for these purposes if they knew it. They would hold Congress responsible for this reckless extravagance. I do not believe in taxing the people to improve rivers and harbors where the cost of hauling the freight in many cases ranges from $11 to $80 per ton. It seems to me absurd, almost unbelievable; yet these are the facts, undenied and undisputed. River transportation can not compete with railroad transportation when the average cost of railway transportation is only about 7 mills per ton per mile. To undertake to tax the people to hold up a losing and discredited system of transportation is undemocratic and unbusinesslike.

Mr. President, I thoroughly agree with the distinguished Senator from South Carolina [Mr. TILLMAN], who on last Saturday said that to pass this bill in its present shape is little less than criminal. When money is needed for so many more necessary projects, particularly to place our Nation in a condition of preparedness, in my judgment it is wrong to spend the money for these unmeritorious projects.

Mr. President, we should not deceive ourselves. Let us look the situation squarely in the face. We are going to have a hard time to raise the money to meet the additional necessary burdens imposed upon us by conditions not of our own choosing. Although a new Member of this body, I refuse to send or be a party to sending the Treasury of the United States to the "scrap heap" so that every little river from Raccoon Creek, N. J., to Kissimmee River, Fla., shall be improved; and unless a large number of these seemingly useless items are eliminated from this bill I shall be compelled to vote against it.

Mr. President, I do not like to oppose this measure, but looking at this bill as it now stands, as a business proposition, I can not see my way clear to support it, and I do not believe that the taxpayers who live in my own State expect me to stand here and vote for every measure reported by any committee unless I believe that the things represented in the measure will redound to the benefit of all the people in general. Mr. President, I hope that this bill will be amended in such a manner that at least a saving can be made of $15,000,000 or $20,000,000 to help defray some of the necessary expenses to which the Government will be put in the near future.

Mr. RANSDELL. Mr. President, I heard yesterday evening what seemed to me to be a remarkable statement made by the Senator from Utah [Mr. SMOOT], which I can not allow to pass without at least a little explanation. He said there was no commerce for the boats which pass down the Mississippi River to bring back with them to the North and West; that while boats might get freight downstream they could not get cargoes upstream. The Senator surely did not give the question very serious consideration before making that statement.

The States of Arkansas, Louisiana, and Mississippi, which border that stream, produce an immense amount of lumber and cotton. Lumber is a low-class heavy article, which is peculiarly adaptable to transportation by boat. Louisiana is the second lumber-producing State in the Union. It also produces quantities of sugar, rice, molasses, and articles of that kind, which are sold in the North and West and which furnish admirable cargoes for boats. They are all heavy, low-class commodities. There is also in process of development a very large business between the Tropics and the city of New Orleans, and that business might well be carried by boat.

I shall not take the time of the Senate to go into an elaborate discussion of the matter, but I wish to remind this body that within the last few weeks a boat line has been started between the city of St. Louis and the city of New Orleans. I have before me a letter from the manager of that boat line, Mr. J. H. Bernhard, president of the Inland Navigation Co., from which I should like to read a very brief extract. The letter is dated May 8 and is addressed to Mr. S. A. Thompson, secretary-treasurer of the National Rivers and Harbors Congress, of this city. It says:

Inco No. 1 has proved a complete success so far, and has been so much faster than anticipated that we have changed our schedule and now accept freight at the municipal dock at St. Louis on Saturday, leaving St. Louis at 5 p. m., delivering it at Memphis the following Monday morning and at New Orleans the following Wednesday evening. In this manner we give a faster service than rail for less money—

I hope some of the Senators who have been talking so much about railroads will listen to this statement—

We give a faster service than rail for less money. We handle almost exclusively first-class freight alone.

I hope they will pay attention to that statement. They have been saying we can not carry anything but heavy, low-class commodities. Listen now to what he has been carrying on that boat:

For instance, on its next downward trip, May 13, the barge will carry a carload of roofing material, 30 tons of paper bags, 1 carload of tinware, a carload of wrapping paper, a carload of tin plate, 45 tons of glucose, 3 carloads of oxygen gas, 2 carloads of porcelain insulators, 1 carload of filter iron, 2 carloads of building paper, 2 carloads of linoleum, 8 tons of shoes, 1 carload of furniture, 2 carloads of asphalt shingles, 1 carload of soap, 3 carloads of automobiles, 2 carloads of bottles, 1 carload of washboards, 100 bales of cotton, 2 carloads of plug tobacco, 1 carload of heaters, 1 carload of prepared mustard—

Nearly all high-grade articles.

On the upstream trip—

This is a trip from New Orleans north—from that section where the Senator from Utah said we had no commerce.

On the upstream trip we carried sugar, molasses, coffee, glassware, olive oil, wine, cigars, 12 tons of Panama hats, scrap tin, and rice.

Mr. President, I will ask permission to put into the RECORD letters which I have received from this gentleman and to which I shall refer later.

The PRESIDING OFFICER. If there is no objection, the request of the Senator from Louisiana will be granted.

The matter referred to is as follows:

NEW ORLEANS, *April 27, 1916.*

Mr. THOMPSON,
Rivers and Harbors Congress, Washington, D. C.

DEAR SIR: The barge *Inco No. 1* is now about to depart on her upstream trip to St. Louis, after having made a remarkably successful downstream trip to New Orleans carrying a full cargo.

In this connection I would like to call your attention to the attitude of several of the railroads.

All during the time the barge was lying at St. Louis being loaded, the Illinois Central and Louisville & Nashville Railroads particularly had men on the dock checking every ton of freight put on the barge. They even went so far as to stop the drays and ask the teamsters to show their dray tickets, acting as though they were employees of the Inland Navigation Co.

The same railroads were conspicuous for similar actions while the barge has been in New Orleans, the same course having been pursued here.

I thought this information would be of value to you, and I would like to know what could be done to assist us in overcoming this unfair competition. We have already lost four customers, whose loss I charge against the railroads having influenced them to stay away from the Inland Navigation Co.

Very truly, yours,

INLAND NAVIGATION CO. (INC.),
JOHN H. BERNHARD, *President*

—

MAY 11, 1916.

Senator JOS. E. RANSDELL,
Washington, D. C.:

Barge lying at St. Louis now being loaded. John Hays, of Louisville & Nashville, and James Reardon, of Illinois Central Railroads, are again checking carefully all freight received. Can not you assist me in breaking this unfair competition?

JOHN H. BERNHARD,
President Inland Navigation Co.

—

MAY 12, 1916.

Senator JOS. E. RANSDELL,
Washington, D. C.:

Notwithstanding my past attempts to get presidents of Illinois Central and Louisville & Nashville Railroads to stop unfair competition practiced by their agents, not the slightest change is noticed. Yesterday being harassed by their representatives, I wired Markham and Smith, presidents of above railroads, to call off their men without any result, since to-day men are again on ground.

JOHN H. BERNHARD,
President Inland Navigation Co.

—

MAY 13, 1916.

Senator JOS. E. RANSDELL,
Rivers and Harbors Congress, Washington, D. C.:

Interference of Louisville & Nashville and Illinois Central Railroads is increasing. To-day their men are jumping on drays, getting teamsters to give complete details, as if they were employees of this company. Yesterday I telephoned F. H. Law, assistant general freight agent of the Illinois Central, who admitted he had received word from office of their president that my letter was received. His continuing said malpractice is proof to me that it has sanction of Illinois Central Railroad. However, Law promised yesterday to discontinue this practice. Notwithstanding this, men are to-day on the ground. I further communicated with local representatives of Louisville & Nashville Railroad, who admitted he had received word from President Smith regarding my letter,

and stated that he would continue this practice as long as it suited him. Will you, as president of Rivers and Harbors Congress, assist me if I take matters in my own hands and use force to stop this unfair competition of rail against water and archaic cutthroat methods?

JOHN H. BERNHARD,
President Inland Navigation Co.

—

ST. LOUIS, MO., *May 11, 1916.*

Senator JOSEPH E. RANSDELL,
Rivers and Harbors Congress, Washington, D. C.

DEAR SIR: I have wired you to-day as follows:

"Barge lying at St. Louis now being loaded. John Hays, of Louisville & Nashville Railroad, and James Reardon, of Illinois Central Railroad, are again checking carefully all freight received. Can not you assist me in breaking this unfair competition?"

This on account of your previous wire, asking whether I would see any objection to having the data contained in my letter of April 27 to Mr. S. A. Thompson used by you on the floor of the Senate.

In reply to this I will gladly say that it would be very much appreciated by me if you would do so.

The barge having arrived at St. Louis and lying at the dock loading and unloading, we are to-day favored again by the continuous presence of two railroad men—one from the Illinois Central and one from the Louisville & Nashville—namely, James Reardon and John Hays.

It seems there should be some protection in the United States against such unfair competition. Why water transportion should be open to any attack a railroad feels willing to make upon it is beyond my comprehension. Should the Standard Oil Co. follow such practices with its competitors a big howl would go up of unfair competition. All the same, thanks to effective press publications, the railroads are now looked upon by the public as being overlegislated, when the reverse is true.

I have given instructions to have the facts contained in my letter of the 27th ultimo and in this letter put in the form of an affidavit, to be properly sworn to and sent to you; and I beg of you all the cooperation you can give me to stop this archaic, cutthroat business.

Very truly, yours,

INLAND NAVIGATION CO. (INC.),
JOHN H. BERNHARD, *President.*

—

MAY 13, 1916.

Mr. F. B. BOWES,
Vice President Illinois Central Railroad Co.,
Chicago, Ill.

DEAR SIR: I have your letter of the 12th, in which you state that as long as you interfere in an orderly way with our business there should be no cause for complaint on our side.

This looks to me very much like the attitude of a man who spits across a lady's face for a couple of hours but never hits her and always spits in a spittoon, and claims as long as he does this in an orderly way she should not object. I trust you will pardon my comely comparison, but I can not offhand think of anything better. It would be anybody's perfect right to move his hands in the air as much as he pleased as long as he did it in an orderly way, but if some one persisted, while you and your wife were dining out, in moving his hand up and down just a few inches in front of your nose as if he were catching flies I wonder how long it would take you to get rid of this nuisance.

Is the valley not large enough and is there not enough freight for the Illinois Central Railroad that it is forced to spend its money in keeping track of all the freight that is moved via the Inland Navigation Co.? Is not the attitude of your railroad very much like that of the big child who has been crying to its parents (Congress) that it is overpunished (overlegislated), and no sooner is a baby brother born to it than it snatches away or attempts to snatch away its milk bottle?

Up until now you have had a man at New Orleans and St. Louis checking all freight going to and from the barge of the Inland Navigation Co. These men have not hesitated, weeks after I wrote to the president of your road and complained about it, to stop teamsters bringing freight to our barge and, acting as employees of the Inland Navigation Co., ask them to show their dray tickets.

It is very evident from facts in the case that these circumstances are thoroughly known to the highest officials of the Illinois Central Railroad, and apparently meet with their approval. It surprises me to have you fearlessly state that your traffic department only expects to get information of its competitors' business in an orderly way. My idea of fair business is to get it on the merits of my own work, not by watching my competitor. That is unfair in principle alone and not in line with upright business methods—certainly not modern methods—that the railroads will be forced to accept until the public is willing to believe they are overlegislated.

I can not appreciate, as you state, that a large railroad like yours must have some system and organization to keep posted as to what your competitors are doing. That is not what your words imply. I, too, read technical papers and traffic papers to keep posted and abreast with the world, but I hope I will never be responsible for having a man check carefully what business my competitor does. It reminds me too much of the scavenging hyena. It is not my style of doing business, and I sincerely hope the Illinois Central Railroad will at least recognize the wisdom of letting my company alone.

If this letter should in any way impress you as unduly harsh, please accept, first, my word that it is not meant as such; and, secondly, that it is my opinion that our difference in looking upon the ethics of business may, in your eyes, give harshness to this letter which I can not find in it.

Far-sighted business must impress any thorough and capable student of transportation that the development of freight traffic upon the Mississippi River must benefit the Illinois Central Railroad. It is the flow of traffic that is increasing with cheaper and better service, and an increase of flow of traffic must be beneficial to paralleling lines.

Very truly, yours,

INLAND NAVIGATION CO. (INC.),
JOHN H. BERNHARD, *President.*

Mr. SMITH of Michigan. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Michigan?

Mr. RANSDELL. I do.

Mr. SMITH of Michigan. Did the Senator say "12 tons of Panama hats"?

Mr. RANSDELL. "Twelve tons of Panama hats" is what he says.

I wish to call attention now to a very remarkable statement made by Mr. Bernhard in his letter to Mr. Thompson, dated April 27, 1916. He says:

The *Inco No. 1* is now about to depart on her upstream trip to St. Louis, after having made a remarkably successful downstream trip to New Orleans, carrying a full cargo. In this connection I should like to call your attention to the attitude of several of the railroads—

I hope I may have the attention of Senators to this statement—

All during the time the barge was lying at St. Louis being loaded the Illinois Central and Louisville & Nashville Railroads, particularly, had men on the dock checking every ton of freight put on the barge. They even went so far as to stop the drays and ask the teamsters to show their dray tickets, acting as though they were employees of the Inland Navigation Co. The same railroads were conspicuous for similar actions while the barge has been in New Orleans, the same course having been pursued here.

The telegrams and letters to which I have referred, and which I insert in the RECORD as a part of these remarks, show that the railroads have done their utmost to interfere with this barge line, which, Mr. Bernhard says, is carrying the freight quicker than they. It is a new line, just started, and started under splendid conditions. It has its wireless-telegraph service, so that you can communicate with the boat at any point. It is a strictly modern barge, which can carry freight in very large quantities, and it bids fair to reopen boat commerce on the river.

Just a word more. There was much said here yesterday about the freight charges on the river as compared with those by rail. I hold in my hand a compilation made by me some months ago giving the actual rates on sugar in carload lots by rail between New Orleans and certain points. For instance, from New Orleans to Bayou Sara, La., on the river, the freight on the Yazoo & Mississippi Valley Railroad is 7½ cents on sugar in carload lots for 125 miles. To Lindsay, La., on the same railroad, for 113 miles, the rate is 17 cents. Now, this is a very striking case, as the distance to Lindsay is 12 miles less than to Bayou Sara, La., although the rate per hundred pounds in carload lots is two and two-tenths times greater than to Bayou Sara.

To Memphis, Tenn., the distance is 455 miles, and the rate in carload lots is 12½ cents, while to Darling, Miss., a distance of 400 miles the rate is 34 cents. Memphis, of course, is on the river, but Darling is in the interior. Twelve and one-half cents to go 455 miles to a river point, 34 cents to go 400 miles to an interior point!

I will not quote all these other rates in my remarks at this time, but ask permission to insert them in the RECORD.

The PRESIDING OFFICER. If there is no objection, the request will be granted.

The matter referred to is as follows:

Comparison of rates on sugar from New Orleans, La., and points taking same rates to Ohio River crossings, Memphis, Tenn., St. Louis, Mo., and intermediate points:

Rates on sugar and distances from New Orleans via the Yazoo & Mississippi Valley R. R.

From New Orleans to—	Distance.	Rate, carload.
	Miles.	*Cents.*
Bayou Sara, La.	125	7½
Lindsay, La.	113	17

This is a very striking case, as Lindsay, La., is 12 miles less than the distance to Bayou Sara, La., although the rate per 100 pounds per carload is 2.20 times greater than Bayou Sara, which is 7½ cents.

From New Orleans to—	Distance.	Rate, carload.
	Miles.	*Cents.*
Memphis, Tenn.	455	12
Darling, Miss.	400	34

Darling, Miss., is an inland town and the haul is 55 miles shorter, and its rate per 100 pounds is almost three times as great as the rate to Memphis.

From New Orleans to—	Distance.	Rate, carload.
	Miles.	*Cents.*
Anguilla, Miss.	284	31
Helena, Ark.	409	12

Helena, Ark., is 125 miles farther north than Anguilla and enjoys a much cheaper rate of 19 cents less than said place, or 2.5 times as great, covering a much greater distance.

Rates on sugar and distances from New Orleans via the Illinois Central R. R. to different points.

From New Orleans to—	Distance.	Rate, carload.
	Miles.	*Cents.*
Hammond, La.	53	12½
Memphis, Tenn.	395	12

This is very striking, as the Memphis haul is 342 miles longer than to Hammond, La., with a lesser freight rate of one-half of a cent.

From New Orleans to—	Distance.	Rate, carload.
	Miles.	*Cents.*
Ponchatoula, La.	48	17
Cairo, Ill.	554	17

This seems ridiculous. Ponchatoula is almost a suburb of New Orleans, yet the rate is the same as to Cairo, in the State of Illinois.

This is a very striking instance of the effect of waterway competition on railroad rates. Cairo is situated on a navigable stream, whereas Ponchatoula is inland. This is a remarkable contrast between these two points as to both mileage and rate, the difference in mileage being 506 miles.

From New Orleans to—	Distance.	Rate, carload.
	Miles.	*Cents.*
Winona, Miss.	272	22
Hopkinsville, Ky.	629	22

This is extremely remarkable, as the rates are the same, and Hopkinsville, Ky., is 357 miles, as a difference between the two points.

Rates on sugar and distances from New Orleans via the Louisville & Nashville Railroad are as follows:

From New Orleans to—	Distance.	Rate, carload.
	Miles.	*Cents.*
Cincinnati, Ohio.	919	18½
Cave City, Ky.	724	47

This is a remarkable instance, as the rate, 47 cents per carload per 100 pounds, is 28 cents greater, with 195 less mileage than to Cincinnati, Ohio, which only has a rate of 18½ cents.

From New Orleans to—	Distance.	Rate, carload.
	Miles.	*Cents.*
Gentilly, La.	4	7
Mobile, Ala.	139	12

Mobile is 139 miles farther from New Orleans, and the difference in mileage is 135 miles, compared with that of 4 miles at 7 cents.

From New Orleans to—	Distance.	Rate, carload.
	Miles.	*Cents.*
Athens, Ala.	515	34
Nashville, Tenn.	622	17

From New Orleans to Nashville, Tenn., is a distance of 622 miles, with a rate of 17 cents per carload, or one-half the rate to Athens, Ala., a distance of 515 miles, or 107 miles less than to Nashville, although with a rate of 34 cents, or twice the rate to Nashville.

Cincinnati, it is alleged, has long been the pivotal point, from a market standing, between New Orleans and the East, and while the rates from the East and from New Orleans to Cincinnati have not always been the same, those rates have closely approximated each other. At the present time the rail-and-water rate on sugar from Philadelphia to Cincinnati is 18 cents, as against a rate of 18½ cents from New Orleans to Cincinnati.

Mr. RANSDELL. Let me call your attention to one of the most striking of these discriminations. Situated on the Illinois Central Railroad, Ponchatoula, La., is 48 miles from the city of New Orleans, and the rate on sugar in carload lots is 17 cents. That same railroad, the Illinois Central Railroad, which had spies checking up Mr. Bernhard's freight when he was putting it on the boats at St. Louis, charges exactly 17 cents to carry sugar 554 miles to the city of Cairo, Ill. Think of that, Senators! The Illinois Central Railroad charges 17 cents to Ponchatoula, 48 miles, for 100 pounds of sugar, in carload lots, and 17 cents to Cairo, 554 miles, for 100 pounds of sugar in carload lots! Where does the distinction come in? What is the difference? Why, Ponchatoula is in the interior, where there is no possible water competition, and Cairo is on the river, both on the Ohio and on the Mississippi, where there is some actual and unlimited potential competition.

I sincerely hope the amendment of the Senator from Minnesota [Mr. NELSON] will be adopted. It will be a wonderful thing for the valley if we can have the Mississippi properly improved, and can reasonably protect men like Mr. Bernhard and others who are establishing boat lines. If that be done, we will have actual as well as potential commerce on the river. He is now carrying freight, according to his letter, quicker than it can be carried by rail, and he is carrying it cheaper than it can be carried by rail.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Florida?

Mr. RANSDELL. I do.

Mr. FLETCHER. I should like to ask the Senator if these barges are self-propelling barges or what is the motive power?

Mr. RANSDELL. They are self-propelling barges. They are large barges, self-propelled, and have every modern appliance. They have a wonderful machine for loading the freight and for taking off the freight—a great crane that runs on tracks from one end to the other, and swings the freight over on the shore or takes it from the shore to the boat. There is an exceedingly interesting description of the barge in the Engineering News of May 4, 1916, page 864, and I ask permission to put this description in the RECORD along with my remarks.

The PRESIDING OFFICER. If there is no objection, the request will be granted.

The matter referred to is as follows:

OIL-ENGINE-DRIVEN STEEL BARGE FOR RIVER FREIGHT TRAFFIC.

A novel type of vessel for freight traffic on the Mississippi began running between St. Louis and New Orleans on April 15, and has aroused great interest among those who look for a revival of traffic on the River.

The new vessel is the *Inco No. 1*, built and owned by the Inland Transportation Co., of 52 Broadway, New York, and St. Louis. The president of the company and the moving spirit in developing this new craft and putting it into service is John H. Bernhard, associate member American Society Civil Engineers. Mr. Bernhard was also chiefly responsible for the design and construction of the steel barges, propelled by gas engines using gas from producers, which have been running for the past year between the Warrior River, in Alabama, and New Orleans. These barges are operated by the Alabama & New Orleans Transportation Co., and were described in Engineering News of December 4, 1913.

In the new venture in Mississippi River traffic, however, Mr. Bernhard is aiming to carry not the cheapest class of bulk freight, like coal, on which rates are very low, but high-class merchandise freight. The rail rate on this traffic is very much higher than on low-class bulk freight, and the boat line can make a strong appeal for such freight, not only on the ground of lower rates but of quicker delivery.

Of course, at times of car shortage like the present, shippers are eager to send goods by the boat line; but even under ordinary conditions the delays at railway terminals are such that a boat shipment from one city on the river to another will usually reach its destination in half or a third the time it would if sent by rail.

Merchandise shipments have been sent by rail instead of by boat, however, because the old river craft still in service are irregular and unreliable. Goods are roughly handled and poorly protected from the weather, from thieves, and from fire, and in case of loss recovery by the owners of the goods is more or less doubtful. All these conditions Mr. Bernhard hopes to change in his new type of boats, which are to run with regularity and are so designed as to reduce as much as possible the liability to accident, and thus to popularize his service.

The new type of boat is a steel barge, with flat bottom. It is 240 feet long, 43 feet wide, and with a draft of 3½ feet will carry 500 tons. At 7½-foot draft it will carry 1,600 tons. The barge is covered with a steel-plate deck, protected by a wooden floor. The cargo is carried on this deck, nothing whatever being carried in the 6-foot high space between the barge's bottom and this deck. This space contains steel posts, which support the deck beams and at the same time form the verticals for five lines of longitudinal trusses. These posts also support transverse water-tight bulkheads which divide the hull into five separate compartments.

The advantages of carrying the cargo on the deck instead of in the hold are the much greater convenience of loading and unloading and the lessened liability to damage in case of leaks. Further, the longitudinal trusses previously referred to and the transverse bulkheads give the hull a strength and stiffness far beyond that of ordinary river craft.

To protect the cargo from the weather the cargo deck has permanent sides, with 10 openings on each side, closed by rolling steel doors, and a roof that is made in sections, so that any section can be lifted off when it is desired to handle the cargo from the top.

Probably the most striking feature of the boat in its external appearance is a traveling bridge crane, which runs on rails that extend along each side of the deck outside the deckhouse. A telescoping boom on this crane may be extended out on either side of the boat to a distance of 68 feet, and will carry a load of 3 tons.

The old-time Mississippi River steamboat carries a long, heavy gangplank swung from a spar at its bow, and as there are few river towns along the Mississippi that have any wharves, this long gangplank is necessary to reach from the steamer to the river bank where a landing is made. The traveling crane on the *Inco No. 1* takes the place of the gangplank. It can hoist any section of the roof, lift the cargo from the section beneath, and transport it to the shore. It can also be used instead of davits for lowering boats. For handling cargo on and off the boats an electric truck is carried on board, and other trucks are to be available at the landings. Electric endless-belt conveyors are also to be used to transport freight on and off the boat.

The barge is propelled by four 80-horsepower Fairbanks-Morse oil engines, burning a petroleum distillate of 29° Baumé gravity. Each engine has four cylinders, operates on the four-stroke cycle, and drives a screw propeller 51 inches in diameter. The propeller has four blades

bolted on a central hub. There are trapdoors in the floor of the barge over the propellers. Through these doors the propellers can be reached and a broken blade removed and replaced with a new one as quickly as one could change an automobile tire. In tests blades have been changed in 9½ minutes.

The engine room is at the stern and the cook's galley is at the bow. When the boat is running without load the extra weight of the engines in the stern increases the draft aft and reduces the draft forward, so that the propeller immersion is about the same with the boat light and loaded.

The engines are started by compressed air stored in tanks at 150 pounds pressure. An electric generator driven by silent chain from one of the engines furnishes current for lighting the boat and also for operating a dozen or more electric motors used for various purposes on board. When the boat is stationary and it is desired to operate the generator to furnish current—for handling cargo, for example—a clutch on the propeller shaft is opened and the engine runs without driving the propeller. Electric current is used for all heating and cooking, and no fire whatever is allowed on board.

The barge is still further equipped with three powerful searchlights—one at the bow, one at the pilot house, and one at the stern; each of them can be operated from the pilot house. The combined power is 18,000 candlepower.

The boat has four balanced rudders aft of the propellers. In maneuvering one side engine can run ahead while the one on the opposite side is backing. Further, to assist in swinging the bow, as in coming alongside or leaving a pier, there is an electric motor-driven rotary pump at the bow under control of the pilot, which can draw water from either side and deliver an 8-inch stream on the side opposite; the reaction of this jet exerts a strong force against the bow.

The boat is operated by a captain, mate, 2 engineers, 2 oilers, 4 deckhands, cook, helper, and 2 wireless operators, who act also as freight clerks, a total of 14 for a double watch. Instead of carrying its own gang of roustabouts for cargo handling reliance is placed on the freight-handling force at the wharves where the boat will land.

There is a refrigeration plant on board capable of cooling a chamber of 6,000 cubic feet capacity to a temperature of 31° when the temperature outside is 95°. The refrigeration plant is designed not merely to maintain a low temperature in the storeroom adjacent to the cook's galley, but enables the boat to handle butter, eggs, and similar freight which requires refrigeration.

Appliances for protecting the boat against accident are especially complete. As already explained, the 6-foot high space between the deck and the bottom of the barge is divided into four water-tight compartments, which can also be made air-tight, so that water could not enter the hull faster than it could force out the air contained, and by the provision of a small air compressor on board it would be easy to expel water if it gained an entrance. There are also connected with the water-tight compartments three powerful electric bilge pumps, which may be put in operation by a switch in the pilot house, and which are capable of discharging 8,000 gallons per minute. Mississippi River boats frequently get out of the channel and run aground. The *Inco No. 1* carries 2,000-pound anchors at bow and stern, and by aid of powerful electric winches these can be made use of to haul the boat off if she runs aground. Another most unusual device for a Mississippi River boat is a gun similar to those used in the Life-Saving Service for sending a line on board a wrecked vessel. The gun can shoot a line 1,750 feet. The barge carries two boats—a 20-foot power launch, capable of 22-mile speed, which can be put into the water by the traveling crane in two minutes, also an ordinary rowboat. In the swift currents of the Mississippi it is often a difficult matter to carry a heavy line to shore for use in hauling the boat off a bar. With the life-saving gun, however, a line can be shot to shore and a boat's crew sent ashore to haul it in and draw a cable after it.

At each end of the barge is a telescopic wireless mast, which can be quickly lowered when passing under bridges. The barge carries two wireless operators, so that it can be communicated with at any time from the offices in St. Louis and New Orleans. The captain regularly reports to these offices his position, speed, the weather, etc., and can promptly summon help in case of need. In addition, the accounting department is informed of the freight on board the boat before its arrival, and the time of arrival can be so closely gauged that a force of roustabouts to handle the freight can be on hand as soon as the boat arrives, without wasting time waiting for it.

The *Inco No. 1* surpassed the expectations of its designers in the speed which it made on its initial trip from St. Louis to New Orleans. The river was in flood, and the boat had the aid of the current, but an average speed of 16 miles per hour was attained.

Three additional barges are under construction, and will be placed in service this summer. The company plans to have 36 barges in service by the spring of 1918.

The PRESIDING OFFICER. The question is on the amendment of the committee.

Mr. KENYON. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I have a general pair with the senior Senator from New Mexico [Mr. FALL], but I am informed by him that he would vote as I am about to vote; so I vote "yea."

Mr. DILLINGHAM (when his name was called). In the absence of the senior Senator from Maryland [Mr. SMITH], with whom I have a general pair, I withhold my vote.

Mr. SAULSBURY (when his name was called). I transfer my general pair with the junior Senator from Rhode Island [Mr. COLT] to the junior Senator from Tennessee [Mr. SHIELDS] and will vote. I vote "yea."

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. McCUMBER] which I transfer to the junior Senator from South Dakota [Mr. JOHNSON] and will vote. I vote "nay."

Mr. TILLMAN (when his name was called). I transfer my pair with the junior Senator from West Virginia [Mr. GOFF] to my colleague [Mr. SMITH of South Carolina], who is absent, and will vote. I vote "nay."

The roll call was concluded.

Mr. MYERS. I have a pair with the junior Senator from Connecticut [Mr. McLEAN]. He being absent, I transfer that pair to the senior Senator from Nevada [Mr. NEWLANDS] and will vote. I vote "yea."

Mr. GALLINGER. I have a general pair with the senior Senator from New York [Mr. O'GORMAN], who is absent from the Chamber. For that reason I withhold my vote.

Mr. CATRON. I have a general pair with the senior Senator from Oklahoma [Mr. OWEN]. He not having voted, I withhold my vote.

Mr. FALL. I inquire whether the senior Senator from West Virginia [Mr. CHILTON] has voted?

The PRESIDING OFFICER. He has voted.

Mr. FALL. I vote "yea."

The result was announced—yeas 48, nays 15, as follows:

YEAS—48.

Bankhead	Harding	Myers	Saulsbury
Brandegee	Hardwick	Nelson	Sheppard
Broussard	Hitchcock	Oliver	Simmons
Chamberlain	Hollis	Overman	Smith, Ariz.
Chilton	Hughes	Page	Smith, Mich.
Clapp	Kern	Penrose	Sterling
Clark, Wyo.	Lea, Tenn.	Phelan	Stone
Clarke, Ark.	Lee, Md.	Pittman	Swanson
Culberson	Lewis	Poindexter	Underwood
Fall	Lodge	Pomerene	Wadsworth
Fletcher	Martin, Va.	Ransdell	Warren
Gore	Martine, N. J.	Reed	Williams

NAYS—15.

Ashurst	Lane	Smoot	Thompson
Curtis	Norris	Sutherland	Tillman
Husting	Shafroth	Taggart	Walsh
Kenyon	Sherman	Thomas	

NOT VOTING—33.

Beckham	du Pont	Lippitt	Smith, Md.
Borah	Gallinger	McCumber	Smith, S. C.
Brady	Goff	McLean	Townsend
Bryan	Gronna	Newlands	Vardaman
Burleigh	James	O'Gorman	Weeks
Catron	Johnson, Me.	Owen	Works
Colt	Johnson, S. Dak.	Robinson	
Cummins	Jones	Shields	
Dillingham	La Follette	Smith, Ga.	

So the amendment of the committee was agreed to.

The next amendment was, on page 36, after line 14, to insert:

Reservoirs at headwaters of Mississippi River: That so much of the adopted project for the construction of a low reservoir dam at Gull Lake, Minn., as provides for the digging of ditches between Gull Lake and Round Lake and between Round Lake and Long Lake, is hereby abandoned; and the Secretary of War is hereby authorized to surrender to the parties entitled thereto the flowage rights on Long Lake and Round Lake heretofore granted the United States for the aforesaid work.

The amendment was agreed to.

The next amendment was, on page 37, line 11, after the words "Fort Benton," to strike out "$125,000" and insert "$150,000"; in line 12, after the words "at least," to strike out "$50,000" and insert "$75,000"; and in line 15, after the words "in all," to strike out "$175,000" and insert "$200,000," so as to make the clause read:

Missouri River: For improvement and maintenance from Kansas City to Sioux City, $50,000, of which amount at least $25,000 may be expended for such bank revetment as in the judgment of the Chief of Engineers may be in the interest of navigation; continuing improvement and for maintenance from Sioux City to Fort Benton, $150,000, of which amount at least $75,000 may be expended for such bank revetment as in the judgment of the Chief of Engineers may be in the interest of navigation; in all, $200,000.

Mr. KENYON. I should like to inquire if this matter was presented to the committee by the Senator from South Dakota [Mr. STERLING]?

Mr. STERLING. I will state for the information of the Senator from Iowa that I did not present this distinct matter to the committee. I presented another matter to the committee, and it may be that in view of what I then said the committee recommended this increase of $25,000.

Mr. KENYON. I was trying to find out the reason for the increase.

Mr. STERLING. I will say to the Senator from Iowa that there is a very good reason, I think, for this increase. I thought when I saw the increase that, like all other small favors, it should be "thankfully received."

I will say to the Senator that the revetment work provided for in this paragraph, amounting to $75,000, covers that full stretch of the Missouri River from Sioux City to Fort Benton, a distance of 1,477 miles. There are three or four places within 50 miles of Sioux City where every dollar of this appropriation could be profitably expended, not to say anything of the revetment work that may be required above the city of Yankton, S. Dak. So there is need not only for this $75,000, but need for very much more than that sum.

I have in mind the introduction of an amendment to the bill providing for a larger appropriation than even this for

revetment work or other improvement that will prevent the erosion of the banks of the Missouri River. That is very much needed, and is at just one place on the Missouri River. The amendment I shall offer will provide for a contribution on the part of the city, the county, or other agencies interested in the improvement; but this amount, independently of anything I shall offer, is needed, as I said, between Sioux City and Yankton, S. Dak.

I will state further, Mr. President, that the amendment agrees exactly with the report of the Board of Engineers. On page 364 of the committee report, in giving the estimate of the work between Sioux City and Fort Benton, there is this item, taken from the report of the Board of Engineers:

Systematic works of improvement: Standard revetment, $75,000.

So the amendment of the committee just brings the amount up to what has been proposed by the Army engineers to be expended in the long distance between Sioux City and Fort Benton in improvement of this kind.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 37, line 23, after the word "appropriated," to insert:

Provided, That the amount required to be paid by the city of St. Joseph or other agency shall not be in excess of two-fifths of the total amount expended, and in no event to exceed $50,000.

So as to make the clause read:

Missouri River at St. Joseph, Mo.: For improvement, $75,000: *Provided*, That no part of this amount shall be expended until the city of St. Joseph or other agency shall have deposited to the credit of the Secretary of War in some duly recognized depositary of the United States to be designated by him such sum as may be satisfactory to him to be expended together with an equal amount of the funds herein appropriated: *Provided*, That the amount required to be paid by the city of St. Joseph or other agency shall not be in excess of two-fifths of the total amount expended and in no event to exceed $50,000.

The amendment was agreed to.

The next amendment was, on page 38, after line 5, to insert:

For the building of a diverting dam in the Los Angeles and Long Beach Harbors, Cal., and their tributary waters with a view to their protection from the deposit of silt in said harbors, in accordance with House Document No. 462, Sixty-fourth Congress, first session, $1,080,000: *Provided*, That before any work is undertaken by the United States assurances satisfactory to the Secretary of War shall be given that the city or county of Los Angeles or other agencies will provide the right of way, defray the cost of the necessary roads and bridges, adjust all damage claims, and maintain all improvements after its completion, $500,000 of said amount to be immediately available.

Mr. SMITH of Arizona. Mr. President, I do not want to lose my right to offer an amendment to the text of the bill. I understand that we are now considering only the Senate committee amendments.

The PRESIDING OFFICER. That is the order.

Mr. SMITH of Arizona. After those amendments have been considered, the bill will be open to amendment by any individual Senator?

The PRESIDING OFFICER. That will be the order.

Mr. CLARKE of Arkansas. Mr. President, let me modify that statement somewhat. Amendments to the House text either to strike out or insert will be in order. Then, as the third order of business, new amendments offered by individual Senators to the bill will be in order.

Mr. SMITH of Arizona. If that be true, an amendment to the text of the bill as passed by the House, on page 38, line 5, the item of $3,000 for maintenance of Colorado River, Ariz., by repair of the levee on the Gila River near its junction with the Colorado at Yuma will be in order. If I wish to amend that, now will be the proper time?

Mr. CLARKE of Arkansas. No; that will come after we get through with the committee amendments.

Mr. SMITH of Arizona. All right, then, I will wait.

Mr. KENYON. Mr. President, I suppose there will be some explanation of this item. It may be that it is so small an amount, being such a trifle—$1,000,000—that we will not have an explanation of it. I think, before voting on a proposition which involves $1,000,000, we ought to have some explanation of it from some one.

Mr. WORKS. Mr. President, I think I can explain the objects and purposes of the appropriation. It is for the construction of what is called a diverting dam. The object of it is to prevent the inflow into Los Angeles and Long Beach Harbor of silt and débris of various kinds that periodically fill up the channel to the harbor. It has been estimated that where the storms that we have in that section occur once in five years it costs the Government about $100,000 a year to dredge out the deposits that come in in that way.

The intention of this is to construct a dam running between two of the hills jutting out into the coast, a distance of something like 3 miles, simply a low dam, for the purpose of preventing the inflow of the débris and silt into the channel of the harbor.

In connection with this improvement the county of Los Angeles has inaugurated a project to prevent the effect that followed from the heavy rainstorms on which they are proposing to expend about $15,000,000, which is directly beneficial and prevents the inflow into the harbor. That project has gone so far that they have commenced now to build one of the reservoirs that is intended to prevent a sudden flow of the stream.

In addition to that, in connection with the dam which I mentioned, the county expects to create a new channel that will conduct the waters away from the harbor. This dam is simply a part of that project. The Government is proposing to expend $1,080,000 upon it. The county of Los Angeles expects to expend $15,000,000 partly for that purpose and partly for the protection of the land intervening between the mountain and the bay.

In addition to that the county of Los Angeles is required under this amendment to provide the rights of way, the approaches, and the various other things that are necessary to protect the Government from damages, which, as estimated by the Board of Engineers, will amount to something like $900,000.

This improvement is absolutely necessary for the protection of the harbor in the way I have mentioned. It is a saving of expense to the Government in the long run besides the fact that it keeps the harbor in good and serviceable condition.

I think I need not take up the time of the Senate in an attempt to show the importance of that harbor. It is a subject that has been before the Senate many times. It is one of the important harbors of the country, and one upon which the Government has expended considerable money in the past in order to make it a safe harbor.

I regard this as a meritorious improvement in the interests of the Government. I think that for that reason it should be adopted.

Mr. KENYON. May I ask the Senator a question?

Mr. WORKS. I yield.

Mr. KENYON. I would simply like to inquire of the Senator if in his judgment the proposition of the committee is of pressing importance, or would any injury result from a delay of a year or so?

Mr. WORKS. Yes, Mr. President; there is always danger of injury by delay, for the reason I have stated. When these thunderstorms come they do a great deal of damage to the harbor. We have had two of those severe storms within two years. Usually they are not expected to occur more than once in five years, but last year we had one of the most damaging floods and storms we have had in the history of that section of the country. It is a matter of urgency. Only $500,000 of the amount is made available at the present time, and, in view of what is being done by the county of Los Angeles, that has already been commenced, I think it is quite important that this work should be done in that connection.

Mr. KENYON. It has all been recommended by the Army engineers?

Mr. WORKS. It has been very thoroughly examined into by the Board of Army Engineers on the ground, besides the report made by the local engineers.

Mr. KENYON. Is it in the nature of a cooperative project?

Mr. WORKS. It is.

Mr. KENYON. The Government does not bear the entire expense?

Mr. WORKS. No; on the contrary, the county of Los Angeles in the long run will bear more than one-half of it.

Mr. SMITH of Michigan. The question of the Senator from Iowa whether this is an emergency matter or a matter that could not wait a year has been answered with great modesty by my friend from California. There is another reason, however, why it should not wait a year. If it waits a year the Senator from California will not be here.

Mr. KENYON. How do you know?

Mr. SMITH of Michigan. Because he has already given notice of his retirement, and what more appropriate time to do it than now when he will appreciate it?

Mr. NELSON. Nevertheless, the people may elect the Senator from California.

Mr. SMITH of Michigan. I think that this is an emergency matter.

The PRESIDING OFFICER. The question is on the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 38, after line 21, to insert:

San Diego Harbor, Cal.: For improvement and maintenance, $220,000, in accordance with House Document No. 648, Sixty-fourth Congress,

first session: *Provided*, That the city of San Diego donates to the United States Government 500 acres of tide lands known as Dutch Flats.

Mr. WORKS. Mr. President, that is another appropriation in which I am interested, and as the Senator from Iowa seemed to desire an explanation of the other item I think one is due in this case also. This is a proposition to widen the channel of the harbor. The city of San Diego has itself already expended $300,000 upon this project without calling upon the Government; but the channel is still too narrow. It has been cut straight down so that as the steamers come in they have a tendency to wash the sides of the channel into the channel itself, and is in that way obstructing it, and there is necessity for immediate action in regard to it.

I wish to read just a little from the report of the Army engineers that will explain, I think, what is the purpose. I read on the San Diego Harbor from the report signed by the Chief of Engineers of the United States Army, as follows:

For reasons stated the board believes that no further deepening of area B is required at this time, and that there is no pressing need for dredging area A. It is of opinion, however, that the United States should undertake the maintenance of area B and should dredge area C to a corresponding depth of 32 feet, at an estimated cost of $220,000, the latter work being necessary to give adequate approach to the channel provided by the city along the municipal pier and wharves.

That is the matter which is covered by this amendment.

After due consideration of the above-mentioned reports, I concur in the views of the Board of Engineers for Rivers and Harbors, and therefore report that the further improvement by the United States of San Diego Harbor, Cal., is deemed advisable to the extent of dredging area C, indicated on accompanying map, to a depth of 32 feet below mean lower low water, at an estimated cost of $220,000, and maintaining this area and area B to similar depth. The entire amount of the estimate should be made available in one appropriation. There are no data regarding the cost of maintenance, but it is believed that this will be moderate. The above recommendations cover only such further work as is deemed necessary in the interests of commerce and navigation. The needs of the Navy, as stated by that department, are indicated above in second paragraph.

Then, it is pointed out, Mr. President, by the Board of Army Engineers, in the report signed by W. M. Black, colonel, Corps of Engineers, senior member of the board, as follows:

The commerce of the harbor for 1914, as given in the report of the district officer, amounted to 654,087 tons, having a value of $60,184,675.

Again:

The improvement contemplated by "widening the main channel at the Government coaling station" is apparently in the interests of the Navy Department, as the present facilities are ample for general commerce and navigation in that vicinity. The accompanying correspondence with the Navy Department indicates that its requirements are in effect practically those indicated on the map in the report printed in House Document No. 1309, Sixty-second Congress, third session, as plan C for the middle ground, and plan B for outer bar. The improvement desired by the city of San Diego is additional dredging to a depth of 35 feet in the vicinity of the new municipal dock, and is described by the district officer and shown on the accompanying map under three separate items pertaining respectively to the areas A, B, and C.

This appropriation is recommended, as you will see, Mr. President, in the interest of navigation and commerce, and also in the interest of the Navy Department. The condition is imposed upon the city of San Diego that it shall convey to the Government a certain tract of land bordering upon this improvement, known as Dutch Flat. The amount of land is 500 acres, being in the immediate vicinity of the dredging that is required to be done. The material taken out can be dumped upon this piece of land and will make it an extremely valuable piece of property. It is estimated by those who claim to know that the property will be worth at least $2,000,000. By others it is estimated much higher than that. It is slightly under water, and by the dredging out of the channel it can be elevated above the water. It will make an excellent training ground and may be used for other purposes.

As showing something about the value of the property, I want to read a letter to Mr. WILLIAM KETTNER, the Member of Congress from that district, from Mr. Will M. Parry, who is now one of the trade commissioners. He says in that letter:

Replying to your letter of May 9, I desire to say that for 16 years and up to the time that I became a member of the Federal Trade Commission I was the president and manager of a corporation engaged in reclaiming tidelands in the harbor of Seattle, and have made a particular study on the subject of reclamation of land suitable for industrial purposes. As a part of that study I looked into the tideland situation in the city of San Diego, and am familiar with the tract of land referred to in your letter, and known as Dutch Flats.

You ask me to give my estimate of the value of the tidelands known as Dutch Flats after those lands are filled to the height required to make them commercial property. It is my opinion that if these lands are filled to a height of, say, 2 feet above extreme high tide, and suitable provision is made for platting the same, with proper streets for giving access to industrial sites, that the land so created would be worth, for industrial purposes, an average of 30 cents per square foot. This estimate is based upon the present population and commercial situation of San Diego, and does not take into account its great potentialities as an industrial and commercial center.

It is my opinion, as one who has been engaged in dredging operations for many years, that the lands can be very cheaply filled by depositing thereon the silt, which should be removed in order to widen the channel to the new municipal wharf. Unfortunately, the present channel is too narrow for navigation for very large ships, and the material removed in widening the channel should be deposited upon the tract of land to which you refer, thereby increasing its value to an amount equal to the cost of the dredging.

So, Mr. President, in this case the city of San Diego is a good deal more than paying the amount of money that is to be appropriated by the Government; it is paying three or four times as much. This tract of land has been approved by captains of ships that enter as affording an excellent place for training ground, one of the best in the country when this filling-in process shall have been completed. So, really, the making of this appropriation with the condition attached is a making of money—not only an economy, but the actual making of money—by the Government. Therefore, it seems to me, there is no question about the merits of the appropriation.

Mr. SMOOT. Mr. President, I understood the Senator from California to say that the appropriation was for the widening of the channel?

Mr. WORKS. Yes.

Mr. SMOOT. I listened attentively to the reading of the report by the Senator, and from that report I gathered the impression that it referred to the deepening of the channel.

Mr. WORKS. It is for both purposes; it has both effects; it is to widen as well as to deepen the channel.

Mr. SMOOT. Mr. President, I will say that this is one of the items in this appropriation bill which has merit. The appropriation ought to be made. Last June I visited San Diego and had the pleasure of taking an aeroplane trip over the bay. I saw a large boat coming up the channel, and I noticed that the channel was so narrow that it was a revelation to me how a boat could be so skillfully handled as to pass through it. I wanted to see the channel, and thought the best way to see it was to take a trip in an aeroplane. I followed the channel from the landing wharf out to the ocean, and could see its width and every curve in it.

I am positive, Mr. President, that this money ought to be expended for the widening of the channel in that harbor. The Dutch Flats, I believe, when filled 2 feet above the extreme high level of the ocean, can be sold for enough money to not only pay the expenses incurred by the appropriation, but many times over. Those flats are very close to the city; in fact, they can be used either for residential purposes or for drilling grounds, if the Government so desires.

This is one of the items in this river and harbor bill which appeals to me, and should appeal to anyone who is interested in the development of the waterways of our country. I expect to see San Diego at some day a great port of entry. It is splendidly located; it has a fine citizenship, composed of business men of the very highest type, and they are all most active and enterprising. I certainly shall be more than pleased to have an opportunity to vote for this item in the bill.

Mr. PHELAN. Mr. President, I had expected to address the Senate on the subject now before this body, but finding such unanimity in favor of the committee amendment, and not desiring to obstruct the progress of the debate on the river and harbor bill, I shall confine my remarks simply to a rebuke of the city of San Diego, because, if I were in the confidence of the municipal authorities of that city, I should have endeavored to restrain their impetuosity when, in order to receive Federal aid for their harbor, which was badly in need of it, they offered as a consideration to the Federal Government 500 acres of tide lands, which Mr. W. H. Parry, of the Federal Trade Commission, who is an expert in such matters, estimates to be worth in the neighborhood of five or six million dollars, on a basis of 30 cents per square foot.

It is very pleasing to hear the Senator from Utah [Mr. SMOOT] agree with the absolute justice of this item; but there is even more than that involved. While it may be an act of justice on the part of the Government, it is an act of generosity on the part of the municipality. As I have said, however, there is no need of persuading an already convinced Senate; and so I shall limit my remarks to what I have said.

Mr. SMITH of Michigan. Mr. President, I want to commend this San Diego project, and, while I can add nothing to what has been said by the Senators from California and the Senator from Utah, nevertheless I regard this harbor improvement as much more than a mere question of local interest. San Diego Harbor is a proper rendezvous for the ships passing through the Panama Canal; it is the most southerly American port on the Pacific; and it has never been treated with the generosity or the consideration which it deserves.

The Government coal wharves, referred to by the Senator from California [Mr. WORKS], are a standing criticism of the policy of the Government of the United States. They have never been completed. They are splendidly located; they are vitally important; and yet the money that has been necessary to complete those coal docks for the Government has been very ungenerously withheld. I should like to see a Secretary of the Navy sometime with pride enough in that great southern Pacific port to complete the work long ago undertaken and which is so vital to our Government.

I am very familiar with that harbor; indeed I was aboard the first battle cruiser that ever entered the harbor of San Diego, and I know the difficulties encountered in getting into the harbor and the necessity for this appropriation in order to make the harbor practical and feasible and give it the place which it is entitled to occupy in the commerce and the navigation of our country.

I am glad to hear my friend from Utah [Mr. SMOOT] speak in praise of the harbor of San Diego. He has evidently been to San Diego. He has not been to Arcadia. If he had been to Arcadia perhaps his vision would have likewise broadened. He is looking at San Diego through a field glass from a commanding height, while he is observing other meritorious items in the bill from the valley with a microscope. He ought, at least, add to his equipment a field glass that will extend northward as well as westward.

Mr. KENYON. We may reconsider that action.

Mr. SMITH of Michigan. Very well; reconsider it. It should stand on its merits, as this project does. But I do not want to confuse that item of unusual merit, which the Senate has already adopted, with this southernmost California harbor, and I rejoice that both Los Angeles Harbor and San Diego Harbor have been treated appropriately by the Committee on Commerce and appropriately by the Senate.

The PRESIDING OFFICER (Mr. WALSH in the chair). The question is on the adoption of the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 41, line 1, after the word "maintenance," to insert "of the channel from Bay City to Tillamook City," so as to make the clause read:

Tillamook Bay and Bar, Oreg.: For maintenance of the channel from Bay City to Tillamook City, $5,000.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The next amendment was, on page 41, after line 23, to insert:

Willapa Harbor and River, Wash.: For improvement in accordance with the report submitted in House Document No. 706, Sixty-third Congress, second session, and subject to the conditions set forth in said document, $100,000: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials and work as may be necessary to complete the said project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $247,950, exclusive of the amount herein and heretofore appropriated.

Mr. KENYON. Mr. President, if it is not out of order to make an inquiry as to this item, I should like to have some explanation for the RECORD of this appropriation. I believe there was nothing in relation to it presented to the committee.

Mr. RANSDELL. Mr. President, I ask unanimous consent that that item be passed over until the Senator from Washington [Mr. JONES] shall return to the Chamber, as he is especially interested in it.

The PRESIDING OFFICER. Without objection, the amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 42, after line 19, to insert:

And for the construction of the west breakwater, Kahului Harbor, in accordance with the report published in House Document No. 1330, Sixty-second Congress, third session, $100,000: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials and work as may be necessary to prosecute the said project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $150,000, exclusive of the amount herein and heretofore appropriated.

Mr. KENYON. Mr. President, I should like to make the same inquiry, if it is not out of order, with respect to this item. I should like to find out something about this item of $150,000. I believe nothing was presented to the committee in regard to it.

Mr. SMITH of Michigan. There is a favorable report on the project from the engineers.

Mr. CHAMBERLAIN. Mr. President, in answer to the Senator, permit me to say that if the Senator will examine Document No. 1330 of the Sixty-second Congress, third session, he will find the whole subject discussed. It is discussed further in the report of the committee at page 411. I introduced this proposed amendment at the request of representative citizens from that section.

Mr. KENYON. Mr. President, I should like to inquire if the Senator considers the improvement a military or naval necessity?

Mr. CHAMBERLAIN. I can not undertake to put it on that ground, Mr. President, although I will say that, as a general proposition, the deepening of all harbors along the coast, if they are large enough for the admission of naval vessels at all, is something that may be considered to be along the line of preparation for defense. However, I would not claim that for this harbor. It is a much-needed improvement; the Government has already spent a good deal of money on the harbor, and the appropriation is for the purpose of redredging and deepening it.

Mr. SMOOT. Mr. President, when I first read the item I thought that it was for a harbor located on the island of Oahu; but I see it is on the north coast of the island of Maui, about 110 miles by water from Honolulu. I have been all over the island of Maui, and it may be that this improvement is necessary, but I should like to have some little explanation of it. Will the Senator allow it to go over until I can look up the report?

Mr. CHAMBERLAIN. I have no objection to that course being taken.

Mr. SMOOT. I rather think it is all right, but I should like to look at the report.

The PRESIDING OFFICER. Without objection, the amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was in section 2, page 43, line 9, after the words "the sum of," to strike out "$250,000" and insert $350,000," so as to read:

SEC. 2. That for examinations, surveys, and contingencies for rivers and harbors for which there may be no special appropriation, the sum of $350,000 is hereby appropriated: *Provided*, That no preliminary examination, survey, project, or estimate for new works other than those designated in this or some prior act or joint resolution shall be made.

Mr. KENYON. Mr. President, at the risk of marring the delightful harmony of this occasion and the smoothness with which all these appropriations are passed along, I want to place in the RECORD something from the different reports and some observations about this increase of $100,000.

We have now reached the point in this bill where we have before us the consolation prizes. The bill as it came from the House contained $250,000 for these surveys. A number of new surveys are put in the bill, and the amount is increased to $350,000. Of course I realize that as items are put in this bill this is a very small and trivial sum. We are so accustomed to thinking about millions in connection with these bills that anyone who objects to a $100,000 item is supposedly engaged in very small and discreditable business.

These surveys are laying the foundation for unlimited appropriations from the Public Treasury; while as it now stands, and if the surveys are made, money is not appropriated without further action of Congress. yet the very fact that the survey has been made and favorable reports have been secured thereon is the first peg on which to hang the appropriations that are sure to follow.

All through these 15 pages of surveys are entered new surveys by the committee under a system which the committee has, as I understand—and if I am wrong about it, the members of the committee can correct me—that any Senator who wants a survey for any project merely presents that matter to the committee and it goes in as a matter of course. It is needless to say that any members of the committee who desire any number of surveys can insert them as a matter of course, because we were told that the surveys did not cost much of anything. But it seems that the new surveys placed in this bill are to cost $100,000, making $350,000 altogether.

I want to call attention to a few of these, and see if the Senate is practically willing to commit itself to some of these propositions.

On page 49 of the bill, lines 7, 8, and 9, I find this item:

Waterway between Sarasota Bay, near Venice, and Miakka River, Fla., with a view to giving such channel dimensions as commerce may demand.

One would imagine from reading that that there was some great necessity to have a waterway for the commerce of Sarasota Bay. Let us see what that commerce is.

We have appropriated $125,042.75 for that bay. According to the engineers' reports for 1915, the commerce for the year 1914 amounted to 10,574 short tons, of which over 1,000 tons was fish. The Miakka River was provided for in the river and harbor acts of July 26, 1912, March 4, 1913, and March 4, 1915, for a preliminary examination and survey. That river has had

nothing at all done with it. The commerce of this bay amounts to 10,000 tons. We now practically commit ourselves to the proposition of eventually constructing a waterway between those points.

On page 50 we have provision for an instrumental survey of the Brazos River and the Colorado River in Texas. That is a new item.

On page 51 we have another survey of the Brazos River. I do not know how many surveys we need of the Brazos River or how many different kinds of surveys can be made. We have ordered a reexamination of the Brazos River. That report has not as yet been submitted to Congress; and yet we go ahead in this bill and appropriate either $200,000 or $250,000 for the Brazos River. Not only that, but we go ahead in the surveys and provide for two more surveys—one of them an instrumental survey. What is that? It sounds like a musical survey, possibly to see whether there is any music in the babbling waters of the Brazos; and there are two surveys of the Brazos River.

On page 50 there is an item providing for another survey of the Trinity River. A few years ago Congress ordered a resurvey of the Trinity River. That is being made. We can not wait for the Army engineers' reports on the Trinity River to put in this bill $250,000 for that river—a proposition of 37 locks and dams that are going to cost the people of this country at least $10,000,000.

Then we come on with our surveys, and authorize another survey of the Trinity River near Liberty, Tex.

The Sulphur River in Texas and Arkansas: There is one of the prizes. We have had surveys of the Sulphur River. We have expended considerable sums of money on the Sulphur River with no results. I want to put in the RECORD, as bearing on this matter, portions from volume 1 of the Army engineers' report for 1915, page 950. They say:

For the first 18 miles above the mouth the average width of the river at low water is about 75 feet, the depth a few inches only, and the fall about 10½ feet. Thence to a point about 51 miles above the mouth there is a pool with average width of 125 feet, a minimum depth of at least 5 feet, and a fall of only 1 foot. Above this point the depth and width decrease rapidly.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Nebraska?

Mr. KENYON. I do.

Mr. NORRIS. From the name of that river I gather the idea that probably it is not water they are after. How about the sulphur?

Mr. KENYON. There is nothing on that point in the record; but I suppose that with these few inches of water they will be able to get the sulphur out of the bottom. It may be a sulphuric proposition.

Prior to improvement the river was badly obstructed by snags, logs, and overhanging trees—

The same old story—

Navigation of the lower 17 miles has never been possible at low stages. Rafting was carried on in the pool for about 55 miles.

We have had a previous project for this river; but they are so tenacious, when there is once a pull out of the Federal Treasury, that they are unwilling to give it up.

Under the original project adopted by the river and harbor act of August 18, 1894, $2,488.99 was expended.

* * * * * *

The present project was adopted by the river and harbor act of March 2, 1907, and provides for the improvement of the lower 150 miles by snagging and a small amount of dredging.

* * * * * * *

About one-third of the work contemplated by the project has been completed and maintained. The river above the lower 51 miles is badly obstructed, and that portion of the project has been reported as unworthy of further improvement.

This, I assume, is to reverse the action that already has been taken, finding this stream unworthy of further improvement.

I will put in the RECORD a little more from the report:

Below that point some obstructions have accumulated since the last work was done, in January, 1913, but these are not sufficient to make navigation impracticable. A depth of at least 5 feet at low water is available in the pool from about 18 miles to 51 miles from the mouth. Below that point navigation is possible only at high water. The total expenditures under the existing project were $43,500.

With that kind of a stream, why not let it alone? Why do any more surveying? There has been no commerce of any value on this river, and the improvement has had no effect on rail freight rates. So we have expended $45,988.99, and the engineers say, on page 952, that there was no commerce reported on this river during the calendar years 1912 and 1914.

What is the use of putting a proposition like that in this bill? But it is apparently violative of senatorial courtesy to object, or even to question, any of these matters. Senatorial courtesy in voting on appropriations is getting about the same as senatorial courtesy in voting on nominations; and men in this Chamber are voting on many of these things because "it is Senator So-and-so's proposition or harbor," and so forth. I can not believe that any Senator ought to find fault with a colleague who votes against a proposition in which he may be interested and honestly believes is right, if his colleagues honestly believe it may not be right; but it seems that that is the custom we are getting into.

It is not enough to have simply a survey of Sulphur River, but another survey is authorized of Sulphur River and Days Creek in Texas and Arkansas, and then a survey of the St. Francis River through the "sunk lands."

There is a most remarkable river—a river as to which the testimony in the House shows that you could cross it at the "sunk lands" and not know when you had crossed the river. I glory in the courage of the Senator from South Carolina [Mr. TILLMAN] and the Senator from Indiana [Mr. TAGGART] in standing up here and denouncing this bill. They show long-headedness in doing it, too—political long-headedness for their own party—because, while it is not a party matter, our Democratic friends will have to answer to the country for these expenditures.

On page 51 a survey is provided for the St. Francis River. I want to call attention to what a witness said in the House hearings about that river. I read from page 7 of the hearings in the House of Representatives on the St. Francis River, Ark. and Mo.:

Through the sunk lands, in some places, it has a well-defined bank on one side, but on the other the average above low water, I should think, was not over 18 inches, and it may be less than that. In fact, when you approach it at many places you will not know when you reach the river, and the channel winds around through logs and growth and this smartweed, as we call it, and you can actually cross the river and never know it. As I said, where they have built the railroad bridge and wagon bridge at Lake City, and where I have seen steamboats at least 30 or 40 feet in length, there are willows growing up, in some places coming through the flooring of the bridges.

At another place in this hearing there is a statement of what it is going to cost to canalize this weedy river, for which we are providing a survey in this bill. On page 4 of that document is Mr. Whittemore's statement. He went over the river in conformity with the provisions of the last river and harbor bill. He was under the direction of the engineer in charge at Little Rock, but is now at Humboldt Bay, in California. He made the survey and wrote a letter in which he set forth his findings, which letter is inserted, at least in part, in these hearings. He says:

With reference to your inquiry concerning my estimates of canalizing through the sunken lands, I have to report that the cost would be about $610,000 for a canal with a top width of channel of 130 feet, bottom width of 85 feet, and mean depth of 15 feet below low water.

What is the particular use of the survey, when already the investigation has been made, and it will only cost the trivial sum of $610,000 to put a canal along through this river grown over with weeds?

Mr. President, that is not to regulate freight rates, which we have heard so much about. That is just a wasteful, useless expenditure of public funds, if we are going to do it.

Mr. CLARKE of Arkansas. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Arkansas?

Mr. KENYON. Certainly.

Mr. CLARKE of Arkansas. I have not felt justified in trespassing upon the time of the Senator to refer to these matters——

Mr. KENYON. I will say to the Senator that I am only going to take a very few minutes.

Mr. CLARKE of Arkansas. But a very simple explanation would be sufficient there.

About 1823 there occurred what is now known as the New Madrid earthquake, which caused quite a body of land—say, 30 or 40 miles in width, and 15 or 20 miles in length—to sink down some 17 feet. Its course lay right across the channel of the St. Francis River. Little River, which is one of the branches of the St. Francis River, was included also. The river above and below there is a perfectly well-defined stream; but through that sunken portion of it, of course, being lower than the banks above and below, the water necessarily spreads over the sunken area. The proposition here is to delineate a channel, and, by constructing a levee on each side of it, to reclaim all that land, subject it to the uses of the people, and make the stream navigable up to its capacity, as it was before that occurred, up into Missouri.

The proposition, however, has not been to impose the cost on the United States Government. It is thought that the land which is reclaimed from that swamp—it is Government land—will be sufficient, when disposed of, to pay the entire cost of the project; and the purpose of this survey is to determine whether or not it will.

Mr. KENYON. That being true, Mr. President, it throws a very different light on the subject. I am glad to have that information, because it seemed a most preposterous proposition; but the explanation of the Senator from Arkansas, of course, changes that situation.

Mr. SHEPPARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Texas?

Mr. KENYON. Yes.

Mr. SHEPPARD. Let me say to the Senator that since the unfavorable report to which he refers was made on the Sulphur River immense iron-ore deposits have been definitely blocked out in Cass County near the river; and it was in order to see if the river could be improved, with a view to establishing a channel for the transportation of that ore to the Gulf, that I asked for another survey. If the survey shows that the iron-ore deposits are not of sufficient value to justify an improvement, then that will be the end of it.

Another proposition, in connection with Days Creek, is to establish a canal from a point on the Sulphur to the city of Texarkana, an important city of some 20,000 people, which channel, in connection with the Sulphur River and the Red River, into which the Sulphur flows, will give a navigable waterway from Texarkana to New Orleans, the Gulf of Mexico, and the markets of the world. It was in order to have these questions decided that I asked for these two surveys. Texarkana is only 8 miles from the nearest point on Sulphur River, and even without the canalization of Days Creek would, in my opinion, benefit immensely by the improvement of the Sulphur.

Mr. KENYON. Yes, Mr. President; whenever any new survey or new appropriation is to be made there is always something just going to be discovered that will be great for commerce or there is a new barge line just being organized somewhere generally just before the river and harbor appropriation bill comes along. That has grown very customary. We have here a survey for the Arkansas River from Little Rock to its mouth. That is an instrumental survey. I am not going to say anything more about the Arkansas River.

Mr. CLARKE of Arkansas. If the Senator will permit me, I will say a few words about it.

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Arkansas?

Mr. KENYON. I do.

Mr. CLARKE of Arkansas. I desire to have that survey made for the purpose of putting Congress in the possession of a reliable statement of the actual conditions on that river from Little Rock to the mouth. We believe it is an excellent river—one of the principal rivers of the country. The surveys that have heretofore been made establish that fact. But the recent report—not survey, but report—to which the Senator from Iowa attaches so much importance, has rather thrown some doubt upon it. We wish a more detailed and accurate survey in order to disclose the fact whether it is one of the rivers of the country worthy of appropriations by the Government, so that we shall have a more tangible basis than we ever had on which to deal with it further.

Mr. KENYON. I pass from that, Mr. President. The Cache River we have heard much about. There was a survey provided for the Cache River. That the committee has eliminated. Another one of the items is Thunder Bay River, Mich., with a view to improving its mouth. The Black Lake Harbor, Mich., item is one of the committee amendments. There are items for the floods in the State of Kansas, and other propositions in Oregon, Virgin River, Nev., Tolovano River, Alaska. There are some 15 of those surveys in all, which of course practically means the commencement of further great expenditures.

I have called attention to these matters, Mr. President, simply because I desire that we shall have a vote on this proposition and not for the purpose in any way of delaying the proceeding. There are very few Senators here. There are only nine Senators in the Chamber. I should like to have a yea-and-nay vote and let that go as a quorum call.

Mr. CLARKE of Arkansas. If the Senator will permit me to make a short statement concerning that particular item, possibly it will not be necessary to have formal action by calling the yeas and nays. The proposed increase in amount from $250,000 to $350,000 was made by the committee principally upon the information contained in this communication, which is a letter from the Chief of Engineers dated May 3, 1916, addressed to the chairman of the committee. It says:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, May 3, 1916.

Hon. JAMES P. CLARKE,
Chairman Committee on Commerce, United States Senate.

SIR: 1. Referring to section 2 of the pending river and harbor bill, which authorizes certain preliminary examinations and surveys and appropriates the sum of $250,000 for payment of the expenses incurred in connection therewith, I have the honor to say that a rough calculation of the cost of the work involved by these examinations and surveys indicates that the appropriation is insufficient to complete all of the investigations authorized, and that it should be increased by $100,000, or to $350,000.
